Abbreviated Table of Contents

Preface	XXIII
Acknowledgement	XXVII
Contributors	XXVIII
Using This Book	XXXII
Part I Overview	1
Chapter 1 The History of Chinese Herbal Formulas	5
Chapter 2 Treatment Methods and Formulas	9
Chapter 3 Classification of Formulas	11
Chapter 4 Composition of Formulas	14
Chapter 5 Dosage Forms	16
Chapter 6 Preparation and Administration of Decoctions	19
Chapter 7 Weights and Measures	22
Chapter 8 Concurrent Use of Herbal Medicines and Pharmaceuticals	24
Part II Formula Monographs	25
Chapter 1 Exterior-Releasing Formulas	29
Chapter 2 Downward Draining Formulas	145
Chapter 3 Harmonizing Formulas	197
Chapter 4 Exterior- and Interior-Releasing Formulas	277
Chapter 5 Heat-Clearing Formulas	309
Chapter 6 Summer-Heat-Dispelling Formulas	429
Chapter 7 Interior-Warming Formulas	451
Chapter 8 Tonic Formulas	507
Chapter 9 <i>Shen</i> -Calming Formulas	703
Chapter 10 Orifice-Opening Formulas	739
Chapter 11 Astringent Formulas	765
Chapter 12 Qi-Regulating Formulas	815
Chapter 13 Blood-Regulating Formulas	863
Chapter 14 Wind-Expelling Formulas	959
Chapter 15 Dryness-Relieving Formulas	1017
Chapter 16 Damp-Dispelling Formulas	1059
Chapter 17 Wind-Damp Dispelling Formulas	1149
Chapter 18 Phlegm-Dispelling Formulas	1201
Chapter 19 Reducing, Guiding, and Dissolving Formulas	1259
Chapter 20 Antiparasitic Formulas	1285
Chapter 21 Emetic Formulas	1305
Chapter 22 Formulas that Treat Abscesses and Sores	1317
Part III Additional Resources	1389
Appendix 1 Cross-reference Based on Traditional Chinese Medicine Diagnosis	1393
Appendix 2 Cross-reference Based on Western Medicine Diagnosis	1397
Appendix 3 Formulas Offering Beneficial Effects to Support Pregnancy	1433
Appendix 4 Formulas Offering Beneficial Effects for Postpartum Care	1434
Appendix 5 Cautions / Contraindications for the Use of Formulas During Pregnancy	1435
Appendix 6 Dosing Guidelines	1437
Appendix 7 Weights and Measures: Chinese, British and Metric Systems	1439
Appendix 8 Convention on International Trade in Endangered Species (CITES)	1441
Appendix 9 Cross-reference of Single Herb Names	1442
Appendix 10 Cross-reference of Herbal Formula Names	1464
Appendix 11 Tables of Famous Doctors	1481
Bibliography of Historical Texts	1485
Bibliography of Contemporary References	1493
Glossary	1505
Index	1529
About the Authors	1619

Preface	XXIII
Acknowledgement	XXVII
Contributors	XXVIII
Using This Book	XXXII
Part I Overview	1
Biography of Huang Di	2
Chapter 1. The History of Chinese Herbal Formulas	5
Chapter 2. Treatment Methods and Formulas	9
Chapter 3. Classification of Formulas	11
Chapter 4. Composition of Formulas	14
Chapter 5. Dosage Forms	16
Chapter 6. Preparation and Administration of Decoction	19
Chapter 7. Weights and Measures	22
Chapter 8. Concurrent Use of Herbal Medicines and Pharmaceuticals	24
Part II Formula Monographs	25
Biography of Shen Nong	26
Chapter 1. Exterior-Releasing Formulas	29
Biography of Zhang Zhong-Jing	30
Section 1. Acrid and Warm Exterior-Releasing Formulas	39
<i>Ma Huang Tang</i> (Ephedra Decoction)	39
<i>Ma Huang Jia Zhu Tang</i> (Ephedra Decoction plus Atractylodes)	42
<i>Ma Xing Yi Gan Tang</i> (Ephedra, Apricot Kernel, Coicis, and Licorice Decoction)	43
<i>San Ao Tang</i> (Three-Unbinding Decoction)	43
<i>Da Qing Long Tang</i> (Major Bluegreen Dragon Decoction)	45
<i>Hua Gai San</i> (Canopy Powder)	48
<i>Jin Fei Cao San</i> (Inula Powder)	49
<i>Gui Zhi Tang</i> (Cinnamon Twig Decoction)	51
<i>Gui Zhi Jia Ge Gen Tang</i> (Cinnamon Twig Decoction plus Kudzu)	55
<i>Gui Zhi Jia Hou Po Xing Zi Tang</i> (Cinnamon Twig Decoction plus Magnolia Bark and Apricot Kernel)	55
<i>Gui Zhi Jia Shao Yao Tang</i> (Cinnamon Twig Decoction plus Peony)	55
<i>Gui Zhi Ma Huang Ge Ban Tang</i> (Combined Cinnamon Twig and Ephedra Decoction)	56
<i>Ge Gen Tang</i> (Kudzu Decoction)	59
<i>Jing Fang Yi Hao</i> (Neck Formula One)	62
<i>Jing Fang Er Hao</i> (Neck Formula Two)	62
<i>Jiu Wei Qiang Huo Tang</i> (Nine-Herb Decoction with Notopterygium)	64
<i>Da Qiang Huo Tang</i> (Major Notopterygium Decoction)	66
<i>Xiang Su San</i> (Cyperus and Perilla Leaf Powder)	67
<i>Jia Wei Xiang Su San</i> (Augmented Cyperus and Perilla Leaf Powder)	69
<i>Xiang Su Cong Chi Tang</i> (Cyperus, Perilla Leaf, Scallion, and Prepared Soybean Decoction)	69
<i>Xing Su Yin</i> (Apricot Kernel and Perilla Leaf Decoction)	70
<i>Shi Shen Tang</i> (Ten-Immortal Decoction)	72
<i>Xiao Qing Long Tang</i> (Minor Bluegreen Dragon Decoction)	74
<i>Xiao Qing Long Jia Shi Gao Tang</i> (Minor Bluegreen Dragon Decoction plus Gypsum)	78
<i>Jia Jian Xiao Qing Long Tang</i> (Modified Minor Bluegreen Dragon Decoction)	78
<i>She Gan Ma Huang Tang</i> (Belamcanda and Ephedra Decoction)	80
<i>Cang Er Zi San</i> (Xanthium Powder)	82
<i>Xin Yi San</i> (Magnolia Flower Powder)	84
<i>Xin Yi San</i> (Magnolia Flower Powder)	85
<i>Jia Wei Xin Yi San</i> (Augmented Magnolia Flower Powder)	85
<i>Qing Bi Tang</i> (Clear the Nose Decoction)	86
<i>You Bi Tang</i> (Benefit the Nose Decoction)	87

Table of Contents

Section 2. Acrid and Cold Exterior-Releasing Formulas	89
<i>Sang Ju Yin</i> (Mulberry Leaf and Chrysanthemum Decoction)	89
<i>Yin Qiao San</i> (Honeysuckle and Forsythia Powder)	92
<i>Yin Qiao Tang</i> (Honeysuckle and Forsythia Decoction)	94
<i>Yin Qiao Jie Du San</i> (Honeysuckle and Forsythia Powder to Relieve Toxicity)	95
<i>Ma Huang Xing Ren Gan Cao Shi Gao Tang</i> (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction)	96
<i>Jia Wei Ma Xing Gan Shi Tang</i> (Augmented Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction)	99
<i>Yue Bi Tang</i> (Maid servant from Yue Decoction)	101
<i>Yue Bi Jia Zhu Tang</i> (Maid servant from Yue Decoction plus <i>Atractylodes</i>)	102
<i>Sheng Ma Ge Gen Tang</i> (Cimicifuga and Kudzu Decoction)	103
<i>Sheng Ma Ge Gen Tang</i> (Cimicifuga and Kudzu Decoction)	104
<i>Xuan Du Fa Biao Tang</i> (Dissipate Toxins and Release the Exterior Decoction)	104
<i>Zhu Ye Liu Bang Tang</i> (Lophatherum, Tamarisk and <i>Arctium</i> Decoction)	106
<i>Chai Ge Jie Ji Tang</i> (Bupleurum and Kudzu Decoction to Release the Muscle Layer)	107
<i>Chai Ge Jie Ji Tang</i> (Bupleurum and Kudzu Decoction to Release the Muscle Layer)	110
<i>Cong Chi Jie Geng Tang</i> (Scallion, Prepared Soybean, and Platycodon Decoction)	111
<i>Cong Chi Tang</i> (Scallion and Prepared Soybean Decoction)	112
<i>Huo Ren Cong Chi Tang</i> (Scallion and Prepared Soybean Decoction from the Book to Safeguard Life)	112
<i>Ning Sou Wan</i> (Quiet the Cough Pill)	113
<i>Dun Sou San</i> (Long-Bout Cough Powder)	115
<i>Zhi Sou San</i> (Stop Coughing Powder)	116
<i>Zhi Ke Tang</i> (Stop Coughing Decoction)	118
<i>Jing Jie Lian Qiao Tang</i> (Schizonepeta and Forsythia Decoction)	120
<i>Xin Yi Qing Fei Yin</i> (Magnolia Decoction to Clear the Lung)	122
Section 3. Supporting [the Upright] and Releasing [the Exterior] Formulas	124
<i>Bai Du San</i> (Overcome Pathogenic Influences Powder)	124
<i>Ren Shen Bai Du San</i> (Ginseng Powder to Overcome Pathogenic Influences)	126
<i>Cang Lin San</i> (Old Rice Granary Powder)	127
<i>Shen Su Yin</i> (Ginseng and Perilla Leaf Decoction)	128
<i>Zai Zao San</i> (Renewal Powder)	130
<i>Ma Huang Fu Zi Xi Xin Tang</i> (Ephedra, Asarum, and Prepared Aconite Decoction)	132
<i>Ma Huang Fu Zi Gan Cao Tang</i> (Ephedra, Prepared Aconite, and Licorice Decoction)	134
<i>Cong Bai Qi Wei Yin</i> (Scallion Decoction with Seven Ingredients)	135
<i>Jia Jian Wei Rui Tang</i> (Modified Polygonatum Odoratum Decoction)	137
<i>Wei Rui Tang</i> (Polygonatum Odoratum Decoction)	138
Exterior-Releasing Formulas (Summary)	139
Chapter 2. Downward Draining Formulas	145
Biography of Zhang Jing-Yue	146
Section 1. Cold Purgatives	152
<i>Da Cheng Qi Tang</i> (Major Order the Qi Decoction)	152
<i>Fu Fang Da Cheng Qi Tang</i> (Revised Major Order the Qi Decoction)	155
<i>Jia Jian Cheng Qi Tang</i> (Modified Order the Qi Decoction)	156
<i>Xiao Cheng Qi Tang</i> (Minor Order the Qi Decoction)	158
<i>Tiao Wei Cheng Qi Tang</i> (Regulate the Stomach and Order the Qi Decoction)	160
<i>Da Xian Xiong Tang</i> (Major Sinking into the Chest Decoction)	161
<i>Da Xian Xiong Wan</i> (Major Sinking into the Chest Pill)	163
<i>Yi Zi Tang</i> (Yi Word Decoction)	164
<i>Qing Chang Tang</i> (Clear the Intestines Decoction)	165
Section 2. Warm Purgatives	166
<i>Da Huang Fu Zi Tang</i> (Rhubarb and Prepared Aconite Decoction)	166
<i>Wen Pi Tang</i> (Warm the Spleen Decoction)	169

Table of Contents

<i>San Wu Bei Ji Wan</i> (Three-Substance Pill for Emergencies)	171
<i>San Wu Bai San</i> (Three-Substance White Powder)	172
Section 3. Moist Laxatives	174
<i>Ma Zi Ren Wan</i> (Hemp Seed Pill)	174
<i>Wu Ren Wan</i> (Five-Seed Pill)	176
<i>Run Chang Wan</i> (Moisten the Intestines Pill)	177
<i>Run Chang Wan</i> (Moisten the Intestines Pill)	178
<i>Ma Zi Run Chang Wan</i> (Hemp Seed Pill to Moisten the Intestines)	178
<i>Ji Chuan Jian</i> (Benefit the River [Flow] Decoction)	179
Section 4. Harsh Expellants (Cathartics)	181
<i>Shi Zao Tang</i> (Ten-Jujube Decoction)	181
<i>Kong Xian Dan</i> (Control Mucus Special Pill)	182
<i>Zhou Che Wan</i> (Vessel and Vehicle Pill)	184
<i>Shu Zao Yin Zi</i> (Spread and Unblock Decoction)	185
Section 5: Purgative and Tonic Formulas	187
<i>Huang Long Tang</i> (Yellow Dragon Decoction)	187
<i>Xin Jia Huang Long Tang</i> (Newly-Augmented Yellow Dragon Decoction)	189
<i>Zeng Ye Cheng Qi Tang</i> (Increase the Fluids and Order the Qi Decoction)	190
<i>Cheng Qi Yang Ying Tang</i> (Order the Qi and Nourish the Nutritive Qi Decoction)	192
Downward Draining Formulas (Summary)	193
Chapter 3. Harmonizing Formulas	197
Biography of Wu You-Xing	198
Section 1. Shaoyang Harmonizing Formulas	206
<i>Xiao Chai Hu Tang</i> (Minor Bupleurum Decoction)	206
<i>Chai Hu Zhi Jie Tang</i> (Bupleurum, Bitter Orange, and Platycodon Decoction)	215
<i>Chai Hu Jie Du Tang</i> (Bupleurum Decoction to Relieve Toxicity)	215
<i>Chai Hu Gui Zhi Tang</i> (Bupleurum and Cinnamon Twig Decoction)	219
<i>Chai Ling Tang</i> (Bupleurum and Poria Decoction)	222
<i>Chai Xian Tang</i> (Bupleurum Decoction to Raise the Sunken)	226
<i>Hao Qin Qing Dan Tang</i> (Artemisia Annuua and Scutellaria Decoction to Clear the Gallbladder)	227
<i>Chai Hu Da Yuan Yin</i> (Bupleurum Decoction to Reach the Membrane Source)	230
<i>Da Yuan Yin</i> (Reach the Membrane Source Decoction)	231
<i>Qing Pi Yin</i> (Clear the Spleen Decoction)	231
Section 2. Liver and Spleen Harmonizing Formulas	233
<i>Si Ni San</i> (Frigid Extremities Powder)	233
<i>Zhi Shi Shao Yao San</i> (Immature Bitter Orange and Peony Powder)	236
<i>Chai Hu Shu Gan San</i> (Bupleurum Powder to Spread the Liver)	238
<i>Shu Gan Tang</i> (Spread the Liver Decoction)	241
<i>Chai Hu Qing Gan Tang</i> (Bupleurum Decoction to Clear the Liver)	243
<i>Chai Hu Qing Gan Tang</i> (Bupleurum Decoction to Clear the Liver)	244
<i>Zhi Zi Qing Gan Tang</i> (Gardenia Decoction to Clear the Liver)	245
<i>Yi Gan San</i> (Restrain the Liver Powder)	245
<i>Xiao Yao San</i> (Rambling Powder)	247
<i>Hei Xiao Yao San</i> (Black Rambling Powder)	252
<i>Jia Wei Xiao Yao San</i> (Augmented Rambling Powder)	254
<i>Shi Wei Xiao Yao San</i> (Ten-Ingredient Rambling Powder)	256
<i>Tong Xie Yao Fang</i> (Important Formula for Painful Diarrhea)	257
Section 3. Intestine and Stomach Harmonizing Formulas	261
<i>Ban Xia Xie Xin Tang</i> (Pinellia Decoction to Drain the Epigastrium)	261

Table of Contents

<i>Sheng Jiang Xie Xin Tang</i> (Fresh Ginger Decoction to Drain the Epigastrium)	268
<i>Gan Cao Xie Xin Tang</i> (Licorice Decoction to Drain the Epigastrium)	269
<i>Huang Lian Tang</i> (Coptis Decoction)	271
Harmonizing Formulas (Summary)	274
Chapter 4. Exterior- and Interior-Releasing Formulas	277
Biography of Liu Yuan-Su	278
Section 1. Exterior-Releasing and Interior-Attacking Formulas	283
<i>Da Chai Hu Tang</i> (Major Bupleurum Decoction)	283
<i>Chai Hu Tang</i> (Bupleurum Decoction)	287
<i>Hou Po Qi Wu Tang</i> (Seven-Substance Decoction with Magnolia Bark)	289
<i>Fang Feng Tong Sheng San</i> (Saposhnikovia Powder that Sagely Unblocks)	291
<i>Shuang Jie Tong Sheng San</i> (Double Relieve Powder that Sagely Unblocks)	294
Section 2. Exterior-Releasing and Interior-Clearing Formulas	295
<i>Ge Gen Huang Qin Huang Lian Tang</i> (Kudzu, Coptis, and Scutellaria Decoction)	295
<i>Ge Gen Huo Xiang Shao Yao Tang</i> (Kudzu, Pogostemon, and Peony Decoction)	298
<i>Shi Gao Tang</i> (Gypsum Decoction)	299
Section 3. Exterior-Releasing and Interior-Warming Formulas	301
<i>Wu Ji San</i> (Five-Accumulation Powder)	301
<i>Wu Ji San</i> (Five-Accumulation Powder)	303
<i>Chai Hu Gui Zhi Gan Jiang Tang</i> (Bupleurum, Cinnamon Twig, and Ginger Decoction)	304
Exterior- and Interior-Releasing Formulas (Summary)	306
Chapter 5. Heat-Clearing Formulas	309
Biography of Ye Gui	310
Section 1. Qi (Energy) Level-Clearing Formulas	321
<i>Bai Hu Tang</i> (White Tiger Decoction)	321
<i>Bai Hu Jia Gui Zhi Tang</i> (White Tiger plus Cinnamon Twig Decoction)	323
<i>Bai Hu Jia Cang Zhu Tang</i> (White Tiger plus Atractylodes Decoction)	324
<i>Bai Hu Jia Ren Shen Tang</i> (White Tiger plus Ginseng Decoction)	325
<i>Zhu Ye Shi Gao Tang</i> (Bamboo Leaves and Gypsum Decoction)	326
Section 2. Ying (Nutritive) Level-Clearing and Blood-Cooling Formulas	330
<i>Qing Ying Tang</i> (Clear the Nutritive Level Decoction)	330
<i>Xi Jiao Di Huang Tang</i> (Rhinoceros Horn and Rehmannia Decoction)	333
<i>Shen Xi Dan</i> (Magical Rhinoceros Special Pill)	335
<i>Qing Re Liang Xue Tang</i> (Clear Heat and Cool the Blood Decoction)	335
<i>Fu Zheng Yi Yan Tang</i> (Support the Upright and Suppress Cancer Decoction)	336
Section 3. Qi (Energy) and Xue (Blood) Levels-Clearing Formulas	337
<i>Qing Wen Bai Du Yin</i> (Clear Epidemics and Overcome Pathogenic Influences Decoction)	337
<i>Hua Ban Tang</i> (Transform Blotches Decoction)	339
Section 4. Heat-Clearing and Toxin-Eliminating Formulas	341
<i>Huang Lian Jie Du Tang</i> (Coptis Decoction to Relieve Toxicity)	341
<i>Lian Qiao Jie Du Tang</i> (Forsythia Decoction to Relieve Toxicity)	345
<i>Huang Lian Shang Qing Wan</i> (Coptis Pill to Clear the Upper)	347
<i>Qing Shang Fang Feng Tang</i> (Clear the Upper and Guard the Wind Decoction)	349
<i>Qing Re Jie Du Tang</i> (Clear Heat and Relieve Toxicity Decoction)	350
<i>Liang Ge San</i> (Cool the Diaphragm Powder)	351
<i>Qing Liang Yin</i> (Clearing and Cooling Decoction)	354

Table of Contents

<i>Pu Ji Xiao Du Yin</i> (Universal Benefit Decoction to Eliminate Toxin)	355
<i>Da Qing Tang</i> (Isatis Decoction)	358
<i>San Huang Xie Xin Tang</i> (Three-Yellow Decoction to Sedate the Epigastrium)	359
<i>San Huang Shi Gao Tang</i> (Three-Yellow and Gypsum Decoction)	361
<i>San Huang Shi Gao Tang</i> (Three-Yellow and Gypsum Decoction)	362
<i>Liu Shen Wan</i> (Six-Miracle Pill)	363
Section 5. Zang Fu-Clearing Formulas	365
<i>Dao Chi San</i> (Guide Out the Red Powder)	365
<i>Qing Xin Lian Zi Yin</i> (Lotus Seed Decoction to Clear the Heart)	368
<i>Zhi Zi Chi Tang</i> (Gardenia and Soja Decoction)	370
<i>Long Dan Xie Gan Tang</i> (Gentiana Decoction to Drain the Liver)	371
<i>Xie Qing Wan</i> (Drain the Green Pill)	376
<i>Long Dan Jiang Ya Pian</i> (Gentiana Pill to Lower [Blood] Pressure)	376
<i>Long Dan Jie Du Tang</i> (Gentiana Decoction to Relieve Toxicity)	376
<i>Zhi Zi Jiang Huo Tang</i> (Gardenia Decoction to Descend Fire)	377
<i>Dang Gui Long Hui Wan</i> (Tangkuei, Gentiana, and Aloe Pill)	379
<i>Xi Gan Ming Mu San</i> (Wash the Liver and Brighten the Eyes Powder)	381
<i>Xie Bai San</i> (Drain the White Powder)	383
<i>Ting Li Da Zao Xie Fei Tang</i> (Descurainia and Jujube Decoction to Drain the Lung)	384
<i>Qing Xin Li Ge Tang</i> (Clear the Epigastrium and Benefit the Diaphragm Decoction)	386
<i>Qing Xin Li Ge Tang</i> (Clear the Epigastrium and Benefit the Diaphragm Decoction)	387
<i>Xiang Sheng Po Di San</i> (Loud Sound Powder for a Broken Flute)	388
<i>Zuo Jin Wan</i> (Left Metal Pill)	389
<i>Wu Ji Wan</i> (Wu Ji Pill)	391
<i>Xiang Lian Wan</i> (Aucklandia and Coptis Pill)	391
<i>Qing Wei Tang</i> (Clear the Stomach Decoction)	392
<i>Qing Wei San</i> (Clear the Stomach Powder)	393
<i>Xie Huang San</i> (Drain the Yellow Powder)	396
<i>Yu Nu Jian</i> (Jade Woman Decoction)	398
<i>Gan Lu Yin</i> (Sweet Dew Decoction)	401
<i>Shao Yao Tang</i> (Peony Decoction)	402
<i>Shao Yao Yi Yi Ren Tang</i> (Peony and Coicis Decoction)	405
<i>Shao Yao Hou Po Tang</i> (Peony and Magnolia Bark Decoction)	405
<i>Huang Qin Tang</i> (Scutellaria Decoction)	406
<i>Bai Tou Weng Tang</i> (Pulsatilla Decoction)	408
<i>Bai Tou Weng Jia Gan Cao E Jiao Tang</i> (Pulsatilla Decoction plus Licorice and Ass-Hide Gelatin)	410
Section 6. Deficiency-Heat Clearing Formulas	412
<i>Qing Hao Bie Jia Tang</i> (Artemisia Annua and Soft-Shelled Turtle Shell Decoction)	412
<i>Zi Yin Qing Re Tang</i> (Nourish Yin and Clear Heat Decoction)	414
<i>Qin Jiao Bie Jia San</i> (Gentiana Macrophylla and Soft-Shelled Turtle Shell Powder)	416
<i>Qing Gu San</i> (Cool the Bones Powder)	418
<i>Dang Gui Liu Huang Tang</i> (Tangkuei and Six-Yellow Decoction)	420
<i>Zi Yin Jiang Huo Tang</i> (Nourish Yin and Descend the Fire Decoction)	422
Heat-Clearing Formulas (Summary)	424
Chapter 6. Summer-Heat-Dispelling Formulas	429
Biography of Wu Tang	430
<i>Qing Luo Yin</i> (Clear the Collaterals Decoction)	435
<i>Xiang Ru San</i> (Mosla Powder)	436
<i>San Wu Xiang Ru Yin</i> (Mosla Three Decoction)	438
<i>Shi Wei Xiang Ru Yin</i> (Ten-Ingredient Decoction with Mosla)	438
<i>Xin Jia Xiang Ru Yin</i> (Newly-Augmented Mosla Decoction)	439
<i>Liu Yi San</i> (Six-to-One Powder)	441

Table of Contents

<i>Liu Yi San</i> (Six-to-One Powder)	442
<i>Yi Yuan San</i> (Benefit the Basal Powder)	443
<i>Bi Yu San</i> (Jasper Powder)	443
<i>Ji Su San</i> (Peppermint Powder)	443
<i>Gui Ling Gan Lu Yin</i> (Cinnamon and Poria Sweet Dew Decoction)	444
<i>Qing Shu Yi Qi Tang</i> (Clear Summer-Heat and Augment the Qi Decoction)	446
<i>Qing Shu Yi Qi Tang</i> (Clear Summer-Heat and Augment the Qi Decoction)	448
Summer-Heat-Dispelling Formulas (Summary)	449
Chapter 7. Interior-Warming Formulas	451
Biography of Wang Shu-He	452
Section 1. Middle-Warming and Cold-Dispelling Formulas	459
<i>Li Zhong Wan</i> (Regulate the Middle Pill)	459
<i>Ren Shen Tang</i> (Ginseng Decoction)	462
<i>Li Zhong Hua Tan Wan</i> (Regulate the Middle and Transform Phlegm Pill)	462
<i>Fu Zi Li Zhong Wan</i> (Prepared Aconite Pill to Regulate the Middle)	463
<i>Gui Zhi Ren Shen Tang</i> (Cinnamon Twig and Ginseng Decoction)	466
<i>Wu Zhu Yu Tang</i> (Evodia Decoction)	467
<i>Xiao Jian Zhong Tang</i> (Minor Construct the Middle Decoction)	471
<i>Dang Gui Jian Zhong Tang</i> (Tangkuei Decoction to Construct the Middle)	473
<i>Huang Qi Jian Zhong Tang</i> (Astragalus Decoction to Construct the Middle)	475
<i>Gui Qi Jian Zhong Tang</i> (Tangkuei and Astragalus Decoction to Construct the Middle)	479
<i>Da Jian Zhong Tang</i> (Major Construct the Middle Decoction)	480
<i>An Zhong San</i> (Calm the Middle Powder)	484
Section 2. Yang-Resuscitating Formulas	486
<i>Si Ni Tang</i> (Frigid Extremities Decoction)	486
<i>Si Ni Jia Ren Shen Tang</i> (Frigid Extremities Decoction plus Ginseng)	488
<i>Tong Mai Si Ni Tang</i> (Unblock the Pulse Decoction for Frigid Extremities)	488
<i>Bai Tong Tang</i> (White Penetrating Decoction)	489
<i>Shen Fu Tang</i> (Ginseng and Prepared Aconite Decoction)	489
<i>Hui Yang Jiu Ji Tang</i> (Restore and Revive the Yang Decoction)	490
<i>Hei Xi Dan</i> (Lead Special Pill)	492
Section 3. Channel-Warming and Cold-Dispersing Formulas	494
<i>Dang Gui Si Ni Tang</i> (Tangkuei Decoction for Frigid Extremities)	494
<i>Dang Gui Si Ni Jia Wu Zhu Yu Sheng Jiang Tang</i> (Tangkuei Decoction for Frigid Extremities plus Evodia and Fresh Ginger)	498
<i>Huang Qi Gui Zhi Wu Wu Tang</i> (Astragalus and Cinnamon Twig Five-Substance Decoction)	500
Interior-Warming Formulas (Summary)	504
Chapter 8. Tonic Formulas	507
Biography of Qian Yi	508
Section 1. Qi-Tonifying Formulas	522
<i>Si Jun Zi Tang</i> (Four-Gentlemen Decoction)	522
<i>Yi Gong San</i> (Extraordinary Merit Powder)	525
<i>Bao Yuan Tang</i> (Preserve the Basal Decoction)	525
<i>Liu Jun Zi Tang</i> (Six-Gentlemen Decoction)	527
<i>Xiang Sha Liu Jun Zi Tang</i> (Six-Gentlemen Decoction with Aucklandia and Amomum)	531
<i>Xiang Sha Liu Jun Zi Tang</i> (Six-Gentleman Decoction with Cyperus and Amomum)	533
<i>Xiang Sha Yang Wei Tang</i> (Nourish the Stomach Decoction with Aucklandia and Amomum)	534
<i>Shen Ling Bai Zhu San</i> (Ginseng, Poria, and Atractylodes Macrocephala Powder)	535
<i>Qi Wei Bai Zhu San</i> (Seven-Ingredient Powder with Atractylodes Macrocephala)	539
<i>Shen Ling San</i> (Ginseng and Poria Powder)	539

Table of Contents

<i>Qi Pi Wan</i> (Guide the Spleen Pill)	540
<i>Bu Zhong Yi Qi Tang</i> (Tonify the Middle and Augment the Qi Decoction)	542
<i>Ju Yuan Jian</i> (Lift the Source Decoction)	548
<i>Sheng Xian Tang</i> (Raise the Sinking Decoction)	549
<i>Yi Qi Cong Ming Tang</i> (Augment the Qi and Increase Acuity Decoction)	551
<i>Sheng Mai San</i> (Generate the Pulse Powder)	554
<i>Ren Shen Ge Jie San</i> (Ginseng and Gecko Powder)	557
<i>Ren Shen Hu Tao Tang</i> (Ginseng and Walnut Decoction)	559
<i>Ren Shen Chong Cao Tang</i> (Ginseng and Cordyceps Decoction)	559
<i>Bu Fei Tang</i> (Tonify the Lung Decoction)	560
Section 2. Blood-Tonifying Formulas	562
<i>Si Wu Tang</i> (Four-Substance Decoction)	562
<i>Sheng Yu Tang</i> (Sage-Like Healing Decoction)	567
<i>Sheng Yu Tang</i> (Sage-Like Healing Decoction)	567
<i>Jia Wei Si Wu Tang</i> (Augmented Four-Substance Decoction)	568
<i>Zhuang Jin Tang</i> (Strengthen the Tendon Decoction)	568
<i>Tiao Jing Yi Hao</i> (Regulate Mense Formula One)	568
<i>Tiao Jing Er Hao</i> (Regulate Mense Formula Two)	568
<i>Tiao Jing San Hao</i> (Regulate Mense Formula Three)	569
<i>Tiao Jing Si Hao</i> (Regulate Mense Formula Four)	569
<i>Tao Hong Si Wu Tang</i> (Four-Substance Decoction with Safflower and Peach Pit)	571
<i>Wen Qing Yin</i> (Warming and Clearing Decoction)	575
<i>Wen Qing Yin</i> (Warming and Clearing Decoction)	577
<i>Wen Qing Yin</i> (Warming and Clearing Decoction)	577
<i>Guo Qi Yin</i> (Delayed Menstruation Decoction)	578
<i>Dang Gui Bu Xue Tang</i> (Tangkuei Decoction to Tonify the Blood)	580
<i>Gui Pi Tang</i> (Restore the Spleen Decoction)	583
<i>Gui Pi An Shen Tang</i> (Restore the Spleen and Tranquelize the Spirit Decoction)	587
<i>Zhi Gan Cao Tang</i> (Honey-Fried Licorice Decoction)	589
<i>Jia Jian Fu Mai Tang</i> (Modified Restore the Pulse Decoction)	591
<i>Nu Ke Bai Zi Ren Wan</i> (Platycladus Seed Pill for Females)	592

<i>Zi Xue</i> (Purple Snow)	752
<i>Xiao Er Hui Chun Dan</i> (Return of Spring Special Pill [Pediatric])	754
<i>Xing Jun San</i> (Troop-Marching Powder)	756
Section 2. Warm Orifice-Opening Formulas	758
<i>Su He Xiang Wan</i> (Liquid Styrax Pill)	758
<i>Guan Xin Su He Wan</i> (Coronary Styrax Pill)	760
<i>Zi Jin Ding</i> (Purple Gold Special Pill)	760
Orifice-Opening Formulas (Summary)	762
Chapter 11. Astringent Formulas	765
Biography of Fu Shan	766
Section 1. Exterior-Stabilizing Formulas to Stop Perspiration	773
<i>Yu Ping Feng San</i> (Jade Windscreen Powder)	773
<i>Huang Qi Fang Feng Tang</i> (Astragalus Decoction to Guard the Wind)	775
<i>Mu Li San</i> (Oyster Shell Powder)	776
Section 2. Lung-Restraining Formula to Relieve Cough	779
<i>Jiu Xian San</i> (Nine-Immortal Powder)	779
Section 3. Intestine-Binding Formulas to Stop Leakage	781
<i>Zhen Ren Yang Zang Tang</i> (True Man's Decoction for Nourishing the Organs)	781
<i>Si Shen Wan</i> (Four-Miracle Pill)	784
<i>Tao Hua Tang</i> (Peach Blossom Decoction)	787
<i>Chi Shi Zhi Yu Yu Liang Tang</i> (Halloysitum and Limonite Decoction)	788
Section 4. Jing (Essence)-Stabilizing Formulas to Stop Leakage	789
<i>Jin Suo Gu Jing Wan</i> (Metal Lock Pill to Stabilize the Essence)	789
<i>Shui Lu Er Xian Dan</i> (Water and Earth Two Immortals Special Pill)	790
<i>Liu Wei Gu Jing Wan</i> (Rehmannia Six and Lotus Stamen Pill)	791
<i>Sang Piao Xiao San</i> (Mantis Egg-Case Powder)	792
<i>Suo Quan Wan</i> (Shut the Sluice Pill)	795
<i>Fu Tu Dan</i> (Poria and Cuscuta Special Pill)	797
<i>Gui Zhi Jia Long Gu Mu Li Tang</i> (Cinnamon Twig Decoction plus Dragon Bone and Oyster Shell)	798
<i>Zhi Zhuo Gu Ben Wan</i> (Treat the Turbidity and Guard the Root Pill)	800
Section 5. Womb-Stabilizing Formulas to Stop Leakage	802
<i>Gu Jing Wan</i> (Stabilize the Menses Pill)	802
<i>Gu Chong Tang</i> (Stabilize Chong [Thoroughfare Channel] Decoction)	803

Table of Contents

<i>Zhen Ling Dan</i> (Rouse the Spirits Special Pill)	805
<i>Wan Dai Tang</i> (End Discharge Decoction)	806
<i>Yi Huang Tang</i> (Change the Yellow [Discharge] Decoction)	809
<i>Qing Dai Tang</i> (Clear the Discharge Decoction)	809
<i>Ba Wei Dai Xia Fang</i> (Eight-Ingredient Formula for Leukorrhea)	810
Astringent Formulas (Summary)	812
Chapter 12. Qi-Regulating Formulas	815
Biography of Li Shi-Zhen	816
Section 1. Qi-Moving Formulas	822
<i>Yue Ju Wan</i> (Escape Restraint Pill)	822
<i>Xiang Fu Wan</i> (Cyperus Pill)	824
<i>Jin Ling Zi San</i> (Melia Toosendan Powder)	825
<i>Yan Hu Suo San</i> (Corydalis Powder)	826
<i>Yan Hu Yi Hao</i> (Corydalis Formula One)	826
<i>Yan Hu Er Hao</i> (Corydalis Formula Two)	826
<i>Ban Xia Hou Po Tang</i> (Pinellia and Magnolia Bark Decoction)	827
<i>Zhi Shi Xie Bai Gui Zhi Tang</i> (Immature Bitter Orange, Chinese Chive, and Cinnamon Twig Decoction)	831
<i>Gua Lou Xie Bai Bai Jiu Tang</i> (Trichosanthes Fruit, Chinese Chive, and Wine Decoction)	832
<i>Gua Lou Xie Bai Ban Xia Tang</i> (Trichosanthes Fruit, Chinese Chive, and Pinellia Decoction)	832
<i>Jia Wei Gua Lou Xie Bai Tang</i> (Augmented Trichosanthes Fruit and Chinese Chive Decoction)	832
<i>Ju He Wan</i> (Tangerine Seed Pill)	833
<i>Tian Tai Wu Yao San</i> (Top-Quality Lindera Powder)	835
<i>San Ceng Hui Xiang Wan</i> (Fennel Seed Pill with Three Levels)	836

<i>Wen Jing Tang</i> (Warm the Channels Decoction)	919
<i>Ai Fu Nuan Gong Wan</i> (Mugwort and Cyperus Pill for Warming the Womb)	923
<i>Sheng Hua Tang</i> (Generation and Transformation Decoction)	925
<i>Tong Ru Wan</i> (Unblock the Breast Pill)	927
<i>Gui Zhi Fu Ling Wan</i> (Cinnamon Twig and Poria Pill)	928
<i>Duo Ming Wan</i> (Life-Taking Pill)	931
<i>Cui Sheng Tang</i> (Birth-Hastening Decoction)	931
<i>Zhe Chong Yin</i> (Break the Conflict Decoction)	933
<i>Bie Jia Jian Wan</i> (Soft-Shelled Turtle Shell Pill)	935
<i>Da Huang Zhe Chong Wan</i> (Rhubarb and Eupolyphaga Pill)	937

Section 2. Stop-Bleeding Formulas 939

<i>Shi Hui San</i> (Ten Partially-Charred Substances Powder)	939
<i>Zhi Xue Tang</i> (Stop Bleeding Decoction)	941
<i>Si Sheng Wan</i> (Four-Fresh Pill)	942
<i>Ke Xue Fang</i> (Coughing of Blood Formula)	943
<i>Huai Hua San</i> (Sophora Japonica Flower Powder)	944
<i>Huai Jiao Wan</i> (Sophora Japonica Fruit Pill)	946
<i>Xiao Ji Yin Zi</i> (Cirsium Decoction)	946
<i>Huang Tu Tang</i> (Yellow Earth Decoction)	948
<i>Jiao Ai Tang</i> (Ass-Hide Gelatin and Mugwort Decoction)	950

Blood-Regulating Formulas (Summary) 953

Chapter 14. Wind-Expelling Formulas 959

Biography of Wang Tao	960
-----------------------------	-----

Section 1. External-Wind Releasing Formulas 967

<i>Xiao Feng San</i> (Eliminate Wind Powder)	967
<i>Qu Feng San</i> (Dispel Wind Powder)	969
<i>Dang Gui Yin Zi</i> (Tangkuei Decoction)	970
<i>Chuan Xiong Cha Tiao San</i> (Ligusticum Chuanxiong Powder to be Taken with Green Tea)	973
<i>Ju Hua Cha Tiao San</i> (Chrysanthemum Powder to be Taken with Green Tea)	976
<i>Qian Zheng San</i> (Lead to Symmetry Powder)	977
<i>Zhi Jing San</i> (Stop Spasms Powder)	979
<i>Jia Wei Qian Zheng San</i> (Augmented Lead to Symmetry Powder)	980
<i>Yu Zhen San</i> (True Jade Powder)	981
<i>Wu Hu Zhui Feng San</i> (Five-Tiger Powder to Pursue Wind)	982

Table of Contents

<i>Xiao Xu Ming Tang</i> (Minor Prolong Life Decoction)	983
<i>Xiao Xu Ming Tang</i> (Minor Prolong Life Decoction)	985
<i>Xu Ming Tang</i> (Prolong Life Decoction)	986
<i>Da Qin Jiao Tang</i> (Major Gentiana Macrophylla Decoction)	988
<i>Wu Yao Shun Qi San</i> (Lindera Powder to Smooth the Flow of Qi)	990
Section 2. Internal-Wind Extinguishing Formulas	993
<i>Ling Jiao Gou Teng Tang</i> (Antelope Horn and Uncaria Decoction)	993
<i>Gou Teng Yin</i> (Uncaria Decoction)	995
<i>Gou Teng San</i> (Uncaria Powder)	996
<i>Zhen Gan Xi Feng Tang</i> (Sedate the Liver and Extinguish Wind Decoction)	999
<i>Jian Ling Tang</i> (Construct Roof Tiles Decoction)	1002
<i>Tian Ma Gou Teng Yin</i> (Gastrodia and Uncaria Decoction)	1004
<i>Tian Ma Jiang Ya Pian</i> (Gastrodia Pill to Lower [Blood] Pressure)	1006
<i>E Jiao Ji Zi Huang Tang</i> (Ass-Hide Gelatin and Egg Yolk Decoction)	1007
<i>Da Ding Feng Zhu</i> (Major Arrest Wind Pearl)	1009
<i>Xiao Ding Feng Zhu</i> (Minor Arrest Wind Pearl)	1011
<i>San Jia Fu Mai Tang</i> (Three-Shell Decoction to Restore the Pulse)	1011
<i>San Jia An Shen Wan</i> (Three-Shell Pill to Tranquelize the Spirit)	1011
Wind-Expelling Formulas (Summary)	1013
Chapter 15. Dryness-Relieving Formulas	1017
Biography of Tao Hong-Jing	1018
Section 1. Dispersing and Moistening Formulas	1025
<i>Xing Su San</i> (Apricot Kernel and Perilla Leaf Powder)	1025
<i>Sang Xing Tang</i> (Mulberry Leaf and Apricot Kernel Decoction)	1027
<i>Qiao He Tang</i> (Forsythia and Mint Decoction)	1028
<i>Qing Zao Jiu Fei Tang</i> (Eliminate Dryness and Rescue the Lung Decoction)	1029
Section 2. Nourishing and Moistening Formulas	1033
<i>Yang Yin Qing Fei Tang</i> (Nourish the Yin and Clear the Lung Decoction)	1033
<i>Bai He Gu Jin Tang</i> (Lily Bulb Decoction to Preserve the Metal)	1036
<i>Bu Fei E Jiao Tang</i> (Tonify the Lung Decoction with Ass-Hide Gelatin)	1039
<i>Yue Hua Wan</i> (Moonlight Pill)	1040
<i>Qiong Yu Gao</i> (Beautiful Jade Paste)	1041
<i>Mai Men Dong Tang</i> (Ophiopogonis Decoction)	1043
<i>Mai Men Yang Yin Tang</i> (Ophiopogonis Decoction to Nourish the Yin)	1045
<i>Sha Shen Mai Dong Tang</i> (Glehnia and Ophiopogonis Decoction)	1047
<i>Yu Ye Tang</i> (Jade Fluid Decoction)	1049
<i>Xiao Ke Fang</i> (Wasting and Thirsting Formula)	1051
<i>Yu Quan Wan</i> (Jade Spring Pill)	1052
<i>Zeng Ye Tang</i> (Increase the Fluids Decoction)	1054
Dryness-Relieving Formulas (Summary)	1057
Chapter 16. Damp-Dispelling Formulas	1059
Biography of Wang Ken-Tang	1060
Section 1. Damp-Drying and Stomach-Harmonizing Formulas	1068
<i>Ping Wei San</i> (Calm the Stomach Powder)	1068
<i>Chai Ping Tang</i> (Bupleurum and Calm the Stomach Decoction)	1071
<i>Jia Wei Ping Wei San</i> (Modified Calm the Stomach Powder)	1072
<i>Xiang Sha Ping Wei San</i> (Cyperus and Amomum Powder to Calm the Stomach)	1073
<i>Xiang Sha Ping Wei San</i> (Cyperus and Amomum Powder to Calm the Stomach)	1075
<i>Bu Huan Jin Zheng Qi San</i> (Rectify the Qi Powder Worth More than Gold)	1075

Table of Contents

<i>Fu Ling Yin</i> (Poria Decoction)	1077
<i>Huo Xiang Zheng Qi San</i> (Agastache Powder to Rectify the Qi)	1079
<i>Liu He Tang</i> (Harmonize the Six Decoction)	1082
<i>Liu He Tang</i> (Harmonize the Six Decoction)	1083
<i>Ge Hua Jie Cheng San</i> (Pueraria Flower Powder for Detoxification and Awakening)	1084
Section 2. Heat-Clearing and Damp-Dispelling Formulas	1086
<i>Yin Chen Hao Tang</i> (Artemisia Scoparia Decoction)	1086
<i>Zhi Zi Bai Pi Tang</i> (Gardenia and Phellodendron Decoction)	1089
<i>Yin Chen Si Ni Tang</i> (Artemisia Scoparia Decoction for Frigid Extremities)	1089
<i>Yin Chen Pai Shi Tang</i> (Artemisia Scoparia Decoction to Expel Stone)	1089
<i>Yin Chen Wu Ling San</i> (Artemisia Scoparia and Five-Ingredient Powder with Poria)	1090
<i>San Ren Tang</i> (Three-Nut Decoction)	1092
<i>Huo Po Xia Ling Tang</i> (Agastache, Magnolia Bark, Pinellia, and Poria Decoction)	1095
<i>Huang Qin Hua Shi Tang</i> (Scutellaria and Talcum Decoction)	1095
<i>Gan Lu Xiao Du Dan</i> (Sweet Dew Special Pill to Eliminate Toxins)	1096
<i>Lian Po Yin</i> (Coptis and Magnolia Bark Decoction)	1099
<i>Can Shi Tang</i> (Silkworm Droppings Decoction)	1101
<i>Ba Zheng San</i> (Eight-Herb Powder for Rectification)	1103
<i>Jia Wei Ba Zheng San</i> (Augmented Eight Herb Powder for Rectification)	1105
<i>Fu Fang Ba Zheng San</i> (Revised Eight-Herb Powder)	1105
<i>San Jin Pai Shi Tang</i> (Three Gold Decoction to Expel Stone)	1106
<i>Wu Lin San</i> (Five-Ingredient Powder for Painful Urinary Dysfunction)	1107
<i>Huo Xue Tong Lin Tang</i> (Invigorate the Blood to Unblock Dysuria Decoction)	1107
<i>Qing Re Tong Lin Tang</i> (Clear Heat to Unblock Dysuria Decoction)	1108
Section 3. Water-Regulating and Damp-Resolving Formulas	1109
<i>Wu Ling San</i> (Five-Ingredient Powder with Poria)	1109
<i>Si Ling San</i> (Four-Ingredient Powder with Poria)	1112
<i>Bai Mao Gen Tang</i> (Imperata Decoction)	1112
<i>Fu Ling Tang</i> (Poria Decoction)	1112
<i>Wei Ling Tang</i> (Calm the Stomach and Poria Decoction)	1113
<i>Zhu Ling Tang</i> (Polyporus Decoction)	1115
<i>Fang Ji Huang Qi Tang</i> (Stephania and Astragalus Decoction)	1118
<i>Fang Ji Fu Ling Tang</i> (Stephania and Poria Decoction)	1120
<i>Wu Pi San</i> (Five-Peel Powder)	1121
<i>Wu Pi San</i> (Five-Peel Powder)	1123
<i>Jiu Wei Bing Lang Jia Wu Fu Tang</i> (Areca Nine Decoction plus Evodia and Poria)	1123
<i>Mu Fang Ji Tang</i> (Cocculus Decoction)	1125
<i>Fen Xiao Tang</i> (Separate and Reduce Decoction)	1127
<i>Dao Shui Fu Ling Tang</i> (Poria Decoction to Drain Water)	1129
Section 4. Warm Formulas that Dissolve Dampness	1131
<i>Ling Gui Zhu Gan Tang</i> (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction)	1131
<i>Gan Cao Gan Jiang Fu Ling Bai Zhu Tang</i> (Licorice, Ginger, Poria and Atractylodes Macrocephala Decoction)	1133
<i>Zhen Wu Tang</i> (True Warrior Decoction)	1135
<i>Fu Zi Tang</i> (Prepared Aconite Decoction)	1137
<i>Shi Pi San</i> (Bolster the Spleen Powder)	1138
<i>Bi Xie Fen Qing Yin</i> (Dioscorea Hypoglauca Decoction to Separate the Clear)	1140
<i>Bi Xie Fen Qing Yin</i> (Dioscorea Hypoglauca Decoction to Separate the Clear)	1141
<i>Bi Xie Fen Qing Yin</i> (Dioscorea Hypoglauca Decoction to Separate the Clear)	1142
Damp-Dispelling Formulas (Summary)	1143
Chapter 17. Wind-Damp Dispelling Formulas	1149
Biography of Sun Si-Miao	1150

Table of Contents

Section 1. Wind-Damp Dispelling Formulas	1156
<i>Qiang Huo Sheng Shi Tang</i> (Notopterygium Decoction to Overcome Dampness)	1156
<i>Juan Bi Tang</i> (Remove Painful Obstruction Decoction)	1158
<i>Jian Bi Tang</i> (Remove Painful Obstruction in the Shoulders Decoction)	1160
<i>Du Huo Ji Sheng Tang</i> (Angelica Pubescens and Taxillus Decoction)	1161
<i>Yao Tong Fang Yi Hao</i> (Low Back Pain Formula One)	1164
<i>Yao Tong Fang Er Hao</i> (Low Back Pain Formula Two)	1164
<i>Xi Tong Fang Yi Hao</i> (Knee Pain Formula One)	1165
<i>Xi Tong Fang Er Hao</i> (Knee Pain Formula Two)	1165
<i>Ji Tong Tang</i> (Spine Pain Decoction)	1165
<i>San Bi Tang</i> (Three-Painful Obstruction Decoction)	1167
<i>Shu Jing Huo Xue Tang</i> (Relax the Channels and Invigorate the Blood Decoction)	1169
<i>Shu Jin Li An San</i> (Relax the Tendons and Instill Peace Powder)	1171
<i>Yi Yi Ren Tang</i> (Coicis Decoction)	1173
<i>Shang Zhong Xia Tong Yong Tong Feng Wan</i> (Upper, Middle, and Lower General Use Pill for Wind-Pain)	1175
<i>Tong Feng Wan</i> (Wind-Pain Pill)	1176
Section 2. Damp-Cold Dispelling Formulas	1177
<i>Xiao Huo Luo Dan</i> (Minor Invigorate the Collaterals Special Pill)	1177
<i>Da Huo Luo Dan</i> (Major Invigorate the Collaterals Special Pill)	1179
<i>Jia Wei Huo Luo Dan</i> (Augmented Invigorate the Collaterals Special Pill)	1180
<i>Da Fang Feng Tang</i> (Major Saposhnikovia Decoction)	1181
<i>Ji Ming San</i> (Powder to Take at Cock's Crow)	1183
Section 3. Damp-Heat Dispelling Formulas	1186

About the Authors	

Preface

The nomenclature for some herbs has been changed since the publication of *Chinese Medical Herbology and Pharmacology* in 2004. Most changes correspond to the 2005 edition of 中华人民共和国药典 *Zhong Hua Ren Min Gong He Guo Yao Dian* (Pharmacopoeia of the People's Republic of China), which is the official pharmacopoeia in China, as well as our primary reference for nomenclature. Changes have been made to:

- accurately reflect the part of the plant used, from *Ba Dou* (Fructus Crotonis) to *Ba Dou* (Semen Crotonis)
- correctly pronounce the *pinyin* name, from *Huang Bai* (Cortex Phellodendri) to *Huang Bo* (Cortex Phellodendri Chinensis)
- precisely describe the processing method, from *Zhi Gan Cao* (Radix Glycyrrhizae Praeparata) to *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)
- be more specific: *Kun Bu* (Thallus Laminariae seu Eckloniae) is separated into *Hai Dai* (Thallus Laminariae) and *Kun Bu* (Thallus Eckloniae)
- be more inclusive: from *Shan Ci Gu* (Pseudobulbus Cremastrae) to *Shan Ci Gu* (Pseudobulbus Cremastrae seu Pleiones)
- adapt to the current rules and regulations, from *Xi Xin* (Herba Asari) to *Xi Xin* (Radix et Rhizoma Asari). Note: The aerial parts of asarum contain aristolochic acid, and have been banned by many countries around the world. As a result, the root and rhizome of asarum are now used, as they are believed to have little or no aristolochic acid.¹
- and lastly, to humbly correct our previous errors, such as replacing the incorrect *Mu Fang Ji* (Radix Couulus Trilobus) with *Mu Fang Ji* (Radix Cocculi Trilobi).

Chinese Medical Herbology and Pharmacology	Chinese Herbal Formulas and Applications
<i>Ba Dou</i> (Fructus Crotonis)	<i>Ba Dou</i> (Semen Crotonis)
<i>Ba Yue Zha</i> (Fructus Akebiae)	<i>Yu Zhi Zi</i> (Fructus Akebiae)
<i>Bai Dou Kou</i> (Fructus Amomi Rotundus)	<i>Dou Kou</i> (Fructus Amomi Rotundus)

Complexities of the herbal nomenclature system in traditional Chinese medicine (TCM): Lessons learned from the misuse of Aristolochia-related species and the importance of the pharmaceutical name during botanical drug product development. *Phytomedicine* 2007;14:273-279.

Acknowledgement

We would like to thank all of our teachers, who have taught us everything we know, especially Drs. Chang Wei-Yen (Jimmy), Tan Teh-Fu (Richard), Zhang Xiao-Ping, Zhang Hua-Long, Jiao Shu-De, Sam Liang, Liu Zhi-Tong, Charlis Tsai and Tsai Wen-Qi.

Our thanks to Dan Bensky, Randall Barolet, Andrew Gamble, Giovanni Maciocia, Subhuti Dharmanada, Him-che Yeung, Nigel Wiseman and Feng Ye for their contributions to traditional Chinese medicine in the western worlds.

Our thanks to the team of co-authors, Eric Chen, Victor Jang, Delicia Liu, Minh Nguyen and Shenying Tang. Without their contributions, this book would still be a work in progress.

Our utmost appreciation to a team of many fine editors, Minh Nguyen, Thad Ekdahl, Catherine Lu, Laraine Crampton, Abba Anderson, Colleen Burke, Lily Huang, Cathy McNease, Marguerite Valance, Linda Joy Stone, and Kevin Inglis. You help to make this book a pleasure to read.

We warmly appreciate all of the other contributors and peer-reviewers, for your invaluable comments and suggestions.

Most importantly, we would like to thank our family: our father, for his vision and inspiration; our mom, for her endless love and support; and our family for reminding us to stop and smell the herbs throughout the twenty-year journey of writing this book.

The publication of *Chinese Herbal Formulas and Applications* would not have been possible without the help of everyone who has contributed. This book belongs to all of us.

John K. Chen
Tina T. Chen

First and foremost, I want to thank John and Tina for inviting me to participate and contribute to this exciting project. I feel honored to have had the opportunity to work and share my ideas with such an outstanding team of scholars, researchers, editors and visual artists.

Needless to say, editing a book of this size is impossible without the tremendous help, input and patience of many hardworking and talented people. My sincere thanks to all those who were involved; your hard work made my job a joy to fulfill. Very special thanks to my associate editors, Thad Ekdahl and Catherine Lu, for putting up with my demanding schedule. I also want to express admiration and deep gratitude to Laraine Crampton for her high editing standards and intelligent suggestions; this book is much more polished because of her input.

Heartfelt thanks and appreciation to all of my teachers, past and present, who shared their knowledge and joy of learning with me. In particular, I want to thank Wang Chiao-Nien for sharing his clinical experience and knowledge; he taught me the importance of touch and feeling, and, in doing so, taught me the wonders of healing. Much love and deepest appreciation to the wonderful, extraordinary people at Pangea Farm meditation center: Brother Norman Rosenberg, Tisha Roth and Laura Rosenberg. In opening up your door and hearts to me ten years ago, you guided me to Chinese medicine and healing. In teaching me the simple, but profound lessons of ground and breath, you showed me the incandescent beauty and infinite mysteries of life.

Minh Nguyen

Using This Book

Chinese Herbal Formulas and Applications is a compendium designed to be used with Chinese Medical Herbology and Pharmacology. Both texts have been created for use in the clinic, in the classroom, in research, and to preserve and convey valuable historical information that may yet prove crucial in our future. Written to empower practitioners to become better clinicians, it offers detailed discussion of traditional applications, Chinese therapeutic actions, clinical manifestations, clinical applications, modifications, cautions and/or contraindications, suggested concurrent acupuncture treatments, and a contemporary expansion of clinician training: potential herb-drug interactions. All of these features also serve students and faculty in academic settings. Research professionals and clinicians will find invaluable *in vitro* information on pharmacological effects and toxicology, and practical *in vivo* information from clinical and research studies.

Proper translation and use of Traditional Chinese Medicine (TCM) terminology is a challenging issue. Because Traditional Chinese Medicine and Western medicine have distinct cultural and philosophical influences, it is sometimes difficult to accurately convey some TCM terms and concepts by using English or allopathic clinical language. We have made sincere efforts to provide consistent standards for terms and concepts to bridge the gap, as follows:

~
The glossary at the end of this text provides definitions, as well as a cross-reference to Chinese characters, pinyin names, and the terminology used by Wiseman and Ye.
~

- Terms that have become an accepted part of English language discourse and are well understood by the general public, such as *qi*, *yin*, and *yang*, are not italicized or capitalized.
- Terms unique to the profession, understood primarily by TCM practitioners, are given in *pinyin*, italicized and translated but not capitalized; such as *bi zheng* (painful obstruction syndrome), *xiao ke* (wasting and thirsting syndrome), and *lin zheng* (dysuria syndrome).
- It is important to note that anatomical organ names in TCM imply functions distinct from their common understanding in Western medicine. Therefore, organ names are capitalized when discussed within the context of TCM, but not when referring exclusively to anatomical function. For example, *Qing Fei Tang* (Clear the Lung Decoction) is commonly used to clear **Lung** heat, a disorder of the **lungs** with such biomedical diagnoses as bronchitis, pneumonia, or bronchiectasis.

- Nouns distinct to herbal medicine are italicized, capitalized and translated, such as *Ren Shen* (Radix et Rhizoma Ginseng) and *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction).
- Translations are omitted after the first full use of the term in one monograph or segment of a monograph, unless repetition is necessary to insure clarity and safety in discriminating between substances or concepts.
- To avoid confusion, formulas other than the principal formula under consideration in a given monograph will be listed with their full *pinyin* and common names at each use, unless mentioned multiple times within a given paragraph.
- In some instances, we felt that rendering a highly precise translation of a Chinese word misses the common professional meaning/usage of the term. In these cases, the common usage has been chosen for the body of the text, while precise translation is offered in the glossary.
- The glossary provides additional information on individual terms and definitions. A cross-reference with the terminology chosen by **Wiseman** and **Feng** is also offered.

Although pertinent to the history, practice, and research of Chinese herbal medicine, not all herbs and formulas discussed herein are commercially available. Some rare or potentially-lethal medicinal substances that are *not* in contemporary use are included and discussed only to illustrate important concepts or historical value in traditional Chinese medicine. The discussion of these herbs and formulas in no way advocates resumption of use, or, in the case of endangered or at-risk species, further destruction of species or resources. These substances are included only to offer the accurate history of their critically important usage in traditional herbal medicine, and to serve as models for appropriate usage of effective herbal *substitutes*.

Readers are strongly encouraged to know and respect the rules and regulations for use of these substances in their own states and/or countries. Among these are:

Using This Book

- Endangered species, such as *Hu Gu* (Os Tigris) in *Hu Qian Wan* (Hidden Tiger Pill), and *Xi Jiao* (Cornu Rhinoceri) in *Xi Jiao Di Huang Tang* (Rhinoceros Horn and Rehmannia Decoction).
- Heavy metals, such as *Zhu Sha* (Cinnabaris) in *Zhu Sha An Shen Wan* (Cinnabar Pill to Tranquilize the Spirit), and *Hei Xi* (Lead) in *Hei Xi Dan* (Lead Special Pill).
- Illegal substances, such as *Ying Su Ke* (Pericarpium Papaveris) in *Jiu Xian San* (Nine-Immortal Powder).

One of the goals of this text is to bridge understanding between Traditional Chinese Medicine and Western medicine. To accomplish this goal, tremendous efforts have been made to research and discuss the Western scientific information available on herbal medicines, such as pharmacological effects, clinical studies and research, toxicology, and herb-drug interactions. Information is presented using the following parameters and general understandings:

- **References:** It has been our intention to cite from original and credible sources whenever possible. Selection of references was based on relevance, strong study design, English language, and use of human subjects whenever and wherever possible, with preference given to randomized, blinded, controlled studies over observational reports. However, not all references met our selection criteria, mostly because studies on Chinese herbs have been done predominately in China, and in Chinese. Therefore, instead of restricting ourselves and the readers to the limited amount of information that fit these strict criteria, we decided to use our best judgment in including relevant information from credible sources. Another limitation we encountered during the compilation of this text is the inaccessibility of some original articles, texts, and references—some are out of press and others simply cannot be located. Although some literature was not always as complete, detailed or current as we would prefer, we have made our best effort in all cases to convey as much information on the original source as possible, and occasionally have judged even limited information to be of some value.
- **Scientific and Medical Terminology:** For the occasional allopathic term that readers might find puzzling, we recommend accessing any standard allopathic medical dictionary. Since there is no need for translation or interpretation of these terms, we concluded that it was unnecessary and cumbersome to include such terms in the glossary of this text.
- **Medical Abbreviations and Symbols** are used in accordance with *Dorland's Illustrated Medical Dictionary*, 28th edition, published by Saunders.
- **Drug Names** are designated in this text by generic (proprietary) names only, or a combination of generic names. The generic names are referenced according to *Drug Facts and Comparisons*, which is updated monthly by Facts and Comparisons, a Wolters Kluwer company.

In addition to the general concepts described above, a brief explanation of headings found in each formula monograph is provided below.

IDENTIFICATION

Each formula is identified by four traits at the beginning of each formula monograph. **Chinese Characters** in both traditional and simplified forms are listed first. In cases where the traditional and simplified characters are identical, only one will be listed. **Pinyin Name** with Mandarin tone markings is provided to identify and pronounce the names as accurately as possible. The **Literal Name** is the name translated directly from its pinyin name. **Original Source** refers to the traditional text or reference in which the formula was first documented. This is an important aspect of identification because the original source then allows one to learn when, where, and by whom this formula was first developed. Lastly, when applicable, alternate names are given for formulas that have different pinyin, literal, or commercial names.

Accurate identification of herbal formulas is reasonably straightforward in most cases. Most formulas discussed in this text have distinct Chinese characters, pinyin names, and common names, and can be accurately identified. However, it is important to remember that Chinese herbal medicine has developed over two thousand years, across many dynasties,

Chinese herbal medicine has developed over two thousand years, across many dynasties, and by physicians separated by both time and geography. Therefore, it is not uncommon for one or more herbal formulas to have identical names, with similar or completely different compositions and functions.

Using This Book

and by physicians separated by both time and geography. Therefore, it is not uncommon for one or more herbal formulas to have identical names, with similar or completely different compositions and functions. Under such circumstances, the original source text must be stated to accurately differentiate the identities of the herbal formulas. We have listed two examples to illustrate this potential confusion:

- Example One: There are two formulas called *Chai Ge Jie Ji Tang* (Bupleurum and Kudzu Decoction to Release the Muscle Layer). Both have similar actions and compositions.
 - *Chai Ge Jie Ji Tang* (Bupleurum and Kudzu Decoction to Release the Muscle Layer) from *Shang Han Liu Shu* (Six Texts on Cold-Induced Disorders) focuses more on relieving the muscles, and consists mainly of exterior-releasing and muscle-relieving herbs.
 - *Chai Ge Jie Ji Tang* (Bupleurum and Kudzu Decoction to Release the Muscle Layer) from *Yi Xue Xin Wu* (Medical Revelations) is better at clearing heat, and consequently contains more heat-clearing herbs.
- Example Two: Two formulas sharing the name of *Yi Yi Ren Tang* (Coicis Decoction) have distinctly different compositions and functions.
 - *Yi Yi Ren Tang* (Coicis Decoction), from *Ming Yi Zhi Zhang* (Displays of Enlightened Physicians) by Huang Fu-Zhong in the 16th century, is a formula that dispels wind-dampness from the exterior to treat *bi zheng* (painful obstruction syndrome).
 - *Yi Yi Ren Tang* (Coicis Decoction), from *Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments) by Wang Ken-Tang in 1602, is a formula that dispels dampness from the Intestines, to treat intestinal abscess.

COMPOSITION

This section details the composition of the herbal formula, listing the ingredients and doses. The names of the herbs are given in *pinyin* and pharmaceutical names, following the same standards as the terminology listed in *Chinese Medical Herbology and Pharmacology*. Herbs that require special preparation are stated accordingly, with preparation methods defined in detail in the glossary. The doses of the herbs are given using standard metric weights and measurements. In cases in which the doses are unavailable from the source text, or if the contemporary doses are different, the suggested doses are provided in brackets.

While the authors hope that reading this section is easy and straightforward, writing it at times was quite difficult and challenging because of the wide variety of substance names. To streamline the writing and learning processes, we chose to use standardized names. The standardized *pinyin* names of herbs refer to the ones established by *Zhong Hua Ren Min Gong He Guo Yao Dian* (Chinese Herbal Pharmacopoeia by the People's Republic of China), published by the People's Republic of China, 2005. We used this reference as the standard for nomenclature of *pinyin* and pharmaceutical names because this text offers the most precise, accurate, and current information on the identification of Chinese herbs and other medicinal substances.

This decision obviously has its advantages and disadvantages. The main advantage in standardizing the nomenclature is to facilitate learning and minimize confusion and avoid errors. However, a true disadvantage is that the reader loses an historical sense of how an herb was originally used in the formula. We tried to compensate for this disadvantage with a brief explanation in **Authors' Comments** when appropriate. We believe this approach has more advantages than disadvantages, and hope the reader will understand and forgive us for taking such liberty. Listed below are two examples of how the herb names were standardized, along with short illustrations of their advantages and disadvantages.

- Example One: *Bing Pian* (Borneolum Syntheticum) is used as the standard nomenclature whereas in the past it may have been named as *Long Nao* or *Mei Pian*, and cited in such formulas as *Zhi Bao Dan* (Greatest Treasure Special Pill) and *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone). *Long Nao* and *Mei Pian* are alternate *pinyin* names of *Bing Pian* (Borneolum Syntheticum),

Using This Book

neither of which are used frequently today. This gradual historical drift in names may require some additional time to cross-reference in order to correctly identify these alternate names elsewhere.

- **Example Two:** *Shao Yao* (Radix Paeoniae) is a general name that may refer to either *Bai Shao* (Radix Paeoniae Alba) or *Chi Shao* (Radix Paeoniae Rubra). While keeping the general name will retain its historical context, providing the specific name will be more clinically relevant and helpful. Since the main emphasis of this text is on herbal formulas and their clinical applications, we kindly ask your pardon when we recommend *Bai Shao* (Radix Paeoniae Alba) in *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction), and *Chi Shao* (Radix Paeoniae Rubra) in *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill). Please see these two formulas for additional explanation.

Historically, the doses of herbs are stated using units from the Chinese system (such as *liang*, *qian*, and *fen*) or general descriptive terms, such as a certain number of pieces of *Ku Xing Ren* (Semen Armeniacae Amarum) or pills the size of egg yolks. While the general market place may still use such units and terms, academic and healthcare institutions have converted doses of herbal medicine to the metric system. Therefore, when necessary, we have also chosen to convert and present doses in metric weights and measurements. For additional background information on this conversion, see **Part 1, Chapter 7: Weights and Measures**.

DOSAGE / PREPARATION / ADMINISTRATION

This section describes the traditional methods for preparation and administration of the formula. Contemporary methods of preparation and administration are also discussed when applicable. The dosage here refers to that of the formula as a whole, not the dose of each ingredient.

Some formulas given as decoction do not have additional instructions on preparation or administration. In these cases, simply follow the generic method to prepare and administer the decoction, as described in **Part 1, Chapter 6: Preparation and Administration of Decoction**.

Some formulas commonly given as pills have lengthy, detailed descriptions of how to manufacture these products in large quantities. While this information may be interesting to some, it is not useful or practical to most. In these cases, readers may use their professional judgment and switch the dosage forms (e.g., from pills to decoction) and convert the doses of the ingredients accordingly.

CHINESE THERAPEUTIC ACTIONS

These are the treatment strategies that link the disease diagnosis with the therapeutic effects of the formulas.

CLINICAL MANIFESTATIONS

This section focuses on diagnosis of the disorder, and associated signs and symptoms. Tongue and pulse diagnoses are essential parts of TCM diagnosis and are listed here when applicable. The information presented in this section is drawn primarily from the original source texts and sometimes from the standard herbal formula textbooks used in mainland China. The diagnosis of the disorder and associated signs and symptoms are further elaborated upon and explained in the **Explanation** section.

CLINICAL APPLICATIONS

This section summarizes the primary clinical applications of the formula in terms of allopathic (biomedical) disease. Additional information justifying the formula's use for such conditions is found under **Pharmacological Effects and Clinical Studies and Research**.

Please note that this is not a comprehensive inclusive/exclusive list, but only a partial account of the most commonly used clinical applications. Inclusion of a biomedical disease in this list of applications does not imply that a given formula can be used indiscriminately for that particular disease. Similarly, the lack of mention of a biomedical disease here does not mean a given formula is ineffective for this condition. Listing of allopathic disease is designed to serve as a guide to assist practitioners in selecting the best possible formula. It is extremely important that the practitioner has

Using This Book

a complete and thorough understanding of the formula, and that he or she uses it to treat appropriate Chinese medical presentations, whether of specific allopathic conditions or not.

EXPLANATION

This section is divided into two main sections: explanation of the etiology of the disease, and the strategy underlying the herbal treatment. A chart is also provided to summarize the relationship of the formula to its diagnosis, signs and symptoms, treatment strategies, and functions of the herbs within the formula.

MODIFICATIONS

This section details how to modify the principal formula to treat complications and variations of the target condition.

CAUTIONS / CONTRAINDICATIONS

While it may be self-evident to experienced practitioners, new students and researchers or healthcare professionals from other fields will want to note in particular the cautions and/or contraindications mentioned for use of each formula. However, if there are none reported in the literature or known within the tradition, none will be mentioned. Careful observation of these cautions and/or contraindications ensures the safe and effective practice of Chinese herbal medicine with a minimum of unwanted side effects.

Information cited in this section is derived primarily from classic source texts, current textbooks, and research journals and articles. Cautions and contraindications are associated directly with the formulas as a whole, and not based on “cut and paste” information from individual ingredients. It is important to note that the cautions and contraindications of the formula as a whole are not the same as the sum of all cautions and contraindications of its individual ingredients. These formulas are carefully crafted with appropriate herbal checks and balances to ensure safety and efficacy. Thus, a particular herb that might individually be cautioned for use in a disease presentation may appear safely within a well-crafted formula to treat that disease pattern.

PHARMACOLOGICAL EFFECTS

Most pharmacological studies focus on the anatomical and physiological influences of the herbs on the body or against pathogens. For example, many formulas are described as having antihypertensive effects, as their administration leads directly to a decrease in blood pressure. Others are said to have antibacterial effects, for introduction of the formula leads to the inhibition or death of bacteria. However, it is extremely difficult to understand the exact mechanisms of action of the herbal formulas; each formula contains many herbs and each herb has many chemical constituents. As a result, most research information on individual herbs focuses on pharmacological effects, while research information on herbal formulas focuses on clinical studies.

CLINICAL STUDIES AND RESEARCH

This section briefly outlines the use of Chinese herbal formulas to treat allopathic (biomedical) diseases. The research methodologies vary from formula to formula and from disease to disease. While the use of the formula without modification may be appropriate in certain disorders, more complicated diseases will often require modifications in order for the formula to be effective. Although the traditional goal of research is to limit the number of variables and identify the causal relationships, this is often not possible with Chinese herbal medicine. Chinese herbs are used in multiple herb formulas to treat patients. Thus, most clinical studies and research cited include the use of many herbs, not simply a single substance under consideration. Although this increases the number of variables influencing the outcome, it nonetheless reflects the actual practice of Chinese herbal medicine and the basis on which centuries of refinement have been effectively carried forward.

Using This Book

HERB-DRUG INTERACTION

Herb-drug interaction is a critically important subject, yet there is, at this point in time, little definitive information available. A basic understanding of this topic can be found in Part I of *Chinese Medical Herbology and Pharmacology*, Chapter 8: "Concurrent Use of Herbal Medicines and Pharmaceuticals." Documented interactions between formulas and drugs are discussed in each formula monograph when relevant. Theoretical or hypothetical interactions are not included because they involve too much assumption and speculation. Where formula monographs do not contain any herb-drug interaction information, there was no known or documented interaction available to include in timely fashion at the time of publication. However, readers are strongly encouraged to stay updated, as new information on herb-drug complementarities and conflicts is published regularly.

Note: *Chinese Medical Herbology and Pharmacology* documents interactions between individual herbs and drugs, while *Chinese Herbal Formulas and Applications* records interactions between herbal formulas and drugs. Readers are urged to check both sources as needed to assure the safety and compatibility of herb and drug therapies.

TOXICOLOGY

In most cases, the toxicology of herbal formulas is reported based on *in vitro* studies. Readers are advised to examine and understand these reports with the same attention to context, proportion, and clinical application as they would in reviewing toxicology and/or *in vitro* studies for any medicine or supplement.

RELATED FORMULA(S)

These formulas have similar compositions and/or functions to the principal formula, or have grown out of the broader application of the principal formula. This section highlights the contrasting differences between the principal and related formula(s) without restating overlapping similarities.

AUTHORS' COMMENTS

This closing segment provides additional insights, clinical experience, and relevant information that do not clearly fall under the other categories. This section also offers detailed comparison and contrast of formulas when appropriate.

This section occasionally offers clinical insights on the formulas from contemporary practitioners. It should be noted that these insights were originally presented in the context of educational seminars, and not in published works; hence, there is often or usually no cited reference in these instances.

REFERENCES

Reference material is embedded in the text for ease of access via endnotes in each monograph. The key information from all of these notes has been carefully consolidated into two thorough bibliographic resources.

- The complete names of historical books (given in Chinese characters, *pinyin* names, and English names) are listed in the Bibliography of Historical Texts.
- The complete names of recent journals, articles and books are listed in the Bibliography of Contemporary References.

ADDITIONAL RESOURCES

In a text involving so many hundreds of pieces of information as *Chinese Herbal Formulas and Applications*, it is inevitable that on any given page a reader might find information that inspires curiosity about specific details that are not included in that particular monograph. The authors want to provide as much information as possible and to avoid overwhelming students and practitioners with excessive repetition and complexity that obscure key concepts and bog down progress through the general text.

Using This Book

For this reason, the reader will find in Part III, ten specialty appendices that provide intensive bodies of information at the close of the text, followed by a thorough glossary and the two bibliographies mentioned above. Each of these is self-contained and self-explanatory.

The authors are proud and grateful to have had an excellent gathering of committed and experienced professionals contributing to, and evaluating, the content of this textbook. We invite the reader to appreciate the wealth of training and experience these contributors, who are listed in the beginning of the text, have brought to bear on behalf of *Chinese Herbal Formulas and Applications*.

Last but not least, there is an extensive index at the close of Part III, linking terminology and topics throughout the text for the convenience of students, practitioners and researchers.

It is our hope that these features will contribute to the greatest accessibility and convenience in your use of this volume.

DISCLAIMER

Great care has been taken by the authors, editors, and other contributors to maintain the accuracy of the information contained in *Chinese Herbal Formulas and Applications*. All information has been evaluated, double-checked and cross-verified. However, in view of the potential for human, electronic, or mechanical error, neither the authors, the publisher, nor any contributors involved in the preparation or publication of this text warrant that the information contained herein is in every aspect accurate, and they are not responsible for any errors or omissions, nor for the results obtained from the use of said information.

Chinese Herbal Formulas and Applications is intended as an educational guide for healthcare practitioners, as professional training and expertise are essential to the safe practice of herbal medicine, in both recommendation of, and effective guidance of, the use of herbs. We cannot anticipate all conditions under which this information may be used. In view of ongoing research, changes in governmental regulation, and the constant flow of information relating to Chinese and Western medicine, the reader is urged to check with other sources for all up-to-date information. In recognition of that fact that practitioners accessing information in this text will have varying levels of training and expertise, we accept no responsibility for the results obtained by the application of the information within this text. Neither the publisher, authors, editors, nor contributors can be held responsible for errors of fact or omission, or for any consequences arising from the use or misuse of the information herein.

It is our intention to continually update and improve this text to maintain and enhance its usefulness. We welcome and encourage your comments and suggestions.

Part 1

— Overview

黃帝 Huǎng Dì

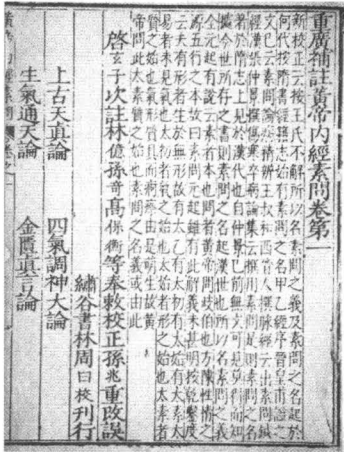

黃帝 Huǎng Dì, dates unknown.

黃帝 Huǎng Dì

Huang Di, also known as the “Yellow Emperor,” was the first leader to unite all of the tribes in ancient China at the dawn of recorded civilization. Huang Di treated all citizens in his kingdoms like his own sons and daughters, and he suffered great distress when they were ill. To improve healthcare, Huang Di personally learned medicine from many of his deputies. According to legend, Huang Di inquired about all aspects of medicine: this conversation was later recorded and published as *Huang Di Nei Jing* (Yellow Emperor’s Inner Classic).¹ The deputies that Huang Di consulted included 岐伯 Qi Bo, an authority in medicine; 桐君 Tong Jun, an expert in herbal medicine; 雷公 Lei Gong, the founder in the processing of herbs; 少俞 Shao Yu, an expert in acupuncture; and 伯高 Bo Gao, who knew pulse diagnosis in great detail. Of all the deputies, Qi Bo was considered the most knowledgeable, and was regarded by many as 天師 the Heavenly Physician.

Huang Di Nei Jing (Yellow Emperor’s Inner Classic), also abbreviated as *Nei Jing* (Inner Classic), is organized into two volumes: 素問 Su Wen (Basic Questions) and 靈樞 Ling Shu (Magic Pivot). It assembled and presented the fundamental theories of traditional Chinese medicine, including 陰陽 yin and yang, 五行 the five elements, 臟腑 the zang fu, and 經絡 the channels and collaterals. In addition to solidifying the fundamental theories of traditional Chinese medicine, the text was crucial in shaping the study of Chinese herbal formulas. Beyond the basic concepts, the text strongly emphasized the importance of holistic medicine, that the human body is a small universe within a bigger universe represented by the environment, each having close and inseparable connections within itself and to each other. Lastly, it stressed the importance of the prevention and treatment of disease, and discouraged belief in superstition and witchcraft.

¹ This legend, however, is only folklore. In actuality, *Huang Di Nei Jing* (Yellow Emperor’s Inner Classic) is believed to be a compilation of work by many physicians during the first and second century CE. They named it after Huang Di (Yellow Emperor) to honor his contribution to civilization in China.

黃帝內經 *Huang Di Nei Jing* (Yellow Emperor’s Inner Classic) compiled in the first or second century CE.

Chapter 1

— The History of Chinese Herbal Formulas

In the course of gathering food, humans discovered that certain plants, animals, and mineral substances have medicinal properties. Through trial and error in using these medical substances to treat various diseases, the Chinese discovered that combining substances was often more effective than using them individually. Such observations and experiences have been inventoried for thousands of years, and have led empirically to Chinese herbal medicine as it is practiced today.

五十二病方 *Wu Shi Er Bing Fang* (Prescriptions for Fifty-Two Kinds of Diseases) is the oldest record documenting the use of herbal formulas. It was unearthed in 1973 from the Number 3 Han Tomb at Ma Wang Dui, Changsha, in Hunan Province, and is estimated by archeologists to have been written in approximately the third century B.C. These medical writings, inscribed on silk fabric, include 280 herbal prescriptions to treat 52 kinds of diseases. While authorship remains unknown, this is the first known documentation to clearly outline the relationship between diseases and their corresponding treatments. The discussion of this relationship, however, lacks detail and explanation, and, without assigning names to formulas, contains only simple descriptions of herbs, doses, and dosage forms. While only briefly explaining the yin-yang relationship, it makes no reference to Five-Element theory or *zang fu* (solid and hollow organs) relationships. Although *Wu Shi Er Bing Fang* (Prescriptions for Fifty-Two Kinds of Diseases) is not a complete text by any means, it does represent a significant beginning in Chinese herbal medicine.

神农本草经 *Shen Nong Ben Cao Jing* (Divine Husbandman's Classic of the Materia Medica), compiled by numerous authors in the second century, A.D., is one of the first and most authoritative texts on Chinese herbal medicine. It contains information on 365 herbs, including details such as the taste, thermal property, doses, and toxicity. One of the earliest records of Chinese herbal medicine, it focuses primarily on individual herbs, not on herbal formulas.

黄帝内经 *Huang Di Nei Jing* (Yellow Emperor's Inner Classic), compiled in the first or second century A.D., is divided into two volumes: **素问** *Su Wen* (Basic Questions) and **灵枢** *Ling Shu* (Magic Pivot). Usually abbreviated as *Nei Jing* (Inner Classic), this text establishes the fundamental theories of Traditional Chinese Medicine. It documents thirteen herbal formulas, most of which are no longer used today; seven types of formulas (large, small, mild, urgent, odd-numbered, even-numbered, and composite); and dosage forms (decoction, pill, powder, paste, pellet, and medicinal wine). Additionally, it contains information on diagnosis, treatment methods, and principles, as well as the herbal formulas with accompanying explanations. In short, *Nei Jing* (Inner Classic) solidified the fundamental theories of Traditional Chinese Medicine, and was crucial in shaping the study of Chinese herbal formulas.

伤寒杂病论 *Shang Han Za Bing Lun* (Discussion of Cold-Induced Disorders and Miscellaneous Diseases), written by Zhang Zhong-Jing in the Eastern Han dynasty, is deemed to be one of the most important texts in all of traditional Chinese medicine. This text is considered the "ancestor" of contemporary herbal formulas, and the author is regarded as the "father" of traditional Chinese medicine. Zhang Zhong-Jing was the first doctor to discuss, in a systematic manner, the importance of and relationship among theory, strategy, formulas, and substances; and, moreover, to assert that all four components must be accurately developed and implemented to achieve successful treatment. This text contains a thorough, detailed discussion of 314 herbal formulas that were crafted with the utmost care and precision. Many of these formulas have stood the test of time and are still widely used today.

Chapter 1 — The History of Chinese Herbal Formulas

Shang Han Za Bing Lun (Discussion of Cold-Induced Disorders and Miscellaneous Diseases) was later rearranged and edited during the Jin dynasty by Wang Shu-He, who divided it into two parts: *伤寒论* *Shang Han Lun* (Discussion of Cold-Induced Disorders), which focused on externally-contracted diseases, and *金匱要略* *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) which emphasized internally-generated disorders.

During the Jin and Tang dynasties, *肘后备急方* *Zhou Hou Bei Ji Fang* (Emergency Formulas to Keep Up One's Sleeve) was written by Ge Hong in 341 A.D. This reference elucidated valuable descriptions of diseases and their corresponding treatments using herbs that were inexpensive, readily available, and effective. Herbal treatments included both single-herb remedies and composite herbal formulas.

During the seventh century Tang dynasty, Sun Si-Miao wrote *备急千金要方* *Bei Ji Qian Jin Yao Fang* (Thousands of Golden Prescriptions for Emergencies). This reference text discussed many different subjects, including general medical theories, diet, materia medica, herbal formulas, and acupuncture. It also included specific information on pediatrics, gynecology and obstetrics. *千金翼方* *Qian Jin Yi Fang* (Supplement to the Thousand Ducat Formulas), written by Sun Si-Miao in 682 A.D., is a complement to *Bei Ji Qian Jin Yao Fang* (Thousands of Golden Prescriptions for Emergencies). Together, these two texts contain 7,300 herbal formulas (5,300 in the original text, and 2,000 in the supplemented text), and are considered the representative medical works of the Tang dynasty.

Also during the Tang dynasty, *外台秘要* *Wai Tai Mi Yao* (Arcane Essentials from the Imperial Library) was compiled by Wang Tao in 752 A.D. This text contains approximately 6,000 herbal formulas derived from various sources, and is one of the most extensive texts compiled during that era. It serves as an important reference in the study of Chinese herbal medicine. Many of the formulas listed in this text are still in use today.

During the Song dynasty, two of the most comprehensive texts on Chinese herbal formulas were written. *太平圣惠方* *Tai Ping Sheng Hui Fang* (Holy Grace Formulary of the Tai Ping Era) was compiled by Wang Huai-Yin and other medical officials of the Imperial Medical Department. This text is 100 volumes long, and contains 16,834 herbal formulas. It includes detailed explanations on pulses, diagnosis (based on yin and yang, excess and deficiency), and treatment principles. The second extensive text published during this era is *圣剂总录* *Sheng Ji Zong Lu* (General Collection for Holy Relief), written by a staff of court physicians of the Northern Song dynasty around 1111-1117. This 200-volume text contains over 20,000 formulas. Sources of the formulas include secret recipes from within the imperial palace, as well as recipes submitted by physicians throughout the entire country. This text covers topics such as internal and external medicine, gynecology, pediatrics, acupuncture, osteopathy, and disorders of the five sensory organs (nose, eyes, lips, tongue, and ears). While the massive number of herbal formulas recorded is the strength of these two texts, it is also their main weakness. The girth of the texts compromises their practical value, and the sheer number of formulas dilutes their clinical significance.

~
The 200-volume *Sheng Ji Zong Lu*, from the Northern Song dynasty, covered internal and external medicine, gynecology, pediatrics, acupuncture, osteopathy, and disorders of the five sensory organs.
~

Finally, the Imperial Medical Department compiled and published *太平惠民和济局方* *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) in 1078-85. The original text contained only 297 herbal formulas, but the number increased to 788 in subsequent edits. Though this is not necessarily the most extensive record of herbal formulas, it is one of the most valuable ones. All the formulas listed were submitted by the best physicians in the country, with the clinical efficacy of each formula tested, reviewed, and confirmed by physicians in the Imperial Medical Department. Because this text was used as the official reference from which all herbal products were made, it became the first official pharmacopoeia in Chinese history published by the government. Many herbal formulas from this text are still in use today.

Chapter 1 — The History of Chinese Herbal Formulas

The Song dynasty also marks the continued development of pediatrics and gynecology. *小儿药症直决* *Xiao Er Yao Zheng Zhi Jue* (Craft of Medicinal Treatment for Childhood Disease Patterns), written by Qian Yi in 1119, contains two parts. Part one focuses on discussion of theories and etiologies of childhood diseases; part two emphasizes the herbal formulas for treating these diseases. *妇人大全良方* *Fu Ren Da Quan Liang Fang* (Complete Fine Formulas for Women), written by Chen Zi-Ming in 1237, was the most comprehensive work of its time on gynecology and obstetrics. Both of these works also contain practical clinical experiences on treatment.

伤寒论明理论 *Shang Han Lun Ming Li Lun* (Clarification of the Theory of Cold-Induced Disorders), written by Cheng Wu-Ji in 1156, is a relatively small, yet significant text. Although it lists only 20 formulas for treating *shang han* (cold damage) disorders, it dissects and analyzes every aspect of each formula. The first text to establish the theories and understanding of herbal formulas, it has made a significant impact on Chinese herbal medicine.

The Jin and Yuan Dynasties are characterized by the birth and development of four contrasting schools of thought. Liu Yuan-Su proposed the use of cold and cool substances, and compiled *宣明论方* *Xuan Ming Lun Fang* (Discussion of Dispersing and Brightening Formulas). Zhang Cong-Zheng promoted the use of downward-draining substances, and wrote *儒门事亲* *Ru Men Shi Qin* (Confucians' Duties to their Parents). Li Gao emphasized the use of Spleen and Stomach tonifying substances, and published *脾胃论* *Pi Wei Lun* (Discussion of the Spleen and Stomach). Lastly, Zhu Zhen-Heng focused on using yin-nourishing substances, and wrote *丹溪心法* *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi). The main significance of these four contrasting schools of thought is that they represent the emergence of specialties within Traditional Chinese Medicine. Each school provided great insight into the etiology of each disease and offered corresponding treatments. Many formulas from these four schools are still in use today.

The main significance of [the] four contrasting schools of thought is that they represent the emergence of specialties within TCM.

The Ming dynasty marks another step forward in the history and understanding of Chinese herbal formulas. *普济方* *Pu Ji Fang* (Formulas of Universal Benefit), a voluminous medical book compiled by Teng Hong, et al. under the auspices of Prince Zhu Su of the Ming dynasty, inventoried 61,739 herbal formulas in use at various medical branches. This text contains documentations of nearly all the formulas developed prior to this era, and has the most entries of any herbal formula reference.

The Qing dynasty marks the birth of the theory of *wen bing* (warm disease), another new school of thought proposing its own ideas of the origin of disorders and their complementary treatments. Many valuable theories and herbal formulas were developed during this time. Notable published works include *疫疹一得* *Yi Zhen Yi De* (Achievements Regarding Epidemic Rashes), by Yu Shi-Yu in 1794; *温病条辨* *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease), by Wu Ju-Tong in 1798; and *温病经纬* *Wen Re Jing Wei* (Warp and Woof of Warm-Febrile Diseases), by Wang Meng-Ying in 1852.

Chapter 1 — The History of Chinese Herbal Formulas

Table 1. Summary of Important Historical Texts on Chinese Herbal Formulas

Name	Author	Time	Description
<i>Wu Shi Er Bing Fang</i> (Prescriptions for Fifty-Two Kinds of Diseases)	Unknown	Third century B.C.	Earliest documentation of herbal formulas with 280 herbal prescriptions to treat 52 kinds of diseases
<i>Shen Nong Ben Cao Jing</i> (Divine Husbandman's Classic of the Materia Medica)	Numerous authors	Second century, A.D.	Contains information on 365 herbs, but no herbal formulas
<i>Huang Di Nei Jing</i> (Yellow Emperor's Inner Classic)	Unknown	First or second century A.D.	Documents 13 herbal formulas, seven types of formulas, and various dosage forms
<i>Shang Han Za Bing Lun</i> (Discussion of Cold-Induced Disorders and Miscellaneous Diseases)	Zhang Zhong-Jing	Eastern Han dynasty	One of the most important texts of Traditional Chinese Medicine; it contains thorough, detailed discussions on 314 herbal formulas
<i>Zhou Hou Bei Ji Fang</i> (Emergency Formulas to Keep Up One's Sleeve)	Ge Hong	341 A.D.	Valuable description of diseases and their corresponding treatment using herbs that are inexpensive, readily-available, and effective
<i>Bei Ji Qian Jin Yao Fang</i> (Thousands of Golden Prescriptions for Emergencies)	Sun Si-Miao	Seventh century A.D.	Documents 5,300 herbal formulas and many different subjects in TCM, including general medical theories, diet, materia medica, herbal formulas, and acupuncture
<i>Qian Jin Yi Fang</i> (Supplement to the Thousand Ducat Formulas)	Sun Si-Miao	682 A.D.	Documents 2,000 herbal formulas, as a supplement to <i>Bei Ji Qian Jin Yao Fang</i> (Thousands of Golden Prescriptions for Emergencies)
<i>Wai Tai Mi Yao</i> (Arcane Essentials from the Imperial Library)	Wang Tao	752 A.D.	Contains approximately 6,000 herbal formulas derived from various sources
<i>Tai Ping Sheng Hui Fang</i> (Holy Grace Formulary of the Tai Ping Era)	Wang Huai-Yin	Song dynasty	Contains 16,834 herbal formulas with detailed explanation of pulses, diagnosis (based on yin and yang, excess and deficiency), and treatment principles
<i>Sheng Ji Zong Lu</i> (General Collection for Holy Relief)	Staff of court physicians	Northern Song dynasty	Documents 20,000 formulas on topics such as internal and external medicine, gynecology, pediatrics, acupuncture, osteopathy, and disorders of the five sensory organs
<i>Tai Ping Hui Min He Ji Ju Fang</i> (Imperial Grace Formulary of the Tai Ping Era)	Imperial Medical Department	1078-85	A pharmacopoeia published by the Imperial Medical Department containing 788 herbal formulas that were officially tested, reviewed, and approved
<i>Xiao Er Yao Zheng Zhi Jue</i> (Craft of Medicinal Treatment for Childhood Disease Patterns)	Qian Yi	1119	First specialized text on pediatrics
<i>Fu Ren Da Quan Liang Fang</i> (Complete Fine Formulas for Women)	Chen Zi-Ming	1237	First specialized text on gynecology and obstetrics
<i>Shang Han Lun Ming Li Lun</i> (Clarification of the Theory of Cold-Induced Disorders)	Cheng Wu-Ji	1156	Contains detailed explanations and analyses of 20 formulas for treating <i>shang han</i> (cold damage)
<i>Xuan Ming Lun Fang</i> (Discussion of Dispersing and Brightening Formulas)	Liu Yuan-Su	Jin and Yuan dynasties	Part of the four contrasting schools of thought that focused on the use of cold and cool substances
<i>Ru Men Shi Qin</i> (Confucians' Duties to their Parents)	Zhang Cong-Zheng	Jin and Yuan dynasties	Part of the four contrasting schools of thought that focused on the use of downward-draining substances
<i>Pi Wei Lun</i> (Discussion of the Spleen and Stomach).	Li Gao	Jin and Yuan dynasties	Part of the four contrasting schools of thought that focused on using Spleen and Stomach tonifying substances
<i>Dan Xi Xin Fa</i> (Teachings of [Zhu] Dan-Xi)	Zhu Zhen-Heng	Jin and Yuan dynasties	Part of the four contrasting schools of thought that focused on the use of yin-nourishing substances
<i>Pu Ji Fang</i> (Formulas of Universal Benefit)	Teng Hong et al.	Ming dynasty	The most comprehensive text inventorying 61,739 herbal formulas of various medical branches
<i>Yi Zhen Yi De</i> (Achievements Regarding Epidemic Rashes)	Yu Shi-Yu	1794	An important text on <i>wen bing</i> (warm disease) theory
<i>Wen Bing Tiao Bian</i> (Systematic Differentiation of Warm Disease)	Wu Ju-Tong	1798	An important text on <i>wen bing</i> (warm disease) theory
<i>Wen Re Jing Wei</i> (Warp and Woof of Warm-Febrile Diseases)	Wang Meng-Ying	1852	An important text on <i>wen bing</i> (warm disease) theory

Chapter 2

— Treatment Methods and Formulas

The treatment method is the bridge between any disease and its effective herbal remedy. As such, a successful treatment requires accurate diagnosis of the disease, strategic planning of treatment methods, and careful consideration of which herbal formula to prescribe.

Treatment methods have been well-documented throughout the history of Chinese herbal medicine. The *Huang Di Nei Jing* (Yellow Emperor's Inner Classic) was the first text to discuss treatment methods of herbal formulas. Zhang Zhong-Jing further elaborated on this concept in *Shang Han Za Bing Lun* (Discussion of Cold-Induced Disorders and Miscellaneous Diseases). Most recently, in the Qing dynasty, Cheng Zhong-Ling sorted the most commonly-used treatment methods into eight methods in his text *Yi Xue Xin Wu* (Medical Revelations). Cheng stated that "the sources of illness are either externally contracted or internally generated," "the characteristics of the disease are differentiated into cold or hot, excess or deficiency, exterior or interior, and yin or yang," and the "treatment methods include sweating, vomiting, draining downward, harmonizing, warming, clearing, reducing, and tonifying."

八法 *Ba Fa* (The Eight Treatment Methods)

1. 汗法 *Han fa* (sweating) induces a mild sweat by ventilating and dispersing Lung qi, and regulating and harmonizing the *ying* (nutritive) and *wei* (defensive) levels. Herbs that ventilate and disperse Lung qi release the exterior and dispel pathogenic factors from the superficial areas of the body. Herbs that regulate and harmonize the nutritive and defensive levels ensure proper opening and closing of skin pores, thereby allowing the release of exterior pathogenic factors via sweat. It is important to remember that the objective of sweating is not to induce heavy perspiration, but only to obtain mild diaphoresis. To promote sweating itself is not the objective, but rather, the escape of sweat is a process that indicates that Lung qi has been ventilated and dispersed, that the nutritive and defensive levels have been regulated and harmonized, and that exterior pathogenic factors have been dispelled.

Sweating is primarily used to expel pathogenic factors at the exterior (skin) level. Clinical applications include the common cold, influenza, the early stages of measles, acute edema (especially above the waist), abscesses and sores with fever and chills, dysentery with exterior signs and symptoms, and many others.

Since complications frequently extend or worsen disease, and patients have differing constitutional strengths, sweating may often need to be modified to address these concerns. Exterior conditions characterized by cold are treated with acrid and warm herbs to release the exterior, while those characterized by heat are treated with acrid and cold herbs. Individuals who have an exterior condition accompanied by underlying deficiencies need to be treated with both sweating and tonifying methods concurrently. Those affected by both exterior and interior conditions may require both sweating and downward-draining methods.

2. 吐法 *Tu fa* (vomiting) induces emesis to eliminate phlegm, stagnant food, or toxic materials from the throat, chest and diaphragm, or epigastrium. Vomiting induces qi to move upwards and outwards. Therefore, use of this method commonly results in concurrent vomiting and sweating.

Clinical applications of vomiting include treatment for ingestion of poisonous substances, severe cases of food stagnation, sudden turmoil disorder with vomiting and diarrhea, mania and withdrawal caused by phlegm accumulation, and *zhong feng* (wind stroke) with phlegm accumulation.

Vomiting is a potent and drastic treatment method that can easily damage Stomach qi. Accordingly, it is generally reserved for acute and excess conditions, and in patients who are otherwise strong and healthy. Vomiting must be used with extreme caution in individuals who have underlying weakness and deficiency, such as pediatric, geriatric, or pregnant patients.

Chapter 2 — Treatment Methods and Formulas

3. 下法 *Xia fa* (**draining downward**) cleanses the Stomach and Intestines, induces defecation, and eliminates pathogenic accumulation from the body, such as stagnant food, dry stools, cold accumulation, hot accumulation, blood stasis, phlegm stagnation, water stagnation, parasitic infestation, and many others.

Draining downward is usually achieved with the use of four types of herbs: cold herbs that drain downward, hot herbs that drain downward, herbs that moisten the Intestines and drain downward, and harsh expellants (cathartics). Proper selection of herbs requires careful consideration of both the disease characteristics and the patient's constitution. Moreover, the method of draining downward should be modified if there are complications of the disease or changes in the constitution of the patient. For example, individuals with underlying deficiency may require concurrent treatment with both draining downward and tonifying.

4. 和法 *He fa* (**harmonizing**) regulates and accords complicated patterns of disease that affect multiple parts of the body. "Complicated patterns of disease" refers to concurrent presentation of hot and cold, or of deficiency and excess. "Multiple parts of the body" refers to a presentation of disease at both the exterior and interior, or affecting both *zang* (solid organs) and *fu* (hollow organs). Because of this complexity, it is insufficient to use only one of these eight methods of treatment.

Harmonizing is generally used to treat such disorders as *shaoyang* syndrome, *mo yuan* (membrane source) disorders, disharmony of the Liver and Spleen, concurrent presentation of heat in the Stomach and cold in the Intestines, irregularities of qi and blood, and disharmony of the nutritive and defensive levels.

5. 温法 *Wen fa* (**warming**) method warms the interior, dispels cold, restores yang, and unblocks the channels and collaterals. Warming is usually used to treat the presence of cold affecting the normal functions of *zang fu* organs, or stagnation of cold blocking the channels and collaterals.

Warming often needs to be modified since a disease may have different characteristics and patients have different body constitutions. Cold disorders may occur as a result of external invasion or internal injury and may reside in various parts of the body (such as in the upper, middle, or lower *jiaos*; *zang fu* organs; and channels or collaterals). It is also well known that cold typically affects individuals who have an underlying yang deficiency. In short, optimal treatment requires careful consideration of disease characteristics as well as patient conditions, and selection of appropriate treatment method or methods is of the utmost importance.

6. 清法 *Qing fa* (**clearing**) method clears heat, purges fire and cools the blood to treat diseases characterized by warmth, heat, fire, and toxins. It is also used in cases of heat with complications, such as damp-heat and yin-deficient fire.

Clearing generally needs to be modified to achieve optimal clinical results, since heat disorders may affect different parts of the body and cause various complications. "Different parts of the body" here refers to *qi* (energy) level, *ying* (nutritive) level, and *xue* (blood) level, as well as the *zang fu* organs. "Complications" refers to the presence of heat drying or damaging yin and body fluids. Therefore, optimal treatment requires proper selection of herbs to clear heat at the diseased area, and concurrent utilization of clearing and tonifying in individuals who have heat with underlying deficiencies.

7. 消法 *Xiao fa* (**reducing**) dissolves and disperses hardnesses and nodules to treat accumulation and stagnation of various substances, such as food, qi, blood, phlegm, water, and parasites. Reducing may be used to treat a wide variety of illness due to various causes.

In contrast to draining downward, which is generally used to treat acute and excess conditions via defecation, reducing is usually employed to address chronic conditions characterized by both deficiency and excess. These diseases are often located in the *zang fu* organs, channels and collaterals, or in the muscle tissues, and they are often present in some form of hardness or nodule that cannot be quickly eliminated. Thus, it becomes necessary to use reducing method to slowly dissolve and disperse the hardness and nodules. When necessary, reducing can be combined with tonifying or draining-downward method.

Selection of appropriate treatment methods is of the utmost importance.

Chapter 2 — Treatment Methods and Formulas

8. 补法 *Bu fa* (tonifying) nourishes, enriches, supplements, and benefits qi, blood, yin, and yang in the *zang fu* organs. Deficiency of qi, blood, yin, and yang seldom occur singularly; therefore, concurrent use of various tonics may be necessary to address such deficiencies. For example, chronic deficiency of qi often leads to decreased production (i.e., deficiency) of blood; and deficiency of yin is often accompanied by deficiency of yang. Furthermore, imbalance of the *zang fu* organs often occur together; likewise, concomitant use of various tonics may be required to address such imbalances. For example, Liver and Kidney yin deficiencies often occur together, and Heart and Spleen blood deficiencies generally accompany each other.

Tonifying must be used with caution in individuals with concurrent exterior excess and interior deficiency. With such conditions, sweating and tonifying must be used together to simultaneously release the exterior and supplement the interior. Use of sweating only may induce profuse perspiration and lead to more deficiency, while solely tonifying may complicate the illness by drawing the pathogenic factors from the exterior into the interior.

These eight treatment methods are all well-documented within the history of Chinese herbal medicine. Vomiting, however, has not been widely used, if at all, outside of mainland China. While vomiting may still be applicable, it is not as popular as the other seven methods. As stated earlier, it is often necessary to utilize more than one method when treating patients, as any one disease may have quite a few complications and may affect different parts of the body, while patients may have different underlying conditions.

Chapter 3

— Classification of Formulas

Many different systems have been proposed over the past two thousands years to organize and classify Chinese herbal formulas. Among the many different systems proposed are classifications based on characteristics of the formulas, treatment methods, primary function of the formulas, diseases, and special branches of medicine. The examples listed below are just some of the many systems documented in the history of Chinese herbal medicine.

七方 *Qi Fang* (Seven Types of Formulas), documented in *Huang Di Nei Jing* (Yellow Emperor's Inner Classic), is the first and the earliest attempt to describe and classify herbal formulas. It refers specifically to the following seven types of formulas: 大 *da* (large), 小 *xiao* (small), 缓 *huan* (mild), 急 *ji* (urgent), 奇 *qi* (odd-numbered), 偶 *ou* (even-numbered), and 复 *fu* (composite). *Da* (large) and *xiao* (small) refer to the number of ingredients and their doses within the formula.

Da (large) formulas contain a large number of ingredients and/or high dosages, and are designed to treat severe illnesses; and *xiao* (small) formulas contain a small number of ingredients and/or low dosages, and are designed to treat mild illnesses. *Huan* (mild) and *ji* (urgent) refer to the characteristic of the formula. *Huan* (mild) formulas are used to treat chronic diseases and must be taken for a long period of time, and *ji* (urgent) formulas are used to treat acute diseases and must be discontinued when the desired effects are achieved. *Qi* (odd-numbered) and *ou* (even-numbered) describe the number of ingredients in the formula. Examples of *qi* (odd-numbered) formulas include *Wu Ling San* (Five-Ingredient Powder with Poria) and *Qi Bao Mei Ran Dan* (Seven-Treasure

Chapter 3 — Classification of Formulas

Special Pill for Beautiful Whiskers), and examples of *ou* (even-numbered) formulas include *Si Jun Zi Tang* (Four-Gentlemen Decoction) and *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia). Lastly, *fu* (composite) formulas describe use of multiple herbs or formulas to treat more complicated illnesses, such as *Ba Zhen Tang* (Eight-Treasure Decoction) which is a *fu* (composite) formula composed of *Si Jun Zi Tang* (Four-Gentlemen Decoction) and *Si Wu Tang* (Four-Substance Decoction).

Qi Fang (Seven Types of Formulas) is a valuable tool that describes the general characteristic of the formulas and their clinical applications (such as severe or mild, acute or chronic, and simple or complicated illnesses). However, this method of classification is not very informative nor accurate, since it does not offer useful insights regarding the specific details of the formula nor the disease. Furthermore, certain statements from the original text do not seem to have any rational basis. For example, it stated that “diaphoretic formulas should not have even number of ingredients, and downward-draining formulas should not have odd number of ingredients.” Today, texts use *Qi Fang* (Seven Types of Formulas) to *describe*, not to *classify* the herbal formulas.

十剂 *Shi Ji* (Ten Types of Formulas), first mentioned by Xu Zhi-Cai in the sixth century, describes the ten primary functions of the formula: 宣 *xuan* (disseminate), 通 *tong* (unblock), 补 *bu* (tonify), 泄 *xie* (drain), 轻 *qing* (light), 重 *zhong* (heavy), 涩 *se* (stabilize and bind), 滑 *hua* (lubricate), 燥 *zao* (dry) and 润 *run* (moisten). Descriptions of these primary functions were further explained by Li Shi-Zhen in *Ben Cao Gang Mu* (Materia Medica), in which he stated “*xuan* (dissemination) treats clogging, *tong* (unblocking) treats stagnation, *bu* (tonifying) treats weakness, *xie* (draining) treats obstruction, *qing* (light) lifts and eliminates excess, *zhong* (heavy) anchors and controls anxiety, *se* (stabilizing and binding) treats *two zheng* (abandoned syndrome), *hua* (lubricating) eliminates retention, *zao* (drying) treats dampness, and *shi* (moistening) treats dryness.”

Finally in the Jin dynasty, Zhao Ji used the rationale in *Shi Ji* (Ten Types of Formulas) to formally classify formulas based on these primary functions in his work *Sheng Ji Jing* (Holy Relief Reference). This strategy of classifying herbal formulas based on their primary function was reiterated again in the Jin dynasty by Cheng Wu-Ji in his work *Shang Han Ming Li Yao Fang Lun* (Clarification of the Formulas and Herbs of Cold Induced Disorders). This marks the beginning and the consensus of classifying herbal formulas based on their primary functions.

Although this method provides an insightful description, the vastly different characteristics of the formulas cannot be categorized into these limited categories. As a result, the number of categories expanded over the years. 十二剂 *Shi Er Ji* (Twelve Types of Formulas) was proposed by Kou Zong-Shi in 1116 in his text *Ben Cao Yan Yi* (Extension of the Materia Medica). In addition to the pre-existing ten types, 寒 *han* (cold) and 热 *re* (hot) formulas were added to treat hot and cold diseases, respectively. Furthermore, Liao Zhong-Chun in the Ming dynasty added 升 *sheng* (ascending) and 降 *jiang* (descending) formulas to treat disorders in the upper and lower body, respectively.

Finally, Xu Si-He proposed 二十四剂 *Er Shi Si Ji* (Twenty-Four Types of Formulas) in his work *Yi Xue Quan Shu* (Complete Book of Medicine). In addition to the pre-existing ten types, fourteen more were added: 调 *tiao* (regulating), 和 *he* (harmonizing), 解 *jie* (releasing), 利 *li* (promoting), 温 *wen* (warming), 寒 *han* (cooling), 暑 *shu* (summer-heat), 火 *huo* (fire), 平 *ping* (pacifying), 夺 *duo* (guiding or despoiling), 安 *an* (calming), 缓 *huan* (mild), 淡 *dan* (bland), and 清 *qing* (clearing) formulas. *Er Shi Si Ji* (Twenty-Four Types of Formulas) represents the most complex system using this same rationale.

八阵 *Ba Zhen* (Eight Arrays of Formulas) was originally proposed by Zhang Jing-Yue in the Ming dynasty, and it classifies the formulas based on their characteristics. According to *Jing Yue Quan Shu* (Collected Treatises of [Zhang] Jing Yue), the eight arrays of formulas and their primary functions include 补 *bu* (tonic) formulas to treat deficiency, 和 *he* (harmonizing) formulas to treat disharmony, 攻 *gong* (attack) formulas to treat excess,

When Zhang Jing-Yue attempted to classify ancient and contemporary formulas, he recognized that eight arrays are insufficient to classify such a wide variety of formulas.

Chapter 3 — Classification of Formulas

散 *san* (disperse) formulas to disperse exterior conditions, 寒 *han* (cold) formulas to clear heat, 热 *re* (hot) formulas to dispel cold, 固 *gu* (stabilize) formulas to stop loss (of body fluids), and 因 *yin* (pattern-specific) formulas are used to treat specific disorders. However, when Zhang Jing-Yue attempted to classify 1,516 ancient and 186 contemporary formulas, he recognized that eight arrays were insufficient to classify such a wide variety of formulas. As a result, he added four additional categories: women's disorders (186 formulas), pediatric disorders (171 formulas), rashes (174 formulas), and external medicine (391 formulas).

The value of this method is that prior to this time, although many texts had been published on the classification of herbal formulas, many of them were not clinically useful because they were either too complex or overly simplified. *Ba Zhen* (Eight Arrays of Formulas) was an effective way to classify herbal formulas as it established a quick and meaningful way to find a useful formula to treat a given disease and/or patient.

二十二剂 *Er Shi Er Ji* (Twenty-Two Types of Formulas) was devised in 1682 during the Qing dynasty by Wang Ang in his work *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas). Wang emphasized classifying herbal formulas based on the primary function of the formula, etiology of the disease, and specific branches of medicine. The 22 categories include 补养 *bu yang* (tonify and nourish), 发表 *fa biao* (disperse the exterior), 涌吐 *yong tu* (induce vomiting), 攻里 *gong li* (attack the interior), 表里 *biao li* (simultaneous treatment of the exterior and interior), 和解 *he jie* (harmonize and relieve), 理气 *li qi* (regulate the qi), 理血 *li xue* (regulate the blood), 祛风 *qu feng* (dispel wind), 祛寒 *qu han* (dispel cold), 清暑 *qing shu* (clear summer-heat), 利湿 *li shi* (resolve dampness), 润燥 *run zao* (moisten dryness), 泻火 *xie huo* (drain fire), 除痰 *chu tan* (eliminate phlegm), 消导 *xiao dao* (eliminate and guide out stagnation), 收涩 *shou se* (stabilize and bind), 杀虫 *sha chong* (kill parasites), 明目 *ming mu* (improve the vision), 痈疽 *yong yang* (abscesses and sores), 经产 *jing chan* (menstruation and childbirth), and 救急 *jiu ji* (emergencies).

The classification proposed by Wang Ang is regarded by many as one of the more comprehensive and clinically viable categorizations of herbal formulas. Many subsequent texts (including most textbooks today) follow these established guidelines with minor modifications. Today, textbooks on herbal formulas follow various rationales and systems as described above. Most textbooks contain approximately 18 to 21 categories. Many categories also have sub-categories to further delineate the similarities and differences among these formulas.

Chapter 4

— Composition of Formulas

Principles of Formulation

Successful treatment requires an accurate differential diagnosis, a strategic treatment plan, and effective herbal formulas. To ensure efficacy of the herbal treatment, *Huang Di Nei Jing* (Yellow Emperor's Inner Classic) used the system of *Jun Chen Zuo Shi* (Chief, Deputy, Assistant, Envoy) as the guiding principle in herbal formulation. Although the general concept has been expanded since then, the basic principles remain the same. The system consists of four components, each playing an important and essential function within the formula.

- **君药 *Jun yao* (chief herb)** is used to treat the key disease or symptom. It is the essential ingredient that must be present in every formula. *Jun yao* (chief herb) is used at a large dose to maximize the effect.
- **臣药 *Chen yao* (deputy herb)** has two main functions: 1) it reinforces the effect of *jun yao* (chief herb) to treat the key disease or symptom; and 2) it treats the associated or coexisting diseases or symptoms.
- **佐药 *Zuo yao* (assistant herb)** has three main functions: 1) it reinforces the effect of *jun yao* (chief herb) or *chen yao* (deputy herb) to treat the disease, or directly treats the secondary symptoms; 2) it counteracts the toxicity or minimizes the drastic effects of the *jun yao* (chief herb) or *chen yao* (deputy herb); and 3) has an opposite effect as, but works in synergy with, the *jun yao* (chief herb) to treat the most serious and complex disorders.
- **使药 *Shi yao* (envoy herb)** has two main functions: 1) it acts as a channel-guiding herb to direct the formula to the affected channels/areas of the body; and 2) it harmonizes all of the herbs within the formula. *Shi yao* (envoy herb) is usually used only in small doses.

The *Jun Chen Zuo Shi* (Chief, Deputy, Assistant, Envoy) system is to be used flexibly, and in accordance with the condition of the patient.

The chief herb is the most essential component in every formula. Generally speaking, every formula has only one or two chief herbs used at a large dose to treat the key disease or symptom. The use of multiple chief herbs or at a lower dose is not desirable, since such practice will compromise the overall effectiveness of the formula. The other three components all have two or more functions, and are generally used at lower doses when compared to the chief herb.

It is important to note that *Jun Chen Zuo Shi* (Chief, Deputy, Assistant, Envoy) is a system to be used flexibly, and that the formulas must be prescribed in accordance with the condition of the patient. Thus, it is not necessary for all formulas to contain all four components. For example, for illnesses of simple etiology, use of one chief herb and two deputy herbs will often suffice to treat the condition. Or, in cases in which the chief herb is not toxic and does not have drastic effects, it is unnecessary to use an assistant herb to counteract the toxicity or minimize the drastic effects of the chief herb. Lastly, in cases in which the chief herb also enters the diseased channel or affected area of the body, the use of an envoy herb as a channel-guiding herb is not needed.

Please refer to *Ma Huang Tang* (Ephedra Decoction) for an explanation of *Jun Chen Zuo Shi* (Chief, Deputy, Assistant, Envoy) and how these terms apply within an herbal formula.

Chapter 4 — Composition of Formulas

Modifications of Formulation

While it is extremely important to follow the essential guidelines in composing an herbal formula, it is just as important to remain flexible and customize the treatment to the individual conditions and needs of the patient. Factors that require additional consideration include age, body weight, clinical presentations of the disease, and the underlying constitution of the patient. Ingredients, doses, and the dosage forms may be adjusted to optimize the treatment results.

- Ingredients:** The formulas listed in this text are designed to treat certain conditions. However, many patients will not clinically show such textbook presentations. Use of a fixed formula without modification to address the varied condition will produce suboptimal results. Therefore, it is necessary to modify the formula to properly and adequately address the variations of each condition. For example, *Ma Huang Tang* (Ephedra Decoction) is designed to treat exterior-excess, wind-cold syndrome, and is composed of four ingredients: *Ma Huang* (Herba Ephedrae), *Gui Zhi* (Ramulus Cinnamomi), *Ku Xing Ren* (Semen Armeniacae Amarum) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle). When needed, herbs may be added or removed to address the variation of this condition. *Ma Huang Jia Zhu Tang* (Ephedra Decoction plus Atractylodes) is designed to treat exterior-excess, wind-cold syndrome with damp accumulation, and is composed of the same four ingredients plus *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) to dry dampness. *San Ao Tang* (Three-Unbinding Decoction) is designed to treat exterior wind-cold affecting the Lung, and is composed of *Ma Huang* (Herba Ephedrae), *Ku Xing Ren* (Semen Armeniacae Amarum) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). The removal of *Gui Zhi* (Ramulus Cinnamomi) decreases the diaphoretic and exterior-releasing effects of the formula, and shifts its emphasis more toward ventilating the Lung.
- Dosages:** Dosages of ingredients play an important role in the overall function of the formula. Generally speaking, large doses are used for acute or severe conditions, and smaller doses are used for chronic or mild conditions. Furthermore, dosage adjustments are needed for pediatric or geriatric patients, or individuals with larger or smaller body weights. In some cases, without changing the ingredients, changes in dosages will alter the overall function of the formula. For example, *Si Ni Tang* (Frigid Extremities Decoction) and *Tong Mai Si Ni Tang* (Unblock the Pulse Decoction for Frigid Extremities) contain the same three ingredients, but have different clinical functions and applications. *Si Ni Tang* (Frigid Extremities Decoction) contains a small amount of *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis), and is used to restore the depleted yang and rescue the patient from collapse. On the other hand, *Tong Mai Si Ni Tang* (Unblock the Pulse Decoction for Frigid Extremities) contains larger doses of *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis), and is used to treat true-cold, false-heat syndrome (true presence of cold in the interior and false symptoms of heat at the exterior). Please see *Si Ni Tang* (Frigid Extremities Decoction) for detailed explanation of the differences between these two formulas and syndromes.
- Dosage forms:** Herbs may be given in various dosage forms, including but not limited to decoction, powder, pills, etc. Each form has its own advantages and disadvantages, and selection will depend on condition, constitution and compliance. Condition of the disorder often plays an important role in deciding what dosage form to use. For example, *Li Zhong Wan* (Regulate the Middle Pill) and *Ren Shen Tang* (Ginseng Decoction) have the exact same ingredients and doses, and differ only in dosage form, which is dictated by change in clinical indication. *Li Zhong Wan* is given as pills to treat the chronic condition of deficiency and cold of the middle *jiao*. *Ren Shen Tang* is administered as decoction to treat the acute condition of *xiong bi* (painful obstruction of the chest). Please refer to the next chapter, which provides a detailed discussion of various dosage forms.

Chapter 5

— Dosage Forms

Discussion of dosage forms was first documented in *Huang Di Nei Jing* (Yellow Emperor's Inner Classic) during the first or the second century A.D. This historical text provides a description of many dosage forms such as decoction, pills, powder, soft extracts, medicinal wine, and pellets. Although this description comprised a noble beginning, over the next two thousand years, many additional dosage forms have been developed and used. Listed below are many of the most commonly-used contemporary dosage forms, along with a brief discussion. While this text focuses on the traditional preparations of herbal formulas listed in *Huang Di Nei Jing* (Yellow Emperor's Inner Classic), readers are encouraged to use their own creativity to devise the best possible dosage form according to their patients' needs.

Please note that the information below represents the general description for each dosage form. Specific, detailed information is found in each formula monograph, under the section **DOSAGE / PREPARATION / ADMINISTRATION**.

Decoctions may be applied topically as an herbal wash or soak, as well as gargled or swallowed.

汤剂 Tang ji (decoction) is one of the most commonly-used dosage forms for administering Chinese herbs. The general protocol for preparation is to first soak the herbs in water, cook them at a certain temperature for a certain amount of time (depending on the herbs), filter and save the decoction liquid while discarding the herb residue, and administer the decoction while warm. The exact instructions for preparing each decoction vary, depending on the formula purpose and the herbs used. The advantages of decoction include quick absorption, fast onset of action, and flexibility to customize herbal formulas for each patient. In addition to oral ingestion, decoction may also be applied topically as an herbal wash, an herbal soak, and a solution for mouth gargle. Examples of formulas historically given in decoction include *Ma Huang Tang* (Ephedra Decoction) and *Da Cheng Qi Tang* (Major Order the Qi Decoction). Note: Additional information on preparation and administration of decoctions is listed in **Part I Overview, Chapter 6: Preparation and Administration of Decoctions**.

散剂 San ji (powder) is also a frequently-used dosage form, and is prepared by grinding and blending all of the ingredients into small particles. Powdered herbs may then be used either internally or externally. For internal use, if only a small dose is needed, such as *Qi Li San* (Seven-Thousandths of a Tael Powder), mix the powder with warm water and ingest without modification. If a large dose is needed, such as *Xiang Su San* (Cyperus and Perilla Leaf Powder), cook the coarse powder in water and take the decoction. For external use, the powder is applied directly to the affected area (skin, throat, and other areas). The advantages of powder include simplified preparation, quick absorption, fast onset of action, and, in comparison to decoction, a longer shelf life. Examples of formulas historically given in powder include *Xiao Yao San* (Rambling Powder) and *Yu Ping Feng San* (Jade Windscreen Powder).

丸剂 Wan ji (pill) is a solid dosage form prepared by first grinding the herbs into powder, mixing the powder with an aqueous medium such as water, honey, alcohol, vinegar or others, and then shaping the resultant mixture into pills. Because pills require disintegration and dissolution prior to absorption, they have a slower onset but prolonged duration of action. Thus, pills, such as *Zuo Gui Wan* (Restore the Left [Kidney] Pill) or *You Gui Wan* (Restore the Right [Kidney] Pill), are generally used to treat chronic conditions that require long-term treatment.

However, some pill-based formulas are specifically made to treat an emergency situation rather than a chronic condition, such as *Su He Xiang Wan* (Liquid Styrax Pill) and *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone). These formulas are given in pills for two main

Chapter 5 — Dosage Forms

reasons: 1) They are immediately available when needed during the emergency; and 2) many ingredients in these formulas are easily destroyed by heat and cannot be cooked in decoction.

Lastly, certain formulas have potent, drastic functions that are inappropriate for decoction, such as *Zhou Che Wan* (Vessel and Vehicle Pill). Administration of such formulas in decoction results in quick absorption and fast onset of action, which often causes unwanted side effects and adverse reactions. Therefore, these formulas are given as pills, which are better tolerated because they slowly exert their therapeutic effect over a longer period of time.

Other advantages of pills include increased patient compliance, convenient storage, and long shelf life. Depending on how they are made, there are four subcategories of pills:

- Honey pills are made by mixing fine herbal powder with honey and forming the resultant paste into small pills. In addition to serving as a binding agent, honey has tonifying and moistening effects within the formula. Honey pills are most suitable for treating chronic illnesses. Examples include *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction) and *Shi Hu Ye Guang Wan* (Dendrobium Pill for Night Vision).
- Water pills are made by mixing fine herbal powder with water, grain-based liquor, vinegar, or juice from fresh herbs and formed the mixture into small pills. Water pills disintegrate easily, which is both an advantage and a disadvantage. Clinically, fast disintegration means quicker absorption and faster onset of action. Commercially, however, easy disintegration means the pills break easily during transportation. *Bao He Wan* (Preserve Harmony Pill) is one example.
- Glue pills are made by mixing fine herbal powder with rice or cooked and mashed noodles, and then forming the mixture into small pills. Glue pills disintegrate more slowly than honey or water pills, thus allowing gradual absorption and prolonged duration of action. Moreover, rice or noodle pills are well-tolerated, and generally do not cause gastrointestinal side effects. An example includes *Xi Huang Wan* (Cattle Gallstone Pill).
- Extract pills are made by grinding a portion of the herbs into a fine powder, cooking the rest in water to obtain a dense liquid extract, and finally blending the two portions together using a medium. The advantages include high potency, smaller dosage (as it is already concentrated), and easy ingestion.

膏剂 Gao ji (soft extract) is prepared by cooking herbs with water or vegetable oil to concentrate the herbs into a soft extract, which may be used internally or topically. For internal use, the soft extract may be taken alone, or mixed with water immediately prior to ingestion. For topical use, the soft extract can be applied directly to the affected area. *Qiong Yu Gao* (Beautiful Jade Paste) is one formula historically given in this topical dosage form.

丹剂 Dan ji (pellet) is a solid dosage form, generally considered to be a type of *wan ji* (pill). Pellets are made the same way as pills, i.e., by mixing the fine herbal powder with a binding agent and shaping into pellets. The distinction between pellets and pills is that pellets are generally smaller in size but stronger in potency. Pellet is the preferred dosage form for herbs that are very valuable and expensive, and for ingredients that have been greatly condensed and concentrated. Examples of this dosage form include *Zhi Bao Dan* (Greatest Treasure Special Pill) and *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart).

酒剂 Jiu ji (medicinal wine) uses grain-based alcohol as the solvent to extract the active constituents from the herbs. The medicinal wine may be prepared simply by soaking the herbs in grain-based liquor at room temperature, or by cooking the herbs in a mixture of water and liquor. After filtering out the herb residue, the medicinal wine may be administered internally or topically. In addition to working as a solvent to extract herbs, liquor also functions to promote blood circulation and open channels and collaterals. Therefore, medicinal wine is most appropriate for treatment of generalized weakness and deficiency, *bi zheng* (painful obstruction syndrome) due to wind-cold-damp, and external or traumatic injuries. However, medicinal wine should not be used for individuals who have yin-deficient fire, or damp accumulation.

Chapter 5 — Dosage Forms

茶剂 *Cha ji* (tea), as the name implies, is the administration of herbs in tea form, making tea by soaking herbs in hot water. In this case, the herbs are generally ground into a coarse powder and placed in a tea bag. While this method is convenient and commonly used for beverages, it is not very effective therapeutically, as the active constituents in many herbs cannot be effectively extracted simply by soaking the herbs in hot water.

药露 *Yao lu* (distillation) is a method used to capture the essential oils that are present in many fragrant and aromatic herbs. This method is generally used only when fresh herbs are available.

锭剂 *Ding ji* (lozenge) is made by first grinding the herbs into a fine powder, followed by mixing the powder with a binding agent (such as honey) to make into a solid dosage form. Lozenges may be taken orally, or applied topically to the affected area. One example is *Zi Jin Ding* (Purple Gold Special Pill).

灸剂 *Jiu ji* (moxa) is prepared by crushing and rolling *Ai Ye* (*Folium Artemisiae Argyi*) in a piece of paper to form a stick that resembles the shape of a cigar. Upon burning the moxa stick, heat and the effects of the herb are delivered locally to the affected area or the targeted channel.

糖浆剂 *Tang jiang ji* (syrup) refers to the addition of cane sugar to liquid dosage forms to mask the taste and improve patient compliance. Because of the sweet taste, this dosage form is used for individuals who are not accustomed to the taste of herbs.

片剂 *Pian ji* (tablet) is a contemporary dosage form. Tablets are made by combining the herbs (raw form or concentrated powder) and excipient(s) and pressing them into tablets. The advantages of tablets include improved patient compliance, precise dosage, and long shelf life. If necessary, a clear coating may be applied to the outside of the tablets to protect against moisture, or a sugar coating may be applied to mask any unpleasant taste. Furthermore, an enteric coating may be applied to ensure that the tablets disintegrate and dissolve in the intestines and not the stomach in order to minimize stomach irritation or prevent degradation of the herbs by gastric acid. Many classic formulas are now made and sold as tablets.

胶囊剂 *Jiao nang ji* (capsule) is also a contemporary dosage form. Capsules are made by filling empty gelatin capsules with the herbs, whether in raw form or concentrated powder. Since capsules dissolve relatively quickly in the stomach, this approach offers rapid absorption and a fast onset of action. The advantages of capsules include improved patient compliance, precise dosage, and long shelf life. Many classic formulas are now made and sold as capsules.

冲服剂 *Chong fu ji* (granule or powder) is another contemporary dosage form. Powder or granules are made by cooking the herbs in water, extracting the active constituents, and mixing the extraction with certain excipients (such as corn, rice or potato starch). This granular or powdered extract may be administered by mixing it with warm water, or it can be transformed easily into tablets or capsules. The advantages of granular or powdered extract include quick absorption, fast onset of action, improved patient compliance, flexibility in customizing the treatment for each patient, and long shelf life.

~
Injection delivers fast action, precise dosing, and the absence of interference from gastrointestinal absorption, but there is no room for error.
~

针剂 *Zhen ji* (injection) is a method that delivers herbs via intravenous, intramuscular or subcutaneous injection. The preparation method of herbal injection varies according to the herbs. The advantages include extremely fast onset of action, precise dosing, and the absence of interference from gastrointestinal absorption. Although injection is a powerful way to deliver herbs, preparation must be done with extreme caution, and administration must be performed with exact precision, as there is no room for error.

In clinical practice, it is important to keep an open mind when selecting the dosage form. In most cases, dosage forms can be interchanged with comparable results. For example, if preparation and ingestion of decoction is inconvenient or undesirable, the

Chapter 5 — Dosage Forms

same formula can easily be prepared and given as powder or pills. On the other hand, if a product is only available in capsules or tablets but the patient cannot swallow this dosage form, the patient can simply open the capsules or crush the tablets and ingest the powder with water. In addition to all the dosage forms listed above, herbs may also be administered via other routes (such as topical, vaginal, or rectal). Proper selection of dosage forms and route of administration not only improves patient compliance but also clinical results.

Chapter 6

— Preparation and Administration of Decoctions

Preparation of Decoctions

Decoction is the most common way to administer Chinese herbs. Proper preparation is essential to ensure both safety and efficacy of the herbal decoction.

- **Equipment:** Ceramic or clay pots are generally used to prepare the decoction, as these types of material are inexpensive, readily available, and will not interact with the herbs or their constituents. In the past, the use of metal containers, especially iron, copper and aluminum, was contraindicated because such metals can cause unknown chemical reactions with the herbs and their constituents. Today, high quality stainless steel pots are used by many practitioners and herbal manufacturers without any unwanted effects.
- **Water:** It is important to use clean, unpolluted water to cook the herbs. In the past, Chinese people often used water from a running river or a clean well. Today, tap water, filtered water, or distilled water suffice. The amount of water used varies, depending on the total quantity of herbs. The general rule of thumb on the amount of water needed is to first place all the herbs in the pot, then add enough water to cover all the herbs by one *cun* (approximately 3-5 cm). In most cases, the herbs may be cooked twice, using more water in the first cooking process than in the second. The desired amount of decoction obtained should generally be between 100-150 mL.
- **Temperature:** Two types of heat are generally used to cook the herbs: 武火 *wu huo* (military fire) describes a high flame or high intensity fire, and 文火 *wen huo* (civilian fire) describes a low flame or low intensity fire. *Wu huo* (military fire) is usually used first to bring the decoction to a boiling temperature, and then *wen huo* (civilian fire) is used to cook and extract active constituents from the herbs.

Method of Decoctions

Chinese herbal medicine encompasses thousands of plant parts, animal substances, and minerals—all with unique characteristics. Therefore, in addition to the generic method of decoction, specific methods of decoction vary depending on the herbs used. The generic method is to first place all of the herbs in the pot, fill the pot with enough water to cover the herbs, allow the herbs to soak in the water for 20 to 30 minutes, and then cook the mixture to obtain the decoction. As described above, a high temperature is generally used first to bring the decoction to a boiling temperature, followed by a low temperature to extract the active constituents. The decoction should not be cooked at

Chapter 6 — Preparation and Administration of Decoctions

boiling temperature for an extended period of time, so as to avoid evaporating too much water and “drying up” the decoction. Moreover, the lid of the cooking pot should not be opened repeatedly during cooking, because this allows evaporation of water and essential oils. When the cooking process is finished, the herb residue is filtered and discarded, while the liquid is kept, and the resultant decoction is served while warm. In addition to this generic method, certain types of herbs must be processed with specific care as follows:

- **先煎 Xian jian (pre-decoction)** is a process by which some herbs are cooked for an extended period of time prior to the addition of others. Mineral substances and animal shells are hard to extract because they are generally sold in large pieces and have low water solubility. To ensure maximum effect, they must be crushed into smaller particles first to increase the surface area, and then boiled for 10 to 20 minutes before the addition of the other herbs. Examples of mineral substances and animal shells that require pre-decoction include *Ci Shi* (Magnetitum), *Shi Gao* (Gypsum Fibrosum), *Zhe Shi* (Haematitum), *Gui Ban* (Plastrum Testudinis), *Bie Jia* (Carapax Trionycis), *Shi Jue Ming* (Concha Haliotidis), *Long Gu* (Os Draconis), and *Mu Li* (Concha Ostreae).

In addition to these mineral substances and animal shells, certain tonifying herbs and toxic herbs are also pre-decocted, although for opposite reasons. Tonic herbs are pre-decocted at *wen huo* (civilian fire) for a prolonged period of time to ensure the complete extraction of active constituents. In contrast, herbs that are toxic are pre-decocted at *wen huo* (civilian fire) for a prolonged period of time in order to deactivate and destroy toxic constituents.

Lastly, herbs that contain a large amount of soil, such as *Fu Long Gan* (Terra Flava Usta), or herbs that are lightweight and very bulky, such as *Lu Gen* (Rhizoma Phragmitis), *Bai Mao Gen* (Rhizoma Imperatae), or *Xia Ku Cao* (Spica Prunellae), are decocted first, and the resultant liquid is retained, filtered, and used as the solvent to cook the rest of the herbs. Pre-decoction in these two cases helps to eliminate unnecessary components such as soil, and make room for other herbs in the pot (lightweight, bulky herbs sometimes completely fill the pot).

- **后下 Hou xia (post-decoction)** is a specific instruction to add particular herbs at the end of the decoction process and cook them for only a short period of time (approximately 5 to 10 minutes). Generally speaking, exterior-releasing herbs, heat-clearing herbs, aromatic herbs, and certain downward-draining herbs should be cooked at *wu huo* (military fire) for a short period of time to preserve their potency and prevent excessive evaporation of the active constituents. Specifically, acrid or aromatic herbs, such as *Bo He* (Herba Menthae) and *Huo Xiang* (Herba Agastaches), contain essential oils that evaporate easily if cooked at high temperature for a prolonged period of time. Furthermore, herbs that contain constituents that are easily deactivated by heat, such as *Da Huang* (Radix et Rhizoma Rhei) and *Fan Xie Ye* (Folium Sennae), are also added at the end of the cooking process to preserve the integrity of the active components. It is important to note that to facilitate extraction of active ingredients, these herbs should also be soaked in water for 20 to 30 minutes first, prior to adding them to the pot for post-decoction.
- **包煎 Bao jian (decocted in gauze)** describes the process by which the herbs are wrapped in gauze or cheesecloth during the cooking process. This is done for herbs that may irritate the throat and cause gagging or coughing, or may irritate the gastrointestinal tract, causing nausea and vomiting. Examples of these herbs include *Xin Yi Hua* (Flos Magnoliae), *Xuan Fu Hua* (Flos Inulae), *Che Qian Zi* (Semen Plantaginis), *Chi Shi Zhi* (Haloysitum Rubrum), and *Hua Shi* (Talcum).
- **另煎 Ling jian (separately decocted)** or **另炖 ling dun (separately simmered)** is generally reserved for herbs that are overly expensive or difficult to extract. These herbs are usually cut into very small pieces or thin slices and separately decocted or simmered for 2 to 3 hours to ensure maximum extraction and minimum waste. Examples include wild-crafted *Ren Shen* (Radix et Rhizoma Ginseng), *Ling Yang Jiao* (Cornu Saigae Tataricae), and *Xi Jiao* (Cornu Rhinoceri).
- **融化 Rong hua (dissolution)** is a process used for substances which cannot or should not be cooked. Substances that are sticky tend to bind to other herbs in the pot and decrease the extraction process, and they also create a mess by binding to the pot and becoming burned. Instead of being cooked, these substances are placed in the already strained, hot decoction. The decoction is administered when these substances are completely dissolved. Examples of such sticky substances

Chapter 6 — Preparation and Administration of Decoctions

include *Yi Tang* (Maltosum), *E Jiao* (Colla Corii Asini), *Feng Mi* (Mel), and *Lu Jiao Jiao* (Colla Cornus Cervi).

- **冲服 *Chong fu* (take drenched)** describes the process by which the herbs are mixed with the strained decoction immediately before ingestion, such as *Mang Xiao* (Natrii Sulfas), and juices from fresh herbs such as *Zhu Li* (Succus Bambusae) and *Sheng Jiang* (Rhizoma Zingiberis Recens). Substances that are aromatic and very expensive are also taken via infusion, such as *Niu Huang* (Calculus Bovis), *She Xiang* (Moschus), and *San Qi* (Radix et Rhizoma Notoginseng).

Administration of Decoctions

Frequency and timing of administering the herbs affect the efficacy of the formula. Factors to consider when deciding frequency and timing include the constitution of the patient, the stage or severity of the illness, and the dosage forms.

- **Timing:** Generally speaking, herbs are given on an empty stomach one hour before meals for optimal absorption. However, this is not always appropriate. If herbs tend to irritate the stomach, either due to their properties or due to patient sensitivity, they should be taken after meals. Tonic herbs that are cloying in nature should be taken on an empty stomach. Herbs that treat malaria should be taken approximately two hours before the outbreak. Herbs that calm the *shen* (spirit) should in general be taken before bedtime. Herbs for treating acute conditions are given as needed, and preferably in liquid dosage form for faster absorption. Herbs for treating chronic conditions are given at a fixed schedule, and preferably in solid dosage form for better patient compliance. Lastly, some formulas require a specific time of administration, such as *Ji Ming San* (Powder to Take at Cock's Crow), which should be given at room temperature on an empty stomach before dawn for optimal effect.
- **Frequency:** Frequency of dosing varies depending on the condition of the patient and the severity of the illness. Generally speaking, each pack of herbs may be cooked in water twice, and the two resultant decoctions are mixed together and given in two or three equally-divided doses. However, in acute or severe cases, the two resultant decoctions from one pack of herbs may be given in one dose for faster and stronger effects. And when necessary, two packs of herbs may be given in the same day. It is important to note that increase in dose and dosing frequency should be done carefully, and only when necessary, in order to avoid overdosage of herbs, especially if the herbs are toxic or have drastic, potent effects.
- **Administration:** As a general rule, herbal decoctions are given while warm. Exterior-releasing formulas are usually given as warm decoction to induce mild perspiration. Disorders characterized by cold should be treated by hot herbs given as warm decoction, while disorders characterized by heat or fire should be treated with cold herbs given as room-temperature decoction. However, patients with conditions complicated by the presence of both heat and cold may reject warm decoctions if they experience nausea and vomiting. In such cases, the decoction should be given at room temperature. In other situations in which the patients experience nausea and vomiting with a warm decoction, these reactions may be alleviated by any of the following methods: add a small amount of *Sheng Jiang* (Rhizoma Zingiberis Recens) juice to the decoction; rub a thin slice of *Sheng Jiang* (Rhizoma Zingiberis Recens) on the tongue; chew a small piece of *Chen Pi* (Pericarpium Citri Reticulatae); or simply administer the decoction at room temperature.
- **Additional instructions:** In addition to timing and frequency, other instructions are required for some formulas to achieve maximum results. For example, in addition to serving *Ma Huang Tang* (Ephedra Decoction) as a warm decoction, the patients are also instructed to avoid exposure to wind, and to cover the body with a blanket to induce mild sweating. In cases of *Gui Zhi Tang* (Cinnamon Twig Decoction), administration of the formula should be followed by ingestion of a bowl of hot rice porridge to tonify the underlying deficiency and induce mild perspiration. Lastly, certain conditions require herbal treatment as well as diet and lifestyle changes, such as avoiding some foods or refraining from certain activities. When applicable, such additional instructions are stated in the monograph of each individual formula.

Increases in dosage and dose frequency should be made carefully, and only when necessary, in order to avoid overdosing.

Chapter 7

— Weights and Measures

Historically, the Chinese have used their own system for weights and measurements. Though this system is still used by some in the general market place, academic and healthcare institutions have all adopted the metric system as the standard for weights and measurements. Accordingly, this text also uses the metric system as the standard to describe weight and volume. As a reference, the charts below summarize the Chinese system and its conversion to the metric system.

1. Measure of Weight (Chinese System)

- 1 jin (斤) = 16 liang (两)
- 1 liang (两) = 10 qian (钱)
- 1 qian (钱) = 10 fen (分)
- 1 fen (分) = 10 li (厘)

2. Measure of Volume (Chinese System)

- 1 shi (石) = 10 dou (斗)
- 1 dou (斗) = 10 sheng (升)
- 1 sheng (升) = 10 he (合)
- 1 he (合) = 10 shao (勺)

3. Conversion (Chinese to Metric System)

Weight Conversion (Chinese Units : Metric)	
Chinese Units	Grams
1 jin	500
1 liang	31.25
1 qian	3.125
1 fen	0.3125
1 li	0.03125

Volume Conversion (Chinese Unit : Metric)	
Chinese Unit	Liter
1 sheng	1

Chinese units vary from dynasty to dynasty: one *liang* in the Qin dynasty is 16.14 grams, while one *liang* in the Qing dynasty is 37.21 grams; one *sheng* in the Qin dynasty is equivalent to 340 mL, but one *sheng* in the Qing dynasty is equivalent to 1035.5 mL.

Additional Comments

Unfortunately, interpreting doses from historical texts is not as simple or as straightforward as it may seem. It is important to remember that Chinese herbal medicine developed over a few thousand years, covering many different dynasties, and across various regions of China. All these variables contribute to variations in weights and measures, as exact values vary according to time and geographic location of the original source texts. Although the terms remain the same, their actual value can be significantly different. For example, one *liang* in the Qin dynasty is equivalent to 0.5165 *liang* today, while one *liang* in the Qing dynasty is equivalent to 1.194 *liang* today. Furthermore, one *sheng* in the Qin dynasty is equivalent to 0.34 *sheng* today, while one *sheng* in the Qing dynasty is equivalent to 1.0355 *sheng* today.

Chapter 7 — Weights and Measures

Additionally, the doses of herbs described in many historical texts were not necessarily in standard weights and measures, but rather, in descriptive terms. For example, *Da Zao* (Fructus Jujubae) is prescribed in pieces, *Ku Xing Ren* (Semen Armeniacae Amarum) in kernels, and *Sheng Jiang* (Rhizoma Zingiberis Recens) in slices. Lastly, the dose of the formulas may be described as “one pinch,” such as in *Shou Nian San* (Pinch Powder), or the size of the pills may be described as the size of an “egg yolk.”

Despite the best efforts by scholars to interpret doses from historical source texts and convert them to contemporary measurements, information is sometimes simply unavailable to confirm or convert original doses. Even though the metric system is used as the standard for weights and measurements in this text, readers are encouraged to use their own judgments in deciding the best doses based on age, body weight, disease condition, and constitution of the patients.

The traditional system of measurement in China is significantly different from the British and metric systems. Listed below are conversions between the traditional Chinese system and the metric system:

Period (Dynasty)	Historical Weight	Contemporary Weight	Metric Weight	Historical Volume	Contemporary Volume	Metric Volume
Qin (221-207 BCE)	1 <i>liang</i>	0.5165 <i>liang</i>	16.1406 g	1 <i>sheng</i>	0.34 <i>sheng</i>	340.0 mL
Western Han (206 BCE- 24 CE)	1 <i>liang</i>	0.5165 <i>liang</i>	16.1406 g	1 <i>sheng</i>	0.34 <i>sheng</i>	340.0 mL
Eastern Han (25-220)	1 <i>liang</i>	0.4455 <i>liang</i>	13.9219 g	1 <i>sheng</i>	0.20 <i>sheng</i>	200.0 mL
Jin (265-420)	1 <i>liang</i>	0.4455 <i>liang</i>	13.9219 g	1 <i>sheng</i>	0.21 <i>sheng</i>	210.0 mL
Sui and Tang (581-907)	1 <i>liang</i>	0.5011 <i>liang</i>	15.6594 g	1 <i>sheng</i>	0.58 <i>sheng</i>	580.0 mL
Song (960-1279)	1 <i>liang</i>	1.0075 <i>liang</i>	31.4844 g	1 <i>sheng</i>	0.55 <i>sheng</i>	550.0 mL
Ming (1368-1644)	1 <i>liang</i>	1.1936 <i>liang</i>	37.3000 g	1 <i>sheng</i>	1.07 <i>sheng</i>	1070.0 mL
Qing (1644-1911)	1 <i>liang</i>	1.194 <i>liang</i>	37.3125 g	1 <i>sheng</i>	1.0355 <i>sheng</i>	1035.5 mL

Note: Because descriptions of doses in the classic formulas vary significantly, it is not always possible to determine the exact original dose or convert them to the precise metric units. Therefore, when applicable, we state the original doses in accordance to the source text, and insert recommended doses in metric units in brackets. We feel this is the best solution, as stating the original doses keeps the formulas true to their origins, and suggesting the metric doses helps to make this book more informative and clinically useful for practitioners.

Descriptions of doses are sometimes imprecise: fruits are described in pieces, seeds in kernels, fresh ginger in slices, powder in “pinch” and pills as being the size of “egg yolk” or “chicken head.”

Chapter 8

— Concurrent Use of Herbal Medicines and Pharmaceuticals

Herb-drug interaction is a critically important subject, yet there is little extensively definitive information available. Basic understandings of this topic are detailed in Chapter 8 in the first part of *Chinese Medical Herbology and Pharmacology* under “Concurrent Use of Herbal Medicines and Pharmaceuticals.” Documented interactions between formulas and drugs are discussed in each formula monograph when relevant. Potential interactions are not included because they require too much assumption and speculation. Formula monographs that do not contain herb-drug interaction information imply that there was no known or documented interaction at the time of publication. Nevertheless, readers are strongly encouraged to stay updated however they can, as new information on herb-drug complementarities and conflicts is being published regularly.

Note: *Chinese Medical Herbology and Pharmacology* documents interactions between individual herbs and drugs, while *Chinese Herbal Formulas and Applications* records interactions between herbal formulas and drugs. Readers are urged to check both sources as needed to assure the safety and compatibility of herb and drug therapies.

Part II

— Formula Monographs

神农 Shén Nǒng

神农 Shén Nǒng, dates unknown.

神农 Shén Nǒng

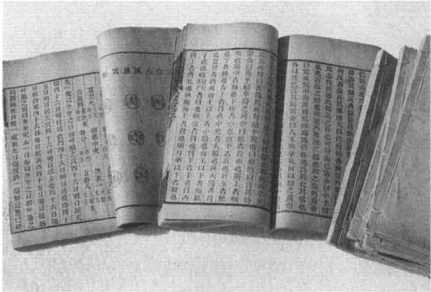

According to folklore and legend, Shen Nong, also known as the “Divine Husbandman,” was the person credited for converting the nomads in ancient China from seasonal wanderers into a settled, agricultural society. He taught people what plants to consume as food, when to plant seeds and harvest crops, and how to make tools. In addition, he dedicated his life to searching for herbal medicines to treat disease. He traveled all throughout ancient China, and personally collected and tasted each and every medicinal substance. After years of personal trial and error, he gained an uncommon understanding of the therapeutic effects and side effects of many medicinal substances. He reportedly ingested as many as 70 poisonous substances per day, but used *Cha Ye* (Folium Camelliae) to successfully neutralize these poisons. Unfortunately, Shen Nong died when he experimented with an extremely toxic herb called 断肠草 *Duan Chang Cao*.¹ To commemorate Shen Nong and his contributions to medicine, numerous authors and physicians compiled and published *Shen Nong Ben Cao Jing* (Divine Husbandman’s Classic of the Materia Medica) in his name.

Shen Nong personally picking herbs.

Shen Nong Ben Cao Jing (Divine Husbandman’s Classic of the Materia Medica) is the first, and one of the most authoritative, texts on Chinese herbal medicine. It contains information on 365 medicinal substances (252 plants, 67 animals, and 46 minerals) including details such as taste, thermal properties, dosages, and toxicity. It also includes descriptions of how to cultivate the herbs, process the herbs, and distinguish true from false herbs. This is one of the earliest records of Chinese herbal medicine, and much of its documentations still holds true today, such as the use of *Ma Huang* (Herba Ephedrae) to treat wheezing and dyspnea, *Hai Zao* (Sargassum) to treat goiter, *Huang Lian* (Rhizoma Coptidis) to stop diarrhea, *Gua Di* (Pedicellus Cucumeris) to induce vomiting, *Lei Wan* (Omphalia) to kill parasites, *Huang Qin* (Radix Scutellariae) to reduce fever, and so on.

¹ 断肠草 *Duan Chang Cao*, literally “break the intestines herb,” is a name given to many herbs that are toxic. Historians believe that the actual herb that poisoned and killed Shen Nong was *Gou Wen* (Herba Gelsemii Elegantis). The toxicity of this herb was later documented in great detail in *Ben Cao Gang Mu* (Materia Medica) by Li Shi-Zhen in 1596.

张仲景 Zhāng Zhòng-Jǐng

张仲景 Zhāng Zhòng-jǐng, also known as 张机 Zhāng Jī, 150 – 219 CE.

张仲景 Zhāng Zhòng-Jǐng

Zhang Zhong-Jing, also known as Zhang Ji, was born near the end of the Eastern Han dynasty. During the transition from the collapse of the Eastern Han to the beginning of the Three Kingdoms era, China was ravaged by constant civil war, and people suffered from crime, poverty, infection and death. During a ten-year period near the end of the Eastern Han, two-thirds of the population fell ill and died. Seventy percent of the fatalities were due to *shang han* (cold damage). Although Zhang was from a wealthy family of over 200 members, even his family members could not escape the common fate and many succumbed to the epidemic. Greatly affected by the loss of his family members and the devastating impact of widespread losses in the community and nation, Zhang dedicated his entire life to studying and practicing medicine.

Zhang Zhong-Jing
with his manuscripts.

伤寒杂病论 *Shang Han Za Bing Lun* (Discussion of Cold-Induced Disorders and Miscellaneous Diseases) is the most famous work by Zhang. This original work later was divided by Wang Shu-He into two volumes: **伤寒论** *Shang Han Lun* (Discussion of Cold-Induced Disorders) and **金匮要略** *Jin Gui Yao Lue* (Essentials from the Golden Cabinet).

- *Shang Han Lun* (Discussion of Cold-Induced Disorders) emphasized external disorders, and classified them according to *Liu Jing Bian Zheng* (Six Stages Differentiation).
- *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) focused on internal and miscellaneous diseases, and classified them according to *Ba Gang Bian Zheng* (Eight Principle Differentiation).

Zhang's work clearly established the relationships among disease, progression, complications, treatment strategies, dosage forms, and herbal formulas. Zhang Zhong-Jing forever changed the practice of traditional Chinese medicine. Over 1,700 years after their original publication, his works are still studied as required textbooks in schools of Traditional Chinese Medicine around the world. Many of the formulas he used are still considered to be the standard herbal treatment, such as *Bai Hu Tang* (White Tiger Decoction) for fever, *Bai Tou Weng Tang* (Pulsatilla Decoction) for dysentery, *Yin Chen Hao Tang* (Artemisia Scoparia Decoction) for jaundice, and *Gua Lou Xie Bai Ban Xia Tang* (Trichosanthes Fruit, Chinese Chive, and Pinellia Decoction) for chest pain.

Because of his lasting influence, Zhang Zhong-Jing has always been remembered as **医圣** the Sage of Medicine.

Exterior-Releasing Formulas (Summary)	139

Chapter 1 — Overview

— Exterior-Releasing Formulas

Definition: Exterior-releasing formulas induce perspiration, release exterior factors from the skin and muscles, and/or promote the eruption of measles. This method of treatment is known as *han fa* (sweating), one of the *ba fa* (eight treatment methods) described in the *Huang Di Nei Jing* (Yellow Emperor's Inner Classic) in the first or second century A.D. The eight treatment methods are outlined in Part I, Chapter 2, of this text.

The term “exterior syndrome” refers to the invasion at superficial parts of the body by one or more of the *liu yin* (six exogenous factors), namely wind, cold, summer-heat, dampness, dryness, and fire. These six exogenous factors attack superficial areas of the body via the skin, mouth or nose. This causes a number of exterior signs and symptoms, such as aversion to cold, fever, headache, muscle aches, a thin, white or yellow tongue coating, and a superficial pulse. While most exterior-releasing formulas are indicated for either wind-cold or wind-heat syndromes, they also treat other disorders, such as abscesses and sores, edema, dysentery or malaria, measles, and the early stages of *wen bing* (warm disease).

At this early stage of illness, which the disease factor is located at the exterior, the treatment plan should focus on expelling the disease factor from the skin and muscle levels. The exterior-releasing method is the most appropriate method for achieving this goal. If the *liu yin* (six exogenous factors) are not released from the exterior, they may proceed inward to attack the *zang* (solid) and *fu* (hollow) organs, which leads to more serious illness. Thus, treat exterior conditions immediately with exterior-releasing formulas, to prevent complications and deterioration.

~
The exterior-releasing method is the most appropriate way to expel disease factors from the skin and muscle layers.
~

SUBCATEGORIES OF ACTION

Since the range of exterior factors interacts with individual constitutional differences, the course and severity of exterior invasion illnesses vary widely. Exterior-releasing formulas are divided into three subcategories, to reflect the characteristics of the herbal formulas appropriate for treatment according to the nature of the disorder and patient constitution.

1. Acrid and Warm Exterior-Releasing Formulas

These formulas treat exterior wind-cold syndromes. Common symptoms when wind and cold invade include aversion to cold, fever, headache, neck and/or shoulder stiffness, soreness and pain of the muscles and extremities, the absence of thirst, no perspiration (or, fever and aversion to cold that persist after perspiration), a thin, white tongue coating, and a superficial, tight or superficial, moderate pulse.

Herbs commonly used to release exterior wind-cold include *Ma Huang* (Herba Ephedrae), *Gui Zhi* (Ramulus Cinnamomi), *Fang Feng* (Radix Saposhnikoviae), *Jing Jie* (Herba Schizonepetae), and *Zi Su Ye* (Folium Perillae). Formulas commonly used to release exterior wind-cold include *Ma Huang Tang* (Ephedra Decoction), *Gui Zhi Tang* (Cinnamon Twig Decoction), *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction), and *Jiu Wei Qiang Huo Tang* (Nine-Herb Decoction with Notopterygium).

Chapter 1 — Overview

2. Acrid and Cold Exterior-Releasing Formulas

These formulas treat exterior wind-heat syndromes marked by the following commonly seen clinical manifestations: fever, perspiration, slight aversion to wind and cold, headache, thirst, a sore throat, cough, a thin, white or thin, yellow tongue coating, and a superficial, rapid pulse.

Herbs commonly used to release exterior wind-heat include *Bo He* (Herba Menthae), *Niu Bang Zi* (Fructus Arctii), *Sang Ye* (Folium Mori), *Ju Hua* (Flos Chrysanthemi), and *Ge Gen* (Radix Puerariae Lobatae). Formulas commonly used to release exterior wind-heat include *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction), *Yin Qiao San* (Honeysuckle and Forsythia Powder), and *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction).

3. Supporting [the Upright] and Releasing [the Exterior] Formulas

These formulas are used for constitutionally-deficient patients who are attacked by *liu yin* (six exogenous factors). This situation presents two dilemmas. First, exterior-releasing formulas induce diaphoresis to dispel exterior exogenous factors, but may, in the process, damage yin and body fluids, especially in individuals who already have underlying deficiencies. Second, individuals who have underlying deficiencies often do not have enough *zheng* (upright) *qi* and body fluids (sweat), and are often unable to push out the exterior pathogens, even when they take exterior-releasing herbs.

Therefore, in order to safely dispel exterior pathogenic factors in deficiency patients, the underlying constitution must be supported simultaneously. Supporting and releasing formulas usually consist of both exterior-releasing herbs and qi- or yang-tonifying herbs, to accomplish both goals.

Herbs commonly used to support *zheng* (upright) *qi* include *Ren Shen* (Radix et Rhizoma Ginseng) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). Formulas that simultaneously support the upright and release the exterior include *Bai Du San* (Overcome Pathogenic Influences Powder), *Zai Zao San* (Renewal Powder), and *Cong Bai Qi Wei Yin* (Scallion Decoction with Seven Ingredients).

CAUTIONS / CONTRAINDICATIONS

- Exterior-releasing formulas are generally taken as warm decoctions to induce perspiration. Mild perspiration over the whole body is ideal. The body may be covered with a blanket to ensure and facilitate perspiration. However, profuse sweating should be avoided, since it may deplete qi and yin, and, in severe cases, cause qi or yang collapse.
- After taking the decoction, avoid exposure to wind to prevent recurrent attacks.
- Avoid foods that are raw, cold, oily or greasy, as they may decrease absorption and compromise the therapeutic effects of these formulas.
- If interior symptoms are observed along with exterior symptoms, the normal treatment plan is to treat the exterior first, then the interior condition second, or treat both interior and exterior conditions at the same time.
- Exterior-releasing formulas are contraindicated if the disease factor has fully progressed into the interior. These formulas are also contraindicated in the presence of ulcerated sores, erupted measles, deficiency-type edema, and dehydration from vomiting or diarrhea.

~
Profuse sweating may deplete qi and yin, and, in severe cases, cause qi or yang collapse.
~

PROCESSING

Many exterior-releasing formulas contain acrid herbs to induce sweating. These formulas should not be overcooked, since the essential oils that give these herbs their acrid, aromatic, and diaphoretic effects evaporate very easily. Therefore, many exterior-releasing herbs are post-decocted, added for the last five to ten minutes of cooking.

Chapter 1 — Overview

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

While exterior-releasing formulas have a wide range of clinical applications, they are primarily used to treat various respiratory and infectious disorders.

Essential oils, which give these herbs their acrid, aromatic, and diaphoretic effects, evaporate very easily.

1. **Cough:** Many exterior-releasing formulas have antitussive effects to suppress cough. *Ma Huang Tang* (Ephedra Decoction) arrests stubborn coughing that manifests after recovery from an exterior condition.¹ *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction) alleviates coughing and dyspnea in cases of asthma or respiratory tract infection.² As an active ingredient in both formulas, *Ku Xing Ren* (Semen Armeniacae Amarum) has an inhibitory effect on the respiratory center of the brain, thereby producing antitussive and antiasthmatic effects.³
2. **Wheezing and dyspnea:** *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction) and *Da Qing Long Tang* (Major Bluegreen Dragon Decoction) are exterior-releasing formulas used to treat wheezing and dyspnea. Several clinical studies have shown *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction) to be effective in treating wheezing and dyspnea in patients with acute and chronic bronchial asthma.⁴ Other studies indicate that *Da Qing Long Tang* (Major Bluegreen Dragon Decoction) effectively treats wheezing and dyspnea arising from chronic tracheitis.⁵
3. **Asthma:** Many exterior-releasing formulas have marked antiasthmatic effects, and may be used to treat asthma.^{6,7} The proposed mechanisms of action include: 1) stimulating beta-adrenoceptors to achieve bronchorelaxation; and 2) inhibiting infiltration of eosinophils into the airway.^{8,9} Two formulas that can treat asthma are: *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction) and *She Gan Ma Huang Tang* (Belamcanda and Ephedra Decoction).
4. **Bronchitis:** Many exterior-releasing formulas are effective in treatment of bronchitis and related symptoms. *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction) has both antibiotic and antiasthmatic effects, and is an excellent formula for treating bronchitis in both children and adults.^{10,11,12,13,14} *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction) treats both acute and chronic bronchitis,^{15,16} with antitussive qualities to suppress cough,¹⁷ bronchodilating effects to relieve wheezing and dyspnea,¹⁸ and antiallergic influence to reduce swelling and inflammation.¹⁹
5. **Pneumonia:** Exterior-releasing formulas can treat both the cause and symptoms of pneumonia. For example, *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction) and *Yin Qiao San* (Honey-suckle and Forsythia Powder) have antibiotic effects to treat lung infections.^{20,21} In addition, *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction), *Yin Qiao San* (Honeysuckle and Forsythia Powder), and *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction) address associated symptoms of pneumonia, such as aversion to cold, fever, cough, dyspnea, chest congestion, and the presence of sputum.^{22,23}
6. **Respiratory tract disorders:** Exterior-releasing formulas treat various types of respiratory tract disorders. In addition to the examples listed above, indications include rhinitis,²⁴ allergic rhinitis,^{25,26} nasosinusitis,²⁷ tonsillitis,^{28,29} pharyngitis,^{30,31} and others.
7. **Nasal disorders:** Exterior wind-releasing formulas effectively treat various nasal disorders, such as sinusitis,³² rhinitis,³³ and nasal polyps.³⁴ The mechanisms of action are attributed to antiallergic effects,³⁵ mast cell stabilizing effects,³⁶ and anti-inflammatory action, that suppress inflammation of the nasal mucosa.³⁷ Two representative formulas for treatment of nasal disorders are *Cang Er Zi San* (Xanthium Powder) and *Xin Yi San* (Magnolia Flower Powder).
8. **Fever:** Many formulas in this category have antipyretic effects to treat fever. The mechanisms of the antipyretic effects vary. *Ma Huang Tang* (Ephedra Decoction) and *Gui Zhi Tang* (Cinnamon Twig Decoction) have regulatory effects on body temperature to reduce fever.^{38,39} *Ge Gen Tang* (Kudzu Decoction) lowers body temperature by suppressing interferon-induced interleukin-1alpha production.⁴⁰ *Yin Qiao San* (Honeysuckle and Forsythia Powder) has a broad spectrum of antibiotic effects to treat infection and fever.^{41,42}

Chapter 1 — Overview

9. **Common cold and influenza:** Exterior-releasing formulas are frequently used to treat viral infections such as common cold and influenza, with answers to both cause and symptoms. *Ge Gen Tang* (Kudzu Decoction) has antiviral effects to treat infection, and antipyretic and anti-inflammatory effects to alleviate fever and muscle aches and pains.^{43,44,45} *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction) is useful as both prophylaxis and treatment for influenza viral infection, since its antiviral effects stimulate and increase production of anti-influenza virus antibodies.⁴⁶ Lastly, *Yin Qiao San* (Honeysuckle and Forsythia Powder) is one of the most frequently-used formulas for common cold and influenza, since it treats both the cause and symptoms of viral infection with its antibiotic, analgesic, anti-inflammatory and antipyretic activities.^{47,48,49}
10. **Infectious disorders:** In addition to the infections listed above, exterior-releasing formulas effectively treat herpes zoster,⁵⁰ measles,⁵¹ viral myocarditis,⁵² infectious meningitis, and many other disorders.

Section 1

辛温解表剂

— Acrid and Warm Exterior-Releasing Formulas

Má Huáng Tāng (Ephedra Decoction)

麻黃湯

麻黄汤

Pinyin Name: *Ma Huang Tang*

Literal Name: Ephedra Decoction

Alternate Names: Ma-huang Decoction, Mahuang Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Ma Huang</i> (Herba Ephedrae)	9g [6g]
<i>Gui Zhi</i> (Ramulus Cinnamomi)	6g [4g]
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	70 kernels [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	3g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook *Ma Huang* (Herba Ephedrae) first with 9 cups [1,800 mL] of water until 7 cups [1,400 mL] of the liquid remain. Remove the foam from the top, add in the other ingredients, and cook until the liquid is reduced to 2.5 cups [500 mL]. Take 0.8 cup [160 mL] of the warm, strained decoction and cover the body with blankets to promote slight perspiration. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Induces diaphoresis and releases the exterior
2. Ventilates the Lung and relieves dyspnea

CLINICAL MANIFESTATIONS

Exterior-excess, wind-cold syndrome: aversion to cold, fever, headache, neck stiffness, body aches and pains, absence of perspiration, dyspnea, a thin, white tongue coating, and a superficial, tight pulse.

CLINICAL APPLICATIONS

Fever, upper respiratory tract infection, common cold, influenza, bronchitis, pneumonia, asthma, wheezing and dyspnea, cough, peripheral neuropathy, enuresis, mastitis, anhidrosis, allergic rhinitis, and acute nephritis.

EXPLANATION

Ma Huang Tang (Ephedra Decoction) was first cited in the *Shang Han Lun* (Discussion of Cold-Induced Disorders) for the treatment of *taiyang* cold syndrome. This syndrome refers to attack by wind-cold at the exterior, with cold being the dominant factor. Because the location of the wind-cold attack is at the exterior or superficial level of the body, *wei* (defensive) *qi* is the main force of defense.

When cold attacks the exterior of the body, it causes the whole body to constrict. The constriction impedes the circulation of *wei* (defensive) *qi* at the exterior and *ying* (nutritive) *qi* in the interior. The impeded circulation leads to blockage of *qi* and blood in the channels, which then causes headaches, body aches, pain, and other symptoms. Fever and aversion to cold occur as a result of the battle between *wei qi* and the wind-cold factor.

Since the Lung is usually the first target organ of the exterior pathogenic factors, dyspnea may occur as a result of cold constricting the Lung and causing the Lung *qi* to flow in a reversed direction. Since the body is constricted by cold and the skin pores are closed, there will be no perspiration. A superficial, tight pulse is a sign of exterior excess cold. The tongue coating, which is not affected

Má Huáng Tāng (Ephedra Decoction)

Ma Huang Tang (Ephedra Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Exterior-excess, wind-cold syndrome	<ul style="list-style-type: none">• Fever and aversion to cold: exterior wind-cold condition• Absence of perspiration and a tight pulse: exterior excess condition• Dyspnea: reversed flow of Lung qi• Body aches and pains: blocked circulation of qi and blood• Superficial, tight pulse: exterior wind-cold condition	<ul style="list-style-type: none">• Induces diaphoresis and releases the exterior• Ventilates the Lung and relieves dyspnea	<ul style="list-style-type: none">• <i>Ma Huang</i> (Herba Ephedrae) induces diaphoresis, releases exterior wind-cold, and relieves dyspnea.• <i>Gui Zhi</i> (Ramulus Cinnamomi) disperses wind-cold and unblocks the channels and collaterals.• <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) guides Lung qi downward and relieves dyspnea.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

because the disease is still located at the exterior, remains thin and white.

Ma Huang (Herba Ephedrae), the chief herb, is acrid, bitter and warm. It effectively dispels cold and releases the exterior through diaphoresis. In addition, it relieves dyspnea and cough by expanding the Lung and soothing Lung qi. *Gui Zhi* (Ramulus Cinnamomi), the deputy herb, helps the chief herb disperse the wind-cold factor. It unblocks stagnation in the *ying* (nutritive) level and pushes the pathogenic factors outward to the *wei* (defensive) level. Because *Gui Zhi* (Ramulus Cinnamomi) is acrid and warm in nature, it alleviates pain by promoting the circulation of qi and blood in the channels and collaterals.

Ku Xing Ren (Semen Armeniacae Amarum), the assistant herb, helps *Ma Huang* (Herba Ephedrae) relieve dyspnea by guiding Lung qi downward. Together, the ventilating property of *Ma Huang* (Herba Ephedrae) and the descending property of *Ku Xing Ren* (Semen Armeniacae Amarum) regulate the functioning of the Lung to restore normal respiration.

Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) serves three functions in this formula. As the envoy herb, it tonifies the middle *jiao*. It also moderates the potent exterior-releasing effects of *Ma Huang* (Herba Ephedrae) and *Gui Zhi* (Ramulus Cinnamomi), so that these two herbs can induce perspiration without damaging *zheng* (upright) *qi*. Lastly, it harmonizes the contrasting directional tendencies of *Ma Huang* (Herba Ephedrae) to ventilate outward and *Ku Xing Ren* (Semen Armeniacae Amarum) to guide qi downward.

MODIFICATIONS

- For muscle aches and pains caused by exterior attack of wind, cold, and dampness, add *Cang Zhu* (Rhizoma Atractylodis) and *Yi Yi Ren* (Semen Coicis).
- If a sore throat is present, reduce the dose of *Gui Zhi* (Ramulus Cinnamomi) by half; and add *Tian Hua Fen* (Radix Trichosanthis) and *She Gan* (Rhizoma Belamcandae).
- For coughing, profuse sputum, dyspnea, and chest fullness caused by wind-cold affecting the Lung, remove *Gui Zhi* (Ramulus Cinnamomi); and add *Zi Su Zi* (Fructus Perillae), *Sang Bai Pi* (Cortex Mori), *Chi Fu Ling* (Poria Rubra), and *Chen Pi* (Pericarpium Citri Reticulatae).

CAUTIONS / CONTRAINDICATIONS

- *Ma Huang Tang* is extremely acrid and warm, and, if used incorrectly, may induce profuse perspiration and damage the qi and yin of the body. Therefore, it should only be used in conditions having all of the following characteristics: wind, cold, exterior, and excess.
- This formula should be used with caution in the following patients: elderly patients and individuals with generalized weakness.
- This formula is not recommended for the following syndromes: exterior wind-heat syndrome; exterior febrile conditions; transformation of wind-cold to wind-heat; interior heat; damp-heat accumulation; and qi or blood deficiency.
- This formula is not suitable for individuals with the following conditions: thirst caused by deficiency of body fluids; spontaneous sweating due to *wei* (defensive) *qi* deficiency, weak pulse from deficient conditions, rapid pulse from excess conditions; and palpitations and a sensation of heaviness in the body as a result of misuse of herbs.

Má Huáng Tāng (Ephedra Decoction)

- This formula is contraindicated in the following conditions: individuals with ulceration, abscesses and sores; *lin zheng* (dysuria syndrome); and patients with bleeding or excessive bleeding on the verge of collapse.
- This formula should be taken as a warm decoction to induce diaphoresis. Once the desired effect is achieved, it should be discontinued immediately. However, if exterior symptoms and signs still persist after sweating, *Gui Zhi Tāng* (Cinnamon Twig Decoction) should be administered instead to harmonize the *wei* (defensive) and *ying* (nutritive) levels, and to mildly induce diaphoresis. On the other hand, if the use of *Ma Huang Tāng* causes excessive and prolonged perspiration, sweating must be stopped to avoid collapse. For this purpose, use astringent herbs such as *Ma Huang Gen* (*Radix et Rhizoma Ephedrae*), calcined *Long Gu* (*Os Draconis*), and calcined *Mu Li* (*Concha Ostreae*).
- After taking this formula, some patients may notice nosebleeds or signs of irritability, which indicate transformation of wind-cold into heat. Should this happen, reduce the dose of the formula, and the heat will dissipate spontaneously. If the symptoms become worse, however, *Ma Huang Tāng* should be discontinued, and an appropriate heat-clearing formula should be given.
- Rare cases of allergic rash have been reported following the use of *Ma Huang Tāng*.¹

PHARMACOLOGICAL EFFECTS

1. **Effect on temperature regulation:** In rabbits with artificially-induced fever, intravenous injection of a *Ma Huang Tāng* preparation at the dose of 1 g/kg was effective in reducing the body temperature within 30 minutes. In mice with normal body temperature, intraperitoneal injection of a *Ma Huang Tāng* preparation at the dose of 5 g/kg reduced the body temperature by 5°C after 30 minutes.²
2. **Antitussive:** In a laboratory study evaluating the effect of *Ma Huang Tāng* in relieving cough, a number of mice were divided into herb-group or placebo-group. The mice in the herb-group received intraperitoneal injection of the herbs at the dose of 5 g/kg, while the placebo group received saline injection. The mice were exposed to ammonia to induce cough. After 5 minutes, the mice in the herb-group coughed an average of 17.70 times, while the mice in the placebo-group cough 44.96 times.³
3. **Antibiotic:** According to *in vitro* studies, *Ma Huang Tāng* demonstrated inhibitory effects against *E. coli* and *Staphylococcus aureus*, and antiviral effects against respiratory syncytial virus.^{4,5}
4. **Cardiovascular:** In one *in vitro* study, intravenous administration of *Ma Huang Tāng* at 2-3 g/kg in rabbits was associated with an initial drop in blood pressure, followed by a rise of 10-20 mmHg. It was noted that

repeated administration was associated with tolerance, and that use of a larger dose was associated with increased depth and rate of respiration as well as increased heart rate.⁶ In one *in vivo* study involving 7 healthy human males (age, 22.3 +/- 1.8 years old), administration of *Ma Huang Tāng* induced an increase in blood pressure, heart rate, stroke volume, cardiac output and cardiac index, but a decrease in total peripheral resistance. The study speculated that comprehensive mechanisms of *Ma Huang Tāng* were not only dependent of ephedrine, the main active constituent of *Ma Huang* (*Herba Ephedrae*), but also dependent on the vasodilatory action of *Gui Zhi* (*Ramulus Cinnamomi*).⁷

5. **Radioprotective:** Intraperitoneal injection of *Ma Huang Tāng* was associated with marked protective effects in mice against skin injury induced by irradiation.⁸

CLINICAL STUDIES AND RESEARCH

1. **Fever:** Thirteen children with high fever ranging between 38-40.1°C (100.4-104.2°F) were treated with 6 doses of *Ma Huang Tāng* with reduction of body temperature in all patients.⁹
2. **Upper respiratory tract infection:** Two hundred and ninety-two children with upper respiratory tract infection and fever over 38°C / 100.4°F were treated with *Ma Huang Tāng* with satisfactory results. The study reported complete recovery in 196 cases within 24 hours, 86 cases within 48 hours, and 10 cases with no improvement. The overall rate of effectiveness was 96.5%.¹⁰
3. **Cough:** Use of modified *Ma Huang Tāng* to treat stubborn cough after recovery from an exterior condition demonstrated a rate of effectiveness of 92%. The herbal treatment contained this formula plus *Pi Pa Ye* (*Folium Eriobotryae*) and others as the base formula, with addition of *Dan Nan Xing* (*Arisaema cum Bile*) and *Ban Xia* (*Rhizoma Pinelliae*) for profuse sputum; *Huang Qin* (*Radix Scutellariae*) and *Shi Gao* (*Gypsum Fibrosum*) for yellow, sticky sputum; *He Zi* (*Fructus Chebulae*) and *Tian Hua Fen* (*Radix Trichosanthis*) for a sore throat and a hoarse voice; *Xuan Shen* (*Radix Scrophulariae*), *Mai Dong* (*Radix Ophiopogonis*), and *Sha Shen* (*Radix Glehniae seu Adenophorae*) for the presence of thick, sticky sputum that is difficult to expectorate and a red tongue body with a thin coating; and *Huang Qi* (*Radix Astragali*) and *Fang Feng* (*Radix Saposhnikoviae*) for fatigue and profuse perspiration. Of 26 patients, the study reported complete recovery in 18 cases, improvement in 6 cases, and no improvement in 2 cases.¹¹
4. **Peripheral neuropathy:** Use of modified *Ma Huang Tāng* to treat 38 patients with peripheral neuropathy resulted in an effectiveness rate of 68.75%. The herbal formula contained *Ma Huang* (*Herba Ephedrae*), *Gui Zhi* (*Ramulus*

Má Huáng Tāng (Ephedra Decoction)

Cinnamomi), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), and *Ju Luo* (Vascular Citri Reticulatae). The treatment protocol was to administer the herbs in powder form three times daily for 3 weeks. Clinical improvements included increased physical sensation and reduced pain and numbness. Of 38 patients, the study reported significant improvement in 4 patients, moderate improvement in 22 patients, and no benefit in 12 patients.¹²

5. **Enuresis:** Administration of modified *Ma Huang Tang* was effective in treating enuresis in 10 children between 6–12 years of age with 3–9 years history of illness. The herbal formula contained *Ma Huang* (Herba Ephedrae) 5g, *Gui Zhi* (Ramulus Cinnamomi) 3g, *Sang Piao Xiao* (Ootheca Mantidis) 3g, *Jin Ying Zi* (Fructus Rosae Laevigatae) 3g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 2g. The dose of *Ma Huang* (Herba Ephedrae) was decreased to 4g in the summer, and increased to 6g in the winter. In addition to this base formula, *Dang Shen* (Radix Codonopsis) 6g was added for qi deficiency; and *Ba Ji Tian* (Radix Morindae Officinalis) 3g and *Yi Zhi* (Fructus Alpiniae Oxyphyllae) 3g were added for yang deficiency. The treatment protocol was to cook all the herbs together, and administer the decoction in two equally-divided doses daily. The study reported complete recovery in 9 of 10 patients within 3 to 6 packs of herbs.¹³
6. **Mastitis:** Modified *Ma Huang Tang* effectively treated 71 patients with acute mastitis with elevated white blood cells count and fever (58 patients with temperature over 38°C / 100.4°F). The base formula included *Ma Huang Tang* plus *Pu Gong Ying* (Herba Taraxaci) and *Jin Yin Hua* (Flos Lonicerae Japonicae), with the addition of *Lou Lu* (Radix Rhapontici) for obstructed flow of breast milk. The herbs were given in decoction, with most patients having significant improvement to complete recovery within 2 days. The overall rate of effectiveness was 98%.¹⁴

HERB-DRUG INTERACTION

Interferon-induced adverse reactions: Concurrent use of two separate herbal formulas reduced the adverse effects of interferon in hepatitis C patients. Of 28 patients with chronic hepatitis C, 8 patients in Group A received both interferon-beta and *Ma Huang Tang*, and 4 patients in Group B received both interferon-beta and *Da Qing Long Tang* (Major Bluegreen Dragon Decoction), and 16 patients in Group C received only interferon-beta. Adverse effects were evaluated and monitored by clinical and laboratory examinations. At the end of the treatment, patients in Group A and B had significantly lower incidences than Group C of discomfort, fever, general malaise, paresthesia and arthralgia. HCV-RNA was negative in all patients. Based on this information, the study concluded that the

use of these two formulas may reduce the adverse effects accompanying interferon-beta treatment in patients with chronic hepatitis C without reducing the antiviral effects.¹⁵

Another study also reported positive results using *Ma Huang Tang* and interferon-beta in 18 patients with chronic hepatitis C. The treatment protocol was to administer *Ma Huang Tang* immediately before, immediately after, and 1 hour after interferon-beta administration. The study reported that patients who received both herbs and drug had significantly less adverse reactions such as general malaise, arthralgia and discomfort, compared to patients in the control group who did not receive the herbs. *Ma Huang Tang* did not affect plasma concentrations of interleukin-1beta and TNF-alpha. The study concluded that *Ma Huang Tang* was effective in reducing the flu-like symptoms accompanying interferon-beta and in improving the biochemical response rate.¹⁶

TOXICOLOGY

The LD₅₀ of *Ma Huang Tang* in mice administered via intraperitoneal injection is 28.51 g/kg within 24 hours.¹⁷

RELATED FORMULAS

Má Huáng Jiā Zhú Tāng

(Ephedra Decoction plus Atractylodes)

麻黃加術湯

麻黃加木湯

Pinyin Name: *Ma Huang Jia Zhu Tang*

Literal Name: Ephedra Decoction plus Atractylodes

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

Ma Huang (Herba Ephedrae) 9g [6g]

Gui Zhi (Ramulus Cinnamomi) 6g [4g]

Ku Xing Ren (Semen Armeniacae Amarum) 70 kernels [9g]

Zhi Gan Cao (Radix et Rhizoma

Glycyrrhizae Praeparata cum Melle) 3g

Bai Zhu (Rhizoma Atractylodis Macrocephalae) 12g [9g]

The source text states to cook *Ma Huang* (Herba Ephedrae) with 9 cups [1,800 mL] of water until 7 cups [1,400 mL] of liquid remain. Remove the foam on the top, add in the other ingredients, and cook until the liquid is reduced to 2.5 cups [500 mL]. Take 0.8 cup [160 mL] of the warm, strained decoction and cover the body with blankets to promote slight perspiration. Today, the decoction may be prepared using the doses suggested in brackets.

Ma Huang Jia Zhu Tang (Ephedra Decoction plus Atractylodes) induces diaphoresis, releases the exterior, disperses

Má Huáng Tāng (Ephedra Decoction)

cold, and dispel dampness. It treats exterior-excess, wind-cold syndrome with damp accumulation. Dampness may form inside the body following a wind-cold attack and block the qi flow, causing aches and pains and a feeling of heaviness all over the body. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) is added to dry dampness, relieve the aches and pains, and dispel the sensation of heaviness caused by cold and dampness.

Ma Huang Jia Zhu Tang treats wind-cold invasion with damp accumulation. It is best for patients with pre-existing dampness, who experience a wind-cold invasion. These patients tend to be heavier in weight or have Spleen qi deficiency. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) dries dampness, enhances the water-dispelling action of *Ma Huang* (Herba Ephedrae), and prevents profuse perspiration. This formula should never be prescribed to someone who has wind-heat invasion or deficiency manifesting in perspiration. Ideally, after taking the formula, the patient should feel a sensation of warmth and experience a slight perspiration. The dose of *Ma Huang* (Herba Ephedrae) should never be increased to induce profuse perspiration, since this may cause yin deficiency.

Má Xīng Yì Gān Tāng

(Ephedra, Apricot Kernel, Coicis, and Licorice Decoction)

麻杏薤甘湯

麻杏苳甘湯

Pinyin Name: *Ma Xing Yi Gan Tang*

The source text states to grind the ingredients coarsely, then cook 12g with 1.5 large bowls of water until the liquid is reduced to 80%. Take the strained decoction while warm. If sweating occurs after taking the formula, avoid

exposure to wind. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

Ma Xing Yi Gan Tang (Ephedra, Apricot Kernel, Coicis, and Licorice Decoction) releases the exterior and dispels dampness. Clinically, patients will have pain all over the whole body, and fever that is most prominent in the afternoon. The exterior-releasing effect of this formula is not as strong as *Ma Huang Tang*, since *Gui Zhi* (Ramulus Cinnamomi) is omitted from the formula, and the doses of all the herbs are drastically reduced.

Wind-cold generally turns into wind-heat if not treated properly. This formula does not contain warm herbs, such as *Gui Zhi* (Ramulus Cinnamomi) or *Bai Zhu* (Rhizoma Atractylodis Macrocephalae). Instead, a cool herb, *Yi Yi Ren* (Semen Coicis), is used instead to dispel dampness. Clinical applications of this formula include rheumatic arthritis, rheumatism, neuralgia, general aches and pains of the muscles and joints, keratosis, palmaris, keratosis plantaris, warts, and eczema.

Sān Āo Tāng (Three-Unbinding Decoction)

三拗湯

三拗湯

Pinyin Name: *San Ao Tang*

Literal Name: Three-Unbinding Decoction

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

Ma Huang (Herba Ephedrae)

Ku Xing Ren (Semen Armeniacae Amarum)

Gan Cao (Radix et Rhizoma Glycyrrhizae)

The source text instructs to grind equal portions of all three herbs into a coarse powder. Cook 15g of the powder with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 1.5 large bowls of water until it is reduced to 1 bowl. After taking the strained decoction, the patient is advised to go to bed and stay covered until a mild perspiration has been induced.

San Ao Tang (Three-Unbinding Decoction) treats exterior wind-cold invasion by ventilating the Lung and expelling exterior factors. Clinically, it treats common colds caused by wind, and characterized by symptoms such as stuffy nose, a sensation of heaviness in the body, hoarseness of voice, headache, vertigo, lethargy, coughing with sputum, chest fullness, and shortness of breath.

Má Huáng Tāng (Ephedra Decoction)

AUTHORS' COMMENTS

Although *Ma Huang Tang* can treat common cold, influenza, acute bronchitis, and asthma caused by excess wind-cold invasion, it is rarely prescribed today. Rather, it serves as a foundation formula, to which other herbs are added.

“*Ma Huang Tang* must have *Gui Zhi* (Ramulus Cinnamomi) and *Gui Zhi Tang* (Cinnamon Twig Decoction) must **not** have *Ma Huang* (Herba Ephedrae)” is the classic guiding principle of these two formulas for the following reasons.

- *Ma Huang Tang* treats an exterior-excess, wind-cold condition with pathogenic factors affecting the *wei* (defensive) level and reaching the *ying* (nutritive) level. *Ma Huang Tang* needs *Gui Zhi* (Ramulus Cinnamomi) to harmonize the *wei* (defensive) and *ying* (nutritive) levels, so that *Ma Huang* (Herba Ephedrae) can safely and effectively dispel wind-cold from the exterior.
- *Gui Zhi Tang* (Cinnamon Twig Decoction) treats an exterior-deficient, wind-cold condition with perspiration. *Ma Huang* (Herba Ephedrae) must **not** be used to avoid profuse perspiration and excessive loss of body fluids. The use of *Ma Huang* (Herba Ephedrae) in someone who is already deficient will only worsen their condition and contribute to greater deficiency.¹⁸

Ma Huang Tang and *Gui Zhi Tang* (Cinnamon Twig Decoction) are two representative formulas for treating exterior wind-cold. Both formulas contain *Gui Zhi* (Ramulus Cinnamomi) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle). The differences are as follow:

- *Ma Huang Tang* contains *Ma Huang* (Herba Ephedrae) and *Ku Xing Ren* (Semen Armeniacae Amarum) to treat exterior-excess wind-cold condition affecting the Lung functions, causing dyspnea, cough and wheezing. After taking the herbal decoction, patients should cover up to induce more sweating.
- *Gui Zhi Tang* contains *Bai Shao* (Radix Paeoniae Alba) and *Da Zao* (Fructus Jujubae) to treat exterior-deficient, wind-cold invasion with disharmony of the *ying* (nutritive) and *wei* (defensive) levels. Because of deficiency, patients should eat porridge after taking the decoction to strengthen the body and to promote sweating.¹⁹

Ma Huang Jia Zhu Tang (Ephedra Decoction plus Atractylodes) and *Ma Xing Yi Gan Tang* (Ephedra, Apricot Kernel, Coicis, and Licorice Decoction), both derived from *Ma Huang Tang*, are indicated for pain with dampness associated with wind-cold invasion.

- *Ma Huang Jia Zhu Tang* contains *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) to dry dampness and relieve pain that is associated with damp accumulation. In addition, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) prevents over-sweating from the use of *Ma Huang* (Herba Ephedrae). This formula is suitable for those patients with aversion to cold, fever, and absence of perspiration.
- *Ma Xing Yi Gan Tang* treats pain of lesser severity than *Ma Huang Jia Zhu Tang*. Besides pain, patients often experience fever that is more severe in the afternoon, which indicates that the wind-cold condition is turning into heat. For this reason, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Gui Zhi* (Ramulus Cinnamomi), both warm in property, are not used, but instead, *Yi Yi Ren* (Semen Coicis) is selected.²⁰

Dà Qīng Lóng Tāng (Major Bluegreen Dragon Decoction)

大青龍湯 大青龙汤

Pinyin Name: *Da Qing Long Tang*

Literal Name: Major Bluegreen Dragon Decoction

Alternate Name: Major Blue Dragon Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Ma Huang</i> (Herba Ephedrae)	18g [12g]
<i>Gui Zhi</i> (Ramulus Cinnamomi)	6g [4g]
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	40 kernels [6g]
<i>Shi Gao</i> (Gypsum Fibrosum), <i>fen sui</i> (pulverized)	egg yolk in size [12g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g [5g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	9g [9g]
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	12 pieces [3 pieces]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook *Ma Huang* (Herba Ephedrae) first with 9 cups [1,800 mL] of water until 7 cups [1,400 mL] of the liquid remain. Remove the foam from the top, add the other ingredients, and cook until the liquid is reduced to 3 cups [600 mL]. Take 1 cup [200 mL] of the strained decoction while warm to promote mild sweating. Discontinue the formula once perspiration occurs. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Induces diaphoresis and releases the exterior
2. Clears heat and relieves irritability

CLINICAL MANIFESTATIONS

Exterior wind-cold syndrome with interior heat: fever and aversion to cold of equal severity, a superficial and tight pulse, body aches, absence of perspiration, irritability, and restlessness.

CLINICAL APPLICATIONS

Common cold, influenza, asthma, wheezing and dyspnea, fever, bronchitis, pneumonia, meningitis, measles, urticaria, erysipelas, arthritis, anhidrosis, allergic rhinitis, acute nephritis, and edema caused by nephritis.

EXPLANATION

Da Qing Long Tang (Major Bluegreen Dragon Decoction) is a variation of *Ma Huang Tang* (Ephedra Decoction), and treats severe *taiyang* cold syndrome with interior heat formation. Aversion to cold, fever, absence of perspiration, and a superficial, tight pulse all indicate *taiyang*

cold syndrome of exterior-excess and wind-cold. Because of the severe cold constriction at the exterior, the yang qi is unable to disperse and circulate; the blockage of yang qi circulation eventually produces interior heat. As a result, patients experience irritability and restlessness. Therefore, optimal treatment requires the use of herbs to release wind-cold from the exterior and clear heat from the interior.

In this formula, the dose of *Ma Huang* (Herba Ephedrae) is double the dose found in *Ma Huang Tang* (Ephedra Decoction) because this syndrome involves a more severe form of wind-cold. The increase in dose greatly enhances the exterior-releasing effect through diaphoresis. *Gui Zhi* (Ramulus Cinnamomi) helps *Ma Huang* (Herba Ephedrae) dispel exterior wind-cold and relieve body aches. *Ku Xing Ren* (Semen Armeniacae Amarum) smoothes the qi flow of the Lung to relieve dyspnea. *Shi Gao* (Gypsum Fibrosum) clears interior heat and relieves irritability and restlessness. It also prevents the warm property of *Ma Huang* (Herba Ephedrae) from creating more heat in the body. The dose of *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) is also increased to counter any body fluid loss caused by interior heat.

Sheng Jiang (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) harmonize the *ying* (nutritive) and *wei* (defensive) levels and moderate the contrasting properties of *Ma Huang* (Herba Ephedrae) and *Shi Gao* (Gypsum Fibrosum). Moreover, they tonify qi and harmonize the middle *jiao*. Since this formula has a very strong exterior-releasing action, it should be discontinued as soon as mild perspiration is obtained.

Dà Qīng Lóng Tāng (Major Bluegreen Dragon Decoction)

Da Qing Long Tang (Major Bluegreen Dragon Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Wind-cold syndrome with interior heat	<ul style="list-style-type: none"> • Fever and aversion to cold: exterior condition • Absence of perspiration and a tight pulse: exterior excess condition • Body aches and pains: blocked qi and blood circulations • Irritability and restlessness: interior heat • Superficial, tight pulse: exterior condition 	<ul style="list-style-type: none"> • Induces diaphoresis and releases the exterior • Clears heat and relieves irritability 	<ul style="list-style-type: none"> • <i>Ma Huang</i> (Herba Ephedrae) strongly dispels wind-cold and induces diaphoresis. • <i>Gui Zhi</i> (Ramulus Cinnamomi) dispels exterior wind-cold and relieves body aches. • <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) smoothes the qi flow of the Lung to relieve dyspnea. • <i>Shi Gao</i> (Gypsum Fibrosum) clears interior heat and relieves irritability. • <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) prevents loss of body fluids caused by interior heat. • <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Da Zao</i> (Fructus Jujubae) tonify qi, strengthen the middle <i>jiao</i>, and harmonize the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels.

MODIFICATIONS

- For headache and pain in the extremities, add *Chuan Xiong* (Rhizoma Chuanxiong) and *Bai Zhi* (Radix Angelicae Dahuricae).
- For signs of fever and fatigue, add *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- If there is dryness and thirst caused by Lung heat, add *Xie Bai San* (Drain the White Powder).

CAUTIONS / CONTRAINDICATIONS

- *Da Qing Long Tang* is a strong exterior-releasing formula that may induce too much perspiration and damage yang qi. Therefore, this formula is contraindicated in patients who have spontaneous perspiration, aversion to wind, a weak pulse, or generalized deficiency. It should be used only as needed and discontinued when the desired effects are achieved. Do not use for a prolonged period of time or at exceedingly large dosages.¹
- Profuse sweating may consume yang and cause weakness, irritability, aversion to cold, and inability to sleep. To stop perspiration, the source text instructs to apply powder to the body. Note: Traditionally, the powder of *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae), or *Nuo Mi* (Oryza Glutinosa) was used. Today, baby powder may be used as a substitute.

PHARMACOLOGICAL EFFECTS

1. **Effect on temperature regulation:** Oral ingestion of *Da Qing Long Tang* at 14 mL/kg (equivalent to 45.9g of dried herbs) reduced body temperature in rabbits with artificially-induced fever. The average onset of action was 90

minutes after oral ingestion. The average reduction of temperature was 0.96°C, measured 120 minutes after oral ingestion of the herbs.²

2. **Antibacterial:** *Da Qing Long Tang* demonstrated inhibitory effects against *E. coli* and *Staphylococcus aureus*.³

CLINICAL STUDIES AND RESEARCH

1. **Asthma:** Forty-six patients between 26-72 years of ages with asthma were treated with a slightly modified *Da Qing Long Tang* with marked improvement in 18 cases, moderate improvement in 23 cases, and no improvement in 5 cases. The rate of effectiveness was 89.1%.⁴
2. **Wheezing and dyspnea:** One study reported 93.3% effectiveness using modified *Da Qing Long Tang* to treat wheezing and dyspnea caused by chronic tracheitis. The herbal treatment consisted of *Da Qing Long Tang* plus *Hou Po* (Cortex Magnoliae Officinalis), *Di Long* (Pheretima), *Bai Guo* (Semen Ginkgo) and others as the base formula. *Huang Qin* (Radix Scutellariae) and *Gua Lou* (Fructus Trichosanthis) were added for cough with sticky, yellow phlegm; and *Xi Xin* (Radix et Rhizoma Asari), *Ban Xia* (Rhizoma Pinelliae), and *Sheng Jiang* (Rhizoma Zingiberis Recens) were added for cough with clear, watery phlegm. Out of 74 patients, the study reported relief of wheezing and dyspnea in 33 cases, marked improvement in 25 cases, slight improvement in 11 cases, and no improvement in 5 cases.⁵
3. **Fever:** *Da Qing Long Tang* was used successfully to treat patients with fever without perspiration. The treatment protocol was to cook one pack of herbs in water, and drink the decoction in three equally-divided doses daily.

Dà Qīng Lóng Tāng (Major Bluegreen Dragon Decoction)

Most patients responded within 2-3 packs, while those with severe fever may require up to 4-5 packs. Out of 300 patients, the study reported complete recovery in 273 cases, improvement in 21 cases, and no benefit in 6 cases. The overall effectiveness was 98%.⁶

4. **Anhidrosis:** Use of modified *Da Qing Long Tang* was effective in treating 12 patients with abnormal deficiency or absence of sweating caused by improper use of air conditioning or heating systems. The herbal treatment used *Da Qing Long Tang* plus *Ge Gen* (*Radix Puerariae Lobatae*) and *He Huan Pi* (*Cortex Albiziae*) as the base formula, with the addition of *Qiang Huo* (*Rhizoma et Radix Notopterygii*) and *Jie Geng* (*Radix Platycodonis*) for anhidrosis in the upper body; *Chuan Niu Xi* (*Radix Cyathulae*) for anhidrosis in the lower body; *Chuan Lian Zi* (*Fructus Toosendan*) for anhidrosis in the right side of the body; and *Zhi Mu* (*Rhizoma Anemarrhenae*) for fidgeting and irritability. The study reported complete recovery in all 12 cases within 3-9 packs of herbal treatment.⁷
5. **Allergic rhinitis:** Modified *Da Qing Long Tang* was effective in treating allergic rhinitis. In addition to the formula, *Huang Qi* (*Radix Astragali*) and *Bai He* (*Bulbus Lilii*) were added for generalized deficiency; *Xi Xin* (*Radix et Rhizoma Asari*) and *Lu Lu Tong* (*Fructus Liquidambaris*) were added for nasal obstruction; and *Bai Zhi* (*Radix Angelicae Dahuricae*) and *Chuan Xiong* (*Rhizoma Chuanxiong*) were added for headaches. The treatment protocol was to administer the herbs in decoction daily, and the average duration of treatment was 12 doses (days). Out of 32 patients, the study reported complete recovery in 19 cases, marked improvement in 7 cases, improvement in 5 cases, and no benefit in 1 case.⁸
6. **Acute nephritis:** One study reported good results using modified *Da Qing Long Tang* to treat acute nephritis. The herbal treatment included *Da Qing Long Tang* plus *Chan Tui* (*Periostracum Cicadae*), *Di Long* (*Pheretima*), *Bai Mao Gen* (*Rhizoma Imperatae*), *Yi Mu Cao* (*Herba Leonuri*), *Che Qian Zi* (*Semen Plantaginis*) and others as deemed necessary. The treatment protocol was to cook the herbs in water to obtain a decoction, and administer the decoction in five equally-divided doses daily, for 2 weeks per course of treatment. Out of 43 patients, the study reported recovery in 37 cases, improvement in 4 cases, and no benefit in 2 cases.⁹

HERB-DRUG INTERACTION

Interferon-induced adverse reactions: Concurrent use of herbs reduced the adverse effects of interferon in

hepatitis C patients. Of 28 patients with chronic hepatitis C, 8 patients in Group A received both interferon-beta and *Ma Huang Tang* (*Ephedra Decoction*), and 4 patients in Group B received both interferon-beta and *Da Qing Long Tang*, and 16 patients in Group C received only interferon-beta. Adverse effects were evaluated and monitored by clinical and laboratory examinations. At the end of the treatment, patients in Group A and B had significantly lower incidences than Group C of discomfort, fever, general malaise, paresthesia and arthralgia. HCV-RNA was negative in all patients. Based on this information, the study concluded that the use of these two formulas may reduce the adverse effects accompanying interferon-beta treatment in patients with chronic hepatitis C, without reducing the antiviral effects.¹⁰

AUTHORS' COMMENTS

The key symptoms in *Da Qing Long Tang* are absence of sweating and presence of irritability and restlessness. Absence of sweating indicates an exterior-excess condition in a constitutionally strong patient. Irritability and restlessness imply heat formation in the interior. Exterior cold coupled with interior heat is the primary diagnosis for selecting *Da Qing Long Tang*.

According to Dr. Chang Wei-Yen, *Da Qing Long Tang* can be combined with *Shi Shen Tang* (*Ten-Immortal Decoction*) to treat common cold characterized by wind-cold and manifesting in symptoms of aversion to cold, and nasal obstruction or clear, watery nasal discharge.

<i>Chi Shao</i> (Radix Paeoniae Rubra)	30g [3g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae), <i>chao</i> (dry-fried)	30g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind all of the ingredients into powder. Cook 9g of the powder with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae) in 1.5 large bowls of water until the liquid is reduced by 20%. Take the strained decoction while warm. Today, this formula may be prepared as a decoction with doses the suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Releases exterior wind-cold
2. Ventilates the Lung and directs rising qi downward
3. Stops cough and dyspnea

CLINICAL MANIFESTATIONS

Wind-cold syndrome with severe Lung dysfunction: cough and dyspnea, profuse sputum, thick and sticky nasal discharge and sputum, a low-pitched voice, dizziness, headache, neck pain, body aches, aversion to cold and fever, fullness and a stifling sensation in the chest and diaphragm, and other Lung-related symptoms.

CLINICAL APPLICATIONS

Common cold, influenza, asthma, wheezing, dyspnea, bronchitis, and cough.

Jīn Fèi Cǎo Sǎn (Inula Powder)

EXPLANATION

Jin Fei Cao San (Inula Powder) treats exterior wind-cold syndrome with severe Lung dysfunction. Exterior wind-cold is characterized by symptoms such as headache, neck pain, body aches, and aversion to cold and fever. Exterior wind-cold may affect the normal functioning of the Lung, causing symptoms such as cough, dyspnea, feelings of fullness and stifling sensation in the chest and diaphragm, and profuse sputum.

Xuan Fu Hua (Flos Inulae), the chief herb, ventilates the Lung, directs Lung qi downward, and dissolves phlegm. *Jing Jie Sui* (Spica Schizonepetae) and *Ma Huang* (Herba Ephedrae) dispel wind-cold and induce diaphoresis to eliminate the exterior pathogenic factors. *Qian Hu* (Radix Peucedani) dissolves phlegm and directs Lung qi downward. *Ban Xia* (Rhizoma Pinelliae) dries dampness and eliminates phlegm. Bitter and slightly cold, *Chi Shao* (Radix Paeoniae Rubra) controls the warming and drying herbs in this formula from consuming yin and body fluids. *Sheng Jiang* (Rhizoma Zingiberis Recens), *Da Zao* (Fructus Jujubae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) strengthen the middle *jiao* and harmonize the formula.

MODIFICATIONS

- If there is more phlegm, add *Fu Ling* (Poria) and *Chen Pi* (Pericarpium Citri Reticulatae).
- For more severe cough, dyspnea, and chest congestion, add *Ku Xing Ren* (Semen Armeniacae Amarum) and *Hou Po* (Cortex Magnoliae Officinalis).

- If there is a feeling of fullness, distention and oppression underneath the heart, add *Zhi Qiao* (Fructus Aurantii) and *Jie Geng* (Radix Platycodonis).
- With signs of perspiration and cough, add *Ku Xing Ren* (Semen Armeniacae Amarum) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- If the headache is more severe, add *Chuan Xiong* (Rhizoma Chuanxiong) and *Bai Zhi* (Radix Angelicae Dahuricae).

AUTHORS' COMMENTS

Hua Gai San (Canopy Powder) and *Jin Fei Cao San* treat wind-cold syndrome with severe Lung dysfunction. Both formulas relieve cough, eliminate phlegm, and treat various Lung-related signs and symptoms.

- *Hua Gai San* effectively dispels phlegm and directs Lung qi downward.
- *Jin Fei Cao San* strongly releases the exterior, and thus is reserved for severe cases of wind-cold syndrome affecting the Lung.

This formula is called *Jin Fei Cao San* because the chief herb in this formula was traditionally *Jin Fei Cao* (Herba Inulae). However, *Jin Fei Cao* (Herba Inulae) has only a mild potent action to direct qi downward and dissolve phlegm. Consequently, *Jin Fei Cao* (Herba Inulae) is now commonly replaced by *Xuan Fu Hua* (Flos Inulae), another herb from the same plant with more potent functions.

Jin Fei Cao San (Inula Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Wind-cold syndrome with severe Lung dysfunction	<ul style="list-style-type: none"> • Headache, neck pain, body aches, aversion to cold, fever, and nasal obstruction: exterior wind-cold • Cough and dyspnea with profuse sputum, feelings of fullness and a stifling sensation in the chest and diaphragm: exterior wind-cold affecting the Lung 	<ul style="list-style-type: none"> • Releases exterior wind-cold • Ventilates the Lung and directs rising qi downward • Stops cough and dyspnea 	<ul style="list-style-type: none"> • <i>Xuan Fu Hua</i> (Flos Inulae) ventilates the Lung, directs Lung qi downward, and dissolves phlegm. • <i>Jing Jie Sui</i> (Spica Schizonepetae) and <i>Ma Huang</i> (Herba Ephedrae) dispel wind-cold and induce diaphoresis. • <i>Qian Hu</i> (Radix Peucedani) dissolves phlegm and directs Lung qi downward. • <i>Ban Xia</i> (Rhizoma Pinelliae) dries dampness and eliminates phlegm. • <i>Chi Shao</i> (Radix Paeoniae Rubra) controls the warming and drying herbs from consuming yin and body fluids. • <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>Da Zao</i> (Fructus Jujubae) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) strengthen the middle <i>jiao</i> and harmonize the herbs.

Guì Zhī Tāng (Cinnamon Twig Decoction)

桂枝湯 桂枝汤

Pinyin Name: *Gui Zhi Tang*

Literal Name: Cinnamon Twig Decoction

Alternate Names: *Kuei Chih Tang*, Cinnamon Decoction, Cassia Twig Decoction, Cinnamon Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g
<i>Bai Shao</i> (Radix Paeoniae Alba)	9g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>qie</i> (sliced)	9g
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	12 pieces [3 pieces]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to coarsely crush the ingredients and cook with 7 cups [1,400 mL] of water over low intensity fire until 3 cups [600 mL] of the liquid remain. Take 1 cup [200 mL] of the warm, strained decoction, followed by 1 cup [200 mL] of hot porridge, to promote and enhance the therapeutic effect of the herbs. For best results, have the patient sweat slightly all over the body but do not induce profuse sweating. Once slight sweating has been achieved, stop taking the formula. If perspiration does not occur, repeat the dose one or two more times, progressively reducing the time interval between doses within half of a day.

If the patient's condition is severe, administer the dose twice daily (morning and night), and progressively add another two to three doses if no sweating has been induced after taking the formula for two hours. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Releases the exterior and muscle layer
2. Regulates and harmonizes *ying* (nutritive) *qi* and *wei* (defensive) *qi*

CLINICAL MANIFESTATIONS

Exterior-deficient, wind-cold syndrome: headache, fever, perspiration, aversion to wind, nasal congestion, dry heaves, absence of thirst, a thin, white tongue coating, and a superficial and moderate, or superficial and weak pulse.

Disharmony of the *ying* (nutritive) and *wei* (defensive) levels: feverish sensations with spontaneous sweating and aversion to wind in constitutionally-weak, chronic and debilitating, or postpartum patients.

CLINICAL APPLICATIONS

Fever, common cold, influenza, respiratory tract infections, allergic rhinitis, bronchial asthma, atrioventricular block, testicular pain, hernia, appendicitis, sciatica, allergic purpura, itching, frostbite, eczema, urticaria, enuresis, and hyperactivity disorder.

EXPLANATION

Gui Zhi Tang (Cinnamon Twig Decoction), first presented in the *Shang Han Lun* (Discussion of Cold-Induced Disorder), is designed to treat *taiyang* wind syndrome. *Taiyang* wind syndrome refers to attack by wind-cold pathogenic factors at the body's exterior, with wind being the dominant pathogen. Unlike cold, which constricts the body, wind is dispersing and highly mobile in character. Wind usually attacks the exterior of the body and leaves after the attack, taking with it some of the body's *wei* (defensive) *qi*.

Wei (defensive) *qi* controls the opening and closing of the skin pores; the subsequent depletion of *wei qi* impairs the body's regulation of the skin pores. The pores are left open after the wind invasion, which allows yang *qi* to leak out of the body, carrying body fluids with it. Hence, patients will experience perspiration and aversion to wind. Note that perspiration, one of the key characteristics of this syndrome, is absent in *taiyang* cold syndrome, as discussed in *Ma Huang Tang* (Ephedra Decoction).

Since cold is also involved in *taiyang* wind syndrome, stagnation of *qi* and blood and obstruction of the channels may also occur, causing headache and neck stiffness. However, the severity of the headache and neck stiffness seen in *taiyang* wind syndrome is much less than that found in *taiyang* cold syndrome. Since the disease is at the exterior, the tongue coating is still normal. The pulse,

Guì Zhī Tāng (Cinnamon Twig Decoction)

Gui Zhi Tang (Cinnamon Twig Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Exterior-deficient, wind-cold syndrome	<ul style="list-style-type: none">• Fever and aversion to wind: exterior wind-cold with deficiency of <i>wei</i> (defensive) <i>qi</i>• Perspiration: disharmony of the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels• Thin, white tongue coating: exterior wind-cold• Superficial and weak pulse: exterior condition with underlying deficiency	<ul style="list-style-type: none">• Releases the exterior and the muscle layer• Regulates and harmonizes <i>ying</i> (nutritive) <i>qi</i> and <i>wei</i> (defensive) <i>qi</i>	<ul style="list-style-type: none">• <i>Gui Zhi</i> (Ramulus Cinnamomi) releases wind-cold from the exterior and muscle layer.• <i>Bai Shao</i> (Radix Paeoniae Alba) consolidates the interior (yin and body fluids).• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) relieves aches and pains, benefits yin, and harmonizes the herbs.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Da Zao</i> (Fructus Jujubae) benefit the middle <i>jiao</i> and tonify <i>qi</i>.

superficial and moderate, or superficial and weak, indicates an exterior-deficiency syndrome.

Gui Zhi Tang contains only five ingredients, but it has multiple functions: disperse, tonify, release, and constrict. *Gui Zhi* (Ramulus Cinnamomi), the chief herb, releases wind-cold from the exterior and muscle layer to relieve body aches and pains. *Bai Shao* (Radix Paeoniae Alba), the deputy herb, consolidates the body's interior (e.g., yin and body fluids). Used together, *Gui Zhi* (Ramulus Cinnamomi) and *Bai Shao* (Radix Paeoniae Alba) harmonize *wei* (defensive) *qi* and *ying* (nutritive) *qi*. *Gui Zhi* (Ramulus Cinnamomi) is acrid and warm; *Bai Shao* (Radix Paeoniae Alba) is sour and cool. The former is dispersing in nature, while the latter is nourishing.

Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), double in dose compared to *Ma Huang Tang* (Ephedra Decoction), serves as both assistant and envoy herb. As an assistant, it helps *Gui Zhi* (Ramulus Cinnamomi) relieve aches and pains and helps *Bai Shao* (Radix Paeoniae Alba) benefit yin; as an envoy, it harmonizes the formula. *Sheng Jiang* (Rhizoma Zingiberis Recens), besides helping *Gui Zhi* (Ramulus Cinnamomi) to dispel exterior wind and cold, stops nausea and relieves dry heaves. *Da Zao* (Fructus Jujubae) tonifies *qi* and body fluids. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) work synergistically to benefit the middle *jiao* and assist in *qi* production.

Lastly, this formula also treats disharmony of *ying* (nutritive) *qi* and *wei* (defensive) *qi* brought on by major illnesses, child delivery, and *qi* or blood deficiency. Clinical manifestations in such cases include slight feverish sensations with perspiration and aversion to wind.

MODIFICATIONS

- For aversion to cold and absence of perspiration, add *Ma Huang* (Herba Ephedrae) and *Ge Gen* (Radix Puerariae Lobatae).
- With more fever than aversion to cold, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).
- For neck and shoulder pain, add *Ge Gen* (Radix Puerariae Lobatae).
- If there is headache, add *Gao Ben* (Rhizoma et Radix Ligustici), *Chuan Xiong* (Rhizoma Chuanxiong) and *Bai Zhi* (Radix Angelicae Dahuricae).
- For sneezing, runny nose, and nasal obstruction, add *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae) and *Xin Yi Hua* (Flos Magnoliae).
- If accompanied by coughing and wheezing, add *Hou Po* (Cortex Magnoliae Officinalis) and *Ku Xing Ren* (Semen Armeniacae Amarum).
- If there is profuse, white phlegm, remove *Bai Shao* (Radix Paeoniae Alba) and *Da Zao* (Fructus Jujubae), and add *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae).
- For convalescing patients with wind-cold invasion, add *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).

CAUTIONS / CONTRAINDICATIONS

- Since *Gui Zhi Tang* is indicated for patients with exterior-deficiency, wind-cold syndrome, porridge should be consumed after taking this formula to strengthen the body and prevent the sweating from damaging body fluids. In the case of *Ma Huang Tang* (Ephedra Decoction), which is indicated for exterior-excess, wind-cold syndrome, the intake of porridge is not necessary, since there is no deficiency.
- This formula is contraindicated in *taiyang* cold syndrome, because *Gui Zhi* (Ramulus Cinnamomi) is not strong enough to dispel excess cold; moreover, the consolidating

Guì Zhī Tāng (Cinnamon Twig Decoction)

characteristic of *Bai Shao* (*Radix Paeoniae Alba*) may actually lead cold into the interior.

- This formula is contraindicated in patients with wind-heat syndrome, exterior cold and interior heat, absence of perspiration with irritability, exterior excess conditions without perspiration, or beginning stages of febrile disorders with fever, sore throat, and thirst.
- During the course of the disease, avoid foods that are raw, cold, greasy, sticky, fatty, spicy, spoiled, or rotten. Foods such as alcohol, meat, cheese, garlic, leeks, scallions, onions, and products that are fermented or preserved should also be avoided.
- This formula is contraindicated in patients who drink alcohol frequently, since alcohol tends to cause damp-heat accumulation. Ingestion of the decoction may cause vomiting, since *Zhi Gan Cao* (*Radix et Rhizoma Glycyrrhizae Praeparata cum Melle*) and *Gui Zhi* (*Ramulus Cinnamomi*) are both sweet and warm herbs that can aggravate the damp-heat condition.

PHARMACOLOGICAL EFFECTS

1. **Effect on sweating regulation:** Use of *Gui Zhi Tang* in rats was associated with a bidirectional modulating effect on perspiration. *Gui Zhi Tang* reduced sweating in polyhidrosis induced by aminopyrine, and promoted sweating in hypohidrosis induced by atropine.¹
2. **Effect on temperature regulation:** *Gui Zhi Tang* has marked effects to reduce body temperature in cases of fever and normal body temperature. According to laboratory studies, oral ingestion of this formula reduced body temperature for up to five hours in rats with fever, and up to four hours in rats with normal body temperature.² Another study in rabbits and mice on the pharmacokinetics of this formula stated that the initial onset of action was observed 60 minutes after administration, and reached the peak effect after 120 minutes. The average reduction of temperature was 3.8°C.^{3,4}
3. **Anti-inflammatory:** Intraperitoneal injection of *Gui Zhi Tang* at 7.5 g/kg demonstrated marked anti-inflammatory effect in mice with swollen feet. The onset of effect began one hour after the injection, and lasted for approximately 24 hours.⁵ According to another study in mice, the anti-inflammatory effect of *Gui Zhi Tang* (25.32 g/kg) was stronger than aspirin (100 mg/kg).⁶
4. **Analgesic and sedative:** Intraperitoneal injection of *Gui Zhi Tang* in mice at doses of 7.5 g/kg and 15 g/kg showed marked analgesic and sedative effects. Though effective, delayed onset of effect up to 120 minutes was observed.⁷
5. **Antibiotic:** According to *in vitro* studies, administration of *Gui Zhi Tang* was associated with inhibitory effects against *Helicobacter pylori*, *Staphylococcus aureus*, *Salmonella typhi* and *Mycobacterium tuberculosis*.⁸

6. **Cardiovascular:** Administration of *Gui Zhi Tang* induced an increase of systolic blood pressure and stroke volume in 7 healthy adult males (age, 22.3 +/- 1.8 years old).⁹

CLINICAL STUDIES AND RESEARCH

1. **Fever:** In one clinical study, *Gui Zhi Tang* was evaluated for its effect to reduce body temperature in subjects with fever due to infectious diseases. Out of 24 cases with high fever, the temperature was reduced to normal in 16 cases, reduced to mild fever in 4 cases, and no effect in 2 cases. Two cases were excluded from the study as the causes of fever were determined later to be other than infectious disorders.¹⁰
2. **Common cold:** In one study involving 42 patients with common cold in the summertime, administration of *Gui Zhi Tang* was associated with complete recovery within 2-3 packs of herbs.¹¹
3. **Bronchial asthma:** One study reported 97.5% effectiveness using modified *Gui Zhi Tang* plus *Hou Po* (*Cortex Magnoliae Officinalis*) to treat bronchial asthma in 40 infants (29 males and 11 females, between 2-10 years of age, with 7 days to 6 months history of illness). The duration of treatment ranged from 1-5 days. Of 40 patients, the study reported recovery in 36 cases, improvement in 3 cases, and no effect in 1 case.¹²
4. **Atrioventricular block:** One study reported success using modified *Gui Zhi Tang* to treat atrioventricular block. The herbal treatment contained *Gui Zhi Tang* plus *San Qi* (*Radix et Rhizoma Notoginseng*) and *Huang Qi* (*Radix Astragali*) as the base formula, with addition of *Suan Zao Ren* (*Semen Ziziphi Spinosae*) for palpitations, and *Yu Jin* (*Radix Curcumae*) and *Gua Lou Pi* (*Pericarpium Trichosanthis*) for feeling of chest oppression. Of 30 patients, the study reported recovery in 28 cases and improvement in 2 cases after 14-21 days of treatment.¹³
5. **Testicular pain:** Use of modified *Gui Zhi Tang* was associated with marked relief in treating 20 patients with testicular pain. The herbal treatment contained *Gui Zhi Tang* plus *Chuan Lian Zi* (*Fructus Toosendan*) and *Mian Ma Guan Zhong* (*Rhizoma Dryopteridis Crassirhizomatis*) as the base formula. Additional modifications were made as follows: for severe pain, add *Ju He* (*Semen Citri Reticulatae*) and *Yan Hu Suo* (*Rhizoma Corydalis*); for redness and swelling of the testicles with burning sensations and pain, add *Long Dan* (*Radix et Rhizoma Gentianae*), *Mu Tong* (*Caulis Akebiae*), *Cang Zhu* (*Rhizoma Atractylodis*), and a large dose of *Mian Ma Guan Zhong* (*Rhizoma Dryopteridis Crassirhizomatis*); for testicular pain caused by trauma with blood stagnation, add *Tao Ren* (*Semen Persicae*), *Hong Hua* (*Flos Carthami*) and *Mu Xiang* (*Radix Aucklandiae*); and for fatigue, add *Dang Shen* (*Radix Codonopsis*). The duration of treatment ranged from 6-32 days.¹⁴

Gui Zhi Tang (Cinnamon Twig Decoction)

6. **Sciatica:** Use of modified *Gui Zhi Tang* was associated with a 94.1% rate of effectiveness in treating 34 patients with sciatica characterized by deficiency and cold. The herbal treatment contained *Gui Zhi Tang* plus *Chuan Xiong* (Rhizoma Chuanxiong), *Mu Gua* (Fructus Chaenomelis) and others as the base formula. Modifications to the original formula included addition of *Huang Qi* (Radix Astragali) for qi deficiency; *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Xi Xin* (Radix et Rhizoma Asari) for cold lower extremities; *Du Zhong* (Cortex Eucommiae) and *Wei Ling Xian* (Radix et Rhizoma Clematidis) for severe low back pain; and *Ji Xue Teng* (Caulis Spatholobi) and *Di Long* (Pheretima) for chronic pain or blood stagnation. Of 34 patients, the study reported complete recovery in 24 cases, improvement in 8 cases, and no benefit in 2 cases.¹⁵
7. **Allergic purpura:** One study reported complete recovery in 33 of 35 patients with allergic purpura using *Gui Zhi Tang* plus *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) for 3-5 packs of herbs.¹⁶
8. **Itching:** Modified *Gui Zhi Tang* showed effectiveness in treating itching of the skin in geriatric patients. The herbal treatment contained *Gui Zhi Tang* plus *Fang Feng* (Radix Saposhnikoviae), *Ji Xue Teng* (Caulis Spatholobi) and *Dang Gui* (Radix Angelicae Sinensis). The treatment protocol was to cook the herbs in water, and administer the decoction orally in two equally-divided doses in the morning and at night. The same herbs were cooked one more time, and the resultant solution was applied topically to the affected area as an herbal wash. Of 31 patients, the study reported complete recovery in 19 cases, improvement in 9 cases, and no effect in 3 cases. The overall rate of effectiveness was 90.3%.¹⁷
9. **Frostbite:** One study reported good results using modified *Gui Zhi Tang* to treat 43 patients with frostbite. The herbal treatment contained *Gui Zhi Tang* plus *Chi Shao* (Radix Paeoniae Rubra) and grain-based alcohol as the base formula. *Ma Huang* (Herba Ephedrae) and *Xi Xin* (Radix et Rhizoma Asari) were added for presence of cold; *Huang Qi* (Radix Astragali) for qi deficiency; *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Xi Xin* (Radix et Rhizoma Asari) and a higher dose (20g) of *Gui Zhi* (Ramulus Cinnamomi) for yang deficiency and aversion to cold; *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Hong Hua* (Flos Carthami) for blood stagnation; and topical application to the affected area using *Ma Bo* (Lasiosphaera seu Calvatia) powder mixed with sesame oil for ulcers and sores.¹⁸
10. **Enuresis:** One study reported great success in treating enuresis in young children using modified *Gui Zhi Tang*. The herbal treatment contained *Gui Zhi* (Ramulus Cinnamomi) 10g, *Bai Shao* (Radix Paeoniae Alba) 10g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 3 slices, *Da Zao* (Fructus Jujubae) 5 pieces, *Zhi Gan Cao* (Radix et Rhizoma

Glycyrrhizae Praeparata cum Melle) 6g, *Yi Zhi* (Fructus Alpiniae Oxyphyllae) 15g, *Tu Si Zi* (Semen Cuscutae) 15g, *Wu Yao* (Radix Linderae) 10g, and *Mu Gua* (Fructus Chaenomelis) 2 pieces. Of 30 infants, the study reported complete recovery in 4 cases, significant improvement in 15 cases, and moderate improvement in 11 cases. The overall effectiveness was 100%.¹⁹ Another study reported marked effectiveness in treating enuresis in 10 of 15 children using *Gui Zhi Tang* plus *Suo Quan Wan* (Shut the Sluice Pill). The average duration of treatment was 10 packs of herbs.²⁰

11. **Hyperactivity disorder:** One study reported a 93.3% rate of effectiveness using *Gui Zhi Tang* to treat hyperactivity in 30 children (between 2-13 years of age, with up to 4 years history of illness). In addition to hyperactivity, other signs and symptoms included muscle spasms and cramps, grinding of the teeth, restless legs, poor sleeping patterns, and enuresis. The duration of treatment was 7 days per course, for a total of 2-3 courses. Of 30 children, the study reported complete recovery in 8 cases, significant improvement in 17 cases, slight improvement in 3 cases, and no benefit in 2 cases. The study reported that the success of treatment was directly proportional to the duration of illness. The two cases that did not respond to treatment both had over 3 years history of hyperactivity disorder.²¹

HERB-DRUG INTERACTION

Gonadotropin-releasing hormone agonist-induced menopause: One study evaluated the therapeutic effects of certain herbal medicines on menopausal symptoms induced by gonadotropin-releasing hormone agonist therapy in Japanese women with endometriosis, adenomyosis, or leiomyoma. Menopausal symptoms induced by gonadotropin-releasing hormone agonist therapy in 13 patients were successfully treated with *Dang Gui Shao Yao San* (Tangkuei and Peony Powder), *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction), *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill), *Jia Wei Xiao Yao San* (Augmented Rambling Powder), *Tao He Cheng Qi Tang* (Peach Pit Decoction to Order the Qi) or *Gui Zhi Tang*. Of 11 patients with hot flashes, *Dang Gui Shao Yao San* (Tangkuei and Peony Powder) provided some relief in all 11 cases, and total relief in 4 cases. Most importantly, there was no significant change in serum estradiol levels after treatment with these herbal medicines. The researchers concluded that these herbal medicines could be recommended for menopausal symptoms induced by gonadotropin-releasing hormone agonists without a negative effect on serum estradiol levels.²²

TOXICOLOGY

The LD₅₀ of *Gui Zhi Tang* in mice is 28.125 g/kg within 72 hours via intraperitoneal injection.²³

Today, this formula may be prepared as a decoction with the doses suggested in brackets.

Guì Zhī Jiā Hòu Pò Xíng Zǐ Tāng (Cinnamon Twig Decoction plus Magnolia Bark and Apricot Kernel) is usually used in the following two situations: 1) dyspnea associated with reversed flow of Lung qi as a result of inappropriate treatment of an exterior wind-cold syndrome with downward draining herbs; and 2) wind-cold invasion in patients with pre-existing asthma. In these two situations, *Guì Zhī Tāng* treats the exterior-deficiency wind-cold syndrome, and *Hou Po* (Cortex Magnoliae Officinalis) and *Ku Xing Ren* (Semen Armeniacae Amarum) are added to direct Lung qi downward and relieve dyspnea.

Sheng Jiang (Rhizoma Zingiberis Recens), *qie* (sliced) 9g

Guì Zhī Jiā Sháo Yào Tāng (Cinnamon Twig Decoction plus Peony) treats patients with *taiyang* syndrome who have been improperly treated with downward draining methods. In these situations, the downward draining methods damage Spleen qi, allowing the Liver to attack the deficient Spleen. As the exterior wind-cold condition moves into the interior, the *taiyang* syndrome is now complicated by *taiyin* syndrome. Clinically, this condition is characterized by both exterior and interior signs and

Gui Zhī Tāng (Cinnamon Twig Decoction)

symptoms: aversion to cold, fever, perspiration, abdominal fullness, distention and pain, and diarrhea.

Gui Zhi Jia Shao Yao Tang (Cinnamon Twig Decoction plus Peony) is a modification of *Gui Zhi Tang*. The ingredients and the doses of the two formulas are exactly the same, with the exception of *Bai Shao* (Radix Paeoniae Alba). The dose of *Bai Shao* is doubled in *Gui Zhi Jia Shao Yao Tang*, making it a formula for treating interior disharmony instead of exterior conditions. Today, *Gui Zhi Jia Shao Yao Tang* is used to treat abdominal pain and cramps, enteritis, and food poisoning.

Gui Zhī Má Huáng Gè Bàn Tāng

(Combined Cinnamon Twig and Ephedra Decoction)

桂枝麻黃各半湯

桂枝麻黃各半湯

Pinyin Name: *Gui Zhi Ma Huang Ge Ban Tang*

Literal Name: Combined Cinnamon Twig and Ephedra Decoction

Alternate Name: Cinnamon and Mahuang Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-jing in the Eastern Han Dynasty

<i>Gui Zhi</i> (Ramulus Cinnamomi)	4.5g
<i>Bai Shao</i> (Radix Paeoniae Alba)	3g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>qie</i> (sliced)	3g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	3g
<i>Ma Huang</i> (Herba Ephedrae)	3g
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	4 pieces
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	24 pieces [3g]

The source text instructs to cook *Ma Huang* (Herba Ephedrae) first, remove the foam from the top, and then add in the rest of the ingredients. Take the warm, strained decoction in three equally-divided doses.

Gui Zhi Ma Huang Ge Ban Tang (Combined Cinnamon Twig and Ephedra Decoction) is indicated for patients who still have *taiyang* syndrome eight to nine days after the initial onset. Clinical presentation at this time may include symptoms such as flushed face, generalized itching, alternate spells of fever and aversion to cold two to three times daily, more fever than aversion to cold, headache, absence of nausea, and normal bowel movement. Generally speaking, exterior pathogenic factors do not stay at the *taiyang* stage for as long as eight to nine days. The disease commonly progresses to either the *yangming* or *shaoyang* syndrome.

Differential diagnosis is absolutely critical to obtain effective treatment. *Yangming* syndrome is characterized by excess interior heat with constipation as a key symptom; *shaoyang* syndrome is characterized by nausea; and malaria is characterized by alternating spells of aversion to cold and fever every two to three days. In this case, normal bowel movement rules out *yangming* syndrome; absence of nausea rules out *shaoyang* syndrome; and alternating spells of fever and aversion to cold two to three times daily (instead of every two to three days) rule out malaria. Additionally, patients will still show somewhat typical *taiyang* syndrome with such symptoms and signs as fever and aversion to cold, more fever than aversion to cold, and headache. With more fever than aversion to cold, patients are likely to have flushed face; and with wind-cold residing at the exterior blocking the skin pores, patients are likely to experience generalized itching.

The treatment strategies for patients with *taiyang* syndrome lasting eight to nine days after the initial onset are to dispel exterior wind-cold and harmonize the *wei* (defensive) and *ying* (nutritive) levels. In selecting an appropriate herbal formula, neither *Ma Huang Tang* (Ephedra Decoction) nor *Gui Zhi Tang* is appropriate. *Ma Huang Tang* (Ephedra Decoction) dispels wind-cold, yet its effects are too strong for someone who has had *taiyang* syndrome for eight to nine days. Furthermore, *Ma Huang Tang* (Ephedra Decoction) does not harmonize the *wei* (defensive) and *ying* (nutritive) levels. *Gui Zhi Tang*, on the other hand, can harmonize the *wei* (defensive) and *ying* (nutritive) levels. However, it is not strong enough to dispel wind-cold. Therefore, the ideal herbal formula is a combination of both *Ma Huang Tang* (Ephedra Decoction) and *Gui Zhi Tang*.

Appropriately, the literal name of this formula is “Combined [half each of] Cinnamon Twig and Ephedra Decoction.” For additional and detailed explanation, please refer to *Ma Huang Tang* (Ephedra Decoction) and *Gui Zhi Tang* (Cinnamon Twig Decoction).

The clinical applications of this formula include common cold, influenza, bronchitis, pneumonia, eczema, and urticaria.

AUTHORS’ COMMENTS

For *Gui Zhi Tang*, extreme care must be taken in the use of *Gui Zhi* (Ramulus Cinnamomi) and *Sheng Jiang* (Rhizoma Zingiberis Recens) to induce perspiration in a deficient individual who is already sweating. The chief manifestations for *Gui Zhi Tang* include fever, headache, sweating,

Guì Zhī Tāng (Cinnamon Twig Decoction)

aversion to wind, dry heaves, nasal obstruction, absence of thirst, a superficial, moderate pulse, and a white tongue coating. The sweating that occurs in this wind-cold invasion with deficiency is the result of a weak *wei* (defensive) *qi* not being able to retain fluids inside the body. Consequently, body fluids leak out in the form of sweats.

This sweating as a result of constitutional deficiency, however, does not expel the pathogenic wind-cold that lingers at the skin level. For this reason, *Guì Zhī* (Ramulus Cinnamomi) and *Shēng Jiāng* (Rhizoma Zingiberis Recens), mild exterior-releasing herbs, are used to induce a small additional amount of sweating, enough to expel the pathogenic factors. *Dà Zāo* (Fructus Jujubae) helps harmonize the *yīng* (nutritive) and *wei* (defensive) levels, to prevent *Guì Zhī* (Ramulus Cinnamomi) and *Shēng Jiāng* (Rhizoma Zingiberis Recens) from inducing too much sweating. If only harmonizing herbs are used to address the disharmony of the *yīng* (nutritive) and *wei* (defensive) levels, the wind-cold factor would linger and further damage *wei* (defensive) *qi*.²⁴

Guì Zhī Tāng is a formula with dual moderating effects: it induces perspiration to release the exterior; and it harmonizes the *wei* (defensive) and *yīng* (nutritive) levels to stop perspiration caused by *wei* (defensive) *qi* deficiency. Ideally, mild sweating is the objective in order to dispel pathogenic wind-cold without damaging *wei* (defensive) and *yīng* (nutritive) *qi*. *Guì Zhī* (Ramulus Cinnamomi) and *Shēng Jiāng* (Rhizoma Zingiberis Recens) induce perspiration and release the exterior. *Bái Shāo* (Radix Paeoniae Alba) and *Dà Zāo* (Fructus Jujubae) harmonize the *wei* and *yīng* levels to stop perspiration and prevent over-sweating. After the pathogenic factor is dispelled and the *wei* and *yīng* levels are harmonized, the patient no longer will have sweating due to deficient *wei qi*. This is why *Guì Zhī Tāng* is referred by some as a formula that stops sweating.²⁵

Within the context of *Guì Zhī Tāng*, perspiration is both a “disease condition” and a “therapeutic outcome,” and must be differentiated and monitored carefully. Perspiration as a “disease condition” has the following characteristics: it is caused by deficiency of *wei* (defensive) *qi*; it occurs at specific regions of the body (such as around the neck or in the back only); sweating occurs with a feeling of cool or cold sensation; it is accompanied by signs and symptoms of wind-cold (e.g., fever, headache, or nasal discharge); and finally, perspiration does not alleviate the condition. On the other hand, perspiration as a “therapeutic outcome” has different characteristics: sweating occurs evenly throughout the entire body and is accompanied

by a feeling of warmth in the body; sweating occurs after the ingestion of herbs; and the patient’s overall condition improves greatly after the perspiration.²⁶

Guì Zhī Tāng can be used in deficient patients who show both wind-cold and wind-heat symptoms. These mixed symptoms may include aversion to cold, fever, aversion to wind, perspiration, a sore throat, headache, and other conflicting symptoms. When it is difficult to diagnose whether the patient has wind-cold or wind-heat, many times the condition is transitioning from wind-cold to wind-heat, and then to Lung heat. Right in the stage between wind-cold and wind-heat, mixed symptoms such as the ones described will be present and the *yīng* (nutritive) and *wei* (defensive) levels will be disrupted. *Guì Zhī Tāng* is often combined with *Yīn Qiāo Sǎn* (Honeysuckle and Forsythia Powder) in a 1:1 ratio to help expel the exterior pathogenic factors of both wind-cold and wind-heat.

In the clinic, patients may not show all the signs, or it may be difficult to match the exact symptoms. The key to selecting *Guì Zhī Tāng* is to identify the main symptoms: aversion to wind, perspiration, and a superficial, moderate pulse. Deficient patients often catch colds frequently as their *wei* (defensive) *qi* is low. They often will wear more clothing to cover up their body, since they dislike being exposed to the wind. In addition to the traditional applications, *Guì Zhī Tāng* can also be used in convalescing, pregnant, and postpartum patients with spontaneous sweating, a slight feverish sensation, or aversion to wind and cold.

Guì Zhī Tāng and *Yù Píng Fēng Sǎn* (Jade Windscreen Powder) both treat spontaneous perspiration and aversion to wind, but have completely different clinical applications.

- *Guì Zhī Tāng* is an exterior-releasing formula that treats wind-cold invasion with disharmony between the *yīng* (nutritive) and *wei* (defensive) levels, causing symptoms such as fever, headache, stuffy nose, and a superficial pulse. This formula is used for patients who currently suffer from exterior condition.
- *Yù Píng Fēng Sǎn* is an astringent formula that also treats perspiration and aversion to wind. However, these symptoms are caused by *wei* (defensive) *qi* deficiency and its inability to consolidate the exterior. Besides leakage of body fluids, other symptoms include frequent catching of common colds, pale complexion, generalized weakness, and a deficient pulse. This formula is appropriate for patients who frequently suffer from exterior condition but do not currently have one.²⁷

Guì Zhī Tāng (Cinnamon Twig Decoction)

Gui Zhi Tang and *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction) contain very similar ingredients, but have drastically different applications. *Xiao Jian Zhong Tang* is comprised of *Gui Zhi Tang* plus *Yi Tang* (Maltosum). However, because of dose differences, the main functions of the two formulas differ significantly.

- *Gui Zhi Tang* is an exterior-releasing formula. It contains *Gui Zhi* (Ramulus Cinnamomi) and *Bai Shao* (Radix Paeoniae Alba) as chief and deputy herbs to release the exterior and harmonize the *ying* (nutritive) and *wei* (defensive) levels.
- *Xiao Jian Zhong Tang* is an interior warming formula. It contains *Yi Tang* (Maltosum) as the chief herb to warm and tonify the Spleen to relieve pain. As deputy herbs, *Gui Zhi* (Ramulus Cinnamomi) warms yang qi and *Bai Shao* (Radix Paeoniae Alba) relieves pain.
- Although both formulas contain similar ingredients, *Gui Zhi Tang* primarily expels exterior wind-cold invasion, while *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction) warms and tonifies the middle *jiao* to relieve pain.

Gě Gēn Tāng (Kudzu Decoction)

葛根湯

葛根汤

Pinyin Name: *Ge Gen Tang*

Literat Name: Kudzu Decoction

Alternate Names: *Ko Ken Tang*, Pueraria Decoction, Pueraria Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Ge Gen</i> (Radix Puerariae Lobatae)	12g
<i>Ma Huang</i> (Herba Ephedrae)	9g
<i>Gui Zhi</i> (Ramulus Cinnamomi)	6g
<i>Bai Shao</i> (Radix Paeoniae Alba)	6g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>qie</i> (sliced)	9g
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	12 pieces [3 pieces]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook *Ma Huang* (Herba Ephedrae) and *Ge Gen* (Radix Puerariae Lobatae) first with 10 cups [2,000 mL] of water until 8 cups [1,400 mL] of the liquid remain. Remove the foam from the top, add in the other ingredients, and cook until the liquid is reduced to 3 cups [600 mL]. Take 1 cup [200 mL] of the strained decoction while warm to promote mild sweating.

CHINESE THERAPEUTIC ACTIONS

1. Releases the exterior and muscle layer
2. Promotes generation of body fluids

CLINICAL MANIFESTATIONS

Taiyang syndrome with wind-cold invasion: severe muscle stiffness of the neck and back, aversion to cold, with or without fever, aversion to wind, absence of perspiration, and diarrhea.

CLINICAL APPLICATIONS

Fever, common cold, influenza, infectious parotitis, upper respiratory tract infection, allergic rhinitis, chronic rhinitis, neck and shoulder stiffness and pain, periarthritis of shoulder, tendonitis or bursitis of the shoulders, soft tissues injuries, facial paralysis, Bell's palsy, meningitis, encephalitis, tension headache, scleroderma, urticaria, painful gynecomastia in liver cirrhosis, aqueous flare elevation after complicated cataract surgery, and diarrhea.

EXPLANATION

Ge Gen Tang (Kudzu Decoction) treats *taiyang* syndrome with wind-cold invasion. In comparison to the symptoms and conditions applicable to *Ma Huang Tang* (Ephedra

Decoction) and *Gui Zhi Tang* (Cinnamon Twig Decoction), the distinguishing symptom for the use of this formula is the severe stiffness and pain in the neck and back. The severe neck stiffness and pain are caused by cold constriction, and lack of body fluids which fail to nourish the muscle layer. Other signs and symptoms of *taiyang* syndrome with wind-cold invasion include fever, aversion to cold, aversion to wind, and absence of perspiration.

Ge Gen Tang is formulated by adding *Ge Gen* (Radix Puerariae Lobatae) and *Ma Huang* (Herba Ephedrae) to *Gui Zhi Tang* (Cinnamon Twig Decoction). *Ge Gen* (Radix Puerariae Lobatae), however, acts as the chief herb. It promotes generation of body fluids and relieves muscle stiffness. *Ma Huang* (Herba Ephedrae) and *Gui Zhi* (Ramulus Cinnamomi) release wind and cold from the exterior. Also, the sweet and acrid properties of *Gui Zhi* (Ramulus Cinnamomi) help to relieve body aches and pains. *Bai Shao* (Radix Paeoniae Alba), the deputy herb, consolidates the interior (yin and body fluids) of the body. Used together, *Gui Zhi* (Ramulus Cinnamomi) and *Bai Shao* (Radix Paeoniae Alba) harmonize qi at the *wei* (defensive) and *ying* (nutritive) levels. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) serves as both an auxiliary and envoy herb. As an auxiliary herb, it relieves aches and pains and promotes the production of body fluids; as an envoy herb, it harmonizes the formula. *Sheng Jiang* (Rhizoma Zingiberis Recens) helps *Gui Zhi* (Ramulus Cinnamomi) to dispel exterior wind-cold. *Da Zao* (Fructus Jujubae) tonifies deficient qi and body fluids.

Gě Gēn Tāng (Kudzu Decoction)

MODIFICATIONS

- For nausea and vomiting caused by reversed flow of Stomach qi, add *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria).
- If there are signs of fever and thirst, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Shi Gao* (Gypsum Fibrosum).
- If accompanied by severe pain of the shoulders, add *Fu Ling* (Poria), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- For abdominal pain and diarrhea with burning sensations, add *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis).
- When there is itching of the skin, add *Jiang Can* (Bombyx Batryticatus).

CAUTIONS / CONTRAINDICATIONS

Please refer to *Ma Huang Tang* (Ephedra Decoction).

PHARMACOLOGICAL EFFECTS

- Antibacterial:** According to *in vitro* studies, *Ge Gen Tang* demonstrated an inhibitory effect against *E. coli* and *Staphylococcus aureus*, but only at high concentration.¹
- Antiviral:** One study reported marked effectiveness using *Ge Gen Tang* to treat mice with early stage of influenza infection. The dose of the formula was 5.0 mg per mouse three times daily. The mechanism of this action was attributed to significant enhancement of interleukin-12 correlated with the reduction of virus yields in bronchoalveolar lavage fluid in the early phase of infection.²
- Antipyretic:** Administration of *Ge Gen Tang* effectively reduced fever in mice infected with influenza virus. The

mechanism of the antipyretic effects was attributed to the suppression of interferon-induced interleukin-1-alpha production.³

- Anti-inflammatory:** Oral administration of *Ge Gen Tang* was associated with inhibition of the inflammatory processes in both the early exudative stage and the late proliferative stage. This study stated *Ge Gen Tang* was useful in treating stomatitis, tonsillitis, cold and chronic inflammatory diseases.⁴
- Cardiovascular:** In anesthetized dogs and cats, intravenous injection of *Ge Gen Tang* at 0.25-0.5 g/kg was associated with dilation of the blood vessels and increased blood perfusion to the brain. The duration of action was approximately one hour.⁵
- Chronotropic and inotropic:** *Ge Gen Tang* has positive chronotropic and inotropic effects via direct stimulation of the beta-adrenoceptor and/or the norepinephrine released from postganglionic nerve terminals in the heart.⁶
- Immunostimulant:** Continuous administration of extract of *Ge Gen Tang* in mice was associated with a significant influence to the immune system. Increase in phagocytic activity of the immune cells was observed in mice with suppressed immune system. However, a suppression of the immune response was observed in mice with hyperactive immune system.^{7,8} In another study involving 10 subjects, use of *Ge Gen Tang* daily was associated with an increase of natural killer (NK) cells.⁹
- Hepatoprotective:** *Ge Gen* (Radix Puerariae Lobatae), the main ingredient in *Ge Gen Tang*, inhibited the elevation of alanine aminotransferase (ALT) activity at the dose of 90 mcg/mL in rats with immunological liver injury.

Gě Gēn Tāng (Kudzu Decoction)

The antihepatotoxic activity was attributed primarily to soyasaponin I and kudzuaponin, the representative saponins.¹⁰

CLINICAL STUDIES AND RESEARCH

1. **Fever:** One hundred and ten children with fever were effectively treated with modified *Ge Gen Tang*. The study reported reduction of body temperature in 66 cases (60%) after 1 dose, 43 cases (39%) after 2 doses, and 1 case (0.9%) after 3 doses. Minor modifications to the original formula were made based on the clinical manifestations of the patients.¹¹
2. **Upper respiratory tract infection:** In one study, *Ge Gen Tang* demonstrated a rate of effectiveness of approximately 80% in releasing the pathogenic factor from the exterior. The main improvements were seen in runny nose, sneezing, and aversion to cold.¹²
3. **Meningitis:** Thirteen patients with infectious meningitis were treated with *Ge Gen Tang* with complete recovery in all cases. Resolution of symptoms and signs range from 40 hours to 15 days. No complications were reported.¹³ It has also been reported that this formula is also effective in treating encephalitis, though treatment must begin within the first two days.¹⁴
4. **Neck and shoulder pain:** Seventy patients with neck and shoulder disorders were treated with a modified *Ge Gen Tang* with complete recovery in 9 cases, significant improvement in 30 cases, moderate improvement in 29 cases, and no improvement in 2 cases. *Ge Gen Tang* was modified by increasing the doses of *Ge Gen* (*Radix Puerariae Lobatae*) and *Gui Zhi* (*Ramulus Cinnamomi*).¹⁵ Another study reported a 94% rate of effectiveness using modified *Ge Gen Tang* to treat 50 patients between 40-60 years of age, with neck and shoulder pain with history of illness ranging from 5 days to 10 years. The duration of treatment ranged from 30-50 days. Of 50 patients, the study reported complete recovery in 16 cases, significant improvement in 25 cases, moderate improvement in 6 cases, and no benefit in 3 cases.¹⁶
5. **Periarthritis of shoulder:** Forty-eight patients with periarthritis of the shoulder was treated for 10-20 days with complete recovery in 34 cases, significant improvement in 8 cases, and no benefit in 6 cases. The herbal treatment contained *Ge Gen Tang* plus *Xi Xin* (*Radix et Rhizoma Asari*), *Qiang Huo* (*Rhizoma et Radix Notopterygii*), *Fang Feng* (*Radix Saposhnikovia*) and others.¹⁷
6. **Soft tissues injuries:** One study reported a 96.88% rate of effectiveness using modified *Ge Gen Tang* to treat soft tissues injuries in 32 patients (25 males and 7 females), between 10-55 years of age, and 1 hour to 1½ year history of illness. The herbal treatment consisted of *Ge Gen Tang*, with the dose of *Ge Gen* (*Radix Puerariae Lobatae*) increased to 50g. Of 32 patients, the study reported complete recovery in 19 cases, significant improvement in 12 cases, and no benefit in 1 case.¹⁸
7. **Facial paralysis:** Use of modified *Ge Gen Tang* was associated with varying degrees of improvement to complete recovery in all 216 patients with facial paralysis. The herbal treatment contained *Ge Gen Tang* plus *Bai Fu Zi* (*Rhizoma Typhonii*), *Jiang Can* (*Bombyx Batryticatus*), *Quan Xie* (*Scorpio*), and others as needed. The herbs were given in decoction daily, for 5 packs of herbs per course of treatment. The duration of treatment ranged from 5-35 packs of herbs.¹⁹ Another study reported 97.67% effectiveness in treating 86 patients with facial paralysis. The herbal treatment contained *Ge Gen Tang* plus *Qian Zheng San* (Lead to Symmetry Powder), with addition of *Fu Ling* (*Poria*) and *Cang Zhu* (*Rhizoma Atractylodis*) for presence of dampness; and addition of *Chai Hu* (*Radix Bupleuri*) and *Huang Qin* (*Radix Scutellariae*) for fever. After 3-5 packs of herbs and induction of perspiration, the herbal treatment was modified by adding *Hong Hua* (*Flos Carthami*), *Dang Gui* (*Radix Angelicae Sinensis*) and *Huang Qi* (*Radix Astragali*); and eliminating *Ma Huang* (*Herba Ephedrae*), *Gui Zhi* (*Ramulus Cinnamomi*), *Qiang Huo* (*Rhizoma et Radix Notopterygii*) and *Ge Gen* (*Radix Puerariae Lobatae*). Upon stabilization and during the recovery phase, the herbal treatment was switched to *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction) for consolidation and maintenance. Of 86 patients, the study reported complete recovery in 79 cases, improvement in 5 cases, and no benefit in 2 cases.²⁰
8. **Bell's palsy:** Seventy-eight patients with Bell's palsy were treated with *Ge Gen Tang* with marked effectiveness. The study reported a 53.8% rate of effectiveness (42 of 78 patients) within 5 doses.²¹
9. **Tension headache:** Powdered extract of *Ge Gen Tang* at 7.5 g/day, given in three equally-divided doses, was 80% effective in treating tension headache.²²
10. **Scleroderma:** Use of modified *Ge Gen Tang* in 7 patients with scleroderma was associated with near-recovery in 5 cases and improvement in 2 cases. The herbal treatment contained *Ge Gen* (*Radix Puerariae Lobatae*) 30-60g, *Gui Zhi* (*Ramulus Cinnamomi*) 10-20g, *Ma Huang* (*Herba Ephedrae*) 6-10g, *Sheng Jiang* (*Rhizoma Zingiberis Recens*) 6-10g, *Bai Shao* (*Radix Paeoniae Alba*) 15-30g, *Gan Cao* (*Radix et Rhizoma Glycyrrhizae*) 15-30g, and *Da Zao* (*Fructus Jujubae*) 15-30g. The doses of herbs were adjusted to achieve mild perspiration after administration of the decoction. The duration of treatment was 15 days per course, for 4 courses total.²³
11. **Painful gynecomastia in liver cirrhosis:** One study reported marked success using *Ge Gen Tang* to treat 4 patients with liver cirrhosis who complained of painful

Gě Gēn Tāng (Kudzu Decoction)

gynecomastia. After oral ingestion of *Ge Gen Tang*, relief of pain was reported in 3 patients in one week, and 1 patient in 4 weeks. The palpable induration diminished or disappeared, but the size of gynecomastia did not change significantly on mammography. Serum levels of estrogen, progesterone, testosterone, and other sex hormones were not affected by the herbs. The study suggested that *Ge Gen Tang* could be used for painful gynecomastia that is occasionally seen in cirrhotic patients.²⁴

12. Cataract surgery: Use of *Ge Gen Tang* and *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity) was found to help reduce aqueous flare elevation after complicated cataract surgery. The treatment protocol was to administer powdered extract of *Ge Gen Tang* (7.5 g/day) and *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity) (7.5 g/day) for 3 days before surgery, the day of surgery, and for 7 days after surgery. In comparison to the control group that did not receive any herbs, oral administration of these two formulas was effective in decreasing aqueous flare elevation after small-incision cataract surgery.²⁵ Another study also reported that *Ge Gen Tang* reduced aqueous flare elevation after surgery for complicated cataract. The treatment protocol was to administer the herbs in granules, 7.5g daily for 3 days before surgery, the day of surgery, and for 7 days after surgery. Diclofenac eyedrops were also used in all patients.²⁶

HERB-DRUG INTERACTION

Acetaminophen: One study evaluated the pharmacokinetics of acetaminophen under co-administration of *Ge Gen Tang* in human volunteers. The pharmacokinetic parameters were calculated from the blood acetaminophen concentration-time curves. No significant differences were noted between the group that received only acetaminophen and the group that received both acetaminophen and *Ge Gen Tang*.²⁷

TOXICOLOGY

Ge Gen Tang is relatively safe, even at a high dosage. No side effects or toxicities were observed following oral administration of this formula at 2.5 g/kg in mice. Furthermore, adverse reactions were not observed following oral administration of this formula to mice at a dosage equivalent to seventeen times the normal adult human dose.²⁸ In humans, administration of this formula in extract at 7.5 g/day was associated with mild nausea, vomiting, fatigue and constipation.²⁹

This formula treats chronic neck and shoulder pain. It contains herbs to activate qi and blood circulation, dispel qi and blood stagnation, and open the channels and collaterals. In addition, this formula contains many herbs to nourish Liver and Kidney yin to strengthen the soft tissues and facilitate recovery.

AUTHORS' COMMENTS

Historically, *Ge Gen Tang* has been used for *taiyang* syndrome with wind-cold, and accompanied by stiffness of the neck and shoulders. Today, it is commonly used to treat neck and shoulder stiffness and pain associated with musculoskeletal injuries, with or without *taiyang* syndrome or wind-cold condition. For best results, combine *Ge Gen Tang* with *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction) to treat neck and shoulder stiffness and pain.

Ge Gen Tang can be used at a low dose to complement the effects of *Qi Bao Mei Ran Dan* (Seven-Treasure Special Pill for Beautiful Whiskers) for hair growth. It helps guide the effects of *Qi Bao Mei Ran Dan* upward by relaxing the muscles around the neck, so that the tonic herbs can reach and nourish the scalp area directly.

Jiǔ Wèi Qiāng Huó Tāng (Nine-Herb Decoction with Notopterygium)

九味羌活湯

九味羌活湯

Pinyin Name: *Jiu Wei Qiang Huo Tang*

Literal Name: Nine-Herb Decoction with Notopterygium

Alternate Names: *Chiu Wei Qiang Huo Tang*, *Jiu Wei Chiang Huo Tang*, Nine-Flavour Chiang-hou Decoction, Notopterygium Decoction with Nine Herbs, Notopterigium Nine Herb Combination

Original Source: *Ci Shi Nan Zhi* (Hard-Won Knowledge) by Wang Hao-Gu in 1308

COMPOSITION

<i>Qiang Huo</i> (Rhizoma et Radix Notopterygii)	4.5g [6g]
<i>Fang Feng</i> (Radix Saposhnikoviae)	4.5g [6g]
<i>Cang Zhu</i> (Rhizoma Atractylodis)	4.5g [6g]
<i>Xi Xin</i> (Radix et Rhizoma Asari)	1.5g [2g]
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	3g
<i>Bai Zhi</i> (Radix Angelicae Dahuricae)	3g
<i>Di Huang</i> (Radix Rehmanniae)	3g
<i>Huang Qin</i> (Radix Scutellariae)	3g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	3g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients coarsely and cook the coarse powder in water to make a decoction. Today, this formula may be prepared as a decoction with the doses suggested in brackets. In addition, 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 3 stalks of *Cong Bai* (Bulbus Allii Fistulosi) can be added to enhance the effects of unblocking yang qi and releasing the exterior.

CHINESE THERAPEUTIC ACTIONS

1. Induces diaphoresis and dispels dampness
2. Clears interior heat

CLINICAL MANIFESTATIONS

Wind, cold and dampness at the exterior and heat in the interior: aversion to cold, fever, absence of perspiration, headache, neck stiffness, soreness and pain of the body and limbs, a bitter taste in the mouth, thirst, a white tongue coating, and a superficial pulse.

CLINICAL APPLICATIONS

Common cold, influenza, arthritis, rheumatoid arthritis, sciatica, urticaria, muscle aches and pains, migraines, and headache.

EXPLANATION

Jiu Wei Qiang Huo Tang (Nine-Herb Decoction with Notopterygium) treats wind, cold and dampness

constricting the exterior and heat forming in the interior. Aversion to cold, fever, and absence of perspiration are caused by wind-cold constricting the pores and blocking the yang qi from reaching the *wei* (defensive) level. The wind, cold and dampness at the exterior block qi and blood circulation in the channels and collaterals, which results in headache, neck stiffness, body aches, and pain. Constriction at the exterior can lead to heat formation in the interior, causing a bitter taste in the mouth and thirst. However, the disease location is mainly at the exterior, as indicated by the white tongue coating and the superficial pulse. Treatment should thus focus primarily on releasing the exterior, and secondarily on clearing interior heat.

Acrid, aromatic and warm, *Qiang Huo* (Rhizoma et Radix Notopterygii) enters the *taiyang* channel and disperses wind, cold and dampness at the exterior. It releases wind-cold, dispels wind-dampness, benefits the joints, and relieves pain. *Fang Feng* (Radix Saposhnikoviae) helps dispel wind, and *Cang Zhu* (Rhizoma Atractylodis) dries dampness. *Xi Xin* (Radix et Rhizoma Asari), *Chuan Xiong* (Rhizoma Chuanxiong), and *Bai Zhi* (Radix Angelicae Dahuricae) dispel wind-cold factor, disperse dampness, activate qi and blood flow, and relieve headache and body aches. *Di Huang* (Radix Rehmanniae) prevents the acrid and warm herbs from damaging body fluids. *Huang Qin* (Radix Scutellariae) clears interior heat. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

Jiǔ Wèi Qiāng Huó Tāng (Nine-Herb Decoction with Notopterygium)

Jiu Wei Qiang Huo Tang (Nine-Herb Decoction with Notopterygium)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Exterior wind, cold and dampness, with interior heat	<ul style="list-style-type: none"> • Fever and aversion to cold: exterior wind-cold • Soreness and pain in the body and extremities: exterior wind-dampness causing qi and blood stagnation • White tongue coating and a superficial pulse: exterior condition • Thirst and a bitter taste in the mouth: interior heat 	<ul style="list-style-type: none"> • Disperses exterior wind, cold and dampness • Clears interior heat 	<ul style="list-style-type: none"> • <i>Qiang Huo</i> (Rhizoma et Radix Notopterygii) disperses wind, cold and dampness at the exterior. • <i>Fang Feng</i> (Radix Saposhnikoviae) dispels wind and cold. • <i>Cang Zhu</i> (Rhizoma Atractylodis) dries dampness. • <i>Xi Xin</i> (Radix et Rhizoma Asari), <i>Chuan Xiong</i> (Rhizoma Chuanxiong), and <i>Bai Zhi</i> (Radix Angelicae Dahuricae) dispel wind-cold factor, disperse dampness, and activate qi and blood flow. • <i>Di Huang</i> (Radix Rehmanniae) prevents the acrid and warm herbs from damaging body fluids. • <i>Huang Qin</i> (Radix Scutellariae) clears interior heat. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

MODIFICATIONS

- If there is severe pain caused by more damp accumulation, increase the dose of *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Cang Zhu* (Rhizoma Atractylodis).
- If the pain is moderate or mild because there is less damp accumulation, remove *Cang Zhu* (Rhizoma Atractylodis) and *Xi Xin* (Radix et Rhizoma Asari).
- When there is a feeling of fullness and oppression in the chest caused by damp accumulation, remove *Di Huang* (Radix Rehmanniae); and add *Zhi Qiao* (Fructus Aurantii) and *Hou Po* (Cortex Magnoliae Officinalis).
- If there is severe headache, add *Gao Ben* (Rhizoma et Radix Ligustici).
- If there is no bitter taste in the mouth or thirst, lower the dose or remove *Di Huang* (Radix Rehmanniae) and *Huang Qin* (Radix Scutellariae).
- With clear or watery nasal discharge, add *Xin Yi San* (Magnolia Flower Powder).
- If accompanied by cough, add *Ku Xing Ren* (Semen Armeniacae Amarum) and *Zhi Sou San* (Stop Coughing Powder).
- For vomiting or thirst, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Jie Geng* (Radix Platycodonis).
- To enhance the exterior-releasing functions, add *Cong Bai* (Bulbus Allii Fistulosi) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

CAUTIONS / CONTRAINDICATIONS

- *Jiu Wei Qiang Huo Tang* contains many warm, acrid, and

drying herbs. It should be used with caution in patients with yin, qi or body fluid deficiencies.

- This formula is contraindicated in patients with wind-heat, yin-deficient heat, or generalized weakness and deficiency with heat.

PHARMACOLOGICAL EFFECTS

1. **Antipyretic:** Administration of *Jiu Wei Qiang Huo Tang* was effective in reducing body temperature in rabbits with artificially-induced fever. The antipyretic effects of the herbs started 2 hours after ingestion, and lasted for 6 hours. The reduction of body temperature was 0.7°C after 4 hours. The study also noted that the potency of the formula was similar to 0.2 mg/kg of aspirin.¹
2. **Analgesic and anti-inflammatory:** One study reported that both water and alcohol extracts of *Jiu Wei Qiang Huo Tang* had marked analgesic and anti-inflammatory effects in mice.²

CLINICAL STUDIES AND RESEARCH

1. **Sciatica:** Modified *Jiu Wei Qiang Huo Tang* was used to treat 38 patients with sciatica with an overall effectiveness rate of 94.7%.³
2. **Headache:** Administration of modified *Jiu Wei Qiang Huo Tang* was associated with up to 92.86% effectiveness in treating headache characterized by wind-dampness. Out of 28 patients, the study reported complete recovery in 12 cases, improvement in 14 cases, and no effect in 2 cases. The herbal formula included *Jiu Wei Qiang Huo Tang* plus

Jiǔ Wèi Qiāng Huó Tāng (Nine-Herb Decoction with Notopterygium)

Ge Gen (Radix Puerariae Lobatae) and *Dang Gui* (Radix Angelicae Sinensis) as the base formula. Modifications included the addition of *Tian Ma* (Rhizoma Gastrodiae), *Gou Teng* (Ramulus Uncariae cum Uncis) and *Ju Hua* (Flos Chrysanthemi) for severe dizziness; *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for generalized weakness and deficiency; *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami) and *Quan Xie* (Scorpio) for chronic headache; *Chai Hu* (Radix Bupleuri) and *Long Dan* (Radix et Rhizoma Gentianae) for migraine headache; *Man Jing Zi* (Fructus Viticis) and *Gui Zhi* (Ramulus Cinnamomi) for occipital headache with neck stiffness and pain; and *Gao Ben* (Rhizoma et Radix Ligustici) for vertex headache.⁴

3. **Acute urticaria:** In one study, 144 of 152 patients with acute urticaria were treated successfully using modified *Jiu Wei Qiang Huo Tang*. The treatment protocol was to administer 3-10 packs of the herbs in decoction. The formula was modified by adding *Lu Dou* (Semen Phaseoli Radiati) and a large dose of *Gan Cao* (Radix et Rhizoma Glycyrrhizae) for urticaria caused by drug allergy; *Bing Lang* (Semen Arecae) and *Wu Mei* (Fructus Mume) for parasites; *Chan Tui* (Periostracum Cicadae), *Fu Ping* (Herba Spirodelae) and *Di Fu Zi* (Fructus Kochiae) for recurrent outbreaks; and elimination of *Xi Xin* (Radix et Rhizoma Asari) for the presence of wind-heat.⁵

<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	30g
<i>Di Huang</i> (Radix Rehmanniae)	30g

The source text specifies to coarsely grind the ingredients and cook 15g of the powder with 2 large bowls of water until 1.5 bowls of liquid remain. Remove and discard the herb residue. Take one large bowl of the warm, strained decoction. Patients may take an additional three to four doses until the condition is resolved. If there are any other remaining symptoms, use corresponding treatment as described in the *Shang Han Lun* (Discussion of Cold-Induced Disorders).

Da Qiang Huo Tang (Major Notopterygium Decoction) treats exterior wind, cold and dampness accompanied by interior heat. This formula releases wind-cold from the exterior, dispels dampness, and clears heat. Clinically, patients may show such symptoms as headache, fever, aversion to cold, a dry mouth, a bitter taste in the mouth, thirst, and irritability.

Qiang Huo (Rhizoma et Radix Notopterygii) releases wind-cold from the *taiyang* channel, while *Du Huo* (Radix Angelicae Pubescentis) releases wind-cold from the *shaoyin* channel. *Fang Feng* (Radix Saposhnikoviae), *Chuan Xiong* (Rhizoma Chuanxiong), and *Xi Xin* (Radix et Rhizoma Asari) release the exterior and relieve headache. *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis) clear interior heat. *Zhi Mu* (Rhizoma Anemarrhenae) and *Di Huang* (Radix Rehmanniae) promote the generation of yin and body fluids and relieve thirst. *Fang Ji* (Radix Stephaniae Tetrandrae) regulates water circulation and dispels dampness. *Cang Zhu* (Rhizoma Atractylodis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) dry up dampness. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonifies qi and harmonizes the formula.

Jiu Wei Qiang Huo Tang and *Da Qiang Huo Tang* (Major Notopterygium Decoction) have similar functions to release exterior wind, cold and dampness, and clear interior heat.

- *Jiu Wei Qiang Huo Tang* focuses on releasing wind, cold and dampness from the exterior.
- *Da Qiang Huo Tang* emphasizes clearing heat from the interior.

AUTHORS' COMMENTS

Jiu Wei Qiang Huo Tang is a formula that can be used in all four seasons to treat conditions characterized by wind, cold, and damp factors at the exterior, with heat in the interior. The main diagnostic symptoms include fever, aversion to cold, headache, absence of sweating, muscle aches and pains, a bitter taste in the mouth, and slight thirst.

Jiǔ Wèi Qiāng Huó Tāng (Nine-Herb Decoction with Notopterygium)

Jiu Wei Qiang Huo Tang and *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness) both contain *Qiang Huo* (Rhizoma et Radix Notopterygii) as the main ingredient, and both treat wind-dampness at the exterior. Their differences are as follows:

- *Jiu Wei Qiang Huo Tang* dispels wind, cold, and damp factors from the exterior, and clears heat from the interior. It mainly treats individuals who have both exterior and interior conditions, with such symptoms as fever, aversion to cold, mild aches and pains, a bitter taste in the mouth, and slight thirst.

- *Qiang Huo Sheng Shi Tang* strongly dispels wind-dampness. It primarily treats heaviness, immobility, and pain in the head and upper body.

Xiāng Sū Sǎn (Cyperus and Perilla Leaf Powder)

香蘇散
香苏散

Pinyin Name: *Xiang Su San*

Literal Name: Cyperus and Perilla Leaf Powder

Alternate Names: *Hsiang Su San*, Cyperus and Perilla Powder, Cyperus and Perilla Formula

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Zi Su Ye</i> (Folium Perillae)	120g [6-9g]
<i>Xiang Fu</i> (Rhizoma Cyperi), <i>chao</i> (dry-fried)	120g [6-9g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	60g [3-6g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	30g [3-6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients coarsely and cook 9g with one large bowl of water until 70% of the liquid remains. Take the warm, strained decoction in three equally-divided doses any time during the day. This formula may also be prepared as a fine powder form and taken 6g per dose with a pinch of salt. Today, this formula may be prepared as a decoction with the doses suggested in brackets. A small amount of *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Cong Bai* (Bulbus Allii Fistulosi) may be added to enhance the exterior-releasing effect.¹

CHINESE THERAPEUTIC ACTIONS

1. Regulates qi
2. Releases the exterior

CLINICAL MANIFESTATIONS

Wind-cold factor at the exterior with qi stagnation in the interior: aversion to cold, fever, headache, absence

of perspiration, fullness and distention of the chest and epigastrium, lack of appetite, a thin, white tongue coating, and a superficial pulse.

CLINICAL APPLICATIONS

Common cold, stomach influenza, acute gastroenteritis, chronic gastritis, and globus pharyngeus.

EXPLANATION

Xiang Su San (Cyperus and Perilla Leaf Powder) treats wind-cold condition with qi stagnation in the interior. Wind-cold causes symptoms such as aversion to cold, fever, headache, and absence of perspiration. Qi stagnation in this syndrome refers to qi stagnation in the middle *jiao*, which may produce fullness and rigidity of the chest and epigastrium, and lack of appetite. The thin, white tongue coating and the superficial pulse suggest that the disease is primarily at the exterior.

Xiāng Sū Sǎn (Cyperus and Perilla Leaf Powder)

Xiang Su San (Cyperus and Perilla Leaf Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Exterior wind-cold with interior qi stagnation	<ul style="list-style-type: none"> • Fever and aversion to cold: exterior wind-cold • Superficial pulse: exterior condition • Fullness and distention of the chest and epigastrium: qi stagnation 	<ul style="list-style-type: none"> • Releases exterior wind-cold • Regulates interior qi circulation 	<ul style="list-style-type: none"> • <i>Zi Su Ye</i> (Folium Perillae) dispels exterior wind-cold and relieves chest congestion. • <i>Xiang Fu</i> (Rhizoma Cyperi) activates qi circulation and relieves qi stagnation. • <i>Chen Pi</i> (Pericarpium Citri Reticulatae) regulates qi circulation and harmonizes the middle <i>jiao</i>. • <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) strengthens the middle <i>jiao</i> and harmonizes the herbs.

The chief herbs of this formula are *Xiang Fu* (Rhizoma Cyperi) and *Zi Su Ye* (Folium Perillae). *Xiang Fu* (Rhizoma Cyperi) activates qi circulation and relieves qi stagnation. *Zi Su Ye* (Folium Perillae), acrid, warm, and aromatic, dispels exterior wind-cold and relieves chest congestion. It is often used to treat digestive dysfunctions such as stomach flu, by harmonizing the middle *jiao*. *Chen Pi* (Pericarpium Citri Reticulatae) helps *Xiang Fu* (Rhizoma Cyperi) regulate the qi flow and harmonize the middle *jiao*. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs in the formula and strengthens the middle *jiao*.

MODIFICATIONS

- For cough that is continuous, add *Ban Xia* (Rhizoma Pinelliae), *Ku Xing Ren* (Semen Armeniacae Amarum), and *Sang Bai Pi* (Cortex Mori).
- With coughing and dyspnea, add *Jie Geng* (Radix Platycodonis) and *Qian Hu* (Radix Peucedani).
- If there is severe headache, add *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Cong Bai* (Bulbus Allii Fistulosi).
- If there is severe headache, body aches, and neck stiffness, add *Jing Jie* (Herba Schizonepetae), *Qin Jiao* (Radix Gentianae Macrophyllae), *Fang Feng* (Radix Saposhnikoviae), *Man Jing Zi* (Fructus Viticis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- With stuffy nose and clear nasal discharge, add *Sheng Jiang* (Rhizoma Zingiberis Recens), *Dan Dou Chi* (Semen Sojae Praeparatum), and *Cong Bai* (Bulbus Allii Fistulosi).
- With stuffy nose and dizziness, add *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Jing Jie* (Herba Schizonepetae).

- For poor appetite, add *Shan Zha* (Fructus Crataegi) and *Mai Ya* (Fructus Hordei Germinatus).
- For indigestion, add *Sha Ren* (Fructus Amomi) and *Qing Pi* (Pericarpium Citri Reticulatae Viride).
- If there is food stagnation, add *Shen Qu* (Massa Fermentata), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Gu Ya* (Fructus Setariae Germinatus) and *Mai Ya* (Fructus Hordei Germinatus).
- When there is abdominal pain, add *Mu Xiang* (Radix Aucklandiae).
- If there is more fullness and distention of the chest and epigastrium as a result of severe qi stagnation, add *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus).
- If there is diarrhea and dysentery, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria).

CLINICAL STUDIES AND RESEARCH

1. **Chronic gastritis:** One hundred and twenty-two patients with chronic gastritis were treated with modified *Xiang Su San*, with complete recovery in 98 cases, improvement in 19 cases, and no benefit in 5 cases. The modifications included addition of *Bai Shao* (Radix Paeoniae Alba), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), and others when deemed necessary.²
2. **Globus pharyngeus:** Administration of *Xiang Su San* was effective in treating globus pharyngeus, an abnormal throat sensation without any pathological cause. Of 23 patients treated at a dose of 7.5 g/day for at least 14 days, symptoms disappeared in 18 cases and improved in 3 cases (a 91.3% rate of effectiveness).³

<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	3.6g
<i>Xiang Fu</i> (Rhizoma Cyperi)	3.6g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	2.1g
<i>Jing Jie</i> (Herba Schizonepetae)	3g
<i>Qin Jiao</i> (Radix Gentianae Macrophyllae)	3g
<i>Fang Feng</i> (Radix Saposhnikoviae)	3g
<i>Man Jing Zi</i> (Fructus Viticis)	3g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	1.5g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	3 slices

The source text instructs to coarsely grind the ingredients and prepare as a decoction. Take the warm, strained decoction and cover the body with blankets to promote mild sweating.

Jia Wei Xiang Su San (Augmented Cyperus and Perilla Leaf Powder) releases the exterior and induces diaphoresis. Clinical manifestations include headache, neck stiffness, stuffy or runny nose, body aches, fever, aversion to cold, aversion to wind, absence of perspiration, a thin, white tongue coating, and a superficial pulse.

Clinically, this formula can treat the common cold in all seasons in the elderly and children, or in individuals with weakened immunity. The cold in this case is not very severe, and strong exterior-releasing herbs such as *Ma Huang* (Herba Ephedrae) and *Gui Zhi* (Ramulus Cinnamomi) are not appropriate. Instead, *Zi Su Ye* (Folium Perillae) and *Jing Jie* (Herba Schizonepetae) serve as the chief herbs to release the exterior and induce mild diaphoresis. Their potency is only moderate, however, so they do not carry the risk of damaging qi and body fluids.

Xiāng Sū Cōng Chí Tāng (Cyperus, Perilla Leaf, Scallion, and Prepared Soybean Decoction)

香蘇蔥豉湯

香苏葱豉汤

Pinyin Name: *Xiang Su Cong Chi Tang*

Literal Name: Cyperus, Perilla Leaf, Scallion, and Prepared Soybean Decoction

Original Source: *Tong Su Shang Han Lun* (Plain Version of Discussion of Cold-Induced Disorders) by Yu Gen-Chu in the Qing Dynasty

<i>Xiang Fu</i> (Rhizoma Cyperi), <i>zhi</i> (prepared)	4.5-6g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	4.5-6g
<i>Cong Bai</i> (Bulbus Allii Fistulosi), fresh	2-3 pieces
<i>Zi Su Ye</i> (Folium Perillae)	4.5-9g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	1.8-2.4g
<i>Dan Dou Chi</i> (Semen Sojae Praeparatum)	9-12g

Xiang Su Cong Chi Tang (Cyperus, Perilla Leaf, Scallion, and Prepared Soybean Decoction) mainly treats wind-cold. This formula induces diaphoresis, releases the exterior, and regulates the middle *jiao*. *Xiang Fu* (Rhizoma Cyperi), *Zi Su Ye* (Folium Perillae), and *Chen Pi* (Pericarpium Citri Reticulatae) regulate the middle *jiao* to enhance the functioning of the Spleen and Stomach, and thereby relieve nausea, bloating, and distention. *Cong Bai* (Bulbus Allii Fistulosi) and *Dan Dou Chi* (Semen Sojae Praeparatum) are very mild exterior-releasing herbs. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the formula and also assists the first three herbs in treating nausea and vomiting.

Xiang Su Cong Chi Tang (Cyperus, Perilla Leaf, Scallion, and Prepared Soybean Decoction) treats wind-cold condition in all four seasons. It has a mild to moderate potency, and may be used by women during menstruation or pregnancy. However, because of its mild to moderate potency, it is insufficient for treating severe cases of wind-cold, since such conditions require modifications of herbs and doses, or the selection of another formula altogether.

AUTHORS' COMMENTS

The original text prescribes *Xiang Su San* for the treatment of both febrile disorders and cold-induced disorders in all four seasons. Today, it is generally used in mild cases of common cold, influenza, stomach flu, and other gastrointestinal disorders.

COMPOSITION

<i>Zi Su Ye</i> (Folium Perillae)	[3-6g]
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum), <i>chao</i> (dry-fried)	[3-6g]
<i>Mai Dong</i> (Radix Ophiopogonis)	[3-6g]
<i>Jie Geng</i> (Radix Platycodonis)	[3-6g]
<i>Ju Hong</i> (Exocarpium Citri Reticulatae)	[1-3g]
<i>Qian Hu</i> (Radix Peucedani)	[3-6g]
<i>Zhi Qiao</i> (Fructus Citri Aurantii), <i>chao</i> (dry-fried) with bran	[3-6g]
<i>Zhe Bei Mu</i> (Bulbus Fritillariae Thunbergii)	[3-6g]
<i>Huang Qin</i> (Radix Scutellariae)	[3-6g]
<i>Sang Bai Pi</i> (Cortex Mori), <i>chao</i> (dry-fried)	[3-6g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	[1-3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to decoct the ingredients with *Sheng Jiang* (Rhizoma Zingiberis Recens). Note: The doses of herbs are unavailable from the source text. Suggested doses are listed above in brackets. Actual doses vary, depending on the condition and age of the pediatric patients.

CHINESE THERAPEUTIC ACTIONS

1. Dispels wind-cold
2. Ventilates the Lung and dissolves phlegm

CLINICAL MANIFESTATIONS

Wind-cold at the exterior in children: headache, fever, aversion to cold, nausea, vomiting, drooling, sticky nasal discharge, sneezing, and cough.

CLINICAL APPLICATIONS

Common cold, influenza, and upper respiratory tract infection.

EXPLANATION

Xing Su Yin (Apricot Kernel and Perilla Leaf Decoction) is specifically designed to treat children who have wind-cold attacking the exterior. If wind travels to the upper parts of the body, patients may have headache. If cold blocks the normal flow of qi, patients may experience aversion to cold, cough, nasal obstruction, and sneezing.

Zi Su Ye (Folium Perillae) warms the exterior and dispels wind-cold. *Ku Xing Ren* (Semen Armeniacae Amarum) redirects the reversed flow of Lung qi and relieves cough. *Mai Dong* (Radix Ophiopogonis) nourishes yin and fluids of the Lung and Stomach. *Jie Geng* (Radix Platycodonis), *Ju Hong* (Exocarpium Citri Reticulatae), and *Qian Hu* (Radix Peucedani) ventilate Lung qi and relieve cough. *Zhi Qiao* (Fructus Aurantii), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), and *Qian Hu* (Radix Peucedani) dissolve phlegm and eliminate stagnation. *Huang Qin* (Radix Scutellariae) and *Sang Bai Pi* (Cortex Mori) clear heat from the Lung, and prevent the wind-cold condition from turning into Lung heat. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) harmonize the formula and relieve nausea and vomiting.

Diagnosis	Signs and Symptoms	Treatment	Herbs
Wind-cold at the exterior in children	<ul style="list-style-type: none"> Headache, fever, aversion to cold, sticky nasal discharge, and sneezing: exterior wind-cold Nausea and vomiting: wind-cold affecting Stomach qi flow Coughing: wind-cold affecting Lung qi flow 	<ul style="list-style-type: none"> Dispels wind-cold Ventilates the Lung and dissolves phlegm 	<ul style="list-style-type: none"> <i>Zi Su Ye</i> (Folium Perillae) warms the exterior and dispels wind-cold. <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) corrects the reversed flow of Lung qi and relieves cough. <i>Mai Dong</i> (Radix Ophiopogonis) nourishes yin and fluids of the Lung and Stomach. <i>Jie Geng</i> (Radix Platycodonis), <i>Ju Hong</i> (Exocarpium Citri Reticulatae), and <i>Qian Hu</i> (Radix Peucedani) ventilate Lung qi and relieve cough. <i>Zhi Qiao</i> (Fructus Aurantii), <i>Zhe Bei Mu</i> (Bulbus Fritillariae Thunbergii), and <i>Qian Hu</i> (Radix Peucedani) dissolve phlegm and eliminate stagnation. <i>Huang Qin</i> (Radix Scutellariae) and <i>Sang Bai Pi</i> (Cortex Mori) clear heat from the Lung, and prevents the wind-cold condition from turning into Lung heat. <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) and <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) harmonize the formula and relieve nausea and vomiting.

MODIFICATIONS

- For exterior conditions caused by more wind-cold, add *Fang Feng* (Radix Saposhnikoviae) and *Jing Jie* (Herba Schizonepetae).
- When there is cough and dyspnea, add *Zi Su Zi* (Fructus Perillae) and *Ting Li Zi* (Semen Descurainiae seu Lepidii).
- For cough caused by wind-cold, add *Ding Chuan Tang* (Arrest Wheezing Decoction).
- For cough caused by phlegm, add *Er Chen Tang* (Two-Cured Decoction).

AUTHORS' COMMENTS

Xing Su Yin is also known as *Er Ke Xing Su Yin* (Pediatric Apricot Kernel and Perilla Leaf Decoction). It is a gentle formula that safely and effectively treats exterior wind-cold condition in children.

Shí Shén Tāng (Ten-Immortal Decoction)

十神湯

十神汤

Pinyin Name: *Shi Shen Tang*

Literal Name: Ten-Immortal Decoction

Alternate Names: *Shih Shen Tang*, Ten Spirits Decoction, Mahuang and Cimicifuga Combination

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Ma Huang</i> (Herba Ephedrae)	120g
<i>Ge Gen</i> (Radix Puerariae Lobatae)	420g
<i>Bai Zhi</i> (Radix Angelicae Dahuricae)	120g
<i>Zi Su Ye</i> (Folium Perillae), remove any thick twigs	120g
<i>Sheng Ma</i> (Rhizoma Cimicifugae)	120g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	120g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	120g
<i>Xiang Fu</i> (Rhizoma Cyperi)	120g
<i>Chi Shao</i> (Radix Paeoniae Rubra)	120g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	120g

DOSAGE / PREPARATION / ADMINISTRATION

The source text advises to grind the ingredients into a fine powder. Cook 9g of the powder with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 1.5 bowls of water until the liquid is reduced to 70%. Take the warm, strained decoction any time during the day.

CHINESE THERAPEUTIC ACTIONS

Releases wind-cold from the exterior

CLINICAL MANIFESTATIONS

Exterior wind-cold: headache, aversion to cold, fever, chest congestion, hypochondriac distention, absence of perspiration, cough, dyspnea, and nasal obstruction.

CLINICAL APPLICATIONS

Common cold and influenza.

EXPLANATION

Shi Shen Tang (Ten-Immortal Decoction) treats exterior wind-cold. While most symptoms and signs are classic indications of exterior wind-cold, some patients may also complain of chest congestion and hypochondriac distention.

Many herbs in this formula specifically release exterior wind-cold, such as *Ma Huang* (Herba Ephedrae), *Ge Gen* (Radix Puerariae Lobatae), *Bai Zhi* (Radix Angelicae Dahuricae), *Zi Su Ye* (Folium Perillae), *Sheng Ma* (Rhizoma Cimicifugae), and *Sheng Jiang* (Rhizoma Zingiberis Recens). *Chuan Xiong* (Rhizoma Chuanxiong) helps *Bai Zhi* (Radix Angelicae Dahuricae) relieve headache. *Chen Pi* (Pericarpium Citri Reticulatae) and *Xiang Fu* (Rhizoma Cyperi) activate qi circulation to relieve chest congestion and hypochondriac fullness. *Chi Shao* (Radix Paeoniae Rubra) preserves yin and prevents the excessive loss of body fluids that can result from the actions of the exterior-releasing herbs. Lastly, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

Shí Shén Tāng (Ten-Immortal Decoction)

Shi Shen Tang (Ten-Immortal Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Exterior wind-cold	<ul style="list-style-type: none"> • Headache, aversion to cold, and fever: exterior wind-cold • Chest congestion and hypochondriac distention: wind-cold causing constriction • Absence of perspiration: exterior excess • Cough, dyspnea, and nasal obstruction: wind-cold obstructing qi flow 	<ul style="list-style-type: none"> • Releases wind-cold from the exterior 	<ul style="list-style-type: none"> • <i>Ma Huang</i> (Herba Ephedrae), <i>Ge Gen</i> (Radix Puerariae Lobatae), <i>Bai Zhi</i> (Radix Angelicae Dahuricae), <i>Zi Su Ye</i> (Folium Perillae), <i>Sheng Ma</i> (Rhizoma Cimicifugae), and <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) release exterior wind-cold. • <i>Chuan Xiong</i> (Rhizoma Chuanxiong) activates qi and blood circulation to relieve headache. • <i>Chen Pi</i> (Pericarpium Citri Reticulatae) and <i>Xiang Fu</i> (Rhizoma Cyperi) activate qi circulation to relieve chest congestion and hypochondriac fullness. • <i>Chi Shao</i> (Radix Paeoniae Rubra) preserves yin and prevents the excessive loss of body fluids. • <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

MODIFICATIONS

- With fever and headache, add *Cong Bai* (Bulbus Allii Fistulosi).
- With chest fullness, add *Zhi Qiao* (Fructus Aurantii).
- With epigastric fullness and distention, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Ban Xia* (Rhizoma Pinelliae).
- With poor appetite, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Sha Ren* (Fructus Amomi) and *Mu Xiang* (Radix Aucklandiae).
- With cough and increased respiration, add *Sang Bai Pi* (Cortex Mori), *Jie Geng* (Radix Platycodonis) and *Ban Xia* (Rhizoma Pinelliae).
- With constipation, add *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas).
- With nausea and vomiting, add *Huo Xiang* (Herba Agastaches) and *Ban Xia* (Rhizoma Pinelliae).

- With diarrhea, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria).
- With dysentery, add *Zhi Qiao* (Fructus Aurantii) and *Huang Lian* (Rhizoma Coptidis).
- With abdominal pain, add *Bai Shao* (Radix Paeoniae Alba).

AUTHORS' COMMENTS

The source text uses *Chi Shao* (Radix Paeoniae Rubra) as one of the ingredients in this formula. Today, however, *Chi Shao* (Radix Paeoniae Rubra) is generally replaced with *Bai Shao* (Radix Paeoniae Alba), because the latter more effectively preserves yin and prevents the excessive loss of body fluids that can occur from the actions of the exterior-releasing herbs.

Xiǎo Qīng Lóng Tāng (Minor Bluegreen Dragon Decoction)

小青龍湯

小青龙汤

Pinyin Name: *Xiao Qing Long Tang*

Literal Name: Minor Bluegreen Dragon Decoction

Alternate Names: *Hsiao Ching Lung Tang, Xiao Ching Long Tang*, Minor Blue Dragon Decoction, Minor Blue Dragon Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Ma Huang</i> (Herba Ephedrae)	9g
<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g [6-9g]
<i>Xi Xin</i> (Radix et Rhizoma Asari)	9g [3-6g]
<i>Gan Jiang</i> (Rhizoma Zingiberis)	9g [3-6g]
<i>Ban Xia</i> (Rhizoma Pinelliae), xi (washed)	0.5 cup [9g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	9g
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	0.5 cup [3-6g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	9g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to cook *Ma Huang* (Herba Ephedrae) with 10 cups [2,000 mL] of water until the liquid is reduced to 8 cups [1,600 mL]. Remove the foam from the top, add the other ingredients, and cook until the liquid is reduced to 3 cups [600 mL]. Take 1 cup [200 mL] of the warm, strained decoction. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Releases the exterior and dispels *yin* (invisible phlegm)
2. Relieves wheezing and coughing

CLINICAL MANIFESTATIONS

Wind-cold at the exterior with water accumulation in the interior: aversion to cold and fever, absence of perspiration, coughing and wheezing with profuse, clear, watery sputum, a stifling sensation in the chest, heaviness and pain of the body, edema of the face and limbs, a white, slippery tongue coating, and a superficial pulse.

CLINICAL APPLICATIONS

Pulmonary disorders, common cold, influenza, bronchitis, bronchitis in children, pneumonia, pulmonary emphysema, bronchiectasis, pulmonary tuberculosis, wheezing and dyspnea, asthma, cough, whooping cough, congestive heart failure, rhinitis or sinusitis, and acute nephritis.

EXPLANATION

Xiao Qing Long Tang (Minor Bluegreen Dragon Decoction) treats conditions characterized by wind-cold invasion at the exterior and water accumulation in the interior. Individuals who have pre-existing water accumulation in the interior generally have Spleen and Lung qi deficiencies. After being attacked by wind-cold at the exterior, patients may experience dysfunctioning of the Lung and Spleen, causing more water retention, especially in the epigastrium and the chest. Water retention in the chest causes a stifling sensation in the chest and the inability to breathe properly when lying in a horizontal position.

Aversion to cold, fever, and absence of perspiration are caused by the wind-cold factor at the exterior. Cough, dyspnea and wheezing are the result of reversed flow of Lung qi, which is secondary to wind-cold attack and phlegm accumulation. Profuse, watery sputum, heaviness and pain of the body, swollen face and extremities, and a white, slippery tongue coating all suggest water accumulation and the failure of the Lung to metabolize water. The superficial pulse indicates that the disease is located at the exterior.

In this syndrome, the exterior and the interior must be treated at the same time. If only exterior herbs are used, the interior water accumulation remains. If only water-regulating herbs are used to address the water accumulation, the exterior condition remains untreated, and there may be further complications as the pathogenic factors move inward.

Xiǎo Qīng Lóng Tāng (Minor Bluegreen Dragon Decoction)

Xiao Qing Long Tang (Minor Bluegreen Dragon Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Exterior wind-cold, interior water accumulation	<ul style="list-style-type: none"> • Fever, aversion to cold and absence of perspiration: exterior-excess wind-cold condition • Profuse, clear, watery sputum and edema of the face and limbs: water accumulation • Coughing, dyspnea and wheezing: reversed flow of Lung qi • Heaviness and pain of the body: damp and phlegm accumulation 	<ul style="list-style-type: none"> • Relieves exterior wind-cold • Disperses water accumulation and phlegm • Relieves wheezing and coughing 	<ul style="list-style-type: none"> • <i>Ma Huang</i> (Herba Ephedrae) and <i>Gui Zhi</i> (Ramulus Cinnamomi) dispel the exterior wind-cold. • <i>Xi Xin</i> (Radix et Rhizoma Asari) releases wind-cold from the exterior and warms the Lung in the interior. • <i>Gan Jiang</i> (Rhizoma Zingiberis) warms the middle <i>jiao</i> to dispel cold. • <i>Ban Xia</i> (Rhizoma Pinelliae) eliminates phlegm, directs Stomach qi downward, and harmonizes the middle <i>jiao</i>. • <i>Bai Shao</i> (Radix Paeoniae Alba) and <i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis) prevent the acrid and warm herbs from damaging qi, yin, and body fluids. • <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonifies qi and harmonizes the herbs.

Ma Huang (Herba Ephedrae) and *Gui Zhi* (Ramulus Cinnamomi), the chief herbs, dispel exterior wind-cold factor through diaphoresis. *Ma Huang* (Herba Ephedrae) also smoothes Lung qi flow to relieve cough, dyspnea, and wheezing. *Gui Zhi* (Ramulus Cinnamomi) warms the yang and eliminates cold. *Xi Xin* (Radix et Rhizoma Asari), acrid and hot, enters the *shaoyin* channel and warms the Lung to resolve phlegm accumulation. It also assists *Ma Huang* (Herba Ephedrae) and *Gui Zhi* (Ramulus Cinnamomi) in releasing the exterior. *Gan Jiang* (Rhizoma Zingiberis) enters the *yangming* channel to warm the yang of the middle *jiao* to dispel cold. *Ban Xia* (Rhizoma Pinelliae) eliminates phlegm, directs Stomach qi downward, and harmonizes the middle *jiao*.

If only arid and warm herbs are used in this syndrome, however, the Lung qi may become dispersed or lost, and yin may be injured. For this reason, *Wu Wei Zi* (Fructus Schisandrae Chinensis) is added to contain and prevent the leakage of Lung qi. *Bai Shao* (Radix Paeoniae Alba) nourishes yin, tonifies the blood, and prevents the acrid herbs from drying up body fluids. Both *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Bai Shao* (Radix Paeoniae Alba) are used only in small doses, as large doses might interfere with the exterior-releasing effect. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) supplements qi and harmonizes the exterior-releasing and astringent herbs in this formula.

MODIFICATIONS

- With cough and dyspnea, add *Ku Xing Ren* (Semen Armeniacae Amarum) and *Hou Po* (Cortex Magnoliae Officinalis).
- With fever and sore throat, add *Jie Geng* (Radix Platycodonis) and *Shi Gao* (Gypsum Fibrosum).
- With irritability arising from heat, add *Shi Gao* (Gypsum Fibrosum).
- With thirst as a result of Lung heat, add *Shi Gao* (Gypsum Fibrosum) and *Huang Qin* (Radix Scutellariae).
- With absence of sweating and severe aversion to cold, increase the dose of *Ma Huang* (Herba Ephedrae) and *Gui Zhi* (Ramulus Cinnamomi).
- With sweating and severe aversion to cold, increase the dose of *Gui Zhi* (Ramulus Cinnamomi) and *Bai Shao* (Radix Paeoniae Alba), and add *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae).
- If the exterior symptoms are not severe, remove *Gui Zhi* (Ramulus Cinnamomi) and use honey-fried *Ma Huang* (Herba Ephedrae) instead.

CAUTIONS / CONTRAINDICATIONS

- *Xiao Qing Long Tang* should not be taken for a prolonged period of time. It should be discontinued when the desired effects have been achieved.
- This formula is contraindicated in the following situations: heat condition with a sore throat or a rapid pulse; wind-heat or beginning stages of *wen bing* (warm disease); yin deficiency with dry cough or thirst; phlegm-heat

Xiǎo Qīng Lóng Tāng (Minor Bluegreen Dragon Decoction)

conditions with thick, yellow sputum; cough with streaks of blood in the sputum; and cough with thick, yellow sputum, thirst, a red tongue with yellow tongue coating, and a rapid pulse.

- Because this is a relatively strong formula, caution must be used when prescribing this formula. *Xi Xin* (Radix et Rhizoma Asari) must be prescribed carefully because it is potentially toxic at a high dose. *Wu Wei Zi* (Fructus Schisandrae Chinensis) must not be used at a large dose to avoid retaining the pathogenic factors inside the body with its astringent effect.
- Use of *Xiao Qing Long Tang* has been associated with only a few side effects, such as dry mouth, sedation and drowsiness, due mainly to the blockade of histamine H1 and muscarinic receptors in the salivary glands and the brain.^{1,2}
- Use of *Xiao Qing Long Tang* has been associated with rare cases of gastrointestinal discomfort (nausea, vomiting, and diarrhea) and skin itching. These reactions were self-limiting and resolved upon the discontinuation of the formula.³

PHARMACOLOGICAL EFFECTS

1. **Antiasthmatic:** *Xiao Qing Long Tang* has marked antiasthmatic effects, and has been used for centuries to treat bronchial asthma. There are two proposed mechanisms of the antiasthmatic effects. One, it stimulates the beta2-adrenoceptors to produce bronchorelaxation. Two, it inhibits the infiltration of eosinophils into the airway. Thus, *Xiao Qing Long Tang* is useful for both prevention and treatment of asthma.^{4,5}
2. **Antiallergic:** One study reported that *Xiao Qing Long Tang* has antiallergic effects and may be useful and reasonable for controlling allergic diseases including bronchial asthma, allergic asthma and allergic rhinitis.⁶ One demonstrated mechanism of the antiallergic effects was the inhibitory activity on histamine release and suppression of Th2 differentiation at the stage of antigen-presenting cells (APCs)-CD4(+)T cell interaction.⁷ Another demonstrated mechanism is the inhibition of mast cell activities.⁸ Lastly, it has been shown to control the allergen-induced inflammatory process by substantially inhibiting the allergen-induced synthesis of TNF-alpha.⁹
3. **Antiviral:** One study found *Xiao Qing Long Tang* to be useful for both prophylaxis and treatment of influenza virus infection in patients with allergic pulmonary inflammation, such as bronchial asthma. The mechanism of this action was attributed to the effects of the formula to augment the antiviral IgA antibody titer in the nasal and broncho-alveolar cavities, activate T-cell in Peyer's patch lymphocyte, and stimulate the production of anti-influenza virus IgA antibody in nasal lymphocyte.¹⁰

Xiao Qing Long Tang, however, has not shown direct action against the virus.¹¹ Clinically, *Xiao Qing Long Tang* can be used to prevent influenza virus infection by cross-protection of subtypes of influenza A virus and B virus. It is also useful for the treatment of influenza virus infection in elderly patients, and individuals with a history of influenza virus infection, influenza vaccination, and allergic pulmonary inflammation.^{12,13}

4. **Immunomodulatory:** Administration of *Xiao Qing Long Tang* has immunomodulatory effects in reducing bronchial inflammation in allergen-sensitized mice. *Xiao Qing Long Tang* suppressed airway inflammation by decreasing the number of total cells and eosinophil infiltration in the bronchoalveolar lavage fluid, and down-regulated the allergen- or mitogen-induced intrapulmonary lymphocyte response of sensitized mice as compared to those of controls.¹⁴
5. **Effect on the adrenal cortex:** Administration of *Xiao Qing Long Tang* has marked effect on the plasma concentration of cortisol and ACTH. Following oral ingestion of the formula at 0.05 g/kg, plasma levels of cortisol and ACTH were measured at 30, 60, and 120 minutes. The study reported increases of 36%, 30% and 25% for cortisol, and 18%, 18% and 23% for ACTH, respectively. In control group that received placebo, no significant changes were noted with plasma concentrations of cortisol or ACTH.¹⁵
6. **Sympathomimetic:** Administration of *Xiao Qing Long Tang* was associated with increased respiratory rate, heart rate, blood pressure, systolic pressure, diastolic pressure, and decreased blood flow in dogs at all doses of 0.5, 1 and 2 g/kg via duodenal administration.¹⁶

CLINICAL STUDIES AND RESEARCH

1. **Pulmonary disorders:** In a clinical study, 258 patients between 6 to 67 years of age with various pulmonary disorders for over one month characterized by cough and dyspnea were examined and treated. According to western diagnosis, 120 patients had acute pneumonia, 68 had chronic pneumonia, 60 had acute asthma, 4 had pulmonary emphysema, 4 had pleurisy, 1 had pulmonary tuberculosis and 1 had pulmonary carcinoma. Patients with the first four diagnoses were treated with herbs only, while those with the last three diagnoses were treated with both herbs and drugs. The herbal treatment was based on *Xiao Qing Long Tang*, with minor modifications when necessary. The study reported significant improvement to complete recovery within 4-6 doses in all patients except ones with tuberculosis and carcinoma.¹⁷
2. **Bronchitis:** Use of modified *Xiao Qing Long Tang* was effective in treating bronchitis. Of 51 patients, the study reported significant improvement in 27 cases, moderate improvement in 15 cases, and no benefit in 1 case.¹⁸

Xiǎo Qīng Lóng Tāng (Minor Bluegreen Dragon Decoction)

3. **Bronchitis in children:** Modified *Xiao Qing Long Tang* demonstrated a 96% rate of effectiveness in treating bronchitis in children. The herbal treatment contained *Xiao Qing Long Tang* plus *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Jie Geng* (Radix Platycodonis), *Zi Wan* (Radix et Rhizoma Asteris) and others as the base formula. Modifications were made as follows: *Jin Yin Hua* (Flos Lonicerae Japonicae), *Zhi Zi* (Fructus Gardeniae) and *Shi Gao* (Gypsum Fibrosum) were added for heat; *Jing Jie* (Herba Schizonepetae) and *Bai Qian* (Rhizoma et Radix Cynanchi Stauntonii) were added for wind-cold; *Ku Xing Ren* (Semen Armeniacae Amarum), *Niu Bang Zi* (Fructus Arctii) and *Xuan Shen* (Radix Scrophulariae) were added for repetitive cough with a hoarse voice; and *Cang Zhu* (Rhizoma Atractylodis) and *Huo Xiang* (Herba Agastaches) were added for profuse dampness and phlegm. Of 65 patients, the study reported complete recovery in 57 cases, improvement in 6 cases, and no benefit in 2 cases.¹⁹
4. **Pneumonia:** Use of modified *Xiao Qing Long Tang* effectively treated 72 of 89 patients with pneumonia within 2 weeks. Seventeen patients who did not respond were then treated with concurrent herb and drug therapy. The herbal treatment contained *Xiao Qing Long Tang* plus *Yu Xing Cao* (Herba Houttuyniae), *Huang Qin* (Radix Scutellariae) and *Ku Xing Ren* (Semen Armeniacae Amarum) as the base formula. For presence of sticky cold phlegm, *Bai Jie Zi* (Semen Sinapis), *Zi Su Zi* (Fructus Perillae) and *Xuan Fu Hua* (Flos Inulae) were added, and *Huang Qin* (Radix Scutellariae) and *Bai Shao* (Radix Paeoniae Alba) were removed. For accumulation of hot phlegm in the Lung, *Shi Gao* (Gypsum Fibrosum) and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) were added, and *Gan Jiang* (Rhizoma Zingiberis), *Gui Zhi* (Ramulus Cinnamomi) and *Xi Xin* (Radix et Rhizoma Asari) were removed. For generalized deficiency and weakness, *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Dang Gui* (Radix Angelicae Sinensis) and *Shu Di Huang* (Radix Rehmanniae Praeparata) were added, and *Huang Qin* (Radix Scutellariae) and *Ma Huang* (Herba Ephedrae) were removed.²⁰
5. **Wheezing and dyspnea:** *Xiao Qing Long Tang* has been shown in many studies to effectively treat wheezing and dyspnea. One study reported 86.7% effectiveness using this formula in liquid form three times daily for 1-3 weeks to treat 30 patients with bronchial asthma.²¹ Another study with 39 patients noted that *Xiao Qing Long Tang* was effective for both acute and chronic bronchial asthma.²² Lastly, in one study of pediatric patients with bronchial asthma, the use of modified *Xiao Qing Long Tang* was associated with 64.5% rate of effectiveness.²³
6. **Cough:** Sixty patients with cough characterized by wind-cold were treated with modified *Xiao Qing Long Tang* with marked success within 3-6 packs of herbs. The herbal treatment included *Xiao Qing Long Tang* plus *Sha Shen* (Radix Glehniae seu Adenophorae), *Zi Wan* (Radix et Rhizoma Asteris) and others as deemed necessary. *Zhi Mu* (Rhizoma Anemarrhenae) was added for fever. *Huang Qi* (Radix Astragali) was added for qi deficiency with profuse sweating. Lower doses of *Xi Xin* (Radix et Rhizoma Asari) and *Gan Jiang* (Rhizoma Zingiberis), and addition of *Shi Gao* (Gypsum Fibrosum) and *Huang Qin* (Radix Scutellariae), were used for presence of scanty thick yellow sputum.²⁴
7. **Rhinitis:** Fifty-three patients with a past history of rhinitis between 2 weeks to 12 years were treated with *Xiao Qing Long Tang*. Clinical presentation included sneezing, itching and irritation of the nose, and profuse, clear and watery nasal discharge. The study reported an overall rate of effectiveness of 94.3%, with complete recovery in 26 cases, moderate improvement in 24 cases, and no benefit in 3 cases.²⁵
8. **Allergic rhinitis:** *Xiao Qing Long Tang* plus *Chai Hu* (Radix Bupleuri) was used to treat 386 patients with allergic rhinitis with marked effectiveness in 164 cases, moderate effect in 177 cases, and no effect in 45 cases. The overall rate of effectiveness was 88.3%.²⁶

HERB-DRUG INTERACTION

- **Fluticasone:** Forty-two asthma patients were divided into three groups: one group treated with *Xiao Qing Long Tang*, one group treated with fluticasone inhalation, and one group treated with both. The study reported that concurrent administration of fluticasone and *Xiao Qing Long Tang* was associated with superior results based on pulmonary function and serum interleukin (IL)-16 levels, in comparison with the other two groups. The study concluded that the combination (of inhaled fluticasone and oral *Xiao Qing Long Tang*) could become an important therapeutical method in treating mild and severe asthma patients.²⁷
- **Carbamazepine:** One study evaluated the potential herb-drug interaction between *Xiao Qing Long Tang* and carbamazepine in rats. With simultaneous oral administration, *Xiao Qing Long Tang* delayed the oral absorption of carbamazepine, but did not influence the peak plasma concentration, area under the plasma concentration-time curve, or terminal elimination half-life ($T_{1/2}$). With 1-week pre-treatment with *Xiao Qing Long Tang*, the T_{max} and the elimination rate constant for carbamazepine were significantly increased, but the protein binding was not affected.²⁸

Xiǎo Qīng Lóng Tāng (Minor Bluegreen Dragon Decoction)

Xiǎo Qīng Lóng Jiā Shí Gāo Tāng

(Minor Bluegreen Dragon Decoction plus Gypsum)

小青龍加石膏湯
小青龍加石膏湯

Pinyin Name: *Xiao Qing Long Jia Shi Gao Tang*

Literal Name: Minor Bluegreen Dragon Decoction plus Gypsum

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

<i>Ma Huang</i> (Herba Ephedrae)	9g
<i>Bai Shao</i> (Radix Paeoniae Alba)	9g
<i>Xi Xin</i> (Radix et Rhizoma Asari)	9g [3-6g]
<i>Gan Jiang</i> (Rhizoma Zingiberis)	9g [3-6g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	9g [6g]
<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g [6-9g]
<i>Ban Xia</i> (Rhizoma Pinelliae), xi (washed)	0.5 cup [9g]
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	0.5 cup [3-6g]
<i>Shi Gao</i> (Gypsum Fibrosum)	6g [9g]

This formula treats wind-cold at the exterior, with accumulation of water and heat in the interior. Clinically, patients may show irritability in addition to all the symptoms and signs listed under *Xiao Qing Long Tang*. *Shi Gao* (Gypsum Fibrosum), with its acrid, sweet, and cold qualities, is added to clear Lung heat and relieve irritability.

Xiao Qing Long Jia Shi Gao Tang is a strong herbal formula, comprised of *Xiao Qing Long Tang* and *Shi Gao* (Gypsum Fibrosum). The doses listed above are intended for a normal and generally healthy person. Children and individuals who are weak should have the doses adjusted accordingly.

Gan Jiang (Rhizoma Zingiberis)

Gui Zhi (Ramulus Cinnamomi)

Wu Wei Zi (Fructus Schisandrae Chinensis)

Jia Jian Xiao Qing Long Tang (Modified Minor Bluegreen Dragon Decoction) treats wheezing, dyspnea and coughing caused by wind-cold attacking the exterior and invading the Lung. This formula contains herbs that release wind-cold, eliminate the phlegm, dilate the Lung, and relieve wheezing and dyspnea. Clinically, it can treat a wide variety of respiratory tract disorders, such as common colds, influenza, asthma, bronchitis, and emphysema.

AUTHORS' COMMENTS

Xiao Qing Long Tang is frequently used today to treat wind-cold invasion with interior water retention, a condition that usually occurs in individuals who live in colder climates or who are constitutionally more cold or damp in nature. It has extremely strong dispersing and warming effects. Thus, accurate diagnosis is necessary before prescribing this formula. Chief diagnostic signs for selecting this formula include profuse, clear or white nasal discharge or sputum with aversion to cold, absence of sweating, dyspnea or cough with a white tongue coating. There should be no signs and symptoms of heat. Moreover, it should not be used for a prolonged period of time, since the warm herbs may change the condition from cold to heat. Patients should also be monitored closely as exterior wind-cold condition can turn into wind-heat condition rather quickly. As soon as signs of heat are evident, immediately stop the use of the formula and select a more appropriate formula.

Other uses of this formula today include respiratory symptoms of sneezing, clear or white nasal discharge in those who are exposed to cold environments, such as with water sports (swimming) or outdoor activities in winter (skiing). The sudden or prolonged exposure to cold weather may give rise to aversion to cold and fever (wind-cold) with sneezing and profuse nasal discharge (water retention). The use of *Xiao Qing Long Tang* in this situation is extremely effective and offers immediate relief so that the condition does not progress inward. *Xiao Qing Long Tang*, however, is not designed for long-term use. Building the immune system by using a formula such as *Yu Ping Feng San* (Jade Windscreen Powder) to strengthen the *wei* (defensive) *qi* is crucial to preventing exterior pathogenic attacks.

Xiǎo Qīng Lóng Tāng (Minor Bluegreen Dragon Decoction)

Ma Huang Tang (Ephedra Decoction) and *Xiao Qing Long Tang* both treat cough, but have the following differences:

- *Ma Huang Tang* treats exterior-excess, wind-cold condition; its chief function is to induce perspiration to expel pathogenic factors. It is not designed to treat asthma or to relieve cough. The dyspnea, cough, or wheezing are secondary symptoms of wind-cold attacking the Lung, giving rise to respiratory difficulties.
- *Xiao Qing Long Tang* treats exterior wind-cold attack with interior water accumulation. It has dual functions to release exterior wind-cold and resolve interior water accumulation. Its main function is to warm the Lung to resolve water accumulation. Therefore, along with cough, dyspnea, and wheezing, there are additional key symptoms such as profuse, clear sputum that may be frothy, as well as clear or white nasal discharge.²⁹

Da Qing Long Tang (Major Bluegreen Dragon Decoction) and *Xiao Qing Long Tang* both release the exterior and arrest wheezing to treat exterior-excess conditions characterized by dyspnea and the absence of perspiration. Both formulas treat exterior and interior excess, and contain *Ma Huang* (Herba Ephedrae) and *Gui Zhi* (Ramulus Cinnamomi). Their differences are as follows:

- *Da Qing Long Tang* is based on *Ma Huang Tang* (Ephedra Decoction), but the dose of *Ma Huang* (Herba Ephedrae) is double that of the dose in *Ma Huang Tang* (Ephedra Decoction). Moreover, it contains *Shi Gao* (Gypsum Fibrosum) to clear Lung heat. It is most suitable for exterior excess, wind-cold condition with interior Lung heat. Other key signs include heat sensations, irritability, and the absence of perspiration.
- *Xiao Qing Long Tang* is also based on *Ma Huang Tang* (Ephedra Decoction), but it omits *Ku Xing Ren* (Semen Armeniacae Amarum) and adds *Xi Xin* (Radix et Rhizoma Asari), *Gan Jiang* (Rhizoma Zingiberis), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Ban Xia* (Rhizoma Pinelliae), and *Bai Shao* (Radix Paeoniae Alba). The dose of *Ma Huang* (Herba Ephedrae) is low, because wheezing and dyspnea are not the primary symptoms of this formula. Rather, the key symptoms are coughing with profuse, clear, white sputum and nasal discharge. *Xiao Qing Long Tang* is most suitable for exterior-excess, wind-cold with interior cold-phlegm accumulation.³⁰

Shè Gān Má Huáng Tāng (Belamcanda and Ephedra Decoction)

射干麻黃湯
射干麻黄汤

Pinyin Name: *She Gan Ma Huang Tang*
Literal Name: Belamcanda and Ephedra Decoction
Alternate Name: Belamcanda and Mahuang Combination
Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Ma Huang</i> (Herba Ephedrae)	12g [9g]
<i>She Gan</i> (Rhizoma Belamcandae)	9g [6-g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	12g [9g]
<i>Xi Xin</i> (Radix et Rhizoma Asari)	9g [3g]
<i>Zi Wan</i> (Radix et Rhizoma Asteris)	9g [6g]
<i>Kuan Dong Hua</i> (Flos Farfarae)	9g [6g]
<i>Ban Xia</i> (Rhizoma Pinelliae)	0.5 cup [9g]
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	0.5 cup [3g]
<i>Da Zao</i> (Fructus Jujubae)	7 pieces [3 pieces]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook *Ma Huang* (Herba Ephedrae) with 12 cups [2,400 mL] of water and bring to a boil twice. Remove the foam from the top, add the other ingredients, and cook until the liquid is reduced to 3 cups [600 mL]. Take the warm, strained decoction in three equally-divided doses daily. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Ventilates the Lung and dispels phlegm
2. Directs Lung qi downward and stops coughing

CLINICAL MANIFESTATIONS

Tan yin (phlegm retention) with reversed flow of Lung qi: excessive coughing, dyspnea, profuse, clear, watery sputum, rattling sounds in the throat, a feeling of fullness and stifling sensation in the chest and diaphragm, heaviness

and pain of the body, swollen face and extremities, and a white, slippery tongue coating.

CLINICAL APPLICATIONS

Cough, asthma, asthmatic bronchitis, pulmonary emphysema, and whooping cough.

EXPLANATION

She Gan Ma Huang Tang (Belamcanda and Ephedra Decoction) is a modification of *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction); it treats *tan yin* (phlegm retention) with reversed flow of Lung qi, and is suitable for conditions characterized by severe phlegm and water retention. Clinically, the cough and sputum are more severe in this case than that found in *Xiao Qing Long Tang*.

Ma Huang (Herba Ephedrae) ventilates the Lung and relieves dyspnea. *She Gan* (Rhizoma Belamcandae)

Shè Gān Má Huáng Tāng (Belamcanda and Ephedra Decoction)

She Gan Ma Huang Tang (Belamcanda and Ephedra Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs

dispels *tan yin* (phlegm retention). *Sheng Jiang* (Rhizoma Zingiberis Recens), *Xi Xin* (Radix et Rhizoma Asari), *Zi Wan* (Radix et Rhizoma Asteris), *Kuan Dong Hua* (Flos Farfarae), and *Ban Xia* (Rhizoma Pinelliae) dissolve phlegm, clear the throat, and redirect the rising qi. *Wu Wei Zi* (Fructus Schisandrae Chinensis) contains the leakage of Lung qi and stops coughing. *Da Zao* (Fructus Jujubae) harmonizes the middle *jiao*.

She Gan Ma Huang Tang is modified from *Xiao Qing Long Tang*, with the removal of *Gui Zhi* (Ramulus Cinnamomi), *Bai Shao* (Radix Paeoniae Alba), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and the addition of *She Gan* (Rhizoma Belamcandae), *Zi Wan* (Radix et Rhizoma Asteris), *Kuan Dong Hua* (Flos Farfarae), and *Da Zao* (Fructus Jujubae). These additional herbs enable *She Gan Ma Huang Tang* to strongly dispel phlegm and direct Lung qi downward to treat cough and dyspnea.

MODIFICATIONS

- For Lung heat from respiratory tract infection, add *Yu Xing Cao* (Herba Houttuyniae), *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), and *Huang Qin* (Radix Scutellariae).
- If there is high fever, add *Shi Gao* (Gypsum Fibrosum) and *Geng Mi* (Semen Oryzae).
- With chest and abdominal fullness and distention, add *Hou Po* (Cortex Magnoliae Officinalis) and *Lai Fu Zi* (Semen Raphani).
- For dysuria, add *Fu Ling* (Poria) and *Ze Xie* (Rhizoma Alismatis).
- When there is profuse sputum, add *Gua Lou Pi* (Pericarpium Trichosanthis).

PHARMACOLOGICAL EFFECTS

1. **Antitussive:** Administration of a *She Gan Ma Huang Tang* preparation at 0.4 mL/10g was associated with marked antitussive effects in mice with artificially-induced cough.¹
2. **Expectorant:** Administration of *She Gan Ma Huang Tang* in mice was associated with marked expectorant effects at high doses, but not at low doses.²
3. **Antiasthmatic:** Administration of *She Gan Ma Huang Tang* has been shown to have a relaxant effect on the bronchial smooth muscle to relieve wheezing and dyspnea.³

CLINICAL STUDIES AND RESEARCH

1. **Bronchitis:** Use of modified *She Gan Ma Huang Tang* was associated with 90.75% effectiveness in treating bronchitis. The herbal treatment used *She Gan Ma Huang Tang* as the base formula, and added *Wu Gong* (Scelopendra) for spastic cough; *Shi Gao* (Gypsum Fibrosum) and *Huang Qin* (Radix Scutellariae) for fever; and *Che Qian Zi* (Semen Plantaginis) for diarrhea.⁴
2. **Bronchitis in children:** Use of modified *She Gan Ma Huang Tang* was associated with 94.7% effectiveness in treating dyspnea and bronchitis in 38 children. *She Gan Ma Huang Tang* was modified as follows: for the presence of excess heat, *Huang Qin* (Radix Scutellariae), *Yu Xing Cao* (Herba Houttuyniae), and *Shi Gao* (Gypsum Fibrosum) were added, and *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Xi Xin* (Radix et Rhizoma Asari), and *Ban Xia* (Rhizoma Pinelliae) were removed; for dry cough without sputum, *Mai Dong* (Radix Ophiopogonis), *Pi Pa Ye* (Folium Eriobotryae), and *Bai Bu* (Radix Stemonae) were added; for cough with clear, watery sputum, *Zi Su Zi* (Fructus Perillae) and *Ku Xing Ren* (Semen Arme-niacae Amarum) were added; for sticky, yellow sputum,

Xiǎo Qīng Lóng Tāng (Minor Bluegreen Dragon Decoction)

Gua Lou Pi (Pericarpium Trichosanthis) and *Tian Zhu Huang* (Concretio Silicea Bambusae) were added, and *Xi Xin* (Radix et Rhizoma Asari), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Da Zao* (Fructus Jujubae) were removed; for wheezing with chest congestion, *Bai Jie Zi* (Semen Sinapis), *Zi Su Zi* (Fructus Perillae), and *Di Long* (Pheretima) were added; and for Spleen and Lung qi deficiencies, *Dang Shen* (Radix Codonopsis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) were added. Of 38 patients, the study reported complete recovery in 34 cases, improvement in 2 cases, and no benefit in 2 cases.⁵

3. **Asthma:** Use of modified *She Gan Ma Huang Tang* was effective in treating asthma. The herbal treatment contained *She Gan Ma Huang Tang* plus *Dan Nan Xing* (*Arisaema cum Bile*) and *Ku Xing Ren* (*Semen Armeniacae Amarum*) as the base formula, with addition of *Yin Yang Huo* (*Herba Epimedii*), *Fu Zi* (*Radix Aconiti Lateralis Praeparata*), and *Rou Gui* (*Cortex Cinnamomi*) for cold-type asthma; *Shi Gao* (*Gypsum Fibrosum*), *Sang Bai Pi* (*Cortex Mori*), and *Yu Xing Cao* (*Herba Houttuyniae*) for heat-type asthma; and *Bu Gu Zhi* (*Fructus Psoraleae*), *Zhong Ru Shi* (*Stalactium*), and *Huang Qi* (*Radix Astragali*) during remission of asthma. *Wang Bu Liu Xing* (*Semen Vaccariae*) seeds were applied topically to acupuncture points on the ear. Of 100 patients, the study reported significant improvement in 35 cases, moderate improvement in 57 cases, and no benefit in 8 cases. The overall rate of effectiveness was 92%.⁶

AUTHORS' COMMENTS

Xiao Qing Long Tang (Minor Bluegreen Dragon Decoction) and *She Gan Ma Huang Tang* both release exterior wind-cold and treat interior *tan yin* (phlegm retention).

- *Xiao Qing Long Tang* is indicated for severe wind-cold attack with constitutional water accumulation; it involves more severe symptoms of profuse, watery nasal discharge and sputum. It treats internal fluid accumulation with exterior excess, wind-cold invasion.
- *She Gan Ma Huang Tang* focuses less on wind-cold condition and more on phlegm stagnation causing symptoms of cough and dyspnea with sputum. It more strongly directs Lung qi downward and relieves dyspnea.⁷

Cāng Ěr Zǐ Sǎn (Xanthium Powder)

蒼耳子散

苍耳子散

Pinyin Name: *Cang Er Zi San*

Literal Name: Xanthium Powder

Alternate Names: *Cang Er San*, *Tsang Erh San*, Xanthium Formula

Original Source: *Ji Sheng Fang* (Formulas to Aid the Living) by Yan Yong-He in 1253

COMPOSITION

<i>Cang Er Zi</i> (Fructus Xanthii), <i>chao</i> (dry-fried)	7.5g
<i>Xin Yi Hua</i> (Flos Magnoliae)	15g
<i>Bai Zhi</i> (Radix Angelicae Dahuricae)	30g
<i>Bo He</i> (Herba Menthae)	1.5g

Cāng Ěr Zǐ Sǎn (Xanthium Powder)

DOSAGE / PREPARATION / ADMINISTRATION

Sun-dry the ingredients and then grind them into a fine powder. Take 6g per dose after meals with an herbal tea made from *Cong Bai* (Bulbus Allii Fistulosi) and *Cha Ye* (Folium Camelliae).

CHINESE THERAPEUTIC ACTIONS

- 1. Dispels wind
- 2. Opens the nasal orifices

CLINICAL MANIFESTATIONS

Nasal obstruction caused by wind: stuffy nose, thick, yellow nasal discharge, and frontal and temporal headaches.

CLINICAL APPLICATIONS

Acute or chronic sinusitis, and acute or chronic allergic rhinitis.

EXPLANATION

Cang Er Zi San (Xanthium Powder) treats wind attacking the exterior. Wind invasion is characterized by symptoms such as nasal discharge and frontal headache, while heat invasion is characterized by thick, yellow nasal discharge. Clinically, this formula may be used for patients suffering

from rhinitis, who exhibit symptoms such as stuffy nose, runny nose, and headache.

Cang Er Zi (Fructus Xanthii) and *Xin Yi Hua* (Flos Magnoliae), the two chief herbs, unblock the nasal passages and are commonly used together for their synergistic effect. *Bai Zhi* (Radix Angelicae Dahuricae) opens the nasal orifices, dispels wind, and discharges pus. *Bo He* (Herba Menthae) releases wind-heat from the exterior. *Bai Zhi* (Radix Angelicae Dahuricae) and *Bo He* (Herba Menthae) relieve headache caused by wind. *Cong Bai* (Bulbus Allii Fistulosi) and *Cha Ye* (Folium Camelliae) enhance the overall effects of the formula.

MODIFICATIONS

- If there is increased Lung heat, add *Di Gu Pi* (Cortex Lycii) and *Sang Bai Pi* (Cortex Mori).
- For copious, purulent nasal discharge, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae).

AUTHORS' COMMENTS

Cang Er Zi San may slightly irritate the digestive system. To avoid this irritation, dry-fry *Cang Er Zi* (Fructus Xanthii) first before use, and take the formula after meals.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind equal amounts of the ingredients into powder. Take 6g of the powder per dose with tea after meals.

CHINESE THERAPEUTIC ACTIONS

- 1. Releases wind-cold from the exterior
- 2. Opens the nasal orifices

CLINICAL MANIFESTATIONS

Nasal obstruction caused by wind-cold: stuffy nose, profuse, clear or white nasal discharge, and headache.

CLINICAL APPLICATIONS

Allergy, allergic rhinitis, sinusitis, rhinitis, sinus congestion, and sinus headache.

EXPLANATION

Xin Yi San (Magnolia Flower Powder) is one of the most commonly used formulas for opening the nasal orifices.

Xin Yi San (Magnolia Flower Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Nasal obstruction caused by wind-cold	<ul style="list-style-type: none">Nasal obstruction and frontal headache: exterior windRunny nose with clear or white nasal discharge: wind-cold condition	<ul style="list-style-type: none">Releases wind-cold from the exteriorOpens the nasal orifices	<ul style="list-style-type: none"><i>Xin Yi Hua</i> (Flos Magnoliae), <i>Sheng Ma</i> (Rhizoma Cimicifugae), and <i>Bai Zhi</i> (Radix Angelicae Dahuricae) raise clear qi to the head to open the nasal orifices.<i>Xi Xin</i> (Radix et Rhizoma Asari) warms the Lung to resolve phlegm and helps open the nasal orifices.<i>Fang Feng</i> (Radix Saposhnikoviae) and <i>Qiang Huo</i> (Rhizoma et Radix Notopterygii) dispel wind-cold.<i>Gao Ben</i> (Rhizoma et Radix Ligustici) and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) relieve headache.<i>Mu Tong</i> (Caulis Akebiae) opens obstruction in the nose, and drains dampness and eliminates water accumulation through urination.<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

Xīn Yí Sǎn (Magnolia Flower Powder)

Consisting of mostly warm exterior-releasing herbs, this formula is suitable for nasal problems caused by wind-cold. As wind-cold attacks the exterior of the body, it travels upward to affect the nose. Clinical presentations include stuffy nose with clear or white nasal discharge, and headache.

In this formula, the herbs of light quality – *Xin Yi Hua* (Flos Magnoliae), *Sheng Ma* (Rhizoma Cimicifugae), and *Bai Zhi* (Radix Angelicae Dahuricae) – raise clear qi to the head to open the nasal orifices. *Xin Yi Hua* (Flos Magnoliae) and *Bai Zhi* (Radix Angelicae Dahuricae) are two commonly used herbs for nasal problems. *Xi Xin* (Radix et Rhizoma Asari) warms the Lung to resolve phlegm and helps the previous two herbs open the nasal orifices. *Fang Feng* (Radix Saposhnikovia) and *Qiang Huo* (Rhizoma et Radix Notopterygii) dispel wind-cold. *Gao Ben* (Rhizoma et Radix Ligustici) and *Chuan Xiong* (Rhizoma Chuanxiong) relieve headache. *Mu Tong* (Caulis Akebiae) opens obstruction in the nose, and drains dampness and eliminates water accumulation through urination. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the formula.

MODIFICATIONS

- For clear nasal discharge from wind-cold invasion, add *Jing Jie* (Herba Schizonepetae) and *Qiang Huo* (Rhizoma et Radix Notopterygii).
- For abscess caused by accumulation of wind-dampness, add *Cang Zhu* (Rhizoma Atractylodis) and *Lian Qiao* (Fructus Forsythiae).
- With abscess and loss of smell, add *Pai Nong San* (Drain the Pus Powder).

CLINICAL STUDIES AND RESEARCH

Allergic rhinitis: Perennial allergic rhinitis was effectively treated with *Xin Yi San* 9g, *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction) 3g, and *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum) 3g. The patients were given 15g (9+3+3) of herbal extract per day in three equal doses. The mechanism of action was attributed to the suppression of nasal mucosa inflammation by normalizing stimulatory effects of allergic nasal discharge in patients with H-IgE allergic rhinitis.¹

RELATED FORMULAS

Jia Wei Xin Yi San (Augmented Magnolia Flower Powder) releases wind-cold from the exterior, opens the nasal orifices, and relieves pain. Clinically, it treats sinusitis or rhinitis caused by wind-cold, with symptoms

Xīn Yí Sǎn (Magnolia Flower Powder)

such as nasal obstruction, pain in the sinus cavity, profuse, clear or white nasal discharge, and headache.

AUTHORS' COMMENTS

Xin Yi San is one of the most commonly used formulas today for treating nose allergies. The key symptoms include nasal congestion, clear, watery nasal discharge, loss of smell, and headache.

<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	2g

DOSAGE / PREPARATION / ADMINISTRATION

Prepare the ingredients as a decoction and take while warm with meals, to avoid possible digestive discomfort.

CHINESE THERAPEUTIC ACTIONS

1. Clears nasal obstruction
2. Releases the exterior

CLINICAL MANIFESTATIONS

Nasal obstruction caused by damp-heat: stuffy nose, yellow and sticky nasal discharge, sneezing, headache, itchy nose and throat, decreased sense of smell, decreased energy level, and fatigue.

CLINICAL APPLICATIONS

Acute and chronic sinusitis and rhinitis.

EXPLANATION

Qing Bi Tang (Clear the Nose Decoction) specifically treats nasal obstruction caused by damp-heat, with the diagnostic symptom of yellow and sticky discharge. This syndrome may occur secondary to an acute exterior attack or a chronic condition. If the nasal obstruction is the result of an exterior condition, other symptoms of an exterior attack may be present, such as sneezing, headache, aversion to cold, and itching of the nose and throat. If the nasal obstruction is chronic in nature, patients may

Qīng Bǐ Tāng (Clear the Nose Decoction)

You Bi Tang (Benefit the Nose Decoction) clears nasal obstruction and releases the exterior. Clinically, this formula treats nasal obstruction caused by damp-heat,

Qīng Bì Tāng (Clear the Nose Decoction)

with key symptoms such as yellow, sticky nasal discharge, sneezing, and headache.

The original formulation of *Qing Bi Tang* contains *Rou Gui* (Cortex Cinnamomi), a Kidney yang tonic herb that warms the interior. Today, *Rou Gui* (Cortex Cinnamomi) is usually replaced with *Gui Zhi* (Ramulus Cinnamomi), which can release the exterior and warm the peripheral channels and collaterals.

Qing Bi Tang and *You Bi Tang* (Benefit the Nose Decoction) contain very similar ingredients, and have essentially the same clinical applications.

- *Qing Bi Tang* contains *Yi Yi Ren* (Semen Coicis) and drains dampness.
- *You Bi Tang* contains *Huang Qin* (Radix Scutellariae) and effectively clears heat.

AUTHORS' COMMENTS

Qing Bi Tang and *You Bi Tang* are formulated based on the clinical experience of past herbalists. These formulas have been refined after years of trial and error, and are very effective for treating sinusitis and rhinitis characterized by damp-heat. The original sources of these two formulas are unavailable because they have not been formally cited in any reference or textbook.

There are three formulas that commonly treat various types of sinusitis and rhinitis:

- *Cang Er Zi San* (Xanthium Powder) is best for wind-heat condition characterized by nasal obstruction with yellow discharge.
- *Xin Yi San* (Magnolia Flower Powder) is most effective for wind-cold condition characterized by nasal obstruction with clear, white discharge.
- *Qing Bi Tang* (Clear the Nose Decoction) targets damp-heat condition characterized by nasal obstruction with yellow, sticky nasal discharge that has a foul smell.

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients with 2 cups of water until the liquid is reduced to 1 cup. Take the decoction twice daily.

CHINESE THERAPEUTIC ACTIONS

1. Dispels wind and clears heat
2. Ventilates the Lung and arrests coughing

CLINICAL MANIFESTATIONS

Early stage of wind-warmth syndrome: cough, mild fever, and slight thirst.

CLINICAL APPLICATIONS

Common cold, influenza, acute bronchitis, acute tonsillitis, coughing, and other upper respiratory infections.

EXPLANATION

Sang Ju Yin (Mulberry Leaf and Chrysanthemum Decoction) is a relatively mild formula that treats the early stage or mild case of wind-warmth syndrome, a condition that

is similar to, but less severe, than wind-heat syndrome. Coughing, the prominent symptom of this syndrome, arises when the wind-warmth factor affects the normal Lung qi flow. Since this wind-warmth syndrome is mild in nature, the fever and thirst will be slight.

Sang Ye (Folium Mori) and *Ju Hua* (Flos Chrysanthemi) expel the wind-warmth factor and clear Lung heat. *Bo He* (Herba Menthae) helps clear the wind-warmth from the upper *jiao*. *Jie Geng* (Radix Platycodonis), with its ascending tendency, and *Ku Xing Ren* (Semen Armeniacae Amarum), with its descending tendency, regulate Lung qi to relieve cough. *Lian Qiao* (Fructus Forsythiae) clears heat and eliminates toxins in the upper *jiao*. *Lu Gen* (Rhizoma Phragmitis) clears heat and promotes the generation of body fluids to relieve thirst. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

In this formula, *Sang Ye* (Folium Mori) and *Ju Hua* (Flos Chrysanthemi) are used as chief herbs to gently disperse

Sāng Jú Yīn (Mulberry Leaf and Chrysanthemum Decoction)

Sang Ju Yin (Mulberry Leaf and Chrysanthemum Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Early stage of wind-warmth syndrome	<ul style="list-style-type: none"> • Mild fever: exterior wind-warmth • Slight thirst: heat consuming body fluids • Cough: wind-warmth affecting Lung qi circulation 	<ul style="list-style-type: none"> • Disperses wind and clears heat • Ventilates the Lung and arrests cough 	<ul style="list-style-type: none"> • <i>Sang Ye</i> (Folium Mori) and <i>Ju Hua</i> (Flos Chrysanthemi) dispel exterior wind-warmth factor and clear interior Lung heat. • <i>Bo He</i> (Herba Menthae) clears wind-warmth factor from the upper <i>jiao</i>. • <i>Lian Qiao</i> (Fructus Forsythiae) clears heat and eliminates toxins in the upper <i>jiao</i>. • <i>Jie Geng</i> (Radix Platycodonis) and <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) regulate Lung qi to relieve coughing. • <i>Lu Gen</i> (Rhizoma Phragmitis) clears heat and promotes the generation of body fluids to relieve thirst. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

early-stage wind-warmth that is beginning to affect the Lung. Although *Bo He* (Herba Menthae) is colder, and has a stronger exterior-releasing effect, it is not suitable as the chief herb for two main reasons. First, its exterior-releasing effect is too strong, and may further damage body fluids, create heat phlegm and aggravate cough. Second, it does not clear Lung heat nor arrest the cough. Therefore, *Bo He* (Herba Menthae) is not suitable as the chief ingredient, but is used as the deputy herb to help *Sang Ye* (Folium Mori) and *Ju Hua* (Flos Chrysanthemi) release wind-warmth.

MODIFICATIONS

- For severe cough with yellow sputum caused by Lung heat, add *Huang Qin* (Radix Scutellariae) and *Sang Bai Pi* (Cortex Mori).
- For cough with sticky sputum that is difficult to expectorate, add *Gua Lou Pi* (Pericarpium Trichosanthis), *Dong Gua Zi* (Semen Benincasae), and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii).
- For cough with blood-streaked sputum, add *Bai Mao Gen* (Rhizoma Imperatae), *Ou Jie* (Nodus Nelumbinis Rhizomatis), and *Qian Cao* (Radix et Rhizoma Rubiae).
- If there is labored breathing or dyspnea characterized by more heat and dryness in the *qi* (energy) level, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae) to clear the Lung.
- When there is more thirst, add *Tian Hua Fen* (Radix Trichosanthis) and *Zhi Mu* (Rhizoma Anemarrhenae).
- If accompanied by a sore throat, add *She Gan* (Rhizoma Belamcandae), *Shan Dou Gen* (Radix et Rhizoma Sophorae Tonkinensis), and *Niu Bang Zi* (Fructus Arctii).

- For eye disorders caused by wind-warmth invasion, add *Chan Tui* (Periostracum Cicadae).
- For eye disorders caused by Liver heat, add *Jue Ming Zi* (Semen Cassiae) and *Ji Li* (Fructus Tribuli).

CAUTIONS / CONTRAINDICATIONS

- *Sang Ju Yin* is an acrid and cold formula that treats wind-warmth condition. It is inappropriate for cough caused by wind-cold.
- This formula has only mild potency to treat cough caused by wind-warmth invasion. In cases of severe cough caused by Lung heat, the use of this formula alone will not be sufficient. Modification with additional herbs and doses, or selection of another formula is necessary for proper treatment.

PHARMACOLOGICAL EFFECTS

1. **Effect on temperature regulation:** Administration of *Sang Ju Yin* was associated with reduction of body temperature in rabbits with artificially-induced fever. The formula, however, has a slow onset of action, as the effect was not observed until 4 hours later. The researchers noted that the potency of this formula is similar to that of aspirin at 2 mg/kg.¹
2. **Anti-inflammatory:** Administration of *Sang Ju Yin* was associated with marked anti-inflammatory effects in mice with swelling and inflammation. The mechanism of action is attributed to reversal of the increased capillary permeability. The minimum effective dose for anti-inflammatory effects was 0.307 g/kg. The pharmacokinetic parameters of *Sang Ju Yin* are: 4.83 hours for half life, 3.1

Sāng Jú Yīn (Mulberry Leaf and Chrysanthemum Decoction)

hours for time to reach peak concentration, and 24.48 hours for duration of action.²

CLINICAL STUDIES AND RESEARCH

1. **Upper respiratory tract infection:** Patients with upper respiratory tract infection characterized by cough, fever, sticky sputum, and a dry mouth were treated with *Sang Ju Yin*. Out of 375 cases, the study reported satisfactory results in 359 cases (95.5%). No side effects were reported.³
2. **Cough:** Eighty pediatric patients with cough were treated with *Sang Ju Yin* plus *Ma Huang* (Herba Ephedrae) and *Gan Jiang* (Rhizoma Zingiberis) with 94% effectiveness. Modifications were made by adding *Shi Gao* (Gypsum Fibrosum) and *Huang Qin* (Radix Scutellariae) for Lung heat; *Ge Gen* (Radix Puerariae Lobatae) and *Tian Hua Fen* (Radix Trichosanthis) for thirst; *Bai Bu* (Radix Stemonae) and *Zi Wan* (Radix et Rhizoma Asteris) for severe cough; *Bai Guo* (Semen Ginkgo) and *Di Long* (Pheretima) for wheezing; *Xi Xin* (Radix et Rhizoma Asari) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) for cold; *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) and *Gua Lou Pi* (Pericarpium Trichosanthis) for profuse phlegm; *She Gan* (Rhizoma Belamcandae) and *Niu Bang Zi* (Fructus Arctii) for redness and swelling of the throat; *Bai Mao Gen* (Rhizoma Imperatae) and *Xian He Cao* (Herba Agrimoniae) for nosebleeds; and charred *Shan Zha* (Fructus Crataegi), charred *Shen Qu* (Massa Fermentata), and charred *Mai Ya* (Fructus Hordei Germinatus) for poor appetite. Of 80 cases, the study reported complete recovery in 64 cases after 2 packs of herbs, in 11 cases after 3-5 packs of herbs, and no benefit in 5 cases.⁴
3. **Influenza:** Use of modified *Sang Ju Yin* was associated with 86.5% effectiveness in treating 50 patients with influenza. The clinical presentations included signs and symptoms such as headache, stuffy nose, runny nose, cough, poor appetite, etc. The herbs were given in decoction daily. The study reported resolution of most symptoms within 2-4 days.⁵
4. **Epistaxis:** One study reported successful treatment of nosebleeds in all 60 patients within 2-7 days using *Sang Ju Yin* plus *Ce Bai Ye* (Cacumen Platycladi), *Xian He Cao* (Herba Agrimoniae), and others as needed. For modification, *Da Huang* (Radix et Rhizoma Rhei) was added if there was constipation.⁶

AUTHORS' COMMENTS

Sang Ju Yin is one of the most essential and effective formulas for treating mild cases of cough caused by wind-warmth invasion. This formula is also effective in

treating dry cough, with scanty or no sputum, during the autumn. Because this formula is mild in nature, it is necessary to modify it to increase its potency and/or address associated complications. Please see the Modifications section for details.

Yin Qiao San (Honeysuckle and Forsythia Powder) and *Sang Ju Yin* are cool, acrid formulas used for the initial stages of warm febrile disorders. Both contain *Lian Qiao* (Fructus Forsythiae), *Jie Geng* (Radix Platycodonis), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Bo He* (Herba Menthae), and *Lu Gen* (Rhizoma Phragmitis).

- *Yin Qiao San* has stronger heat-clearing and exterior-releasing effects.
- *Sang Ju Yin* more effectively ventilates the Lung to arrest coughing.

Sang Xing Tang (Mulberry Leaf and Apricot Kernel Decoction) and *Sang Ju Yin* both contain *Ku Xing Ren* (Semen Armeniacae Amarum) and *Sang Ye* (Folium Mori) to clear the Lung, relieve cough, and expel exterior factors.

- *Sang Xing Tang* is indicated for dryness and heat attacking the Lung. This formula contains moistening herbs, such as *Sha Shen* (Radix Glehniae seu Adenophorae) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), to treat dryness symptoms.
- *Sang Ju Yin* is indicated for wind-warmth attacking the Lung. It contains heat-clearing herbs, such as *Bo He* (Herba Menthae), *Lu Gen* (Rhizoma Phragmitis), and *Lian Qiao* (Fructus Forsythiae), to clear heat.⁷

According to Dr. Chang Wei-Yen, *Sang Ju Yin* can be combined with *Hu Yao Huang* (Herba Leucas Mollissimae), *Pao Zai Cao* (Herba Physalis Angulatae), and *Zhu Zi Cao* (Herba Euphorbiae Thymifoliae) to treat cough and dyspnea associated with wind-warmth invasion.

Yín Qiào Sǎn (Honeysuckle and Forsythia Powder)

銀翹散 银翘散

Pinyin Name: Yin Qiao San

Literal Name: Honeysuckle and Forsythia Powder

Alternate Names: Yin Jiao San, Lonicera and Forsythia Formula

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

COMPOSITION

<i>Jin Yin Hua</i> (Flos Lonicerae Japonicae)	30g [15g]
<i>Lian Qiao</i> (Fructus Forsythiae)	30g [15g]
<i>Jing Jie Sui</i> (Spica Schizonepetae)	12g [4g]
<i>Dan Dou Chi</i> (Semen Sojae Praeparatum)	15g [5g]
<i>Jie Geng</i> (Radix Platycodonis)	18g [6g]
<i>Niu Bang Zi</i> (Fructus Arctii)	18g [6g]
<i>Bo He</i> (Herba Menthae)	18g [6g]
<i>Zhu Ye</i> (Herba Phyllostachys)	12g [4g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	15g [5g]

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder and take 18g of the powder with a decoction made from fresh *Lu Gen* (Rhizoma Phragmitis). The decoction of *Lu Gen* (Rhizoma Phragmitis) is prepared by cooking the herb in water until its aroma fills the air. Do not overcook the herb, since a light decoction (cooking for a short period of time) enters and treats the Lung, while a heavy decoction (cooking for long period of time) enters the middle *jiao*.

For patients with serious conditions, take the decoction three times during the day (2 hours apart) and one time at night. For patients with mild conditions, take the decoction twice during the day (3 hours apart) and one time at night. The treatment should be continued until the condition is resolved. Today, this formula may be prepared as a decoction with the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

1. Releases the exterior with acrid and cold herbs
2. Clears heat and eliminates toxins

CLINICAL MANIFESTATIONS

Onset of *wen bing* (warm disease): fever, aversion to cold, slight aversion to wind, slight or absence of perspiration, headache, thirst, a sore throat, cough, a red tongue tip with a thin, white or thin, yellow tongue coating, and a superficial, rapid pulse.

CLINICAL APPLICATIONS

Common cold, influenza, high fever, pneumonia, acute upper respiratory infection, pharyngo-conjunctival

fever, tonsillitis, parotitis, canker sores, viral myocarditis, epidemic encephalitis B, and drug-induced dermatitis.

EXPLANATION

Yin Qiao San (Honeysuckle and Forsythia Powder) treats the early stage of *wen bing* (warm disease), when heat enters through the nose and mouth and attacks the Lung. When heat attacks the *wei* (defensive) level of the skin, it produces symptoms of fever, aversion to cold, slight aversion to wind, and slight or absence of perspiration. When heat invades the Lung, it produces cough. Thirst and a red tongue tip are indications of heat damaging body fluids. A thin, white or thin, yellow tongue coating and a superficial, rapid pulse are signs of heat at the exterior.

Jin Yin Hua (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae) are the chief herbs in this formula. Acrid, aromatic and cold, they release exterior heat and eliminate toxins. *Jing Jie Sui* (Spica Schizonepetae) and *Dan Dou Chi* (Semen Sojae Praeparatum) open the skin pores to help expel exterior factors through mild perspiration. *Jie Geng* (Radix Platycodonis) regulates Lung qi and relieves the sore throat. *Bo He* (Herba Menthae) dispels wind-heat. *Zhu Ye* (Herba Phyllostachys) clears upper *jiao* heat, while *Niu Bang Zi* (Fructus Arctii) clears heat and eliminates toxins to relieve the sore throat. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) clears heat and eliminates toxins. Finally, *Lu Gen* (Rhizoma Phragmitis) clears heat and promotes the generation of body fluids to relieve thirst.

Yín Qiào Sǎn (Honeysuckle and Forsythia Powder)

Yin Qiao San (Honeysuckle and Forsythia Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Onset of <i>wen bing</i> (warm disease)	<ul style="list-style-type: none"> • Fever, aversion to cold, slight aversion to wind, slight or absence of perspiration: heat attacks the <i>wei</i> (defensive) level • Thirst, sore throat, and cough: heat enters the Lung through the mouth and nose • Thirst and a red tongue tip: body fluids damaged by heat • Thin, white or thin, yellow tongue coating and a superficial, rapid pulse: heat at the exterior 	<ul style="list-style-type: none"> • Releases the exterior • Clears heat and eliminates toxins 	<ul style="list-style-type: none"> • <i>Jin Yin Hua</i> (Flos Lonicerae Japonicae) and <i>Lian Qiao</i> (Fructus Forsythiae) release exterior heat and eliminate toxins. • <i>Jing Jie Sui</i> (Spica Schizonepetae) and <i>Dan Dou Chi</i> (Semen Sojae Praeparatum) open the skin pores to expel exterior factors via mild perspiration. • <i>Jie Geng</i> (Radix Platycodonis) regulates Lung qi and relieves sore throat. • <i>Niu Bang Zi</i> (Fructus Arctii) clears heat and eliminates toxins. • <i>Bo He</i> (Herba Menthae) dispels exterior wind-heat. • <i>Zhu Ye</i> (Herba Phyllostachys) clears interior heat from upper <i>jiao</i>. • <i>Lu Gen</i> (Rhizoma Phragmitis) clears heat and promotes the generation of body fluids. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) clears heat and eliminates toxins.

MODIFICATIONS

- For a sore and swollen throat, add *Ma Bo* (Lasiosphaera seu Calvatia), *She Gan* (Rhizoma Belamcandae), and *Xuan Shen* (Radix Scrophulariae); or *Pu Ji Xiao Du Yin* (Universal Benefit Decoction to Eliminate Toxin).
- If there is headache and aversion to wind, add *Fang Feng* (Radix Saposhnikoviae) and *Cong Bai* (Bulbus Allii Fistulosi).
- With irritability and thirst, add *Mai Dong* (Radix Ophiopogonis) and *Shi Gao* (Gypsum Fibrosum).
- If there is nausea, vomiting, and feeling of chest oppression, add *Huo Xiang* (Herba Agastaches) and *Zhi Qiao* (Fructus Aurantii).
- If there is thirst, add *Tian Hua Fen* (Radix Trichosanthis) or *Lu Gen* (Rhizoma Phragmitis).
- If there is cough, add *Ku Xing Ren* (Semen Armeniacae Amarum) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii).
- For early stage of measles, add *Zi Cao* (Radix Arnebiae) and *Chan Tui* (Periostracum Cicadae).
- When there is more interior heat, add *Zhi Zi* (Fructus Gardeniae) and *Huang Qin* (Radix Scutellariae).
- When heat in the Lung has injured body fluids, add *Di Huang* (Radix Rehmanniae) and *Mai Dong* (Radix Ophiopogonis).

CAUTIONS / CONTRAINDICATIONS

- *Yin Qiao San* is contraindicated in cases of wind-cold invasion or in initial stages of damp-heat conditions.

- Wind-heat conditions can change rapidly. Optimal treatment requires close monitoring of clinical presentations and immediate adjustment of the herbal treatment.
- Avoid foods that are oily, greasy, raw, cold, or sour in nature while taking this herbal formula.¹

PHARMACOLOGICAL EFFECTS

1. **Antibiotic:** According to *in vitro* studies, *Yin Qiao San* has broad spectrum of inhibitory effects against such pathogens as *Staphylococcus aureus*, *Bacillus subtilis*, *Bacillus proteus*, *Pseudomonas aeruginosa*, and *Candida albicans*. The minimum inhibitory concentration was 110 mg/mL (equivalent to 550 mg/mL of raw herb).²
2. **Effect on temperature regulation:** Administration of *Yin Qiao San* was effective in reducing body temperature in rabbits with artificially-induced fever. Oral ingestion of decoction at 3.8 mL/kg (equivalent to 8.8 g/kg of dried herbs) was effective in reducing body temperature by 1°C for up to six hours. In comparison with aspirin (0.2 mg/kg), the herbal formula and the drugs are approximately the same in their effect to reduce fever.³
3. **Anti-inflammatory:** Administration of various dosage forms of *Yin Qiao San* was effective in reducing swelling and inflammation in rats. The dosage forms tested include decoction, pills, and tea bags. It has been determined that to achieve an anti-inflammatory effect, the minimum effective dose is 1.5 g/kg. The pharmacokinetic parameters of *Yin Qiao San* are: 2.31 hours to reach peak therapeutic

Yín Qiào Sǎn (Honeysuckle and Forsythia Powder)

effect, 16.23 hours for duration of action, and 4.53 hours for half life.⁴

4. **Analgesic:** Administration of *Yin Qiao San* at doses of 50 mg/kg and 100 mg/kg via intraperitoneal injection was associated with mild analgesic effects in mice for up to one hour.⁵

CLINICAL STUDIES AND RESEARCH

1. **Common cold and influenza:** Three hundred patients with infectious viral infection were treated with *Yin Qiao San* with most reporting improvement after 1-2 doses.⁶
2. **High fever:** In one study, 102 children with high fever caused by infection were treated with 87.25% effectiveness using modified *Yin Qiao San*. Modifications included addition of *Shi Gao* (Gypsum Fibrosum), *Di Gu Pi* (Cortex Lycii), and *Zhi Mu* (Rhizoma Anemarrhenae) for persistent high fever; *Jiang Can* (Bombyx Batryticatus) and *Gou Teng* (Ramulus Uncariae cum Uncis) for spasms and cramps; *Ma Huang* (Herba Ephedrae), *Ku Xing Ren* (Semen Armeniacae Amarum), and *Qian Hu* (Radix Peucedani) for cough; *Chi Shao* (Radix Paeoniae Rubra), *Chan Tui* (Periostracum Cicadae), and *Ju Hua* (Flos Chrysanthemi) for red eyes; *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) for nausea and vomiting; and *Yi Yi Ren* (Semen Coicis) and *Hua Shi* (Talcum) for diarrhea. After using 1-3 packs of the herbs, the study reported improvement in 89 of 102 patients.⁷
3. **Pneumonia:** One study reported recovery in all 25 children with pneumonia after they were treated with 3-5 packs of modified *Yin Qiao San* plus *Zhi Mu* (Rhizoma Anemarrhenae) and *Ku Xing Ren* (Semen Armeniacae Amarum). Additional modifications were made as needed. For irritability and thirst due to excess heat, *Tian Hua Fen* (Radix Trichosanthis) and *Huang Lian* (Rhizoma Coptidis) were added, and *Jing Jie Sui* (Spica Schizonepetae), *Bo He* (Herba Menthae) and *Niu Bang Zi* (Fructus Arctii) were removed. For severe cough with thick sputum, *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) and *Gua Lou* (Fructus Trichosanthis) were added, and *Niu Bang Zi* (Fructus Arctii) and *Jing Jie Sui* (Spica Schizonepetae) were removed. For dry or foul-smelling stools, *Da Huang* (Radix et Rhizoma Rhei) was added, and *Jie Geng* (Radix Platycodonis) and *Bo He* (Herba Menthae) were removed. For reduced frequency and volume of urine with painful urination, *Che Qian Zi* (Semen Plantaginis) was added, and *Niu Bang Zi* (Fructus Arctii) and *Jing Jie Sui* (Spica Schizonepetae) were removed.⁸
4. **Acute upper respiratory infection:** In one report, 1150 patients with wind-heat exterior infection were treated with *Yin Qiao San* with relief of fever within an average of 2.7 days.⁹

5. **Tonsillitis:** Modified *Yin Qiao San* successfully treated 36 patients with acute tonsillitis. The base formula contained *Yin Qiao San* plus *Shan Dou Gen* (Radix et Rhizoma Sophorae Tonkinensis), *Ku Xing Ren* (Semen Armeniacae Amarum) and *Qian Hu* (Radix Peucedani) were added for cough; and *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae) were added for high fever without aversion to cold. Of 36 patients, 24 had complete recovery and 12 had improvement. The average duration of treatment was 9 days.¹⁰
6. **Viral myocarditis:** Fifty-two patients with viral myocarditis were treated with 92.2% effectiveness using integrated treatment of herbs, rest, nutrition, and intravenous infusion of fluids and vitamin C. The herbal treatment contained *Yin Qiao San* plus *Dang Gui* (Radix Angelicae Sinensis), *Di Huang* (Radix Rehmanniae), and *Da Zao* (Fructus Jujubae) as the base formula, with the addition of *Ban Lan Gen* (Radix Isatidis) for sore throat; *Huang Qi* (Radix Astragali) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) for palpitations; and a larger dose of *Dang Gui* (Radix Angelicae Sinensis) for chest oppression and shortness of breath. Of 52 cases, complete recovery was reported in 38 cases, improvement in 10 cases, and no benefit in 4 cases.¹¹

TOXICOLOGY

The LD₅₀ for *Yin Qiao San* in mice via oral ingestion was 100 g/kg in decoction, and 75 g/kg in pills.¹²

RELATED FORMULAS

Yín Qiào Tāng (Honeysuckle and Forsythia Decoction)

銀翹湯

銀翹湯

Pinyin Name: *Yin Qiao Tang*

Literal Name: Honeysuckle and Forsythia Decoction

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

<i>Lian Qiao</i> (Fructus Forsythiae)	9g
<i>Zhu Ye</i> (Herba Phyllostachys)	6g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	3g
<i>Mai Dong</i> (Radix Ophiopogonis)	12g
<i>Di Huang</i> (Radix Rehmanniae)	12g

The source text instructs to prepare the ingredients as a decoction. *Yin Qiao Tang* (Honeysuckle and Forsythia Decoction) treats mild *yangming* syndrome, which occurs as a result of the inappropriate use of downward draining herbs to treat an exterior condition. Consequently, the exterior pathogenic factors move to the interior and create heat. Furthermore, the improper use of downward

Yín Qiào Sǎn (Honeysuckle and Forsythia Powder)

draining herbs damages the body and causes qi and yin deficiencies.

To treat these types of cases, one must use exterior-releasing herbs in conjunction with yin-nourishing herbs. *Lian Qiao* (Fructus Forsythiae) and *Jin Yin Hua* (Flos Lonicerae Japonicae) release the exterior factors, while *Mai Dong* (Radix Ophiopogonis) and *Di Huang* (Radix Rehmanniae) nourish yin and clear heat. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonify qi, and *Zhu Ye* (Herba Phyllostachys) clears any heat that may arise from yin deficiency. The three herbs, *Lian Qiao* (Fructus Forsythiae), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *Zhu Ye* (Herba Phyllostachys) are selected particularly for their light quality, which allows them to clear heat without damaging yin.

Yin Qiao Jie Du San (Honeysuckle and Forsythia Powder to Relieve Toxicity) releases exterior wind-heat and eliminates heat and toxins. It treats the initial onset of *wen bing* (warm disease) with more severe signs and symptoms, such as high fever, severe sore and swollen throat, absence of perspiration or slight perspiration, aversion to wind, headache, thirst, coughing, a red tongue tip with a yellow tongue coating, and a superficial, rapid pulse.

AUTHORS' COMMENTS

Yin Qiao San is the representative formula for treating the initial stage of *wen bing* (warm disease), with chief manifestations of sore throat, fever, aversion to cold, slight aversion to wind, slight or absence of perspiration, thirst, and a superficial, rapid pulse. It is widely used in the treatment of various types of common cold and influenza, with sore throat as the key symptom. This formula is most effective when administered immediately after the warning signs and symptoms (such as throat discomfort) appear. Appropriate use of this formula will reduce the severity and duration of such viral infections.

Because this formula has been used for many centuries, some patients might have already developed some level of resistance to it. In such cases, herbs that clear heat and eliminate toxins should be added to enhance the overall effects, such as *Zi Hua Di Ding* (Herba Violae), *Ma Bian Cao* (Herba Verbenae), and *Chuan Xin Lian* (Herba Andrographis).

Yin Qiao San, a formula that releases wind-heat, contains *Jing Jie Sui* (Spica Schizonepetae), an herb that releases wind-cold, for two very important reasons. First, it encourages the yang qi of the body to move outward to the *wei* (defensive) level to produce sweating, and thereby release the wind-heat factor. Second, most of the herbs in *Yin Qiao San* are cold, and thus may constrict the skin pores and trap the pathogenic factors inside. *Jing Jie Sui* (Spica Schizonepetae), a warm herb that releases mild wind-cold, promotes the expelling of wind-heat toxins; it also offsets the possible negative effects of the cold herbs. Although *Jing Jie Sui* (Spica Schizonepetae) belongs to the wind-cold releasing category and has a slightly warm property, it is a relatively mild herb, and, at a low dose, will not injure yin.

Sang Ju Yin (Mulberry Leaf and Chrysanthemum Decoction) and *Yin Qiao San* both clear heat, eliminate toxins, disperse wind-heat, and ventilate the Lung. Both are suitable for wind-heat invasion with fever and cough. The differences between the two formulas are as follows:

- *Sang Ju Yin* contains *Sang Ye* (Folium Mori), *Ju Hua* (Flos Chrysanthemi), and *Ku Xing Ren* (Semen Armeniacae Amarum). This formula ventilates the Lung and arrests cough associated with initial stages of wind-heat invasion.
- *Yin Qiao San* contains *Jin Yin Hua* (Flos Lonicerae Japonicae), *Jing Jie* (Herba Schizonepetae), *Dan Dou Chi* (Semen Sojae Praeparatum), *Niu Bang Zi* (Fructus Arctii), and *Zhu Ye* (Herba Phyllostachys). This formula eliminates toxins to treat *wen bing* (warm disease) conditions with chief manifestations of sore throat and fever.

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Ma Huang</i> (Herba Ephedrae)	12g [5-9g]
<i>Shi Gao</i> (Gypsum Fibrosum), <i>fen sui</i> (pulverized)	24g [18g]
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	50 kernels [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook *Ma Huang* (Herba Ephedrae) in 7 cups [1,400 mL] of water until it is reduced to 5 cups [1,000 mL]. Remove the foam from the top, add the other ingredients, and cook until the liquid reduces to 2 cups [400 mL]. Take 1 cup [200 mL] of the warm, strained decoction. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

- 1. Ventilates Lung qi
- 2. Clears Lung heat
- 3. Relieves cough and dyspnea

CLINICAL MANIFESTATIONS

Cough and dyspnea in Lung heat syndrome caused by exterior pathogenic factors: unremitting fever, thirst with

a desire to drink, rhinalgia, coughing, dyspnea, with or without perspiration, a thin, white or thin, yellow tongue coating, and a slippery, rapid pulse.

CLINICAL APPLICATIONS

Upper respiratory tract infection, acute bronchitis, chronic bronchitis, pneumonia, whooping cough, influenza, cough and dyspnea, asthma, bronchial asthma, acute tracheitis, fever, acute pharyngitis, nasosinusitis, measles, diphtheria, and hemorrhoids.

EXPLANATION

Ma Huang Xing Ren Gan Cao Shi Gao Tang (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction) is indicated for Lung heat syndrome characterized by cough and dyspnea. This syndrome can be caused by an exterior wind-heat factor directly invading the Lung, or by an

Má Huáng Xìng Rén Gān Cǎo Shí Gāo Tāng

(Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction)

Ma Huang Xing Ren Gan Cao Shi Gao Tang (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Cough and dyspnea in Lung heat syndrome	<ul style="list-style-type: none">• Coughing and dyspnea: heat affecting Lung qi circulation• Thirst with a desire to drink: heat damaging body fluids• Unremitting fever and rhinalgia: Lung heat• Thin, white or thin, yellow tongue coating: exterior heat• Rapid pulse: heat	<ul style="list-style-type: none">• Releases exterior factors• Clears Lung heat• Corrects reversed flow of Lung qi	<ul style="list-style-type: none">• <i>Ma Huang</i> (Herba Ephedrae) ventilates the Lung and directs Lung qi downward.• <i>Shi Gao</i> (Gypsum Fibrosum) clears Lung heat and restrains the warm property of <i>Ma Huang</i> (Herba Ephedrae).• <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) corrects the reversed flow of Lung qi to relieve cough and dyspnea.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) generates body fluids and relieves thirst.

exterior wind-cold factor constricting the Lung. Both situations can create stagnation in the Lung that later transforms into heat.

Unremitting fever and rhinalgia occur as a result of heat trapped in the Lung. Coughing and dyspnea are the result of heat disrupting the proper descending flow of Lung qi. Heat damages body fluids, leading to thirst with a desire to drink. Heat also forces fluids out of the body, causing perspiration. However, this condition cannot be relieved by perspiration because it is no longer at the exterior level. If the heat damages body fluids extensively, there will be no perspiration.

Ma Huang (Herba Ephedrae), the chief herb, ventilates the Lung and directs Lung qi downward. *Shi Gao* (Gypsum Fibrosum) is the deputy herb, yet its dose is double the amount of the chief herb for two key reasons: to sedate Lung heat, and to prevent the warm property of *Ma Huang* (Herba Ephedrae) from creating more heat. *Ku Xing Ren* (Semen Armeniacae Amarum) helps *Ma Huang* (Herba Ephedrae) to correct the reversed flow of Lung qi and relieve cough and dyspnea. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) helps *Shi Gao* (Gypsum Fibrosum) generate body fluids and relieve thirst. It also harmonizes the descending, dispersing, warm, and cold properties of all of the herbs in this formula.

MODIFICATIONS

- When there is more cough and dyspnea, add *Sang Bai Pi* (Cortex Mori) and *Di Gu Pi* (Cortex Lycii).
- For severe cough and dyspnea, add *Xie Bai San* (Drain the White Powder).
- If there is cough with sputum, add *Jie Geng* (Radix Platycodonis).

- If there is blood in the sputum, add *Bai Mao Gen* (Rhizoma Imperatae) and *Ce Bai Ye* (Cacumen Platycladi).
- For fever, accelerated respiration, a thin, yellow tongue coating, and a rapid pulse, add *Zi Su Ye* (Folium Perillae), *Sang Ye* (Folium Mori), *Di Long* (Pheretima) and *Sang Bai Pi* (Cortex Mori).
- If high fever is present, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae).
- If accompanied by edema of the face and ankles, add *Ting Li Zi* (Semen Descurainiae seu Lepidii) and *Che Qian Zi* (Semen Plantaginis).
- For thick, profuse and yellow sputum, add *Huang Qin* (Radix Scutellariae), *Gua Lou* (Fructus Trichosanthis), and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii).
- When there is chest pain, add *Gua Lou Pi* (Pericarpium Trichosanthis) and *Si Gua Luo* (Retinervus Luffae Fructus).
- For unerupted measles or erupted measles with fever, thirst, cough, and labored breathing, add *Da Qing Ye* (Folium Isatidis), *Huang Qin* (Radix Scutellariae), and *Lian Qiao* (Fructus Forsythiae).

CAUTIONS / CONTRAINDICATIONS

- *Ma Huang Xing Ren Gan Cao Shi Gao Tang* should be used with caution in the following situations: patients with Spleen and Stomach qi deficiencies; children and elderly patients with general weakness; or individuals convalescing from chronic illnesses. When the use of this formula is necessary in such patients, it should be modified by adding *Sang Bai Pi* (Cortex Mori) and reducing the dose of *Shi Gao* (Gypsum Fibrosum).
- This formula is contraindicated for cough or dyspnea caused by wind-cold invasion or deficiency.
- According to one report, continuous use of over 10 packs of this formula in decoction has been associated with occasional incidents of poor appetite and abdominal distention.¹

Má Huáng Xīng Rén Gān Cǎo Shí Gāo Tāng

(Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction)

PHARMACOLOGICAL EFFECTS

- 1. Antiasthmatic:** *Ma Huang Xing Ren Gan Cao Shi Gao Tang* demonstrated antiasthmatic effects to dilate the lung to treat asthma. The proposed mechanism of its antiasthmatic effects is its stimulation of beta2-adrenoceptors on bronchial smooth muscle and its anti-inflammatory ability to inhibit the neutrophil into the airway.² Though the individual component of *Ma Huang* (Herba Ephedrae) has effect to dilate the lung and treat cough and dyspnea, the effect is significantly less than the formula as a whole. It was pointed out that the maximum effect is achieved only when the four herbs are combined together. The stronger effect of the formula is attributed to the other three herbs, which not only help to treat the disorders, but also help to increase the extraction of ephedrine alkaloids by an additional 50%.³
- 2. Antitussive:** Administration of *Ma Huang Xing Ren Gan Cao Shi Gao Tang* was associated with marked antitussive effects in mice and dogs with artificially-induced cough.⁴
- 3. Effect on temperature regulation:** A group of rabbits with artificially-induced fever was divided into two groups to evaluate the effect of *Ma Huang Xing Ren Gan Cao Shi Gao Tang* on body temperature. Rabbits that received oral ingestion of the formula had an average of 1.27°C reduction of body temperature. Rabbits in the control group that did not receive any treatment had an average of 0.93°C increase of body temperature.⁵
- 4. Mast cell stabilizer:** Administration of *Ma Huang Xing Ren Gan Cao Shi Gao Tang* and *Xiao Feng San* (Eliminate Wind Powder) at 4-40 mcg/mL was found to inhibit IgE-dependent histamine released from mouse cultured mast cells.⁶

CLINICAL STUDIES AND RESEARCH

- 1. Acute bronchitis:** Use of *Ma Huang Xing Ren Gan Cao Shi Gao Tang* plus *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction) demonstrated a rate of effectiveness of 88% in treating acute bronchitis in 50 children. Additional modifications were made as deemed necessary. The herbs were cooked in water, and the resultant decoction (100 mL total) was taken in three to four equally-divided doses.⁷
- 2. Chronic bronchitis:** Use of modified *Ma Huang Xing Ren Gan Cao Shi Gao Tang* produced good results in treating individuals with chronic bronchitis. The herbal treatment contained this formula plus *Huang Qin* (Radix Scutellariae), *Ban Xia* (Rhizoma Pinelliae) and *Yu Jin* (Radix Curcumae) as the base formula, plus *Yu Xing Cao* (Herba Houttuyniae) and *Jin Yin Hua* (Flos Lonicerae Japonicae) for presence of phlegm and heat; *Da Huang* (Radix et Rhizoma Rhei) and *Gua Lou* (Fructus Trichosanthis) for constipation; *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for qi deficiency; and *Tai Zi Shen* (Radix Pseudostellariae) and *Mai Dong* (Radix Ophiopogonis) for damaged yin. Of 46 cases, the study reported significant improvement in 34 cases, improvement in 8 cases, and no effect in 4 cases.⁸
- 3. Pneumonia:** Use of *Ma Huang Xing Ren Gan Cao Shi Gao Tang* plus *Qing Dai* (Indigo Naturalis), *Huang Qin* (Radix Scutellariae) and others was associated with marked success in treating pneumonia in children. Modifications included addition of *Zi Su Zi* (Fructus Perillae), *Lai Fu Zi* (Semen Raphani) and *Di Long* (Pheretima) for hurried respiration with profuse sputum. The average duration of treatment was 6.2 days. Of 61 cases, the study reported complete recovery in 21 cases, near-recovery in 22 cases, improvement in 13 cases, and no effect in 5 cases.⁹ According to another study, use of *Ma Huang Xing Ren Gan Cao Shi Gao Tang* plus *Ting Li Zi* (Semen Descurainiae seu Lepidii), *Da Qing Ye* (Folium Isatidis) and others was associated with 98.22% effectiveness in treating pneumonia in 56 children.¹⁰ Lastly, 300 patients with pneumonia were treated with modified *Ma Huang Xing Ren Gan Cao Shi Gao Tang* with complete recovery in most patients within 2-3 days.¹¹
- 4. Whooping cough:** An effectiveness rate of 96.47% was reported for treating whooping cough using *Ma Huang Xing Ren Gan Cao Shi Gao Tang* plus *Bai Bu* (Radix Stemonae), *Ting Li Zi* (Semen Descurainiae seu Lepidii), *Da Zao* (Fructus Jujubae), and *Yi Tang* (Maltosum). The herbs were given in syrup form (10.5 g/mL) for 3-12 days. Of 228 patients, the study reported complete recovery in 195 patients and improvement in 25 patients.¹²
- 5. Upper respiratory tract infection:** Good results were reported in treating patients with upper respiratory tract infection using *Ma Huang Xing Ren Gan Cao Shi Gao Tang*. The study reported that 69.8% of patients had improvement of cough, 75.9% had reduction of sputum, and 78.3% had improvement of cough and dyspnea.¹³
- 6. Cough and dyspnea:** *Ma Huang Xing Ren Gan Cao Shi Gao Tang* plus *Ting Li Zi* (Semen Descurainiae seu Lepidii) and other herbs was effective in treating all 40 children with cough and dyspnea.¹⁴ Another study reported 93.75% effectiveness in treating bronchial cough and dyspnea in 80 children using *Ma Huang Xing Ren Gan Cao Shi Gao Tang* plus *Zao Jiao Ci* (Spina Gleditsiae), *Sang Bai Pi* (Cortex Mori) and others as needed.¹⁵ Lastly, use of *Ma Huang Xing Ren Gan Cao Shi Gao Tang* plus *Dan Nan Xing* (Arisaema cum Bile), *Qian Hu* (Radix Peucedani) and others was successful in treating 82 children with cough and dyspnea. The duration of treatment ranged from 10 to 13 days.¹⁶
- 7. Asthma:** Use of modified *Ma Huang Xing Ren Gan Cao Shi Gao Tang* produced marked results in treating asthma.

Má Huáng Xìng Rén Gān Cǎo Shí Gāo Tāng

(Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction)

Of 47 cases, the study reported complete recovery in 17 cases, significant improvement in 13 cases, moderate improvement in 11 cases, and no benefit in 6 cases. The average duration of herbal treatment was 34 days.¹⁷ In another study, use of modified *Ma Huang Xing Ren Gan Cao Shi Gao Tang* in 37 patients with asthma was associated with 91.9% effectiveness. The herbal treatment contained *Ma Huang Xing Ren Gan Cao Shi Gao Tang* plus *Yu Xing Cao* (*Herba Houottuyniae*), *Zi Su Zi* (*Fructus Perillae*) and others as the base formula. Furthermore, *Lai Fu Zi* (*Semen Raphani*), *She Gan* (*Rhizoma Belamcandae*) and *Di Long* (*Pheretima*) were added for severe asthma; *Huang Qin* (*Radix Scutellariae*) and *Tian Hua Fen* (*Radix Trichosanthis*) for heat; *Tian Zhu Huang* (*Concretio Silicea Bambusae*), *Dan Nan Xing* (*Arisaema cum Bile*) and *Zhu Ru* (*Caulis Bambusae in Taenia*) for phlegm; and *Sha Shen* (*Radix Glehniae seu Adenophorae*), *Mai Dong* (*Radix Ophiopogonis*) and *Yu Zhu* (*Rhizoma Polygonati Odorati*) for dry cough with little or no sputum.¹⁸

8. **Fever:** Use of modified *Ma Huang Xing Ren Gan Cao Shi Gao Tang* in decoction was effective in treating 40 children with fever caused by infection. The herbal treatment contained this formula plus *Jin Yin Hua* (*Flos Lonicerae Japonicae*), *Lian Qiao* (*Fructus Forsythiae*), and *Huang Qin* (*Radix Scutellariae*) for presence of heat and toxins; *Jie Geng* (*Radix Platycodonis*) for cough; and *Huang Lian* (*Rhizoma Coptidis*) for diarrhea. The study reported normal body temperature within 12 hours in 39 of 40 children.¹⁹ Another report pointed out that while this formula is effective in reducing fever, it does not address the infection itself. Therefore, herbs with antibiotic effects should be added to increase the effectiveness of the treatment.²⁰
9. **Acute pharyngitis:** One study involving 50 patients reported 94% effectiveness in treating acute pharyngitis using *Ma Huang Xing Ren Gan Cao Shi Gao Tang* plus *Ban Lan Gen* (*Radix Isatidis*), *Lian Qiao* (*Fructus Forsythiae*), and *Pu Gong Ying* (*Herba Taraxaci*).²¹
10. **Nasosinusitis:** In one study, 112 patients with acute nasosinusitis were treated with complete recovery in 90 patients, improvement in 19 patients, and no benefit in 3 patients. The overall rate of effectiveness was 97.4%. The herbal treatment contained *Ma Huang Xing Ren Gan Cao Shi Gao Tang* plus *Bai Zhi* (*Radix Angelicae Dahuricae*), *Cang Er Zi* (*Fructus Xanthii*), *Xin Yi Hua* (*Flos Magnoliae*), and others as needed. The duration of treatment ranged from 7-20 packs of herbs.²²

Jia Wei Ma Xing Gan Shi Tang (Augmented Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction) treats Lung disorder characterized by the presence of heat and phlegm, with symptoms and signs such as coughing, dyspnea, wheezing, chest distention and congestion, fever and yellow sputum. Clinical applications include asthma, pneumonia, pertussis, or respiratory tract infections with heat manifestations.

AUTHORS' COMMENTS

Ma Huang Xing Ren Gan Cao Shi Gao Tang is one of the most popular and effective formulas for treating any respiratory disorders, in which the main diagnostic criterion is interior Lung heat. However, this formula is not recommended in the initial stages of wind-heat invasion with thirst and cough. The improper use of this formula will encourage the pathogenic factors to move more quickly into the Lung, instead of lingering at the *wei* (defensive) level.

Many modern disorders are not as simple as the symptoms described for this formula. For this reason, it is important to recognize when and how the patterns are different and to modify the formula accordingly to treat the complications. Depending on each individual case, this formula can be prescribed singularly, or used as a base formula with the addition of other herbs from the phlegm-eliminating, heat-clearing, cough-arresting and others categories. Please see the Modifications section for details.

Má Huáng Xìng Rén Gān Cǎo Shí Gāo Tāng

(Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction)

Sang Ju Yin (Mulberry Leaf and Chrysanthemum Decoction) and *Ma Huang Xing Ren Gan Cao Shi Gao Tang* both arrest cough, but have the following differences:

- *Sang Ju Yin* is a mild formula that treats the initial attack of wind-heat manifesting in cough. Patients will not show severe symptoms, since the pathogenic factor still resides at the *wei* (defensive) level.
- *Ma Huang Xing Ren Gan Cao Shi Gao Tang* is a strong formula that clears and ventilates the Lung to arrest cough and dyspnea caused by Lung heat.

Da Qing Long Tang (Major Bluegreen Dragon Decoction) and *Ma Huang Xing Ren Gan Cao Shi Gao Tang* both expel the exterior and clear interior heat, but have the following differences:

- *Da Qing Long Tang*, derived from *Ma Huang Tang* (Ephedra Decoction) and has an increased dose of *Ma Huang* (Herba Ephedrae), strongly induces sweating. It is indicated for severe and acute wind-cold invasion at the exterior with moderate interior heat accumulation. Heat is trapped in the Lung and cannot be cleared as a result of the cold constriction at the exterior.
- *Ma Huang Xing Ren Gan Cao Shi Gao Tang* contains *Shi Gao* (Gypsum Fibrosum), which sedates excess Lung heat. This syndrome involves severe interior heat and a moderate exterior condition. In other words, wind-heat has progressed from the *wei* (defensive) level into the Lung and the *qi* (energy) level.

Ma Huang Xing Ren Gan Cao Shi Gao Tang and *Xie Bai San* (Drain the White Powder) both clear Lung heat to relieve cough and dyspnea, but have contrasting differences:

- *Ma Huang Xing Ren Gan Cao Shi Gao Tang* treats Lung heat syndrome following a wind-heat or wind-cold invasion. Besides addressing symptoms of cough and dyspnea, this formula also treats fever, thirst with a preference to drink, and a rapid, forceful pulse. It sedates Lung heat and ventilates Lung *qi* and primarily treats cases of excess pathogenic factors invading the Lung.
- *Xie Bai San* is designed for children who have hidden stagnant Lung heat that leads to *qi* reversal and gradual body fluid depletion. Aside from cough and dyspnea, accompanying symptoms include warm, steaming sensations on the skin, especially in the late afternoon, and a rapid, fine pulse. Because the *zang fu* organs in children are still tender, they are much more susceptible to damage. For this reason, the draining herbs in this formula, such as *Sang Bai Pi* (Cortex Mori), are milder in nature. *Di Gu Pi* (Cortex Lycii) clears deficiency heat, while *Geng Mi*

(Semen Oryzae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) strengthen the Spleen and Stomach (earth element) in order to promote the Lung (metal element). Together, the herbs clear heat without injuring yin, and sedate the Lung without injuring *zheng* (upright) *qi*. In short, *Xie Bai San* cools and nourishes the Lung, and is indicated for chronic cases of cough or dyspnea in yin-deficient patients.²³

Yuè Bì Tāng (Maidservant from Yue Decoction)

越婢湯 越婢汤

Pinyin Name: *Yue Bi Tang*

Literal Name: Maidservant from Yue Decoction

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Ma Huang</i> (Herba Ephedrae)	18g [9g]
<i>Shi Gao</i> (Gypsum Fibrosum)	24g [18g]
<i>Da Zao</i> (Fructus Jujubae)	15 pieces [5 pieces]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	9g [9g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g [5g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook *Ma Huang* (Herba Ephedrae) with 6 cups [1,200 mL] of water. Remove the foam from the top, add the other ingredients, and cook until the liquid is reduced to 3 cups [600 mL]. Take the warm decoction in three equally-divided doses. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Releases the exterior through diaphoresis
2. Eliminates water accumulation

CLINICAL MANIFESTATIONS

Wind at the exterior with water accumulation: generalized edema, aversion to wind, spontaneous sweating, absence of thirst, and a superficial pulse.

CLINICAL APPLICATIONS

Acute nephritis, edema due to nephritis, beriberi, rheumatoid arthritis, hydrocele, eczema, keratitis, and inguinal tinea.

EXPLANATION

Yue Bi Tang (Maidservant from Yue Decoction) treats wind at the exterior with water accumulation. Because of wind, there is spontaneous sweating, mild fever, aversion to wind, and a superficial pulse. Water accumulation at the exterior causes generalized edema throughout the body.

Ma Huang (Herba Ephedrae) releases the exterior, regulates water circulation, and relieves edema. *Shi Gao* (Gypsum Fibrosum) moderates the warm and acrid properties of *Ma Huang* (Herba Ephedrae). *Da Zao* (Fructus Jujubae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) harmonize

Yue Bi Tang (Maidservant from Yue Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Wind at the exterior with water accumulation	<ul style="list-style-type: none"> • Generalized edema: water accumulation at the exterior • Spontaneous sweating, mild fever, and aversion to wind: unresolved exterior wind condition • Superficial pulse: presence of exterior condition 	<ul style="list-style-type: none"> • Releases the exterior through diaphoresis • Eliminates water accumulation 	<ul style="list-style-type: none"> • <i>Ma Huang</i> (Herba Ephedrae) releases the exterior, regulates water circulation, and relieves edema. • <i>Shi Gao</i> (Gypsum Fibrosum) balances the warm and acrid properties of <i>Ma Huang</i> (Herba Ephedrae). • <i>Da Zao</i> (Fructus Jujubae) and <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) harmonize the <i>wei</i> (defensive) and <i>ying</i> (nutritive) levels, and prevent excessive loss of fluids through diaphoresis. • <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) disperses water accumulation from the muscles and exterior. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

Yuè Bì Tāng (Maid-servant from Yue Decoction)

the *wei* (defensive) and *ying* (nutritive) levels, and prevent the excessive loss of fluids through diaphoresis. *Sheng Jiang* (Rhizoma Zingiberis Recens) also helps *Ma Huang* (Herba Ephedrae) to disperse water accumulation from the muscles and exterior. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

MODIFICATIONS

- If there is dysuria, add *Fu Ling* (Poria) and *Fang Ji* (Radix Stephaniae Tetrandrae).
- For edema throughout the body, add *Yin Chen* (Herba Artemisiae Scopariae) and *Fang Feng* (Radix Saposhnikoviae).
- When there is irritability, thirst and dryness, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis).
- For cough and reversal of qi, add *Ban Xia* (Rhizoma Pinelliae).

RELATED FORMULA

Yuè Bì Jiā Zhú Tāng

(Maid-servant from Yue Decoction plus Atractylodes)

越婢加朮湯

越婢加朮汤

Pinyin Name: Yue Bi Jia Zhu Tang

Literal Name: Maid-servant from Yue Decoction plus Atractylodes

Alternate Names: Yueh Pi Chia Shu Tang, Yue Bi Jia Shu Tang, Spleen-Effusing plus Atractylodes Decoction, Atractylodes Combination

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

Ma Huang (Herba Ephedrae) 18g [9g]

Shi Gao (Gypsum Fibrosum) 24g [18g]

Sheng Jiang (Rhizoma Zingiberis Recens) 9g [9g]

Gan Cao (Radix et Rhizoma Glycyrrhizae) 6g [5g]

Da Zao (Fructus Jujubae) 15 pieces [5 pieces]

Bai Zhu (Rhizoma Atractylodis Macrocephalae) 12g [9g]

Yue Bi Jia Zhu Tang (Maid-servant from Yue Decoction plus Atractylodes) treats water accumulation with the following signs and symptoms: generalized swelling and edema, a yellowish skin appearance, and dysuria. This formula releases the exterior and regulates water circulation.

This formula is a direct modification of *Yue Bi Tang*, with the addition of *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), which strengthens the Spleen to regulate water and dry dampness. Overall, *Yue Bi Jia Zhu Tang* has a balanced exterior and interior approach to treating water accumulation, with *Yue Bi Tang* to release the exterior and induce diaphoresis, and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) to regulate water, dry dampness, and induce diuresis.

AUTHORS' COMMENTS

Ma Huang Xing Ren Gan Cao Shi Gao Tang (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction) and *Yue Bi Tang* both contain *Ma Huang* (Herba Ephedrae) and *Shi Gao* (Gypsum Fibrosum) to clear and ventilate the Lung.

- *Ma Huang Xing Ren Gan Cao Shi Gao Tang* strongly ventilates the Lung and clears heat to relieve cough, dyspnea, and wheezing.
- *Yue Bi Tang* effectively dispels water retention in the muscle level, because it contains a larger amount of *Ma Huang* (Herba Ephedrae), which, with the help of *Sheng Jiang* (Rhizoma Zingiberis Recens), expels water and reduces edema by inducing perspiration.

Shēng Má Gě Gēn Tāng (Cimicifuga and Kudzu Decoction)

升麻葛根湯 升麻葛根汤

Pinyin Name: *Sheng Ma Ge Gen Tang*
Literal Name: Cimicifuga and Kudzu Decoction
Alternate Names: *Sheng Ma Ke Ken Tang*, Cimicifuga and Pueraria Decoction, Cimicifuga and Pueraria Combination
Original Source: *Xiao Er Yao Zheng Zhi Jue* (Craft of Medicinal Treatment for Childhood Disease Patterns) by Qian Yi in 1119

COMPOSITION

<i>Sheng Ma</i> (Rhizoma Cimicifugae)	[3-9g]
<i>Ge Gen</i> (Radix Puerariae Lobatae), <i>cuo</i> (grated)	[3-9g]
<i>Chi Shao</i> (Radix Paeoniae Rubra)	[6g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), <i>cuo</i> (grated)	[3g]

Note: The original source text cites *Shao Yao* (Radix Paeonia), without specifying whether it is *Chi Shao* (Radix Paeoniae Rubra) or *Bai Shao* (Radix Paeoniae Alba). However, most clinicians agree that for purposes of treating measles (a disorder characterized by heat accumulation), *Chi Shao* (Radix Paeoniae Rubra) is a better choice, since it can clear heat and cool the blood. The use of *Bai Shao* (Radix Paeoniae Alba), sour in taste, carries the risk of retaining heat and toxins inside, and is therefore inappropriate under these circumstances.

DOSAGE / PREPARATION / ADMINISTRATION

Grind equal amounts of the ingredients into a fine powder. Cook 12g of the powder in 1.5 bowls of water until it is reduced to 1 bowl. Take the warm, strained decoction at any time during the day. Today, this formula may be prepared as a decoction with the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

- 1. Dispels pathogenic factors from the muscle layer
- 2. Promotes the eruption of measles

CLINICAL MANIFESTATIONS

Measles: early stage of measles before or soon after the initial eruption, fever, and headache.

CLINICAL APPLICATIONS

Measles, influenza, common cold, herpes zoster, scarlet fever, boils, and tonsillitis.

EXPLANATION

Sheng Ma Ge Gen Tang (Cimicifuga and Kudzu Decoction) treats early stage of measles before or soon after the initial eruption. According to the theories of traditional Chinese medicine, measles is a disorder characterized by the presence of epidemic toxins at the exterior and heat accumulation in the Lung and Stomach. Since the Lung opens to the skin and the Spleen [Stomach] controls the

Sheng Ma Ge Gen Tang (Cimicifuga and Kudzu Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Early stage of measles	<ul style="list-style-type: none">• Measles: heat accumulation in the Lung and Stomach affecting the muscle layer• Fever and headache: heat at the exterior	<ul style="list-style-type: none">• Dispels pathogenic factors from the muscle layer• Promotes the eruption of measles	<ul style="list-style-type: none">• <i>Sheng Ma</i> (Rhizoma Cimicifugae) assists the ascension of clear yang, clears heat, and promotes the eruption of measles.• <i>Ge Gen</i> (Radix Puerariae Lobatae) relieves exterior heat from the muscle layer, promotes the eruption of measles, and generates body fluids.• <i>Chi Shao</i> (Radix Paeoniae Rubra) clears heat and cools the blood.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

Shēng Má Gě Gēn Tāng (Cimicifuga and Kudzu Decoction)

muscles, the initial stage of measles involves faint marks underneath the skin in the muscles. The treatment strategy is to promote eruption and push the heat and toxins outward. For this reason, this formula uses herbs to relieve the exterior factors from the muscles, promote the eruption of measles, and clear heat and toxins.

Sheng Ma (Rhizoma Cimicifugae) assists the ascension of clear yang, clears heat, and promotes the eruption of measles. *Ge Gen* (Radix Puerariae Lobatae), the deputy herb, relieves exterior heat from the muscle layer, promotes the eruption of measles, and generates body fluids. *Chi Shao* (Radix Paeoniae Rubra) clears heat and cools the blood. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs and helps relieve aches and pains.

MODIFICATIONS

- For early stage of measles, add *Bo He* (Herba Menthae), *Jing Jie* (Herba Schizonepetae), *Chan Tui* (Periostracum Cicadae), *Niu Bang Zi* (Fructus Arctii), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *Lian Qiao* (Fructus Forsythiae).
- For incomplete eruption of measles that are dark red in color, add *Xuan Shen* (Radix Scrophulariae), *Mu Dan Pi* (Cortex Moutan), *Zi Cao* (Radix Arnebiae), and *Da Qing Ye* (Folium Isatidis).
- If there is severe headache, add *Chuan Xiong* (Rhizoma Chuanxiong) and *Bai Zhi* (Radix Angelicae Dahuricae).
- For stiffness and pain of the back, add *Fang Feng* (Radix Saposhnikoviae) and *Qiang Huo* (Rhizoma et Radix Notopterygii).
- When there is persistent fever, add *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae), and *Fang Feng* (Radix Saposhnikoviae).
- If accompanied by severe itching, add *Chan Tui* (Periostracum Cicadae) and *Fang Feng* (Radix Saposhnikoviae).
- For sore and swollen throat, add *Huang Qin* (Radix Scutellariae) and *Jie Geng* (Radix Platycodonis).
- With thirst and irritability, add *Zhu Ye* (Herba Phyllostachys) and *Lu Gen* (Rhizoma Phragmitis).

CAUTIONS / CONTRAINDICATIONS

Sheng Ma Ge Gen Tang has tendencies to move outward and upward, and is contraindicated in the following situations: if the measles are fully erupted; or if the measles have already erupted and the heat has invaded a deeper level, manifesting in symptoms of accelerated respiration, dyspnea, and cough.

CLINICAL STUDIES AND RESEARCH

1. **Herpes zoster:** Twenty patients with herpes zoster were treated with satisfactory results using *Sheng Ma Ge Gen Tang* plus *Zi Cao* (Radix Arnebiae). Symptoms that

showed clinical improvement included itching, pain, fever, aversion to cold, and disturbed sleep.¹

2. **Measles:** One study reported that use of *Sheng Ma Ge Gen Tang* for 8 days was associated with a marked inhibitory effect on measles virus. In addition, *Sheng Ma Ge Gen Tang* has a selective stimulation to the secretion of cytokine TNF-alpha.²

RELATED FORMULAS

Shēng Má Gě Gēn Tāng

(Cimicifuga and Kudzu Decoction)

升麻葛根湯

升麻葛根湯

Pinyin Name: *Sheng Ma Ge Gen Tang*

Literal Name: Cimicifuga and Kudzu Decoction

Original Source: *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas) by Wang Ang in 1682

<i>Sheng Ma</i> (Rhizoma Cimicifugae)	[4.5-13.5g]
<i>Ge Gen</i> (Radix Puerariae Lobatae)	[3-9g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	[3-9g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	[1.5-4.5g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	[1.5-4.5g]

This formula is designed to dispel wind, release the exterior, eliminate toxins, and promote the eruption of measles. It is generally used to treat early stage of measles before or soon after the initial eruption, with clinical manifestations of headache, dry nose, painful eyes, restless sleep, thirst, absence of perspiration, fever, and aversion to cold.

These two formulas have identical names, and very similar composition and functions.

- *Sheng Ma Ge Gen Tang* from *Xiao Er Yao Zheng Zhi Jue* (Craft of Medicinal Treatment for Childhood Disease Patterns) is a slightly cooler formula, as *Chi Shao* (Radix Paeoniae Rubra) is usually used to clear heat and cool the blood.
- *Sheng Ma Ge Gen Tang* from *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas) is a slightly warmer formula. It utilizes *Bai Shao* (Radix Paeoniae Alba) to harmonize *ying* (nutritive) level and *Sheng Jiang* (Rhizoma Zingiberis Recens) to release the exterior and balance the astringent effect of *Bai Shao* (Radix Paeoniae Alba).

<i>Fang Feng</i> (Radix Saposhnikoviae)	[3g]
<i>Bo He</i> (Herba Menthae)	[3g]
<i>Mu Tong</i> (Caulis Akebiae)	[3g]
<i>Lian Qiao</i> (Fructus Forsythiae)	[5g]
<i>Niu Bang Zi</i> (Fructus Arctii), <i>chao</i> (dry-fried)	[5g]
<i>Dan Zhu Ye</i> (Herba Lophatheri)	[2g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	[2g]

The source text states to prepare the ingredients as a decoction. Note: Doses of herbs are unavailable from the source text. Suggested doses are listed above in brackets.

Xuan Du Fa Biao Tang (Dissipate Toxins and Release the Exterior Decoction) is used at the beginning stage of measles to promote eruption; it releases the exterior, promotes the eruption of measles, stops coughing, and benefits the throat. *Sheng Ma* (Rhizoma Cimicifugae) and *Ge Gen* (Radix Puerariae Lobatae) clear heat and promote the eruption of measles. *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), *Niu Bang Zi* (Fructus Arctii) and *Bo He* (Herba Menthae) clear heat and release exterior factors from the muscle layer. *Zhi Qiao* (Fructus Aurantii), *Jie Geng* (Radix Platycodonis), *Ku Xing Ren* (Semen Armeniacae Amarum) and *Qian Hu* (Radix Peucedani) regulate Lung qi, dispel phlegm, and stop cough. *Lian Qiao* (Fructus Forsythiae) clears heat and

eliminates toxins from the upper *jiao*; *Mu Tong* (Caulis Akebiae) drains heat downward; while *Dan Zhu Ye* (Herba Lophatheri) clears heat and relieves irritability. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) eliminates toxins and harmonizes the herbs.

In comparison to *Sheng Ma Ge Gen Tang*, *Xuan Du Fa Biao Tang* more strongly vents the Lung, releases the exterior, clears heat, and eliminates toxins. Thus, *Xuan Du Fa Biao Tang* is used for individuals with early stage of measles with symptoms such as fever, no perspiration, cough, sore throat, irritability, thirst and dysuria.

AUTHORS' COMMENTS

Sheng Ma Ge Gen Tang is best for initial stages of measles with incomplete eruption, or absence of eruption due to heat trapped in the Lung and Stomach. This formula was originally used to treat smallpox. Today, however, its application has been extended to a wide variety of skin disorders, including measles, chickenpox, herpes simplex, and rashes.

To maximize the treatment results for skin disorders (e.g., measles, chickenpox, herpes simplex, and rashes), it is best to use herbs internally and topically. Internally, *Sheng Ma Ge Gen Tang* is given in decoction. Topically, *Xi He Liu* (Cacumen Tamaricis) or *Fu Ping* (Herba Spirodela) is often used as a bath soak; alternatively, the decoction may be applied directly to the skin to help open the pores and induce the toxins to move outward.

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to prepare the ingredients as a decoction. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Releases the exterior and promotes the eruption of measles
2. Clears and sedates the Lung and Stomach

CLINICAL MANIFESTATIONS

Measles that fail to erupt: cough, irritability, a feeling of oppression, restlessness, soreness and pain of the throat.

CLINICAL APPLICATIONS

Measles.

EXPLANATION

Zhu Ye Liu Bang Tang (Lophatherum, Tamarisk and Arctium Decoction) treats conditions in which the measles fail to erupt, and are complicated by wind-cold at the exterior and heat in the interior. Because the wind-cold factor constricts the exterior, the measles cannot erupt. Moreover, interior Lung and Stomach heat cannot be released because the exterior is constricted, producing symptoms of high fever, absence of perspiration, cough, restlessness, a feeling of oppression, and soreness and pain of the throat.

The treatment plan is to release wind-cold from the exterior, clear interior heat, and promote the eruption of measles. *Xi He Liu* (Cacumen Tamaricis), the chief herb, promotes the eruption of measles. *Niu Bang Zi* (Fructus Arctii) dispels wind-heat and eliminates toxins. *Jing Jie Sui* (Spica Schizonepetae) and *Ge Gen* (Radix Puerariae Lobatae) release the exterior to facilitate the eruption of measles. *Zhi Mu* (Rhizoma Anemarrhenae) and *Xuan Shen* (Radix Scrophulariae) clear heat and promote generation of fluids. *Dan Zhu Ye* (Herba Lophatheri) clears heat from the upper *jiao* to relieve irritability and restlessness. *Bo He* (Herba Menthae) dispels wind-heat. *Chan Tui* (Periostracum Cicadae) drains Lung heat. *Mai Dong* (Radix Ophiopogonis) clears heat and promotes generation of fluids. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

MODIFICATIONS

- If there is more heat in the interior, add *Shi Gao* (Gypsum Fibrosum) and *Geng Mi* (Semen Oryzae).
- When there is severe itching, add *Fang Feng* (Radix Saposhnikoviae) and increase the dose of *Chan Tui* (Periostracum Cicadae).

CAUTIONS / CONTRAINDICATIONS

Zhu Ye Liu Bang Tang has potent effects to release wind from the exterior and sedate heat in the interior. It should not be used for an extended period of time or at a large dose. Furthermore, it should be discontinued once the desired effects have been achieved.

Fibrosum) in 2 large bowls of water. Note: The herb doses are unavailable from the source text. Suggested doses are listed above in brackets.

CHINESE THERAPEUTIC ACTIONS
Clears heat and releases the muscles

CLINICAL MANIFESTATIONS
Wind-cold syndrome turning into heat: gradual decrease of aversion to cold with gradual increase of fever, headache, absence of perspiration, painful eyes and eye sockets, dry nose and throat, irritability, insomnia, a thin, yellow tongue coating, and a superficial and slightly surging pulse.

CLINICAL APPLICATIONS
Common cold and influenza, epidemic viral infection, upper respiratory tract infection, fever, high fever, tonsillitis, toothache, and trigeminal neuralgia.

EXPLANATION
Chai Ge Jie Ji Tang (Bupleurum and Kudzu Decoction to Release the Muscle Layer) treats the gradual transformation of *taiyang* wind-cold syndrome into *yangming* heat. Patients with the clinical manifestations described above generally start out with a wind-cold syndrome that, instead of being released, transforms into heat and moves into the interior. Since the *taiyang* syndrome is not resolved, symptoms such as headache, aversion to cold, absence of perspiration, and a superficial pulse remain. However, since heat is starting to form in the interior, patients may show irritability, insomnia, and a slightly surging pulse, which are all symptoms of *yangming* syndrome. Other

pathological symptoms of the Stomach and Large Intestine channels will manifest, including dry nose and throat, and painful eyes and eye sockets. The thin, yellow tongue coating suggests that the disease factor is transforming into heat.

The treatment approach is to release the muscles, and address *taiyang* and *yangming* syndromes concurrently. *Chai Hu* (Radix Bupleuri) and *Ge Gen* (Radix Puerariae Lobatae), the two chief herbs, dispel heat in the muscle layer and relieve various exterior symptoms. *Qiang Huo* (Rhizoma et Radix Notopterygii) enters the *taiyang* channel and *Bai Zhi* (Radix Angelicae Dahuricae) enters the *yangming* channel. Together, they dispel wind-cold, release the muscles, and relieve headache. *Huang Qin* (Radix Scutellariae) and *Shi Gao* (Gypsum Fibrosum) clear interior heat. *Jie Geng* (Radix Platycodonis) ventilates the Lung to dispel exterior factors. *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonize the *ying* (nutritive) level and prevent the drying herbs from damaging yin. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) harmonize the *ying* (nutritive) and *wei* (defensive) levels, as well as the exterior and interior. Since *Qiang Huo* (Rhizoma et Radix Notopterygii) enters the *taiyang* channel and *Ge Gen* (Radix Puerariae Lobatae) enters the *yangming* channel, there is no need to select additional guiding herbs.

Since this formula was developed by Dr. Tao, it is also referred to as *Tao's Chai Ge Jie Ji Tang* (Tao's Bupleurum

Chai Ge Jie Ji Tang (Bupleurum and Kudzu Decoction to Release the Muscle Layer)

Diagnosis	Signs and Symptoms	Treatment	Herbs

Chái Gě Jiě Jī Tāng

(Bupleurum and Kudzu Decoction to Release the Muscle Layer)

and Kudzu Decoction to Release the Muscle Layer) to avoid confusion with *Cheng's Chai Ge Jie Ji Tang* (Cheng's Bupleurum and Kudzu Decoction to Release the Muscle Layer), discussed below in the Related Formula section.

MODIFICATIONS

- For headache caused by wind-cold, add *Fang Feng* (Radix Saposhnikoviae) and *Chuan Xiong* (Rhizoma Chuanxiong).
- If there is cough accompanied by sticky sputum, add *Gua Lou Zi* (Semen Trichosanthis) and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae).
- With thirst, dry mouth and throat caused by heat drying body fluids, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Tian Hua Fen* (Radix Trichosanthis).
- For vomiting and excessive amount of saliva and sputum, add *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria).

CAUTIONS / CONTRAINDICATIONS

- *Chai Ge Jie Ji Tang* is not suitable if the exterior cold has not moved into the deeper levels, and there is no interior heat. If this formula is used while the wind-cold factor is still at the superficial *taiyang* level, the disease will be encouraged to move into the deeper level and give rise to complications and deterioration.
- Do not use this formula if the heat has already attacked the *yangming* organs, producing symptoms such as abdominal pain and constipation.
- Avoid acrid, spicy, oily or greasy foods while taking this formula.¹

CLINICAL STUDIES AND RESEARCH

1. **Epidemic viral infection:** Patients with epidemic viral infection were evaluated and treated with modified *Chai Ge Jie Ji Tang* with good results. Out of 393 patients, 240 had fever between 38-38.9°C / 100.4-102°F, 153 had fever between 39-40.5°C / 102.2-104.9°F; 188 were diagnosed as wind-cold, and 120 were diagnosed as wind-heat. The study reported that 48 hours after the treatment the temperature returned to normal in 378 cases (90%), with 95.2% effectiveness in the wind-cold group and 95.1% in the wind-heat group.²
2. **Upper respiratory tract infection:** In one study, 109 patients with upper respiratory tract infection were treated with *Chai Ge Jie Ji Tang* for 1-6 packs of herbs with complete recovery in all cases.³
3. **Fever:** Use of modified *Chai Ge Jie Ji Tang* in decoction was associated with 99.3% effectiveness in reducing body temperature in 874 infants and children (383 males and 491 females), all under 10 years of age, with fever of 38-40°C / 100.4-104°F and higher. The herbal treatment contained *Chai Hu* (Radix Bupleuri), *Ge Gen*

(Radix Puerariae Lobatae), *Huang Qin* (Radix Scutellariae), *Qiang Huo* (Rhizoma et Radix Notopterygii), *Bai Zhi* (Radix Angelicae Dahuricae), *Bai Shao* (Radix Paeoniae Alba), *Jie Geng* (Radix Platycodonis), *Di Gu Pi* (Cortex Lycii), *Shi Gao* (Gypsum Fibrosum), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). *Gua Lou Pi* (Pericarpium Trichosanthis) and *Sang Bai Pi* (Cortex Mori) were added for cough; *Shan Dou Gen* (Radix et Rhizoma Sophorae Tonkinensis) and *Ban Lan Gen* (Radix Isatidis) for sore throat; *Bing Lang* (Semen Arecae) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) for food stagnation; *Huang Lian* (Rhizoma Coptidis) and *Che Qian Zi* (Semen Plantaginis) for diarrhea; and *Da Huang* (Radix et Rhizoma Rhei) and *Ku Xing Ren* (Semen Armeniacae Amarum) for dry stools. Of 874 patients, the study reported normalization of body temperature within one day in 492 patients, within 2 days in 277 patients, within 3 days in 99 patients, and no benefit in 6 patients.⁴

4. **High fever:** One hundred and ten patients with high fever were successfully treated with modified *Chai Ge Jie Ji Tang*. The herbal formula contained *Chai Hu* (Radix Bupleuri) 18g, *Ge Gen* (Radix Puerariae Lobatae) 20g, *Huang Qin* (Radix Scutellariae) 12g, *Qiang Huo* (Rhizoma et Radix Notopterygii) 10g, *Bai Zhi* (Radix Angelicae Dahuricae) 10g, *Jie Geng* (Radix Platycodonis) 10g, *Shi Gao* (Gypsum Fibrosum) 30g, *Bai Shao* (Radix Paeoniae Alba) 10g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 3 slices, and *Da Zao* (Fructus Jujubae) 2 pieces. The treatment protocol was to cook the herbs in 900 mL of water for 20 minutes to yield 500 mL of decoction, which was administered in three equally-divided doses within half a day. This entire process may be repeated up to three times (3 packs of herbs) per day if needed to induce perspiration and normalization of body temperature. Patients were instructed to avoid cold, raw, oily or greasy foods. Of 110 patients, the study reported normalization of body temperature in 37 patients after 1-2 packs of herbs, in 52 patients after 2-4 packs of herbs, and in 21 patients after 4-6 packs of herbs.⁵
5. **Tonsillitis:** Use of modified *Chai Ge Jie Ji Tang* to treat 48 patients with acute suppurative tonsillitis was associated with 95.8% effectiveness. The herbal treatment contained *Chai Hu* (Radix Bupleuri) 10g, *Bai Zhi* (Radix Angelicae Dahuricae) 10g, *Qiang Huo* (Rhizoma et Radix Notopterygii) 10g, *Huang Qin* (Radix Scutellariae) 10g, *Long Kui* (Herba Solanum Nigrum) 10g, *Bo He* (Herba Menthae) 10g (post-decocted), *Jie Geng* (Radix Platycodonis) 10g, *Ge Gen* (Radix Puerariae Lobatae) 15g, *He Ye* (Folium Nelumbinis) 15g, *Shi Gao* (Gypsum Fibrosum) 60g (pre-decocted), *Ma Bo* (Lasiosphaera seu Calvatia) 6g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g. The herbs

Chái Gě Jiě Jī Tāng

(Bupleurum and Kudzu Decoction to Release the Muscle Layer)

were given in decoction one time daily, for 3 packs of herbs per course of treatment. Of 48 cases, the study reported complete recovery in 17 cases, significant improvement in 29 cases, and no effect in 2 cases.⁶

RELATED FORMULA

Chái Gě Jiě Jī Tāng (Bupleurum and Kudzu Decoction to Release the Muscle Layer)

柴葛解肌湯
柴葛解肌汤

Pinyin Name: *Chai Ge Jie Ji Tang*

Literal Name: Bupleurum and Kudzu Decoction to Release the Muscle Layer

Alternate Name: *Cheng's Chai Ge Jie Ji Tang* (Cheng's Bupleurum and Kudzu Decoction to Release the Muscle Layer)

Original Source: *Yi Xue Xin Wu* (Medical Revelations) by Cheng Guo-Peng in 1732

<i>Chai Hu</i> (Radix Bupleuri)	3.6g [6g]
<i>Ge Gen</i> (Radix Puerariae Lobatae)	4.5g [9g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	1.5g [3g]
<i>Chi Shao</i> (Radix Paeoniae Rubra)	3g [6g]
<i>Huang Qin</i> (Radix Scutellariae)	4.5g [6g]
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	3g [5g]
<i>Di Huang</i> (Radix Rehmanniae)	6g [9g]
<i>Mu Dan Pi</i> (Cortex Moutan)	4.5g [3g]
<i>Bei Mu</i> (Bulbus Fritillariae)	3g [6g]

Note: The original source text cites *Shao Yao* (Radix Paeonia), without specifying whether it is *Chi Shao* (Radix Paeoniae Rubra) or *Bai Shao* (Radix Paeoniae Alba). However, most clinicians agree that *Chi Shao* (Radix Paeoniae Rubra) is more appropriate in this formula than *Bai Shao* (Radix Paeoniae Alba), since *Chi Shao* (Radix Paeoniae Rubra) can clear heat and cool the blood. The use of *Bai Shao* (Radix Paeoniae Alba), sour in taste, carries the risk of retaining heat and toxins inside, and is therefore inappropriate under these circumstances.

The source text states to prepare the ingredients as a decoction; and add 10 leaves of *Dan Zhu Ye* (Herba Lophatheri) for patients who exhibit irritability, and 9-18g of *Shi Gao* (Gypsum Fibrosum) for patients with incoherent speech. Today, this formula may be prepared as a decoction with the doses suggested in brackets above.

This formula treats exterior wind-cold that has turned into heat in the muscle layer and the interior. This syndrome is seen mostly in late spring and early summer when the

weather starts to warm up. Clinically, patients may show fever, thirst, headache, and no aversion to cold.

Optimal treatment requires the use of herbs to release the exterior and clear the interior concurrently. *Chai Hu* (Radix Bupleuri) and *Ge Gen* (Radix Puerariae Lobatae) release the exterior and clear heat from the muscles. *Zhi Mu* (Rhizoma Anemarrhenae), *Huang Qin* (Radix Scutellariae), and *Bei Mu* (Bulbus Fritillariae) clear heat from the *qi* (energy) level. *Mu Dan Pi* (Cortex Moutan), *Di Huang* (Radix Rehmanniae), and *Chi Shao* (Radix Paeoniae Rubra) clear heat from the *xue* (blood) level. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

These two formulas have identical names, but they are derived from different sources and have slightly different compositions and applications. Their differences are as follows:

- *Chai Ge Jie Ji Tang* from *Shang Han Liu Shu* (Six Texts on Cold-Induced Disorders) by Tao Hua has a focus on relieving the muscles. It has more exterior-releasing and muscle-relieving herbs than heat-clearing herbs.
- *Chai Ge Jie Ji Tang* from *Yi Xue Xin Wu* (Medical Revelations) by Cheng Guo-Peng emphasizes heat-clearing, rather than exterior-releasing or muscle-relieving actions. Thirst, rather than aversion to cold or aversion to wind, is the prominent symptom.

AUTHORS' COMMENTS

Chai Ge Jie Ji Tang from *Shang Han Liu Shu* (Six Texts on Cold-Induced Disorders) is the representative formula for treating lingering wind-cold that has moved to the interior, causing heat and affecting both *taiyang* and *yangming*. With more severe interior heat and less exterior cold, patients will show key symptoms of high fever with less aversion to cold, headache, body aches, orbital pain, dry nose, and a superficial and slightly surging pulse.

Gui Zhi Tang (Cinnamon Twig Decoction) and *Chai Ge Jie Ji Tang* are two representative formulas to relieve muscle aches and pains associated with external pathogenic invasion.

- *Gui Zhi Tang* is indicated for pain caused by wind-cold invasion.
- *Chai Ge Jie Ji Tang* is indicated for wind-cold invasion turning into heat that accumulates in the *yangming* channel.

DOSAGE / PREPARATION / ADMINISTRATION

Prepare the ingredients as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Dispels wind and releases the exterior
2. Clears the Lung and purges heat

CLINICAL MANIFESTATIONS

Early stage of wind-warmth syndrome: headache, fever, aversion to cold, slight aversion to wind, coughing, sore throat, thirst, a red tongue tip with a thin, white tongue coating, and a superficial, rapid pulse.

CLINICAL APPLICATIONS

Common cold and influenza.

EXPLANATION

Cong Chi Jie Geng Tang (Scallion, Prepared Soybean, and

Platycodon Decoction) is designed to treat the early stage of wind-warmth syndrome. Headache, fever, aversion to cold, and slight aversion to wind are the results of wind-warmth invading the exterior. Coughing, thirst, and sore throat are the results of wind-warmth affecting the Lung functioning.

Cong Bai (Bulbus Allii Fistulosi) activates yang and qi circulation. It is combined with *Dan Dou Chi* (Semen Sojae Praeparatum) to induce diaphoresis and release exterior symptoms. *Bo He* (Herba Menthae) dispels the exterior wind-warmth factor. *Jie Geng* (Radix Platycodonis) ventilates the Lung to regulate Lung qi. *Lian Qiao* (Fructus Forsythiae) clears heat in the upper jiao. *Zhi Zi* (Fructus Gardeniae) clears Lung and Heart heat. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Jie Geng* (Radix Platycodonis) soothe the throat and relieve throat pain. *Dan Zhu Ye* (Herba Lophatheri) clears heat.

MODIFICATIONS

- For more severe soreness and pain of the throat, add *Da Qing Ye* (Folium Isatidis).
- With cough and profuse sputum, add *Ku Xing Ren* (Semen Armeniacae Amarum) and *Ju Hong* (Exocarpium Citri Reticulatae).
- If there is a feeling of chest oppression, remove *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and add *Zhi Qiao* (Fructus Aurantii) and *Dou Kou* (Fructus Amomi Rotundus).

CAUTIONS / CONTRAINDICATIONS

Cong Chi Jie Geng Tang should be used with caution in cases of wind-warmth conditions involving symptoms of fever and perspiration. In such conditions, *Cong Bai* (Bulbus Allii Fistulosi) and *Dan Dou Chi* (Semen Sojae Praeparatum) should be removed.

RELATED FORMULAS

Cōng Chǐ Tāng
(Scallion and Prepared Soybean Decoction)
葱鼓湯
葱鼓汤
Pinyin Name: *Cong Chi Tang*
Literal Name: Scallion and Prepared Soybean Decoction
Original Source: *Zhou Hou Bei Ji Fang* (Emergency Formulas to Keep Up One's Sleeve) by Ge Hong in 341 A.D.

Cong Bai (Bulbus Allii Fistulosi) 1 handful [3 stalks]
Dan Dou Chi (Semen Sojae Praeparatum) 1 cup [6g]

The source text states to cook the ingredients with 3 cups [600 mL] of water until the liquid is reduced to 1 cup [200 mL]. Take the strained decoction immediately. If the patient does not sweat after taking the decoction, administer the formula again with the addition of *Ge Gen* (Radix Puerariae Lobatae) 6g and *Sheng Ma* (Rhizoma Cimicifugae) 6g. Decoct the herbs with 5 cups [1,000 mL] of water until the liquid is reduced to 2 cups [400 mL]. If the patient still does not sweat after taking this decoction, add *Ma Huang* (Herba Ephedrae) 6g, and administer the decoction again. Today, this formula may be prepared as a decoction with the doses suggested in brackets above.

Cong Chi Tang (Scallion and Prepared Soybean Decoction) treats early onset of a mild exterior syndrome through diaphoresis. Clinically, patients may show fever, aversion to cold, absence of perspiration, headache, stuffy or running nose, and sneezing.

This is a mild exterior-releasing formula. It has no cautions or contraindications, and is therefore suitable for most people with exterior syndromes.

Huó Rén Cōng Chǐ Tāng (Scallion and Prepared Soybean Decoction from the Book to Safeguard Life)
活人葱鼓湯
活人葱鼓汤
Pinyin Name: *Huo Ren Cong Chi Tang*

Cōng Chǐ Jí Gěng Tāng

(Scallion, Prepared Soybean, and Platycodon Decoction)

Literal Name: Scallion and Prepared Soybean Decoction from the Book to Safeguard Life

Original Source: *Lei Zheng Huo Ren Shu* (Book to Safeguard Life Arranged According to Pattern) by Zhu Gong in 1108

<i>Cong Bai</i> (Bulbus Allii Fistulosi)	15 stalks [3g]
<i>Dan Dou Chi</i> (Semen Sojae Praeparatum)	2 large cups [6g]
<i>Ma Huang</i> (Herba Ephedrae)	1.2g [3g]
<i>Ge Gen</i> (Radix Puerariae Lobatae)	2.4g [6g]

The source text states to cook *Ma Huang* (Herba Ephedrae) first with 2 cups [400 mL] of water, and bring it to a boil 6 or 7 times. Remove the foam from the top, add *Ge Gen* (Radix Puerariae Lobatae), and bring to a boil 20 times or more. Finally, add *Dan Dou Chi* (Semen Sojae Praeparatum) and cook until the liquid is reduced to 0.8 cup [160 mL]. Take the warm, strained decoction in two equally-divided doses twice daily. To effectively promote sweating, prepare this formula with porridge

and administer while warm to induce sweating. Today, this formula may be prepared as a decoction with the doses suggested in brackets above.

Huo Ren Cong Chi Tang (Scallion and Prepared Soybean Decoction from the Book to Safeguard Life) has a stronger exterior-releasing action, and is mainly used for treating exterior wind-cold syndrome that is one to two days past the initial onset. Clinically, patients will show headache, neck stiffness, back pain, aversion to cold, absence of perspiration, and a tight pulse.

AUTHORS' COMMENTS

Sang Ju Yin (Mulberry Leaf and Chrysanthemum Decoction) and *Cong Chi Jie Geng Tang* both treat early stages of wind-warmth.

- *Sang Ju Yin* ventilates Lung qi and relieves cough, and is more suitable for mild cases of wind-warmth.
- *Cong Chi Jie Geng Tang* clears the Lung and purges heat, and is more appropriate for moderate cases of wind-warmth invasion.

Níng Sòu Wán (Quiet the Cough Pill)

寧嗽丸

宁嗽丸

Pinyin Name: *Ning Sou Wan*

Literal Name: Quiet the Cough Pill

Alternate Names: Cough-Stopping Pill, Fritillaria and Platycodon Formula

Original Source: *Zhong Guo Guo Yao Gu You Cheng Fang Xuan Ji* (A Selection of Traditional Prescriptions of Chinese Medicine) by the Chinese Herbal Medicine Committee of the Ministry of the Interior in 1967

COMPOSITION

<i>Zi Su Zi</i> (Fructus Perillae)	60g
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	45g
<i>Jie Geng</i> (Radix Platycodonis)	60g
<i>Ban Xia</i> (Rhizoma Pinelliae), zhi (prepared)	60g
<i>Chuan Bei Mu</i> (Bulbus Fritillariae Cirrhosae)	60g
<i>Ju Hong</i> (Exocarpium Citri Reticulatae)	30g
<i>Bo He</i> (Herba Menthae)	45g
<i>Fu Ling</i> (Poria)	60g
<i>Gu Ya</i> (Fructus Setariae Germinatus)	30g
<i>Sang Bai Pi</i> (Cortex Mori)	45g
<i>Shi Hu</i> (Caulis Dendrobii)	60g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	15g

Níng Sòu Wán (Quiet the Cough Pill)

DOSAGE / PREPARATION / ADMINISTRATION

First cook *Sang Bai Pi* (Cortex Mori) and *Shi Hu* (Caulis Dendrobii) in water to obtain a decoction. Grind the rest of the ingredients into a fine powder. Mix the decoction and the powder together to form pills, which should resemble *Lu Dou* (Semen Phaseoli Radiati) in size. Take 4.5g of pills twice daily with warm water.

CHINESE THERAPEUTIC ACTIONS

- 1. Clears the Lung and disperses stagnation
- 2. Dissolves phlegm and relieves cough

CLINICAL MANIFESTATIONS

Exterior wind-heat: nasal obstruction, nasal discharge, headache, fever, cough with sputum, wheezing and dyspnea, sneezing, and aversion to wind.

CLINICAL APPLICATIONS

Cough, common cold with cough and phlegm, tracheitis, cough from acute and chronic bronchitis.

EXPLANATION

Ning Sou Wan (Quiet the Cough Pill) treats cases of exterior wind-heat attacking the body, with chief complaints of cough with sputum and fever. Since wind-heat can interfere with the normal functions of the Lung, symptoms and signs usually include cough, wheezing, dyspnea, nasal obstruction, nasal discharge, and headache.

Many herbs in this formula have distinct effects to dispel phlegm, clear the Lung, and arrest coughing; such herbs

include *Zi Su Zi* (Fructus Perillae), *Ku Xing Ren* (Semen Armeniacae Amarum), *Jie Geng* (Radix Platycodonis), *Ban Xia* (Rhizoma Pinelliae), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), and *Ju Hong* (Exocarpium Citri Reticulatae). *Bo He* (Herba Menthae) dispels exterior wind-heat. Its cooling property also helps restrict the other warm herbs from creating heat in the body. *Fu Ling* (Poria) and *Gu Ya* (Fructus Setariae Germinatus) strengthen the Spleen, transform water, and prevent further formation of dampness and phlegm. *Sang Bai Pi* (Cortex Mori) promotes urination and drains dampness from the body. *Shi Hu* (Caulis Dendrobii) moistens the Lung, relieves cough, and prevents the phlegm-eliminating herbs from injuring yin. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the entire formula.

MODIFICATIONS

- For cough caused by common cold and influenza, add *Hua Gai San* (Canopy Powder).
- For cough caused by Lung heat, add *Xie Bai San* (Drain the White Powder).
- For cough caused by phlegm, add *Er Chen Tang* (Two-Cured Decoction).
- If there is a dry throat and thirst, add *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).

Dùn Sòu Sǎn (Long-Bout Cough Powder)

頓嗽散 頓嗽散

Pinyin Name: *Dun Sou San*
Literal Name: Long-Bout Cough Powder
Alternate Name: Morus and Platycodon Formula
Original Source: *Yan Fang* (Time-Tested Formulas) of unknown author and date

COMPOSITION

<i>Chai Hu</i> (Radix Bupleuri)	15g
<i>Huang Qin</i> (Radix Scutellariae)	9g
<i>Sang Bai Pi</i> (Cortex Mori)	9g
<i>Jie Geng</i> (Radix Platycodonis)	9g
<i>Zhi Zi</i> (Fructus Gardeniae)	7.5g
<i>Shi Gao</i> (Gypsum Fibrosum)	15g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	3g

DOSAGE / PREPARATION / ADMINISTRATION

EXPLANATION

This formula is taken on an empty stomach with warm water.

Dun Sou San (Long-Bout Cough Powder) treats cough caused by heat. This formula uses *Chai Hu* (Radix Bupleuri) and *Huang Qin* (Radix Scutellariae) to clear heat from the chest to relieve the stifling sensation or the feeling of oppression and congestion. *Sang Bai Pi* (Cortex Mori) and *Jie Geng* (Radix Platycodonis) dissolve phlegm and relieve coughing. *Zhi Zi* (Fructus Gardeniae) clears heat from the Lung to relieve irritability. *Shi Gao* (Gypsum Fibrosum) clears heat from the Lung and lowers fever. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonifies qi and harmonizes the formula.

CHINESE THERAPEUTIC ACTIONS

- 1. Arrests cough
- 2. Clears heat and dissolves phlegm

CLINICAL MANIFESTATIONS

Cough caused by heat: persistent or violent cough, cough with or without sputum.

CLINICAL APPLICATIONS

Cough, whooping cough, cough from common cold, influenza, or bronchitis.

AUTHORS' COMMENTS

Dun Sou San was originally developed in Japan for treating cough. Clinically, it treats cough secondary to pulmonary infections, such as common cold, bronchitis, or pertussis.

Dun Sou San (Long-Bout Cough Powder)

Zhǐ Sòu Sǎn (Stop Coughing Powder)

止嗽散

Pinyin Name: *Zhi Sou San*

Literal Name: Stop Coughing Powder

Alternate Names: *Chih Sou San*, Cough-Stopping Powder, Platycodon and Schizonepeta Formula, Citrus and Apricot Seed Formula

Original Source: *Yi Xue Xin Wu* (Medical Revelations) by Cheng Guo-Peng in 1732

COMPOSITION

<i>Zi Wan</i> (Radix et Rhizoma Asteris), <i>zheng</i> (steamed)	1,000g [9g]
<i>Bai Qian</i> (Rhizoma et Radix Cynanchi Stauntonii), <i>zheng</i> (steamed)	1,000g [9g]
<i>Bai Bu</i> (Radix Stemonae), <i>zheng</i> (steamed)	1,000g [9g]
<i>Jie Geng</i> (Radix Platycodonis), <i>chao</i> (dry-fried)	1,000g [9g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	500g [9g]
<i>Jing Jie</i> (Herba Schizonepetae)	1,000g [9g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae), <i>chao</i> (dry-fried)	375g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to grind the ingredients into powder. Take 9g of the powder with boiled water after meals and before bedtime. This formula may be taken with a decoction of *Sheng Jiang* (Rhizoma Zingiberis Recens) if there are external wind-cold symptoms present. Today, this formula is generally administered by giving 6g of the powdered herbs with warm, boiled water or a decoction of *Sheng Jiang* (Rhizoma Zingiberis Recens). This formula may also be prepared as a decoction with the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

1. Stops coughing and dissolves phlegm
2. Releases exterior factors and ventilates the Lung

CLINICAL MANIFESTATIONS

Wind invading the Lung: coughing, itchy throat, mild fever, aversion to cold, and a thin, white tongue coating.

CLINICAL APPLICATIONS

Cough, whooping cough, cough with exterior condition, respiratory tract infection, acute bronchitis, chronic bronchitis, interstitial pneumonia, and chronic prostatitis.

EXPLANATION

Zhi Sou San (Stop Coughing Powder) treats persistent coughing that cannot be alleviated after the administration of exterior-releasing herbs. In this situation, the exterior symptoms, such as headache, fever, aversion to cold, will be mostly resolved by the exterior-releasing method, but the abnormal Lung qi flow persists.

The treatment approach for this syndrome places more emphasis on arresting the cough, and less on releasing the exterior. *Zi Wan* (Radix et Rhizoma Asteris), *Bai Qian* (Rhizoma et Radix Cynanchi Stauntonii), and *Bai Bu* (Radix Stemonae) dissolve phlegm and stop cough. These three herbs have excellent synergistic effects to treat both

Wind invading the Lung	<ul style="list-style-type: none"> • Coughing and itchy throat: obstruction of Lung qi circulation • Headache, fever, and aversion to cold: exterior wind 	<ul style="list-style-type: none"> • Stops coughing and dissolves phlegm • Releases exterior factors and ventilates the Lung 	<ul style="list-style-type: none"> • <i>Zi Wan</i> (Radix et Rhizoma Asteris), <i>Bai Qian</i> (Rhizoma et Radix Cynanchi Stauntonii) and <i>Bai Bu</i> (Radix Stemonae) dissolve phlegm and stop cough. • <i>Jie Geng</i> (Radix Platycodonis) and <i>Chen Pi</i> (Pericarpium Citri Reticulatae) ventilate the Lung, cause the Lung qi to descend, and dissolve phlegm. • <i>Jing Jie</i> (Herba Schizonepetae) expels wind and relieves exterior symptoms. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

Zhǐ Sòu Sǎn (Stop Coughing Powder)

acute and chronic cough. *Jie Geng* (Radix Platycodonis) and *Chen Pi* (Pericarpium Citri Reticulatae) ventilate the Lung, cause the Lung qi to descend, and dissolve phlegm. *Jing Jie* (Herba Schizonepetae) expels wind and relieves exterior symptoms. *Gan Cao* (Radix et Rhizoma Glycyrrhizae), besides harmonizing all of the herbs, works with *Jie Geng* (Radix Platycodonis) to relieve itchy throat.

MODIFICATIONS

- For cough caused by wind-heat, add *Sang Ye* (Folium Mori), *Ju Hua* (Flos Chrysanthemi), and *Bo He* (Herba Menthae).
- For cough with white sputum caused by a wind-cold invasion, add *Zi Su Ye* (Folium Perillae), *Fang Feng* (Radix Saposhnikoviae), and *Ku Xing Ren* (Semen Armeniacae Amarum).
- For dry cough with absence of sputum because of Lung dryness, add *Gua Lou* (Fructus Trichosanthis), *Bei Mu* (Bulbus Fritillariae), and *Zhi Mu* (Rhizoma Anemarrhenae).
- For dry cough with a sore throat, add *Sang Ye* (Folium Mori), *Sha Shen* (Radix Glehniae seu Adenophorae), and *She Gan* (Rhizoma Belamcandae).
- For cough and a greasy tongue coating caused by summer-dampness, add *Huo Xiang* (Herba Agastaches), *Pei Lan* (Herba Eupatorii), and *Xiang Ru* (Herba Moslae).
- For cough with profuse sputum, add *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria).
- For cough with profuse sputum and a stifling sensation in the chest due to phlegm-damp obstruction, add *Ban Xia* (Rhizoma Pinelliae), *Fu Ling* (Poria), and *Chen Pi* (Pericarpium Citri Reticulatae).
- For cough and fever in children, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Niu Bang Zi* (Fructus Arctii), *Huang Qin* (Radix Scutellariae), *Zi Su Zi* (Fructus Perillae), *Ku Xing Ren* (Semen Armeniacae Amarum), and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae).
- If there are more exterior symptoms, add *Fang Feng* (Radix Saposhnikoviae), *Zi Su Ye* (Folium Perillae), and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- With thirst, irritability, and dark yellow urine caused by interior heat, add *Zhi Zi* (Fructus Gardeniae), *Huang Qin* (Radix Scutellariae), and *Tian Hua Fen* (Radix Trichosanthis).

CAUTIONS / CONTRAINDICATIONS

- *Zhi Sou San* contains many herbs that are warm and drying in nature; thus, it is not suitable for chronic cough caused by yin deficiency, Lung heat, or phlegm heat.
- This formula should be used with extreme caution if the cough is accompanied by blood-streaked phlegm.¹

CLINICAL STUDIES AND RESEARCH

1. **Cough:** Modified *Zhi Sou San* demonstrated 90% effectiveness in treating cough associated with various causes and conditions. In addition to *Zhi Sou San*, modifications were made as follows: for cough due to wind-cold, *Fang Feng* (Radix Saposhnikoviae), *Ku Xing Ren* (Semen Armeniacae Amarum), and *Qiang Huo* (Rhizoma et Radix Notopterygii) were added; for cough due to wind-heat, *Sang Ye* (Folium Mori) and *Ku Xing Ren* (Semen Armeniacae Amarum) were added and the dose of *Jing Jie* (Herba Schizonepetae) was reduced; for dampness and phlegm affecting the Lung, *Huang Qin* (Radix Scutellariae), *Jie Geng* (Radix Platycodonis), and *Ku Xing Ren* (Semen Armeniacae Amarum) were added, and *Jing Jie* (Herba Schizonepetae) was removed; for dryness affecting the Lung, *Sha Shen* (Radix Glehniae seu Adenophorae), *Xuan Shen* (Radix Scrophulariae), and *Zhi Mu* (Rhizoma Anemarrhenae) were added, and the doses were reduced for *Jing Jie* (Herba Schizonepetae), *Bai Qian* (Rhizoma et Radix Cynanchi Stauntonii), and *Chen Pi* (Pericarpium Citri Reticulatae).²
2. **Cough with exterior condition:** One study reported 94% effectiveness using modified *Zhi Sou San* to treat cough associated with an exterior condition. The herbal treatment contained *Zhi Sou San* plus *Mu Dan Pi* (Cortex Moutan) and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) as the base formula. In addition, *Bai He* (Bulbus Lilii) and *Mai Dong* (Radix Ophiopogonis) were added for dry cough caused by dryness and heat damaging the Lung; *Yuan Zhi* (Radix Polygalae) and *Ban Xia* (Rhizoma Pinelliae) were added for cough with profuse, white sputum; and *Sang Bai Pi* (Cortex Mori) and *Huang Qin* (Radix Scutellariae) were added for cough with yellow sputum. Of 50 cases, the study reported complete recovery in 23 cases, improvement in 24 cases, and no benefit in 3 cases.³
3. **Whooping cough:** Modified *Zhi Sou San* was used to treat 40 patients with whooping cough with complete recovery in 33 patients and improvement in 7 patients. The herbal treatment was based on *Zhi Sou San*, with removal of *Bai Qian* (Rhizoma et Radix Cynanchi Stauntonii) and *Zi Wan* (Radix et Rhizoma Asteris) and the addition of *Qian Hu* (Radix Peucedani), *Tao Ren* (Semen Persicae), *Bei Mu* (Bulbus Fritillariae), *Jiang Can* (Bombyx Batryticatus), and *Di Long* (Pheretima). Additional modifications were made as follows: *Ban Xia* (Rhizoma Pinelliae) and *Gua Lou* (Fructus Trichosanthis) for cough with profuse phlegm; *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Pu Gong Ying* (Herba Taraxaci) for fever; *Ban Xia* (Rhizoma Pinelliae) and *Zhe Shi* (Haematitum) for frequent nausea and vomiting; and *Mu Dan Pi* (Cortex

Zhǐ Sòu Sǎn (Stop Coughing Powder)

Moutan) and processed *Sang Bai Pi* (Cortex Mori) for blood in the sputum.⁴

4. **Respiratory tract infection:** Eighty patients with respiratory tract infections were divided into two groups and treated with herbs or drugs three times daily, for 3 days per course of treatment. Group one of 40 patients received *Zhi Sou San*, and group two of 40 patients received antibiotic drugs. For group one, the study reported complete recovery in 34 patients, moderate improvement in 5 patients, and no benefit in 1 case. For group two, the study reported complete recovery in 10 patients, moderate improvement in 12 patients, and no effect in 18 patients.⁵
5. **Acute bronchitis:** One hundred children with acute bronchitis were treated with complete recovery in 92 cases and improvement in 2 cases. The herbal treatment was based on *Zhi Sou San* with the addition of *Tian Zhu Huang* (Concretio Silicea Bambusae), *Gua Lou Pi* (Pericarpium Trichosanthis), *Huang Qi* (Radix Astragali), *Sang Bai Pi* (Cortex Mori), *Qian Hu* (Radix Peucedani), and *Jin Yin Hua* (Flos Lonicerae Japonicae). Most patients had complete recovery within 4-6 packs of herbs.⁶ In another study, *Zhi Sou San* successfully treated 147 of 153 patients (91 males and 62 females) with bronchitis for 2-32 days. The duration of treatment was between 2 and 8 packs of herbs.⁷
6. **Chronic bronchitis:** One study reported marked effectiveness using modified *Zhi Sou San* to treat chronic bronchitis. Of 30 patients, 23 had significant improvement, 6 had improvement, and 1 had slight improvement. The herbal treatment was modified by removing *Jing Jie* (Herba Schizonepetae) and adding *Ku Xing Ren* (Semen Armeniacae Amarum) and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) to *Zhi Sou San*. Furthermore, *Huang Qin* (Radix Scutellariae) and *Sang Bai Pi* (Cortex Mori) were added for hot phlegm; *Ma Huang* (Herba Ephedrae) and *Xi Xin* (Radix et Rhizoma Asari) for cold phlegm; *Sha Shen* (Radix Glehniae seu Adenophorae) and *Mai Dong* (Radix Ophiopogonis) for Lung dryness; and *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali) for Lung and Spleen qi deficiencies.⁸
7. **Interstitial pneumonia:** Modified *Zhi Sou San* showed marked effectiveness in treating interstitial pneumonia. The base formula included *Zhi Sou San* plus *Tao Ren* (Semen Persicae) and *Ban Lan Gen* (Radix Isatidis). Other herbs were added as deemed necessary: *San Ao Tang* (Three-Unbinding Decoction) for wind-cold; *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *Lian Qiao* (Fructus Forsythiae) for fever with cough; and *Ping Wei San* (Calm the Stomach Powder) for excessive dampness and

phlegm. Each course of treatment was 6 days. The average duration of treatment was 1.6 courses.⁹

8. **Chronic prostatitis:** Concurrent use of *Ding Chuan Tang* (Arrest Wheezing Decoction) and *Zhi Sou San* demonstrated 94.29% effectiveness in treating chronic prostatitis. Modifications include addition of *Huang Bo* (Cortex Phellodendri Chinensis) and *Cang Zhu* (Rhizoma Atractylodis) for increased white blood cells in the prostatic fluids; addition of *Gou Ji* (Rhizoma Cibotii), *Xu Duan* (Radix Dipsaci), *Ba Ji Tian* (Radix Morindae Officinalis) and *Yin Yang Huo* (Herba Epimedii) for significant reduction of lecithin mass; addition of *Zhi Mu* (Rhizoma Anemarrhenae), *Huang Bo* (Cortex Phellodendri Chinensis) and *Di Huang* (Radix Rehmanniae) for yin deficiency; addition of *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis) and *Sheng Ma* (Rhizoma Cimicifugae) for yang deficiency; and addition of *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Yan Hu Suo* (Rhizoma Corydalis) for blood stagnation. Of 70 patients, 29 had complete recovery, 37 had improvement, 3 had no results, and 1 discontinued treatment.¹⁰

Wu Mei (Fructus Mume)

Zhi Ke Tang (Stop Coughing Decoction) has been used primarily as a symptomatic treatment for cough arising from various causes. It contains herbs that release wind from the exterior, eliminate phlegm, nourish yin, and cause Lung qi to descend. Clinically, it may be used to treat cough due to external wind-heat or wind-cold, internal Lung yin deficiency, or other causes. However, although this is an effective formula for suppressing cough, it is necessary to identify the cause(s) of the cough and select treatment accordingly for optimal results.

Zhǐ Sòu Sǎn (Stop Coughing Powder)

AUTHORS' COMMENTS

Zhi Sou San ventilates the Lung, expels wind, and is widely used to treat cough due to various causes. It is especially effective in treating cough with lingering exterior pathogenic factors. Key symptoms include cough with a tickling sensation in the throat, slight aversion to wind, fever, and a thin, white tongue coating.

Jin Fei Cao San (Inula Powder) and *Zhi Sou San* are both commonly used to treat wind invading the Lung.

- *Jin Fei Cao San* is more suitable for the initial stages of wind invasion with cough and profuse sputum. It contains many herbs that release the exterior and ventilate the Lung, such as *Ma Huang* (Herba Ephedrae), *Jing Jie* (Herba Schizonepetae), and *Xuan Fu Hua* (Flos Inulae).
- *Zhi Sou San* treats wind attacking the Lung that leads to disruption of Lung qi and resulting in cough. The herbs in this formula are primarily from the cough-arresting category, such as *Zi Wan* (Radix et Rhizoma Asteris), *Bai Qian* (Rhizoma et Radix Cynanchi Stauntonii), *Bai Bu* (Radix Stemonae), and *Jie Geng* (Radix Platycodonis). *Zhi Sou San* does not contain many exterior wind-cold releasing herbs, since the focus of the formula is on directing Lung qi downward and arresting cough.

Ning Sou Wan (Quiet the Cough Pill), *Dun Sou San* (Long-Bout Cough Powder), and *Zhi Sou San* (Stop Coughing Powder) are three formulas that commonly treat cough. Their differences are as follows:

- *Ning Sou Wan* quiets cough caused by wind-heat.
- *Dun Sou San* settles cough caused by heat and phlegm in the interior.
- *Zhi Sou San* stops cough caused by wind at the exterior and phlegm in the interior.

Lian Qiao (Fructus Forsythiae)

Jie Geng (Radix Platycodonis)

Huang Qin (Radix Scutellariae)

Zhi Zi (Fructus Gardeniae)

Bai Zhi (Radix Angelicae Dahuricae)

Chai Hu (Radix Bupleuri)

Zhi Qiao (Fructus Citri Aurantii)

Dang Gui (Radix Angelicae Sinensis)

Chuan Xiong (Rhizoma Chuanxiong)

Bai Shao (Radix Paeoniae Alba)

Gan Cao (Radix et Rhizoma Glycyrrhizae)

DOSAGE / PREPARATION / ADMINISTRATION

Cook all of the ingredients in water, and take the decoction after meals. Note: Exact doses of the herbs are unavailable. The source text only states to use equal amounts of all the herbs, except for *Gan Cao* (Radix et Rhizoma Glycyrrhizae), which should be used at half the dose.

CHINESE THERAPEUTIC ACTIONS

1. Releases wind-heat from the exterior
2. Dispels heat, fire, and toxins

CLINICAL MANIFESTATIONS

Suppuration of the ears and nose due to wind-heat attacking the upper *jiao*: swelling, inflammation and infection of the ears and nose, abscess and suppuration of the affected area, dark brown discoloration of the skin, perspiration and an oily feeling on the palms and soles, and abdominal rigidity.

CLINICAL APPLICATIONS

Otitis media, sinusitis, rhinitis, suppuration of the ears and nose, tonsillitis, nosebleeds, and acne.

EXPLANATION

Jing Jie Lian Qiao Tang (Schizonepeta and Forsythia Decoction) treats inflammation and swelling of the ears and nose. The disease progression begins with wind-heat attacking the upper *jiao*. As wind-heat travels upward, it directly attacks the ears and nose, leading to

inflammation and swelling. As heat accumulates in the affected area, suppuration develops, leading to the formation and discharge of pus.

Clinically, wind-heat attacking the ears is characterized by swelling and pain of the inner ear, abscess and discharge of pus, deafness, and tinnitus; and wind-heat attacking the nose is characterized by swelling and obstruction of the nasal passage, loss of smell, abscess, and yellow nasal discharge. According to the original text, patients with marked dark brown discoloration of the skin, perspiration, and an oily feeling on the palms and soles respond remarkably well to this herbal formula.

Jing Jie (Herba Schizonepetae) and *Fang Feng* (Radix Saposhnikoviae) release exterior wind. *Lian Qiao* (Fructus Forsythiae) and *Jie Geng* (Radix Platycodonis) reduce swelling and inflammation, as well as eliminate pus and toxins. *Huang Qin* (Radix Scutellariae) and *Zhi Zi* (Fructus Gardeniae) purge fire and reduce inflammation. *Bai Zhi* (Radix Angelicae Dahuricae) dispels wind and unblocks obstruction in the ears and nose. *Chai Hu* (Radix Bupleuri) dispels wind, and with *Zhi Qiao* (Fructus Aurantii), relieves the feeling of distention caused by qi stagnation. *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Bai Shao* (Radix Paeoniae Alba) tonify the blood and promote blood circulation. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

Jing Jie Lian Qiao Tang (Schizonepeta and Forsythia Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Suppuration of the ears and nose	Swelling, inflammation and infection of the ears and nose: wind-heat attacking the upper body	<ul style="list-style-type: none"> Releases wind-heat from the exterior Dispels heat, fire, and toxins 	<ul style="list-style-type: none"> <i>Jing Jie</i> (Herba Schizonepetae) and <i>Fang Feng</i> (Radix Saposhnikoviae) release exterior wind and relieve itching. <i>Lian Qiao</i> (Fructus Forsythiae) and <i>Jie Geng</i> (Radix Platycodonis) reduce swelling and inflammation and eliminate pus and abscesses. <i>Huang Qin</i> (Radix Scutellariae) and <i>Zhi Zi</i> (Fructus Gardeniae) purge fire and reduce inflammation. <i>Bai Zhi</i> (Radix Angelicae Dahuricae) dispels wind and unblocks obstruction in the ears and nose. <i>Chai Hu</i> (Radix Bupleuri) dispels wind. <i>Zhi Qiao</i> (Fructus Aurantii) activates qi circulation and relieves distention. <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Chuan Xiong</i> (Rhizoma Chuanxiong), and <i>Bai Shao</i> (Radix Paeoniae Alba) tonify the blood and promote blood circulation. <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

MODIFICATIONS

- For hypertrophic sinusitis or rhinitis, add *Xin Yi Hua* (Flos Magnoliae) and *Cang Er Zi* (Fructus Xanthii).
- If there is swelling and pain caused by wind-heat, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Huang Lian* (Rhizoma Coptidis).
- For nasal obstruction, combine with *Qing Bi Tang* (Clear the Nose Decoction).
- If there is loss of smell, combine with *Xin Yi San* (Magnolia Flower Powder).

Xīn Yī Qīng Fèi Yīn (Magnolia Decoction to Clear the Lung)

辛夷清肺飲

辛夷清肺饮

Pinyin Name: *Xin Yi Qing Fei Yin*

Literal Name: Magnolia Decoction to Clear the Lung

Alternate Names: *Hsin I Ching Fei Tang*, *Xin Yi Ching Fei Tang*, Magnolia Flower and Gypsum Decoction, Magnolia and Gypsum Combination

Original Source: *Wai Ke Zheng Zong* (True Lineage of External Medicine) by Chen Shi-Gong in 1617

COMPOSITION

<i>Xin Yi Hua</i> (Flos Magnoliae)	1.8g
<i>Sheng Ma</i> (Rhizoma Cimicifugae)	0.9g
<i>Pi Pa Ye</i> (Folium Eriobotryae)	3 leaves
<i>Huang Qin</i> (Radix Scutellariae)	3g
<i>Zhi Zi</i> (Fructus Gardeniae)	3g
<i>Shi Gao</i> (Gypsum Fibrosum)	3g
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	3g
<i>Bai He</i> (Bulbus Lilii)	3g
<i>Mai Dong</i> (Radix Ophiopogonis)	3g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	1.5g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the herbs in 2 bowls of water until the liquid is reduced to 80%. Take the warm, strained decoction after meals. Note: Before cooking the herbs, place *Xin Yi Hua* (Flos Magnoliae) in a cheese cloth, and remove the hair-like particles from *Pi Pa Ye* (Folium Eriobotryae), to prevent discomfort of the throat while drinking the decoction.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat from the Lung
2. Disperses stagnation and unblocks nasal obstruction

CLINICAL MANIFESTATIONS

Nasal obstruction caused by Lung heat: stuffy nose, nasal obstruction, yellow nasal discharge that is thick and sticky, and a decreased sense of smell.

CLINICAL APPLICATIONS

Sinusitis, rhinitis, and nasal obstruction.

EXPLANATION

Xin Yi Qing Fei Yin (Magnolia Decoction to Clear the Lung) treats nasal obstruction caused by Lung heat. In addition to stuffy nose, other signs include visible swelling and congestion of the sinus cavity. The discharge is often thick, sticky and yellow in color, and the sense of smell is often impaired.

Xin Yi Hua (Flos Magnoliae), the chief herb, effectively unblocks stagnation of the nose to treat various types of nasal disorders. *Sheng Ma* (Rhizoma Cimicifugae) has an ascending function, bringing the effect of the formula to the head to open the orifices. *Pi Pa Ye* (Folium Eriobotryae), *Huang Qin* (Radix Scutellariae), and *Zhi Zi* (Fructus Gardeniae) clear damp-heat from the Lung, while *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae) clear heat and fire from the Lung. *Bai He* (Bulbus Lilii) and *Mai Dong* (Radix Ophiopogonis) promote generation of fluids and moisten the Lung. They prevent the acrid herbs in this formula from damaging Lung yin. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

MODIFICATIONS

- For exterior wind-cold conditions, add *Fang Feng* (Radix Saposhnikoviae) and *Qiang Huo* (Rhizoma et Radix Notopterygii).
- If there is pus and abscess caused by wind and dampness, add *Cang Zhu* (Rhizoma Atractylodis) and *Lian Qiao* (Fructus Forsythiae).
- For nasal congestion caused by wind-heat, add *Cang Er Zi* (Fructus Xanthii) and *Bo He* (Herba Menthae).
- When there is clear nasal discharge caused by wind-cold, add *Jing Jie* (Herba Schizonepetae) and *Qiang Huo* (Rhizoma et Radix Notopterygii).

<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	15g [5g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	30g [9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder. Cook 6g of the powder with *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Bo He* (Herba Menthae) in water to obtain a decoction. Today, this formula may be prepared as a decoction with the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

1. Releases the exterior through diaphoresis
2. Dispers wind, cold, and dampness
3. Tonifies qi

CLINICAL MANIFESTATIONS

Exterior wind, cold and dampness with qi deficiency: aversion to cold, fever, headache, neck stiffness, joint pain, body ache, absence of perspiration, nasal obstruction, cough with sputum, a feeling of distention and fullness

in the chest and diaphragm, a pale tongue with a white, greasy tongue coating, and a superficial, soggy or superficial, rapid pulse that is forceless upon pressure.

CLINICAL APPLICATIONS

Influenza, common cold, respiratory tract infection, infection with fever, cough, hoarseness of voice, nasal congestion, parotitis, urticaria, eczema, suppurative infection, rheumatism, dizziness, and acute viral hepatitis.

EXPLANATION

Bai Du San (Overcome Pathogenic Influences Powder) treats weak and deficient patients who suffer from an attack by exterior wind, cold and dampness. Aversion to cold, fever, absence of perspiration, neck stiffness, joint pain, and body aches are all indications of wind, cold and dampness attacking the exterior and muscles. Wind-cold

Bài Dú Sǎn (Overcome Pathogenic Influences Powder)

Bai Du San (Overcome Pathogenic Influences Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Exterior wind, cold and dampness with qi deficiency	<ul style="list-style-type: none"> • Aversion to cold, fever, absence of perspiration, neck stiffness, joint pain, and body aches: wind, cold and dampness attacking the exterior and the muscles • Nasal obstruction, cough with sputum, feeling of distention and fullness in the chest and diaphragm area: wind-cold invading the Lung • Pale tongue and a forceless pulse: qi deficiency 	<ul style="list-style-type: none"> • Releases the exterior through diaphoresis • Disperses wind, cold and dampness • Tonifies <i>yuan</i> (source) <i>qi</i> 	<ul style="list-style-type: none"> • <i>Qiang Huo</i> (Rhizoma et Radix Notopterygii) and <i>Du Huo</i> (Radix Angelicae Pubescentis) dispel wind, cold, and dampness from the body. • <i>Chuan Xiong</i> (Rhizoma Chuanxiong) activates blood circulation and dispels exterior wind-cold. • <i>Zhi Qiao</i> (Fructus Aurantii) regulates Lung qi to relieve distention and fullness. • <i>Jie Geng</i> (Radix Platycodonis) and <i>Qian Hu</i> (Radix Peucedani) dispel phlegm and relieve coughing. • <i>Fu Ling</i> (Poria) dispels dampness and tonifies the middle <i>jiao</i>. • <i>Chai Hu</i> (Radix Bupleuri), <i>Bo He</i> (Herba Menthae) and <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) release the exterior factors. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng) tonifies <i>yuan</i> (source) <i>qi</i>.

may constrict the Lung, and cause nasal obstruction, cough with sputum, a feeling of distention and fullness in the chest and diaphragm. A greasy tongue coating and a soggy pulse are signs of dampness. A pale tongue and a pulse that is forceless upon pressure indicate underlying qi deficiency.

The treatment goals are to dispel wind, cold, and dampness and to tonify *yuan* (source) *qi*. *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Du Huo* (Radix Angelicae Pubescentis) act as the chief herbs to dispel wind, cold, and dampness from the whole body. *Chuan Xiong* (Rhizoma Chuanxiong) activates blood circulation to relieve pain. It also dispels exterior wind and cold. *Chai Hu* (Radix Bupleuri) helps the chief herbs release the exterior. *Zhi Qiao* (Fructus Aurantii) regulates the qi flow of the Lung to relieve chest distention and fullness. *Jie Geng* (Radix Platycodonis) and *Qian Hu* (Radix Peucedani) relieve coughing and dispel phlegm. *Fu Ling* (Poria) dispels dampness through diuresis and tonifies the middle *jiao*. *Bo He* (Herba Menthae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) help relieve exterior symptoms. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

To help a deficient body dispel exterior factors, the interior must also be strengthened; hence, a small amount of *Ren*

Shen (Radix et Rhizoma Ginseng) is used to tonify *yuan* (source) *qi*, which strengthens the body to help expel the exterior factors. Moreover, *Ren Shen* (Radix et Rhizoma Ginseng) balances and prevents the acrid and strong properties of the exterior-releasing herbs from damaging the weak body. Lastly, by tonifying qi, this herb prevents future re-infections and reduces the susceptibility of the body to exterior pathogens.

MODIFICATIONS

- If there is itching or eczema, add *Ku Shen* (Radix Sophorae Flavescentis) and *Chan Tui* (Periostracum Cicadae).
- For rash or incomplete eruption of dermatological disorders caused by wind-heat and toxins, add *Xiao Feng San* (Eliminate Wind Powder).
- For the initial stages of skin lesions such as sores and carbuncles, remove *Ren Shen* (Radix et Rhizoma Ginseng) and add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae).
- For febrile diseases with thirst but no aversion to wind or cold, add *Huang Qin* (Radix Scutellariae).
- If there is no sign of dampness at the exterior, remove *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis) and *Fu Ling* (Poria).
- If there is no sign of coughing or sputum, remove *Jie Geng* (Radix Platycodonis) and *Qian Hu* (Radix Peucedani).

Bài Dú Sǎn (Overcome Pathogenic Influences Powder)

CAUTIONS / CONTRAINDICATIONS

- The dose of *Ren Shen* (Radix et Rhizoma Ginseng) should be carefully adjusted according to each patient's condition. It should not constitute more than ten percent of the entire formula. *Bai Du San* was originally designed for children. For adults who do not have significant qi deficiency, the dose of *Ren Shen* (Radix et Rhizoma Ginseng) should be decreased.
- *Bai Du San* is a warm, acrid formula that is contraindicated in cases of exterior wind-heat invasion, interior heat, or yin deficiency with exterior invasion.

CLINICAL STUDIES AND RESEARCH

1. **Infection with fever:** In one study, 136 children with epidemic infection and fever were evaluated and treated. The ages of the children ranged from 6 months to 12 years, with length of illness between 1-7 days prior to the evaluation and herbal treatment. Out of 136 cases, 36 had been treated previously with antibiotic drugs without success, 79 were treated with herbs only, and 21 received concurrent herbal and drug treatment. The study reported complete recovery in 125 cases after 3 days. The other 11 cases continued to have fever and needed additional treatment.¹
2. **Respiratory tract infection:** Use of *Bai Du San* in decoction was associated with 94% effectiveness in treating infants and young children with upper respiratory infection caused by virus. The herbal treatment contained 6g each of *Chai Hu* (Radix Bupleuri), *Qian Hu* (Radix Peucedani), *Tai Zi Shen* (Radix Pseudostellariae), *Chuan Xiong* (Rhizoma Chuanxiong), *Zhi Qiao* (Fructus Aurantii), *Fu Ling* (Poria), and *Jie Geng* (Radix Platycodonis); 5g each of *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Du Huo* (Radix Angelicae Pubescentis); 3g of *Bo He* (Herba Menthae); and 3 pieces of *Sheng Jiang* (Rhizoma Zingiberis Recens). Of 37 cases, the study reported complete recovery in 17 cases, marked improvement in 18 cases, and no benefit in 2 cases.²
3. **Acute viral hepatitis:** Use of modified *Bai Du San* demonstrated good results in treating 152 patients (between 16 and 35 years of age) of acute viral hepatitis within 5-12 days from onset of illness. The herbal formula contained 9g each of *Dang Shen* (Radix Codonopsis), *Fu Ling* (Poria), *Zhi Qiao* (Fructus Aurantii), *Jie Geng* (Radix Platycodonis), *Chai Hu* (Radix Bupleuri), *Qian Hu* (Radix Peucedani), *Chuan Xiong* (Rhizoma Chuanxiong), *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae); 3g of *Bo He* (Herba Menthae); and 3 pieces of *Sheng Jiang* (Rhizoma Zingiberis Recens). *Yin Chen* (Herba Artemisiae Scopariae) and *Jin Qian Cao* (Herba Lysimachiae) were added for those with jaundice; and *Pu Gong Ying* (Herba Taraxaci) and *Bai Jiang Cao* (Herba cum

Radice Patriniae) were added for those without jaundice. The herbs were administered in decoction twice daily, for 4 weeks per course of treatment. The duration of treatment varied from 28-42 packs of herbs, with an average of 31.9 packs. Of 152 patients, the study reported complete recovery in 139 patients and no benefit in 13 patients. The overall rate of effectiveness was 91.4%.³

4. **Parotitis:** Use of modified *Bai Du San* showed good results in treating chronic suppurative parotitis in 36 patients. The herbal treatment contained *Ren Shen* (Radix et Rhizoma Ginseng) 30g, *Chai Hu* (Radix Bupleuri) 15g, *Qian Hu* (Radix Peucedani) 15g, *Qiang Huo* (Rhizoma et Radix Notopterygii) 12g, *Du Huo* (Radix Angelicae Pubescentis) 12g, *Jie Geng* (Radix Platycodonis) 12g, *Fu Ling* (Poria) 12g, *Bo He* (Herba Menthae) 9g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 9g, *Kun Bu* (Thallus Eckloniae) 9g, *Tao Ren* (Semen Persicae) 9g, and *Zhi Qiao* (Fructus Aurantii) 9g. Furthermore, *Huang Qi* (Radix Astragali) 30g was added for severe qi deficiency; *Mu Li* (Concha Ostreae) 12g, *Xuan Shen* (Radix Scrophulariae) 12g and *Hong Hua* (Flos Carthami) 3g were added for severe swelling of the parotid glands; and *Bai Hua She She Cao* (Herba Hedyotis) 12g, and *Ban Zhi Lian* (Herba Scutellariae Barbatae) 9g were added for profuse abscesses and discharges. Of 36 patients, 25 had complete recovery and 11 had improvement.⁴

Geng Mi (Semen Oryzae)

The source text states to grind equal amounts of the ingredients into powder, and cook the powder as a decoction with *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Bo He* (Herba Menthae). Take the strained decoction while warm.

Cang Lin San (Old Rice Granary Powder) treats fasting dysentery, a type of dysentery characterized by anorexia or inability to eat, or vomiting upon eating and drinking. The main actions of this formula are to release the exterior, tonify qi, eliminate toxins, and stop vomiting. Because fasting dysentery is caused by Stomach and Spleen deficiencies, *Geng Mi* (Semen Oryzae) serves as an important ingredient in this formula to nourish the Stomach and Spleen and dispel dampness.

AUTHORS' COMMENTS

Bai Du San was originally designed for children, whose *yuan* (source) *qi* is still insufficient. A small amount of *Ren Shen* (Radix et Rhizoma Ginseng) is added to boost the *yuan qi* to help push out the exterior pathogenic factors. Today, however, the clinical applications of *Bai Du San* have been vastly expanded. In addition to the traditional indications, this formula is now commonly used for various types of patients (children, the elderly, and patients who are convalescent, postpartum, nursing, or with deficiency) and for various conditions (common colds, bronchitis, allergic dermatitis, urticaria, eczema and other disorders with itching of the skin characterized by wind-cold with dampness).

Bai Du San and *Jing Fang Bai Du San* (Schizonepeta and Saposchnikovia Powder to Overcome Pathogenic Influences) both treat beginning stages of suppuration, characterized by sores and ulcerations with fever, aversion to cold, absence of sweating, a thin, white tongue coating, and a superficial pulse. The differences between these two formulas are as follows:

- *Bai Du San* primarily treats wind-cold with dampness attacking a constitutionally deficient body. Treating suppuration, sores, and ulceration is its secondary function, and this secondary function may not be listed in some texts. *Bai Du San* contains *Ren Shen* (Radix et Rhizoma Ginseng) to treat skin disorders characterized by the presence of wind and cold **with** underlying weakness and deficiency.
- *Jing Fang Bai Du San* primarily treats initial stages of dermatological disorders with wind, cold, and dampness accumulating in the muscle layer. Localized redness and swelling along with exterior signs of cough, body aches, headache, and absence of sweating are present. *Jing Fang Bai Du San* does not contain *Ren Shen* (Radix et Rhizoma Ginseng), and primarily treats skin disorders characterized by wind and cold **without** underlying weakness and deficiency.⁵

<i>Fu Ling</i> (Poria)	22.5g [6g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	15g [4g]

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients coarsely and cook 12g of the powder with 7 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae) in 1.5 bowls of water until it is reduced to 60%. Take the warm, strained decoction any time during the day. This formula may also be prepared as a decoction with the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi and releases the exterior
2. Expels phlegm and stops cough

CLINICAL MANIFESTATIONS

Exterior wind-cold syndrome with interior *tan yin* (phlegm retention): aversion to cold, fever, headache, nasal obstruction, coughing with profuse sputum, fullness and distention in the chest and diaphragm, fatigue, lethargy, shortness of breath, no desire to speak, a white tongue coating, and a superficial pulse.

CLINICAL APPLICATIONS

Common cold, influenza, bronchitis, pneumonia, and upper respiratory tract infection.

EXPLANATION

Shen Su Yin (Ginseng and Perilla Leaf Decoction) tonifies qi, dispels exterior pathogenic factors, expels phlegm, and stops cough. Clinically, patients will manifest wind-cold at the exterior (aversion to cold, fever, headache, and nasal obstruction) and *tan yin* (phlegm retention) in the interior (coughing with profuse sputum, epigastric fullness and distention in the chest and diaphragm). In addition, patients will have qi deficiency, with symptoms such as fatigue, lethargy, shortness of breath, and no desire to speak.

Ge Gen (Radix Puerariae Lobatae) and *Zi Su Ye* (Folium Perillae), the chief herbs, release exterior wind-cold factor. *Qian Hu* (Radix Peucedani), *Ban Xia* (Rhizoma Pinelliae), and *Jie Geng* (Radix Platycodonis) arrest cough, dissolve phlegm, and ventilate Lung qi. *Chen Pi* (Pericarpium Citri Reticulatae) and *Zhi Qiao* (Fructus Aurantii) regulate qi and expand the chest. *Mu Xiang* (Radix Aucklandiae) regulates qi, dries dampness, and unblocks stagnation. *Ren Shen* (Radix et Rhizoma Ginseng) tonifies qi, while *Fu Ling* (Poria) strengthens the Spleen and drains dampness. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the middle *jiao* and the entire formula.

Shēn Sū Yīn (Ginseng and Perilla Leaf Decoction)

Shen Su Yin (Ginseng and Perilla Leaf Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Exterior wind-cold and interior <i>tan yin</i> (phlegm retention) with underlying qi deficiency	<ul style="list-style-type: none"> • Aversion to cold, fever, headache, and nasal obstruction: exterior wind-cold • Coughing with profuse sputum, epigastric fullness and distention in the chest and diaphragm: interior <i>tan yin</i> (phlegm retention) • Fatigue, lethargy, shortness of breath, and no desire to speak: qi deficiency 	<ul style="list-style-type: none"> • Tonifies qi and releases the exterior • Expels phlegm and stops cough 	<ul style="list-style-type: none"> • <i>Ge Gen</i> (Radix Puerariae Lobatae) and <i>Zi Su Ye</i> (Folium Perillae) release exterior wind-cold and regulate qi. • <i>Qian Hu</i> (Radix Peucedani), <i>Ban Xia</i> (Rhizoma Pinelliae), and <i>Jie Geng</i> (Radix Platycodonis) ventilate Lung qi, expel phlegm, and arrest cough. • <i>Chen Pi</i> (Pericarpium Citri Reticulatae) and <i>Zhi Qiao</i> (Fructus Aurantii) regulate qi and expand the chest. • <i>Mu Xiang</i> (Radix Aucklandiae) regulates qi and unblocks stagnation. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng) tonifies Lung and Spleen qi. • <i>Fu Ling</i> (Poria) strengthens the Spleen and drains dampness. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the middle <i>jiao</i> and the entire formula.

MODIFICATIONS

- For cough, wheezing, aversion to cold, and absence of perspiration caused by wind-cold, add *Ma Huang* (Herba Ephedrae), *Ku Xing Ren* (Semen Armeniacae Amarum), and *Jin Fei Cao* (Herba Inulae).
- For cough, wheezing and hurried respiration caused by wind-heat, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Bei Mu* (Bulbus Fritillariae).
- For cough caused by Lung cold, add *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Gan Jiang* (Rhizoma Zingiberis).
- For cough caused by Lung heat, add *Ku Xing Ren* (Semen Armeniacae Amarum), *Huang Qin* (Radix Scutellariae), and *Sang Bai Pi* (Cortex Mori).
- When there is chest fullness and profuse sputum, add *Gua Lou Zi* (Semen Trichosanthis).
- For headache, add *Xi Xin* (Radix et Rhizoma Asari) and *Chuan Xiong* (Rhizoma Chuanxiong).
- If there is abdominal pain and diarrhea, add *Huo Xiang* (Herba Agastaches) and *Sha Ren* (Fructus Amomi).
- For patients with less qi stagnation, remove *Mu Xiang* (Radix Aucklandiae).

PHARMACOLOGICAL EFFECTS

1. **Antipyretic:** Administration of *Shen Su Yin* at 0.54g/kg in rabbits was associated with marked antipyretic effects in rabbits with artificially-induced fever.¹
2. **Antitussive and expectorant:** Use of *Shen Su Yin* was associated with both antitussive and expectorant effects in mice.²

CLINICAL STUDIES AND RESEARCH

1. **Upper respiratory tract infection:** One study reported good results using modified *Shen Su Yin* to treat 39 patients with upper respiratory tract infection arising from various causes (34 with viral infection and 5 with bacterial infection). In addition to *Shen Su Yin* as the base formula, modifications included addition of *Huang Qin* (Radix Scutellariae) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) for phlegm and heat obstructing the Lung; and *Gua Lou* (Fructus Trichosanthis) for constipation. Of 39 cases, the study reported recovery in 33 cases within 4-17 days, and 6 more cases in 18-20 days.³
2. **Infection:** Use of modified *Shen Su Yin* was associated with good results in treating 60 patients with frequent infection caused by qi deficiency. The herbal treatment included *Ren Shen* (Radix et Rhizoma Ginseng), *Fu Ling* (Poria), *Chen Pi* (Pericarpium Citri Reticulatae), *Ban Xia* (Rhizoma Pinelliae), *Zi Su Ye* (Folium Perillae), *Qian Hu* (Radix Peucedani), *Ge Gen* (Radix Puerariae Lobatae), *Jie Geng* (Radix Platycodonis), *Chai Hu* (Radix Bupleuri), *Zhi Qiao* (Fructus Aurantii), *Mu Xiang* (Radix Aucklandiae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle). *Bai Bu* (Radix Stemonae) and *Xian He Cao* (Herba Agrimoniae) were added for chronic and frequent cough; *Bai Qian* (Rhizoma et Radix Cynanchi Stauntonii) and *Zi Wan* (Radix et Rhizoma Asteris) were added for cough with profuse white sputum; and *Huang Qi* (Radix Astragali) was added for profuse perspiration with weakness and fatigue. Of 60 cases, the study reported complete

Shēn Sū Yīn (Ginseng and Perilla Leaf Decoction)

recovery in 38 cases within 3 packs of herbs, in 20 cases after 4-6 packs, and 2 cases after 7-10 packs.⁴

3. **Common cold:** *Shen Su Yin* was used to treat 100 geriatric patients with common cold with good results. The treatment protocol was to use this formula in suspension form, using 20g of the herbs per dose two times daily. Of cases patients, the study reported complete recovery in 49 cases, significant improvement in 33 cases, moderate improvement in 9 cases, and no benefit in 9 cases. The overall rate of effectiveness was 91%.⁵

AUTHORS' COMMENTS

Shen Su Yin was originally designed to treat wind-cold invasion with pre-existing damp and phlegm accumulation in the interior. Thus, *Shen Su Yin* contains the ingredients of *Er Chen Tang* (Two-Cured Decoction) to dispel dampness and phlegm.

Bai Du San (Overcome Pathogenic Influences Powder) and *Shen Su Yin* both contain *Ren Shen* (Radix et Rhizoma Ginseng), and are exterior-releasing formulas used to treat wind-cold invasion in individuals with qi deficiency.

The differences between these formulas are as follows:

- *Bai Du San* relieves dampness lodging in the channels, causing body aches, neck and shoulder stiffness, and headache. It is better at treating wind-cold and dampness at the superficial level.
- *Shen Su Yin* dispels dampness affecting the Lung, manifesting in white nasal discharge, white sputum, chest congestion, and a feeling of heaviness. It focuses on dispelling exterior wind and cold, harmonizing *ying* (nutritive) *qi* and *wei* (defensive) *qi*, dispelling phlegm, and stopping cough. It is suitable for wind-cold invasion in those patients, especially young children or the elderly, who are qi deficient and have damp accumulation.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients with 2 pieces of *Da Zao* (Fructus Jujubae) in 2 large bowls of

water until the liquid is reduced to 1 large bowl. Add a small amount [3g] of dry-fried *Chi Shao* (Radix Paeoniae Rubra) and bring the decoction to a boil 3 times. Take the

Zài Zào Sǎn (Renewal Powder)

strained decoction while warm. Note: The doses of herbs are unavailable from the source text. Suggested doses are listed above in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Strengthens yang and benefits qi
2. Releases the exterior and induces diaphoresis

CLINICAL MANIFESTATIONS

Exterior wind-cold with yang qi deficiency: headache, severe aversion to cold, mild fever, absence of perspiration, cold limbs, lassitude, drowsiness, preference for resting, a pale face, a low voice, a pale tongue with a thin, white coating, and a deep and forceless, or superficial, big and forceless pulse.

CLINICAL APPLICATIONS

Common cold and influenza.

EXPLANATION

Zai Zao San (Renewal Powder) treats exterior wind-cold in patients with yang qi deficiency. Exterior wind-cold causes headache, fever, aversion to cold, and absence of perspiration. Yang qi deficiency in the interior causes cold limbs, lassitude, drowsiness, a pale face, a low voice, and a forceless pulse. The wind-cold factor in this case usually cannot be dispelled by using only exterior-releasing

herbs, because the body is too weak to expel any pathogenic factors. Even if the wind-cold can be dispelled by the exterior-releasing herbs, the patient's yang qi may collapse after perspiration. Because of the intertwined interior and exterior nature in this case, the treatment plan must focus on dispelling exterior wind-cold and tonifying yang qi at the same time.

Huang Qi (Radix Astragali) and *Ren Shen* (Radix et Rhizoma Ginseng), the chief herbs, tonify qi and consolidate the exterior. Together, they prevent yang qi from collapsing as a result of perspiration. *Gui Zhi* (Ramulus Cinnamomi), *Fu Zi* (Radix Aconiti Lateralis Praeparata), and *Xi Xin* (Radix et Rhizoma Asari) release the exterior, strengthen yang, and disperse cold. *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Feng* (Radix Saposhnikoviae), and *Chuan Xiong* (Rhizoma Chuanxiong) dispel exterior wind-cold and disperse cold. Dry-fried *Chi Shao* (Radix Paeoniae Rubra) restrains the warm herbs of this formula from injuring the blood and body fluids, without impairing their ability to induce perspiration. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) moderates the formula and prevents excessive and profuse sweating. *Da Zao* (Fructus Jujubae) and roasted *Sheng Jiang* (Rhizoma Zingiberis Recens) nourish and warm the Spleen and Stomach to increase the production of qi and body fluids.

(Ephedra, Asarum, and Prepared Aconite Decoction)

麻黃附子細辛湯

麻黄附子细辛汤

Pinyin Name: *Ma Huang Fu Zi Xi Xin Tang*

Literal Name: Ephedra, Asarum, and Prepared Aconite Decoction

Alternate Names: *Ma Huang Fu Tzu Hsi Hsin Tang*, Ma-huang and Asarum Decoction, Ma-huang, Aconite and Asarum Decoction; Mahuang, Aconite and Asarum Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

Ma Huang (Herba Ephedrae)

6g [5-6g]

Fu Zi (Radix Aconiti Lateralis Praeparata), *pao* (blast-fried)

1 pieces [3-9g]

Xi Xin (Radix et Rhizoma Asari)

6g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook *Ma Huang* (Herba Ephedrae) first with 10 cups [2,000 mL] of water until the liquid is reduced by 2 cups [400 mL]. Remove the foam from the top, add the rest of the ingredients, and cook until the liquid is reduced to 3 cups [600 mL]. Take 1 cup [200 mL] of the warm, strained decoction three times a day. Today, the decoction may be prepared using the doses suggested in brackets.

it assists *Ma Huang* (Herba Ephedrae) to release exterior cold, and it helps *Fu Zi* (Radix Aconiti Lateralis Praeparata) to strengthen interior yang and warm the body. This formula is thoughtfully crafted to release exterior wind-cold without damaging yang, and tonify interior yang without drawing wind-cold from the exterior into the interior.

CHINESE THERAPEUTIC ACTIONS

Strengthens yang and releases the exterior

CLINICAL MANIFESTATIONS

Shaoyin syndrome complicated with *taiyang* syndrome: severe aversion to cold, absence of perspiration, mild or no fever, and a deep pulse.

CLINICAL APPLICATIONS

Rheumatic arthritis, bronchitis, bronchial asthma, influenza, common cold in weak or elderly patients, trigeminal neuralgia, facial paralysis, headache, and sciatica.

EXPLANATION

Ma Huang Fu Zi Xi Xin Tang (Ephedra, Asarum, and Prepared Aconite Decoction) treats *shaoyin* syndrome complicated with *taiyang* syndrome. The patient in this case has both interior yang deficiency and exterior wind-cold. This condition is characterized by symptoms such as severe aversion to cold, absence of perspiration, mild or no fever, and a deep pulse.

Ma Huang (Herba Ephedrae) releases wind-cold from the exterior. *Fu Zi* (Radix Aconiti Lateralis Praeparata) strengthens yang and warms the body in the interior. *Xi Xin* (Radix et Rhizoma Asari) performs two functions:

MODIFICATIONS

- If there is headache and a wiry, tight pulse caused by wind-cold, add *Chuan Xiong* (Rhizoma Chuanxiong).
- For *bi zheng* (painful obstruction syndrome) due to wind, cold and dampness, add *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis), *Wei Ling Xian* (Radix et Rhizoma Clematidis) and *Qi She* (Agkistrodon).
- For chronic bronchitis or wheezing and dyspnea due to cold, add *Ban Xia* (Rhizoma Pinelliae), *Fu Ling* (Poria), *Chen Pi* (Pericarpium Citri Reticulatae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).

CAUTIONS / CONTRAINDICATIONS

- *Ma Huang Fu Zi Xi Xin Tang* is contraindicated in patients with yang deficiency without exterior condition (i.e., they present with clinical manifestations such as cold body and extremities, aversion to cold, diarrhea with watery stools and undigested foods, and a deep, faint and fine pulse). The use of this formula in such cases may induce profuse perspiration leading to collapse of yang.
- Use of this formula is contraindicated during pregnancy and nursing.
- This formula is contraindicated in conditions characterized by heat, excess, and/or dryness.
- This formula must be used with extreme caution because all three herbs are extremely warm or hot. Inappropriate use of this formula may cause consumption of yin and

body fluids and create side effects such as thirst, dry mouth and throat, insomnia, irritability, and others.¹

PHARMACOLOGICAL EFFECTS

1. **Antiallergic:** Ma Huang Fu Zi Xi Xin Tang was effective in treating type I allergy model in mice. The proposed mechanism of action was the inhibition of IL-4 production.² L-ephedrine, a compound of Ma Huang (Herba Ephedrae) in Ma Huang Fu Zi Xi Xin Tang, is one of the major active constituents.³ Potential therapeutic applications include passive cutaneous anaphylaxis and allergic rhinitis.^{4,5}
2. **Anti-inflammatory:** In mice and rats, Ma Huang Fu Zi Xi Xin Tang showed significant anti-inflammatory activities by significantly inhibiting the increase in vascular permeability induced by acetic acid, the ear edema induced by arachidonic acid and phorbol ester, and the cutaneous extravasation induced by bradykinin and histamine. The study stated that the anti-inflammatory effects were exerted through the underlying mechanisms of preventing mediator release from mast cells and macrophages.⁶

CLINICAL STUDIES AND RESEARCH

1. **Rheumatic arthritis:** Use of herbal treatment was associated with 97.6% effectiveness in 85 patients (48 males and 37 females) between 5 and 62 years of age, with 10 days to 1 month history of illness with rheumatic arthritis. The herbal treatment contained Ma Huang Fu Zi Xi Xin Tang plus Qiang Huo (Rhizoma et Radix Notopterygii), Du Huo (Radix Angelicae Pubescentis), Wei Ling Xian (Radix et Rhizoma Clematidis), and others as the base formula. Additional modifications were made as follows: for xing bi (mobile painful obstruction), Fang Feng (Radix Saposhnikoviae), Bai Zhi (Radix Angelicae Dahuricae), Qin Jiao (Radix Gentianae Macrophyllae), and Hai Feng Teng (Caulis Piperis Kadsurae) were added; for tong bi (extremely painful obstruction), Gan Jiang (Rhizoma Zingiberis) and Rou Gui (Cortex Cinnamomi) were added; for zhuo bi (fixed painful obstruction), Yi Yi Ren

(Semen Coicis), and Cang Zhu (Rhizoma Atractylodis) were added; for re bi (heat painful obstruction), Jin Yin Hua (Flos Lonicerae Japonicae) and Lian Qiao (Fructus Forsythiae) were added; for wan bi (stubborn painful obstruction), Di Long (Pheretima) and Quan Xie (Scorpio) were added; and for chronic bi zheng (painful obstruction syndrome) with deficiency, Sang Ji Sheng (Herba Taxilli) and Du Zhong (Cortex Eucommiae) were added. The average duration of treatment was 12.5 days. Of 85 cases, the study reported complete recovery in 62 cases, significant improvement in 10 cases, moderate improvement in 11 cases, and no benefit in 2 cases.⁷

2. **Xiong bi (painful obstruction of the chest):** Use of Ma Huang Fu Zi Xi Xin Tang plus Gua Lou (Fructus Trichosanthis), Xie Bai (Bulbus Allii Macrostemonis), and others was shown to be effective in treating xiong bi (painful obstruction of the chest). The herbs were given in decoction daily for 15 days per course of treatment, for 1-3 courses in total. Of 81 patients, the study reported significant improvement in 36 patients, moderate improvement in 38 patients, and no benefit in 7 patients. No recurrences were reported among 61 patients who came back for follow-up exams 6 months after the conclusion of the treatment.⁸
3. **Facial paralysis:** Complete recovery was reported in 118 of 132 patients having facial paralysis using Ma Huang Fu Zi Xi Xin Tang.⁹
4. **Sciatica:** Complete recovery was reported in 31 of 40 sciatica patients using Ma Huang Fu Zi Xi Xin Tang plus Niu Xi (Radix Achyranthis Bidentatae), Mu Gua (Fructus Chaenomelis), and others. The duration of treatment ranged from 14-40 days.¹⁰

HERB-DRUG INTERACTION

- **Ofloxacin-resistant infection:** Seven elderly patients with fever caused by bacterial infection of unknown origin failed to respond to ofloxacin 300 mg/day for 3 days. These patients were subsequently treated with Ma Huang Fu Zi Xi Xin Tang for 7 days, and the body temperature fell to

Má Huáng Fù Zǐ Xì Xīn Tāng

(Ephedra, Asarum, and Prepared Aconite Decoction)

under 37°C (98.6°F) in all seven cases. The dose of *Fu Zi* (*Radix Aconiti Lateralis Praeparata*), one of the ingredients in this formula, was decreased by half.¹¹

- **Drug-resistant *Pseudomonas aeruginosa* infection:** Use of *Ma Huang Fu Zi Xi Xin Tang* for 7 days was associated with good results in treating one elderly patient with fever and positive C-reactive protein (CRP) levels suffering from drug-resistant *Pseudomonas aeruginosa*. The treatment protocol was to administer 1,200 mg/day of dried extract made from *Ma Huang* (*Herba Ephedrae*) 4g, *Xi Xin* (*Radix et Rhizoma Asari*) 3g and *Fu Zi* (*Radix Aconiti Lateralis Praeparata*) 1g. The fever and CRP level returned to normal after 7 days of herbal treatment. The study concluded that *Ma Huang Fu Zi Xi Xin Tang* is a possible alternative for treatment of fever that does not respond to antibiotics for at least 3 days, especially for elderly patients.¹²

RELATED FORMULA

Má Huáng Fù Zǐ Gān Cǎo Tāng

(Ephedra, Prepared Aconite, and Licorice Decoction)

麻黃附子甘草湯

麻黃附子甘草汤

Pinyin Name: *Ma Huang Fu Zi Gan Cao Tang*

Literal Name: Ephedra, Prepared Aconite, and Licorice Decoction

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorder) by Zhang Zhong-Jing in the Eastern Han Dynasty

<i>Ma Huang</i> (<i>Herba Ephedrae</i>)	6g [5-6g]
<i>Fu Zi</i> (<i>Radix Aconiti Lateralis</i> Praeparata), <i>pao</i> (blast-fried)	1 piece [3-9g]
<i>Zhi Gan Cao</i> (<i>Radix et Rhizoma</i> Glycyrrhizae Praeparata cum Melle)	6g [5-6g]

The source text states to cook *Ma Huang* (*Herba Ephedrae*) first with 10 cups [2,000 mL] of water until the liquid is reduced by 2 cups [400 mL]. Remove the foam from the top, add the rest of the ingredients, and cook until the liquid is reduced to 3 cups [600 mL]. Take 1 cup [200 mL] of the warm, strained decoction three times daily. Today, this formula may be prepared as a decoction with the doses suggested in brackets above.

Ma Huang Fu Zi Gan Cao Tang (Ephedra, Prepared Aconite, and Licorice Decoction) also treats combined *shaoyin* and *taiyang* syndromes. It focuses more on tonifying yang, dispelling exterior wind-cold, and promoting urination. Clinically, patients may show aversion to cold, body aches, absence of perspiration, slight fever, general

edema, shortness of breath, dysuria, and a deep, small pulse.

Ma Huang Fu Zi Xi Xin Tang and *Ma Huang Fu Zi Gan Cao Tang* both treat combined *shaoyin* and *taiyang* syndromes.

- *Ma Huang Fu Zi Xi Xin Tang* contains *Xi Xin* (*Radix et Rhizoma Asari*) and strongly releases the exterior and warms the interior.
- *Ma Huang Fu Zi Gan Cao Tang* contains *Gan Cao* (*Radix et Rhizoma Glycyrrhizae*), and is a gentler formula. It is usually used for patients having concurrent *taiyang* and *shaoyin* syndromes two to three days after the initial onset of illness.

AUTHORS' COMMENTS

Ma Huang Fu Zi Xi Xin Tang is a unique formula that treats both *shaoyin* and *taiyang* syndromes simultaneously, by tonifying interior yang and releasing exterior wind-cold. The diagnostic symptoms include severe aversion to cold, mild fever, and a deep pulse. The patient is often described to have severe aversion to cold that cannot be relieved by wearing extra clothing, a condition caused by simultaneous interior yang deficiency and exterior wind-cold.

One note of caution for both *Ma Huang Fu Zi Xi Xin Tang* and *Ma Huang Fu Zi Gan Cao Tang*: *Ma Huang* (*Herba Ephedrae*) must be used with yang tonics at the same time. This is because *Ma Huang* (*Herba Ephedrae*) is a very strong exterior-releasing herb, and if no yang or qi-tonifying herbs are added to supplement the deficient interior, the strong acrid and warm properties of *Ma Huang* (*Herba Ephedrae*) may cause profuse perspiration and lead to damage of both yin and yang, or even yang collapse.

One note of contraindication for *Ma Huang Fu Zi Xi Xin Tang* and *Ma Huang Fu Zi Gan Cao Tang*: these two formulas have only mild yang-tonic action. Thus, if the patient shows serious yang deficiency symptoms, such as watery diarrhea and a faint, fine pulse, do **not** use these formulas. The reason is that the exterior-releasing action of these two formulas is very strong and may cause profuse perspiration, while the yang-tonic action is too weak to make any difference in the interior. The best treatment in this situation is to administer *Si Ni Tang* (Frigid Extremities Decoction) first to tonify yang and warm the interior, and then subsequently treat the exterior syndrome.

Zai Zao San (Renewal Powder) and *Ma Huang Fu Zi Xi Xin Tang* are both indicated for patients with yang deficiency who contract wind-cold.

Má Huáng Fù Zǐ Xì Xīn Tāng

(Ephedra, Asarum, and Prepared Aconite Decoction)

- *Zai Zao San* treats more severe wind-cold symptoms with constitutional qi and yang deficiencies. It tonifies Spleen and Stomach qi and harmonizes the *ying* (nutritive) and *wei* (defensive) levels; at the same time it also tonifies yang and benefits qi.
- *Ma Huang Fu Zi Xi Xin Tang* treats yang deficiency with mild wind-cold symptoms.¹³

Cōng Bái Qī Wèi Yīn (Scallion Decoction with Seven Ingredients)

蔥白七味飲
葱白七味饮

Pinyin Name: *Cong Bai Qi Wei Yin*

Literat Name: Scallion Decoction with Seven Ingredients

Original Source: *Wai Tai Mi Yao* (Arcane Essentials from the Imperial Library) by Wang Tao in 752 A.D.

COMPOSITION

<i>Cong Bai</i> (Bulbus Allii Fistulosi), <i>qie</i> (sliced)	1 cup [9g]
<i>Ge Gen</i> (Radix Puerariae Lobatae), <i>qie</i> (sliced)	0.6 cup [9g]
<i>Dan Dou Chi</i> (Semen Sojae Praeparatum)	0.1 cup [6g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>qie</i> (sliced)	0.2 cup [6g]
<i>Mai Dong</i> (Radix Ophiopogonis)	0.6 cup [9g]
<i>Di Huang</i> (Radix Rehmanniae)	0.6 cup [9g]
<i>Lao Shui</i> (Aerated Water)	8 cups

DOSAGE / PREPARATION / ADMINISTRATION

The source text specifies to cook the herbs with 8 cups of *Lao Shui* (Aerated Water), a special aerated water which is prepared by repeatedly ladling water one thousand times in and out of a pail until bubbles form on the surface. Cook the herbs in this water until the liquid is reduced to one-third. Take the warm, strained decoction in three

equally-divided doses daily. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Releases the exterior
2. Nourishes yin and blood

Cōng Bái Qī Wèi Yǐn (Scallion Decoction with Seven Ingredients)

CLINICAL MANIFESTATIONS

Exterior wind-cold with underlying yin and blood deficiencies: headache, fever, mild aversion to cold, and absence of perspiration.

CLINICAL APPLICATIONS

Common cold, influenza, and respiratory tract infections.

EXPLANATION

Cong Bai Qi Wei Yin (Scallion Decoction with Seven Ingredients) treats patients with yin and blood deficiencies who have been attacked by exterior wind-cold. This formula is also suitable for treating those who have just recovered from a major illness, or those who suffered from severe hemorrhage and are now being attacked by exterior wind-cold.

To dispel the exterior wind-cold factor in individuals with underlying yin and blood deficiencies, exterior-releasing and tonic herbs should be employed concurrently. According to the theories of traditional Chinese medicine, blood and sweat are of the same origin. Therefore, if only exterior-releasing herbs are used to induce perspiration in blood deficient patients, depletion of blood may occur after perspiration. If only tonic herbs are used, the exterior cold factor cannot be resolved. Therefore, optimal treatment requires the use of exterior-releasing and tonic herbs simultaneously.

This formula contains *Cong Bai* (Bulbus Allii Fistulosi), *Ge Gen* (Radix Puerariae Lobatae), *Dan Dou Chi* (Semen Sojae Praeparatum), and *Sheng Jiang* (Rhizoma Zingiberis

Recens) to release the exterior wind-cold. *Mai Dong* (Radix Ophiopogonis) and *Di Huang* (Radix Rehmanniae) tonify yin and blood to prevent any excessive sweating from damaging the body.

MODIFICATIONS

- If the aversion to cold is severe, add *Zi Su Ye* (Folium Perillae) and *Jing Jie* (Herba Schizonepetae).
- If the fever is prominent, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), and *Huang Qin* (Radix Scutellariae).
- If there is bleeding (hematemesis, epistaxis, hemoptysis, or hematochezia), add *E Jiao* (Colla Corii Asini), *Ou Jie* (Nodus Nelumbinis Rhizomatis), and *San Qi* (Radix et Rhizoma Notoginseng).
- For indigestion, add *Chen Pi* (Pericarpium Citri Reticulatae).

CAUTIONS / CONTRAINDICATIONS

The source text advises avoiding *Wu Yi* (Fructus Ulmi Praeparatus) while taking *Cong Bai Qi Wei Yin*.

AUTHORS' COMMENTS

Cong Bai Qi Wei Yin is best for treating wind-cold invasion in patients with underlying yin and blood deficiencies caused by chronic illness or acute loss of blood through bleeding. The qi and blood of recovering patients are not fully restored back to normal levels. These individuals are much more susceptible to catching exterior pathogenic factors than healthy people. This formula mildly expels exterior wind-cold invasion while at the same time nourishes yin and blood.

Cong Bai Qi Wei Yin (Scallion Decoction with Seven Ingredients)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Exterior wind-cold with underlying yin and blood deficiencies	<ul style="list-style-type: none">• Headache, fever, mild aversion to cold, and absence of perspiration: exterior wind-cold• Recent history of bleeding: yin and blood deficiencies	<ul style="list-style-type: none">• Releases the exterior• Nourishes yin and blood	<ul style="list-style-type: none">• <i>Cong Bai</i> (Bulbus Allii Fistulosi), <i>Ge Gen</i> (Radix Puerariae Lobatae), <i>Dan Dou Chi</i> (Semen Sojae Praeparatum), and <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) release exterior wind-cold.• <i>Mai Dong</i> (Radix Ophiopogonis) and <i>Di Huang</i> (Radix Rehmanniae) tonify yin and blood.

Jiā Jiǎn Wéi Ruí Tāng (Modified Polygonatum Odoratum Decoction)

加減葳蕤湯 加減葳蕤湯

Pinyin Name: *Jia Jian Wei Rui Tang*

Literal Name: Modified Polygonatum Odoratum Decoction

Original Source: *Tong Su Shang Han Lun* (Plain Version of Discussion of Cold-Induced Disorders) by Yu Gen-Chu in the Qing Dynasty

COMPOSITION

<i>Yu Zhu</i> (Rhizoma Polygonati Odorati)	6-9g [9g]
<i>Cong Bai</i> (Bulbus Allii Fistulosi)	2-3 stalks [6g]
<i>Dan Dou Chi</i> (Semen Sojae Praeparatum)	9-12g [9g]
<i>Bo He</i> (Herba Menthae)	3-4.5g [5g]
<i>Jie Geng</i> (Radix Platycodonis)	3-4.5g [5g]
<i>Bai Wei</i> (Radix et Rhizoma Cynanchi Atrati)	1.5-3g [3g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	1.5g [1.5g]
<i>Da Zao</i> (Fructus Jujubae)	2 pieces

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction. Take the strained decoction while warm. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin and clears heat
2. Releases the exterior and induces diaphoresis

CLINICAL MANIFESTATIONS

Exterior wind-heat with chronic yin deficiency: headache, fever, slight aversion to wind and cold, absence of or slight perspiration, coughing with thick sputum that is difficult to expectorate, irritability, thirst, a dry throat, a red tongue body, and a rapid pulse.

CLINICAL APPLICATIONS

Common cold and influenza.

EXPLANATION

Jia Jian Wei Rui Tang (Modified Polygonatum Odoratum Decoction) treats patients with chronic yin deficiency who contract exterior wind-heat. Yin deficiency may develop into deficiency fire in the interior, which, when accompanied by exterior wind-heat, gives rise to symptoms such as headache, fever, cough, thirst, a dry throat, and slight aversion to wind and cold. Since yin and body fluids are deficient, there is no perspiration or just a slight perspiration. A red tongue body and a rapid pulse suggest heat in the interior.

The combination of exterior wind-heat and interior yin deficiency presents a dilemma: herbs that induce diaphoresis and release the exterior to dispel wind-heat are likely to damage yin, and herbs that nourish yin may bring exterior wind-heat into the interior and further complicate the illness. Thus, optimal treatment requires the concurrent use of both groups of herbs to maximize therapeutic effect and minimize adverse reactions.

Yu Zhu (Rhizoma Polygonati Odorati), the chief herb, nourishes yin and body fluids to moisten Lung dryness. Unlike most yin tonics, *Yu Zhu* (Rhizoma Polygonati Odorati) tonifies yin, moistens dryness, and replenishes fluids without creating stagnation. *Cong Bai* (Bulbus Allii Fistulosi), *Dan Dou Chi* (Semen Sojae Praeparatum), *Bo He* (Herba Menthae), and *Jie Geng* (Radix Platycodonis) release the exterior, ventilate the Lung, and stop coughing. *Bai Wei* (Radix et Rhizoma Cynanchi Atrati) cools the blood and clears heat to relieve irritability and thirst. *Bai Wei* (Radix et Rhizoma Cynanchi Atrati) is selected instead of the usual Lung heat-clearing herbs such as *Huang Qin* (Radix Scutellariae), because it cools the blood and clears heat without consuming yin. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and *Da Zao* (Fructus Jujubae) nourish and harmonize the middle *jiao*. This formula can clear deficiency heat and relieve exterior symptoms simultaneously.

MODIFICATIONS

- If there are severe exterior symptoms and signs, add *Ge Gen* (Radix Puerariae Lobatae) and *Fang Feng* (Radix Saposhnikoviae).

Jiā Jiǎn Wéi Ruí Tāng (Modified Polygonatum Odoratum Decoction)

Jia Jian Wei Rui Tang (Modified Polygonatum Odoratum Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Chronic yin deficiency accompanied by exterior wind-heat invasion	<ul style="list-style-type: none">• Headache, fever, aversion to wind, and slight aversion to cold: exterior wind-heat• Coughing, irritability, thirst, and a dry throat: wind-heat consuming yin and body fluids• Red tongue body and a rapid pulse: presence of heat	<ul style="list-style-type: none">• Nourishes yin and clears heat• Releases the exterior and induces diaphoresis	<ul style="list-style-type: none">• <i>Yu Zhu</i> (Rhizoma Polygonati Odorati) nourishes yin and body fluids to moisten Lung dryness.• <i>Cong Bai</i> (Bulbus Allii Fistulosi), <i>Dan Dou Chi</i> (Semen Sojae Praeparatum), <i>Bo He</i> (Herba Menthae), and <i>Jie Geng</i> (Radix Platycodonis) release the exterior, ventilate the Lung, and stop coughing.• <i>Bai Wei</i> (Radix et Rhizoma Cynanchi Atrati) cools the blood and clears heat.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and <i>Da Zao</i> (Fructus Jujubae) nourish and harmonize the middle <i>jiao</i>.

- When accompanied by irritability and thirst, add *Zhu Ye* (Herba Phyllostachys), *Sha Shen* (Radix Glehniae seu Adenophorae), and *Tian Hua Fen* (Radix Trichosanthis).
- For cough with a dry throat and sputum that is difficult to expectorate, add *Niu Bang Zi* (Fructus Arctii) and *Gua Lou Pi* (Pericarpium Trichosanthis).

CAUTIONS / CONTRAINDICATIONS

Jia Jian Wei Rui Tang is not suitable for exterior conditions that do not have underlying yin deficiency.

The source text states to grind the ingredients into powder. Cook the powder [doses not specified by the source text] in 8 cups of water until the liquid is reduced to 3 cups. Take the strained decoction in three equally-divided doses while warm to induce sweating. Today, this formula may be prepared as a decoction using the doses suggested in brackets above.

Wei Rui Tang (Polygonatum Odoratum Decoction) releases exterior wind-heat, ventilates the Lung, clears Lung heat, and regulates qi and blood. Clinically, patients may show symptoms such as perspiration, heaviness of the whole body, dyspnea, lethargy, and dysuria.

Wei Rui Tang is a modification of *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction) with the addition of yin-nourishing, heat-clearing, blood-regulating, and qi-activating herbs.

AUTHORS' COMMENTS

Jia Jian Wei Rui Tang treats yin-deficient patients who suffer from wind-heat invasion. Thus, it may be used in elderly and postpartum patients, and those with tonsillitis, pharyngitis, and tuberculosis, because they are more likely to have yin deficiency.

Chapter 1 — Summary

— Exterior-Releasing Formulas

Exterior-releasing formulas treat exterior syndromes that are caused by the six exterior pathogenic factors of wind, cold, heat, summer-heat, dampness, and dryness. These formulas are grouped into three separate categories according to their different actions.

SECTION 1: ACRID AND WARM EXTERIOR-RELEASING FORMULAS

Name	Similarities	Differences
<i>Ma Huang Tang</i> (Ephedra Decoction)	Release wind-cold in exterior-excess conditions	Ventilates the Lung and relieves dyspnea
<i>Da Qing Long Tang</i> (Major Bluegreen Dragon Decoction)		Clears interior heat and relieves irritability
<i>Hua Gai San</i> (Canopy Powder)	Release wind-cold, ventilate the Lung, direct Lung qi downward	Strongly dispels phlegm
<i>Jin Fei Cao San</i> (Inula Powder)		Strongly releases the exterior
<i>Gui Zhi Tang</i> (Cinnamon Twig Decoction)	Releases wind-cold in exterior-deficient conditions	Harmonizes <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels
<i>Ge Gen Tang</i> (Kudzu Decoction)	Release exterior wind-cold, relieve muscle stiffness and pain	Relieves muscle stiffness and pain in the neck
<i>Jiu Wei Qiang Huo Tang</i> (Nine-Herb Decoction with Notopterygium)		Relieves muscle stiffness and pain throughout the body
<i>Xiang Su San</i> (Cyperus and Perilla Leaf Powder)	Release wind-cold, regulate qi circulation	Regulates qi circulation in the middle <i>jiao</i>
<i>Xing Su Yin</i> (Apricot Kernel and Perilla Leaf Decoction)		Dispels wind-cold, dissolves phlegm, regulates qi circulation in the upper <i>jiao</i>
<i>Shi Shen Tang</i> (Ten-Immortal Decoction)		Regulates qi circulation in the upper and middle <i>jiaos</i>
<i>Xiao Qing Long Tang</i> (Minor Bluegreen Dragon Decoction)	Release exterior wind-cold, eliminate interior phlegm	Relieves severe wind-cold attack
<i>She Gan Ma Huang Tang</i> (Belamcanda and Ephedra Decoction)		Relieves phlegm stagnation
<i>Cang Er Zi San</i> (Xanthium Powder)	Release exterior wind, open the nasal orifices	Treats nasal disorders caused by exterior wind
<i>Xin Yi San</i> (Magnolia Flower Powder)		Treats nasal disorders caused by wind-cold
<i>Qing Bi Tang</i> (Clear the Nose Decoction)		Treats nasal disorders caused by damp-heat

Ma Huang Tang (Ephedra Decoction) and *Da Qing Long Tang* (Major Bluegreen Dragon Decoction), containing both *Ma Huang* (Herba Ephedrae) and *Gui Zhi* (Ramulus Cinnamomi), are strong exterior-releasing formulas that treat severe cold at the exterior.

- *Ma Huang Tang* is suitable for exterior excess-cold syndrome characterized by aversion to cold, fever, no perspiration, a superficial, tight pulse, and some degree of dyspnea or shortness of breath.

Chapter 1 — Summary

- *Da Qing Long Tang* is used when severe constriction caused by exterior excess cold generates some interior heat. The symptoms include all those found in the *Ma Huang Tang* syndrome, plus irritability.

Hua Gai San (Canopy Powder) and *Jin Fei Cao San* (Inula Powder), containing *Ma Huang* (Herba Ephedrae) but not *Gui Zhi* (Ramulus Cinnamomi), are moderate exterior-releasing formulas that treat exterior wind-cold with Lung dysfunction.

- *Hua Gai San* treats wind-cold attacking the Lung, causing fullness and congestion of the chest with coughing, wheezing, and dyspnea.
- *Jin Fei Cao San* treats exterior wind-cold syndromes in which the functioning of the Lung is severely compromised.

Gui Zhi Tang (Cinnamon Twig Decoction), containing *Gui Zhi* (Ramulus Cinnamomi) but not *Ma Huang* (Herba Ephedrae), is weaker than *Ma Huang Tang* (Ephedra Decoction) in its exterior-releasing effects. However, because it contains *Bai Shao* (Radix Paeoniae Alba), it can harmonize the *ying* (nutritive) and *wei* (defensive) levels. It is suitable for exterior deficiency-cold syndromes.

Ge Gen Tang (Kudzu Decoction) and *Jiu Wei Qiang Huo Tang* (Nine-Herb Decoction with Notopterygium) both release exterior wind-cold and relieve muscle stiffness and pain.

- *Ge Gen Tang* treats exterior-excess, wind-cold syndromes accompanied by stiffness and pain of the neck.
- *Jiu Wei Qiang Huo Tang* dispels exterior wind, cold, and dampness. It relieves muscle stiffness and pain throughout the body.

Xiang Su San (Cyperus and Perilla Leaf Powder), *Xing Su Yin* (Apricot Kernel and Perilla Leaf Decoction), and *Shi Shen Tang* (Ten-Immortal Decoction) have mild-to-moderate abilities to release exterior wind-cold. All have functions to regulate qi circulation and relieve interior qi stagnation.

- *Xiang Su San* treats exterior wind-cold with qi stagnation in the middle *jiao*, with signs and symptoms such as fever, aversion to cold, no perspiration, and chest and abdominal fullness and rigidity.
- *Xing Su Yin* is designed specially for children who have wind-cold attacking the exterior parts of the body, with signs and symptoms such as headache, fever, aversion to cold, nausea, vomiting, drooling, sticky nasal discharge, sneezing, and cough.
- *Shi Shen Tang* treats exterior wind-cold with qi stagnation in the upper and middle *jiaos*, with signs and symptoms such as fever, cough, dyspnea, chest congestion, hypochondriac distention, aversion to cold, and no perspiration.

Xiao Qing Long Tang (Minor Bluegreen Dragon Decoction) and *She Gan Ma Huang Tang* (Belamcanda and Ephedra Decoction) both release exterior wind-cold and treat interior phlegm retention.

- *Xiao Qing Long Tang* emphasizes releasing severe cases of wind-cold attack and dispels *ying* (invisible phlegm).
- *She Gan Ma Huang Tang* focuses on restoring the appropriate flow of Lung qi, relieving dyspnea, and eliminating *tan yin* (phlegm retention).

Cang Er Zi San (Xanthium Powder), *Xin Yi San* (Magnolia Flower Powder), and *Qing Bi Tang* (Clear the Nose Decoction) treat nasal disorders, such as sinusitis and rhinitis.

- *Cang Er Zi San* treats nasal disorders caused by wind, with signs and symptoms such as stuffy nose, thick, yellow nasal discharge, and frontal and temporal headaches.
- *Xin Yi San* treats nasal disorders caused by wind-cold, with signs and symptoms such as stuffy nose, profuse, clear and white nasal discharge, and headache.

Chapter 1 — Summary

- *Qing Bi Tang* treats nasal disorders that are changing from an exterior (wind-cold or wind-heat) to an interior (damp-heat) condition. Clinical manifestations include stuffy nose, yellow and sticky nasal discharge, sneezing, fatigue, headache, an itchy nose and throat, a decreased sense of smell, and decreased energy level.

SECTION 2: ACRID AND COLD EXTERIOR-RELEASING FORMULAS

Name	Similarities	Differences
<i>Sang Ju Yin</i> (Mulberry Leaf and Chrysanthemum Decoction)	Release exterior wind-heat	Stronger functions to ventilate the Lung to suppress cough
<i>Yin Qiao San</i> (Honeysuckle and Forsythia Powder)		Stronger functions to clear heat, relieve sore throat, and release the exterior
<i>Ma Xing Gan Shi Tang</i> (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction)	Release exterior wind-heat, clear Lung heat	Ventilates the Lung, clears Lung heat, and relieves cough and dyspnea.
<i>Yue Bi Tang</i> (Maid servant from Yue Decoction)		Eliminates water accumulation and relieves edema
<i>Sheng Ma Ge Gen Tang</i> (Cimicifuga and Kudzu Decoction)	Release exterior pathogenic factors from the muscle layer	Raises yang qi and promotes the eruption of measles
<i>Zhu Ye Liu Bang Tang</i> (Lophatherum, Tamarisk and Arctium Decoction)		Clears Lung and Stomach heat and promotes the eruption of measles
<i>Chai Ge Jie Ji Tang</i> (Bupleurum and Kudzu Decoction to Release the Muscle Layer)		Resolves the transformation of <i>taiyang</i> wind-cold into <i>yangming</i> heat
<i>Cong Chi Jie Geng Tang</i> (Scallion, Prepared Soybean, and Platycodon Decoction)		Releases wind-heat and clears Lung heat
<i>Ning Sou Wan</i> (Quiet the Cough Pill)	Clear Lung heat, suppress cough	Releases exterior wind-heat, clears Lungs heat
<i>Dun Sou San</i> (Long-Bout Cough Powder)		Clears heat and dissolves phlegm
<i>Zhi Sou San</i> (Stop Coughing Powder)		Releases exterior wind, dissolves phlegm
<i>Jing Jie Lian Qiao Tang</i> (Schizonepeta and Forsythia Decoction)	Dispel wind-heat from the upper parts of the body	Dispels heat, fire, and toxins, treats ear and nose disorders
<i>Xin Yi Qing Fei Yin</i> (Magnolia Decoction to Clear the Lung)		Clears Lung heat, treats lung and nose disorders

Sang Ju Yin (Mulberry Leaf and Chrysanthemum Decoction) and *Yin Qiao San* (Honeysuckle and Forsythia Powder) are cool, acrid formulas that release exterior wind-heat to treat the initial stages of warm febrile disorders.

- *Sang Ju Yin* has a stronger effect to ventilate the Lung to arrest cough. It treats exterior wind-warmth syndrome characterized by reversed flow of Lung qi and other mild exterior wind-heat symptoms.
- *Yin Qiao San* has stronger heat-clearing and exterior-releasing effects. It is suitable for severe wind-heat conditions or *wen bing* (warm disease) disorders, with symptoms of heat and toxicity, such as fever, thirst, and sore throat.

Ma Huang Xing Ren Gan Cao Shi Gao Tang (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction) and *Yue Bi Tang* (Maid servant from Yue Decoction) both release exterior wind-heat and clear Lung heat.

Chapter 1 — Summary

- **Ma Huang Xing Ren Gan Cao Shi Gao Tang** has stronger functions to clear Lung heat and ventilate the Lung. It treats Lung heat caused by exterior pathogenic factors, with symptoms such as unremitting fever, thirst with a desire to drink, coughing and dyspnea.
- **Yue Bi Tang** releases the exterior and eliminates water accumulation. It treats conditions in which there are signs and symptoms of aversion to wind, spontaneous sweating, absence of thirst, and generalized edema.

Sheng Ma Ge Gen Tang (Cimicifuga and Kudzu Decoction), **Zhu Ye Liu Bang Tang** (Lophatherum, Tamarisk and Arctium Decoction), **Chai Ge Jie Ji Tang** (Bupleurum and Kudzu Decoction to Release the Muscle Layer), and **Cong Chi Jie Geng Tang** (Scallion, Prepared Soybean, and Platycodon Decoction) have similar functions to release exterior pathogenic factors from the muscle layer.

- **Sheng Ma Ge Gen Tang** lifts yang qi, relieves the muscles, and enhances the eruption of measles. It treats incomplete eruption of measles with fever and absence of sweating.
- **Zhu Ye Liu Bang Tang** clears Lung and Stomach heat, eliminates toxins, and promotes the eruption of measles.
- **Chai Ge Jie Ji Tang** dispels exterior factors from the muscles and clears heat, and is indicated in conditions in which the disease factor is turning from wind-cold into wind-heat. It may be used to treat heat affecting the *yangming* channel, or heat affecting all three yang channels (*taiyang*, *yangming*, and *shaoyang*).
- **Cong Chi Jie Geng Tang** is a mild formula used to treat the early stage of wind-heat syndrome. It may be used for mild cases of Lung heat with thirst and a sore throat.

Ning Sou Wan (Quiet the Cough Pill), **Dun Sou San** (Long-Bout Cough Powder), and **Zhi Sou San** (Stop Coughing Powder) clear heat and suppress cough.

- **Ning Sou Wan** releases exterior wind-heat and clears Lung heat to relieve cough.
- **Dun Sou San** clears heat and dissolves phlegm to suppress cough.
- **Zhi Sou San** releases exterior wind and dissolves phlegm to stop cough.

Jing Jie Lian Qiao Tang (Schizonepeta and Forsythia Decoction) and **Xin Yi Qing Fei Yin** (Magnolia Decoction to Clear the Lung) both dispel wind-heat from the upper parts of the body.

- **Jing Jie Lian Qiao Tang** dispels heat, fire, and toxins to treat inflammation and swelling of the ears and nose.
- **Xin Yi Qing Fei Yin** clears Lung heat to treat obstruction and congestion of the nose.

Chapter 1 — Summary

SECTION 3: SUPPORTING [THE UPRIGHT] AND RELEASING [THE EXTERIOR] FORMULAS

Name	Similarities	Differences
Bai Du San (Overcome Pathogenic Influences Powder)	Release exterior wind-cold, tonify qi	Tonifies qi, dispels wind, cold and dampness
Shen Su Yin (Ginseng and Perilla Leaf Decoction)		Tonifies Lung and Spleen qi, dispels phlegm, and stops cough
Zai Zao San (Renewal Powder)	Release exterior wind-cold, strengthen yang	Strengthens yang and qi
Ma Huang Fu Zi Xi Xin Tang (Ephedra, Asarum, and Prepared Aconite Decoction)		Strongly strengthens yang
Cong Bai Qi Wei Yin (Scallion Decoction with Seven Ingredients)	Releases exterior wind-cold	Nourishes yin and blood
Jia Jian Wei Rui Tang (Modified Polygonatum Odoratum Decoction)	Releases exterior wind-heat	Nourishes yin

Bai Du San (Overcome Pathogenic Influences Powder) and **Shen Su Yin** (Ginseng and Perilla Leaf Decoction) both release exterior wind-cold. They both contain *Ren Shen* (Radix et Rhizoma Ginseng) to tonify qi in individuals with underlying weakness and deficiency.

- **Bai Du San** relieves dampness lodged in the channels, causing body aches, neck and shoulder stiffness, and headache. It is better at treating wind-cold and dampness at the superficial level.
- **Shen Su Yin** focuses on dispelling dampness affecting the Lung, manifesting in white nasal discharge, white sputum, chest congestion, and a feeling of heaviness. It is stronger in regulating Lung qi and dissolving phlegm. It is better for treating invasion of wind-cold in individuals who are qi deficient and who also have interior *tan yin* (phlegm retention).

Zai Zao San (Renewal Powder), acrid and warm, strengthens yang and nourishes qi while inducing sweating. It is suitable for patients with yang qi deficiency in the interior and excess cold at the exterior.

Ma Huang Fu Zi Xi Xin Tang (Ephedra, Asarum, and Prepared Aconite Decoction) is a unique formula that treats both *shaoyin* (interior) and *taiyang* (exterior) syndromes simultaneously, by strengthening interior yang and releasing exterior wind-cold.

Cong Bai Qi Wei Yin (Scallion Decoction with Seven Ingredients) nourishes yin and blood and releases exterior pathogenic factors. It is suitable for exterior wind-cold syndrome in patients with constitutional yin and blood deficiencies.

Jia Jian Wei Rui Tang (Modified Polygonatum Odoratum Decoction) nourishes yin and releases exterior factors to treat exterior wind-heat syndrome accompanied by yin deficiency.

Chapter 2

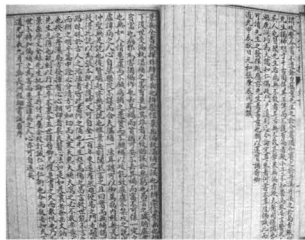

— Downward Draining Formulas

张景岳 Zhāng Jǐng-Yuè

张景岳 Zhāng Jǐng-Yuè, also known as 张介宾 Zhāng Jiè-Bīn, 1563 – 1640.

张景岳 Zhāng Jǐng-Yuè

景岳全书 *Jing Yue Quan Shu* (Collected Treatises of [Zhang] Jing Yue) in 1624.

Born into a wealthy military family, Zhang Jing-Yue was intensely curious and could afford the time and money to explore many different interests. Zhang studied astrology, philosophy, music, medicine, and many other subjects. Of all the topics, Zhang was most interested in and excelled in medicine. He specialized in and studied the *Huang Di Nei Jing* (Yellow Emperor's Inner Classic) for 30 years.

During the Ming dynasty when Zhang practiced medicine, many physicians over-prescribed the use of herbs that were acrid, hot and drying, and consequently injured yin and body fluids. Zhang proposed and used tonic herbs to rescue damaged yin and body fluids, and significantly influenced the practice of Traditional Chinese Medicine. Many tonic formulas he used then are still frequently prescribed today.

Zhang published many texts in his lifetime, and is best known for 景岳全书 *Jing Yue Quan Shu* (Collected Treatises of [Zhang] Jing Yue) in 1624. This comprehensive text discussed many aspects of medicine, including theory, treatment strategies, herbs, formulas, gynecology, pediatrics, and more. Because of his military background, Zhang also proposed treatment strategies based on military tactics, such as 八阵 *Ba Zhen* (Eight Arrays of Formulas): 补 *bu* (tonic) formulas to treat deficiency, 和 *he* (harmonizing) formulas to treat disharmony, 攻 *gong* (attack) formulas to treat excess, 散 *san* (disperse) formulas to disperse exterior conditions, 寒 *han* (cold) formulas to clear heat, 热 *re* (hot) formulas to dispel cold, 固 *gu* (stabilize) formulas to stop loss (of body fluids), and 因 *yin* (pattern-specific) formulas to treat specific disorders.

As a great compliment, Zhang Jing-Yue is remembered by many as the reincarnation of Zhang Zhong-Jing.

Examples of formulas of Zhang Jing-Yue that are in common use today include:

- *Zhou Che Wan* (Vessel and Vehicle Pill)
- *Ji Chuan Jian* (Benefit the River [Flow] Decoction)
- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver)
- *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea)
- *Yu Nu Jian* (Jade Woman Decoction)
- *Zuo Gui Wan* (Restore the Left [Kidney] Pill)
- *You Gui Wan* (Restore the Right [Kidney] Pill)
- *Tai Shan Pan Shi San* (Powder that Gives the Stability of Mount Tai)

Chapter 2 — Overview

— Downward Draining Formulas

Definition: Downward draining formulas consist mostly of purgative herbs, and function to pass stools, drain excess heat, dispel accumulation and stagnation from the Stomach and Intestines, and drastically eliminate water retention and cold stagnation. This method of treatment is known as *xia fa* (draining downward), one of the *ba fa* (eight treatment methods) described in the *Huang Di Nei Jing* (Yellow Emperor's Inner Classic) in the first or second century, A.D.

In general, downward draining formulas treat interior excess syndromes characterized by constipation and water retention. Constipation may be hot or cold in nature, and the patients may be generally healthy or have pre-existing underlying deficiencies. To address varying disease characteristics and patient constitutions, these formulas have been designed with distinct functions, to be carefully prescribed. These formulas' complexities and distinctiveness are reflected in five subcategories of action.

"Interior excess syndrome" refers to a wide variety of disorders and illnesses, including qi stagnation, blood stagnation, phlegm retention, food stagnation, constipation, water retention, parasitic infestation, and others. This chapter primarily discusses downward draining formulas that treat interior excess syndromes characterized by constipation and water retention. Treatment of other interior excess conditions is discussed in other chapters.

SUBCATEGORIES OF ACTION

1. Cold Purgatives

These formulas eliminate interior excess conditions involving heat stagnation or accumulation. Common clinical manifestations include constipation, abdominal fullness, distention, or pain. In severe cases, there may be tidal fever, a yellow tongue coating, and an excess pulse.

Herbs commonly used to purge interior heat and excess include *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas). Formulas commonly used to purge interior heat and excess include *Da Cheng Qi Tang* (Major Order the Qi Decoction), *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction) and *Da Xian Xiong Tang* (Major Sinking into the Chest Decoction).

Interior excess syndromes are characterized by constipation and water retention.

2. Warm Purgatives

Warm purgative formulas address interior excess cold syndromes. Common clinical manifestations include constipation, epigastric and abdominal fullness and distention, abdominal pain alleviated by warmth, cold to icy extremities, a white, slippery tongue coating, and a deep, tight pulse.

Interior excess cold syndromes are treated with herbs that are warm or hot (to disperse cold) with downward draining functions (to dispel interior excess), such as *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Gan Jiang* (Rhizoma Zingiberis), and *Ba Dou* (Semen Crotonis). Formulas commonly used to purge interior excess cold include *Da Huang Fu Zi Tang* (Rhubarb and Prepared Aconite Decoction), *Wen Pi Tang* (Warm the Spleen Decoction), and *San Wu Bei Ji Wan* (Three-Substance Pill for Emergencies). Interior-warming formulas may be added to these warm purgative formulas enhance the overall therapeutic impact.

Chapter 2 — Overview

3. Moist Laxatives

Moist laxative formulas treat constipation caused by heat and dryness in the Intestines, which damage yin. These formulas lubricate the Intestines to promote normal bowel movements. Most formulas in this subcategory are composed of moist laxatives and cold purgatives.

Representative herbs include *Huo Ma Ren* (Fructus Cannabis), *Ku Xing Ren* (Semen Armeniacae Amarum), *Tao Ren* (Semen Persicae), and *Yu Li Ren* (Semen Pruni). Representative formulas include *Ma Zi Ren Wan* (Hemp Seed Pill) and *Run Chang Wan* (Moisten the Intestines Pill).

Moist laxatives also treat constipation associated with chronic illness, in which there is Kidney yang deficiency or *ming men* (life gate) fire insufficiency. Exemplar herbs that warm and tonify the Kidney and lubricate the Intestines include *Rou Cong Rong* (Herba Cistanches) and *Dang Gui* (Radix Angelicae Sinensis). One representative formula is *Ji Chuan Jian* (Benefit the River [Flow] Decoction).

4. Harsh Expellants (Cathartics)

These formulas treat excess syndromes involving interior accumulation of water and heat.

This group of downward draining formulas eliminates internal swelling and excess water accumulation through defecation and urination. Clinical applications of harsh expellants include treatment of hydrothorax, ascites, edema, and difficulties in urination and defecation. These formulas are potentially toxic and drastic in effect, and should be used with extreme caution, especially in individuals who have generalized deficiencies.

Herbs with potent action to eliminate excess syndromes of interior water accumulation include *Yuan Hua* (Flos Genkwa), *Gan Sui* (Radix Kansui), and *Qian Niu Zi* (Semen Pharbitidis). Exemplar formulas include *Shi Zao Tang* (Ten-Jujube Decoction) and *Zhou Che Wan* (Vessel and Vehicle Pill).

5. Purgative and Tonic Formulas

These formulas treat constipation characterized by concurrent internal excess and deficiency. This syndrome requires the use of both downward draining and tonifying methods to ensure that the stools are moved and the qi is not damaged. These two methods cannot be used individually if both conditions are present. If only the downward draining method is employed, the qi may consequently become more deficient. If only the tonifying method is used, then the constipated stool may become more stagnant.

Downward draining herbs commonly used to drain interior excess include *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas). Tonic herbs frequently used to tonify interior deficiency include *Ren Shen* (Radix et Rhizoma Ginseng), *Dang Gui* (Radix Angelicae Sinensis), *Di Huang* (Radix Rehmanniae), and *Xuan Shen* (Radix Scrophulariae). Exemplar formulas having both downward draining and tonic actions include *Xin Jia Huang Long Tang* (Newly-Augmented Yellow Dragon Decoction) and *Zeng Ye Cheng Qi Tang* (Increase the Fluids and Order the Qi Decoction).

CAUTIONS / CONTRAINDICATIONS

- Downward draining formulas are designed to treat interior excess syndromes. If patients have both exterior and interior excess symptoms, then one should dispel the exterior factor first, before eliminating the interior excess. In some cases, both exterior and interior factors may be dispelled at the same time.
- Downward draining formulas should be used with caution during pregnancy, in postpartum and nursing mothers, in the elderly and infants and children, or any individual with bleeding disorders, or underlying qi, blood, and/or body fluid deficiencies. In general, for these patients, use tonic herbs either after, or in conjunction with, the downward draining formulas.

~
Harsh expellant
formulas eliminate
swelling and excess water
through defecation and
urination.
~

~
Downward-draining
formulas tend to consume
Stomach qi: they should be
discontinued immediately
once the desired effects
have been achieved.
~

Chapter 2 — Overview

- Since most of the downward draining formulas have a tendency to consume Stomach qi, they should be discontinued immediately once the desired effects have been achieved.
- To prevent further consumption of Stomach qi, avoid foods that are oily, greasy, or hard to digest.

PROCESSING

Da Huang (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) are commonly used in downward draining formulas. To potentiate the downward draining effect, *Da Huang* (Radix et Rhizoma Rhei) is usually post-decocted, and *Mang Xiao* (Natrii Sulfas) is usually dissolved in the decoction immediately prior to ingestion. Cooking these two herbs in the decoction with the rest of the herbs compromises the overall potency and effectiveness of the formulas.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Downward draining formulas primarily treat gastrointestinal disorders, such as constipation, intestinal obstruction, and related imbalances.

1. **Constipation:** Almost all downward draining formulas have purgative and/or laxative effects, and commonly treat constipation. Downward draining formulas have different potencies and mechanisms of action. Proper formula selection depends on the characteristics of the constipation and the overall constitution of the patient. *Da Cheng Qi Tang* (Major Order the Qi Decoction) and *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction) have potent purgative actions to treat moderate to severe constipation. Their mechanism of action involves stimulating the intestines to increase contraction and peristalsis.^{1,2} *Ma Zi Ren Wan* (Hemp Seed Pill) and *Run Chang Wan* (Moisten the Intestines Pill) have moderate laxative effects to treat mild to moderate constipation. Their mechanisms of action are lubrication of the intestines and promotion of bowel movement.³
2. **Intestinal obstruction:** Some potent downward draining formulas, such as *Da Cheng Qi Tang* (Major Order the Qi Decoction) and *Da Xian Xiong Tang* (Major Sinking into the Chest Decoction), treat intestinal obstruction by strongly stimulating the intestines to promote evacuation of the bowels.^{4,5,6}
3. **Gastrointestinal disorders:** Downward draining formulas treat gastrointestinal disorders, such as acute abdominal pain,⁷ chronic colitis,⁸ chronic gastritis,⁹ peptic ulcer disease,¹⁰ acute gastroenteritis,¹¹ acute appendicitis,¹² and post-surgical constipation.¹³

Proper formula selection depends on the patient's overall constitution and the nature of the constipation.

Section 1

寒下剂
— Cold Purgatives

Dà Chéng Qì Tāng (Major Order the Qi Decoction)

大承氣湯

大承气汤

Pinyin Name: *Da Cheng Qi Tang*

Literal Name: Major Order the Qi Decoction

Alternate Names: *Ta Cheng Chi Tang*, *Da Cheng Chi Tang*, Major Chi-Infusing Decoction, Major Purgative Decoction, Major Rhubarb CombinationOriginal Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Da Huang</i> (Radix et Rhizoma Rhei), <i>xi</i> (washed) with liquor	12g
<i>Mang Xiao</i> (Natrii Sulfas)	0.3 cup [6-9g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>zhi</i> (fried with liquid)	24g [15-24g]
<i>Zhi Shi</i> (Fructus Aurantii Immaturus)	5 pieces [12g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to first cook *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis) with 10 cups [2,000 mL] of water until 5 cups [1,000 mL] of the liquid remain. Discard the residue, add *Da Huang* (Radix et Rhizoma Rhei), and cook until the liquid is further reduced to 2 cups [400 mL]. Discard the residue, add *Mang Xiao* (Natrii Sulfas), and bring the decoction to a boil 1-2 times using only low intensity fire. Take half [1 cup] of the warm decoction twice daily. Discontinue the formula once bowel movement has been induced.

Today, this formula is prepared as a decoction using the doses suggested in brackets above, with *Da Huang* (Radix et Rhizoma Rhei) post-decocted only for a short period of time and *Mang Xiao* (Natrii Sulfas) dissolved into the warm, strained decoction immediately before ingestion.

CHINESE THERAPEUTIC ACTIONS

Drastically drains heat and accumulation downward

CLINICAL MANIFESTATIONS

1. Excess *yangming fu* (hollow organ) syndrome: constipation, fullness and distention of epigastrium and abdomen,

abdominal pain aggravated by pressure, a feeling of hardness upon palpation, and, in severe cases, tidal fever, delirium, trembling and perspiration of the extremities, a dry, yellow prickly or dry, black tongue coating, and a deep, slippery, and excess pulse.

2. Impacted stools accompanied by watery fluids: blue-green, watery fluids with a foul smell, abdominal and periumbilical pain, abdominal rigidity resembling a solid mass when palpated, a dry tongue and mouth, and a slippery, excess pulse.
3. Interior excess heat causing *re jue* (heat reversal), convulsions, and mania.

CLINICAL APPLICATIONS

Severe constipation, habitual constipation, post-operative constipation, enteroparalysis, intestinal obstruction, cholecystitis, hepatitis, infection of gallbladder and bile duct, pancreatitis, acute pancreatitis, appendicitis, acute appendicitis, tetanus, urinary stones, acute eczema, food poisoning requiring purging of toxic substances, organophosphorus poisoning, and lead poisoning.

EXPLANATION

Da Cheng Qi Tang (Major Order the Qi Decoction) is representative of cold purgative formulas and has a wide

Dà Chéng Qì Tāng (Major Order the Qì Decoction)

Da Cheng Qi Tang (Major Order the Qi Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Accumulation of excess heat in the Stomach and Intestines	<ul style="list-style-type: none"> • Constipation, fullness and distention in the epigastrium and abdomen, abdominal pain aggravated by pressure, and a feeling of hardness upon palpation: accumulation of excess heat in the Stomach and Intestines • Dry mouth and tongue: heat drying up body fluids • Dry, yellow prickly or dry, black tongue coating, and a deep, excess pulse: interior excess heat 	Drastically drains heat and accumulation downward	<ul style="list-style-type: none"> • <i>Da Huang</i> (Radix et Rhizoma Rhei) clears heat and purges constipated stools. • <i>Mang Xiao</i> (Natrii Sulfas) clears heat, moistens dryness, and softens the stool. • <i>Hou Po</i> (Cortex Magnoliae Officinalis) activates qi circulation and disperses accumulation. • <i>Zhi Shi</i> (Fructus Aurantii Immaturus) relieves fullness and distention.

range of functions. This formula was first presented in *Shang Han Lun* (Discussion of Cold-Induced Disorders) for treating *yangming fu* (hollow organs) syndrome. This syndrome arises when the wind-cold factor is not dispelled at the exterior. It then travels into the interior *zang fu* organs, where it transforms into heat, and binds with the stools.

This *yangming fu* syndrome is a condition characterized by interior excess heat. Because the heat is bound up with the stool, the stool becomes hard, causing constipation. The dry stool may disturb qi circulation, causing fullness and distention of the epigastrium and abdomen. In severe cases, the heat disturbs the Heart and *shen* (spirit) and gives rise to delirium. Trembling and perspiration of the extremities are the consequences of interior excess heat forcing body fluids out of the body. The dry mouth and tongue signify heat drying up body fluids. The tongue and pulse conditions both suggest interior excess heat.

Some patients with interior excess heat may show slightly different clinical manifestations. Some may actually pass blue-green fluids rectally. The reason for this is that the heat and stools are so tightly interlocked that the turbid water in the intestines has nowhere to go but to be excreted rectally as watery fluids. The fetid smell is caused by heat and stagnation. Because the stools are so hard in the large intestine, they feel like a solid mass when palpated.

This formula can treat patients who have *re jue* (heat reversal), convulsions, and mania caused by interior excess heat. *Re jue* (heat reversal) is a morbid condition in which excess pathogenic heat consumes body fluids. Damaged body fluids impair the normal circulation of yang qi and give rise to cold extremities. The spasms and cramps seen in convulsions are caused by heat consuming yin and body fluids; the insufficient yin and body fluids

fail to nourish the tendons. Mania is caused by heat disturbing the *shen* (spirit) in extreme cases.

All of the above conditions have the same etiology: interior heat accumulates in the Stomach and Intestines, causing consumption of yin and body fluids. The four diagnostic signs associated with use of this formula are: *pi* (distention), *man* (fullness), *zao* (dryness), and *shi* (hardness), with a dry yellow or black tongue coating, and a deep, slippery and excess pulse. Treatment calls for the use of drastic purgative herbs to quickly dispel heat and accumulation. Immediate action must be taken in order to preserve yin and body fluids from being consumed further.

Da Huang (Radix et Rhizoma Rhei), the chief herb, clears the Stomach and Intestines by quickly purging heat and constipated stools. *Mang Xiao* (Natrii Sulfas), the deputy herb, clears heat, moistens dryness, and softens the stools. *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) mutually enforce each other in their actions of dispelling heat and purging constipated stools. *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus) regulate qi flow to relieve fullness and distention, and activate qi circulation to help dispel heat and stagnant stools.

MODIFICATIONS

- If there is severe thirst as a result of dryness and heat, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).
- When there is qi and blood stagnation, add *Chi Shao* (Radix Paeoniae Rubra) and *Tao Ren* (Semen Persicae).
- If accompanied by qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng).
- For yin or body fluid deficiencies, add *Xuan Shen* (Radix Scrophulariae) and *Di Huang* (Radix Rehmanniae).

Dà Chéng Qì Tāng (Major Order the Qi Decoction)

- With a feeling of fullness, distention, and oppression in the abdomen, add *Lai Fu Zi* (Semen Raphani) and *Mu Xiang* (Radix Aucklandiae).
- For dry stools and pain, increase the dose of *Mang Xiao* (Natrii Sulfas) and add *Gua Lou Zi* (Semen Trichosanthis).
- For hemorrhoids, constipation, and painful defecation, add *Huang Qin* (Radix Scutellariae) and *Ru Xiang* (Gummi Olibanum).
- For ascites, add *Gan Sui* (Radix Kansui) and *Yuan Hua* (Flos Genkwa).

CAUTIONS / CONTRAINDICATIONS

- Do not use *Da Cheng Qi Tang* when the exterior syndrome is not yet resolved, or for mild to moderate cases of constipation.
- This is a drastic downward draining formula. This formula is contraindicated in pregnant women, and in geriatric or convalescing patients. It is also contraindicated in individuals with yin or qi deficiency, or generalized weakness.
- Discontinue this formula once the desired effects are achieved. Prolonged use may injure the qi.

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** Administration of *Da Cheng Qi Tang* in guinea pigs was been associated with increased contraction and peristalsis. The mechanism of action is attributed to the stimulating effect on the smooth muscles of the intestines.¹
2. **Digestive:** The effect of *Da Cheng Qi Tang* on the organs associated with digestion was evaluated by administering the formula to rats. The study reported that the herbs had a stimulating effect on the gastrointestinal system and increased the production of gastric acid and pancreatic enzymes. The herbs, however, had little influence on the production and release of bile acid.²
3. **Antibiotic:** Administration of *Da Cheng Qi Tang* was associated with an inhibitory effect *in vitro* against *Staphylococcus aureus*, *Salmonella typhi*, *Bacillus dysenteriae*, and *Bacillus paratyphosus*.³
4. **Effect on atherosclerosis:** *Da Cheng Qi Tang* prevented arteriosclerosis by inhibiting the proliferation of vascular smooth muscle cells.⁴

CLINICAL STUDIES AND RESEARCH

1. **Intestinal obstruction:** Sixty-six patients with intestinal obstruction were treated with *Da Cheng Qi Tang* with 100% success rate. In follow-ups, 46 patients had no recurrence within 3 years. The 20 patients who had recurrences were treated with the same formula with complete recovery.⁵ In another study, individuals with intestinal obstruction were divided into two groups and treated with herbs accordingly. Group one with 78 patients (42

males, 36 females, average of 43 years of age) was treated with *Da Cheng Qi Tang* plus *Lai Fu Zi* (Semen Raphani) and *Huang Qin* (Radix Scutellariae) in decoction one time daily for up to three days with 92.3% effectiveness. Group two with 92 patients (52 males, 40 females, average of 41 years of age) was treated with *Da Cheng Qi Tang* only in decoction one time daily for up to two days with 76.1% effectiveness.⁶

2. **Enteroparalysis:** Administration of modified *Da Cheng Qi Tang* was associated with good results in treating 40 patients with enteroparalysis. Clinical results include passage of gas, bowel movement, and relief of abdominal distention and pain within 2 to 6 hours.⁷
3. **Infection of gallbladder and bile duct:** A modification of *Da Cheng Qi Tang* was used to treat 128 patients with acute infection of the gallbladder or the bile duct with complete recovery in 81 patients, moderate improvement in 33 patients, and no benefit in 14 patients. The study concluded an overall rate of effectiveness of 89%.⁸
4. **Cholecystitis:** One study reported marked improvement using modified *Da Cheng Qi Tang* to treat 75 patients with acute inflammation of the gallbladder. The herbal treatment contained *Da Cheng Qi Tang* plus *Pu Gong Ying* (Herba Taraxaci), *Jin Qian Cao* (Herba Lysimachiae) and *San Qi* (Radix et Rhizoma Notoginseng) as the base formula. Modifications included addition of *Xiang Fu* (Rhizoma Cyperi) and *Yu Jin* (Radix Curcumae) for qi stagnation; *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae) for excess heat; and *Yin Chen* (Herba Artemisiae Scopariae) and *Zhi Zi* (Fructus Gardeniae) for damp-heat. The herbs were given in decoction two times daily. The average duration of treatment was 8.34 days. The study reported recovery in 50 of 75 patients.⁹
5. **Acute appendicitis:** Modified *Da Cheng Qi Tang* was used to treat 150 patients with acute appendicitis with complete recovery in 147 patients, improvement in 2 patients, and referral to surgery in one patient. The patients received herbs for 3 to 6 days. The formula used included *Da Huang* (Radix et Rhizoma Rhei) 15 to 30g (post-decocted), *Hou Po* (Cortex Magnoliae Officinalis) 10g, *Zhi Qiao* (Fructus Aurantii) 10g, *Bai Jiang Cao* (Herba cum Radice Patriniae) 30g, *Bai Hua She She Cao* (Herba Hedyotis) 30g, *Da Xue Teng* (Caulis Sargentodoxae) 30g, *Hu Zhang* (Rhizoma et Radix Polygoni Cuspidati) 30g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 25g, and *Tao Ren* (Semen Persicae) 12g.¹⁰
6. **Acute pancreatitis:** Modified *Da Cheng Qi Tang* has been shown to effectively treat acute pancreatitis. The study used *Da Cheng Qi Tang* plus *Huang Qin* (Radix Scutellariae), *Huang Bo* (Cortex Phellodendri Chinensis), and *Chai Hu* (Radix Bupleuri) as the base formula, with addition of

Dà Chéng Qì Tāng (Major Order the Qì Decoction)

Jin Yin Hua (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae) for excess heat in the Stomach and Intestines; *Yin Chen* (Herba Artemisiae Scopariae) and *Zhi Zi* (Fructus Gardeniae) for damp-heat jaundice; and *Ku Lian Pi* (Cortex Meliae), *Bing Lang* (Semen Arecae), and *Xi Xin* (Radix et Rhizoma Asari) for biliary ascariasis. The treatment protocol was to administer 500 mL of the decoction twice daily six hours apart. For those without constipation, *Mang Xiao* (Natrii Sulfas) and *Da Huang* (Radix et Rhizoma Rhei) were removed from the formula, and the decoction was given only one time per day. The study reported complete recovery in all 48 patients (20 males and 28 females) with an average of 8.34 days.¹¹

7. **Tetanus:** An herbal treatment that contained *Da Cheng Qi Tang* plus *Chan Tui* (Periostracum Cicadae) was used successfully to treat mild to moderate cases of tetanus.¹²
8. **Urolithiasis:** An herbal formula that contained *Da Cheng Qi Tang* plus *Hai Jin Sha* (Spora Lygodii) and *Jin Qian Cao* (Herba Lysimachiae) demonstrated success in treating urinary stones. The study reported complete recovery in 134 of 138 patients (97.2%). The duration of treatment (for successful expulsion of the stones) ranged from 2 to 33 days.¹³
9. **Acute eczema:** Use of modified *Da Cheng Qi Tang* effectively treated acute eczema. The herbal treatment consisted of *Da Cheng Qi Tang* plus *Chan Tui* (Periostracum Cicadae), *Chi Shao* (Radix Paeoniae Rubra) and *Jin Yin Hua* (Flos Lonicerae Japonicae) as the base formula. Modifications included the addition of *Bai Xian Pi* (Cortex Dictamni) and *Ku Shen* (Radix Sophorae Flavescentis) for severe itching; the removal of *Mang Xiao* (Natrii Sulfas) and the addition of *Shan Yao* (Rhizoma Dioscoreae) for loose stools; *Pu Gong Ying* (Herba Taraxaci) and *Cang Zhu* (Rhizoma Atractylodis) for eczema with discharge; and *Di Long* (Pheretima) for elevated body temperature. The duration of treatment ranged from 10 to 20 days. Of 34 patients, the study reported complete recovery in 19 patients within 10 days, complete recovery in 13 patients within 20 days, and improvement in 2 patients within 20 days.¹⁴
10. **Organophosphorus poisoning:** Patients with acute organophosphorus poisoning were first treated with gastric lavage followed by administration of one dose of *Da Cheng Qi Tang* via gastric tube. Of 35 patients, the study reported complete recovery in 32 patients and fatality in 3 patients.¹⁵
11. **Lead poisoning:** One study reported complete recovery in all 30 patients suffering from chronic lead poisoning. The herbal formula used *Da Cheng Qi Tang* as the base formula, and added *Yan Hu Suo* (Rhizoma Corydalis) and *Wu Yao* (Radix Linderae) for acute and excruciating abdominal pain; *Qian Niu Zi* (Semen Pharbitidis) and *Yu Li Ren* (Semen Pruni) for chronic constipation; *Shan Zha*

(Fructus Crataegi), *Lai Fu Zi* (Semen Raphani), and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) for poor appetite; *Ren Shen* (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), *Dang Gui* (Radix Angelicae Sinensis), and *Bai Shao* (Radix Paeoniae Alba) for qi and blood deficiencies.¹⁶

RELATED FORMULAS

Fù Fāng Dà Chéng Qì Tāng

(Revised Major Order the Qì Decoction)

複方大承氣湯

复方大承气汤

Pinyin Name: *Fu Fang Da Cheng Qi Tang*

Literal Name: Revised Major Order the Qì Decoction

Original Source: *Zhong Xi Yi Jie He Zhi Liao Ji Fu Zheng* (Combined Chinese and Western Medical Treatment of the Acute Abdomen) by Nankai Hospital of Tianjin in 1973

<i>Hou Po</i> (Cortex Magnoliae Officinalis)	15-30g
<i>Lai Fu Zi</i> (Semen Raphani), <i>chao</i> (dry-fried)	15-30g
<i>Zhi Shi</i> (Fructus Aurantii Immaturus)	15g
<i>Tao Ren</i> (Semen Persicae)	9g
<i>Chi Shao</i> (Radix Paeoniae Rubra)	15g
<i>Da Huang</i> (Radix et Rhizoma Rhei), post-decocted	15g
<i>Mang Xiao</i> (Natrii Sulfas), <i>chong fu</i> (taken drenched)	9-15g

Prepare this formula as a decoction and add *Da Huang* (Radix et Rhizoma Rhei) near the end of cooking. Dissolve *Mang Xiao* (Natrii Sulfas) in the strained decoction prior to ingestion. Today, for maximum effect in removing intestinal obstruction, the first dose may be administered by nasogastric tube, followed by rectal instillation in the form of an enema as the second dose 2-3 hours later.

Fu Fang Da Cheng Qi Tang (Revised Major Order the Qì Decoction) primarily treats intestinal obstruction by promoting defecation, while regulating qi and blood at the same time. It is indicated for *yangming fu* (hollow organs) excess syndrome with prominent abdominal fullness and bloating. Today, it commonly treats uncomplicated intestinal obstruction, and prevents post-surgical adhesions in the abdominal cavity.

This formula is a modification of *Da Cheng Qi Tang*. *Lai Fu Zi* (Semen Raphani), a digestive herb, helps *Hou Po* (Cortex Magnoliae Officinalis) regulate qi and relieve abdominal fullness. *Tao Ren* (Semen Persicae) and *Chi Shao* (Radix Paeoniae Rubra) activate blood circulation and dispel blood stagnation. They also lubricate the intestines to help promote defecation.

Mang Xiao (Natrii Sulfas)

Huo Ma Ren (Fructus Cannabis)

Tao Ren (Semen Persicae)

Bai Shao (Radix Paeoniae Alba)

Jia Jian Cheng Qi Tang (Modified Order the Qì Decoction) drains stagnation and obstruction in the Intestines downward. It generally treats severe constipation characterized by heat. In addition to using herbs that clear heat and drain downward, this formula also contains herbs to gently moisten the Intestines and nourish yin, to prevent the bitter and cold herbs from consuming excessive amount of yin and body fluids.

AUTHORS' COMMENTS

Da Cheng Qi Tang is the standard downward draining formula in the treatment of excess *yangming fu* (hollow organs) syndrome. Traditionally, the four main diagnostic symptoms are *pi* (distention), *man* (fullness), *zao* (dryness) and *shi* (hardness).

- **痞 Pi** (distention) is the feeling of oppression, obstruction, and increased pressure in the chest and epigastrium.
- **滿 Man** (fullness) is the feeling of bloating and fullness in the epigastric and abdominal regions.
- **燥 Zao** (dryness) refers to the dry, compacted stool, which feels hard upon abdominal palpation.
- **實 Shi** (hardness) signifies an excess condition in which the dry, hard stools are interlocked with heat, causing constipation and abdominal pain that intensifies with palpation.

The potency of *Da Cheng Qi Tang* is directly dependent on the preparation of two ingredients: *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas). *Da Huang* (Radix et Rhizoma Rhei) must be post-decocted to preserve its purgative functions; otherwise, it will lose much of its purgative effect if it is cooked together with the rest of the herbs. *Mang Xiao* (Natrii Sulfas) is also kept aside during the cooking process. When the cooking process is finished and the herb residue is filtered out, *Mang Xiao* (Natrii Sulfas) should be dissolved into the

warm decoction immediately before ingestion. The rationale for this preparation can also be explained from a biochemical perspective. *Da Huang* (Radix et Rhizoma Rhei) contains sennoside and emodin as the main active ingredients responsible for purgative and laxative actions. These two compounds are highly sensitive to heat, and will be deactivated with prolonged exposure if cooked for a long period of time. *Mang Xiao* (Natrii Sulfas), on the other hand, is a mineral substance that does not require extraction with cooking. If added to the decoction during the cooking process, it will only be lost when the decoction is filtered out and the herb residues discarded. For these reasons, it is important to following the specific instructions to ensure the efficacy of this formula.

This formula can also be used in postpartum patients who show no signs of exterior conditions but have lower abdominal pain and hardness with retention of lochia, constipation, irritability, fever, and delirious speech during the day but recovery at night. However, *Da Cheng Qi Tang* must be given carefully as most postpartum women are weak and deficient.

This formula can be used for any excess heat conditions, or for fire flaring upward accompanied by constipation or hardness of the stool, since it can purge out the excess. Three of the most effective outlets for clearing fire include inducing diaphoresis, promoting diuresis, and purging the bowels. Since this formula helps guide heat down and out of the body, it is extremely effective in enhancing the overall effect of other heat-clearing herbs.

Da Cheng Qi Tang (Major Order the Qì Decoction), *Xiao Cheng Qi Tang* (Minor Order the Qì Decoction), and *Tiao Wei Cheng Qi Tang* (Regulate the Stomach and Order the Qì Decoction) share many similarities, but have notable differences. All three formulas contain *Da Huang* (Radix et Rhizoma Rhei) to purge stagnation and heat in the Large Intestine to treat *yangming fu* (hollow organs) syndrome. Common symptoms include constipation and abdominal pain that worsens upon pressure. The differences are as follows:

- *Da Cheng Qi Tang* contains *Da Huang* (Radix et Rhizoma Rhei), *Mang Xiao* (Natrii Sulfas), *Zhi Shi* (Fructus Aurantii Immaturus), and *Hou Po* (Cortex Magnoliae Officinalis). The four ingredients together treat *pi* (distention), *man* (fullness), *zao* (dryness), and *shi* (hardness). The constipation is characterized by extremely hard stools.
- *Xiao Cheng Qi Tang* contains *Da Huang* (Radix et Rhizoma Rhei) and decreased doses of *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis) to treat qi stagnation signs and symptoms

Dà Chéng Qì Tāng (Major Order the Qì Decoction)

Comparison of Three “Cheng Qi Tang (Order the Qi Decoctions)”

Formula Names	Pi (Distention)	Man (Fullness)	Zao (Dryness)	Shi (Hardness)
<i>Da Cheng Qi Tang</i> (Major Order the Qi Decoction)	severe	severe	severe	severe
<i>Xiao Cheng Qi Tang</i> (Minor Order the Qi Decoction)	moderate	moderate		moderate
<i>Tiao Wei Cheng Qi Tang</i> (Regulate the Stomach and Order the Qi Decoction)			severe	severe

of *pi* (distention), *man* (fullness) and *shi* (hardness). The constipation is characterized by moderately hard stools.

- *Tiao Wei Cheng Qi Tang* contains *Da Huang* (Radix et Rhizoma Rhei), *Mang Xiao* (Natrii Sulfas), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and is the mildest among the three formulas. It softens the stools rather than treating *pi* (distention) and *man* (fullness).¹⁷

Da Cheng Qi Tang and *Da Xian Xiong Tang* (Major Sinking into the Chest Decoction) are both downward draining formulas that contain *Mang Xiao* (Natrii Sulfas) and *Da Huang* (Radix et Rhizoma Rhei).

- *Da Cheng Qi Tang* specifically treats constipation characterized by *pi* (distention), *man* (fullness), *zao* (dryness), and *shi* (hardness). *Da Cheng Qi Tang* targets mainly symptoms in the lower abdomen, such as dry, hard stools stagnant in the Large Intestine. In this formula, *Da Huang* (Radix et Rhizoma Rhei) is post-decocted to ensure that it retains its purgative action and induces bowel movement.
- *Da Xian Xiong Tang* treats epigastric fullness, distention and pain accompanied by constipation. It treats symptoms manifesting mainly in the chest and epigastrium by dispelling water accumulation and purging heat. In this formula, *Da Huang* (Radix et Rhizoma Rhei) is pre-decocted to lessen its potent diarrhea-inducing effects.

Xiǎo Chéng Qì Tāng (Minor Order the Qi Decoction)

小承氣湯

小承气汤

Pinyin Name: *Xiao Cheng Qi Tang*

Literal Name: Minor Order the Qi Decoction

Alternate Names: *Hsiao Cheng Chi Tang*, Minor Qi-Infusing Decoction, Minor Purgative Decoction, Minor Rhubarb Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Da Huang</i> (Radix et Rhizoma Rhei), <i>xi</i> (washed) with liquor	12g
<i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>zhi</i> (fried with liquid)	6g
<i>Zhi Shi</i> (Fructus Aurantii Immaturus), <i>zhi</i> (fried with liquid)	3 large pieces [9g]

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients with 4 cups [800 mL] of water until reduced to 1.2 cups [240 mL]. Take the warm, strained decoction in two equally-divided doses twice daily.

CHINESE THERAPEUTIC ACTIONS

Gently drains heat and accumulation downward

CLINICAL MANIFESTATIONS

1. Excess *yangming fu* (hollow organs) syndrome: constipation, delirium, tidal fever, fullness and distention of the chest and abdomen, a yellow tongue coating that is old- and dirty-looking in appearance, and a rapid, slippery pulse.
2. Early stage of dysentery with rectal tenesmus, and epigastric and abdominal distention and pain.

CLINICAL APPLICATIONS

Constipation, post-operative constipation, acute simple intestinal obstruction, intestinal paralysis, absence of intestinal peristalsis, abdominal distention and pain, chronic gastritis, acute gastroenteritis, viral hepatitis, acute cholecystitis, acute appendicitis, acute febrile disease, hypertension, obesity, and food intoxication.

EXPLANATION

Xiao Cheng Qi Tang (Minor Order the Qi Decoction) treats *yangming fu* (hollow organs) syndrome of moderate severity, characterized by the presence of *pi* (distention), *man* (fullness), and *shi* (hardness). However, there is no *zao* (dryness). *Da Huang* (Radix et Rhizoma Rhei), the chief herb, clears heat in the Stomach and Intestines and purges constipated stools. *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus) regulate qi flow to relieve fullness and distention, and activate qi circulation to help dispel heat and stagnant stools.

Xiao Cheng Qi Tang is a variation of *Da Cheng Qi Tang* (Major Order the Qi Decoction), and basically has the

same purgative effect, except that it is a milder formula for *yangming fu* (hollow organs) syndrome of moderate severity. Therefore, it is not necessary to post-decoct *Da Huang* (Radix et Rhizoma Rhei), as in *Da Cheng Qi Tang* (Major Order the Qi Decoction). Instead, *Da Huang* (Radix et Rhizoma Rhei) is fully cooked to moderate its potent downward draining effects. Additionally, the doses of *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus) are decreased, since the condition is not as severe. Lastly, *Mang Xiao* (Natrii Sulfas) is not used since there is an absence of *zao* (dryness).

MODIFICATIONS

- If there is generalized weakness and qi deficiency, add *Huang Qi* (Radix Astragali) and *Ren Shen* (Radix et Rhizoma Ginseng).
- If there is generalized weakness and blood deficiency, add *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong).
- When there is irritability and restlessness as a result of Lung deficiency, add *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- For tonsillitis, add *Shan Dou Gen* (Radix et Rhizoma Sophorae Tonkinensis) and *Jie Geng* (Radix Platycodonis).

CAUTIONS / CONTRAINDICATIONS

Refer to *Da Cheng Qi Tang* (Major Order the Qi Decoction).

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** Administration of *Xiao Cheng Qi Tang* was associated with increased contraction and peristalsis. The mechanism of action was attributed to the stimulating effect on the smooth muscles of the intestines.^{1,2}
2. **Antibiotic:** Administration of *Xiao Cheng Qi Tang* was associated with an inhibitory effect *in vitro* against *Staphylococcus aureus* and *E. coli*. Also, the inhibitory effect of the formula was determined to be stronger than the individual ingredients.³

Xiǎo Chéng Qì Tāng (Minor Order the Qì Decoction)

Xiao Cheng Qi Tang (Minor Order the Qi Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Accumulation of excess heat in the Stomach and Intestines	<ul style="list-style-type: none"> • Constipation with fullness and distention of the chest and abdomen: accumulation of excess heat in the Stomach and Intestines • Yellow tongue coating: interior excess heat 	Gently drains heat and accumulation downward	<ul style="list-style-type: none"> • Fully-cooked <i>Da Huang</i> (Radix et Rhizoma Rhei) gently clears heat and purges the constipated stools. • <i>Hou Po</i> (Cortex Magnoliae Officinalis) activates qi circulation and disperses accumulation. • <i>Zhi Shi</i> (Fructus Aurantii Immaturus) relieves fullness and distention.

CLINICAL STUDIES AND RESEARCH

1. **Gastrointestinal disorders:** *Xiao Cheng Qi Tang* has been shown in many studies to treat various types of gastrointestinal disorders, such as post-operative constipation, intestinal paralysis, absence of intestinal peristalsis, abdominal distention and pain, etc.¹
2. **Post-operative constipation:** Eighty-six geriatric patients were treated with modified *Xiao Cheng Qi Tang* for prevention and treatment of post-operative constipation. The first dose of the formula was given 48 hours after the surgery, and the second dose was given 6 hours later (54 hours after the surgery) only if necessary. The study reported 100% success rate, with 53 patients showing gas or bowel movement after the first dose, and the remaining 33 patients after the second dose.⁵
3. **Chronic gastritis:** Use of modified *Xiao Cheng Qi Tang* was associated with 96.36% effectiveness in the treatment of chronic gastritis in 55 patients.⁶
4. **Acute gastroenteritis:** Modified *Xiao Cheng Qi Tang* effectively treated acute gastroenteritis in 91 patients (49 males and 42 females) between 1 and 5 years of age, with 1-3 days history of illness. The study reported immediate improvement in 16 cases, significant improvement in 42 cases, moderate improvement in 26 cases, and no benefit in 7 cases. The overall rate of effectiveness was 92.3%. The herbal treatment used *Xiao Cheng Qi Tang* plus charred *Shan Zha* (Fructus Crataegi) and charred *Shen Qu* (Massa Fermentata) as the base formula. *Mu Xiang* (Radix Aucklandiae) was added for abdominal pain; *Lian Qiao* (Fructus Forsythiae), and *Bo He* (Herba Menthae) were added for fever; *Sha Ren* (Fructus Amomi), *Huang Lian* (Rhizoma Coptidis), and *Ban Xia* (Rhizoma Pinelliae) were added for recurrent nausea and vomiting. The herbs were given one time daily in decoction.⁷
5. **Viral hepatitis:** Administration of modified *Xiao Cheng Qi Tang* effectively treated 39 of 40 patients with viral hepatitis. Of those who responded to the treatment, none had recurrence during the follow-up exam one year later. All patients received two courses of treatment, with 15 days

per course. The herbal treatment contained *Xiao Cheng Qi Tang* plus *Gan Cao* (Radix et Rhizoma Glycyrrhizae) as the base formula. Additionally, *Cang Zhu* (Rhizoma Atractylodis) was added for dampness; and charred *Shan Zha* (Fructus Crataegi) and charred *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) were added for indigestion. Pharmaceutical drugs were added as supportive treatment when necessary.⁸

HERB-DRUG INTERACTION

Opioid-induced constipation and nausea: One study reported marked effectiveness using *Xiao Cheng Qi Tang* to relieve constipation and nausea caused by excessive use of opioid analgesics in 40 patients with terminal cancer. For constipation, the study reported complete recovery in 30 cases, improvement in 8 cases, and no benefit in 2 cases. For nausea, the study reported complete relief in 19 cases and improvement in 9 cases.⁹

AUTHORS' COMMENTS

Tiáo Wèi Chéng Qì Tāng

(Regulate the Stomach and Order the Qì Decoction)

調胃承氣湯

调胃承气汤

Pinyin Name: *Tiao Wei Cheng Qi Tang*
Literal Name: Regulate the Stomach and Order the Qi Decoction
Alternate Names: *Tiao Wei Cheng Chi Tang*, Stomach-Regulating and Qi-Infusing Decoction, Stomach-Regulating and Purgative Decoction, Rhubarb and Mirabilitum Combination
Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Da Huang</i> (Radix et Rhizoma Rhei), xi (washed) with liquor	12g
<i>Mang Xiao</i> (Natrii Sulfas)	0.5 cup [9-12g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g

DOSAGE / PREPARATION / ADMINISTRATION

Cook *Da Huang* (Radix et Rhizoma Rhei) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) in 3 cups [600 mL] of water and reduce the liquid to 1 cup [200 mL]. Filter and discard the residue, then add *Mang Xiao* (Natrii Sulfas) and bring the decoction to a boil 1-2 times using low intensity fire. Take the entire decoction while warm.

CHINESE THERAPEUTIC ACTIONS

Slowly drains heat and accumulation downward

CLINICAL MANIFESTATIONS

- Yangming fu* (hollow organs) syndrome characterized by dryness and heat in the Stomach and Intestines: constipation, thirst, irritability, fever, delirious speech, “steaming” sensations of the whole body, fullness and distention of the abdomen, a yellow tongue coating, and a slippery, rapid pulse.
- Heat in the Stomach and Intestines causing maculae, hematemesis, epistaxis, toothache, and swelling and soreness of the mouth and throat.

CLINICAL APPLICATIONS

Food poisoning, acute gastroenteritis, acute simple intestinal obstruction, acute cholecystitis, acute appendicitis, and constipation.

EXPLANATION

Tiao Wei Cheng Qi Tang (Regulate the Stomach and Order the Qi Decoction) treats *yangming fu* (hollow organs) syndrome characterized by dryness and heat in the Stomach and Intestines. In this condition, *zao* (dryness) and *shi* (hardness) are present, but *pi* (distension) and *man* (fullness) are absent. *Da Huang* (Radix et Rhizoma Rhei) clears Stomach and Intestines heat and purges constipated stools. *Mang Xiao* (Natrii Sulfas) clears heat, moistens dryness, and softens the stools. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonifies qi and harmonizes the formula.

Tiao Wei Cheng Qi Tang, a variation of *Da Cheng Qi Tang* (Major Order the Qi Decoction), is indicated for *yangming fu* (hollow organs) syndrome characterized by severe constipation and mild fullness of the epigastrium and abdomen. In this formula, *Da Huang* (Radix et

Tiao Wei Cheng Qi Tang (Regulate the Stomach and Order the Qi Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Accumulation of excess heat in the Stomach and Intestines	<ul style="list-style-type: none">• Constipation with fullness and distention of the chest and abdomen: accumulation of excess heat in the Stomach and Intestines• Thirst, irritability, fever, “steaming” sensations of the whole body: dryness and heat• Yellow tongue coating: interior excess heat	Slowly drains heat and accumulation downward	<ul style="list-style-type: none">• Fully-cooked <i>Da Huang</i> (Radix et Rhizoma Rhei) slowly clears heat and purges the constipated stool.• <i>Mang Xiao</i> (Natrii Sulfas) clears heat, moistens dryness, and softens the stool.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonifies qi and harmonizes the formula.

Tiáo Wèi Chéng Qì Tāng

(Regulate the Stomach and Order the Qi Decoction)

Rhizoma Rhei) is fully cooked to moderate its potent downward draining effects. *Mang Xiao* (Natrii Sulfas) is used at a slightly higher dose to address dryness and heat. *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus) are removed since *pi* (distention) and *man* (fullness) are absent in this condition. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) is added to tonify qi and harmonize the formula. Overall, *Tiao Wei Cheng Qi Tang* has a stronger effect in treating “dry-heat” and a weaker effect in treating “fullness,” in comparison to *Da Cheng Qi Tang*.

CAUTIONS / CONTRAINDICATIONS

Refer to *Da Cheng Qi Tang* (Major Order the Qi Decoction).

HERB-DRUG INTERACTION

Drug overdose: Use of *Tiao Wei Cheng Qi Tang* was

associated with satisfactory results in treating 24 patients with overdose of illegal drugs. The herbal formula contained *Da Huang* (Radix et Rhizoma Rhei) 10g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 10g, and *Mang Xiao* (Natrii Sulfas) 10g. The patients received gastric lavage first, followed by administration of the herbs via a gastric tube with warm water. Bowel movement was induced within 2.5 to 4.0 hours in all patients.¹

AUTHORS' COMMENTS

Please refer to *Da Cheng Qi Tang* (Major Order the Qi Decoction) for a detailed comparison with *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction) and *Tiao Wei Cheng Qi Tang*.

Dà Xiàn Xiōng Tāng (Major Sinking into the Chest Decoction)

大陷胸湯

大陷胸汤

Pinyin Name: *Da Xian Xiong Tang*

Literal Name: Major Sinking into the Chest Decoction

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

Da Huang (Radix et Rhizoma Rhei)

18g [10g]

Mang Xiao (Natrii Sulfas)

1 cup [10g]

Gan Sui (Radix Kansui)

1 spoonful [1g]

DOSAGE / PREPARATION / ADMINISTRATION

First cook *Da Huang* (Radix et Rhizoma Rhei) in 6 cups [1,200 mL] of water until the liquid is reduced to 2 cups [400 mL]. Filter and discard the residue, then add *Mang Xiao* (Natrii Sulfas), and bring the decoction to a boil 1-2 times. Grind *Gan Sui* (Radix Kansui) into a fine powder, and add it to 1 cup [200 mL] of the warm, strained decoction before ingestion. The bowel movement should be induced quickly. Discontinue the use of this formula once bowel movement has been induced.

Today, this formula is prepared as a decoction using the doses suggested in brackets above. Dissolve *Mang Xiao*

(Natrii Sulfas) into the warm, strained decoction, and then mix the powder of *Gan Sui* (Radix Kansui) into the decoction.

CHINESE THERAPEUTIC ACTIONS

Purges heat and eliminates water accumulation

CLINICAL MANIFESTATIONS

Jie xiong (stagnant chest): hardness, constipation, afternoon or tidal fever, shortness of breath, irritability, restlessness, thirst, fullness and pain in the epigastrium to the lower abdomen that intensify with pressure, a dry tongue, and a deep, tight and forceful pulse.

Dà Xiàn Xiōng Tāng (Major Sinking into the Chest Decoction)

Da Xian Xiong Tang (Major Sinking into the Chest Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Jie xiong</i> (stagnant chest)	<ul style="list-style-type: none">• Constipation, afternoon or tidal fever, irritability, restlessness, thirst, and a dry tongue: heat consuming fluids• Hardness, fullness, and pain in the epigastrium and lower abdomen: qi stagnation from interlocked heat and water• Deep, tight and forceful pulse: interior-excess	<ul style="list-style-type: none">• Purges heat• Eliminates water accumulation	<ul style="list-style-type: none">• <i>Da Huang</i> (Radix et Rhizoma Rhei) and <i>Mang Xiao</i> (Natrii Sulfas) purge heat and drain accumulation.• <i>Gan Sui</i> (Radix Kansui) drastically eliminates water accumulation and purges heat.

CLINICAL APPLICATIONS

Acute intestinal obstruction, acute pancreatitis, acute cholecystitis.

EXPLANATION

Da Xian Xiong Tang (Major Sinking into the Chest Decoction) treats *jie xiong* (stagnant chest), a condition characterized by accumulation of heat and water in the chest and diaphragm. As heat and water interlock and become stagnant, they block the circulation of qi, resulting in hardness, fullness and pain in the epigastrium and lower abdomen. Since the water fluid is interlocked with and injured by heat, constipation, afternoon or tidal fever, shortness of breath, irritability, thirst, and a dry tongue manifest. A deep, tight and forceful pulse suggests that this is an excess interior condition and that the body is not yet deficient.

Da Huang (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) purge heat and drain accumulation. *Gan Sui* (Radix Kansui) drastically eliminates water accumulation and purges heat. All three herbs have potent effects to quickly purge and drain downward. Once the desired effects are achieved, discontinue the formula to avoid damaging *zheng* (upright) *qi*.

CAUTIONS / CONTRAINDICATIONS

- *Da Xian Xiong Tang* should be discontinued immediately once the desired effects are achieved. Prolonged use may injure the qi.
- This formula is contraindicated in pregnant women, weak patients, or those who have just recovered from major illnesses.
- According to *Shi Ba Fan* (Eighteen Incompatibles), *Gan Cao* (Radix et Rhizoma Glycyrrhizae) is incompatible with *Gan Sui* (Radix Kansui) and should not be added to this formula.

PHARMACOLOGICAL EFFECTS

1. **Diuretic:** Administration of *Da Xian Xiong Tang* in mice at 12.5 g/kg was associated with increased excretion of urine. The urine was also determined to have a higher concentration of sodium and potassium in comparison with urine of untreated mice.¹
2. **Gastrointestinal:** Administration of *Da Xian Xiong Tang* was associated with a marked increase in intestinal peristalsis and bowel movement induction.²

CLINICAL STUDIES AND RESEARCH

1. **Acute intestinal obstruction:** Administration of modified *Da Xian Xiong Tang* was used in treating 30 cases of intestinal obstruction. Each dose contained *Gan Sui* (Radix Kansui) 0.9g, *Da Huang* (Radix et Rhizoma Rhei) 0.6g, and *Mang Xiao* (Natrii Sulfas) 0.3g in fine powder form. The patients were given two doses of herbs per day (at least 4 hours apart). Complete recovery was reported in 27 of 30 cases within 24-48 hours. The three patients who did not respond received surgical treatment.³ In another report, 72 patients with intestinal obstruction were treated with either *Da Cheng Qi Tang* (Major Order the Qi Decoction) or *Da Xian Xiong Tang* with a 75% success rate. Most patients responded within 24 hours. The number of doses given ranged from 1-10.⁴
2. **Acute pancreatitis:** Twenty patients with acute pancreatitis were treated with both *Da Xian Xiong Tang* and *Da Cheng Qi Tang* (Major Order the Qi Decoction), with modifications as needed. The patients did not receive antibiotic or intravenous fluids, and were not prohibited from eating. After the herbal treatment, the patients reported relief of abdominal pain after 2-48 hours (average of 19.5 hours), with complete remission of pain after 24-96 hours (average of 68 hours).⁵ Another study reported 95% effectiveness in the treatment of acute pancreatitis using acupuncture plus an herbal formula that contained *Da Xian Xiong Tang* plus *Chai Hu* (Radix Bupleuri), *Yan Hu Suo* (Rhizoma Corydalis) and other herbs.⁶

Dà Xiàn Xiōng Tāng (Major Sinking into the Chest Decoction)

3. **Acute peritonitis:** Use of *Da Xian Xiong Tang* to treat acute peritonitis resulted in a 95% success rate (38 out of 40 patients). Each dose contained *Gan Sui* (Radix Kansui) 0.9g, *Da Huang* (Radix et Rhizoma Rhei) 0.6g, and *Mang Xiao* (Natrii Sulfas) 0.3g in fine powder form. The patients were instructed to take the herbs orally on an empty stomach two to four times daily by dissolving the herbs in 200 mL of hot water. The frequency of dosing varied, depending on the severity of illness. The herbs were ingested orally, or if necessary, given via a gastric tube.⁷

TOXICOLOGY

The LD₅₀ of *Da Xian Xiong Tang* in decoction given via oral ingestion is 232 g/kg in mice.⁸

RELATED FORMULA

Dà Xiàn Xiōng Wán (Major Sinking into the Chest Pill)

大陷胸丸

Pinyin Name: *Da Xian Xiong Wan*

Literal Name: Major Sinking into the Chest Pill

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

<i>Da Huang</i> (Radix et Rhizoma Rhei)	240g
<i>Ting Li Zi</i> (Semen Descurainiae seu Lepidii), ao (simmered)	0.5 cup [175g]
<i>Mang Xiao</i> (Natrii Sulfas)	0.5 cup [175g]
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum), ao (simmered) to black	0.5 cup [175g]

The source text instructs to grind *Da Huang* (Radix et Rhizoma Rhei) and *Ting Li Zi* (Semen Descurainiae seu Lepidii) into powder and sift evenly. Add *Mang Xiao* (Natrii Sulfas) and *Ku Xing Ren* (Semen Armeniacae Amarum) to the powder, and then grind together and form into pills, with each pill resembling the size of a small bullet. Separately cook 1 spoonful [1g] of the powdered *Gan Sui* (Radix Kansui) and 0.2 cup [40 mL] of *Feng Mi* (Mel) in 2 cups [400 mL] of water until the liquid is reduced to 1 cup [200 mL]. Take 1 pill with 1 cup of the warm, strained decoction. Bowel movement should be induced within one night. If not, take additional doses until bowel movement is successfully induced.

Today, the formula is prepared by grinding all of the herbs into powder, using the doses suggested in brackets above, and then mixing the powder with 30g of powdered *Gan Sui* (Radix Kansui) and 250g of *Feng Mi* (Mel) to make pills. Take 5-10g of pills per dose with warm, boiled water.

Da Xian Xiong Wan (Major Sinking into the Chest Pill) treats *jie xiong* (stagnant chest) with accumulation of heat and water in the chest only. Clinically, patients may show such symptoms as fullness, hardness, and pain in the chest, and neck stiffness.

Da Xian Xiong Wan is a gentler formula in comparison to *Da Xian Xiong Tang*. The dose of *Mang Xiao* (Natrii Sulfas) is reduced because there is no abdominal pain or fullness. *Ting Li Zi* (Semen Descurainiae seu Lepidii) and *Ku Xing Ren* (Semen Armeniacae Amarum) are added to clear Lung heat and regulate Lung qi; they also help to move the water downward. Moreover, since this formula is taken in pill form rather than decoction, it has a gentler effect.

AUTHORS' COMMENTS

Although *Da Cheng Qi Tang* (Major Order the Qi Decoction) and *Da Xian Xiong Tang* are both cold, drastic purgative formulas, and both contain *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas), they are quite different in nature.

- *Da Cheng Qi Tang* treats heat and stagnation in the Large Intestine; *Zhi Zi* (Fructus Gardeniae) and *Hou Po* (Cortex Magnoliae Officinalis) activate qi flow and push the constipated stools out of the body. *Da Huang* is post-decocted in *Da Cheng Qi Tang*, indicating that its purgative effect is the key function.
- *Da Xian Xiong Tang*, on the other hand, treats interlocked water and heat in the chest; it uses *Gan Sui* (Radix Kansui) to break up and eliminate stagnant water. *Da Huang* (Radix et Rhizoma Rhei) is pre-decocted in *Da Xian Xiong Tang*, indicating that the purgative effect is not primary in this formula.

Da Xian Xiong Tang and *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction) both treat stagnation in the chest.

- *Da Xian Xiong Tang* is a downward draining formula that treats a more serious interior condition characterized by stagnation of heat and water in the chest. Clinical presentations include hardened epigastrium with sensations of fullness and severe pain upon pressure.
- *Xiao Xian Xiong Tang* is a phlegm-dispelling formula that treats a less serious respiratory condition characterized by stagnation of heat and phlegm in the chest. Clinical presentations include a feeling of fullness in the chest and epigastrium, and pain upon pressure.

Yǐ Zì Tāng (Yi Word Decoction)

乙字湯

乙字汤

Pinyin Name: *Yi Zi Tang*

Literal Name: Yi Word Decoction

Alternate Names: *I Chi Tang*, I-Character Decoction, Cimicifuga Combination

Original Source: *Asada's Prescriptions* by Sohaku Asada

COMPOSITION

<i>Chai Hu</i> (Radix Bupleuri)	5g
<i>Sheng Ma</i> (Rhizoma Cimicifugae)	1g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	6g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	3g
<i>Huang Qin</i> (Radix Scutellariae)	3g
<i>Da Huang</i> (Radix et Rhizoma Rhei)	1g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 1 bowl of water and reduce it to 50%. Take the warm decoction in two or three equally-divided doses daily. Today, this formula may be prepared as a decoction with higher doses of the ingredients, approximately two to three times higher.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and promotes bowel movement
2. Cools the blood and eliminates toxins
3. Raises yang qi

CLINICAL MANIFESTATIONS

Accumulation of dampness, heat and toxins in the lower *jiao*: hemorrhoids, constipation, severe local pain, and slight bleeding. It is also used for women with menstrual bleeding, vaginal bleeding, abdominal pain, and the presence of dark blood with clots.

CLINICAL APPLICATIONS

Hemorrhoids, constipation, prolapse of rectum, and vaginal itching.

EXPLANATION

Yi Zi Tang (Yi Word Decoction) primarily treats hemorrhoids and constipation caused by accumulation of dampness, heat, and toxins in the lower *jiao*. In addition to hemorrhoids, patients will often experience constipation, severe pain, and possible bleeding. Because this formula is indicated for accumulation of dampness, heat, and toxins in the lower *jiao*, it also treats the gynecological problems listed above.

Chai Hu (Radix Bupleuri) and *Sheng Ma* (Rhizoma Cimicifugae) together have lifting functions to raise qi and restore the normal position of the rectum. *Dang Gui* (Radix Angelicae Sinensis) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) nourish the blood and replenish lost blood. Additionally, these two herbs have effects to relieve pain. *Huang Qin* (Radix Scutellariae) and *Da Huang* (Radix et Rhizoma Rhei) clear damp-heat and toxins from the Large Intestine and promote intestinal peristalsis.

Yǐ Zì Tāng (Yi Word Decoction)

Yi Zi Tang (Yi Word Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Accumulation of dampness, heat and toxins in the lower <i>jiao</i>	<ul style="list-style-type: none"> Hemorrhoids and/or constipation with severe pain: accumulation of dampness, heat and toxins in the lower <i>jiao</i> Menstrual or vaginal bleeding with dark blood and clots: accumulation of dampness, heat and toxins in the lower <i>jiao</i> 	<ul style="list-style-type: none"> Clears heat and promotes bowel movement Cools the blood and eliminates toxins Raises yang qi 	<ul style="list-style-type: none"> <i>Chai Hu</i> (Radix Bupleuri) and <i>Sheng Ma</i> (Rhizoma Cimicifugae) have lifting functions to raise qi. <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) nourish the blood and replenish lost blood. <i>Huang Qin</i> (Radix Scutellariae) and <i>Da Huang</i> (Radix et Rhizoma Rhei) clear damp-heat and toxins from the Large Intestine and promote intestinal peristalsis.

MODIFICATIONS

- If the constipation is severe, increase the dose of *Da Huang* (Radix et Rhizoma Rhei) and add *Zhi Shi* (Fructus Aurantii Immaturus).
- When there are dry stools, add *Yu Li Ren* (Semen Pruni) and *Huo Ma Ren* (Fructus Cannabis).
- If there is itching and pain in the genitalia, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae).
- If accompanied by profuse bleeding, add charred *Di Yu* (Radix Sanguisorbae), *Di Huang* (Radix Rehmanniae), and *Huang Lian* (Rhizoma Coptidis).
- For severe hemorrhoidal pain, add *Ru Xiang* (Gummi Olibanum), *Wu Yao* (Radix Linderae), and *Xiang Fu* (Rhizoma Cyperi).
- For hemorrhoids with accumulation of stagnant blood in the abdomen, add *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill).
- For rectal prolapse arising from qi deficiency, add *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction).
- For rectal prolapse with excess bleeding, add *Huai Hua San* (Sophora Japonica Flower Powder) or charred *Di Yu* (Radix Sanguisorbae), *Di Huang* (Radix Rehmanniae), and *Huang Lian* (Rhizoma Coptidis).

Qing Chang Tang (Clear the Intestines Decoction) treats general hemorrhoids, including internal or external hemorrhoids, with or without swelling, inflammation, or bleeding. This formula contains herbs that clear damp-heat, eliminate toxins, stop bleeding, and regulate bowel movements.

Section 2

温下剂

— Warm Purgatives

Dà Huáng Fù Zǐ Tāng (Rhubarb and Prepared Aconite Decoction)

大黃附子湯

大黃附子汤

Pinyin Name: *Da Huang Fu Zi Tang*

Literal Name: Rhubarb and Prepared Aconite Decoction

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata), <i>pao</i> (blast-fried)	3 pieces [9g]
<i>Xi Xin</i> (Radix et Rhizoma Asari)	6g [3g]
<i>Da Huang</i> (Radix et Rhizoma Rhei)	9g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients in 5 cups [1,000 mL] of water and reduce it to 2 cups [400 mL]. Take the warm, strained decoction in three equally-divided doses. For individuals who are otherwise robust and healthy, cook the herbs in 5 cups [1,000 mL] of water and reduce it to 2.5 cups [500 mL]. Take the warm, strained decoction in three equally-divided doses. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Warms yang and disperses cold
2. Drains accumulation and eliminates stagnation

CLINICAL MANIFESTATIONS

Excess cold accumulation in the interior: hypochondriac and abdominal pain, constipation, cold to icy extremities, a white, greasy tongue coating, and a tight and wiry pulse.

CLINICAL APPLICATIONS

Acute abdominal pain, cholecystitis, dysentery, chronic colitis, enteritis, chronic renal failure, and uremia.

EXPLANATION

Da Huang Fu Zi Tang (Rhubarb and Prepared Aconite Decoction) treats excess cold accumulation in the interior. Cold accumulation blocks yang qi circulation to the limbs, resulting in cold extremities. Cold accumulation

Da Huang Fu Zi Tang (Rhubarb and Prepared Aconite Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Excess cold accumulation in the interior	<ul style="list-style-type: none"> • Constipation with hypochondriac and abdominal pain: cold accumulation with qi and blood stagnation • Cold extremities: blocked yang qi circulation • White, greasy tongue coating and a tight, wiry pulse: interior cold 	<ul style="list-style-type: none"> • Warms yang and disperses cold • Drains accumulation and eliminates stagnation 	<ul style="list-style-type: none"> • <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) warms the interior of the body and disperses cold. • <i>Xi Xin</i> (Radix et Rhizoma Asari) disperses cold, stagnation, and accumulation. • <i>Da Huang</i> (Radix et Rhizoma Rhei) clears heat and drains downward.

Dà Huáng Fù Zǐ Tāng (Rhubarb and Prepared Aconite Decoction)

also causes qi and blood stagnation, resulting in constipation with hypochondriac and abdominal pain. The tongue and pulse conditions are indicative of an excess cold syndrome.

Fu Zi (Radix Aconiti Lateralis Praeparata) warms the interior of the body and disperses cold. *Xi Xin* (Radix et Rhizoma Asari) disperses cold, stagnation and accumulation. *Da Huang* (Radix et Rhizoma Rhei) clears the Stomach and Intestines and breaks up qi stagnation, thereby relieving constipation, and hypochondriac and abdominal pain.

MODIFICATIONS

- For abdominal pain that lessens with the application of warmth, add *Gui Zhi* (Ramulus Cinnamomi) and *Bai Shao* (Radix Paoniae Alba).
- If there is abdominal distention, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Shen Qu* (Massa Fermentata).
- For abdominal fullness, distention, and a greasy tongue coating from stagnation, add *Hou Po* (Cortex Magnoliae Officinalis) and *Mu Xiang* (Radix Aucklandiae).
- In cases of qi deficiency, add *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali).
- For Spleen and Stomach yang deficiencies, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- For the elderly and those who are weak, add *Gui Zhi* (Ramulus Cinnamomi) and fully-cook *Da Huang* (Radix et Rhizoma Rhei).
- For cold-type hernia, add *Xiao Hui Xiang* (Fructus Foeniculi) and *Rou Gui* (Cortex Cinnamomi).
- When there is severe pain, add *Rou Gui* (Cortex Cinnamomi).

CAUTIONS / CONTRAINDICATIONS

Because *Da Huang Fu Zi Tang* mainly treats excess cold accumulation in the interior, the dose of *Da Huang* (Radix et Rhizoma Rhei) should never exceed that of *Fu Zi* (Radix Aconiti Lateralis Praeparata).

PHARMACOLOGICAL EFFECTS

Gastrointestinal effect: Administration of a small dose of *Da Huang Fu Zi Tang* in mice and rabbits was associated with a stimulating effect on the intestines with increased peristalsis. Increased dose has not been associated with increased stimulation or inhibition. The effect of the formula was not blocked by atropine, indicating that the herbs probably exerted their effects directly on the intestines.¹

CLINICAL STUDIES AND RESEARCH

1. **Acute abdomen:** The effects of *Da Huang Fu Zi Tang* were evaluated for treatment of acute abdominal pain, with

such diagnosis as acute cholecystitis, cholelithiasis, intestinal obstruction, acute gastritis, and acute pancreatitis. Of 20 cases, the report stated immediate improvement in 9 cases, significant improvement in 5 cases, moderate improvement in 4 cases, and no benefit in 2 cases. The overall rate of effectiveness was 90%.²

2. **Chronic colitis:** Use of modified *Da Huang Fu Zi Tang* had 92.5% effectiveness in treating 27 patients with chronic ulcerative colitis. The herbal treatment used *Da Huang Fu Zi Tang* as the base formula, with the following modifications: *Xiao Hui Xiang* (Fructus Foeniculi), *Gan Jiang* (Rhizoma Zingiberis), and *Wu Yao* (Radix Linderae) for damp-cold; *Huang Lian* (Rhizoma Coptidis) and *Bai Tou Weng* (Radix Pulsatillae) for damp-heat; *Rou Cong Rong* (Herba Cistanches), *Ba Ji Tian* (Radix Morindae Officinalis) and *Bu Gu Zhi* (Fructus Psoraleae) for Spleen and Kidney yang deficiencies; and *Chai Hu* (Radix Bupleuri), *Xiang Fu* (Rhizoma Cyperi), *He Huan Pi* (Cortex Albiziae) and dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for Liver excess and Spleen deficiency.³
3. **Chronic renal failure:** *Da Huang Fu Zi Tang* plus *Yi Mu Cao* (Herba Leonuri), calcined *Mu Li* (Concha Ostreae), and other herbs given via rectal instillation one time daily for 20 days was beneficial in treating chronic renal failure in 20 of 21 patients.⁴ In another study, rectal instillation of *Da Huang Fu Zi Tang* plus *Mu Li* (Concha Ostreae) improved the symptoms and the overall condition of 34 patients.⁵
4. **Uremia:** Use of modified *Da Huang Fu Zi Tang* was associated with marked success in treating 46 patients with uremia. The herbal treatment contained *Da Huang Fu Zi Tang* plus *Yi Mu Cao* (Herba Leonuri), *Huang Qi* (Radix Astragali), and *Mang Xiao* (Natrii Sulfas) as the base formula, with the addition of *Che Qian Zi* (Semen Plantaginis) and *Bai Mao Gen* (Rhizoma Imperatae) for severe edema. The herbs were given in decoction via oral ingestion twice daily for 10 days per course of treatment. Additionally, 150 mL of the herbs were also given via rectal instillation (same formula and preparation) one time daily. Effective treatment was defined as resolution of the symptoms, with improvement of kidney functions as shown by lab reports. Of 46 patients, the rate of effectiveness was 85.7% among 14 individuals who received herbs via oral ingestion only, and 87.5% among 32 individuals who received herbs via both oral ingestion and rectal instillation.⁶

AUTHORS' COMMENTS

Da Huang Fu Zi Tang is the representative formula for treating constipation caused by cold accumulation. This formula can be used for post-operative syndrome associated with gallbladder removal, pain associated with gallstones, chronic dysentery, and uremia.

Dà Huáng Fù Zǐ Tāng (Rhubarb and Prepared Aconite Decoction)

Most downward draining formulas contain both *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) because of their synergistic effect in treating constipation. *Da Huang Fu Zi Tang*, however, contains only *Da Huang* (Radix et Rhizoma Rhei) and **not** *Mang Xiao* (Natrii Sulfas) because this formula treats constipation caused by cold accumulation, manifesting in symptoms of hypochondriac and abdominal pain. The formula employs hot herbs, such as *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Xi Xin* (Radix et Rhizoma Asari), to disperse cold and relieve pain, and a cold herb, such as *Da Huang* (Radix et Rhizoma Rhei), to balance the temperature of the formula and induce bowel movement. *Mang Xiao* (Natrii Sulfas) is not used in this formula because its presence will create a synergistic effect with *Da Huang* (Radix et Rhizoma Rhei), and change the nature of the formula from warm to cold, thereby making the constipation (from cold accumulation) worse.

The condition associated with this formula involves both excess and deficiency, namely excess cold accumulation and yang deficiency. This condition is different than the one seen in *Da Cheng Qi Tang* (Major Order the Qi Decoction), which involves a purely excess heat condition. If the constipation is relieved after taking *Da Huang Fu Zi Tang*, that means the condition is stabilized. If the constipation persists after administering the formula and other symptoms such as vomiting, cold limbs, and a fine pulse appear, this indicates that the condition is worsening quickly.

Da Huang Fu Zi Tang treats complicated cases of excess cold and yang deficiency. Therefore, the treatment approach requires careful use and balance of hot and cold herbs. Although *Da Huang* (Radix et Rhizoma Rhei) is cold in nature, its cold tendency is neutralized by the hot nature of *Fu Zi* (Radix Aconiti Lateralis Praeparata) and the warm nature of *Xi Xin* (Radix et Rhizoma Asari). Zhang Zhong-Jing often used *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Xi Xin* (Radix et Rhizoma Asari) to treat excess cold accumulation deep inside the body. The dose of *Fu Zi* (Radix Aconiti Lateralis Praeparata) is greater in this formula than in *Ma Huang Fu Zi Xi Xin Tang* (Ephedra, Asarum, and Prepared Aconite Decoction), because it has to neutralize the cold temperature of *Da Huang* (Radix et Rhizoma Rhei). Also note that the dose of *Da Huang* (Radix et Rhizoma Rhei) is much less in this

formula than in *Da Cheng Qi Tang* (Major Order the Qi Decoction), a cold purgative formula, indicating that the interior-warming action is of greater importance than the purgative action in this formula.

Da Huang Fu Zi Tang, *Wen Pi Tang* (Warm the Spleen Decoction), and *San Wu Bei Ji Wan* (Three-Substance Pill for Emergencies) are warm purgative formulas that treat constipation caused by cold accumulation. All three formulas purge stagnation, warm the interior, and relieve pain. All three formulas contain *Da Huang* (Radix et Rhizoma Rhei), but for different purposes.

- *Da Huang Fu Zi Tang* warms Spleen and Kidney yang and treats excess cold accumulation in the interior. The dose of *Da Huang* (Radix et Rhizoma Rhei) is less than *Fu Zi* (Radix Aconiti Lateralis Praeparata) to achieve a purgative effect without inducing more coldness. Of the three formulas, *Da Huang Fu Zi Tang* has the most moderate and balanced approach to warming the interior and purging downward.
- *Wen Pi Tang* warms Spleen yang to treat cold accumulation. *Da Huang* (Radix et Rhizoma Rhei) is used with several warm and hot herbs that tonify qi and purge the contents of the Intestines without creating coldness. Of the three formulas, *Wen Pi Tang* has the most potent effect to warm and tonify.
- *San Wu Bei Ji Wan* drastically purges downward to treat excess cold accumulation in the interior. *Da Huang* (Radix et Rhizoma Rhei) enhances the purgative effect, and antagonizes the adverse effects of *Ba Dou* (Semen Crotonis) by offsetting the latter's hot and acrid properties, thus preventing damage to the body. Of the three formulas, *San Wu Bei Ji Wan* is the strongest formula for purging downward.⁷

Wēn Pí Tāng (Warm the Spleen Decoction)

溫脾湯 温脾汤

Pinyin Name: *Wen Pi Tang*

Literal Name: Warm the Spleen Decoction

Original Source: *Bei Ji Qian Jin Yao Fang* (Thousands of Golden Prescriptions for Emergencies) by Sun Si-Miao in the Tang Dynasty

COMPOSITION

<i>Da Huang</i> (Radix et Rhizoma Rhei)	12g
<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata)	1 large piece [9g]
<i>Gan Jiang</i> (Rhizoma Zingiberis)	6g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	6g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients coarsely, cook them in 8 cups [1,600 mL] of water, and reduce the liquid to 2.5 cups [500 mL]. *Da Huang* (Radix et Rhizoma Rhei) should be post-decocted near the end. Take the warm, strained decoction in three equally-divided doses. Today, it is normally prepared as a decoction with the doses suggested in brackets above, and with *Da Huang* (Radix et Rhizoma Rhei) post-decocted.

CHINESE THERAPEUTIC ACTIONS

1. Warms and tonifies Spleen yang
2. Drains interior cold and accumulation downward

CLINICAL MANIFESTATIONS

Spleen yang deficiency syndrome leading to cold accumulation: constipation, or chronic diarrhea with blood and mucus; abdominal pain that is relieved by warmth; epigastric rigidity; cold hands and feet; and a deep and wiry pulse.

CLINICAL APPLICATIONS

Peptic ulcer disease, biliary ascariasis, and chronic renal failure.

EXPLANATION

Wen Pi Tang (Warm the Spleen Decoction) treats Spleen yang deficiency with interior cold accumulation. This condition usually occurs in individuals who frequently ingest cold beverages or eat raw foods, and who have pre-existing Spleen yang deficiency. The cold and raw foods cannot be digested and become obstructed in the Intestines, causing constipation. However, if the Spleen is deficient and fails to lift qi and nutrients, diarrhea with blood and mucus may occur. The presence of blood is the result of a deficient Spleen not being able to hold blood in the vessels, while mucus is a direct reflection of the Spleen's failure to transform dampness. Interior cold causes qi obstruction, leading to abdominal pain and epigastric rigidity. Since cold is the pathogenic factor, the severity of the pain is usually lessened by warmth. The cold hands and feet are

Wen Pi Tang (Warm the Spleen Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Spleen yang deficiency with cold accumulation	<ul style="list-style-type: none">• Constipation with abdominal coldness and pain that lessen with warmth: cold accumulation in the interior• Chronic diarrhea with blood and mucus: Spleen yang deficiency• Cold hands and feet: Spleen yang unable to warm the extremities• Abdominal pain and epigastric rigidity: interior cold obstructing qi circulation• Deep, wiry pulse: excess cold in the interior	<ul style="list-style-type: none">• Warms and tonifies Spleen yang• Drains interior cold and accumulation downward	<ul style="list-style-type: none">• <i>Da Huang</i> (Radix et Rhizoma Rhei) drains and purges accumulation and stagnation.• <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) and <i>Gan Jiang</i> (Rhizoma Zingiberis) tonify Spleen yang and disperse interior cold.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonify qi and nourish the Spleen.

Wēn Pí Tāng (Warm the Spleen Decoction)

manifestations of a deficient Spleen yang unable to warm the extremities. A deep, wiry pulse indicates excess cold in the interior.

In this situation, simply using purgative herbs will further injure the middle *jiao*. Simply tonifying yang will warm the interior but will not achieve the purpose of dispelling accumulation and stagnation. To effectively treat this syndrome, both purgative and Spleen yang-tonifying herbs must be used together. *Da Huang* (Radix et Rhizoma Rhei) drains and purges accumulation and stagnation. *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis) tonify Spleen yang and disperse interior cold. *Ren Shen* (Radix et Rhizoma Ginseng) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonify qi and nourish the Spleen.

MODIFICATIONS

- When there is severe abdominal pain caused by cold, add *Rou Gui* (Cortex Cinnamomi) and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).
- If accompanied by abdominal fullness, add *Mu Xiang* (Radix Aucklandiae) and *Hou Po* (Cortex Magnoliae Officinalis).
- For nausea and vomiting, add *Ban Xia* (Rhizoma Pinelliae) and *Sha Ren* (Fructus Amomi).
- If there is food stagnation and indigestion, add *Shen Qu* (Massa Fermentata) and *Lai Fu Zi* (Semen Raphani).
- For chronic diarrhea with heat and cold accumulation, add charred *Jin Yin Hua* (Flos Lonicerae Japonicae) and charred *Huang Qin* (Radix Scutellariae).
- For chronic nephritis with uremia, remove *Gan Jiang* (Rhizoma Zingiberis) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and add *Chen Pi* (Pericarpium Citri Reticulatae), *Fu Ling* (Poria), and *Hou Po* (Cortex Magnoliae Officinalis).

CAUTIONS / CONTRAINDICATIONS

Wen Pi Tang treats constipation or diarrhea caused by Spleen yang deficiency and cold accumulation. It should not be used in cases of constipation caused by excess heat or diarrhea caused by damp-heat.

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** Administration of *Wen Pi Tang* at 10 g/kg effectively induced bowel movement in mice with artificially-induced constipation characterized by deficiency and cold of the Spleen and Stomach.¹
2. **Nephroprotective:** Administration of *Wen Pi Tang* was associated with a dose-dependent effect to prevent and treat renal injuries induced by 3-morpholinostyrene and peroxynitrite.^{2,3} It was shown in another study that

Wen Pi Tang has nephroprotective effects against ischemia-reperfusion kidney injury.⁴

CLINICAL STUDIES AND RESEARCH

1. **Peptic ulcer disease:** Use of modified *Wen Pi Tang* for an average of 37.2 days was associated with complete recovery in 39 of 45 patients with peptic ulcer disease.⁵
2. **Biliary ascariasis:** Administration of modified *Wen Pi Tang* was associated with relief in all 63 patients with biliary ascariasis. The study reported complete relief in 59 cases after one pack of herbs, and in 4 cases after three days of treatment.⁶
3. **Chronic renal failure:** Administration of *Wen Pi Tang* was associated with beneficial effects on the progression of chronic renal failure in 8 patients (between 24 and 59 years of age). The causes of chronic renal failure were chronic glomerulonephritis in 7 patients and systemic lupus erythematosus in 1 patient. The duration of treatment ranged from 40 to 402 weeks (mean: 228.1 +/- 118.8 weeks). The study reported that *Wen Pi Tang* has a beneficial effect to significantly retard the progression of chronic renal failure and to delay the need for dialysis.⁷

AUTHORS' COMMENTS

The composition of *Wen Pi Tang* resembles the composition of two other formulas that strongly warm yang and tonify qi.

- It resembles *Da Huang Fu Zi Tang* (Rhubarb and Prepared Aconite Decoction), a warm purgative formula that treats cold accumulation and interior excess. However, *Wen Pi Tang* does not contain *Xi Xin* (Radix et Rhizoma Asari), but instead has *Ren Shen* (Radix et Rhizoma Ginseng), *Gan Jiang* (Rhizoma Zingiberis), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- It also resembles *Si Ni Tang* (Frigid Extremities Decoction), an interior-warming formula that treats *shaoyin* cold syndrome with depletion of yang. *Wen Pi Tang* contains all three ingredients of *Si Ni Tang*, plus *Ren Shen* (Radix et Rhizoma Ginseng) and *Da Huang* (Radix et Rhizoma Rhei).

Da Huang Fu Zi Tang (Rhubarb and Prepared Aconite Decoction) and *Wen Pi Tang* both warm the interior and disperse cold accumulation to treat constipation. Both formulas contain *Fu Zi* (Radix Aconiti Lateralis Praeparata) to warm the interior, and *Da Huang* (Radix et Rhizoma Rhei) to purge accumulation in the Intestines. The differences between these two formulas are as follows:

- *Da Huang Fu Zi Tang* contains *Xi Xin* (Radix et Rhizoma Asari) to relieve pain and to open the channels to relieve cold extremities. It is indicated for generalized yang deficiency.

Wēn Pí Tāng (Warm the Spleen Decoction)

• *Wen Pi Tang* contains *Gan Jiang* (Rhizoma Zingiberis), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Ren Shen* (Radix et Rhizoma Ginseng) to tonify and warm the middle *jiao*. It is indicated for yang qi deficiency in the middle *jiao*.

Sān Wù Bèi Jí Wán (Three-Substance Pill for Emergencies)

三物備急丸 三物备急丸

Pinyin Name: *San Wu Bei Ji Wan*

Literal Name: Three-Substance Pill for Emergencies

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Ba Dou</i> (Semen Crotonis), <i>ao</i> (simmered) and <i>yan</i> (ground) to small particles	30g
<i>Gan Jiang</i> (Rhizoma Zingiberis)	30g
<i>Da Huang</i> (Radix et Rhizoma Rhei)	30g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to grind the ingredients into powder, and mix the powder with honey to form pills that resemble the size of large beans. Take 3-4 pills per dose with warm water or liquor. Today, this formula is usually given in powder form along with rice soup or warm water. The dose is 0.6-1.5g of the powder for adults, and less for children.

CHINESE THERAPEUTIC ACTIONS

Drastically purges cold and accumulation

CLINICAL MANIFESTATIONS

Excess cold accumulation in the interior: sudden onset of excruciating epigastric and abdominal fullness and pain, stabbing pain in the chest, cyanotic facial complexion, rapid breathing, lockjaw, constipation, and a deep, tight pulse. In severe cases, there may be unconsciousness.

CLINICAL APPLICATIONS

Intestinal obstruction and acute appendicitis.

EXPLANATION

San Wu Bei Ji Wan (Three-Substance Pill for Emergencies) treats emergency cases of acute excess cold accumulation in the interior, which is usually caused by the stagnation of cold food in the Stomach and Intestines. The stagnant cold food causes sudden qi blockage, which then leads to fullness and pain in the epigastrium and abdomen. Hot, acrid herbs must be used to dispel cold, and drastic purgative herbs must be used to drain accumulation and stagnation.

Ba Dou (Semen Crotonis), the acrid and warm chief herb, is an extremely potent cathartic herb for dispelling cold accumulation. *Gan Jiang* (Rhizoma Zingiberis), the acrid and warm deputy herb, warms the body to help *Ba Dou* (Semen Crotonis) dispel cold. It also protects and assists Spleen yang. *Da Huang* (Radix et Rhizoma Rhei), the assistant and envoy herb, is bitter and cold, and dispels stagnation in the Stomach and Intestines. Its cold nature moderates the extreme acrid and hot properties of *Ba Dou* (Semen Crotonis).

Sān Wù Bèi Jí Wán (Three-Substance Pill for Emergencies)

San Wu Bei Ji Wan (Three-Substance Pill for Emergencies)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Excess cold accumulation in the interior	<ul style="list-style-type: none">• Sudden onset of excruciating epigastric and abdominal fullness and pain, constipation, stabbing pain in the chest, cyanotic facial complexion: excess cold accumulation in the interior• Deep, tight pulse: interior cold accumulation	Drastically purges cold accumulation	<ul style="list-style-type: none">• <i>Ba Dou</i> (Semen Crotonis) strongly drains excess and dispels cold accumulation.• <i>Gan Jiang</i> (Rhizoma Zingiberis) warms Spleen yang and dispels cold.• <i>Da Huang</i> (Radix et Rhizoma Rhei) eliminates stagnation in the Stomach and Intestines.

CAUTIONS / CONTRAINDICATIONS

- Because *Ba Dou* (Semen Crotonis) is toxic, use *San Wu Bei Ji Wan* with extreme caution and only when necessary during emergency or severe conditions.
- The use of this formula, which is extremely acrid, hot and toxic, is contraindicated in pregnant women, elderly or weak patients, or heat conditions in general.
- If persistent diarrhea occurs after taking this formula, administer room-temperature rice porridge to help stop the diarrhea.
- *San Wu Bei Ji Wan* is an extremely potent formula. It should only be used when absolutely necessary, and only for a short period of time. Do not use this formula at large doses or for a prolonged period of time, since such practices can easily lead to dehydration and electrolyte imbalance.¹

CLINICAL STUDIES AND RESEARCH

Intestinal obstruction: Patients with intestinal obstruction were treated with modified *San Wu Bei Ji Wan*. The herbal formula was given in pills, which was made by mixing a fine powder of *Da Huang* (Radix et Rhizoma Rhei), *Gan Jiang* (Rhizoma Zingiberis) and *Ba Dou* (Semen Crotonis) in 3:2:1 proportions. The treatment protocol was to administer 1 pill (1g) to patients under 14 years of age, and 1-2 pills (1-2g) to patients 15 years or older. The herbs were given every four hours until the condition was resolved. Out of 39 patients, the study reported complete recovery in 35 patients, improvement in 3 patients, and no benefit in 1 patient. The overall rate of effectiveness was 97.4% and the average time needed was 6.2 hours.²

RELATED FORMULA

Sān Wù Bái Sǎn (Three-Substance White Powder)
三物白散
Pinyin Name: *San Wu Bai San*
Literal Name: Three-Substance White Powder
Alternate Name: *Bai San* (White Powder)

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

<i>Jie Geng</i> (Radix Platycodonis)	0.9g
<i>Ba Dou</i> (Semen Crotonis), <i>ao</i> (simmered) to black and <i>yan</i> (ground) to small particles	0.3g
<i>Bei Mu</i> (Bulbus Fritillariae)	0.9g

Grind the ingredients into powder, and take 0.5g of the powder with warm water.

San Wu Bai San (Three-Substance White Powder) mainly treats *jie xiong* (stagnant chest) characterized by cold and phlegm accumulation in the chest. Patients may show dyspnea, profuse sputum formation with difficulty in swallowing, and a deep and tight, or an excess and forceful pulse. Moreover, patients will have vomiting if the disease is above the diaphragm, and diarrhea if it is below the diaphragm. Clinically, this formula may treat patients diagnosed with diphtheria, acute laryngeal infection, and inflammation of the throat.

San Wu Bei Ji Wan and *San Wu Bai San* (Three-Substance White Powder) are two extremely potent formulas that treat excess cold accumulation in the interior.

- *San Wu Bei Ji Wan* is the stronger formula of the two. It is indicated for excess cold accumulation in the gastro-intestinal tract of the middle and lower *jiaos*, which may be caused by food obstruction.
- *San Wu Bai San* is a gentler formula and better suited for excess cold with phlegm accumulation in the chest region.

AUTHORS' COMMENTS

San Wu Bei Ji Wan is an extremely potent formula that should be reserved for true emergencies. Immediate diarrhea or vomiting is the goal after administration, as they indicate successful removal of offending agents from

Sān Wù Bèi Jí Wán (Three-Substance Pill for Emergencies)

the body. Traditionally, if the jaws are locked, the herbs are forced into the mouth by breaking the teeth. Today, the formula is given via nasogastric tube if patients are unable to open their mouth.

Cold (i.e., room temperature) and hot porridges are commonly served with *San Wu Bei Ji Wan*, for contrasting purposes. Consuming room-temperature porridge serves to decrease the frequency of bowel movement in those

who experience continuous diarrhea after taking this formula. Warm porridge, on the other hand, enhances the purgative effect and promote defecation.

Má Zǐ Rén Wán (Hemp Seed Pill)

麻子仁丸

Pinyin Name: *Ma Zi Ren Wan***Literal Name:** Hemp Seed Pill**Alternate Name:** Apricot Seed and Linum Formula**Original Source:** *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty**COMPOSITION**

<i>Huo Ma Ren</i> (Fructus Cannabis)	2 cups (480g) [20g]
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum), <i>ao</i> (simmered)	1 cup (240g) [10g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	240g [9g]
<i>Da Huang</i> (Radix et Rhizoma Rhei)	480g [12g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>zhi</i> (fried with liquid)	1 <i>chi</i> (240g) [9g]
<i>Zhi Shi</i> (Fructus Aurantii Immaturus)	240g [9g]

Note: The source text provides the doses of some of the herbs in volume (cup) and length (*chi*). One cup is approximately 200 mL, and one *chi* is about 23 centimeters or 9 inches. To facilitate preparation, these units have been converted to weight (grams).

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder, and mix with *Feng Mi* (Mel) to form pills. The pills should resemble *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 10 pills per dose, three times daily. The dose may be increased until the desired effect is achieved. Today, this formula may be prepared in pills or decoction. For pills, grind the herbs into powder and mix with honey to form pills. Take 9g of pills one to two times daily with warm water. For decoction, use the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

1. Lubricates the Intestines and drains heat
2. Activates qi circulation and promotes defecation

CLINICAL MANIFESTATIONS

Dryness and heat in the Stomach and Intestines accompanied by deficiency of body fluids: constipation with dry, hard stools, and frequent urination.

CLINICAL APPLICATIONS

Habitual constipation, post-surgical constipation, drug-induced constipation, and constipation in elderly individuals or postpartum women.

EXPLANATION

Ma Zi Ren Wan (Hemp Seed Pill) treats dryness and heat in the Stomach and Large Intestine. Dryness and heat may consume water and body fluids in these two organs, causing dry stools, constipation, and difficult defecation. Dryness and heat in the Stomach also affects the Spleen, limiting the latter's ability to distribute water to various parts of the body. As a result, water passes out through the Urinary Bladder in the form of frequent urination.

The chief herb, *Huo Ma Ren* (Fructus Cannabis), is sweet and neutral, and enters the Spleen, Stomach, and Large Intestine to moisten dryness and lubricate the Intestines to facilitate bowel movement. The deputy herb, *Ku Xing Ren* (Semen Armeniacae Amarum), enters two organs connected by their *zang fu* relationship: the Large Intestine to moisten dryness and the Lung to regulate and guide qi downward. *Bai Shao* (Radix Paeoniae Alba) nourishes yin and blood, preserves yin, and relieves abdominal and intestinal pain and spasms. *Da Huang* (Radix et Rhizoma Rhei) purges the constipated stool

Má Zǐ Rén Wán (Hemp Seed Pill)

Ma Zi Ren Wan (Hemp Seed Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Dryness and heat in the Stomach and Intestines with deficiency of body fluids	<ul style="list-style-type: none"> Constipation with dry, hard stools: dryness and heat consuming water and body fluids Frequent urination: abnormal distribution of water 	<ul style="list-style-type: none"> Lubricates the Intestines and drains heat Activates qi circulation and promotes defecation 	<ul style="list-style-type: none"> <i>Huo Ma Ren</i> (Fructus Cannabis) moistens dryness and lubricates the Intestines. <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) moistens dryness and regulates qi. <i>Bai Shao</i> (Radix Paeoniae Alba) nourishes yin and blood. <i>Da Huang</i> (Radix et Rhizoma Rhei) purges constipated stools and drains heat. <i>Hou Po</i> (Cortex Magnoliae Officinalis) and <i>Zhi Shi</i> (Fructus Aurantii Immaturus) activate qi circulation. <i>Feng Mi</i> (Mel) lubricates the Intestines and moistens dryness.

and drains heat. *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus) activate qi to relieve bloating and distention and to eliminate the constipated stool. *Feng Mi* (Mel) helps *Huo Ma Ren* (Fructus Cannabis) lubricate the Intestines and moisten dryness. It also moderates the harsh properties of *Da Huang* (Radix et Rhizoma Rhei).

MODIFICATIONS

- For habitual constipation with dry stools in geriatric patients, reduce the dose of *Da Huang* (Radix et Rhizoma Rhei) and add *Bai Zi Ren* (Semen Platycladi), *Rou Cong Rong* (Herba Cistanches), and *Dang Gui* (Radix Angelicae Sinensis).
- For hemorrhoids and constipation, add *Huang Lian* (Rhizoma Coptidis), *Sheng Ma* (Rhizoma Cimicifugae), *Tao Ren* (Semen Persicae), and *Dang Gui* (Radix Angelicae Sinensis).
- For bleeding hemorrhoids, add *Ce Bai Ye* (Cacumen Platycladi), *Di Yu* (Radix Sanguisorbae), and *Huai Hua* (Flos Sophorae).
- When there is thirst and increased water intake as a result of Stomach heat, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).
- If there is frequent urination, add *Qian Shi* (Semen Euryales), *Sang Piao Xiao* (Ootheca Mantidis), and *Yi Zhi* (Fructus Alpiniae Oxyphyllae).

CAUTIONS / CONTRAINDICATIONS

- Though *Ma Zi Ren Wan* is classified as a moist laxative formula, it nonetheless has a moderate purgative effect since it contains *Da Huang* (Radix et Rhizoma Rhei), *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis) to drain downward, activate qi

circulation, and purge constipated stools. Therefore, this formula is not recommended for very weak or deficient patients. Moreover, it should not be taken daily over a long period of time, since this may consume qi and body fluids.

- This formula should be used with caution during pregnancy.

PHARMACOLOGICAL EFFECTS

- Laxative:** According to various laboratory studies in mice, administration of *Ma Zi Ren Wan* was associated with increased bowel movement, usually within 12 hours.¹
- Gastrointestinal:** Administration of *Ma Zi Ren Wan* was associated with increased intestinal peristalsis in anesthetized rabbits.²

CLINICAL STUDIES AND RESEARCH

- Constipation:** According to one study, 557 patients with different causes and various severity of constipation were treated with *Ma Zi Ren Wan* with complete recovery in 281 patients, significant improvement in 229 patients, moderate improvement in 25 patients, and no change in 22 patients. The overall rate of effectiveness was 96%.³
- Post-surgical constipation:** Use of *Ma Zi Ren Wan* was reported to have 95.8% effectiveness in preventing post-surgical constipation. Of 500 patients, the study reported normal bowel movements (without dryness, pain or bleeding) in 479 patients. Of 21 patients who did not respond, 16 had a history of habitual constipation.⁴

HERB-DRUG INTERACTION

Drug-induced constipation: Constipation caused by antipsychotic drugs in 80 individuals was treated with marked success using *Ma Zi Ren Wan*. The herbs were given at 9 to 15g per dose, three times daily. For those with severe constipation, the form was switched from

Má Zǐ Rén Wán (Hemp Seed Pill)

pills to decoction. Of 80 cases, the study reported complete recovery in 62 cases, improvement in 13 cases, and no change in 5 cases.⁵

RELATED FORMULA

Wǔ Rén Wán (Five-Seed Pill)

五仁丸

Pinyin Name: *Wu Ren Wan*

Literal Name: Five-Seed Pill

Original Source: *Shi Yi De Xiao Fang* (Effective Formulas from Generations of Physicians) by Wei Yi-Lin in 1345

<i>Tao Ren</i> (Semen Persicae)	30g [15g]
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum), <i>chao</i> (dry-fried)	30g [15g]
<i>Bai Zi Ren</i> (Semen Platycladi)	15g [9g]
<i>Song Zi Ren</i> (Semen Pini)	3.75g [5g]
<i>Yu Li Ren</i> (Semen Pruni), <i>chao</i> (dry-fried)	3g [5g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae), <i>yan</i> (ground) to powder	120g [15g]

Mash the five seeds into a paste. Add powdered *Chen Pi* (Pericarpium Citri Reticulatae) and blend thoroughly. Mix the powder with honey to form small pills that resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 50 pills with rice soup on an empty stomach. Today, this formula is prepared by grinding all of the ingredients into powder, mixing the powder with honey, and forming into pills. Take 12g of pills per dose with warm, boiled water on an empty stomach. This formula may also be prepared as a decoction with the doses suggested in brackets above.

Wu Ren Wan (Five-Seed Pill) is composed of five seeds rich in oil to lubricate the Intestines and facilitate bowel movement. It treats constipation and dry stool caused by severe body fluid deficiency. It may also be used for constipation in geriatric or postpartum patients with blood deficiency. Clinical manifestations include constipation, dry stool, a dry mouth, and thirst with a desire to drink.

Ku Xing Ren (Semen Armeniacae Amarum), the chief herb, nourishes and treats intestinal dryness. It also directs Lung qi downward to help the functioning of the Large Intestine, as these two organs are connected by their *zang-fu* relationship. *Tao Ren* (Semen Persicae), the deputy herb, helps *Ku Xing Ren* (Semen Armeniacae Amarum) moisten dryness and lubricate the bowels. *Bai Zi Ren* (Semen Platycladi) and *Yu Li Ren* (Semen Pruni), rich in oil, are moist laxatives that further lubricate the bowels and relieve dryness and heat in the Stomach and Intestines. *Song*

Zi Ren (Semen Pini) moistens the five *zang* (solid) organs and treats constipation caused by deficiency. *Feng Mi* (Mel) lubricates the bowels. Finally, *Chen Pi* (Pericarpium Citri Reticulatae) regulates qi to promote circulation in the abdomen and relieve distention or bloating.

Wu Ren Wan should be taken with caution during pregnancy, since it contains *Tao Ren* (Semen Persicae), a blood-moving herb.

AUTHORS' COMMENTS

Ma Zi Ren Wan is commonly used today to treat habitual constipation, hemorrhoids with dry stools, or constipation in deficient and elderly patients. It can also be used as the base formula to treat intestinal obstruction caused by parasites, or constipation arising from heat and dryness after rectal or colon surgeries.

Xiao Cheng Qi Tang (Minor Order the Qi Decoction) and *Ma Zi Ren Wan* have three ingredients in common: *Da Huang* (Radix et Rhizoma Rhei), *Zhi Shi* (Fructus Aurantii Immaturus), and *Hou Po* (Cortex Magnoliae Officinalis). While *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction) is classified as a cold purgative formula, *Ma Zi Ren Wan* is known as a moist laxative formula for the following reasons:

- *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction) is administered as a decoction, which is absorbed quickly to provide a more immediate and potent effect to drain and purge downwards.
- *Ma Zi Ren Wan* is administered as honey pills, which are absorbed slowly over a long period of time. Consequently, its effects are gentle, and its potency is moderate. Furthermore, *Ma Zi Ren Wan* contains additional ingredients, such as *Huo Ma Ren* (Fructus Cannabis), *Ku Xing Ren* (Semen Armeniacae Amarum), *Bai Shao* (Radix Paeoniae Alba), and *Feng Mi* (Mel). Some of these herbs are rich in oil and can lubricate the Intestines to promote the passage of stools. Others are sweet and has a moderating effect to prevent *Da Huang* (Radix et Rhizoma Rhei) from injuring *zheng* (upright) *qi*. Because the overall focus of this formula is to lubricate the intestines and regulate bowel movement, not to purge downwards, it is considered as a moist laxative.

Rùn Cháng Wán (Moisten the Intestines Pill)

潤腸丸 润肠丸

Pinyin Name: *Run Chang Wan*

Literal Name: Moisten the Intestines Pill

Original Source: *Pi Wei Lun* (Discussion of the Spleen and Stomach) by Li Gao in 1249

COMPOSITION

<i>Da Huang</i> (Radix et Rhizoma Rhei)	15g
<i>Tao Ren</i> (Semen Persicae), <i>jin</i> (soaked)	30g
<i>Huo Ma Ren</i> (Fructus Cannabis)	37.5g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	15g
<i>Qiang Huo</i> (Rhizoma et Radix Notopterygii)	15g

DOSAGE / PREPARATION / ADMINISTRATION

The source text advises to separately grind *Huo Ma Ren* (Fructus Cannabis) into a paste, and pound all of the other ingredients into powder. Mix the paste and the powder with *Feng Mi* (Mel) and form into small pills that resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 50 pills with warm water on an empty stomach. Today, this formula is prepared by grinding all of the ingredients into powder and mixing with *Feng Mi* (Mel) to form into pills. Take 12g of pills per dose with warm water on an empty stomach.

CHINESE THERAPEUTIC ACTIONS

1. Lubricates the Intestines and promotes defecation
2. Tonifies blood circulation and dispels wind

CLINICAL MANIFESTATIONS

Constipation characterized by blood deficiency: habitual constipation, constipation in elderly or weak individuals, dry and hard stools, lack of appetite, lethargy, dizziness, and palpitations.

CLINICAL APPLICATIONS

Constipation in anemic or elderly persons.

EXPLANATION

Run Chang Wan (Moisten the Intestines Pill) is a moist-laxative formula that treats constipation characterized by blood deficiency, which may occur as a result of an inappropriate diet or overwork.

Da Huang (Radix et Rhizoma Rhei) purges the bowels and clears heat. *Tao Ren* (Semen Persicae), *Huo Ma Ren* (Fructus Cannabis), and *Feng Mi* (Mel) moisten the Intestines and promote defecation. *Dang Gui* (Radix Angelicae Sinensis) tonifies blood and yin to lubricate the bowels. *Qiang Huo* (Rhizoma et Radix Notopterygii) expels wind and relieves pain.

MODIFICATIONS

- If there is fever, add *Chai Hu* (Radix Bupleuri).
- When there is abdominal pain, add *Mu Xiang* (Radix Aucklandiae).
- For blood deficiency, increase the dose of *Dang Gui* (Radix Angelicae Sinensis) and *Tao Ren* (Semen Persicae) and add *Shu Di Huang* (Radix Rehmanniae Praeparata) and *Hong Hua* (Flos Carthami).

Run Chang Wan (Moisten the Intestines Pill)

Ma Zi Run Chang Wan (Hemp Seed Pill to Moisten the Intestines) moistens the Intestines, drains heat, nourishes yin, and tonifies the blood. Clinically, this formula treats elderly patients with habitual constipation characterized by underlying weakness and deficiencies.

AUTHORS' COMMENTS

Run Chang Wan and *Ma Zi Ren Wan* (Hemp Seed Pill) are moist-laxative formulas that gently treat mild to moderate cases of constipation.

- *Run Chang Wan* treats constipation characterized by blood deficiency.
- *Ma Zi Ren Wan* treats constipation characterized by body fluid deficiency, with dryness and heat in the Stomach and Intestines.

Ji Chuān Jiān (Benefit the River [Flow] Decoction)

濟川煎 济川煎

Pinyin Name: Ji Chuan Jian

Literal Name: Benefit the River [Flow] Decoction

Original Source: *Jing Yue Quan Shu* (Collected Treatises of [Zhang] Jing Yue) by Zhang Jie-Bin (Zhang Jing-Yue) in 1624

COMPOSITION

<i>Rou Cong Rong</i> (Herba Cistanches), <i>xi</i> (washed) with liquor	6-9g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	9-15g
<i>Niu Xi</i> (Radix Achyranthis Bidentatae)	6g
<i>Ze Xie</i> (Rhizoma Alismatis)	4.5g
<i>Zhi Qiao</i> (Fructus Citri Aurantii)	3g
<i>Sheng Ma</i> (Rhizoma Cimicifugae)	1.5-3g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients with 1.5 bowls of water until 0.7 to 0.8 bowl of liquid remains. Take the decoction before meals.

CHINESE THERAPEUTIC ACTIONS

- 1. Warms the Kidney and tonifies *jing* (essence)
- 2. Lubricates the Intestines and promotes defecation

CLINICAL MANIFESTATIONS

Constipation in the elderly caused by Kidney yang deficiency: constipation, polyuria with clear urine, dizziness, vertigo, soreness and weakness of the knees and low back, cold sensation of the lumbar region, intolerance to cold, and cold extremities.

CLINICAL APPLICATIONS

Constipation, habitual constipation, chronic constipation, and constipation in the elderly.

EXPLANATION

The Kidney controls water metabolism. If Kidney yang is deficient, however, it is unable to control water metabolism and water will be excreted out of the body in the form of copious, clear urine. As a result of body fluids being excreted as urine, the Intestines lack moisture, and constipation or dry stool occurs. Dizziness, weak knees, soreness in the lower back, intolerance to cold, and cold extremities all indicate Kidney yang deficiency.

Rou Cong Rong (Herba Cistanches), the chief herb, warms and tonifies Kidney yang and *jing* (essence) in addition to lubricating the Intestines. *Dang Gui* (Radix Angelicae Sinensis) nourishes and harmonizes the blood, as well as lubricates the Intestines. *Niu Xi* (Radix Achyranthis Bidentatae), having a downward-directing tendency, nourishes the Kidney and strengthens the lower parts of the body to treat soreness and weakness of the back and knees. *Ze Xie* (Rhizoma Alismatis) promotes urination

Ji Chuan Jian (Benefit the River [Flow] Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Constipation caused by Kidney yang deficiency	<ul style="list-style-type: none">• Clear and copious urine: Kidney yang deficiency fails to control water metabolism• Constipation with dry stool: dryness in the Intestines• Dizziness, weak knees, sore lower back, intolerance to cold, and cold extremities: Kidney yang deficiency	<ul style="list-style-type: none">• Warms Kidney yang and tonifies <i>jing</i> (essence)• Lubricates the Intestines and promotes defecation	<ul style="list-style-type: none">• <i>Rou Cong Rong</i> (Herba Cistanches) warms and tonifies Kidney yang and <i>jing</i> (essence), and lubricates the Intestines.• <i>Dang Gui</i> (Radix Angelicae Sinensis) nourishes and harmonizes the blood.• <i>Niu Xi</i> (Radix Achyranthis Bidentatae) nourishes the Kidney.• <i>Ze Xie</i> (Rhizoma Alismatis) promotes urination to excrete turbidity in the Kidney.• <i>Zhi Qiao</i> (Fructus Aurantii) activates qi flow to relieve constipation.• <i>Sheng Ma</i> (Rhizoma Cimicifugae) raises yang qi.

Jì Chuān Jiān (Benefit the River [Flow] Decoction)

to excrete turbidity from the Kidney. *Zhi Qiao* (Fructus Aurantii) activates qi flow to help relieve constipation. *Sheng Ma* (Rhizoma Cimicifugae) raises yang qi, while directing turbidity to the lower parts of the body to be excreted.

MODIFICATIONS

- If there is qi deficiency, remove *Zhi Qiao* (Fructus Aurantii) and add *Ren Shen* (Radix et Rhizoma Ginseng).
- When accompanied by fatigue, lack of energy, and no desire to speak, add *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali).
- For Kidney yin deficiency, add *Shu Di Huang* (Radix Rehmanniae Praeparata) and *Tian Dong* (Radix Asparagi).
- For chronic habitual constipation with intestinal dryness

and coldness, remove *Ze Xie* (Rhizoma Alismatis) and add *Suo Yang* (Herba Cynomorii) and *Huo Ma Ren* (Fructus Cannabis).

- When there is increased frequency and volume of urine, add *Yi Zhi* (Fructus Alpiniae Oxyphyllae) and *Sang Piao Xiao* (Ootheca Mantidis).
- For soreness and pain of the lower back and knees, add *Du Zhong* (Cortex Eucommiae), *Sang Ji Sheng* (Herba Taxilli), and *Xu Duan* (Radix Dipsaci).

CAUTIONS / CONTRAINDICATIONS

Ji Chuan Jian (Benefit the River [Flow] Decoction) warms the Kidney to treat constipation caused by Kidney yang deficiency. It is contraindicated in cases of constipation caused by excess heat.

十枣汤**Pinyin Name:** *Shi Zao Tang***Literal Name:** Ten-Jujube Decoction**Alternate Name:** *Shi Zao Wan* (Ten-Jujube Pill)**Original Source:** *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty**COMPOSITION***Yuan Hua* (Flos Genkwa), *ao* (simmered)*Gan Sui* (Radix Kansui)*Da Ji* (Radix Euphorbiae seu Knoxiae)**DOSAGE / PREPARATION / ADMINISTRATION**

The source text instructions are to separately grind equal amounts of each herb into powder. Cook 10 pieces of *Da Zao* (Fructus Jujubae) in 1.5 cups [300 mL] of water until the liquid is reduced to 0.8 cup [160 mL]. Discard the herb residue and add the powdered herbs to the warm, strained decoction before ingestion. The dose of the powdered herbs is 1g for patients with a strong body constitution, and 0.5g for those with a weak body constitution. If the condition is not resolved, increase the dose by 0.5g, and administer the formula again the following day. Once bowel movement is induced, discontinue the formula, and serve porridge to facilitate recovery from the use of strong purgative herbs.

Today, this formula is normally prepared and administered in powder or capsule forms, at a dose of 0.5-1g per dose one time daily, on an empty stomach in the early morning, with a decoction made from 10 pieces of *Da Zao* (Fructus Jujubae). Once bowel movement is induced, discontinue the formula and take porridge for nourishment.

CHINESE THERAPEUTIC ACTIONS

Drastically purges water accumulation

CLINICAL MANIFESTATIONS

1. *Xuan yin* (pleural effusion): water retention in the hypochondrium, coughing with sharp chest and hypochondriac pain, epigastric distention and hardness, shortness of breath, dyspnea caused by extreme chest and back pain, dry heaves, headache, dizziness, vertigo, and a deep, wiry pulse.
2. Excess water accumulation (in the lower half of the body): generalized edema that is more severe on the lower half of the body, abdominal fullness, dyspnea, and difficult defecation and urination.

CLINICAL APPLICATIONS

Pleural effusion, pleuritis, ascites, acute or chronic nephritis, and hyperacidity of the stomach.

EXPLANATION

Shi Zao Tang (Ten-Jujube Decoction) treats various clinical manifestations arising from excess water retention in the interior. If water is retained in the chest and hypochondrium, the functioning of the Lung will be compromised, as seen in symptoms of coughing with chest and hypochondriac pain, shortness of breath, and/or dyspnea. If the water retention affects Stomach qi, nausea and dry heaves result. Headache, dizziness, and vertigo are caused by water retention blocking yang qi circulation. A deep pulse suggests damp accumulation and interior syndrome, and

Shí Zǎo Tāng (Ten-Jujube Decoction)

Shi Zao Tang (Ten-Jujube Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Excess water accumulation	<ul style="list-style-type: none"> • Coughing with sharp chest and hypochondriac pain, shortness of breath and dyspnea: water accumulation in the upper <i>jiao</i> affecting the Lung • Epigastric distention and hardness, nausea, and dry heaves: water accumulation in the middle <i>jiao</i> affecting the Stomach • Headache, dizziness and vertigo: yang qi unable to ascend because of water retention 	Drastically purges water accumulation	<ul style="list-style-type: none"> • <i>Yuan Hua</i> (Flos Genkwa) eliminates water retention in the chest and hypochondrium. • <i>Gan Sui</i> (Radix Kansui) eliminates water retention in the channels and collaterals. • <i>Da Ji</i> (Radix Euphorbiae seu Knoxiae) eliminates water retention in the <i>zang fu</i> organs. • <i>Da Zao</i> (Fructus Jujubae) protects the Stomach and lessens the toxicity of the other herbs.

the wiry nature of the pulse signifies water retention and extreme pain. If water is retained mainly in the abdomen, then there will be edema of the abdomen and lower parts of the body.

Since this is a serious excess water retention syndrome, it is necessary to use drastic cathartic herbs. *Yuan Hua* (Flos Genkwa) enters the Lung and eliminates water retention in the chest and hypochondrium. *Gan Sui* (Radix Kansui) eliminates water retention in the channels and collaterals. *Da Ji* (Radix Euphorbiae seu Knoxiae) eliminates water retention in the *zang fu* organs. These three herbs are very drastic, and can quickly eliminate water retention and any fullness or stagnation in the body. However, since all three herbs are toxic and may easily injure the qi, *Da Zao* (Fructus Jujubae) is added to lessen their toxicity and to protect the Stomach.

CAUTIONS / CONTRAINDICATIONS

- *Shi Zao Tang* is a very strong cathartic formula that is potentially toxic if used inappropriately. Therapeutic effect is generally observed immediately after administration. If the condition is not resolved after taking this formula, continue taking the formula for another day. If the patient is deficient and has excess water retention, tonic herbs may also be used. Depending on the patient's condition, tonic herbs may be used before, during and/or after purgation. The dose should gradually be increased daily and stopped when the desired effects are achieved. If the patient does not have underlying deficiency, use of herbs that tonify and regulate the digestive system is still recommended.
- Since this is a drastic purgative formula, it should be used with caution in all patients. Moreover, this formula is contraindicated during pregnancy and in nursing mothers.¹
- *Gan Cao* (Radix et Rhizoma Glycyrrhizae) should not be added to this formula, since it is incompatible with *Yuan*

Hua (Flos Genkwa), *Gan Sui* (Radix Kansui), and *Da Ji* (Radix Euphorbiae seu Knoxiae).

- Do **not** cook *Yuan Hua* (Flos Genkwa), *Gan Sui* (Radix Kansui), and *Da Ji* (Radix Euphorbiae seu Knoxiae) in water, since side effects such as abdominal pain, nausea, and vomiting have been associated with the use of this formula in decoction form.

CLINICAL STUDIES AND RESEARCH

1. **Pleuritis:** Administration of *Shi Zao Tang* showed 89.2% effectiveness in treating 28 patients with inflammation of the pleura surrounding the lungs. Those with tuberculosis or pneumonia were also treated with pharmaceuticals accordingly. Out of 28 cases, the study reported complete recovery in 16 cases, marked improvement in 7 cases, moderate improvement in 2 cases, and no benefit in 3 cases.²
2. **Hyperacidity:** Administration of *Shi Zao Tang* was effective in treating individuals with hyperacidity of the stomach. The study reported complete recovery in all 14 patients without relapse.³

RELATED FORMULA

Kòng Xián Dān (Control Mucus Special Pill)

控涎丹

Pinyin Name: *Kong Xian Dan*

Literal Name: Control Mucus Special Pill

Original Source: *San Yin Ji Yi Bing Zheng Fang Lun* (Discussion of Illnesses, Patterns, and Formulas Related to the Unification of the Three Etiologies) by Chen Yan in 1174

Gan Sui (Radix Kansui)

Da Ji (Radix Euphorbiae seu Knoxiae)

Bai Jie Zi (Semen Sinapis)

Shí Zǎo Tāng (Ten-Jujube Decoction)

Grind equal amounts of all three ingredients into powder and form into pills with water. Take 5-10 pills with a mild ginger soup and food at bedtime. The dose may be increased for patients with serious conditions characterized by excess phlegm and qi. Today, the herbs are normally ground into a fine powder, and formed with water into pills that resemble the size of *Lu Dou* (Semen Phaseoli Radiati). Take 1-3g of pills with warm, boiled water and food at bedtime.

Kong Xian Dan (Control Mucus Special Pill) treats phlegm stagnation and water retention in the chest and diaphragm, with sudden excruciating and migrating pain in the chest, back, neck, waist, and even inguinal region. There may also be lethargy, severe intolerable headache, coldness and pain in the hands and feet, a temporary loss of taste in the mouth, thick and sticky sputum, a rattling sound of sputum in the throat at night, and excess secretion of saliva.

Shi Zao Tang and *Kong Xian Dan* are two formulas commonly used for water accumulation.

- *Shi Zao Tang* treats severe water retention that affects the whole body.
- *Kong Xian Dan* is the gentler formula of the two and treats both water and phlegm retention. *Kong Xian Dan* is a gentler formula because it is administered as special pills (pellets), which are absorbed over a longer period of time and reach a lower peak concentration, when compared with the decoction form. Also, *Kong Xian Dan* addresses phlegm retention, since it has the addition of *Bai Jie Zi* (Semen Sinapis) to eliminate phlegm.

AUTHORS' COMMENTS

Shi Zao Tang has a drastic and potent effect to eliminate water retention in the interior. Therefore, it should be used with extreme caution and only when needed. The formula is taken in powder form with a decoction made from *Da Zao* (Fructus Jujubae). While loose stools and/or diarrhea is an expected side effect of this formula, patients should not have more than 5 to 6 bowel movements

per day while using this formula. If the condition is not resolved after the initial dose, it may be repeated if the patients are otherwise healthy and are not experiencing serious side effects. However, discontinue this formula if patients experience fatigue and lack of appetite, or suffer from serious side effects.

Shi Zao Tang literally translates as "Ten-Jujube Decoction." This name infers that a decoction made from 10 jujubes is used to serve this formula. However, it is important to keep in mind that the main herb is *not* jujube, and the formula is *not* given in decoction form. The three main active herbs are *Yuan Hua* (Flos Genkwa), *Gan Sui* (Radix Kansui), and *Da Ji* (Radix Euphorbiae seu Knoxiae), and they must be given in powder form. Cooking these three herbs in water and administering this formula in decoction will only cause more side effects, such as serious abdominal pain, nausea, and vomiting. Furthermore, *Gan Sui* (Radix Kansui) has poor water solubility, and therefore is not suitable for use in decoction. Lastly, although *Da Zao* (Fructus Jujubae) is not the key active ingredient, it is an important part of the formula because it controls and minimizes the toxicity of the three main ingredients.

Gan Cao (Radix et Rhizoma Glycyrrhizae) is generally the preferred envoy herb for harmonizing formulas and moderating herbs with drastic or toxic effects. However, according to *Shi Ba Fan* (Eighteen Incompatibles), *Gan Cao* (Radix et Rhizoma Glycyrrhizae) is incompatible with all three herbs in this formula – *Yuan Hua* (Flos Genkwa), *Gan Sui* (Radix Kansui) and *Da Ji* (Radix Euphorbiae seu Knoxiae). Thus, *Da Zao* (Fructus Jujubae) is chosen in this formula to protect the Spleen and Stomach, moderate the drastic effects, and minimize toxicities.

Zhōu Chē Wán (Vessel and Vehicle Pill)

舟車丸
舟車丸Pinyin Name: *Zhou Che Wan*

Literal Name: Vessel and Vehicle Pill

Original Source: *Jing Yue Quan Shu* (Collected Treatises of [Zhang] Jing Yue) by Zhang Jie-Bin (Zhang Jing-Yue) in 1624

COMPOSITION

<i>Da Ji</i> (Radix Euphorbiae seu Knoxiae), <i>chao</i> (dry-fried) with vinegar	30g
<i>Yuan Hua</i> (Flos Genkwa)	30g
<i>Gan Sui</i> (Radix Kansui), <i>wei</i> (roasted)	30g
<i>Qian Niu Zi</i> (Semen Pharbitidis), <i>yan</i> (ground) to powder	120g
<i>Da Huang</i> (Radix et Rhizoma Rhei)	60g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	15g
<i>Qing Pi</i> (Pericarpium Citri Reticulatae Viride)	15g
<i>Mu Xiang</i> (Radix Aucklandiae)	15g
<i>Bing Lang</i> (Semen Arecae)	15g
<i>Qing Fen</i> (Calomelas)	3g

Note: *Qing Fen* (Calomelas) is a potentially toxic heavy metal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today do not contain it; or it has been replaced with substitutes with similar functions. For additional information on its toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder, and mix with water to form into pills that resemble the size of small beans. Take 5 pills three times daily with warm water on an empty stomach. Discontinue the formula after urination and bowel movement have been induced. Today, the recommended dosage is: take 3-6g of pills per dose one time daily with warm water on an empty stomach in the morning.

CHINESE THERAPEUTIC ACTIONS

1. Promotes qi circulation
2. Eliminates water accumulation

CLINICAL MANIFESTATIONS

Water accumulation accompanied by heat formation and qi stagnation: watery distention, ascites, edema, thirst, coarse breathing, abdominal rigidity, anuria, constipation, and a deep, rapid and forceful pulse.

CLINICAL APPLICATIONS

Edema, ascites, and liver cirrhosis.

EXPLANATION

Zhou Che Wan (Vessel and Vehicle Pill) treats water accumulation accompanied by heat formation and qi stagnation. The water and heat accumulation, along with qi stagnation, leads to the improper distribution of water fluids, causing edema, ascites, anuria, constipation, and thirst. Qi stagnation leads to coarse breathing and abdominal rigidity. A deep, rapid and forceful pulse suggests excess heat/water in the interior and a condition characterized by excess, rather than deficiency.

Since this is an emergency case of interior excess syndrome, drastic cathartic herbs are used to quickly remove water retention and heat formation. The three chief herbs, *Da Ji* (Radix Euphorbiae seu Knoxiae), *Yuan Hua* (Flos Genkwa), and *Gan Sui* (Radix Kansui) drastically purge water in the chest and abdomen. *Qian Niu Zi* (Semen Pharbitidis) and *Da Huang* (Radix et Rhizoma Rhei) purge the Intestines and eliminate water and heat. *Chen Pi* (Pericarpium Citri Reticulatae) relieves coarse breathing or chest oppression by activating Lung and Spleen qi. *Qing Pi* (Pericarpium Citri Reticulatae Viride) smoothes Liver qi flow, break up qi stagnation, and relieve abdominal rigidity. *Mu Xiang* (Radix Aucklandiae) regulates qi and water circulation in all three *jiaos* to relieve edema and watery distention. *Bing Lang* (Semen Arecae) breaks up qi stagnation, promotes the movement of qi downward, and eliminates water retention. *Qing Fen* (Calomelas) enhances the qi-activating and water-eliminating functions of the other herbs in this formula.

Zhōu Chē Wán (Vessel and Vehicle Pill)

Zhou Che Wan (Vessel and Vehicle Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Water accumulation accompanied by heat formation and qi stagnation	<ul style="list-style-type: none">• Edema, ascites, anuria, constipation, and thirst: water accumulation and heat formation• Coarse breathing and abdominal rigidity: water accumulation and qi stagnation• Deep, rapid and forceful pulse: excess condition in the interior	<ul style="list-style-type: none">• Promotes qi circulation• Eliminates water accumulation	<ul style="list-style-type: none">• <i>Da Ji</i> (Radix Euphorbiae seu Knoxiae), <i>Yuan Hua</i> (Flos Genkwa) and <i>Gan Sui</i> (Radix Kansui) drastically purge water in the chest and the abdomen.• <i>Qian Niu Zi</i> (Semen Pharbitidis) and <i>Da Huang</i> (Radix et Rhizoma Rhei) purge the Intestines and eliminate water and heat.• <i>Chen Pi</i> (Pericarpium Citri Reticulatae), <i>Qing Pi</i> (Pericarpium Citri Reticulatae Viride), <i>Mu Xiang</i> (Radix Aucklandiae), and <i>Bing Lang</i> (Semen Arecae) regulate qi circulation.• <i>Qing Fen</i> (Calomelas) enhances the qi-activating and water-eliminating functions of the other herbs.

CAUTIONS / CONTRAINDICATIONS

- Many herbs in *Zhou Che Wan* are toxic, such as *Qing Fen* (Calomelas), *Yuan Hua* (Flos Genkwa), *Da Ji* (Radix Euphorbiae seu Knoxiae), and *Gan Sui* (Radix Kansui). Therefore, the doses should be adjusted carefully according to the severity of the condition and the patient's constitution.
- Prolonged use of this formula is contraindicated.
- Use of this formula is prohibited in pregnant women and patients with a weak constitution.

AUTHORS' COMMENTS

This formula is based on *Shi Zao Tang* (Ten-Jujube Decoction), with the addition of very strong cathartic herbs to purge water through urination and defecation, and the removal of *Da Zao* (Fructus Jujubae) so that the downward draining herbs can fully exert their potent and drastic effects without moderation. Only patients with a strong constitution should take this formula, and they should take it every other day, each time decreasing the **dose of intake**. Discontinue the use of the formula when the desired effects are achieved.

Shū Záo Yǐn Zǐ (Spread and Unblock Decoction)

疏鑿飲子
疏凿饮子

Pinyin Name: *Shu Zao Yin Zi*

Literal Name: Spread and Unblock Decoction

Original Source: *Ji Sheng Fang* (Formulas to Aid the Living) by Yan Yong-He in 1253

COMPOSITION

<i>Shang Lu</i> (Radix Phytolaccae)	[6g]
<i>Bing Lang</i> (Semen Arecae)	[9g]
<i>Da Fu Pi</i> (Pericarpium Arecae)	[15g]
<i>Fu Ling Pi</i> (Cortex Poria)	[30g]

<i>Qin Jiao</i> (Radix Gentianae Macrophyllae)	[9g]

Shū Záo Yīn Zǐ (Spread and Unblock Decoction)

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind equal amounts of the ingredients into a coarse powder. Cook 12g of the powder with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 1.5 bowls of water until 70% of the liquid remains. Take the warm, strained decoction any time during the day. This formula may also be prepared as a decoction with the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

- 1. Drains downward
- 2. Eliminates water accumulation
- 3. Dispels wind and releases the exterior

CLINICAL MANIFESTATIONS

Excess water and damp accumulation: generalized edema, wheezing, thirst, anuria, and constipation.

CLINICAL APPLICATIONS

Edema, ascites, and liver cirrhosis.

EXPLANATION

Shu Zao Yin Zi (Spread and Unblock Decoction) treats excess accumulation of water and dampness in the body,

which causes the water to flow to the exterior or the skin level, giving rise to generalized edema. Since water is retained inside the body, it interferes with the normal functioning of the *San Jiao*, causing anuria and constipation. Excess water and dampness also affect the Lung's functioning, causing wheezing. Lastly, when water fluid is not properly distributed inside the body, thirst ensues.

This formula eliminates water accumulation from the whole body by using herbs that address the exterior and interior, and the upper and lower parts of the body. *Shang Lu* (Radix Phytolaccae) purges excess water and damp accumulation via urination and defecation. *Bing Lang* (Semen Arecae) and *Da Fu Pi* (Pericarpium Arecae) activate qi and move water fluid downward and outward. *Fu Ling Pi* (Cortex Poria), *Ze Xie* (Rhizoma Alismatis), *Mu Tong* (Caulis Akebiae), *Jiao Mu* (Semen Zanthoxyli Bungeani), and *Chi Xiao Dou* (Semen Phaseoli) promote urination to eliminate water and damp accumulation. *Qiang Huo* (Rhizoma et Radix Notopterygii), *Qin Jiao* (Radix Gentianae Macrophyllae), and *Sheng Jiang* (Rhizoma Zingiberis Recens) promote perspiration to expel water and dampness from the skin level.

Section 5

攻补兼施剂

— Purgative and Tonic Formulas

Huáng Lóng Tāng (Yellow Dragon Decoction)

黃龍湯 黄龙汤

Pinyin Name: *Huang Long Tang*

Literal Name: Yellow Dragon Decoction

Original Source: *Shang Han Liu Shu* (Six Texts on Cold-Induced Disorders) by Tao Hua in 1445

COMPOSITION

<i>Da Huang</i> (Radix et Rhizoma Rhei)	[9-12g]
<i>Mang Xiao</i> (Natrii Sulfas)	[6-9g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis)	[9-12g]
<i>Zhi Shi</i> (Fructus Aurantii Immaturus)	[9g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	[6g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	[9g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	[3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to cook the ingredients in 2 large bowls of water with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 2 pieces of *Da Zao* (Fructus Jujubae). Add a small amount of *Jie Geng* (Radix Platycodonis) at the end, and bring the decoction to a boil one time. Take the strained decoction while hot. Note: The herb doses are not provided in the source text.

Today, this formula can be prepared as a decoction using the herb doses suggested in brackets above, with the addition of 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens), 2 pieces of *Da Zao* (Fructus Jujubae), and 3g of *Jie Geng* (Radix Platycodonis).

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and promotes defecation
2. Tonifies qi and blood

CLINICAL MANIFESTATIONS

Interior excess heat accompanied by qi and blood deficiencies: constipation characterized by only clear, watery fluids upon defecation; epigastric and abdominal

hardness and pain, and abdominal pain that worsens upon pressure; altered consciousness, delirium, or carphology in severe cases; thirst, fever, a dry mouth and tongue; low energy and a weak voice; a dry, yellow or dry, black tongue coating, and a deficient pulse.

CLINICAL APPLICATIONS

Intestinal obstruction and post-operative recovery of gastrointestinal function.

EXPLANATION

Huang Long Tang (Yellow Dragon Decoction) treats *yangming fu* (hollow organs) syndrome with qi and blood deficiencies. *Yangming fu* syndrome is characterized by stagnant excess heat in the Stomach and Large Intestine. If the heat consumes too much fluids in the Large Intestine, constipation occurs. If the stools in the Large Intestine become too dry and impacted, intestinal fluids may not be able to moisten the stools and the fluids are excreted in the form of clear, watery diarrhea.

Abdominal pain that worsens upon pressure is a sign that this is an excess interior syndrome. Delirium and

Huáng Lóng Tāng (Yellow Dragon Decoction)

Huang Long Tang (Yellow Dragon Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Yangming fu</i> (hollow organs) syndrome with qi and blood deficiencies	<ul style="list-style-type: none"> Constipation, epigastric and abdominal hardness and pain, abdominal pain that worsens with pressure: interior excess heat Delirium and carphology: interior excess heat disturbing the <i>shen</i> (spirit) Thirst, a dry mouth and tongue, and a dry, yellow or dry, black tongue coating: interior heat consuming body fluids Low energy, weak voice, and a deficient pulse: qi and blood deficiencies 	<ul style="list-style-type: none"> Clears heat and promotes defecation Tonifies qi and blood 	<ul style="list-style-type: none"> <i>Da Huang</i> (Radix et Rhizoma Rhei) clears the Stomach and Intestines by dispelling heat and constipated stools. <i>Mang Xiao</i> (Natrii Sulfas) clears heat, moistens dryness, and softens the stool. <i>Hou Po</i> (Cortex Magnoliae Officinalis) activates qi circulation and disperses accumulations. <i>Zhi Shi</i> (Fructus Aurantii Immaturus) relieves fullness and distention. <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae), <i>Da Zao</i> (Fructus Jujubae), and <i>Dang Gui</i> (Radix Angelicae Sinensis) tonify qi, blood, and body fluids. <i>Jie Geng</i> (Radix Platycodonis) raises the sunken qi of the Lung and Large Intestine. <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) nourish the Stomach and harmonize the middle <i>jiao</i>.

carphology are caused by excess heat in the interior disturbing the *shen* (spirit), with carphology being a more serious symptom than delirium. Thirst, fever, and a dry mouth and tongue are signs of interior heat consuming body fluids. Low energy and a weak voice suggest qi deficiency. The dry, yellow or dry, black tongue coating indicates interior heat and body fluid damage. A deficient pulse suggests qi and blood deficiencies.

The treatment of this syndrome requires the use of purgative as well as tonic herbs. *Da Huang* (Radix et Rhizoma Rhei), *Mang Xiao* (Natrii Sulfas), *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus), the four herbs of *Da Cheng Qi Tang* (Major Order the Qi Decoction), purge excess heat in the *yangming* organs and promote qi circulation to relieve constipation and epigastric and abdominal hardness and pain. *Ren Shen* (Radix et Rhizoma Ginseng), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Da Zao* (Fructus Jujubae), and *Dang Gui* (Radix Angelicae Sinensis) tonify qi, blood, and body fluids. *Jie Geng* (Radix Platycodonis) raises the sunken qi of the Lung and Large Intestine, two organs connected by their *zang fu* relationship. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) nourish the Stomach and harmonize the middle *jiao*.

MODIFICATIONS

- For constipation in elderly patients with weakness and deficiency, decrease the dose of *Mang Xiao* (Natrii Sulfas)

and increase the dose of *Ren Shen* (Radix et Rhizoma Ginseng) and *Dang Gui* (Radix Angelicae Sinensis).

- If there is a dry mouth and lips caused by heat damaging body fluids, add *Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), and *Mai Dong* (Radix Ophiopogonis).

CAUTIONS / CONTRAINDICATIONS

- While *Huang Long Tang* tonifies, it contains potent purgative herbs such as *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas), and should not be used to treat constipation that is caused only by deficiencies without any interior excess heat.
- Bowel movement consisting of only clear, watery fluids is caused by constipation arising from interior excess heat. Since the clear, watery fluids do not represent actual diarrhea, do not treat this condition with astringent herbs, which will only further trap the heat pathogenic factor inside.

CLINICAL STUDIES AND RESEARCH

Post-operative recovery: Administration of modified *Huang Long Tang* was evaluated for its effects in restoring normal gastrointestinal function in post-operative patients. The formula was given as decoction 12 hours after the surgery, and the second dose was given 24 hours later if necessary. The formula included 10g each of *Da Huang* (Radix et Rhizoma Rhei) (post-decocted), *Zhi Shi* (Fructus Aurantii Immaturus), *Hou Po* (Cortex

Huáng Lóng Tāng (Yellow Dragon Decoction)

Magnoliae Officinalis), *Mai Dong* (Radix Ophiopogonis), *Dang Gui* (Radix Angelicae Sinensis), and *Dang Shen* (Radix Codonopsis). The study reported 93% effectiveness within 48 hours.¹

RELATED FORMULA

Xin Jiā Huáng Lóng Tāng

(Newly-Augmented Yellow Dragon Decoction)

新加黃龍湯
新加黄龙汤

Pinyin Name: *Xin Jia Huang Long Tang*

Literal Name: Newly-Augmented Yellow Dragon Decoction

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

<i>Di Huang</i> (Radix Rehmanniae)	15g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng), decoct separately	4.5g
<i>Da Huang</i> (Radix et Rhizoma Rhei)	9g
<i>Mang Xiao</i> (Natrii Sulfas)	3g
<i>Xuan Shen</i> (Radix Scrophulariae)	15g
<i>Mai Dong</i> (Radix Ophiopogonis)	15g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	4.5g
<i>Hai Shen</i> (Strichopus Japonicus), xi (washed)	2 pieces
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	6 spoonfuls of juice

Cook all of the ingredients, except *Ren Shen* (Radix et Rhizoma Ginseng), in 8 cups of water until 3 cups of liquid remain. Take 1 cup of the decoction with a half cup of separately decocted *Ren Shen* (Radix et Rhizoma Ginseng) and 2 spoonfuls of ginger juice. Bowel movement should be induced within 1-2 hours. If not, repeat the same process and administer the second dose. If bowel movement is not induced after 24 hours, repeat the same process and administer the third dose. Discontinue the formula after bowel movement is induced.

To recover from the strong purgative effects of this formula, patients should take one dose of *Yi Wei Tang* (Benefit the Stomach Decoction). Note: *Yi Wei Tang* (Benefit the Stomach Decoction) contains *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Dong* (Radix Ophiopogonis), *Di Huang* (Radix Rehmanniae), *Yu Zhu* (Rhizoma Polygonati Odorati), and rock sugar. *Ren Shen* (Radix et Rhizoma Ginseng) may be added if needed.

Xin Jia Huang Long Tang (Newly-Augmented Yellow Dragon Decoction) clears heat, purges the stools, tonifies qi, and nourishes yin. It treats excess heat in the interior, accompanied by depletion of qi and yin with the following

symptoms and signs: constipation, a feeling of fullness, hardness and rigidity in the abdomen, lethargy, low energy, a weak voice, a dry mouth and tongue, dry or chapped lips, and a dry, yellow or dry, black fissured tongue coating.

This formula treats *yangming fu* (hollow organs) syndrome with qi and yin deficiencies. Constipation and abdominal fullness and hardness are typical clinical manifestations of *yangming fu* syndrome, in which excess heat stagnates in the *yangming* organs. Heat stagnation in the *yangming* organs injures qi, yin and blood, causing lethargy, low energy, and a weak voice. Dry mouth, dry lips, and dry tongue with black fissured tongue coating suggest interior heat consuming yin and body fluids.

Da Huang (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) purge heat stagnation and constipated stools. *Xuan Shen* (Radix Scrophulariae), *Di Huang* (Radix Rehmanniae), *Mai Dong* (Radix Ophiopogonis), and *Hai Shen* (Strichopus Japonicus) nourish yin and body fluids. *Ren Shen* (Radix et Rhizoma Ginseng), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Dang Gui* (Radix Angelicae Sinensis) tonify qi and blood to strengthen the body. The juice of *Sheng Jiang* (Rhizoma Zingiberis Recens) harmonizes the Stomach and prevents vomiting.

Huang Long Tang and *Xin Jia Huang Long Tang* (Newly-Augmented Yellow Dragon Decoction) both clear heat, purge stagnation, and tonify qi and blood. Both treat interior heat accumulation, an excess condition with underlying qi and blood deficiencies. Both formulas contain *Da Huang* (Radix et Rhizoma Rhei), *Mang Xiao* (Natrii Sulfas), *Ren Shen* (Radix et Rhizoma Ginseng), *Dang Gui* (Radix Angelicae Sinensis), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). The differences are as follows:

- *Huang Long Tang* is based on *Da Cheng Qi Tang* (Major Order the Qi Decoction), with the addition of *Ren Shen* (Radix et Rhizoma Ginseng), *Dang Gui* (Radix Angelicae Sinensis), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Da Zao* (Fructus Jujubae). It treats excess condition characterized by greater heat and stagnation, and has a stronger purgative effect than *Xin Jia Huang Long Tang*.
- *Xin Jia Huang Long Tang* is based on *Tiao Wei Cheng Qi Tang* (Regulate the Stomach and Order the Qi Decoction), with the addition of *Xuan Shen* (Radix Scrophulariae), *Di Huang* (Radix Rehmanniae), *Mai Dong* (Radix Ophiopogonis), *Hai Shen* (Strichopus Japonicus), *Ren Shen* (Radix et Rhizoma Ginseng), and *Dang Gui* (Radix Angelicae Sinensis). It is better than *Huang Long Tang* in tonifying deficiencies.

Huáng Lóng Tāng (Yellow Dragon Decoction)

AUTHORS' COMMENTS

A typical *yangming fu* (hollow organs) syndrome is characterized by excess heat stagnant in the *yangming* organs without deficiencies of qi, yin, blood and/or body fluids. *Da Cheng Qi Tang* (Major Order the Qi Decoction) is usually the formula of choice to treat this excess heat condition. However, if the qi, yin and/or blood are deficient, heat stagnation and constipation must be eliminated by using both purgative and tonic herbs. If tonic herbs are not used in this syndrome, the patient may either be too

weak to dispel the heat stagnation or may completely collapse after defecation. *Huang Long Tang* and *Xin Jia Huang Long Tang* (Newly-Augmented Yellow Dragon Decoction) both treat *yangming fu* syndrome with underlying deficiencies by simultaneously purging heat and stagnation and tonifying deficiencies.

Zēng Yè Chéng Qì Tāng

(Increase the Fluids and Order the Qi Decoction)

增液承氣湯

增液承气汤

Pinyin Name: *Zeng Ye Cheng Qi Tang*

Literal Name: Increase the Fluids and Order the Qi Decoction

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

COMPOSITION

<i>Xuan Shen</i> (Radix Scrophulariae)	30g
<i>Mai Dong</i> (Radix Ophiopogonis)	24g
<i>Di Huang</i> (Radix Rehmanniae)	24g
<i>Da Huang</i> (Radix et Rhizoma Rhei)	9g
<i>Mang Xiao</i> (Natrii Sulfas)	4.5g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients in 8 cups of water until 2 cups of liquid remain. Take 1 cup of the decoction. If bowel movement is not induced after taking the formula, administer another cup.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin and generates body fluids
2. Purges heat and promotes defecation

CLINICAL MANIFESTATIONS

Yangming fu (hollow organs) syndrome characterized by Stomach and Intestines heat damaging yin and body fluids: severe constipation that cannot be relieved by regular purgative method; dry, immobile stools; abdominal fullness; thirst; and a dry mouth and throat.

CLINICAL APPLICATIONS

Anal fissures, renal insufficiency, postpartum anuria, and epistaxis.

EXPLANATION

In *yangming fu* (hollow organs) syndrome, heat stagnates in the Stomach and Large Intestine and causes the stools to be impacted. If the heat persists, yin and body fluids will be so severely damaged that even normal purgative methods would not be able to remove the dry, constipated stools. In such cases, two kinds of herbs must be used: sweet, cold, and moistening herbs that nourish yin and moisten dryness; and bitter and salty herbs that clear heat and drain downward. Nourishing yin and replenishing body fluids are essential steps in successfully removing the constipated stools and clearing stagnant interior heat.

Zēng Yè Chéng Qì Tāng

(Increase the Fluids and Order the Qí Decoction)

Zeng Ye Cheng Qi Tang (Increase the Fluids and Order the Qi Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Yangming</i> syndrome characterized by heat in the Stomach and Intestines damaging yin and body fluids	<ul style="list-style-type: none">• Severe constipation with abdominal fullness: heat in the Stomach and Large Intestine with hard and constipated stools• Dry, immobile stools, thirst, a dry mouth and throat: damage to yin and body fluids	<ul style="list-style-type: none">• Nourishes yin and generates body fluids• Purges heat and promotes defecation	<ul style="list-style-type: none">• <i>Xuan Shen</i> (Radix Scrophulariae), <i>Mai Dong</i> (Radix Ophiopogonis) and <i>Di Huang</i> (Radix Rehmanniae) nourish yin and body fluids, clear heat, and moisten dryness.• <i>Da Huang</i> (Radix et Rhizoma Rhei) and <i>Mang Xiao</i> (Natrii Sulfas) purge excess heat, soften hardness, and remove constipated stools.

Zeng Ye Cheng Qi Tang (Increase the Fluids and Order the Qi Decoction) contains *Xuan Shen* (Radix Scrophulariae), *Mai Dong* (Radix Ophiopogonis), and *Di Huang* (Radix Rehmanniae), the three herbs in *Zeng Ye Tang* (Increase the Fluids Decoction), to nourish yin and body fluids, and to moisten dryness. *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) purge excess heat, soften hardness, and remove constipated stools.

This formula, besides treating *yangming fu* (hollow organs) syndrome, may also be used to treat chronic constipation characterized by yin deficiency and dry heat in the Large Intestine.

MODIFICATIONS

- For constipation characterized by qi deficiency, add *Tai Zi Shen* (Radix Pseudostellariae) or *Xi Yang Shen* (Radix Panacis Quinquefolii).
- For bleeding hemorrhoids, add *Di Yu* (Radix Sanguisorbae) and *Huai Hua* (Flos Sophorae).

CAUTIONS / CONTRAINDICATIONS

Zeng Ye Cheng Qi Tang treats constipation characterized by heat damaging yin and body fluids. It is not appropriate for postpartum constipation caused by blood deficiency, or habitual constipation in geriatric patients caused by Kidney deficiency.

CLINICAL STUDIES AND RESEARCH

1. **Anal fissures:** Administration of modified *Zeng Ye Cheng Qi Tang* in 31 patients with anal fissures was associated with complete recovery in 29 patients and improvement in 2 patients. The history of illness ranged from 7 days to 5 years. The herbal treatment contained the following ingredients: *Xuan Shen* (Radix Scrophulariae) 15g, *Di Huang* (Radix Rehmanniae) 15g, *Mai Dong* (Radix Ophiopogonis) 15g, post-decocted *Da Huang* (Radix

et Rhizoma Rhei) 5g, and *Mang Xiao* (Natrii Sulfas) 5g. Dry-fried *Di Yu* (Radix Sanguisorbae) and dry-fried *Huai Hua* (Flos Sophorae) were added for hematochezia; and *Zhi Qiao* (Fructus Aurantii) and *Yan Hu Suo* (Rhizoma Corydalis) for severe pain. For those who experience multiple bowel movements or loose stools after herbal treatment, *Da Huang* (Radix et Rhizoma Rhei) should be reduced in dose or pre-decocted. The herbs were cooked in water, and decoction given daily, for an average of 7 packs of herbs.¹

2. **Renal insufficiency:** Administration of *Zeng Ye Cheng Qi Tang* was shown to have beneficial effects in treating acute renal insufficiency in one study. The study entailed the administration of 200 mL of herbal solution via rectal enema two to four times daily. Of 49 patients, the study reported recovery in 41 patients, improvement in 2 patients, and fatality in 6 patients.²
3. **Postpartum anuria:** Thirty-four women with postpartum anuria were treated with herbs, with complete recovery in 13 patients after 1 pack of herbs, 19 patients after 2 packs, and 2 patients after 3 packs. The herbal formula contained *Xuan Shen* (Radix Scrophulariae) 30g, *Di Huang* (Radix Rehmanniae) 20g, *Mai Dong* (Radix Ophiopogonis) 20g, *Da Huang* (Radix et Rhizoma Rhei) 6g, *Mang Xiao* (Natrii Sulfas) 6g, *Che Qian Zi* (Semen Plantaginis) 30g, and *Jie Geng* (Radix Platycodonis) 10g. Modifications were made by adding *Huang Bo* (Cortex Phellodendri Chinensis) 10g and *Pu Gong Ying* (Herba Taraxaci) 50g for the presence of fever caused by infection.³
4. **Epistaxis:** Twelve patients with severe nosebleeds were successfully treated using *Zeng Ye Cheng Qi Tang* plus *Mu Dan Pi* (Cortex Moutan), *Zhi Shi* (Fructus Aurantii Immaturus), and *Hou Po* (Cortex Magnoliae Officinalis).⁴

HERB-DRUG INTERACTION

Phenothiazine-induced constipation: Use of modified *Zeng Ye Cheng Qi Tang* was beneficial in alleviating the side

Zēng Yè Chéng Qì Tāng

(Increase the Fluids and Order the Qi Decoction)

effects related to use of phenothiazine in 30 psychiatric patients. Phenothiazine-induced side effects include constipation, a dry mouth with a bitter taste, nausea, etc. The herbal formula contained *Xuan Shen* (Radix Scrophulariae), *Di Huang* (Radix Rehmanniae), *Mai Dong* (Radix Ophiopogonis), *Da Huang* (Radix et Rhizoma Rhei), *Zhi Shi* (Fructus Aurantii Immaturus), *Hou Po* (Cortex Magnoliae Officinalis), and *Tian Hua Fen* (Radix Trichosanthis). The herbs were given in decoction form one time daily. Patients were instructed to continue with phenothiazine and herbs concurrently for four weeks, while avoiding all other treatments. Of 30 patients, the study reported complete recovery in 14 patients, significant effect in 10 patients, moderate effect in 3 patients, and no change in 3 patients. The overall rate of effectiveness was 90%.⁵

RELATED FORMULA

Chéng Qì Yǎng Yíng Tāng

(Order the Qi and Nourish the Nutritive Qi Decoction)

承氣養營湯
承气养营汤

Pinyin Name: *Cheng Qi Yang Ying Tang*

Literal Name: Order the Qi and Nourish the Nutritive Qi Decoction

Original Source: *Wen Yi Lun* (Discussion of Epidemic Warm Disease) by Wu You-Xing in 1642

<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	[9g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	[6g]
<i>Di Huang</i> (Radix Rehmanniae)	[12g]
<i>Da Huang</i> (Radix et Rhizoma Rhei)	[12g]
<i>Zhi Shi</i> (Fructus Aurantii Immaturus)	[9g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis)	[9g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	[15g]

This formula is normally prepared as a decoction. Note: The source text did not provide the herb doses. Use the doses listed above in brackets.

This formula clears heat, promotes defecation, nourishes yin, and moistens dryness. Clinically, patients may show

symptoms such as constipation, persistent fever, dry and chapped lips, a dry throat with a desire to drink, and abdominal fullness, hardness and pain.

Cheng Qi Yang Ying Tang (Order the Qi and Nourish the Nutritive Qi Decoction) employs the strategies of two formulas: *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction) to clear heat, purge the Intestines, and relieve abdominal fullness and pain; and *Si Wu Tang* (Four-Substance Decoction) to nourish yin and tonify the blood. Although the strategies are the same, one small modification has been made: *Chuan Xiong* (Rhizoma Chuanxiong), which is acrid and dry, is replaced by *Zhi Mu* (Rhizoma Anemarrhenae), which is bitter and cold. This substitution enhances the overall ability of the formula to nourish yin and tonify the blood.

Zeng Ye Cheng Qi Tang and *Cheng Qi Yang Ying Tang* (Order the Qi and Nourish the Nutritive Qi Decoction) both nourish yin, purge heat, relieve constipation, and purge accumulation.

- *Zeng Ye Cheng Qi Tang* more strongly nourishes yin and generates body fluids, and moderately clears heat.
- *Cheng Qi Yang Ying Tang* drains downward, nourishes yin, and tonifies the blood, all with equal emphasis.

AUTHORS' COMMENTS

Zeng Ye Cheng Qi Tang treats febrile disorders with constipation characterized by heat stagnation and yin and body fluid deficiencies. This formula can also be used in cases of constipation caused by high fever that occurs in acute infectious diseases and leads to body fluid deficiency. Another popular use is for hemorrhoids with dry stools and yin deficiency.

Chapter 2 — Summary

— Downward Draining Formulas

SECTION 1: COLD PURGATIVES

Name	Similarities	Differences
<i>Da Cheng Qi Tang</i> (Major Order the Qi Decoction)		Strongest potency
<i>Xiao Cheng Qi Tang</i> (Minor Order the Qi Decoction)	Drain heat and accumulation downward	Moderate to strong potency
<i>Tiao Wei Cheng Qi Tang</i> (Regulate the Stomach and Order the Qi Decoction)		Mild to moderate potency
<i>Da Xian Xiong Tang</i> (Major Sinking into the Chest Decoction)	Purges heat and eliminates water accumulation	Treats accumulation of heat and water in the chest
<i>Yi Zi Tang</i> (Yi Word Decoction)	Clears heat and promotes bowel movement	Cools the blood, eliminates toxins, and raises yang qi

Da Cheng Qi Tang (Major Order the Qi Decoction), *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction), and *Tiao Wei Cheng Qi Tang* (Regulate the Stomach and Order the Qi Decoction) all contain *Da Huang* (Radix et Rhizoma Rhei) to purge stagnation and heat in the Large Intestine to treat *yangming fu* (hollow organs) syndrome.

- *Da Cheng Qi Tang* is the strongest of these three formulas, and may be used to treat all four manifestations of *pi* (distention), *man* (fullness), *zao* (dryness), and *shi* (hardness). The constipation is characterized by extremely hard stools.
- *Xiao Cheng Qi Tang* has moderate to strong potency and is used to treat qi stagnation signs and symptoms of *pi* (distention), *man* (fullness) and *shi* (hardness). The constipation is characterized by moderately hard stools.
- *Tiao Wei Cheng Qi Tang* is the mildest among the three formulas, and mainly softens the stools in constipation characterized by *zao* (dryness) and *shi* (hardness).

Da Cheng Qi Tang (Major Order the Qi Decoction) and *Da Xian Xiong Tang* (Major Sinking into the Chest Decoction) both purge heat stagnation.

- *Da Cheng Qi Tang* drastically purges stagnant heat from the Stomach and removes constipated stools from the Intestines.
- *Da Xian Xiong Tang* purges stagnant heat and water from the chest, a condition known as *jie xiong* (stagnant chest). It is an important formula for treating hardness, fullness, and pain in the epigastrium and lower abdomen, caused by the interlocking of heat and water.

Yi Zi Tang (Yi Word Decoction) clears heat and eliminates toxins from the lower *jiao* to treat constipation. In addition, it cools the blood, stops bleeding, and raises yang qi to relieve hemorrhoids.

Chapter 2 — Summary

SECTION 2: WARM PURGATIVES

Name	Similarities	Differences
<i>Da Huang Fu Zi Tang</i> (Rhubarb and Prepared Aconite Decoction)	Drain cold and accumulation downward	Moderate potency and balanced effect to warm the interior and purge downward
<i>Wen Pi Tang</i> (Warm the Spleen Decoction)		Strongest formula to purge downward
<i>San Wu Bei Ji Wan</i> (Three-Substance Pill for Emergencies)		Strongest potency to warm and tonify the interior

Da Huang Fu Zi Tang (Rhubarb and Prepared Aconite Decoction), *Wen Pi Tang* (Warm the Spleen Decoction), and *San Wu Bei Ji Wan* (Three-Substance Pill for Emergencies) are warm purgative formulas with similar functions to drain downward and eliminate cold accumulation.

- *Da Huang Fu Zi Tang* also warms the channels and disperses coldness. It is suitable for treating constipation characterized by interior excess, cold accumulation, and underlying yang deficiency.
- *Wen Pi Tang* also warms and tonifies Spleen yang. It treats constipation caused by Spleen yang deficiency and cold accumulation. It is also used to treat chronic dysentery with red (blood) and white (mucus) stools.
- *San Wu Bei Ji Wan* quickly removes excess cold stagnation in the interior. With a drastic purgative action, this formula is suitable for treating constipation with stagnation of interior cold causing sudden distending pain in the chest and abdomen.

SECTION 3: MOIST LAXATIVES

Name	Similarities	Differences
<i>Ma Zi Ren Wan</i> (Hemp Seed Pill)	Lubricate the Intestines to relieve constipation	Drains heat and activates qi circulation
<i>Run Chang Wan</i> (Moisten the Intestines Pill)		Regulates blood circulation and tonifies the blood.
<i>Ji Chuan Jian</i> (Benefit the River [Flow] Decoction)		Warms Kidney yang and tonifies <i>jing</i> (essence)

Ma Zi Ren Wan (Hemp Seed Pill), *Run Chang Wan* (Moisten the Intestines Pill), and *Ji Chuan Jian* (Benefit the River [Flow] Decoction) all lubricate the Intestines to relieve constipation.

- *Ma Zi Ren Wan* purges heat and activates qi circulation. It relieves constipation characterized by dry-heat in the Stomach and Large Intestine.
- *Run Chang Wan* nourishes the blood and activates blood circulation. It is used for constipation characterized by blood deficiency.
- *Ji Chuan Jian* warms Kidney yang and nourishes *jing* (essence). It is suitable for constipation caused by Kidney yang and *jing* deficiencies.

Chapter 2 — Summary

SECTION 4: HARSH EXPELLANTS (CATHARTICS)

Name	Similarities	Differences
<i>Shi Zao Tang</i> (Ten-Jujube Decoction)	Harsh expellants that purge water stagnation	Strengthens the middle <i>jiao</i>
<i>Zhou Che Wan</i> (Vessel and Vehicle Pill)		Activates qi circulation
<i>Shu Zao Yin Zi</i> (Spread and Unblock Decoction)		Releases the exterior

Shi Zao Tang (Ten-Jujube Decoction), *Zhou Che Wan* (Vessel and Vehicle Pill), and *Su Zao Yin Zi* (Spread and Unblock Decoction) all purge water stagnation from the interior.

- *Shi Zao Tang* purges water stagnation and strengthens the middle *jiao* simultaneously. It may be used for water accumulation in the upper (pleural effusion), middle (ascites), or lower (edema) parts of the body.
- *Zhou Che Wan*, a stronger purgative formula, activates qi circulation and purges water stagnation simultaneously. It is generally used for water accumulation in the middle (ascites) and lower (edema) parts of the body.
- *Su Zao Yin Zi*, a weak purgative formula, purges water stagnation and releases the exterior. It is primarily used for water accumulation at the exterior or skin level, which results in generalized edema.

SECTION 5: PURGATIVE AND TONIC FORMULAS

Name	Similarities	Differences
<i>Huang Long Tang</i> (Yellow Dragon Decoction)	Clear heat and promote defecation	Tonifies qi and blood
<i>Zeng Ye Cheng Qi Tang</i> (Increase the Fluids and Order the Qi Decoction)		Nourishes yin and generates body fluids

Huang Long Tang (Yellow Dragon Decoction) and *Zeng Ye Cheng Qi Tang* (Increase the Fluids and Order the Qi Decoction) both purge heat stagnation and tonify the body.

- *Huang Long Tang* specifically tonifies qi and blood, and is indicated for *yangming fu* (hollow organs) syndrome with deficiency of qi and blood.
- *Zeng Ye Cheng Qi Tang* has a strong nourishing and moisturizing action, and is suitable for severe constipation accompanied by severe deficiency of yin and body fluids.

— Harmonizing Formulas

吴有性 Wū Yǒu-Xìng

吴有性 Wū Yǒu-Xìng, also known as 吴又可 Wū Yòu-Kě, 1580's – 1660's.¹

吴有性 Wū Yǒu-Xìng

瘟疫论 *Wen Yi Lun* (Discussion of Epidemic Warm Disease) in 1642.

Wu You-Xing lived during the transition from the Ming dynasty to the Qing dynasty, a period dominated by war and characterized by extreme poverty and poor sanitary conditions. As a result, countless epidemics ravaged the country and killed millions of people. At the time, most physicians strictly followed the guidelines of 伤寒 *shang han* (cold damage), and achieved little or no success in treating 瘟疫 *wen yi* (warm epidemic). Wu observed that *wen yi* (warm epidemic) plagued everyone, starting “from one person to the entire household, from one household to the entire street, and from one street to the entire village.” To better understand the patterns of this kind of disease, Wu risked his life by entering affected households and neighborhoods to personally observe and directly treat those who became ill. After years of clinical observation, Wu stated that epidemics such as *wen yi* (warm epidemic) are “*not* caused by wind, cold, summer-heat, nor dampness, but rather by 戾气 *li qi* (perverse qi).” He further elaborated that *li qi* (perverse qi) existed in the universe, but have “no sound nor smell, and no shape nor shadow.” Furthermore, he observed that *li qi* (perverse qi) may be transmitted from one person to another via “heaven [air borne]” or “earth [direct contact],” and affect weak, deficient individuals (i.e., those with low immunity).

Based on these observations, Wu You-Xing wrote *Wen Yi Lun* (Discussion of Epidemic Warm Disease) in 1642, which was published approximately 200 years before the discovery of bacteria and other micro-organisms. It accurately described the origins and transmission of epidemic disease, and the importance of the immune system in relationship to the pathogens. Wu revolutionized and significantly influenced the theory and practice of traditional Chinese medicine, changes that persist even today.

Formulas originated by Wu You-Xing include:

- *Cheng Qi Yang Ying Tang* (Order the Qi and Nourish the Nutritive Qi Decoction)
- *Da Yuan Yin* (Reach the Membrane Source Decoction)

1. Exact dates of his birth and death are unknown.

Wu personally entering the epidemic area to treat patients.

Chapter 3 — Overview

— Harmonizing Formulas

Definition: Harmonizing formulas treat complicated and co-existing but contrasting illness that cannot be addressed by one simple treatment method. This method of treatment is known as *he fa* (harmonizing), one of the *ba fa* (eight treatment methods) described in the *Huang Di Nei Jing* (Yellow Emperor's Inner Classic) in the first or second century, A.D.

The concept of complicated and co-existing but contrasting illness refers to disorders that affect more than one part of the body and often have opposite characteristics. For example, these disorders may affect the exterior and interior, upper and lower parts of the body, *ying* (nutritive) and *wei* (defensive) levels, or *qi* (energy) and *xue* (blood) levels. Moreover, the disorders can be characterized by both cold and heat, excess and deficiency. In such complex cases, it is inappropriate to solely release the exterior, drain the interior, tonify the deficiency, or clear the excess. Instead, it is more suitable to regulate and resolve these complex conditions through the use of harmonizing formulas.

Harmonizing formulas are frequently used to treat three main categories of disorders: *shaoyang* (half-interior, half-exterior) syndromes, Liver and Spleen disharmonies, and Intestine and Stomach disharmonies.

The characteristics of *shaoyang* syndrome is the presence of pathogens residing halfway between the exterior and interior. *Shaoyang* syndrome cannot be treated with only exterior-releasing formulas, since this would leave the interior pathogenic factor untreated. *Shaoyang* syndrome also cannot be addressed solely by targeting the interior with methods such as heat-clearing, downward draining, or emesis, since this would leave the exterior pathogenic factor untreated, or, worse, draw the pathogenic factor into the interior. Because *shaoyang* syndrome cannot be treated solely by releasing the exterior or resolving the interior, it must be harmonized by concurrently addressing the exterior and interior.

In addition to *shaoyang* syndrome, there are many other applications of harmonizing formulas. *Shaoyang* syndrome may also be characterized by heat in the Gallbladder channel. However, because the Gallbladder has a yin-yang relationship with the Liver, Gallbladder disorders easily result in Liver disorders. An unregulated Liver may then overact on the Spleen and Stomach, causing disorders such as Liver and Spleen disharmony, and Intestines and Stomach disharmony. Today, harmonizing methods are used to treat all of the above disorders.

~
***Shaoyang* disorders may be characterized by both cold and heat, or excess and deficiency.**
~

SUBCATEGORIES OF ACTION

Harmonizing formulas are organized into three subcategories to reflect the nature of the disharmony and the characteristics of relevant formulas.

1. *Shaoyang* Harmonizing Formulas

These formulas harmonize *shaoyang* (half-interior, half-exterior) syndrome. Common clinical manifestations include alternating spells of chills and fever, fullness and discomfort in the chest and hypochondrium, irritability, vomiting, lack of appetite, a bitter taste in the mouth, a dry throat, and vertigo.

Chapter 3 — Overview

Herbs commonly used to harmonize *shaoyang* syndrome include *Huang Qin* (Radix Scutellariae) with *Chai Hu* (Radix Bupleuri), or *Huang Qin* (Radix Scutellariae) with *Qing Hao* (Herba Artemisiae Annuae). Representative formulas that harmonize *shaoyang* syndrome are *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) and *Hao Qin Qing Dan Tang* (Artemisia Annuum and Scutellaria Decoction to Clear the Gallbladder).

2. Liver and Spleen Harmonizing Formulas

Shaoyang syndromes cannot be treated with only exterior-releasing formulas.

These formulas treat Liver qi stagnation (excess), which overacts on the Spleen (deficiency). Common clinical manifestations include a stifling sensation in the chest, hypochondriac pain, cold hands and feet; epigastric and abdominal fullness and pain, lack of appetite, diarrhea, rectal tenesmus; and breast distention and irregular menstruation in women.

Formulas that harmonize the Liver and Spleen generally include herbs that smooth Liver qi, strengthen the Spleen, regulate qi circulation, and nourish blood. Exemplar herbs include *Chai Hu* (Radix Bupleuri), *Zhi Qiao* (Fructus Aurantii), *Chen Pi* (Pericarpium Citri Reticulatae), *Xiang Fu* (Rhizoma Cyperi), *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Fu Ling* (Poria) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle). Representative formulas include *Si Ni San* (Frigid Extremities Powder), *Xiao Yao San* (Rambling Powder), and *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea).

3. Intestine and Stomach Harmonizing Formulas

These formulas treat accumulation of various pathogenic factors in the Stomach and Intestines. Such cases involve interlocking of heat and cold, which causes reversed qi flow in the Stomach and Intestines. Common clinical manifestations include nausea, vomiting, borborygmus, diarrhea, and epigastric and abdominal distention, fullness and pain.

Two types of herbs are commonly used to harmonize the Intestines and Stomach and treat the interlocking of heat and cold: acrid and warm herbs, such as *Gan Jiang* (Rhizoma Zingiberis) and *Sheng Jiang* (Rhizoma Zingiberis Recens); and bitter and cold herbs, such as *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis). An exemplar formula is *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium).

CAUTIONS / CONTRAINDICATIONS

- Harmonizing formulas do not have drastic or overtly powerful actions. Nevertheless, harmonizing formulas eliminate pathogenic factors from the body. Use of harmonizing formulas when not appropriate to the diagnosis may delay healing or even worsen the condition. For example, use of harmonizing formulas for an interior condition may lengthen the time required for healing; using them for an exterior syndrome may worsen the condition by drawing exterior pathogens inward.
- Harmonizing formulas should not be used in individuals with alternating fever and chills accompanied fatigue, weakness, irregular diet and lifestyle, and deficiency of qi or blood.
 - Harmonizing formulas should not be used for conditions in which the exterior pathogenic factors have not yet entered *shaoyang*; for an interior condition that has progressed past *shaoyang*; or for *yangming* syndromes with excess heat.
 - Historically, malaria has been diagnosed as a *shaoyang* disorder and treated with harmonizing formulas. But malaria may have various clinical manifestations: treatment with harmonizing formulas alone is no longer recommended.

Solely targeting the interior with downward-draining formulas . . . [might] draw the pathogenic factor into the interior.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Harmonizing formulas fall into three subcategories based on traditional therapeutic actions. These subcategories have distinct pharmacological effects and clinical applications.

1. *Shaoyang* harmonizing formulas, as the name implies, primarily relieve “half-interior, half-exterior” *shaoyang* syndromes. In allopathic medicine, such conditions are often characterized by

Chapter 3 — Overview

chronic disease of internal organs. Clinically, *shaoyang* harmonizing formulas are most effective for chronic disease affecting the liver, gallbladder, pancreas, and kidneys.

- **Liver disorders:** *Shaoyang* harmonizing formulas have marked hepatoprotective effects and commonly treat liver disorder, including but not limited to chronic hepatitis,^{1,2,3} liver fibrosis,⁴ liver cancer,⁵ and alcohol-induced liver disorders (hepatitis, fatty liver, and liver cirrhosis).⁶ The mechanism of action differs among several formulas. *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) protects the liver by augmenting the natural killer (NK) cell activity in the liver and increasing production of granulocyte colony-stimulating factor (G-CSF) in peripheral blood mononuclear cells.^{7,8} *Si Ni San* (Frigid Extremities Powder) provides protective effects against liver injury through multiple mechanisms, such as protection of the hepatocyte membrane, enhancement of nitric oxide release, and dysfunction of liver-infiltrating cells, mainly by causing apoptosis.⁹ *Chai Hu Gui Zhi Tang* (Bupleurum and Cinnamon Twig Decoction) protects the liver by inhibiting cell proliferation and induction of apoptosis in adjacent hepatocytes, in subjects with liver lesions induced by N-nitrosomorpholine.¹⁰
- **Gallbladder disorders:** Cholecystitis and cholelithiasis are gallbladder disorders commonly addressed by formulas that harmonize *shaoyang*, such as *Xiao Chai Hu Tang* (Minor Bupleurum Decoction),^{11,12} and *Hao Qin Qing Dan Tang* (Artemisia Annuua and Scutellaria Decoction to Clear the Gallbladder).¹³ This action is attributed to their cholagogic effect to increase secretion of bile from the gallbladder, and facilitate its excretion into the intestines.¹⁴
- **Pancreatic disorders:** Some *shaoyang* harmonizing formulas have protective effects on the pancreas to treat various pancreatic disorders. For example, *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) treats acute pancreatitis,¹⁵ and *Chai Hu Gui Zhi Tang* (Bupleurum and Cinnamon Twig Decoction) treats chronic pancreatitis and pancreatic fibrosis.^{16,17,18,19}
- **Kidney disorders:** *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) has been shown effective in treatment of renal insufficiency,²⁰ and acute and chronic nephritis.²¹ *Chai Ling Tang* (Bupleurum and Poria Decoction) has been used successfully to treat nephropathy,²² diabetic nephropathy,²³ and steroid-dependent nephrotic syndrome.²⁴ The mechanisms of these nephroprotective effects have been attributed in part to the ability of the formulas to increase elimination of water,²⁵ and decrease serum albumin and total protein levels.²⁶

2. Liver and Spleen harmonizing formulas treat a wide variety of disorders, including liver, gallbladder, gastrointestinal, mental, and sexual and reproductive disorders.

- **Liver disorders:** These formulas address liver disorders such as hepatitis,^{27,28} chronic hepatitis,²⁹ and liver cirrhosis.^{30,31} The hepatoprotective effects of these formulas include enhanced protection of the hepatocyte membrane, reduced damage to liver cells, decreased liver enzymes, and increased generation of new liver cells.^{32,33,34} Exemplar formulas include *Si Ni San* (Frigid Extremities Powder), *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), and *Xiao Yao San* (Rambling Powder).
- **Gallbladder disorders:** Cholecystitis and cholelithiasis are disorders commonly addressed by formulas such as *Si Ni San* (Frigid Extremities Powder),^{35,36} *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver),^{37,38} and *Xiao Yao San* (Rambling Powder).³⁹ The cholagogic effects of the formulas increase the production and secretion of bile acids.⁴⁰
- **Gastrointestinal disorders:** These formulas treat a wide variety of gastrointestinal diseases, including superficial gastritis,⁴¹ gastritis,⁴² peptic ulcer,⁴³ chronic ulcerative colitis,⁴⁴ enteritis,^{45,46} colitis,⁴⁷ ulcerative colitis,⁴⁸ and irritable bowel syndrome.^{49,50} Exemplar formulas include *Si Ni San* (Frigid Extremities Powder), *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), *Xiao Yao San* (Rambling Powder), and *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea). The mechanism of action varies, depending on the disorder and the relevant formulas.
- **Mental disorders:** Many harmonizing formulas are used to treat various mental disorders. *Xiao Yao San* (Rambling Powder) has been used successfully for schizophrenia,⁵¹ depression,⁵² and neurosis.⁵³ *Jia Wei Xiao Yao San* (Augmented Rambling Powder) has been effective for affective and panic disorders.^{54,55} *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver) has been used

Chapter 3 — Overview

to treat insomnia.⁵⁶ The mechanism of action varies, depending on the disorder and the relevant formulas.

- **Sexual and reproductive disorders:** These formulas are effective in a wide variety of sexual and reproductive disorders in both men and women. *Si Ni San* (Frigid Extremities Powder) has been used effectively for impotence,⁵⁷ chronic adnexitis,⁵⁸ and infertility caused by blocked fallopian tubes.⁵⁹ *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver) has been used successfully for orchitis,⁶⁰ male sexual dysfunction (specifically, the inability to ejaculate),⁶¹ and breast distention and pain.⁶² Lastly, *Xiao Yao San* (Rambling Powder) is useful in cases of sexual dysfunction in men (impotence and inability to ejaculate),^{63,64} and infertility in women.⁶⁵

3. Unlike other harmonizing formulas that have a wide range of clinical applications, **Intestine and Stomach harmonizing formulas** target mainly gastrointestinal disorders.

- **Gastrointestinal disorders:** The conditions these formulas treat include superficial gastritis,⁶⁶ chronic gastritis,⁶⁷ atrophic gastritis,⁶⁸ peptic ulcer disease,⁶⁹ reflux esophagitis,⁷⁰ upper gastrointestinal bleeding,⁷¹ indigestion,⁷² gastroparesis,⁷³ gastroenteritis,⁷⁴ irritable bowel syndrome,⁷⁵ and ulcerative colitis.⁷⁶ Exemplar formulas include *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium), *Sheng Jiang Xie Xin Tang* (Fresh Ginger Decoction to Drain the Epigastrium), and *Huang Lian Tang* (Coptis Decoction).

Section 1

和解少阳剂

— Shaoyang Harmonizing Formulas

Xiǎo Chái Hú Tāng (Minor Bupleurum Decoction)

小柴胡湯

小柴胡汤

Pinyin Name: *Xiao Chai Hu Tang*

Literal Name: Minor Bupleurum Decoction

Alternate Names: *Hsiao Tsai Hu Tang*, Minor Bupleurum CombinationOriginal Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-jing in the Eastern Han Dynasty

COMPOSITION

<i>Chai Hu</i> (Radix Bupleuri)	24g [12g]
<i>Huang Qin</i> (Radix Scutellariae)	9g [9g]
<i>Ban Xia</i> (Rhizoma Pinelliae), <i>xi</i> (washed)	0.5 cup [9g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>qie</i> (sliced)	9g [9g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	9g [6g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	9g [5g]
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	12 pieces [4 pieces]

DOSAGE / PREPARATION / ADMINISTRATION

The source text specifies to cook the ingredients in 12 cups [2,400 mL] of water until 6 cups [1,200 mL] of the liquid remain. Discard the residue, and cook the strained decoction again until it is reduced to 3 cups [600 mL]. Take 1 cup [200 mL] of warm decoction per dose, three times daily. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Harmonizes *shaoyang*

CLINICAL MANIFESTATIONS

1. *Shaoyang* syndrome: alternating spells of fever and chills, chest and hypochondriac fullness and discomfort, irritability, a bitter taste in the mouth, lack of appetite, nausea, vomiting, vertigo, a dry throat, a thin, white tongue coating, and a wiry pulse.
2. Any of the following disorders with *shaoyang* characteristics: gynecological disorders with heat in the uterus, Liver, or *chong* (thoroughfare) channel; malaria; jaundice; or any internal injury characterized by *shaoyang* syndrome.

CLINICAL APPLICATIONS

Hepatitis, viral hepatitis, chronic hepatitis, hepatic fibrosis and carcinoma, hepatocellular carcinomas, jaundice, cholecystitis, cholelithiasis, pancreatitis, fever, fever in cancer, nephritis, chronic renal insufficiency, acute tonsillitis, infectious parotitis, stomatitis, common cold, influenza, measles, bronchitis, pneumonia, pulmonary tuberculosis, cough, allergic rhinitis, bronchial asthma, reflux esophagitis, antral gastritis, gastritis, gastric pain, gastric prolapse, constipation, Meniere's syndrome, dizziness, seizures, migraine, angina, depression, chronic fatigue syndrome, morning sickness, postpartum infection, postpartum fever, dysmenorrhea, premenstrual syndrome, and malaria.

EXPLANATION

Xiao Chai Hu Tang (Minor Bupleurum Decoction) is the main formula for harmonizing *shaoyang* syndrome, one of the six stages of disease progression described in *Shang Han Lun* (Discussion of Cold-Induced Disorders). The *shaoyang* is situated between *yang* and *yin*, or between the exterior and interior; therefore, alternating spells of fever and chills may occur in *shaoyang* syndrome.

Xiǎo Chái Hú Tāng (Minor Bupleurum Decoction)

Xiao Chai Hu Tang (Minor Bupleurum Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Shaoyang syndrome	<ul style="list-style-type: none"> • Alternating spells of fever and chills: the location of the illness between exterior and interior • Chest and hypochondriac fullness and discomfort: qi stagnation • A bitter taste in the mouth, a dry throat, and irritability: heat in the <i>shaoyang</i> Gallbladder channel • Lack of appetite, nausea, and vomiting: Gallbladder heat invading the Stomach • Thin, white tongue coating: exterior condition • Wiry pulse: qi stagnation 	Harmonizes <i>shaoyang</i>	<ul style="list-style-type: none"> • <i>Chai Hu</i> (Radix Bupleuri) releases the exterior, and <i>Huang Qin</i> (Radix Scutellariae) clears the interior. Together, they harmonize <i>shaoyang</i> disorders. • <i>Ban Xia</i> (Rhizoma Pinelliae) harmonizes the Stomach to relieve nausea and vomiting, and disperses stagnation. • <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) harmonizes the middle <i>jiao</i>. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), and <i>Da Zao</i> (Fructus Jujubae) tonify Stomach qi, nourish body fluids, and harmonize the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels.

if the body is fighting both the pathogens outside and the disharmony inside.

Disorders in the *shaoyang* may cause qi stagnation and eventual heat formation in the Gallbladder channel (a *shaoyang* channel), giving rise to chest and hypochondriac fullness and discomfort, a bitter taste in the mouth, vertigo, a dry throat, and irritability. Lack of appetite, nausea, and vomiting are the results of Gallbladder heat invading the Stomach. The tongue coating is thin and white because the pathogenic factors have not yet transformed into internal heat. The wiry pulse is the result of qi stagnation in the *shaoyang* channel.

Because the disease resides between the exterior and the interior, it is not suitable to use only exterior-releasing herbs or only purgative herbs. Use of only exterior-releasing herbs will not treat the interior condition, and use of only heat-clearing or downward draining herbs will bring the pathogens from the exterior into the interior. Therefore, the harmonizing method is the most appropriate treatment approach in this condition.

Chai Hu (Radix Bupleuri) is the main herb for treating *shaoyang* disorders. The light quality of *Chai Hu* (Radix Bupleuri) lifts and disperses stagnation, as well as releases to the exterior. *Huang Qin* (Radix Scutellariae), a bitter and cold herb that enters the Gallbladder channel, is ideal for clearing *shaoyang* heat. Together, *Chai Hu* (Radix Bupleuri) disperses the exterior while *Huang Qin* (Radix Scutellariae) clears the interior to achieve the harmonizing effect. *Ban Xia* (Rhizoma Pinelliae), besides harmonizing

the Stomach to relieve nausea and vomiting, disperses stagnation in the body. *Sheng Jiang* (Rhizoma Zingiberis Recens) helps *Ban Xia* (Rhizoma Pinelliae) harmonize the middle *jiao*. It also reduces the toxicity of *Ban Xia* (Rhizoma Pinelliae). *Ren Shen* (Radix et Rhizoma Ginseng), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), and *Da Zao* (Fructus Jujubae) tonify Stomach qi, nourish body fluids, and harmonize the *ying* (nutritive) and *wei* (defensive) levels. The combination of *Chai Hu* (Radix Bupleuri) and *Ren Shen* (Radix et Rhizoma Ginseng) also provides mutual check and balance for each others: *Chai Hu* (Radix Bupleuri) prevents the tonic effect of *Ren Shen* (Radix et Rhizoma Ginseng) from retaining the pathogens in the body, while *Ren Shen* (Radix et Rhizoma Ginseng) prevents the dispersing effect of *Chai Hu* (Radix Bupleuri) from damaging qi. Combined, these herbs expel the pathogens and strengthen bodily constitution.

Because the *shaoyang* stage is unstable and often short and transient, the symptoms listed above may not be clinically present all at the same time. Therefore, as suggested in *Shang Han Lun* (Discussion of Cold-Induced Disorders), this formula can be applied even if there is only one *shaoyang* symptom present clinically.

MODIFICATIONS

General Signs and Symptoms

- If accompanied by headache, add *Chuan Xiong* (Rhizoma Chuanxiong).
- If there is thirst, remove *Ban Xia* (Rhizoma Pinelliae) and add *Tian Hua Fen* (Radix Trichosanthis).

Xiǎo Chái Hú Tāng (Minor Bupleurum Decoction)

- With thirst and irritability from deficiency heat, add *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- If there is no thirst, but a slight fever and exterior symptoms are present, remove *Ren Shen* (Radix et Rhizoma Ginseng) and add *Gui Zhi* (Ramulus Cinnamomi).
- With irritability, add *Dan Zhu Ye* (Herba Lophatheri) and *Geng Mi* (Semen Oryzae).
- With more irritability but absence of nausea or vomiting, remove *Ban Xia* (Rhizoma Pinelliae) and *Ren Shen* (Radix et Rhizoma Ginseng), and add *Gua Lou* (Fructus Trichosanthis).
- With abdominal pain, remove *Huang Qin* (Radix Scutellariae) and add *Bai Shao* (Radix Paeoniae Alba).
- With more vomiting or nausea, add *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Chen Pi* (Pericarpium Citri Reticulatae).
- When there is indigestion in children, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Chen Pi* (Pericarpium Citri Reticulatae), *Fu Ling* (Poria), and *Shan Zha* (Fructus Crataegi).
- If there is gum pain caused by yin deficiency, add *Shi Gao* (Gypsum Fibrosum).
- With palpitations and dysuria, remove *Huang Qin* (Radix Scutellariae) and add *Fu Ling* (Poria).
- With distention and hardness of the hypochondriac area caused by phlegm accumulation, remove *Da Zao* (Fructus Jujubae) and add *Mu Li* (Concha Ostreae).
- If the hypochondriac pain is severe, add *Qing Pi* (Pericarpium Citri Reticulatae Viride), *Bai Shao* (Radix Paeoniae Alba) and *Xiang Fu* (Rhizoma Cyperi).
- With a stifling sensation in the chest, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Qing Pi* (Pericarpium Citri Reticulatae Viride).

Liver and Gallbladder Disorders

- For icteric jaundice and hepatitis, add *Zhi Shi* (Fructus Aurantii Immaturus), *Yin Chen* (Herba Artemisiae Scopariae), *Bai Shao* (Radix Paeoniae Alba), and *Jin Qian Cao* (Herba Lysimachiae).
- For damp-heat jaundice, add *Yin Chen* (Herba Artemisiae Scopariae), *Zhi Zi* (Fructus Gardeniae), and *Ban Lan Gen* (Radix Isatidis).
- For jaundice with more heat, add *Zhi Zi* (Fructus Gardeniae) and *Huang Bo* (Cortex Phellodendri Chinensis).

Infectious Disorders

- For common colds, add *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), and *Ge Gen* (Radix Puerariae Lobatae).

- For influenza, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), and *Ban Lan Gen* (Radix Isatidis).
- For acute bronchitis, add *Jie Geng* (Radix Platycodonis), *Zhi Qiao* (Fructus Aurantii), *Ku Xing Ren* (Semen Arme-niacae Amarum), and *Bai Bu* (Radix Stemonae).
- For chronic bronchitis, add *Fu Ling* (Poria), *Chen Pi* (Pericarpium Citri Reticulatae), *Zi Wan* (Radix et Rhizoma Asteris), and *Kuan Dong Hua* (Flos Farfarae).
- For acute otitis media, add *Long Dan* (Radix et Rhizoma Gentianae) and *Zhi Zi* (Fructus Gardeniae).
- For urinary tract infection, add *Bian Xu* (Herba Polygoni Avicularis), *Che Qian Cao* (Herba Plantaginis), and *Hai Jin Sha* (Spora Lygodii).
- For malaria, add *Chang Shan* (Radix Dichroae), *Bing Lang* (Semen Arecae) and *Wu Mei* (Fructus Mume).

Gynecological Disorders

- For postpartum wind invasion with perspiration, remove *Chai Hu* (Radix Bupleuri).
- For postpartum wind invasion without fever, remove *Huang Qin* (Radix Scutellariae).
- For postpartum wind invasion with increased vomiting or nausea, increase the dose of *Sheng Jiang* (Rhizoma Zingiberis Recens).
- For postpartum wind invasion with marked deficiency, increase the dose of *Ren Shen* (Radix et Rhizoma Ginseng).
- When there is wind invasion during the menstrual period, add *Niu Xi* (Radix Achyranthis Bidentatae), *Tao Ren* (Semen Persicae), and *Mu Dan Pi* (Cortex Moutan).

CAUTIONS / CONTRAINDICATIONS

- *Xiao Chai Hu Tang* should be used with caution in patients with yin and/or blood deficiencies, in patients with upper excess and lower deficiency, or in patients with Liver fire. Inappropriate use of this formula may result in headache, dizziness, or bleeding gums.
- In general, there is no sweating associated with relief of symptoms, following the administration of *Xiao Chai Hu Tang*, since it harmonizes, rather than releases the exterior. However, some patients do show sweating prior to recovery. They should be monitored closely to prevent excessive sweating from injuring yin.
- Avoid cold, raw, pungent, and spicy foods while taking this formula.¹

PHARMACOLOGICAL EFFECTS

1. **Hepatoprotective:** Administration of *Xiao Chai Hu Tang* was associated with preventive and beneficial effects against various types of drug- or chemical-induced liver damage. In one study, intraperitoneal injection of the formula in

Xiǎo Chái Hú Tāng (Minor Bupleurum Decoction)

rats effectively controlled galactose-induced liver disorder in 65-70% of subjects by lowering the SGOT and SGPT.² Other studies have indicated that the formula is also effective against liver cirrhosis induced by carbon tetrachloride.³ Yet another study reported that *Xiao Chai Hu Tang* was effective in treating liver inflammation and fibrosis.⁴ One proposed mechanism of this hepatoprotective effect is the augmentation of natural killer (NK) cell activity in the liver.⁵ Another proposed mechanism is a dose-dependent increase in the production of granulocyte colony-stimulating factor (G-CSF) on peripheral blood mononuclear cells.⁶

2. **Cholagogic:** Administration of *Xiao Chai Hu Tang* was associated with a marked effect of increasing the secretion of bile acid from the gallbladder and its excretion into the intestines in animals.⁷
3. **Immunostimulant:** Administration of *Xiao Chai Hu Tang* has marked effect on the immune system. In one study of mice, 100 mg/kg of the herb was associated with stimulating natural killer (NK) cells activities, while 200 mg/kg was associated with inhibition of NK cell activity.⁸
4. **Anti-inflammatory:** Intraperitoneal injection of the formula in rats at 200 mg/kg was associated with marked anti-inflammatory effects for up to 4 hours.⁹ The anti-inflammatory effects were also present in rats whose adrenal glands had been surgically removed.¹⁰
5. **Effect on temperature regulation:** Administration of *Xiao Chai Hu Tang* was associated with effectiveness in reducing body temperature in rabbits with artificially-induced fever,¹¹ but it had little effect in rabbits with normal body temperature.¹²
6. **Gastrointestinal:** Administration of *Xiao Chai Hu Tang* was associated with inhibiting gastric acid production in rats. However, it had a stimulating effect on the intestines to increase peristalsis.¹³
7. **Effect on hypercholesterolemia and hyperlipidemia:** Administration of *Xiao Chai Hu Tang* and *Da Chai Hu Tang* (Major Bupleurum Decoction) was associated with beneficial effects in treating rats with cholesterol-induced hypercholesterolemia and aging-induced hyperlipidemia. Both formulas reduced total cholesterol in the liver and triglycerides in the liver and blood.¹⁴
8. **Antiallergic:** Administration of *Xiao Chai Hu Tang* had a dose-dependent effect to significantly inhibit histamine release to treat allergies. The proposed mechanism of this effect was attributed to the ability of *Xiao Chai Hu Tang* to inhibit IgE receptor-associated protein phosphorylation in the histamine release pathway.¹⁵
9. **Ant ulcer:** *Xiao Chai Hu Tang* was effective in treating gastric ulcers in rats. *Xiao Chai Hu Tang* had a comparable effect to sucralfate in protecting the gastric mucosa, and had effects similar to cimetidine or atropine in inhibiting

gastric acid secretions.¹⁶ *Xiao Chai Hu Tang* also showed an antiulcer effect against both water-immersion stress-induced gastric lesions and ethanol-induced gastric injury in a dose-dependent manner.¹⁷

10. **Antitumor:** Administration of *Xiao Chai Hu Tang* was associated with antitumor activity, presumably because it stimulates host-mediated factors such as the phagocytic function of the reticuloendothelial system and C3 cleavage producibility, and is closely related to TNF production. It is unclear whether *Xiao Chai Hu Tang* has a direct antitumor effect.¹⁸
11. **Antitumor and antimetastatic:** Administration of *Xiao Chai Hu Tang* in mice with malignant melanoma was associated with slowing tumor development and the transition to malignancy, decreasing incidence of distant metastasis to brain and kidney, and, at the malignant stage, prolonging life span.¹⁹ The mechanism of this action was attributed to the ability of *Xiao Chai Hu Tang* to inhibit the growth of malignant melanoma cells by up-regulating Fas-mediated apoptosis and arresting the cell cycle through down-regulation of cyclin dependent kinases.²⁰ *Xiao Chai Hu Tang* also inhibited lung carcinoma growth and metastasis, with special reference to macrophage activation.²¹
12. **Radioprotective:** Administration of *Xiao Chai Hu Tang* and/or methylprednisolone was associated with protective effects against radiation-induced damage to lung tissues. The efficacy of radioprotective effect from the mildest to the most potent were *Xiao Chai Hu Tang*, methylprednisolone, and the combination of both (more effective than either alone).²²
13. **Bioavailability:** Oral administration of *Xiao Chai Hu Tang* before or after meals did not show any significant difference in the maximum plasma concentration or the plasma concentration-time curve. The study concluded that timing of administration (before or after meals) did not affect the blood concentration (bioavailability) of *Xiao Chai Hu Tang*.²³

CLINICAL STUDIES AND RESEARCH

1. **Chronic hepatitis:** In a double-blind multicenter clinical study involving 222 patients with chronic active hepatitis, use of *Xiao Chai Hu Tang* was associated with a decrease of HBeAg and an increase of anti-HBe antibodies. No remarkable side effects were noticed.²⁴ In another study, two groups of patients with chronic hepatitis were treated with modified *Xiao Chai Hu Tang* with good results. In one group of 41 patients with chronic infectious hepatitis, 26 patients had significant improvement and 13 patients had moderate improvement. In another group of 21 patients with chronic active hepatitis, 10 patients had significant improvement and 8 patients had moderate

Xiǎo Chái Hú Tāng (Minor Bupleurum Decoction)

improvement. The formula used contained *Chai Hu* (Radix Bupleuri) 12g, *Huang Qin* (Radix Scutellariae) 12g, *Tai Zi Shen* (Radix Pseudostellariae) 15g, *Ban Xia* (Rhizoma Pinelliae) 10g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, and dry-fried *Zhi Zi* (Fructus Gardeniae) 10g.²⁵ In another study, administration of *Xiao Chai Hu Tang* for 2-3 months was associated with marked symptomatic relief and improvement of liver function among 45 chronic hepatitis patients who did not respond to prednisone.²⁶

2. **Viral hepatitis:** Use of *Xiao Chai Hu Tang* has been shown in many studies to effectively treat hepatitis. In one study, 307 patients with viral hepatitis were treated with 87.75% effectiveness using *Xiao Chai Hu Tang* plus *Zhi Zi* (Fructus Gardeniae) and *Hua Shi* (Talcum) as the base formula.²⁷ For 50 patients with chronic hepatitis B, one study reported 86.0% effectiveness using *Xiao Chai Hu Tang* plus *Zhu Ling* (Polyporus), *Huang Qi* (Radix Astragali), and *Zao Xiu* (Rhizoma Paridis) as the main herbal treatment.²⁸
3. **Hepatitis C:** One study investigated the mechanism of action on the therapeutic effect of *Xiao Chai Hu Tang* to suppress liver cancer development. The study found that in hepatitis C patients, use of *Xiao Chai Hu Tang* could adjust the decreased IL-10 production and the increased IL-4 and IL-5 production of mononuclear cells, indicating that this moderate regulation of the cytokine production system may be useful in the prevention of disease progression.²⁹
4. **Hepatic fibrosis and carcinoma:** *Xiao Chai Hu Tang* demonstrated chemopreventive and anti-carcinogenic effects against the development of hepatocellular carcinoma in cirrhotic patients. Evidence showed that *Xiao Chai Hu Tang* suppressed oxidative stress in hepatocytes and hepatic stellate cells, inhibited chemical hepatocarcinogenesis in animals, and acted as a biological response modifier by suppressing the proliferation of hepatoma cells by inducing apoptosis and arresting the cell cycle. Baicalin, baicalein, and saikosaponin-a are believed to be three of the main active compounds in *Xiao Chai Hu Tang*.³⁰ In another study, administration of *Xiao Chai Hu Tang* inhibited collagen production, while an increase in retinoid level inhibited activation of Ito cells, leading to inhibition and prevention of liver fibrosis.³¹
5. **Hepatocellular carcinomas:** In a prospective, randomized, non-blind controlled study, 260 patients with liver cirrhosis were randomly assigned to 2 groups: patients in the trial group were given 7.5 g/day of *Xiao Chai Hu Tang* orally in addition to the conventional drugs given to the control patients. After monitoring the patients for 60 months, the study reported that the incidence of hepatocellular carcinomas was lower and the survival rate was higher for the trial group compared with the control group. The researchers concluded that *Xiao Chai Hu Tang* helped to prevent the development of hepatocellular carcinomas in patients with cirrhosis, particularly in patients without HBs antigen.³²
6. **Cholecystitis and cholelithiasis:** One hundred patients with cholecystitis and cholelithiasis were treated with a combination of *Xiao Chai Hu Tang* and *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction) with an 85% success rate of passing the stones.³³
7. **Cholecystitis:** One study reported 98.9% effectiveness using *Xiao Chai Hu Tang* to treat cholecystitis. Of 285 patients (134 males, 151 females, average of 40.1 years of age, 2.7 years average duration of illness), 61 had acute cholecystitis and 224 had chronic cholecystitis. The treatment protocol was to administer the herbs in decoction one time daily for 15 days per course of treatment. The study reported complete recovery in 273 patients, improvement in 9 patients, and no effect in 3 patients.³⁴
8. **Pancreatitis:** Fifty patients with acute pancreatitis were treated with marked improvement using acupuncture, modified *Xiao Chai Hu Tang*, and atropine. The average duration of treatment was 6.8 days, with most patients showing improvement after about 3 days.³⁵
9. **Fever in cancer:** Thirty-two cancer patients with high fever were treated with good results using modified *Xiao Chai Hu Tang*. The treatment protocol was to use *Xiao Chai Hu Tang* plus *Bai Hua She She Cao* (Herba Hedyotis) and *Ban Zhi Lian* (Herba Scutellariae Barbatae) as the base formula. *Yu Ping Feng San* (Jade Windscreen Powder) and *Bie Jia* (Carapax Trionycis) were added for qi and yin deficiencies; *Yin Chen* (Herba Artemisiae Scopariae) and *Yi Yi Ren* (Semen Coicis) for damp-heat; and *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae) for persistent high fever due to heat and toxins. Out of 32 patients, 17 had marked improvement, 13 had moderate improvement, and 2 had no improvement.³⁶
10. **Fever:** Eighty-six patients with high fever (36 due to respiratory tract infection, 20 due to infection of the bile duct, 9 due to urinary tract infection, 4 due to postpartum infection, 2 due to toxemia, 3 due to hepatitis, 2 due to encephalitis, 2 due to influenza, 2 due to parotitis, 3 due to bacterial dysentery, and 3 due to unknown causes) were treated successfully. The study reported reduction of body temperature in 29 patients after 1-2 doses, 36 patients after 3-4 doses, and 21 patients after 4 doses.³⁷ According to another study, 128 patients with high fever were treated with *Xiao Chai Hu Tang* plus *Ban Lan Gen* (Radix Isatidis), *Mian Ma Guan Zhong* (Rhizoma Dryopteridis Crassirhizomatis), *Bai Wei* (Radix et Rhizoma Cynanchi Atrati) and others. *Ge Gen* (Radix Puerariae Lobatae) was added for body aches and pains; and *Mu Dan Pi* (Cortex Moutan) and *Di Huang* (Radix Rehmanniae) were added for red tongue body. Within 5 doses of herbs, the study

Xiǎo Chái Hú Tāng (Minor Bupleurum Decoction)

reported normal temperature (37.2°C / 98.96°F or below) without recurrence of fever in 119 of 128 patients.³⁸

11. **Nephritis:** Forty patients of acute and chronic nephritis were treated with electro-acupuncture and *Xiao Chai Hu Tang* with significant improvement. There were significant reductions of protein and cells in the urine.³⁹ Another study reported that the combination of *Xiao Chai Hu Tang* and *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia) is beneficial in treating patients with chronic nephritis refractory to steroid therapy.⁴⁰
12. **Chronic renal insufficiency:** Modified *Xiao Chai Hu Tang* was used with good results in treating 60 patients with chronic renal insufficiency. The herbal treatment included *Xiao Chai Hu Tang* plus *Dan Shen* (Radix et Rhizoma *Salviae Miltiorrhizae*), *Da Huang* (Radix et Rhizoma *Rhei*), *Yi Mu Cao* (Herba *Leonuri*), and other herbs as the base formula. *Tai Zi Shen* (Radix *Pseudostellariae*), *Di Huang* (Radix *Rehmanniae*), and *Gou Qi Zi* (Fructus *Lycii*) were added for qi and yin deficiencies with accumulation of dampness and toxins. *Fu Zi* (Radix *Aconiti Lateralis Praeparata*) and dry-fried *Bai Zhu* (Rhizoma *Atractylodis Macrocephalae*) were added for accumulation of water and dampness due to inability of Spleen and Kidney to regulate water circulation. The herbs were given for 3 months per course of treatment. Of 60 patients, the study reported significant improvement in 12 patients, moderate improvement in 24 patients, stabilization in 14 patients, and no benefit in 10 patients. The overall rate of effectiveness was 83.33%.⁴¹
13. **Cough:** *Xiao Chai Hu Tang* plus *Xi Xin* (Radix et Rhizoma *Asari*), *Gan Jiang* (Rhizoma *Zingiberis*), *Ku Xing Ren* (Semen *Armeniacae Amarum*), and others were used to treat 52 patients with chronic cough with marked improvement in 13 patients, moderate improvement in 35 patients, and no effect in 4 patients. The overall rate of effectiveness was 92.3%.⁴²
14. **Bronchial asthma:** Use of *Xiao Chai Hu Tang* was reported to have a 64.3% effectiveness rate in treating chronic bronchial asthma dependent on steroid drugs for treatment. Of 28 patients, 4 had significant improvement and 14 had moderate improvement.⁴³
15. **Reflux esophagitis:** Seventy-eight patients (40 males and 38 females) with reflux esophagitis for an average of 14 months (4 months to 3 years) were treated with modified *Xiao Chai Hu Tang* one time daily for 30 days. The base formula contained *Chai Hu* (Radix *Bupleuri*) 15g, *Huang Qin* (Radix *Scutellariae*) 10g, *Dang Shen* (Radix *Codonopsis*) 10g, *Ban Xia* (Rhizoma *Pinelliae*) 10g, *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*) 6g, and *Da Zao* (Fructus *Jujubae*) 5 pieces. In addition, 30 grams of calcined *Wa Leng Zi* (Concha *Arcae*) were added for acid reflux; 20 grams of *Dan Shen* (Radix et Rhizoma *Salviae Miltiorrhizae*) were added for blood stagnation; and 30 grams each of *Wu Mei* (Fructus *Mume*) and *Bai Shao* (Radix *Paeoniae Alba*) were added for burning sensations and pain. The study reported complete recovery in 69 patients, moderate improvement in 6 patients, and no improvement in 3 patients. The overall success rate was 96.2%.⁴⁴
16. **Antral gastritis:** *Xiao Chai Hu Tang* plus *Xuan Fu Hua* (Flos *Inulae*), *Tao Ren* (Semen *Persicae*), and others were used to treat 107 patients with antral gastritis with 90.70% effectiveness. The duration of treatment ranged from 1-3 courses, with 15 packs of herbs per course of treatment.⁴⁵
17. **Gastritis:** Thirty-six patients with gastritis due to regurgitation of bile were treated with modified *Xiao Chai Hu Tang* for 30 days with marked results. Modifications of the herbs were as follows: *Dan Shen* (Radix et Rhizoma *Salviae Miltiorrhizae*) was added for chronic gastritis with blood stagnation; *Huang Lian* (Rhizoma *Coptidis*) for accumulation of heat; *Zhi Qiao* (Fructus *Aurantii*) for abdominal distention and fullness; *San Qi* (Radix et Rhizoma *Notoginseng*), *Hai Piao Xiao* (Endoconcha *Sepiae*) and *Bai Fan* (Alumen) for ulceration. Most patients reported complete recovery or resolution of all symptoms. Endoscopy also confirmed varying degrees of recovery.⁴⁶
18. **Gastric pain:** Modified *Xiao Chai Hu Tang* was used to treat 151 patients with stomach pain with complete recovery reported in 84 patients, improvement in 49 patients, and no effect in 18 patients. Modifications included the addition of *Wu Mei* (Fructus *Mume*), *Dan Shen* (Radix et Rhizoma *Salviae Miltiorrhizae*), *Wu Ling Zhi* (Faeces *Troglodyteri*), *Mu Dan Pi* (Cortex *Moutan*) and others as deemed necessary.⁴⁷
19. **Gastric prolapse:** Administration of modified *Xiao Chai Hu Tang* for one month in 60 patients with gastric prolapse was associated with complete recovery in 29 patients, marked improvement in 22 patients, and slight improvement in 9 patients. The base formula contained *Xiao Chai Hu Tang* plus *Mai Ya* (Fructus *Hordei Germinatus*) and *Ji Nei Jin* (Endothelium *Corneum Gigeriae Galli*). *Xuan Fu Hua* (Flos *Inulae*) and *Zhe Shi* (Haematitum) were added for belching, distention, and pain. For epigastric pain, *Dang Shen* (Radix *Codonopsis*) was removed, and *Shi Xiao San* (Sudden Smile Powder) and *Da Huang* (Radix et Rhizoma *Rhei*) were added. For individuals with emotional disturbance, *Dang Gui* (Radix *Angelicae Sinensis*), *Bai Shao* (Radix *Paeoniae Alba*), and dry-fried *Xiang Fu* (Rhizoma *Cyperis*) were added. For feeling of coldness in the stomach region, *Wu Zhu Yu* (Fructus *Evodiae*) and *Gao Liang Jiang* (Rhizoma *Alpiniae Officinarum*) were added. For dampness affecting the Spleen, *Cang Zhu* (Rhizoma *Atractylodis*), *Zi Su Geng* (Caulis *Perillae*), and *Chen Pi* (Pericarpium *Citri Reticulatae*)

Xiǎo Chái Hú Tāng (Minor Bupleurum Decoction)

were added. For food stagnation, *Sha Ren* (Fructus Amomi) and *Jian Shen Qu* (Massa Fermentata Praeparata) were added. For yin deficiency, *Shi Hu* (Caulis Dendrobii) and *Sha Shen* (Radix Glehniae seu Adenophorae) were added.⁴⁸

20. Constipation: Modified *Xiao Chai Hu Tang* was used successfully to treat constipation in geriatric patients. Of 48 patients, 30 had complete recovery, 16 had marked improvement, and 2 had slight improvement. The base formula included *Xiao Chai Hu Tang* plus *Tao Ren* (Semen Persicae), dry-fried *Lai Fu Zi* (Semen Raphani), and others. In addition, *Bai Jiang Cao* (Herba cum Radice Patriniae) and *Huang Qin* (Radix Scutellariae) were added for heat; *Yan Hu Suo* (Rhizoma Corydalis) and *Bai Shao* (Radix Paeoniae Alba) were given in larger doses for severe abdominal pain; and *Hou Po* (Cortex Magnoliae Officinalis) and *Da Fu Pi* (Pericarpium Arecae) were given for a feeling of heaviness and distention in the abdomen.⁴⁹

21. Acute tonsillitis: Use of modified *Xiao Chai Hu Tang* was found to have 94% effectiveness (102 of 108 patients) in treating acute tonsillitis. The herbal treatment used *Xiao Chai Hu Tang* plus *She Gan* (Rhizoma Belamcandae) and *Xia Ku Cao* (Spica Prunellae) as the base formula, with the addition of *Ban Lan Gen* (Radix Isatidis) for severe sore throat; *Ma Bo* (Lasiosphaera seu Calvatia) and *Pu Gong Ying* (Herba Taraxaci) for abscesses; *Sang Bai Pi* (Cortex Mori) and *Gua Lou* (Fructus Trichosanthis) for coughing with profuse sputum; charred *Da Huang* (Radix et Rhizoma Rhei) for constipation; *Can Sha* (Faeces Bombycis) and *Che Qian Zi* (Semen Plantaginis) for loose stools; *Xin Yi Hua* (Flos Magnoliae) and *Cang Er Zi* (Fructus Xanthii) for profuse nasal discharge; and *Shi Gao* (Gypsum Fibrosum) and *Lu Gen* (Rhizoma Phragmitis) for thirst.⁵⁰

22. Infectious parotitis: Modified *Xiao Chai Hu Tang* was effective in treating acute parotitis. The herbal treatment was based on *Xiao Chai Hu Tang*, with the addition of *Xia Ku Cao* (Spica Prunellae) and elimination of *Ren Shen* (Radix et Rhizoma Ginseng). *Jie Geng* (Radix Platycodonis) and *Niu Bang Zi* (Fructus Arctii) were added for early stages of infection; *Jing Jie* (Herba Schizonepetae) and *Fang Feng* (Radix Saposhnikoviae) for presence of exterior signs and symptoms; *Jiang Can* (Bombyx Batryticatus) and *Jin Yin Hua* (Flos Lonicerae Japonicae) for wind-heat and epidemic toxin; *Huo Xiang* (Herba Agastaches) and *Pei Lan* (Herba Eupatorii) for damp-heat in the interior; *Da Huang* (Radix et Rhizoma Rhei) for constipation; *Ju He* (Semen Citri Reticulatae) for mastitis; and *Li Zhi He* (Semen Litchi) for orchitis. Of 47 patients, 45 had complete recovery and 2 had no improvement.⁵¹

23. Stomatitis: Complete recovery was reported in all 40 patients with stomatitis using *Xiao Chai Hu Tang* plus *Huang Lian* (Rhizoma Coptidis) as a mouth gargle. The duration of treatment ranged from 3 to 15 doses of herbs.⁵²

24. Allergic rhinitis: In one comparison study, patients with allergic rhinitis were treated with either herbs or drugs (antihistamine). In the herb group, *Xiao Chai Hu Tang* was used as the base formula, with the addition of *Xin Yi Hua* (Flos Magnoliae) and *Ju Hua* (Flos Chrysanthemi) for severe nose itching and sneezing; *Cang Zhu* (Rhizoma Atractylodis) and *Sheng Ma* (Rhizoma Cimicifugae) for profuse nasal discharge; *Bai Zhi* (Radix Angelicae Dahuricae) and *Bo He* (Herba Menthae) for severe sinus swelling and congestion; *Huang Qin* (Radix Scutellariae) and *Chuan Xiong* (Rhizoma Chuanxiong) for severe inflammation; *Tao Ren* (Semen Persicae) and *Ge Gen* (Radix Puerariae Lobatae) for nasal polyps; and other modifications as deemed necessary. The study reported 90.8% effectiveness for 65 patients in the herb group, and 76.9% effectiveness for 65 patients in the drug (antihistamine) group.⁵³

25. Meniere's syndrome: One study involving 268 patients with Meniere's syndrome reported marked improvement in most of the patients when they were treated with modified *Xiao Chai Hu Tang*. The herbal treatment contained *Xiao Chai Hu Tang* with *Chuan Xiong* (Rhizoma Chuanxiong), *Ju Hua* (Flos Chrysanthemi), and others as needed. The overall rate of effectiveness was 97%.⁵⁴

26. Dizziness: Administration of *Xiao Chai Hu Tang* plus *Fang Feng* (Radix Saposhnikoviae), *Huo Xiang* (Herba Agastaches), and others was effective within 24 hours in treating acute onset dizziness. Of 20 patients, 14 had complete recovery and 6 had slight to moderate improvement.⁵⁵

27. Migraine: Administration of *Xiao Chai Hu Tang* plus *Chuan Xiong* (Rhizoma Chuanxiong), *Bai Zhi* (Radix Angelicae Dahuricae), and *Xi Xin* (Radix et Rhizoma Asari) in 50 patients with migraine headache was associated with complete recovery in 32 patients, improvement in 15 patients, and no effect in 3 patients. The overall rate of effectiveness was 94%.⁵⁶

28. Angina: *Xiao Chai Hu Tang* demonstrated good results in treating 41 patients with angina. While 35 had resolution of symptoms, they showed varying degrees of improvement based on ECG reports. The herbal treatment used *Xiao Chai Hu Tang* plus *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Fu Zi* (Radix Aconiti Lateralis Praeparata) as the base formula. Larger doses of certain herbs were used depending on the differential diagnosis of the condition: *Ren Shen* (Radix et Rhizoma Ginseng) for severe qi deficiency; *Fu Zi* (Radix Aconiti Lateralis Praeparata) for severe yang deficiency;

Xiǎo Chái Hú Tāng (Minor Bupleurum Decoction)

Chai Hu (Radix Bupleuri), *Dang Gui* (Radix Angelicae Sinensis), and *Chuan Xiong* (Rhizoma Chuanxiong) for qi and blood stagnation; and *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) for phlegm stagnation.⁵⁷

29. Depression: One study reported 78.8% effectiveness using modified *Xiao Chai Hu Tang* to treat depression. Modifications to the formula included the addition of *Zeng Ye Tang* (Increase the Fluids Decoction) for yin-deficient heat; *Xiang Fu* (Rhizoma Cyperi), *Yu Jin* (Radix Curcumae), and *Zhi Qiao* (Fructus Aurantii) for Liver qi stagnation; and *Hou Po* (Cortex Magnoliae Officinalis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria) for damp and phlegm in the Spleen. Of 90 patients, the study reported complete recovery in 64 patients and improvement in 7 patients. Poor results were noted in 19 patients who were then treated with drugs.⁵⁸

30. Chronic fatigue syndrome: Modified *Xiao Chai Hu Tang* was used to treat 36 patients with chronic fatigue syndrome characterized by low-grade fever, chills, depression, muscle aches and pains in the entire body, lack of energy, bitter taste in the mouth, poor appetite, etc. The herbal treatment used *Xiao Chai Hu Tang* plus *Ban Lan Gen* (Radix Isatidis) and *Gui Zhi* (Ramulus Cinnamomi) as the base formula, with more herbs added when necessary. Herbs were given for 10 days per course of treatment, for 1-4 courses. The study reported complete recovery in 26 patients, and improvement in 10 others.⁵⁹

31. Morning sickness: One study reported 88% effectiveness using *Xiao Chai Hu Tang* to treat nausea and vomiting during pregnancy. Of 320 patients, the study reported complete relief in 180 patients, improvement in 100 patients, and no effect in 40 patients.⁶⁰

32. Postpartum infection: Use of modified *Xiao Chai Hu Tang* had 96.6% effectiveness in treating 178 patients with postpartum viral infection (common cold or influenza). The herbal treatment contained *Xiao Chai Hu Tang* plus *Huang Qi* (Radix Astragali), *Yi Mu Cao* (Herba Leonuri) and *Dang Gui* (Radix Angelicae Sinensis) as the base formula. Modifications were made as needed. For dry mouth and stuffy or runny nose, *Sheng Jiang* (Rhizoma Zingiberis Recens) was removed and *Sang Ye* (Folium Mori), *Ju Hua* (Flos Chrysanthemi), *Bo He* (Herba Menthae), and *Lu Gen* (Rhizoma Phragmitis) were added. For nasal obstruction, *Zi Su Ye* (Folium Perillae) was added. For high fever without perspiration, *Qing Hao* (Herba Artemisiae Annuae) was added. For thick sticky sputum, *Zhi Mu* (Rhizoma Anemarrhenae) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) were added. For white foamy sputum, *Chen Pi* (Pericarpium Citri Reticulatae) and *Fu Ling* (Poria) were added. For sore throat, *Ban Lan Gen* (Radix Isatidis), *She Gan* (Rhizoma Belamcandae),

and *Ma Bo* (Lasiosphaera seu Calvatia) were added. For red tongue body with little tongue coating, *Yu Zhu* (Rhizoma Polygonati Odorati) was added. After 1-2 packs of herbal treatment, the study reported complete recovery in 154 patients, improvement in 18 patients, and no effect in 6 patients.⁶¹

33. Postpartum fever: Modified *Xiao Chai Hu Tang* effectively reduced body temperature within an average of 10 hours in all 60 postpartum women with fever. The herbal treatment contained *Xiao Chai Hu Tang* plus *Dang Gui* (Radix Angelicae Sinensis), *Yi Mu Cao* (Herba Leonuri), and others as the base formula. In addition, *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Jing Jie* (Herba Schizonepetae) were added for sore throat; *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) for lower abdominal pain with spotting; and *Pu Gong Ying* (Herba Taraxaci) and dry-fried *Chuan Shan Jia* (Squama Manis) for breast distention and pain.⁶²

34. Dysmenorrhea: Administration of *Xiao Chai Hu Tang* was associated with 96.5% effectiveness in relieving primary dysmenorrhea. The treatment protocol was to take the herbs starting the first day of the period for 10 days, for 3 months per course of treatment. Of 57 patients, the study reported complete recovery in 28 patients, significant improvement in 22 patients, slight improvement in 5 patients, and no effect in 2 patients.⁶³

35. Premenstrual syndrome (PMS): Use of modified *Xiao Chai Hu Tang* had 93.41% effectiveness in treating 167 women with PMS (complete relief in 77 patients, significant improvement in 57 patients, and moderate improvement in 22 patients). Modifications to the formula were made based on the condition of the patient. For breast distention and hypochondriac pain, *Chuan Lian Zi* (Fructus Toosendan), *Xia Ku Cao* (Spica Prunellae), and *Bai Shao* (Radix Paeoniae Alba) were added. For edema, *Fu Ling* (Poria), *Ze Xie* (Rhizoma Alismatis), and *Che Qian Zi* (Semen Plantaginis) were added. For irritability, restlessness, and elevated body temperature, *Ren Shen* (Radix et Rhizoma Ginseng) and *Ban Xia* (Rhizoma Pinelliae) were removed, and *Mu Dan Pi* (Cortex Moutan), *Zhi Zi* (Fructus Gardeniae) and *Di Huang* (Radix Rehmanniae) were added. For diarrhea, dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Yi Yi Ren* (Semen Coicis) were added. For palpitations and insomnia, *Yuan Zhi* (Radix Polygalae), *Dang Gui* (Radix Angelicae Sinensis) and dry-fried *Suan Zao Ren* (Semen Ziziphi Spinosaes) were added. For nausea and vomiting, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Da Zao* (Fructus Jujubae) were removed, and *Zhu Ru* (Caulis Bambusae in Taenia), and *Zi Su Geng* (Caulis Perillae) were added. For dizziness and headache, *Ju Hua* (Flos Chrysanthemi) and *Chuan Xiong* (Rhizoma Chuanxiong) were added.⁶⁴

Xiǎo Chái Hú Tāng (Minor Bupleurum Decoction)

HERB-DRUG INTERACTION

- **Interferon:** Increased risk of acute pneumonitis may be associated with the use of interferon, *Xiao Chai Hu Tang*, or both in combination. Among patients with chronic hepatitis or liver cirrhosis, the frequency of drug-induced pneumonitis was 0.5% in those given only interferon-alpha, 0.7% in those given only *Xiao Chai Hu Tang*, and 4.0% in those given both interferon-alpha and *Xiao Chai Hu Tang*.⁶⁵ Many theories have been proposed on the mechanism of this interaction. One theory states that the herbs have not been shown to injure the lung tissues, but may over stimulate the neutrophils to release granulocytes, elastase and oxygen radicals, which subsequently damage lung tissue. The fibroblasts that repair the damaged tissue may increase the risk of pulmonary fibrosis.⁶⁶ Another theory states that acute pneumonitis associated with concurrent use of interferon and *Xiao Chai Hu Tang* may be due to allergic-immunological mechanisms.⁶⁷
- **Interleukin 2:** Concurrent use of *Xiao Chai Hu Tang* and interleukin 2 showed a synergistic antitumor effect against murine renal cell carcinoma cell line in mice. The treatment protocol was to administer *Xiao Chai Hu Tang* at 2.5 g/kg daily over 30 days, and interleukin 2 at 10(4) U/subject by subcutaneous injection every other day for a total of 8 doses. The combination of these two substances inhibited growth of the tumor and prolonged survival significantly as compared with the untreated mice.⁶⁸
- **Lamivudine (Epivir; 3TC):** One study reported synergistic antiviral effect when *Xiao Chai Hu Tang* is combined with antiviral drugs such as zidovudine (AZT), lamivudine (3TC) or AZT plus 3TC. Used alone, *Xiao Chai Hu Tang* moderately inhibited HIV-1 replication at a concentration of 25 mcg/mL. Used together, *Xiao Chai Hu Tang* enhanced the anti-HIV-1 activity of 3TC. The researchers suggested that the combination of *Xiao Chai Hu Tang* and 3TC has potential as a chemotherapeutic modality for HIV-1 infection.⁶⁹
- **5-fluorouracil (5-FU):** The combination of 5-FU and *Xiao Chai Hu Tang* had a synergistic effect for treatment of cancer in mice by increasing the life span by 56% and alleviating side effects of 5-FU.⁷⁰
- **Drug-induced liver damage:** Administration of *Xiao Chai Hu Tang* has been shown to have beneficial effects in preventing and/or treating damage induced by drugs, such as halothane, danazol, D-galactosamine, and carbon tetrachloride.^{71,72,73,74}
- **Liver enzyme inhibition:** The effect of *Xiao Chai Hu Tang* on cytochrome P450 enzymes was evaluated in 26 healthy subjects. Use of this herbal formula (2.5g twice daily for 5 days) was associated with a decreased mean activity of CYP1A2 by 16% on both day 1 and day 5 compared with the baseline ($P=0.001$).⁷⁵ In another

study on the metabolic activity of different cytochrome P450 (CYP) isoforms, *Xiao Chai Hu Tang* was reported to be a competitive inhibitor of CYP2C9, but not CYP2D6. The study concluded that because of this inhibitory effect on liver metabolism, care should be taken with concurrent use of *Xiao Chai Hu Tang* and drugs.⁷⁶

- **Pentobarbital:** Administration of *Xiao Chai Hu Tang* was associated with significantly shortened pentobarbital-induced sleeping time in mice. The mechanism of this interaction was attributed to the up-regulation of the mRNA expression of CYP2B, CYP3A1, CYP2E1 and CYP4A1.⁷⁷
- **Carbamazepine:** Administration of one dose of *Xiao Chai Hu Tang* was associated with decreased peak concentration, and the time needed to reach the peak concentration, of carbamazepine in rats. However, two-week repeated treatments of *Xiao Chai Hu Tang* did not affect plasma concentration-time profile or any pharmacokinetic parameter of carbamazepine, an indication that *Xiao Chai Hu Tang* did not affect the liver metabolism of carbamazepine. The study attributed the mechanism of this interaction to decreased gastrointestinal absorption of carbamazepine due to delayed gastric emptying.⁷⁸
- **Tolbutamide:** *Xiao Chai Hu Tang* demonstrably reduced the bioavailability of tolbutamide after oral administration in rats. The formula was found to accelerate the initial absorption rate, reduce the area under the plasma concentration-time curve, and decrease the overall bioavailability of tolbutamide.⁷⁹ The mechanism of this interaction was attributed to the inhibitory effect of *Xiao Chai Hu Tang* on the function of gastric emptying, thereby decreasing gastrointestinal absorption of tolbutamide.⁸⁰
- **Ofloxacin:** In an open, random-crossover investigation study with seven volunteers, a single dose of ofloxacin and a one-week dose of *Xiao Chai Hu Tang* were given concurrently. Using high-performance liquid chromatography to evaluate the bioavailability of ofloxacin, it was determined that there is no significant effect on the rate or extent of bioavailability of ofloxacin when given concurrently with *Xiao Chai Hu Tang*.⁸¹

TOXICOLOGY

- ***Xiao Chai Hu Tang* has a very low toxicology profile.** In one study, rats were given up to 640 mg/kg of the extract per day continuously for 6 months. At the end of the study, the animals were examined for body weight, general behavior, water and food intake, and function of vital organs. The study concluded that no abnormality could be observed.⁸²
- **Interstitial pneumonia:** Over 200 patients of interstitial pneumonia have been associated with the use of *Xiao Chai Hu Tang* in Japan. While the exact mechanism of

Xiǎo Chái Hú Tāng (Minor Bupleurum Decoction)

this adverse reaction is not completely understood, it was suggested that phenolic compounds (lignans and flavonoids) present in this formula may induce apoptosis in human lung fibroblasts and peripheral blood mononuclear cells. Two phenolic compounds, baicalein and medecarpin, were found to significantly inhibit the growth and reduce the viability of lung fibroblasts. The researchers suggested that the phenolic compounds of *Xiao Chai Hu Tang* (especially baicalein and medecarpin) may have a direct effect on human lung fibroblasts and immune cells to induce apoptosis.⁸³ Note: *Xiao Chai Hu Tang* is one of the most commonly used herbal formulas in Japan. According to a study published in 1999, this formula has been administered to 1.5 million Japanese patients with chronic liver diseases.⁸⁴ In addition, there have been numerous other reports that document the safe and effective use of this formula. Thus, it is important to keep a proper perspective on the relative frequency of events, as well as risk-to-benefit analysis, in evaluating toxicology reports.

RELATED FORMULAS

Chái Hú Zhī Jié Tāng

(Bupleurum, Bitter Orange, and Platycodon Decoction)

柴胡枳桔湯
柴胡枳桔汤

Pinyin Name: *Chai Hu Zhi Jie Tang*

Literal Name: Bupleurum, Bitter Orange, and Platycodon Decoction

Original Source: *Chong Ding Tong Su Shang Han Lun* (Revised Popular Guide to the Discussion of Cold-Induced Disorders) by Yu Gen-Chu in the Qing Dynasty

<i>Chai Hu</i> (Radix Bupleuri)	3-4.5g
<i>Zhi Qiao</i> (Fructus Citri Aurantii)	4.5g
<i>Ban Xia</i> (Rhizoma Pinelliae), zhu (boiled) with ginger	4.5g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), fresh	3g
<i>Huang Qin</i> (Radix Scutellariae)	3-4.5g
<i>Jie Geng</i> (Radix Platycodonis)	3g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	4.5g
<i>Cha Ye</i> (Folium Camelliae)	3g

Chai Hu Zhi Jie Tang (Bupleurum, Bitter Orange, and Platycodon Decoction) mainly harmonizes the *shaoyang*, releases the exterior, and regulates the chest and diaphragm. The main indication is *shaoyang* syndrome, with slightly greater emphasis on the exterior than the interior. Clinically, patients will show symptoms such as alternating fever and chills, headache (especially on the two corners of the forehead), deafness, vertigo, hypochondriac fullness and pain, a white, slippery tongue coating, a wiry, slippery

pulse on the right hand, and a wiry, superficial and big pulse on the left hand. This formula can be taken with *Cha Ye* (Folium Camelliae) to enhance the overall heat-clearing and damp-dispelling effects.

In comparison to *Xiao Chai Hu Tang*, which treats *shaoyang* syndrome with equal emphasis on both the exterior and interior, *Chai Hu Zhi Jie Tang* focuses on *shaoyang* syndromes in which there are more exterior symptoms than interior. For this reason, *Ren Shen* (Radix et Rhizoma Ginseng), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), and *Da Zao* (Fructus Jujubae) are not used in this formula.

<i>Nu Zhen Zi</i> (Fructus Ligustri Lucidi)
<i>Xia Ku Cao</i> (Spica Prunellae)

Chai Hu Jie Du Tang (Bupleurum Decoction to Relieve Toxicity) treats *shaoyang* disorders characterized by chronic illness with heat and toxins accumulated in the body. This formula contains herbs that release the exterior, clear heat and eliminate toxins from the interior, and drain damp-heat from the Liver and Gallbladder. Clinically, it treats liver disorders, such as hepatitis, cirrhosis, and elevated liver enzyme levels.

AUTHORS' COMMENTS

Xiao Chai Hu Tang is traditionally used to treat alternating chills and fever, but can also be used for patients showing temperature differences in the body, such as cold

Xiǎo Chái Hú Tāng (Minor Bupleurum Decoction)

limbs but a warm body, or warm limbs and a cold body. Another condition that can also be treated with this formula is drastic temperature differences on the dorsal and palmar aspects of the hands, with the palmar aspect being cold and the dorsal aspect being warm.

Xiao Chai Hu Tang can be used for unremitting fever in children approximately one week after contracting an exterior condition. These patients exhibit fever that is not alleviated with antipyretic or antibiotic drugs. Though these drugs work well to temporarily bring down body temperature, the fever tends to return as soon as the therapeutic effect is over.

One unique application of *Xiao Chai Hu Tang* that requires additional explanation is the treatment of an exterior condition in women with blood deficiency. Loss of blood during menstruation and childbirth creates an emptiness in the uterus and the *chong* (thoroughfare) channel. Due to this void, pathogenic factors directly and easily invade into deeper levels of the body instead of lingering at the *wei* (defensive) level. The Liver stores blood, travels around the genital region, and traverses up the lower abdomen, and is closely related to the uterus and *chong* channel. If heat enters the uterus and *chong* channel, it affects the Liver, which in turn affects its paired organ, the Gallbladder. This stagnant heat creates disharmony in the *shaoyang* stage, leading to alternating chills and fever, hypochondriac fullness/discomfort, a bitter taste in the mouth, a dry throat, irritability, lack of appetite, nausea, and vomiting. *Xiao Chai Hu Tang* harmonizes the *shaoyang* and pushes the heat outward to relieve the heat trapped in the uterus and *chong* channel.⁸⁵

Alternating chills and fever is a key symptom that can be treated with *Xiao Chai Hu Tang* or *Xiao Yao San* (Rambling Powder). However, the diagnostic criteria and clinical application guidelines are very different.

- *Xiao Chai Hu Tang* treats alternating chills and fever caused by exterior pathogenic factors that enter the *shaoyang* level and get trapped in the half-exterior and half-interior location. *Ren Shen* (Radix et Rhizoma Ginseng), *Da Zao* (Fructus Jujubae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) strengthen the interior to push the pathogens outward and prevent them from invading further into the body, **not** to tonify the deficiencies. *Sheng Jiang* (Rhizoma Zingiberis Recens) is used with *Ban Xia* (Rhizoma Pinelliae) to treat nausea and irritability caused by Gallbladder heat invading the Stomach.
- *Xiao Yao San* treats alternating fever and chills caused by disharmony among the Liver, Spleen, and Gallbladder and accompanied by blood deficiency and Liver qi

stagnation; the chills and fever are **not** the result of an exterior invasion. *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Fu Ling* (Poria), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) strengthen the Spleen to prevent the Liver from overacting. *Sheng Jiang* (Rhizoma Zingiberis Recens) warms the middle *jiao* to strengthen the Spleen.

Fever and chills (aversion to cold) are a common complaint in exterior conditions, but they must be differentiated correctly.

- In *taiyang* syndrome, fever and chills are present simultaneously.
- In *yangming* syndrome, there is high fever and absence of chills.
- In *shaoyang* syndrome, there are alternating spells of fever and chills.

Xiao Chai Hu Tang and *Xiao Yao San* (Rambling Powder) both contain *Chai Hu* (Radix Bupleuri) as the chief herb, but with different intent and at different doses:

- *Xiao Chai Hu Tang* treats *shaoyang* syndrome in which the pathogenic heat is trapped between the exterior and interior. In this case, signs of alternating chills and fever are more severe. As a result, a large dose of *Chai Hu* (Radix Bupleuri) is needed to harmonize *shaoyang* and clear the heat.
- *Xiao Yao San* (Rambling Powder) treats Liver qi stagnation accompanied by Spleen deficiency, manifesting in emotional complaints but involving less severe physical symptoms compared to that of *Xiao Chai Hu Tang*. Although *Chai Hu* (Radix Bupleuri) is also the chief herb, only a moderate dose is needed to regulate Liver qi. In this case, this herb serves more as a channel-guiding herb in this formula to address Liver qi stagnation. Using a large dose of *Chai Hu* (Radix Bupleuri) in *Xiao Yao San* is not appropriate because it shifts the effect of the formula from harmonizing to exterior-releasing. Moreover, patients with Liver qi stagnation often have underlying deficiencies, and using *Chai Hu* (Radix Bupleuri) at a large dose may exacerbate such deficiencies.

Xiao Chai Hu Tang and *Da Chai Hu Tang* (Major Bupleurum Decoction) both treat *shaoyang* disorders with alternating chills and fever, a bitter taste in the mouth, and chest and hypochondriac distention. Both formulas contain *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae), *Ban Xia* (Rhizoma Pinelliae), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Da Zao* (Fructus Jujubae). Despite the similarities, they have contrasting differences:

Xiǎo Chái Hú Tāng (Minor Bupleurum Decoction)

- *Xiao Chai Hu Tang* contains *Chai Hu* (Radix Bupleuri) and *Huang Qin* (Radix Scutellariae) as chief herbs to harmonize the *shaoyang*. *Ren Shen* (Radix et Rhizoma Ginseng) strengthens the interior to prevent the pathogenic factors from moving further inward. This formula treats a variety of conditions, including exterior invasion in women during their menstruation, jaundice, and symptoms of malaria.
- *Da Chai Hu Tang* is mainly used for *yangming fu* (hollow organs) syndrome with excess heat in the body. *Da Huang* (Radix et Rhizoma Rhei), *Zhi Shi* (Fructus Aurantii Immaturus), and *Bai Shao* (Radix Paeoniae Alba) sedate heat in the *yangming* channel. The key sign for differential diagnosis is constipation with abdominal pain.⁶⁶

Xiao Chai Hu Tang and *Hao Qin Qing Dan Tang* (Artemisia Annuae and Scutellaria Decoction to Clear the Gallbladder) both harmonize *shaoyang* and treat chief manifestations of alternating chills and fever, as well as chest and hypochondriac distention and pain. Their main differences are as follows:

- *Xiao Chai Hu Tang* lifts clear yang qi and pushes pathogenic factors outward. Containing *Huang Qin* (Radix Scutellariae), *Ren Shen* (Radix et Rhizoma Ginseng), *Da Zao* (Fructus Jujubae), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Ban Xia* (Rhizoma Pinelliae), and *Sheng Jiang* (Rhizoma Zingiberis Recens), this formula harmonizes *shaoyang*, dispels pathogenic factors, and restores *zheng* (upright) *qi* to treat alternating chills and fever, hypochondriac pain and distention, a bitter taste in the mouth, a dry throat, a thin, white tongue coating, and a wiry pulse.
- *Hao Qin Qing Dan Tang* clears damp-heat in the Stomach and Gallbladder, using *Qing Hao* (Herba Artemisiae Annuae) and *Huang Qin* (Radix Scutellariae) as the two main ingredients. The formula further contains *Zhu Ru* (Caulis Bambusae in Taenia), *Ban Xia* (Rhizoma Pinelliae), *Chi Fu Ling* (Poria Rubra), *Bi Yu San* (Jasper Powder), *Chen Pi* (Pericarpium Citri Reticulatae), and *Zhi Qiao* (Fructus Aurantii), to treat damp-heat with turbid phlegm accumulation in the *shaoyang* channel. Symptoms include alternating chills and fever with a greater degree of heat than cold, a bitter taste in the mouth, acid regurgitation, a thick, greasy tongue coating, and a slippery, rapid pulse on the right hand and a wiry, rapid pulse on the left hand.⁶⁷

Chái Hú Guì Zhī Tāng (Bupleurum and Cinnamon Twig Decoction)

柴胡桂枝湯
柴胡桂枝汤

Pinyin Name: Chai Hu Gui Zhi Tang
Literal Name: Bupleurum and Cinnamon Twig Decoction
Alternate Names: Tsai Hu Kuei Chih Tang, Cai Hu Gui Zhi Tang, Bupleurum and Cinnamon Combination
Original Source: Shang Han Lun (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

Chai Hu (Radix Bupleuri)	12g
Huang Qin (Radix Scutellariae)	4.5g
Ren Shen (Radix et Rhizoma Ginseng)	4.5g
Ban Xia (Rhizoma Pinelliae), xi (washed)	0.25 cup [6-9g]
Gui Zhi (Ramulus Cinnamomi)	4.5g
Bai Shao (Radix Paeoniae Alba)	4.5g
Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	3g
Sheng Jiang (Rhizoma Zingiberis Recens), qie (sliced)	4.5g
Da Zao (Fructus Jujubae), bo (opened)	6 pieces

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the herbs in 7 cups [1,400 mL] of water, and reduce the liquid to 3 cups [600 mL]. Take 1 cup [200 mL] of the strained decoction three times daily.

CHINESE THERAPEUTIC ACTIONS

1. Disperses pathogenic factors from taiyang and shaoyang stages
2. Harmonizes the exterior and interior

CLINICAL MANIFESTATIONS

Taiyang and shaoyang syndromes that appear six to seven days after the onset of illness: fever, chills, joint pain, nausea, a feeling of distention and obstruction beneath the heart, and abdominal pain.

CLINICAL APPLICATIONS

Common cold and influenza, fever, arrhythmia, chronic hepatitis, liver cirrhosis, jaundice, cholecystitis, cholelithiasis, gastric or duodenal ulcers, acid reflux, chronic pancreatitis, chronic appendicitis, peritonitis, nephritis, frozen shoulder, neurasthenia, seizures, epilepsy, and trigeminal neuralgia.

EXPLANATION

Chai Hu Gui Zhi Tang (Bupleurum and Cinnamon Twig Decoction) addresses disorders characterized by shaoyang and taiyang syndromes, with shaoyang symptoms predominating and taiyang symptoms lingering. Shaoyang syndrome is characterized by the feeling of distention and obstruction beneath the heart, and pain around the umbilical region or the lower abdomen. Taiyang syndrome is

Chái Hú Guì Zhī Tāng (Bupleurum and Cinnamon Twig Decoction)

Chai Hu Gui Zhi Tang (Bupleurum and Cinnamon Twig Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Taiyang and shaoyang syndromes	<ul style="list-style-type: none"> Headache, a feeling of heaviness in the head, joint pain, fever and chills: <i>taiyang</i> syndrome Distention and obstruction beneath the heart, and pain around the umbilical region or the lower abdomen: <i>shaoyang</i> syndrome 	<ul style="list-style-type: none"> Dispels pathogenic factors from <i>taiyang</i> and <i>shaoyang</i> stages Harmonizes the exterior and interior 	<ul style="list-style-type: none"> <i>Gui Zhi Tang</i> (Cinnamon Twig Decoction) treats <i>taiyang</i> syndrome by releasing the exterior. <i>Xiao Chai Hu Tang</i> (Minor Bupleurum Decoction) treats <i>shaoyang</i> syndrome by harmonizing the exterior and interior.

characterized by headache, joint pain, fever, chills, and a feeling of heaviness in the head.

Chai Hu Gui Zhi Tang combines two formulas: *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) and *Gui Zhi Tang* (Cinnamon Twig Decoction). *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) treats *shaoyang* syndrome by harmonizing the exterior and interior. *Gui Zhi Tang* (Cinnamon Twig Decoction) treats *taiyang* syndrome by releasing the exterior. Combined, *Chai Hu Gui Zhi Tang* treats both *taiyang* and *shaoyang* syndromes.

Please refer to *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) and *Gui Zhi Tang* (Cinnamon Twig Decoction) for additional information on these two formulas.

MODIFICATIONS

- With painful joints, add *Ge Gen* (Radix Puerariae Lobatae) and *Sheng Ma* (Rhizoma Cimicifugae).
- When there is a feeling of oppression and fullness in the epigastric region, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Jie Geng* (Radix Platycodonis).

CAUTIONS / CONTRAINDICATIONS

Avoid cold, raw, oily, and greasy foods while taking *Chai Hu Gui Zhi Tang*.¹

PHARMACOLOGICAL EFFECTS

- Antilucer:** Administration of *Chai Hu Gui Zhi Tang* had a marked effect in preventing cysteamine-induced gastric ulcers in rats. The mechanism is attributed to decreased gastric acid production.²
- Immunostimulant:** Long-term administration of the formula was associated with an increase in lymphocytes in mice.³
- Anti-inflammatory:** Administration of *Chai Hu Gui Zhi Tang* was associated with marked anti-inflammatory effect in both acute and chronic inflammatory disorders in rats.⁴
- Analgesic:** *Chai Hu Gui Zhi Tang* was reported to be an effective treatment for trigeminal neuralgia in rats. This

mechanism of action was attributed to the ability of the formula to control pain in ligatured nerves by local effect, not by general analgesic effect.⁵

- Protective effect on the pancreas:** According to one study in rats, administration of *Chai Hu Gui Zhi Tang* was associated with inhibiting pancreatic fibrosis by suppressing transforming growth factor beta1 (TGF-beta1) expression.⁶ Another study reported that *Chai Hu Gui Zhi Tang* effectively delayed the onset of chronic pancreatitis and suppressed pancreatitis-associated protein gene expression in rats.^{7,8}
- Hepatoprotective:** Administration of *Chai Hu Gui Zhi Tang* was associated with treating liver lesions induced by N-nitrosomorpholine in rats. The mechanism of this hepatoprotective function was attributed to inhibition of cell proliferation and induction of apoptosis in adjacent hepatocytes.⁹

CLINICAL STUDIES AND RESEARCH

- Common cold and influenza:** Administration of modified *Chai Hu Gui Zhi Tang* was effective in treating common cold and influenza. Out of 2,650 patients, 2,220 were treated on an outpatient basis, and 430 were hospitalized. The study reported complete recovery in 2,405 patients, improvement in 208 patients, and no improvement in 37 patients. The overall rate effectiveness was 98.7%. The herbal treatment used *Chai Hu Gui Zhi Tang* as the base formula, and added *Ma Huang* (Herba Ephedrae) and *Xi Xin* (Radix et Rhizoma Asari) for more cold; *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Fang Feng* (Radix Saposhnikovia) for more wind; *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), *Shi Gao* (Gypsum Fibrosum), and *Ban Lan Gen* (Radix Isatidis) for more heat; *Huo Xiang* (Herba Agastaches) and *Cang Zhu* (Rhizoma Atractylodis) for more damp; *Huang Qi* (Radix Astragali) or *Dang Shen* (Radix Codonopsis) for qi deficiency; *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis) for yang deficiency; *Mai Dong* (Radix Ophiopogonis), *Tian Hua Fen* (Radix Trichosanthis), and *Zhi Mu*

Chái Hú Guì Zhī Tāng (Bupleurum and Cinnamon Twig Decoction)

(Rhizoma Anemarrhenae) for yin deficiency; and *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae) for profuse perspiration.¹⁰

2. **Fever:** Administration of 5 to 8 doses of modified *Chai Hu Gui Zhi Tang* was effective in treating patients with fever due to viral infection. Out of 112 patients, the study reported complete recovery in 85 patients, improvement in 13 patients, and no effect in 14 patients.¹¹
3. **Arrhythmia:** Administration of modified *Chai Hu Gui Zhi Tang* effectively treated various types of arrhythmia. Out of 24 patients, the study reported complete recovery in 16 patients, improvement in 4 patients, and no benefit in 4 patients.¹²
4. **Neurasthenia:** One study reported satisfactory result using modified *Chai Hu Gui Zhi Tang* to treat 60 patients with neurasthenia. The herbal treatment protocol was to use this formula as the base, and add *Shan Zha* (Fructus Crataegi), *Shen Qu* (Massa Fermentata), and *Mai Ya* (Fructus Hordei Germinatus) for poor appetite and epigastric fullness and distention; *Ju Hua* (Flos Chrysanthemi) and *Bai Zhi* (Radix Angelicae Dahuricae) for dizziness and headache; *He Huan Hua* (Flos Albiziae) and *Mu Li* (Concha Ostreae) for insomnia; *Bai Zi Ren* (Semen Platycladi) and *Shi Chang Pu* (Rhizoma Acori Tatarinowii) for inability to concentrate; and *Chuan Lian Zi* (Fructus Toosendan) for chest oppression and discomfort.¹³
5. **Chronic hepatitis:** According to one study, 133 patients with chronic hepatitis were treated with this formula, and the study reported a rate of effectiveness of 62.3%. Significant effect was reported in 47 patients, moderate effect in 36 patients, mild effect in 9 patients, and no effect in 28 patients. Deterioration was reported in 13 patients.¹⁴
6. **Chronic pancreatitis:** Use of *Chai Hu Gui Zhi Tang* effectively treated chronic pancreatitis. Out of 21 patients who participated in the study, 10 were male, 11 were female, and the ages ranged between 15 to 84 years. The treatment protocol was to administer 7.5g of the formula daily in powdered extract for 8 weeks or more. Out of 21 patients, the study reported marked improvement in 8 patients, slight improvement in 7 patients, and no improvement in 6 patients. The overall rate effectiveness was 71%.¹⁵
7. **Frozen shoulder:** Administration of *Chai Hu Gui Zhi Tang* in 26 patients (2 males and 24 females) with frozen shoulder characterized by deficiency was associated with improvement in 22 patients and no effect in 4 patients.¹⁶
8. **Trigeminal neuralgia:** Use of *Chai Hu Gui Zhi Tang* effectively treated patients suffering from trigeminal neuralgia. This mechanism of action was attributed to the capacity of this formula to control the manifestation of pain in ligatured nerves by local effect, not by general analgesic effect.¹⁷

HERB-DRUG INTERACTION

- **Benzodiazepines:** Concurrent administration of *Chai Hu Gui Zhi Tang* and anticonvulsants, such as benzodiazepines, has been found to have a synergistic effect in treating epilepsy. *Chai Hu Gui Zhi Tang* acts as a partial agonist for the GABA-A receptor, and it activates the GABA-A receptor-mediated chloride current (I_{Cl}).¹⁸
- **Pentobarbital:** Administration of *Chai Hu Gui Zhi Tang* was associated with significantly shortened pentobarbital-induced sleeping time in mice. The mechanism of this interaction was attributed to the up-regulation of the mRNA expression of CYP2B, CYP3A1, and CYP4A1.¹⁹

TOXICOLOGY

Chai Hu Gui Zhi Tang has a relatively low toxicity. Continuous administration of the formula for four weeks in rats showed no abnormalities in the liver, spleen, kidney, or adrenal glands.²⁰

Chái Líng Tāng (Bupleurum and Poria Decoction)

柴苓湯

柴苓汤

Pinyin Name: *Chai Ling Tang*

Literal Name: Bupleurum and Poria Decoction

Alternate Name: Bupleurum and Hoelen Combination

Original Source: *Shen Shi Zun Sheng Shu* (Master Shen's Book for Revering Life) by Shen Jin-Ao in 1773

COMPOSITION

Chai Hu (Radix Bupleuri)
Ban Xia (Rhizoma Pinelliae)
Huang Qin (Radix Scutellariae)
Ren Shen (Radix et Rhizoma Ginseng)
Gan Cao (Radix et Rhizoma Glycyrrhizae)
Bai Zhu (Rhizoma Atractylodis Macrocephalae)
Zhu Ling (Polyporus)
Fu Ling (Poria)
Ze Xie (Rhizoma Alismatis)
Gui Zhi (Ramulus Cinnamomi)

DOSAGE / PREPARATION / ADMINISTRATION

Chai Ling Tang is formulated by combining two formulas: *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) and *Wu Ling San* (Five-Ingredient Powder with Poria). Please refer to these two formulas for additional information.

CHINESE THERAPEUTIC ACTIONS

1. Harmonizes the exterior and interior to relieve *shaoyang* syndrome
2. Disperses water stagnation and phlegm accumulation

CLINICAL MANIFESTATIONS

Shaoyang syndrome with water accumulation: alternating spells of chills and fever, thirst, a bitter taste in the mouth, anorexia, edema; a feeling of fullness and oppression in the chest and hypochondriac regions; vomiting and diarrhea with water intake; and a white tongue coating.

CLINICAL APPLICATIONS

Hepatitis, alcohol-induced liver damage, cholecystitis, edema, nephropathy, diabetic nephropathy, steroid-dependent nephrotic syndrome, rheumatoid arthritis, systemic lupus erythematosus, gastroenteritis, gastritis, enteritis, ulcerative colitis, otitis media, common cold, influenza, heat stroke, febrile disorders, recurrent miscarriages, and anovulation in polycystic ovary syndrome.

EXPLANATION

Chai Ling Tang (Bupleurum and Poria Decoction) treats *shaoyang* syndrome with water accumulation in the lower parts of the body. *Shaoyang* syndrome is characterized by alternating spells of chills and fever, a bitter taste in the mouth, and a feeling of fullness and oppression in the chest and hypochondriac regions; water accumulation is characterized by thirst, edema, and scanty urine. Vomiting and diarrhea are symptoms of malaria which can be alleviated with this formula.

Chái Líng Tāng (Bupleurum and Poria Decoction)

Chai Ling Tang (Bupleurum and Poria Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Shaoyang syndrome with water accumulation	<ul style="list-style-type: none"> Alternating spells of chills and fever, a bitter taste in the mouth, and a feeling of fullness and oppression in the chest and hypochondriac region: <i>shaoyang</i> syndrome Thirst, edema, and scanty urine: water accumulation 	<ul style="list-style-type: none"> Harmonizes the exterior and interior to relieve <i>shaoyang</i> syndrome Dispels water stagnation and phlegm accumulation 	<ul style="list-style-type: none"> <i>Xiao Chai Hu Tang</i> (Minor Bupleurum Decoction) treats <i>shaoyang</i> syndrome. <i>Wu Ling San</i> (Five-Ingredient Powder with Poria) treats water accumulation.

Chai Ling Tang is comprised of two formulas: *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) which treats *shaoyang* syndrome by harmonizing the exterior and the interior; and *Wu Ling San* (Five-Ingredient Powder with Poria) which treats water accumulation in the lower parts of the body by resolving dampness and promoting the flow of yang qi.

Please refer to *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) and *Wu Ling San* (Five-Ingredient Powder with Poria) for additional information on these two formulas.

MODIFICATIONS

- If accompanied by irritability and a dry mouth, add *Huang Lian* (Rhizoma Coptidis) and *Mai Dong* (Radix Ophiopogonis).
- With vomiting and thirst, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Zhu Ru* (Caulis Bambusae in Taenia).
- With diarrhea and a dry mouth, add *Gan Jiang* (Rhizoma Zingiberis) and *Huang Bo* (Cortex Phellodendri Chinensis).
- When the vomiting and diarrhea is due to food stagnation, add *Ping Wei San* (Calm the Stomach Powder).
- When the vomiting and diarrhea is due to summer-heat accumulation, add *San Wu Xiang Ru Yin* (Mosla Three Decoction).
- When the vomiting and diarrhea is due to deficiency and cold, add *Wu Zhu Yu Tang* (Evodia Decoction).

PHARMACOLOGICAL EFFECTS

1. **Diuretic:** Administration of *Chai Ling Tang* at 10 times the normal dose to 10-month-old rats was associated with a marked increase in water and sodium excretion in the first 24-hour period. Continuous administration for 1 month was associated with weight reduction, but no abnormal reactions.¹ The mechanism of this diuretic action was attributed to the production of nitric oxide.²
2. **Endocrine:** Administration of 0.01-1.0 g/kg of *Chai Ling Tang* to male Wistar rats was associated with a stimulating effect on the endocrine system, as demonstrated by an increased plasma concentration of adrenocorticotrophic

hormone and a decreased level of corticotropin-releasing factor.³

3. **Nephroprotective:** Use of *Chai Ling Tang* was associated with beneficial effects in treating passive Heymann nephritis in rats, which is similar to human membranous nephropathy. The study reported that *Chai Ling Tang* significantly decreased serum albumin and total protein, and inhibited serum total cholesterol. The researchers concluded that proteinuria in passive Heymann nephritis can be significantly suppressed by *Chai Ling Tang*.⁴

CLINICAL STUDIES AND RESEARCH

1. **Hepatitis:** Use of *Chai Ling Tang* was associated with 55.3% effectiveness in treating chronic hepatitis. Of 48 patients, the study reported significant improvement in 4 patients, moderate improvement in 13 patients, slight improvement in 9 patients, and no benefit in 22 patients.⁵
2. **Alcohol-induced liver damages:** Twenty-seven patients with various types of alcohol-induced liver disorders (13 with hepatitis, 11 with fatty liver, and 3 with liver cirrhosis) were treated with good results using *Chai Ling Tang*. The treatment protocol was to administer 3g of the powdered extract three times daily before meals for at least 3 months. All patients were instructed to avoid consumption of alcohol. The study reported improved lab values of SGOT and LDH after one month, and improved lab values of SGOT, SGPT, LDH, gamma-GPT, and total bilirubin after three months. Of 27 patients, the study reported moderate improvement in 17 patients, slight improvement in 8 patients, no effect in 1 patient, and deterioration in 1 patient. The proposed mechanism of the hepatoprotective effects was attributed to ability of this formula to reduce inflammation, regulate the production and excretion of bile, and protect liver cell membrane.⁶
3. **Nephropathy:** Thirty-nine patients with nephropathy were divided into two groups, with both groups similar in age, severity of illness, and overall condition. Group one of 21 patients received herbal treatment, and group two of 18 patients received drug treatment. Patients in group one received *Chai Ling Tang* as the base formula, with

Chái Líng Tāng (Bupleurum and Poria Decoction)

minor modifications based on the four possible patterns (Lung and Kidney qi deficiencies, Spleen and Kidney yang deficiencies, Liver and Kidney yin deficiencies, and qi and yin deficiencies). Patients in group two received 1 mg/kg of prednisone daily in the morning with meals for eight weeks, followed by a gradual reduction in dose, and eventual discontinuation. The study reported that both groups responded well to the treatments, and group one showed faster relief of proteinuria.⁷

4. **Diabetic nephropathy:** Fifteen patients with diabetic nephropathy who were treated with *Chai Ling Tang* showed the following results: moderate improvement in 10 patients, slight improvement in 3 patients, and no improvement in 2 patients.⁸
5. **Steroid-dependent nephrotic syndrome:** Administration of *Chai Ling Tang* effectively treated 4 patients with steroid-dependent relapsing nephrotic syndrome associated with the use of prednisolone and immunosuppressive agents. After treatment with *Chai Ling Tang*, the study reported that relapse was markedly suppressed in three patients but not at all in the other. Based on this information, the researchers concluded that *Chai Ling Tang* was effective for steroid-dependent nephrotic syndrome.⁹ Another study reported marked improvement in 37 children with steroid-dependent nephrotic syndrome treated with *Chai Ling Tang* while taking corticosteroids. After treatment with *Chai Ling Tang*, the study reported improvement with proteinuria, reduction of prednisone dose, and relief of side effects. The study indicated that *Chai Ling Tang* may be a useful steroid substitute for patients with steroid-dependent nephrotic syndrome who fail to respond to or manifest severe toxic effect from cytotoxic agents.¹⁰ In one multicenter, randomized, controlled clinical trial, initial 8-week prednisolone and 2-year *Chai Ling Tang* was effective in 196 children with steroid-responsive nephrotic syndrome.¹¹
6. **Rheumatoid arthritis:** Administration of 9g of *Chai Ling Tang* daily for 3 months was associated with marked improvements in 17 patients with rheumatoid arthritis.¹²
7. **Systemic lupus erythematosus (SLE):** Daily administration of *Chai Ling Tang* in powdered extract (8.1 g/day in two to three equally-divided doses) for 6 to 12 months was effective in treating 69 patients with SLE. Patients with joint pain and increased sensitivity to light showed improvement after 9-12 months. Patients with proteinuria showed improvement after 6-12 months. Patients with decreased white blood cell counts showed improvement after 3 months. Patients with decreased CD4 and CD8 counts showed improvement after 12 months. Side effects were reported in 8 of 69 patients, and included thirst, nausea, palpitations, itching, and increased SGPT (in 1 case).¹³ Another report concluded long-term

administration of *Chai Ling Tang* showed an inhibitory effect on SLE and was beneficial as a supportive treatment for patients with mild cases of SLE.¹⁴

8. **Ulcerative colitis:** Administration of *Chai Ling Tang* was effective in treating ulcerative colitis. In 3 patients, administration of this formula with 30mg of prednisolone and 4.0g of salicylazosulfapyridine effectively alleviated symptoms of ulcerative colitis. No recurrence was reported upon reduction and discontinuation of prednisolone.¹⁵
9. **Otitis media:** Use of *Chai Ling Tang* to treat suppurative otitis media in 35 children (with 46 affected ears) had a 78.3% rate of effectiveness.¹⁶
10. **Recurrent miscarriages:** Use of *Chai Ling Tang* to treat 10 of 12 women with a history of recurrent miscarriages who had shown positive antiphospholipid antibodies produced an 83.3% success rate. The 12 women had experienced a total of 27 spontaneous miscarriages in their previous pregnancies. The treatment protocol was to administer 9.0g daily of *Chai Ling Tang* before their next pregnancy. Of 12 patients, the study reported conversion of antiphospholipid antibodies from positive to negative in 9 patients, and successful pregnancy and delivery of a child in 10 patients. The study considered *Chai Ling Tang* to be an effective therapy for patients with recurrent miscarriages who were found to be positive for antiphospholipid antibodies.¹⁷ In two other studies, use of *Chai Ling Tang* and *Dang Gui Shao Yao San* (Tangkuei and Peony Powder) helped to prevent autoimmunity-related recurrent miscarriages by correcting T helper-1/T helper-2 balance.^{18,19}
11. **Anovulation in polycystic ovary syndrome:** Administration of *Chai Ling Tang* stimulated ovulation in 70.6% of anovulatory patients with polycystic ovary syndrome. Serum LH and the LH/FSH ratio significantly decreased, and serum testosterone levels did not significantly change during the treatment. The researchers concluded that *Chai Ling Tang* can be useful for the treatment of anovulation in polycystic ovary syndrome, especially because this condition does not respond well to clomiphene citrate or gonadotropin therapy.²⁰

HERB-DRUG INTERACTION

- **Liver enzyme inhibition:** One study that examined the metabolic activity of different cytochrome P450 (CYP) isoforms reported *Chai Ling Tang* to be a competitive inhibitor of CYP3A4 (Ki value of 0.1 mg/mL), CYP2C9 (Ki value of 0.7-0.8 mg/mL), and CYP1A2 (inhibition > 68%), but not CYP2D6. The study concluded that because of this inhibitory effect on liver metabolism, care should be taken with concurrent use of *Chai Ling Tang* and drugs.²¹

Chái Líng Tāng (Bupleurum and Poria Decoction)

- **Ofloxacin:** In a study with 7 volunteers in an open, random, crossover fashion, no significant effect on the rate and extent of bioavailability of ofloxacin was noted with coadministrations of *Liu Jun Zi Tang* (Six-Gentlemen Decoction), *Xiao Chai Hu Tang* (Minor Bupleurum Decoction), or *Chai Ling Tang* (Bupleurum and Poria Decoction).²²

Chái Xiàn Tāng (Bupleurum Decoction to Raise the Sunken)

柴陷湯
柴陷汤

Pinyin Name: *Chai Xian Tang*
Literal Name: Bupleurum Decoction to Raise the Sunken
Alternate Names: *Tsai Hsien Tang, Cai Xian Tang*, Bupleurum Chest Bind Decoction, Bupleurum and Scute Combination
Original Source: *Shen Shi Zun Sheng Shu* (Master Shen’s Book for Revering Life) by Shen Jin-Ao in 1773

COMPOSITION

Ban Xia (Rhizoma Pinelliae)
Sheng Jiang (Rhizoma Zingiberis Recens)
Huang Lian (Rhizoma Coptidis)
Huang Qin (Radix Scutellariae)
Chai Hu (Radix Bupleuri)
Gua Lou Zi (Semen Trichosanthis)
Ren Shen (Radix et Rhizoma Ginseng)
Gan Cao (Radix et Rhizoma Glycyrrhizae)
Da Zao (Fructus Jujubae)

DOSAGE / PREPARATION / ADMINISTRATION

Chai Xian Tang is formulated by combining two formulas: *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) and *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction). Please refer to these two formulas for additional information.

CHINESE THERAPEUTIC ACTIONS

- 1. Harmonizes the exterior and interior to relieve *shaoyang* syndrome
- 2. Eliminates phlegm stagnation
- 3. Regulates qi circulation in the chest

CLINICAL MANIFESTATIONS

Shaoyang syndrome with phlegm stagnation: alternating spells of chills and fever, a bitter taste in the mouth, a feeling of fullness and oppression in the chest and hypochondriac

region, chest pain with coughing or deep inhalation, thick and sticky phlegm that is difficult to expectorate, accelerated respiration, poor appetite, and a yellow tongue coating.

CLINICAL APPLICATIONS

Common cold and influenza, bronchitis, bronchial asthma, pneumonia, pleurisy, hepatitis, cholecystitis, and cholelithiasis.

EXPLANATION

Chai Xian Tang (Bupleurum Decoction to Raise the Sunken) treats *shaoyang* syndrome that is complicated by phlegm stagnation. Clinically, *shaoyang* syndrome is characterized by alternating spells of chills and fever, a bitter taste in the mouth, and a feeling of fullness and oppression in the chest and hypochondriac region. Phlegm stagnation is characterized by chest pain with

coughing or deep inhalation, thick and sticky phlegm that is difficult to expectorate, accelerated respiration, and poor appetite. A yellow tongue coating indicates internal heat.

Chai Xian Tang is formulated by combining two formulas: *Xiao Chai Hu Tang* (Minor Bupleurum Decoction), which treats *shaoyang* syndrome by harmonizing the exterior and interior; and *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction) which dissolves phlegm, clears heat, and disperses stagnation.

Please refer to *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) and *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction) for additional information on these two formulas.

MODIFICATIONS

- For increased phlegm, cough, and hypochondriac pain, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Jie Geng* (Radix Platycodonis).
- With vomiting and chest pain, add *Zhu Ru* (Caulis Bambusae in Taenia) and *Chen Pi* (Pericarpium Citri Reticulatae).
- With palpitations, chest pain, and tightness in the lungs, combine with *Zhi Gan Cao Tang* (Honey-Fried Licorice Decoction).
- With sputum and cough with pain, add *Zhi Qiao* (Fructus Aurantii) and *Jie Geng* (Radix Platycodonis).
- With thirst and a sore throat, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).
- When there is excessive phlegm and pain during coughing, combine with *Wen Dan Tang* (Warm the Gallbladder Decoction).
- For stomatitis, oral sores, and sore throat, combine with *Qing Xin Li Ge Tang* (Clear the Epigastrium and Benefit the Diaphragm Decoction).

DOSAGE / PREPARATION / ADMINISTRATION

Prepare the ingredients as a decoction. Note: *Bi Yu San* (Jasper Powder) is an herbal formula that contains *Hua Shi* (Talcum), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Qing Dai* (Indigo Naturalis). Please refer to *Liu Yi San* (Six-to-One Powder) under the Related Formula(s) section for additional information.

CHINESE THERAPEUTIC ACTIONS

1. Clears Gallbladder heat and dispels dampness
2. Harmonizes the Stomach and dissolves phlegm

CLINICAL MANIFESTATIONS

Gallbladder damp-heat: alternating spells of chills and fever (with fever being more prominent than chills), a

Hǎo Qín Qīng Dǎn Tāng

(Artemisia Annuua and Scutellaria Decoction to Clear the Gallbladder)

bitter taste in the mouth, dry heaves, hiccups; a stifling sensation in the chest, chest and hypochondriac pain and distention; regurgitation of yellow and sticky fluids that are bitter or sour in taste; a red tongue body with thick, white or yellowish tongue coating; and a slippery, rapid pulse on the right hand and a wiry, rapid pulse on the left hand.

CLINICAL APPLICATIONS

Cholelithiasis, gastritis, and fever.

EXPLANATION

Hao Qin Qing Dan Tang (Artemisia Annuua and Scutellaria Decoction to Clear the Gallbladder) treats damp-heat in the Gallbladder and reversed flow of Stomach qi. Damp-heat in the Gallbladder causes alternating spells of fever and chills because the Gallbladder is a *shaoyang* organ, located between the exterior and the interior. Chest fullness and hypochondriac pain and distention arise as a result of heat in the Gallbladder and Liver channels; these channels travel through the chest and hypochondriac region. Because the wood element (Liver and Gallbladder) acts on the earth element (Spleen and Stomach), excess in the Gallbladder can negatively affect the Stomach, causing reversed flow of Stomach qi and damp obstruction, which manifest in dry heaves, nausea, hiccups, and regurgitation of yellow and sticky fluids that are bitter and sour in taste. A rapid pulse indicates heat. A slippery pulse on the right indicates damp obstruction produced by the Spleen,

while a wiry pulse on the left indicates qi stagnation in the Gallbladder.

Qing Hao (Herba Artemisiae Annuuae) penetrates and clears heat in the *shaoyang* level. *Huang Qin* (Radix Scutellariae) purges and sedates heat in the Gallbladder. *Zhu Ru* (Caulis Bambusae in Taenia) clears heat and resolves phlegm. *Ban Xia* (Rhizoma Pinelliae) dries dampness and eliminates phlegm. *Zhi Qiao* (Fructus Aurantii) and *Chen Pi* (Pericarpium Citri Reticulatae) activate qi flow, expand the chest, and harmonize and regulate Stomach qi. *Chi Fu Ling* (Poria Rubra) and *Hua Shi* (Talcum) drain damp-heat out of the body through urination. *Qing Dai* (Indigo Naturalis) eliminates phlegm and interior heat. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the Stomach and the formula.

MODIFICATIONS

- For tinnitus or diminished hearing from damp-heat accumulation, add *Shi Chang Pu* (Rhizoma Acori Tatarinowii), *Gou Teng* (Ramulus Uncariae cum Uncis), *Ju Hua* (Flos Chrysanthemi), and *Tong Cao* (Medulla Tetrapanacis).
- If there is excess vomiting, add *Zuo Jin Wan* (Left Metal Pill).
- With body aches and pains, add *Sang Zhi* (Ramulus Mori), *Yi Yi Ren* (Semen Coicis), and *Si Gua Luo* (Retinervus Luffae Fructus).
- For damp-heat jaundice, remove *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae);

- With dizziness and vertigo due to phlegm accumulation, add *Tian Ma* (*Rhizoma Gastrodiae*).
- With insomnia and palpitations, add *Hu Po* (*Succinum*) and *Huang Lian* (*Rhizoma Coptidis*).
- If there is coughing with yellow sputum, add *Yu Xing Cao* (*Herba Houttuyniae*), *Dong Gua Zi* (*Semen Benincasae*), and *Gua Lou Zi* (*Semen Trichosanthis*).
- For *lin zheng* (dysuria syndrome), add *Che Qian Zi* (*Semen Plantaginis*), *Mu Tong* (*Caulis Akebiae*), and *Ze Xie* (*Rhizoma Alismatis*).

CAUTIONS / CONTRAINDICATIONS

Avoid pungent, spicy, oily, or greasy foods while taking *Hao Qin Qing Dan Tang*.¹

CLINICAL STUDIES AND RESEARCH

1. **Cholelithiasis:** Use of modified *Hao Qin Qing Dan Tang* demonstrated a success rate of 85% in eliminating gallstones. Of 60 cases involving gallstones, the study reported elimination of all stones in 46 cases, partial elimination of stones in 5 cases, no benefit in 5 cases, and surgical intervention in 4 cases. The herbal treatment contained this formula plus *Chai Hu* (*Radix Bupleuri*) for Liver qi stagnation; *Da Huang* (*Radix et Rhizoma Rhei*) for dry stools and constipation; and *Long Dan* (*Radix et Rhizoma Gentianae*), *Che Qian Zi* (*Semen Plantaginis*), and *Yin Chen* (*Herba Artemisiae Scopariae*) for severe jaundice. The duration of treatment ranged from 7 to 30 days of therapy.²
2. **Gastritis:** Good results were reported using modified *Hao Qin Qing Dan Tang* to treat gastritis caused by regurgitation of bile. In addition to this formula, modifications included the addition of *Chuan Lian Zi* (*Fructus Toosendan*) and *Wu Zhu Yu* (*Fructus Evodiae*) for severe pain; *Xiang Fu* (*Rhizoma Cyperi*) and *Zi Su Geng* (*Caulis Perillae*) for upper abdominal distention and pain; *Huang Lian* (*Rhizoma Coptidis*) and *Zhe Shi* (*Haematitum*) for increased acidity of the stomach; and other adjustments when deemed necessary. Of 52 cases, the study reported significant improvement in 43 cases and moderate improvement in 9 cases.³
3. **Fever:** Use of *Hao Qin Qing Dan Tang* was associated with 95% effectiveness in treating 100 patients with fever caused by an external infection. Clinical presentations included acute onset of fever (body temperature of 38.5°C / 101.3°F or higher), elevated body temperature especially in the evening and at night with or without perspiration; chills,

sore throat, a dry mouth, a bitter taste in the mouth, cough, dysuria, a red tongue body with a thin, greasy white or yellow tongue coating, and a rapid pulse. The herbal treatment contained *Hao Qin Qing Dan Tang* plus *Bo He* (*Herba Menthae*) and *Ge Gen* (*Radix Puerariae Lobatae*). Of 100 cases, the study reported complete recovery in 37 cases, significant improvement in 58 cases, and no effect in 5 cases.⁴ Another study reported 96.3% effectiveness using modified *Hao Qin Qing Dan Tang* to treat fever in 54 patients. Modifications included the addition of *Chai Hu* (*Radix Bupleuri*) for alternating spells of chills and fever; *Cang Zhu* (*Rhizoma Atractylodis*) and *Hou Po* (*Cortex Magnoliae Officinalis*) for chest fullness and distention; *Jie Geng* (*Radix Platycodonis*) for redness, swelling, and pain in the throat; and *Yu Jin* (*Radix Curcumae*) for a feeling of heaviness in the head.⁵

AUTHORS' COMMENTS

Hao Qin Qing Dan Tang is a commonly used formula for treating damp-heat with turbidity attacking the *shaoyang* level. This formula is indicated in the following conditions: jaundice with *lin zheng* (dysuria syndrome), vomiting caused by disharmony of the Liver and Stomach with turbidity in the Stomach, and dizziness and vertigo caused by phlegm obstruction.

Xiao Chai Hu Tang (Minor Bupleurum Decoction) and *Hao Qin Qing Dan Tang* both harmonize *shaoyang* syndrome, but have important differences:

- *Xiao Chai Hu Tang* harmonizes *shaoyang* syndrome that is caused initially by wind-cold invading the *taiyang* level, which then turns into heat, and moves deeper into the *shaoyang* level. The chief herb, *Chai Hu* (*Radix Bupleuri*), is an acrid, bitter, and cold herb that releases the exterior, lifts the clear yang, and disperses wind and heat.
- *Hao Qin Qing Dan Tang* harmonizes *shaoyang* syndrome that is caused by damp-heat invading the Gallbladder channel. The chief herb, *Qing Hao* (*Herba Artemisiae Annuae*), an acrid, bitter, and cold herb, works with other herbs to clear damp-heat from the *shaoyang*.

(Bupleurum Decoction to Reach the Membrane Source)

柴胡達原飲

柴胡达原饮

Pinyin Name: *Chai Hu Da Yuan Yin*

Literal Name: Bupleurum Decoction to Reach the Membrane Source

Original Source: *Chong Ding Tong Su Shang Han Lun* (Revised Popular Guide to the Discussion of Cold-Induced Disorders) by Yu Gen-Chu in the Qing Dynasty

COMPOSITION

<i>Chai Hu</i> (Radix Bupleuri)	4.5g
<i>Huang Qin</i> (Radix Scutellariae)	4.5g
<i>Zhi Qiao</i> (Fructus Aurantii)	4.5g
<i>Jie Geng</i> (Radix Platycodonis)	3g
<i>Hou Po</i> (Cortex Magnoliae Officinalis)	4.5g
<i>Cao Guo</i> (Fructus Tsaoako)	1.8g
<i>Qing Pi</i> (Pericarpium Citri Reticulatae Viride)	4.5g
<i>Bing Lang</i> (Semen Arecae)	6g
<i>He Ye Geng</i> (Folium et Caulis Nelumbinis)	5 <i>cun</i> [9-15g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	2.1g

DOSAGE / PREPARATION / ADMINISTRATION

Prepare the ingredients as a decoction. Note: *Cun* is a Chinese measurement of length that is approximately equivalent to an inch. Today, the suggested dose of *He Ye Geng* (Folium et Caulis Nelumbinis) is between 9-15g.

CHINESE THERAPEUTIC ACTIONS

1. Dispels dampness and dissolves phlegm
2. Reaches and vents the *mo yuan* (membrane source)

CLINICAL MANIFESTATIONS

Damp and phlegm obstruction at the *mo yuan* (membrane source): a feeling of distention and fullness in the chest and diaphragm, irritability, heartburn, dizziness, a pasty sensation in the mouth, cough with sputum that is difficult to expectorate, intermittent fever and chills, a thick and greasy tongue coating, and a wiry, slippery pulse.

CLINICAL APPLICATIONS

Malaria

EXPLANATION

Chai Hu Da Yuan Yin (Bupleurum Decoction to Reach the Membrane Source) treats damp and phlegm obstruction at the *mo yuan* (membrane source). In traditional Chinese medicine, *mo yuan* (membrane source), situated midway

between the exterior and the interior of the body, is the doorway to the *San Jiao*. As dampness from the exterior enters the body through the nose and mouth, it settles and accumulates in the *mo yuan* to form phlegm. Damp and phlegm accumulation at the *mo yuan* causes disharmony between the exterior and interior, and obstructs the *San Jiao* qi flow, eventually producing symptoms such as a feeling of distention and fullness in the chest and diaphragm, irritability, heartburn, and dizziness. A greasy tongue coating and a slippery pulse are indications of dampness and phlegm.

Chai Hu (Radix Bupleuri) treats the exterior-interior nature of this condition. *Huang Qin* (Radix Scutellariae) clears damp-heat. Together, this pair of herbs treat the *shaoyang* syndrome of exterior and interior. *Zhi Qiao* (Fructus Aurantii) and *Jie Geng* (Radix Platycodonis) regulate qi in the upper *jiao*. *Hou Po* (Cortex Magnoliae Officinalis) and *Cao Guo* (Fructus Tsaoako) regulate qi in the middle *jiao*. *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Bing Lang* (Semen Arecae) regulate qi in the lower *jiao*. Together, these three pairs of herbs effectively regulate qi in the upper, middle, and lower *jiaos* to treat *San Jiao* disorders. *He Ye Geng* (Folium et Caulis Nelumbinis) regulates qi and relieves distention and fullness in the chest. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the formula.

RELATED FORMULAS

Dá Yuán Yīn (Reach the Membrane Source Decoction)

達原飲

达原饮

Pinyin Name: *Da Yuan Yin*

Literal Name: Reach the Membrane Source Decoction

Original Source: *Wen Yi Lun* (Discussion of Epidemic Warm Disease) by Wu You-Xing in 1642

<i>Bing Lang</i> (Semen Arecae)	6g
<i>Hou Po</i> (Cortex Magnoliae Officinalis)	3g
<i>Cao Guo</i> (Fructus Tsaoako)	1.5g
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	3g
<i>Bai Shao</i> (Radix Paeoniae Alba)	3g
<i>Huang Qin</i> (Radix Scutellariae)	3g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	1.5g

The source text states to cook the ingredients in 2 large bowls of water until 80% of the liquid remains. Take the warm decoction in the afternoon.

Da Yuan Yin (Reach the Membrane Source Decoction) vents the *mo yuan* (membrane source) and eliminates dampness and turbidity. The main indications include malaria and febrile disorders with pathogenic factors affecting the *mo yuan*, causing such symptoms as unpredictable patterns of alternating fever and chills (once every one to three days), chest oppression, nausea, vomiting, headache, irritability, restlessness, a wiry, rapid pulse, and a greasy tongue coating.

Qing Pi Yin (Clear the Spleen Decoction)

清脾飲

请脾饮

Pinyin Name: *Qing Pi Yin*

Literal Name: Clear the Spleen Decoction

Alternate Name: *Qing Pi Tang*

Original Source: *Ji Sheng Fang* (Formulas to Aid the Living) by Yan Yong-He in 1253

<i>Qing Pi</i> (Pericarpium Citri Reticulatae Viride)
<i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>chao</i> (dry-fried) and <i>zhi</i> (frying) with ginger juice

<i>Ban Xia</i> (Rhizoma Pinelliae), <i>pao</i> (blast-fried) in liquid 7 times
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)

The source text specifies to coarsely grind equal amounts of the ingredients and cook 12g of the coarse powder with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 1.5 bowls of water until 70% of the liquid remains. Take the strained decoction while warm.

Qing Pi Yin (Clear the Spleen Decoction) dries dampness, dissolves phlegm, purges heat, and clears the Spleen.

Chái Hú Dá Yuán Yīn

(Bupleurum Decoction to Reach the Membrane Source)

Clinically, it treats malaria characterized by alternating spells of fever and chills (more fever and less chills), a bitter taste in the mouth, loss of appetite, dysuria, and a wiry, rapid pulse. This formula is called “Clear the Spleen Decoction,” because it treats the cause of the illness, which is the inability of the Spleen to dry dampness and dissolve phlegm. As a result, dampness and phlegm obstruct the *mo yuan* (membrane source), eventually causing malaria with more fever than chills.

AUTHORS’ COMMENTS

Hao Qin Qing Dan Tang (Artemisia Annu and Scutellaria Decoction to Clear the Gallbladder) and *Chai Hu Da Yuan Yin* both treat *shaoyang* conditions with alternating fever and chills.

- *Hao Qin Qing Dan Tang* is more appropriate for dampness and heat affecting the Gallbladder and Stomach, with heat being more prominent than dampness.
- *Chai Hu Da Yuan Yin* is more suitable for situations in which there is obstruction of dampness and phlegm at the *mo yuan* (membrane source), with dampness being more prominent than heat.

Section 2

调和肝脾剂

— Liver and Spleen Harmonizing Formulas

Sì Nì Sǎn (Frigid Extremities Powder)

四逆散

Pinyin Name: *Sì Nì Sǎn***Literal Name:** Frigid Extremities Powder**Alternate Names:** *Su Nì Sǎn*, Counterflow Cold Formula, Cold Limbs Powder, Bupleurum and Chih-shih Formula**Original Source:** *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-jing in the Eastern Han Dynasty**COMPOSITION**

<i>Chai Hu</i> (Radix Bupleuri)	[6g]
<i>Zhi Shi</i> (Fructus Aurantii Immaturus), <i>po</i> (opened) and <i>zhi</i> (fried with liquid)	[6g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	[6g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	[6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind equal amounts of the ingredients into powder and sift evenly. Take one large spoonful of the powder (6-9g) with boiled water three times daily. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Ventilates the pathogens outward and relieves constraint
2. Spreads Liver qi and harmonizes the Liver and Spleen

CLINICAL MANIFESTATIONS

1. *Shaoyin* syndrome with frigid extremities: cold hands and feet, a slight sensation of warmth in the body, dysuria, abdominal pain, diarrhea, and rectal tenesmus.
2. Disharmony of the Liver and Spleen: hypochondriac fullness and distention, epigastric and abdominal pain, and a wiry pulse.

CLINICAL APPLICATIONS

Syncope, hepatitis, cholecystitis, cholelithiasis, cirrhosis, biliary ascariasis, pancreatitis, superficial gastritis, acute and chronic gastritis, gastric neuralgia, peptic ulcer disease, epigastric pain, ulcerative colitis, intestinal obstruction, infertility, adnexitis, acute appendicitis, intercostal neuralgia, impotence, and hernia.

EXPLANATION

Si Ni San (Frigid Extremities Powder) treats *shaoyin* syndrome characterized by cold hands and feet. This condition begins with the progression of an exterior pathogenic factor from the *shaoyang* level into the more interior *shaoyin* level. As the disease migrates toward the interior, it blocks the circulation of Liver and Gallbladder qi to the extremities, resulting in coldness below the elbows and knees. In other words, the cold extremities in this case result from blocked circulation of qi, and not from yang deficiency. Also, the pulse is wiry and not weak, another indication that the condition is caused by qi stagnation and not by yang deficiency.

This formula also treats disharmony of the Liver and Spleen, with symptoms including hypochondriac fullness and distention, epigastric and abdominal pain, and a bitter taste in the mouth. Since the flow of Liver and Gallbladder qi to the exterior is blocked, it counterflows and overacts on the Spleen and Stomach, resulting in abdominal pain, diarrhea, and lack of appetite. Other symptoms and applications include breast distention, a short temper, irregular menstruation, and premenstrual syndrome.

To treat this syndrome, qi must be lifted and extended outward; the Liver and Spleen must also be harmonized and stagnant Liver qi smoothed. *Chai Hu* (Radix Bupleuri)

Si Ni San (Frigid Extremities Powder)

Si Ni San (Frigid Extremities Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Shaoyin syndrome characterized by frigid extremities	<ul style="list-style-type: none"> • Cold hands and feet: blocked qi circulation to the extremities • Hypochondriac fullness and distention and epigastric and abdominal pain: Liver and Spleen disharmony • Wiry pulse: excess condition 	<ul style="list-style-type: none"> • Ventilates the pathogens outward and relieves constraint • Spreads Liver qi and harmonizes the Liver and Spleen 	<ul style="list-style-type: none"> • <i>Chai Hu</i> (Radix Bupleuri) harmonizes the Liver and relieves Liver qi stagnation. • <i>Zhi Shi</i> (Fructus Aurantii Immaturus) activates qi and breaks up qi stagnation. • <i>Bai Shao</i> (Radix Paeoniae Alba) nourishes Liver blood and softens the Liver. • <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonifies qi and strengthens the middle <i>jiao</i>.

harmonizes and spreads the Liver and relieves Liver qi stagnation. *Zhi Shi* (Fructus Aurantii Immaturus) activates qi and breaks up qi stagnation. The lifting tendency of *Chai Hu* (Radix Bupleuri), coupled with the downward-directing action of *Zhi Shi* (Fructus Aurantii Immaturus), further facilitates the flow of qi to the extremities. *Bai Shao* (Radix Paeoniae Alba) nourishes Liver blood and softens the Liver. It helps *Zhi Shi* (Fructus Aurantii Immaturus) relieve pain in the hypochondriac area and treats other Liver qi stagnation symptoms. *Bai Shao* (Radix Paeoniae Alba) also prevents the drying nature of *Chai Hu* (Radix Bupleuri) from damaging yin. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonifies qi and strengthens the middle *jiao*. It also harmonizes the formula and relieves gastrointestinal complaints arising when the Liver overacts on the Spleen and Stomach. Combined, these herbs lift the qi, smooth Liver qi, and restore the normal functioning of the Spleen.

Si Ni San is the basic formula for treating Liver qi stagnation. The cold extremities in this case do not suggest a cold syndrome, but rather constraint and stagnation of qi. In fact, if a patient with this condition is not treated in time, interior heat is likely to result.

MODIFICATIONS

- With severe Liver qi stagnation, add *Xiang Fu* (Rhizoma Cyperi) and *Yu Jin* (Radix Curcumae).
- If there is dysuria, add *Fu Ling* (Poria).
- If there is oliguria, add *Mu Tong* (Caulis Akebiae) and *Di Huang* (Radix Rehmanniae).
- With abdominal pain due to cold, add *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With acid regurgitation, add *Zuo Jin Wan* (Left Metal Pill).
- With nausea and vomiting, add *Huang Lian* (Rhizoma Coptidis) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

- With diarrhea with tenesmus, add *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea).
- With constipation, add *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas).
- When there is heat accumulation, add *Zhi Zi* (Fructus Gardeniae) and *Chuan Lian Zi* (Fructus Toosendan); or *Chai Hu Qing Gan Tang* (Bupleurum Decoction to Clear the Liver).
- With food stagnation or indigestion, add *Mai Ya* (Fructus Hordei Germinatus) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli); or *Bao He Wan* (Preserve Harmony Pill).
- If there is Spleen deficiency, add *Dang Shen* (Radix Codonopsis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- If accompanied by hypertension, add *Zhe Shi* (Haematitum), *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae), and *Huang Qin* (Radix Scutellariae).
- With palpitations, add *Gui Zhi* (Ramulus Cinnamomi).
- With dysmenorrhea, add *Xiang Fu* (Rhizoma Cyperi), *Yan Hu Suo* (Rhizoma Corydalis), and *Shi Xiao San* (Sudden Smile Powder).
- For hepatic disorders, add *Yin Chen* (Herba Artemisiae Scopariae), *Jin Qian Cao* (Herba Lysimachiae), *Yu Jin* (Radix Curcumae), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae).

CAUTIONS / CONTRAINDICATIONS

Frigid extremities is a symptom that may have various causes. *Si Ni San* must **not** be used indiscriminately as a symptomatic treatment for frigid extremities. Instead, it should only be used for cold hands and feet caused by blocked qi circulation failing to warm the extremities.

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** Alcohol extract of *Si Ni San* demonstrated an inhibitory effect on the gastrointestinal system and decreased the production of gastric acid.¹

Sì Nì Sǎn (Frigid Extremities Powder)

2. **Cardiovascular:** Administration of 60 mL of water extract of *Si Ni San* was associated with increased blood perfusion to the brain in patients with atherosclerosis and poor peripheral blood circulation. The same treatment had little effect on normal and healthy individuals.²
3. **Cardiotonic:** Intravenous injection of *Si Ni San* in dogs was associated with positive inotropic effects, positive chronotropic effects, and increased blood pressure.³
4. **Anti-arrhythmic:** Administration of *Si Ni San* was effective against arrhythmia induced by aconitine, epinephrine, and calcium chloride in rats and rabbits.^{4,5}
5. **Hepatoprotective:** Administration of *Si Ni San* was associated with marked hepatoprotective effects against many substances, such as carbon tetrachloride (CCl₄), *Bacillus Calmette-Guerin* (BCG), and picryl chloride (PCI-DTH). *Si Ni San* provided protective effects against liver injury through multiple mechanisms, such as protection of the hepatocyte membrane, enhancement of nitric oxide release, and dysfunction of liver-infiltrating cells, mainly by causing their apoptosis.⁶

CLINICAL STUDIES AND RESEARCH

1. **Hepatitis:** Thirty-three patients with hepatitis were treated with modified *Si Ni San* with significant improvement in 29 patients and moderate improvement in 4 patients. The herbal treatment contained *Si Ni San* plus *Yan Hu Suo* (Rhizoma Corydalis) 10g, *Hou Po* (Cortex Magnoliae Officinalis) 10g, *Yu Jin* (Radix Curcumae) 7g, and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 12g as the base formula. *Yin Chen* (Herba Artemisiae Scopariae) and *Zhi Zi* (Fructus Gardeniae) were added for jaundice; *Da Huang* (Radix et Rhizoma Rhei) was added for constipation; *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria) and *Yi Yi Ren* (Semen Coicis) were added for diarrhea; *Mai Ya* (Fructus Hordei Germinatus), *Shan Zha* (Fructus Crataegi), and *Chen Pi* (Pericarpium Citri Reticulatae) were added for poor appetite; *Di Gu Pi* (Cortex Lycii) and *Qing Hao* (Herba Artemisiae Annuae) were added for low-grade fever; *Bie Jia* (Carapax Trionycis), *Mu Li* (Concha Ostreae) and *Qing Pi* (Pericarpium Citri Reticulatae Viride) were added for enlargement of the liver or spleen; and *Dang Shen* (Radix Codonopsis) was added for constant fatigue.⁷
2. **Hypochondriac pain due to hepatitis:** Administration of *Si Ni San* plus *Jin Ling Zi San* (Melia Toosendan Powder) in 65 patients with hypochondriac pain due to hepatitis was associated with complete relief in 38 patients, improvement in 16 patients, and no benefit in 11 patients.⁸
3. **Liver cirrhosis:** Use of modified *Si Ni San* to treat liver cirrhosis had beneficial effects. The herbal treatment contained *Si Ni San* plus *Huang Qi* (Radix Astragali), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Bie Jia* (Carapax Trionycis) and others as the base formula. Strategies for modifications included the addition of *Xiang Fu* (Rhizoma Cyperi) and *Yan Hu Suo* (Rhizoma Corydalis) for Liver qi stagnation; *Yu Jin* (Radix Curcumae) and *Huang Qin* (Radix Scutellariae) for heat; *Di Huang* (Radix Rehmanniae) and *Gou Qi Zi* (Fructus Lycii) for yin deficiency; *Dang Gui* (Radix Angelicae Sinensis) and *E Zhu* (Rhizoma Curcumae) for blood stagnation; and addition of *Fu Ling* (Poria) and *Yi Yi Ren* (Semen Coicis), and elimination of *Bie Jia* (Carapax Trionycis) for Spleen deficiency.⁹
4. **Cholecystitis:** Complete recovery was reported in 78 of 84 patients with chronic cholecystitis when treated with *Si Ni San* plus *Chuan Lian Zi* (Fructus Toosendan) and *Mu Xiang* (Radix Aucklandiae) as the base formula. Modifications included the addition of *Yu Jin* (Radix Curcumae) and *Yan Hu Suo* (Rhizoma Corydalis) for qi stagnation; *Jin Qian Cao* (Herba Lysimachiae) and *Da Huang* (Radix et Rhizoma Rhei) for gallstones; and *Huang Qin* (Radix Scutellariae) and *Jin Yin Hua* (Flos Lonicerae Japonicae) for damp-heat.¹⁰
5. **Cholelithiasis:** Forty-two patients with gallstones were treated with complete recovery in 31 patients, improvement in 10 patients, and no effect in 1 case. The herbal treatment included *Si Ni San* plus *Yu Jin* (Radix Curcumae), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Jin Qian Cao* (Herba Lysimachiae), and others.¹¹
6. **Biliary ascariasis:** Use of *Si Ni San* plus *Jin Ling Zi San* (Melia Toosendan Powder) was effective in treating biliary ascariasis in 40 patients (22 males and 18 females, between 6-45 years of age). The herbal treatment included *Chai Hu* (Radix Bupleuri) 10g, *Zhi Qiao* (Fructus Aurantii) 10g, *Chuan Lian Zi* (Fructus Toosendan) 10g, *Shi Jun Zi* (Fructus Quisqualis) 10g, *Bing Lang* (Semen Arecae) 10g, *Bai Shao* (Radix Paeoniae Alba) 18g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, and *Yan Hu Suo* (Rhizoma Corydalis) 12g. The study reported complete recovery in all 40 patients, with an average of 4.2 days of treatment.¹² In another study, successful expulsion of biliary ascariasis was reported in all 51 patients after treatment for 1 to 3 days with *Si Ni San* plus *Wu Mei* (Fructus Mume) and *Ku Lian Pi* (Cortex Meliae).¹³
7. **Superficial gastritis:** Thirty-five patients with superficial gastritis were treated with good results using modified *Si Ni San*. *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Huang Qin* (Radix Scutellariae) and *Xiang Fu* (Rhizoma Cyperi) were added for Liver and Stomach qi stagnation. *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), *Yan Hu Suo* (Rhizoma Corydalis), *San Qi* (Radix et Rhizoma Notoginseng), and *Chuan Lian Zi* (Fructus Toosendan) were added for stagnation in the Stomach channel.¹⁴

Sì Nì Sǎn (Frigid Extremities Powder)

8. **Gastritis:** Use of modified *Si Ni San* demonstrated 93.3% effectiveness in treating 30 patients with gastritis caused by regurgitation of bile. The herbal treatment contained *Si Ni San* plus *Pu Gong Ying* (Herba Taraxaci), *Chen Pi* (Pericarpium Citri Reticulatae), *Huang Lian* (Rhizoma Coptidis) and others as the base formula. Modifications included the addition of *Chuan Lian Zi* (Fructus Toosendan) and *Yan Hu Suo* (Rhizoma Corydalis) for upper abdominal pain; and *Da Huang* (Radix et Rhizoma Rhei) for constipation. Of 30 patients, the study reported significant improvement in 16 patients, moderate improvement in 12 patients, and no effect in 2 patients.¹⁵
9. **Peptic ulcer disease:** One study of 70 peptic ulcer patients reported 93% effectiveness using *Si Ni San* plus *Hou Po* (Cortex Magnoliae Officinalis), *Shi Hu* (Caulis Dendrobii), *Mai Dong* (Radix Ophiopogonis), and others as needed. The duration of treatment was 30 days. Of 70 patients, the study reported complete recovery in 63 patients, improvement in 2 patients, and no improvement in 5 patients.¹⁶
10. **Epigastric pain:** One study reported marked success using herbs to treat 110 patients of epigastric pain arising from various causes (such as acute or chronic gastritis, gastric ulcer, duodenal ulcer). The herbal formula included *Si Ni San* plus *Yu Jin* (Radix Curcumae), *Mai Ya* (Fructus Hordei Germinatus), *Hou Po* (Cortex Magnoliae Officinalis), and others as needed. Of 110 patients, 55 had complete recovery, 33 had significant improvement, 20 had marked improvement, and 2 had no effect.¹⁷
11. **Ulcerative colitis:** One study reported significant improvement in 8 of 10 patients with chronic ulcerative colitis when treated with modified *Si Ni San*. Modifications were made by adding *Bai Jiang Cao* (Herba cum Radice Patriniae), *Da Xue Teng* (Caulis Sargentodoxae), and *Yi Yi Ren* (Semen Coicis) for damp-heat; *Dang Shen* (Radix Codonopsis), *Shan Yao* (Rhizoma Dioscoreae) and dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for Spleen deficiency; and *Si Shen Wan* (Four-Miracle Pill) for Kidney yang deficiency.¹⁸
12. **Infertility:** Two hundred forty-six women with infertility due to blocked fallopian tubes were treated with 72.36% effectiveness (complete resolution in 136 patients, improvement in 42 patients, and no effect in 68 patients). The herbal treatment contained as the base formula *Chai Hu* (Radix Bupleuri) 10g, *Zhi Shi* (Fructus Aurantii Immaturus) 10g, *Chi Shao* (Radix Paeoniae Rubra) 10g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 10g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 10g and *Chuan Shan Jia* (Squama Manis) 15g. Modifications included addition of a larger dose of *Zhi Shi* (Fructus Aurantii Immaturus) for Liver stagnation, and *Shui Zhi* (Hirudo) for blood stagnation. The herbs were given in decoction daily for 3 months per course of treatment.¹⁹
13. **Adnexitis:** Administration of modified *Si Ni San* was associated with marked effect in all 48 patients with chronic adnexitis. In addition to the base formula, *Mu Tong* (Caulis Akebiae) and *Ze Xie* (Rhizoma Alismatis) were added for damp-heat; *Gui Zhi* (Ramulus Cinnamomi) and *Xiao Hui Xiang* (Fructus Foeniculi) were added for damp-cold; *Chuan Lian Zi* (Fructus Toosendan) and *Yan Hu Suo* (Rhizoma Corydalis) were added for severe pain; and *Hai Piao Xiao* (Endoconcha Sepiae) and *Tu Fu Ling* (Rhizoma Smilacis Glabrae) for profuse leukorrhea.²⁰
14. **Impotence:** One study reported 88% effectiveness using modified *Si Ni San* to treat impotence in 25 men (between 25 and 47 years of age; with 3 months to 2 years history of illness). Of 25 men, the study reported complete recovery in 18 patients, significant improvement in 4 patients, and no improvement in 3 patients. The herbal treatment contained *Si Ni San* plus *Wu Gong* (Scolopendra) as the base formula. *Chuan Lian Zi* (Fructus Toosendan) was added for hypochondriac pain; *Zhi Zi* (Fructus Gardeniae) and *Mu Dan Pi* (Cortex Moutan) for dry mouth with bitter taste; *Yuan Zhi* (Radix Polygalae) and dry-fried *Suan Zao Ren* (Semen Ziziphi Spinosae) for insomnia and excessive dreams; *Ju Hua* (Flos Chrysanthemi) and *Tian Ma* (Rhizoma Gastrodiae) for dizziness, swelling and pain of the head; and *Gou Qi Zi* (Fructus Lycii), *Yi Zhi* (Fructus Alpiniae Oxyphyllae) and *Ba Ji Tian* (Radix Morindae Officinalis) for coldness and pain in the extremities and lower abdomen. The study noted that *Si Ni San* was selected as the herbal formula of choice because impotence in young men is often related to Liver qi stagnation overacting on the Spleen.²¹

TOXICOLOGY

In acute toxicology studies, the LD₅₀ in mice was 413 g/kg via oral ingestion of decoction and 22.4 g/kg via intravenous injection. It was also noted that intravenous injection of the formula was associated with marked changes in electrocardiogram in rats and rabbits. In chronic toxicology studies, daily administration of the formula to rats in decoction at 15 g/kg for 20 days showed no abnormalities in either liver or kidney functions. The researchers also noted that the alcohol extract of the same formula showed more toxicity in both acute and chronic toxicology studies.²²

RELATED FORMULA

Zhi Shi Sháo Yào Sǎn

(Immature Bitter Orange and Peony Powder)

枳實芍藥散

枳实芍药散

Pinyin Name: *Zhi Shi Shao Yao San*

Literal Name: Immature Bitter Orange and Peony Powder

Sì Nì Sǎn (Frigid Extremities Powder)

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

Zhi Shi (Fructus Aurantii Immaturus),
shao (burned) to black
Bai Shao (Radix Paeoniae Alba)

The source text states to grind equal amounts of the ingredients into powder. Take 1 large spoonful of the powder (6-9g) with porridge three times daily.

Zhi Shi Shao Yao San (Immature Bitter Orange and Peony Powder) is indicated for postpartum women with qi and blood stagnation. Clinically, patients may also have interior heat as a result of qi and blood stagnation. Some of the symptoms and signs include abdominal pain, irritability, and abscess or swelling.

Because women are often quite weak physically after delivery, they may not be able to withstand such strong treatment. Therefore, this formula has specific instructions on preparation and administration. *Zhi Shi* (Fructus Aurantii Immaturus) must be burned until brownish-black to temper its strong qi-activating and regulating functions. It is important to take this formula with wheat or rice porridge to nourish and strengthen the Spleen and Stomach to prevent the strong nature of *Zhi Shi* (Fructus Aurantii Immaturus) from injuring the middle *jiao*.

AUTHORS' COMMENTS

Si Ni San (Frigid Extremities Powder) is the foundation of many Liver qi-regulating formulas. Understanding the principles and uses of this formula will facilitate the understanding of other Liver qi-regulating formulas, such as *Zhi Shi Shao Yao San* (Immature Bitter Orange and Peony Powder), *Xiao Yao San* (Rambling Powder), *Jia Wei Xiao Yao San* (Augmented Rambling Powder), and *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver).

Si Ni San (Frigid Extremities Powder) and *Si Ni Tang* (Frigid Extremities Decoction) are two formulas with similar names that must **not** be confused. These two formulas treat different syndromes (qi stagnation vs. yang deficiency) that share similar symptoms (e.g., cold extremities/cold limbs).

- *Si Ni San*: Qi stagnation blocks and prevents yang qi from properly circulating to the extremities. Patients usually experience coldness below the knees and elbows, not in the entire limbs, as seen in patients of yang deficiency. In general, these patients also warm up faster when the

extremities are exposed to heat. Other accompanying signs include abdominal discomfort and pain, and diarrhea. *Si Ni San* contains qi-regulating herbs to harmonize and smooth Liver qi flow and open channel circulation to the extremities. This condition is often seen when pathogenic factors invade from the outside and are trapped in the *shaoyang* channels, coupled with qi stagnation. When yang qi is no longer blocked by qi stagnation, the cold limbs will be resolved.

- *Si Ni Tang*: Yang deficiency with coldness manifests not only in cold extremities, but also in coldness of the whole limbs and all over the body. Comparatively speaking, this coldness is more severe and does not warm up when exposed to heat. Accompanying symptoms include a withered *shen* (spirit), desire to sleep, intolerance of cold, preference for lying in a fetal position, vomiting, abdominal pain, diarrhea with undigested food, and a faint, fine pulse. *Si Ni Tang* contains interior-warming herbs to boost Kidney yang to warm *ming men* (life gate) fire, thus warming the limbs.²³

Si Ni San and *Yi Guan Jian* (Linking Decoction) both treat hypochondriac pain. The difference is as follows:

- *Si Ni San* treats epigastric, abdominal, or hypochondriac pain caused by Liver qi stagnation.
- *Yi Guan Jian* treats hypochondriac pain caused by Kidney and Liver yin deficiencies.²⁴

Chái Hú Shū Gān Sǎn (Bupleurum Powder to Spread the Liver)
柴胡疏肝散

Pinyin Name: Chai Hu Shu Gan San
Literal Name: Bupleurum Powder to Spread the Liver
Alternate Name: Chai Hu Shu Gan Tang (Bupleurum Decoction to Spread the Liver), Bupleurum and Cyperus Combination
Original Source: *Jing Yue Quan Shu* (Collected Treatises of [Zhang] Jing Yue) by Zhang Jie-Bin (Zhang Jing-Yue) in 1624

COMPOSITION

Chai Hu (Radix Bupleuri)	6g
Xiang Fu (Rhizoma Cyperi)	4.5g
Chen Pi (Pericarpium Citri Reticulatae), chao (dry-fried) with vinegar	6g
Zhi Qiao (Fructus Citri Aurantii), chao (dry-fried) with bran	4.5g
Bai Shao (Radix Paeoniae Alba)	4.5g
Chuan Xiong (Rhizoma Chuanxiong)	4.5g
Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	1.5g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 1.5 bowls of water until 80% of the liquid remains. Take the warm, strained decoction before meals.

CHINESE THERAPEUTIC ACTIONS

- 1. Regulates the Liver and promotes qi circulation
- 2. Harmonizes the blood and relieves pain

CLINICAL MANIFESTATIONS

Liver qi stagnation: hypochondriac fullness and pain, alternating spells of chills and fever, fidgeting, irritability, and abdominal pain and cramps. Female patients may experience swollen, painful breasts, dysmenorrhea, irregular menstrual cycle, and/or amenorrhea.

CLINICAL APPLICATIONS

Premenstrual syndrome, cholecystitis, cholelithiasis, hepatitis, gastritis, atrophic gastritis, peptic ulcer disease, irregular menstruation, dysmenorrhea, breast distention

and pain, insomnia, emotional stress, depression, male sexual dysfunction, and orchitis.

EXPLANATION

Chai Hu Shu Gan San (Bupleurum Powder to Spread the Liver) treats Liver qi stagnation. The Liver is responsible for smoothing the qi flow in the body. If Liver qi is stagnant, pain may occur. Hypochondriac pain and chest fullness arise from Liver qi stagnation affecting the Liver channel, which runs through these regions of the body. The qi-smoothing function of the Liver is directly related to one's emotions. If Liver qi is stagnant, emotional disorders such as fidgeting and irritability occur. Liver qi stagnation may cause blood stagnation, resulting in irregular menstruation and dysmenorrhea in women. Pain and distention of the breasts are due to stagnation of Liver qi along the Liver channel. Stagnation of Liver qi (wood element) may also affect the Spleen and Stomach (earth element), causing abdominal pain and cramps.

Chai Hu Shu Gan San (Bupleurum Powder to Spread the Liver)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver qi stagnation	<ul style="list-style-type: none"> • Hypochondriac and chest fullness and pain: Liver qi stagnation along the Liver channel • Abdominal pain and cramps: Liver qi stagnation overacting on the Spleen and Stomach • Fidgeting, irritability: Liver qi stagnation affecting the emotions • Dysmenorrhea, irregular menstruation and/or amenorrhea: Liver qi stagnation affecting menstruation 	<ul style="list-style-type: none"> • Regulates the Liver and promotes qi circulation • Harmonizes the blood and relieves pain 	<ul style="list-style-type: none"> • <i>Chai Hu</i> (Radix Bupleuri) harmonizes and spreads the Liver and relieves Liver qi stagnation. • <i>Xiang Fu</i> (Rhizoma Cyperi) breaks up Liver qi stagnation and relieves pain. • <i>Chen Pi</i> (Pericarpium Citri Reticulatae) and <i>Zhi Qiao</i> (Fructus Aurantii) activate qi circulation and break up qi stagnation. • <i>Bai Shao</i> (Radix Paeoniae Alba) nourishes Liver blood to soften the Liver. • <i>Chuan Xiong</i> (Rhizoma Chuanxiong) activates blood circulation. • <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs and relieves pain.

Chai Hu (Radix Bupleuri) harmonizes and spreads the Liver and relieves Liver qi stagnation. *Xiang Fu* (Rhizoma Cyperi) effectively breaks up Liver qi stagnation and relieve pain. *Chen Pi* (Pericarpium Citri Reticulatae) and *Zhi Qiao* (Fructus Aurantii) activate qi circulation and break up qi stagnation. *Bai Shao* (Radix Paeoniae Alba) nourishes the blood to the Liver to soften the Liver. *Chuan Xiong* (Rhizoma Chuanxiong) activates blood circulation. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs and relieves pain.

MODIFICATIONS

- With belching and acid reflux, add *Hai Piao Xiao* (Endoconcha Sepiae).
- If there is severe stomach pain, add *Yan Hu Suo* (Rhizoma Corydalis) and *Chuan Lian Zi* (Fructus Toosendan).
- With a burning sensation in the stomach and a bitter taste in the mouth, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- For breast distention and pain due to disharmony between the Stomach and Liver, add *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder).
- For liver spots, use *Chai Hu Shu Gan San* internally and apply *Bai Zhi* (Radix Angelicae Dahuricae) topically.
- If the hypochondriac pain is severe, add *Dang Gui* (Radix Angelicae Sinensis), *Yu Jin* (Radix Curcumae), and *Wu Yao* (Radix Linderae).
- For Liver qi stagnation that has turned into Liver fire, add *Zhi Zi* (Fructus Gardeniae) and *Chuan Lian Zi* (Fructus Toosendan).

CAUTIONS / CONTRAINDICATIONS

Chai Hu Shu Gan San is not recommended in patients with yin-deficient heat characterized by signs and symptoms such as a red tongue with little tongue coating, a dry mouth and throat, restlessness, and insomnia. Similarly, this formula should be discontinued in those who develop these symptoms after taking this formula.¹

PHARMACOLOGICAL EFFECTS

1. **Cardiovascular:** Administration of *Chai Hu Shu Gan San* via intravenous injection in rabbits was associated with a marked improvement in blood circulation to various parts of the body, including the brain, heart, and liver.²
2. **Cholagogic:** Administration of *Chai Hu Shu Gan San* in rats was associated with increased production and release of bile acid after one hour.³

CLINICAL STUDIES AND RESEARCH

1. **Cholecystitis:** One study reported complete recovery in 25 of 30 patients with chronic cholecystitis when treated with *Chai Hu Shu Gan San* plus *Qing Pi* (Pericarpium Citri Reticulatae Viride), *Yu Jin* (Radix Curcumae), *Yan Hu Suo* (Rhizoma Corydalis), *Hou Po* (Cortex Magnoliae Officinalis), *Jin Qian Cao* (Herba Lysimachiae), and *Yin Chen* (Herba Artemisiae Scopariae).⁴ In another study, 132 patients with chronic cholecystitis were treated with complete recovery in 39 patients, significant improvement in 46 patients, moderate improvement in 40 patients, and no effect in 7 patients. In addition to *Chai Hu Shu Gan San*, modifications were made by adding *Yu Jin* (Radix Curcumae) and *Jin Ling Zi San* (Melia Toosendan Powder)

Chái Hú Shū Gān Sǎn (Bupleurum Powder to Spread the Liver)

for qi stagnation; *Jin Qian Cao* (Herba *Lysimachiae*), *Hu Zhang* (Rhizoma et Radix *Polygoni Cuspidati*), and *Huang Qin* (Radix *Scutellariae*) for damp-heat. Electroacupuncture and herbal injection at acupuncture points were performed, too.⁵

2. **Cholelithiasis and bile duct infection:** One hundred and sixteen patients with gallstones and infection of the bile duct were treated with complete recovery in 27 patients, significant improvement in 68 patients, moderate improvement in 16 patients, and no benefit in 5 patients. The herbal formula was modified from *Chai Hu Shu Gan San*, with addition of *Jin Qian Cao* (Herba *Lysimachiae*), *Da Huang* (Radix et Rhizoma *Rhei*), *Yu Jin* (Radix *Curcumae*), *Shan Zha* (Fructus *Crataegi*), *Huang Qin* (Radix *Scutellariae*), *Qing Pi* (Pericarpium *Citri Reticulatae Viride*), and *Ji Nei Jin* (Endothelium *Corneum Gigeria Galli*), and elimination of *Chuan Xiong* (Rhizoma *Chuanxiong*).⁶
3. **Hepatitis B:** Sixty patients with chronic hepatitis B were treated with good results using modified *Chai Hu Shu Gan San*. The herbal formula contained *Chai Hu* (Radix *Bupleuri*) 10g, dry-fried *Bai Zhu* (Rhizoma *Atractylodis Macrocephalae*) 10g, *Zhi Shi* (Fructus *Aurantii Immaturus*) 10g, *Fu Ling* (Poria) 12g, *Yu Jin* (Radix *Curcumae*) 12g, *Bai Jiang Cao* (Herba cum Radice *Patriniae*) 12g, *Dan Shen* (Radix et Rhizoma *Salviae Miltiorrhizae*) 20g, *Bai Hua She She Cao* (Herba *Hedyotis*) 15g, *Chi Shao* (Radix *Paeoniae Rubra*) 15g, and others as needed. The herbs were given in decoction daily 1 to 2 hours after a meal. Of 60 patients, the study reported recovery in 12 patients, improvement in 46 patients, and no improvement in 2 patients. The overall rate of effectiveness was 96%.⁷
4. **Atrophic gastritis:** Thirty-nine patients with atrophic gastritis reported good results using modified *Chai Hu Shu Gan San*. The herbal formula contained *Chai Hu* (Radix *Bupleuri*) 12g, *Zhi Qiao* (Fructus *Aurantii*) 12g, *Xiang Fu* (Rhizoma *Cyperii*) 12g, *Bai Shao* (Radix *Paeoniae Alba*) 15g, *Chuan Xiong* (Rhizoma *Chuanxiong*) 10g, *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*) 6g, *Yan Hu Suo* (Rhizoma *Corydalis*) 10g, *Chuan Lian Zi* (Fructus *Toosendan*) 6g, *Mu Xiang* (Radix *Aucklandiae*) 6g, *Dan Shen* (Radix et Rhizoma *Salviae Miltiorrhizae*) 15g, *Yu Jin* (Radix *Curcumae*) 15g, *Ban Xia* (Rhizoma *Pinelliae*) 10g, *Chen Pi* (Pericarpium *Citri Reticulatae*) 10g, charred *Shan Zha* (Fructus *Crataegi*) 15g, charred *Shen Qu* (Massa *Fermentata*) 15g, and charred *Mai Ya* (Fructus *Hordei Germinatus*) 15g. The study reported complete recovery in 23 of 39 patients.⁸
5. **Peptic ulcer disease:** Use of modified *Chai Hu Shu Gan San* was associated with beneficial effects in treating gastric or duodenal ulcers. The herbal formula was modified from *Chai Hu Shu Gan San*, with the removal of *Chuan Xiong* (Rhizoma *Chuanxiong*), and the addition of *Bai Ji* (Rhizoma *Bletillae*), *Sha Ren* (Fructus *Amomi*), *Xuan Shen* (Radix *Scrophulariae*), and *Pu Gong Ying* (Herba *Taraxaci*). The duration of treatment ranged from 3 to 12 packs of herbs.⁹
6. **Male sexual dysfunction:** Use of modified *Chai Hu Shu Gan San* was effective in treating 17 of 19 patients who were unable to ejaculate. The herbal treatment contained *Chai Hu Shu Gan San* plus *Ju He* (Semen *Citri Reticulatae*), *Shi Chang Pu* (Rhizoma *Acori Tatarinowii*), *Chuan Shan Jia* (Squama *Manis*), *Mu Tong* (Caulis *Akebiae*), *Hu Po* (Succinum), and others as needed.¹⁰
7. **Orchitis:** One study reported complete recovery in 32 of 37 patients with orchitis, when treated with an herbal formula that contained *Chai Hu Shu Gan San* plus *Huang Qin* (Radix *Scutellariae*), *Wu Yao* (Radix *Linderae*), *Tao Ren* (Semen *Persicae*), *Xiao Hui Xiang* (Fructus *Foeniculi*), *Ju He* (Semen *Citri Reticulatae*), *Bai Jiang Cao* (Herba cum Radice *Patriniae*), and others.¹¹
8. **Breast distention and pain:** Complete relief of breast distention and pain was reported in 21 of 24 patients who were treated with modified *Chai Hu Shu Gan San*. The herbal formula contained *Chai Hu* (Radix *Bupleuri*) 12g, *Bai Shao* (Radix *Paeoniae Alba*) 12g, vinegar-fried *Chen Pi* (Pericarpium *Citri Reticulatae*) 10g, *Chuan Xiong* (Rhizoma *Chuanxiong*) 10g, *Xiang Fu* (Rhizoma *Cyperii*) 10g, dry-fried *Zhi Qiao* (Fructus *Aurantii*) 10g, *Yu Jin* (Radix *Curcumae*) 10g, *Tong Cao* (Medulla *Tetrapanacis*) 10g, *Bai Zhi* (Radix *Angelicae Dahuricae*) 10g, processed *Ru Xiang* (Gummi *Olibanum*) 10g, processed *Mo Yao* (Myrrha) 10g, *Pu Gong Ying* (Herba *Taraxaci*) 15g, and *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*) 6g. The treatment protocol was to cook the herbs in water, and administer the decoction in three equally-divided doses daily, for 7 days per course of treatment.¹²
9. **Insomnia:** One study reported 96.7% effectiveness using modified *Chai Hu Shu Gan San* to treat patients with stubborn insomnia. The treatment protocol was to use this formula as the base, with the addition of *Chi Shao* (Radix *Paeoniae Rubra*) and *Dan Shen* (Radix et Rhizoma *Salviae Miltiorrhizae*) for blood stagnation; *Ju Hua* (Flos *Chrysanthemi*) and *Zhi Zi* (Fructus *Gardeniae*) for Liver excess; and *Dan Nan Xing* (Arisaema cum Bile) and *Shi Chang Pu* (Rhizoma *Acori Tatarinowii*) for phlegm accumulation. Of 30 patients, the study reported complete recovery in 26 patients, improvement in 3 patients, and no effect in one patient.¹³

AUTHORS' COMMENTS

Chai Hu Shu Gan San is one of the most commonly used formulas for treating Liver qi stagnation characterized by hypochondriac pain and alternating chills and fever. It

Chái Hú Shū Gān Sǎn (Bupleurum Powder to Spread the Liver)

also treats various types of menstrual disorders caused by Liver qi stagnation.

Chai Hu Shu Gan San is a variation of *Si Ni San* (Frigid Extremities Powder). Although the herbs in these two formulas are similar, their doses and emphases are different.

- *Si Ni San* treats both Spleen qi deficiency and obstructed circulation of Liver and Gallbladder qi. *Chai Hu* (Radix Bupleuri) and *Zhi Shi* (Fructus Aurantii Immaturus) are the only qi-moving herbs in this formula. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) is used at a high dose to tonify qi and strengthen the Spleen.
- *Chai Hu Shu Gan San* mainly treats Liver qi stagnation, and contains many qi- and blood-moving herb, such as *Chai Hu* (Radix Bupleuri), *Zhi Qiao* (Fructus Aurantii), *Chen Pi* (Pericarpium Citri Reticulatae), *Chuan Xiong* (Rhizoma Chuanxiong), and *Xiang Fu* (Rhizoma Cyperi). *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) is used at a low dose for harmonizing purposes.

Shū Gān Tāng (Spread the Liver Decoction)

疏肝湯

疏肝汤

Pinyin Name: *Shu Gan Tang*

Literal Name: Spread the Liver Decoction

Alternate Name: Bupleurum and Evodia Combination

Original Source: *Wan Bing Hui Chun* (Restoration of Health from the Myriad Diseases) by Gong Ting-Xian in 1587

COMPOSITION

<i>Chai Hu</i> (Radix Bupleuri)	3g
<i>Qing Pi</i> (Pericarpium Citri Reticulatae Viride)	3g
<i>Zhi Qiao</i> (Fructus Aurantii)	3g
<i>Tao Ren</i> (Semen Persicae)	3g
<i>Hong Hua</i> (Flos Carthami)	1.5g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	3g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	2.1g
<i>Bai Shao</i> (Radix Paeoniae Alba)	2.1g
<i>Huang Lian</i> (Rhizoma Coptidis), <i>chao</i> (dry-fried)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text specifies to first dry-fry *Huang Lian* (Rhizoma Coptidis) with the juice of *Wu Zhu Yu* (Fructus Evodiae). Then grind all of the ingredients into powder and cook in water to make a decoction. Take the warm, strained decoction after meals.

CHINESE THERAPEUTIC ACTIONS

1. Regulates blood circulation and eliminates blood stasis
2. Opens the channels and collaterals and relieves pain

Shū Gān Tāng (Spread the Liver Decoction)

CLINICAL MANIFESTATIONS

Liver qi stagnation with blood stasis: hypochondriac fullness and pain, and alternating spells of fever and chills.

CLINICAL APPLICATIONS

Pain in the hypochondrium, intercostal neuralgia, intercostal pain, and pancreatitis.

EXPLANATION

Shu Gan Tang (Spread the Liver Decoction) treats hypochondriac pain caused by Liver qi stagnation with blood stasis. The classic text describes this condition as being characterized by fullness and pain in the hypochondrium. This condition may also occur secondary to internal or external injuries. Internal injuries include pancreatitis, and external injuries include trauma and contusion.

Because the fundamental disorder is Liver qi stagnation, *Chai Hu* (Radix Bupleuri) is used to treat the *shaoyang* syndrome and to spread Liver qi. *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Zhi Qiao* (Fructus Aurantii) regulate qi, and together with *Chai Hu* (Radix Bupleuri), relieve hypochondriac pain and fullness. Since qi and

blood stagnations often occur together, blood movers are added to enhance the overall effect. *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) move the blood, eliminate blood stagnation, and relieve pain. *Dang Gui* (Radix Angelicae Sinensis) nourishes the blood and, with *Chuan Xiong* (Rhizoma Chuanxiong), moves the blood. *Dang Gui* (Radix Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba) soften the Liver by tonifying yin and blood. *Bai Shao* (Radix Paeoniae Alba) is one of the key herbs used to relax the muscles and relieve spasms and pain. Because Liver qi stagnation can easily turn into Liver heat and fire, *Huang Lian* (Rhizoma Coptidis) clears heat and fire. Lastly, *Wu Zhu Yu* (Fructus Evodiae) acts as a guiding herb to lead the therapeutic effect of the entire formula to the affected area.

AUTHORS’ COMMENTS

Chai Hu Shu Gan San (Bupleurum Powder to Spread the Liver) and *Shu Gan Tang* both treat Liver qi stagnation with blood stasis.

- *Chai Hu Shu Gan San* places more emphasis on activating qi circulation.
- *Shu Gan Tang* focuses more on invigorating blood circulation and eliminating blood stasis.

Shu Gan Tang (Spread the Liver Decoction)

CHINESE THERAPEUTIC ACTIONS

Clears heat from the Liver, Gallbladder, and *San Jiao* channels

CLINICAL MANIFESTATIONS

Heat in the Liver, Gallbladder, and *San Jiao* channels: fever, chills, epistaxis, itching, loss of hearing, swelling of the lymph nodes, and formation of cellulitis.

CLINICAL APPLICATIONS

Lymphadenitis, adenoids, tonsillitis, measles, systemic lupus erythematosus, infectious viral hepatitis, dysmenorrhea, and chronic uteritis.

EXPLANATION

Chai Hu Qing Gan Tang (Bupleurum Decoction to Clear the Liver) clears heat in the Liver, Gallbladder, and *San Jiao* channels, characterized by symptoms such as fever, chills, epistaxis, loss of hearing, and swelling of the lymph nodes. Clinically, this formula is especially effective for infants and young children who are skinny, malnourished, and have a purplish-to-black facial complexion. Long-term

use of this formula improves the physical condition of such patients and changes their underlying body constitution.

This formula is a modified combination of *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity) and *Si Wu Tang* (Four-Substance Decoction). *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), *Huang Bo* (Cortex Phellodendri Chinensis), and *Zhi Zi* (Fructus Gardeniae), the four herbs in *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), eliminate excess fire in the upper, middle, and lower *jiaos*. *Di Huang* (Radix Rehmanniae), *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Xiong* (Rhizoma Chuanxiong), four herbs that follow the principles of *Si Wu Tang* (Four-Substance Decoction), cool the heat and moisten dryness in the blood. *Chai Hu* (Radix Bupleuri) is added as a channel-guiding herb to direct the formula to the Liver and Gallbladder. *Jie Geng* (Radix Platycodonis) clears heat from the head, eyes, throat, and chest. *Niu Bang Zi* (Fructus Arctii) and *Lian Qiao* (Fructus Forsythiae) clear heat from the Lung, benefit the throat, and dispel heat from the skin. *Tian Hua Fen* (Radix Trichosanthis) promotes the secretion of body fluids, reduces swelling, and discharges pus. *Bo He* (Herba Menthae) clears heat and relieves Liver qi stagnation. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

Chái Hú Qīng Gān Tāng (Bupleurum Decoction to Clear the Liver)

Chai Hu Qing Gan Tang (Bupleurum Decoction to Clear the Liver)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Heat in the Liver, Gallbladder, and San Jiao channels	Fever, chills, epistaxis, loss of hearing, and swelling of the lymph nodes: heat in the Liver, Gallbladder, and San Jiao channels	Clears heat from the Liver, Gallbladder, and San Jiao channels	<ul style="list-style-type: none">• <i>Huang Qin</i> (Radix Scutellariae), <i>Huang Lian</i> (Rhizoma Coptidis), <i>Huang Bo</i> (Cortex Phellodendri Chinensis), and <i>Zhi Zi</i> (Fructus Gardeniae) clear heat and purge fire from the entire body.• <i>Di Huang</i> (Radix Rehmanniae), <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Bai Shao</i> (Radix Paeoniae Alba), and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) tonify the blood and activate blood circulation.• <i>Chai Hu</i> (Radix Bupleuri) guides the formula to the Liver and Gallbladder.• <i>Jie Geng</i> (Radix Platycodonis) clears heat from the head, eyes, throat, and chest.• <i>Niu Bang Zi</i> (Fructus Arctii) and <i>Lian Qiao</i> (Fructus Forsythiae) clear heat from the Lung, benefit the throat, and dispel heat from the skin.• <i>Tian Hua Fen</i> (Radix Trichosanthis) promotes the secretion of body fluids, reduces swelling, and discharges pus.• <i>Bo He</i> (Herba Menthae) clears heat and relieves Liver qi stagnation.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

MODIFICATIONS

If accompanied by wind-heat symptoms, add *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Jing Jie* (Herba Schizonepetae).

PHARMACOLOGICAL EFFECTS

Hepatoprotective and choleretic: Administration of *Chai Hu Qing Gan Tang* showed beneficial effects on the liver and gallbladder in rats. It had protective effects against experimental cholestasis induced by carbon tetrachloride or alpha-naphthylisothiocyanate, and a protective effect against the alterations of serum components, such as SGOT, SGPT, alkaline phosphatase and the concentration of serum bilirubin. The study concluded that *Chai Hu Qing Gan Tang* had choleretic effect to treat cholestasis and hepatoprotective effect to prevent liver parenchymal injury.¹

DOSAGE / PREPARATION / ADMINISTRATION CLINICAL MANIFESTATIONS

Prepare the ingredients as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Calms the Liver and clears Liver heat
2. Nourishes Liver blood and strengthens the Spleen

Liver blood deficiency accompanied by Liver heat in infants and children: fever, being easily frightened and scared, muscle spasms and contraction, clenching of the teeth, nervousness, irritability, restlessness, insomnia, epilepsy, and alternating spells of fever and chills. Patients may also experience vomiting of saliva and sputum, and epigastric and abdominal fullness.

Yi Gān Sǎn (Restrain the Liver Powder)

CLINICAL APPLICATIONS

Neurosis, neurasthenia, hysteria, insomnia, night crying in children, epilepsy, and menopausal disturbances.

EXPLANATION

Yi Gan San (Restrain the Liver Powder) treats Liver blood deficiency accompanied by Liver heat in infants and children. Liver heat rising leads to emotional instability, causing clinical manifestations such as irritability, bad temper, excitability, insomnia, nervousness, and epilepsy. Clinically, patients will show symptoms of deficiency and excess simultaneously. Liver blood deficiency is characterized by muscle spasms and contraction, clenching of the teeth, being easily frightened or scared; while the excess is characterized by nervousness, irritability, and restlessness. In addition, if the Liver overacts on the Spleen and Stomach, patients will show symptoms such as epigastric and abdominal fullness, lack of appetite, and vomiting of saliva and sputum.

To address the complicated situation of deficiency and excess, herbs are selected to nourish the blood, clear Liver fire, and harmonize the Liver, Spleen, and Stomach. The Liver must first be calmed and Liver heat cleared. Liver blood should also be nourished and the Spleen strengthened to prevent wood from overacting on earth. This formula contains *Chai Hu* (Radix Bupleuri) and *Gou Teng* (Ramulus Uncariae cum Uncis) to calm the Liver and clear Liver heat. *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong) nourish Liver blood and soften the Liver. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria) strengthen the Spleen. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

MODIFICATIONS

- With headache and dizziness, add *Bai Shao* (Radix Paeoniae Alba) and *Huang Lian* (Rhizoma Coptidis).
- For both qi and blood deficiencies, add *Ren Shen* (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), *Bai Shao* (Radix Paeoniae Alba), *Shu Di Huang* (Radix Rehmanniae Praeparata), and *Di Huang* (Radix Rehmanniae).
- When there is a feeling of oppression and fullness in the abdomen, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis).
- With restless sleep, irritability and insomnia, add *Suan Zao Ren* (Semen Ziziphi Spinosa) and *Bai Zi Ren* (Semen Platycladi).
- With vomiting of sputum and saliva, add *Wen Dan Tang* (Warm the Gallbladder Decoction).
- If accompanied by dizziness, headache, and a disturbed *shen* (spirit), add *Bai Shao* (Radix Paeoniae Alba) and *Suan Zao Ren* (Semen Ziziphi Spinosa).

PHARMACOLOGICAL EFFECTS

Antidepressive and antinociceptive: Administration of *Yi Gan San*, *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) and *Chai Hu Jia Long Gu Mu Li Tang* (Bupleurum plus Dragon Bone and Oyster Shell Decoction) for 14 consecutive days showed both antidepressive and antinociceptive properties in mice.¹

AUTHORS' COMMENTS

Yi Gan San was originally formulated to treat Liver blood deficiency accompanied by Liver heat in infants and children. Today, it is commonly used to treat adults who lead stressful lifestyles, constantly thinking about work or other issues, and complaining of insomnia or difficulty in falling asleep. This formula can be served before bedtime to tranquilize the *shen* (spirit) and help patients fall asleep.

Yi Gan San (Restrain the Liver Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver blood deficiency accompanied by Liver heat rising	<ul style="list-style-type: none"> • Emotional instability, irritability, bad temper, excitability, insomnia and nervousness: Liver heat rising • Muscle spasms and contraction, clenching of teeth, easily frightened or scared: Liver blood deficiency • Epigastric and abdominal fullness, lack of appetite, and vomiting of saliva and sputum: Liver overacting on the Spleen and Stomach 	<ul style="list-style-type: none"> • Calms the Liver and clears Liver heat • Nourishes Liver blood and strengthens the Spleen 	<ul style="list-style-type: none"> • <i>Chai Hu</i> (Radix Bupleuri) and <i>Gou Teng</i> (Ramulus Uncariae cum Uncis) calm the Liver and clear Liver heat. • <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) nourish Liver blood and soften the Liver. • <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) and <i>Fu Ling</i> (Poria) strengthen the Spleen. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

Yì Gān Sǎn (Restrain the Liver Powder)

According to Dr. Chang Wei-Yen, *Yi Gan San* can be used with *Yang Xin Tang* (Nourish the Heart Decoction), *Zhi Gan Cao Tang* (Honey-Fried Licorice Decoction), and *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart) to treat palpitations and tachycardia.

Xiāo Yáo Sǎn (Rambling Powder)

逍遙散
逍遙散

Pinyin Name: *Xiao Yao San*

Literal Name: Rambling Powder

Alternate Names: *Hsiao Yao San*, Merry Life Powder, Bupleurum and Tang-kuei Formula, Tangkuei and Bupleurum Formula

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Chai Hu</i> (Radix Bupleuri)	30g [9g]
<i>Dang Gui</i> (Radix Angelicae Sinensis), <i>cuo</i> (grated) and <i>chao</i> (dry-fried) slightly	30g [9g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	30g [9g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	30g [9g]
<i>Fu Ling</i> (Poria)	30g [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	15g [4.5g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients coarsely and then cook 6g of the powdered herbs with small amounts of roasted *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Bo He* (Herba Menthae) in 1 large bowl of water until the liquid is reduced to 70%. Take the hot, strained decoction any time during the day. Today, this formula may be prepared as a decoction with the doses suggested in brackets, with 9g of roasted *Sheng Jiang* (Rhizoma Zingiberis Recens) and 4.5g of *Bo He* (Herba Menthae).

Note: There are two important notes on the preparation and dosing of herbs in this formula. *Sheng Jiang* (Rhizoma Zingiberis Recens) should be dry-roasted to decrease its acrid property and exterior-releasing effect. *Bo He* (Herba Menthae) should be kept at a low dose to clear Liver qi stagnation, since a high dose may produce an undesirable exterior-releasing effect. If not prepared properly, these two herbs will act as exterior-releasing herbs and further damage yin and blood.

CHINESE THERAPEUTIC ACTIONS

1. Soothes the Liver and relieves qi stagnation
2. Strengthens the Spleen
3. Nourishes the blood

CLINICAL MANIFESTATIONS

Liver qi stagnation with blood deficiency and Spleen deficiency: bilateral hypochondriac pain, alternating fever and chills, headache, vertigo, a dry mouth and throat, lassitude, lack of appetite, premenstrual syndrome (PMS) with breast distention, and a wiry, deficient pulse.

CLINICAL APPLICATIONS

Psychiatric disorders, emotional distress, anxiety, stress, neurasthenia, depression, neurosis, premenstrual syndrome, menstrual irregularity, menstrual disturbance, menstrual pain and cramps, functional uterine bleeding, menopause, hyperplasia of mammary glands, breast proliferation disease, fibrocystic breasts, lactation difficulties, oophoritic cyst, pelvic inflammatory disease, mastadenoma, gynecomastia, orchitis, prostatitis, sexual dysfunction,

Xiāo Yáo Sǎn (Rambling Powder)

infertility, impotence, hepatitis, liver cirrhosis, cholecystitis, anorexia, chronic gastritis, gastric ulcer, duodenal ulcer, irritable bowel syndrome, hyperlipidemia, pleurisy, optic nerve atrophy, central retinitis, and chloasma.

EXPLANATION

Xiao Yao San (Rambling Powder) treats Liver qi stagnation with blood deficiency and Spleen deficiency. The Liver stores blood and is responsible for dispersing and smoothing the qi flow of the body. Emotional distress, consumption of yin and blood, and malnourishment of the Liver can all cause Liver qi to become stagnant and impair the Liver's functioning. When Liver qi becomes stagnated, it will cause symptoms such as hypochondriac pain, headache, alternating spells of fever and chills, and vertigo. Liver qi stagnation contributes to yin and blood deficiencies, resulting in a dry mouth and dry throat. Liver qi stagnation overacts on a deficient Spleen, causing lassitude and lack of appetite. Lastly, Liver qi stagnation and blood deficiency affect menstruation, causing premenstrual syndrome (PMS) with breast distention.

In order to treat this syndrome, not only does Liver qi stagnation have to be dispersed, but it is also necessary to nourish Liver blood to soften the Liver. *Chai Hu* (Radix Bupleuri) smoothes Liver qi and disperses qi stagnation. However, *Chai Hu* (Radix Bupleuri) is drying in nature, and may further damage yin and blood. Therefore, herbs that nourish yin and tonify blood must be added. *Dang Gui* (Radix Angelicae Sinensis) is sweet, and tonifies the blood and relieves pain. *Bai Shao* (Radix Paeoniae Alba) nourishes the blood to soften the Liver to relieve distention and pain. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae)

and *Fu Ling* (Poria) tonify the Spleen to help the generation of blood. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) supplements qi and helps *Bai Shao* (Radix Paeoniae Alba) soften the Liver to relieve pain. Roasted *Sheng Jiang* (Rhizoma Zingiberis Recens) strongly warms and harmonizes the Stomach. A small amount of *Bo He* (Herba Menthae) helps *Chai Hu* (Radix Bupleuri) relieve Liver stagnation and clear any heat generated from qi stagnation.

MODIFICATIONS

- With irritability, a short-temper, and other signs of heat, add *Mu Dan Pi* (Cortex Moutan) and *Zhi Zi* (Fructus Gardeniae).
- When there is pain in the chest and hypochondriac region, add *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae).
- With poor appetite, add *Shen Qu* (Massa Fermentata) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).
- With vertigo and headache, add *Chuan Xiong* (Rhizoma Chuanxiong) and *Bai Zhi* (Radix Angelicae Dahuricae).
- If accompanied by qi deficiency, add *Huang Qi* (Radix Astragali) and *Ren Shen* (Radix et Rhizoma Ginseng).
- If accompanied by blood deficiency, add *Shu Di Huang* (Radix Rehmanniae Praeparata).
- With menstrual pain and cramps, add *Yan Hu Suo* (Rhizoma Corydalis), *Xiang Fu* (Rhizoma Cyperi) and *Mu Xiang* (Radix Aucklandiae).
- For irregular menstruation, add *Yi Mu Cao* (Herba Leonuri) and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae).
- When there is severe breast distention, add *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver).

Xiao Yao San (Rambling Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver qi stagnation with blood deficiency and Spleen deficiency	<ul style="list-style-type: none">• Bilateral hypochondriac pain, headache, vertigo, alternating spells of fever and chills: Liver qi stagnation• Dry mouth and dry throat: yin and blood deficiencies• Lassitude and lack of appetite: Spleen deficiency	<ul style="list-style-type: none">• Soothes the Liver and relieves qi stagnation• Strengthens the Spleen• Nourishes the blood	<ul style="list-style-type: none">• <i>Chai Hu</i> (Radix Bupleuri) smoothes the Liver qi and disperses the qi stagnation.• <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Bai Shao</i> (Radix Paeoniae Alba) tonify blood, nourish yin, and soften the Liver.• <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) and <i>Fu Ling</i> (Poria) tonify the Spleen to help the generation of blood.• Roasted <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) warms and harmonizes the Stomach.• <i>Bo He</i> (Herba Menthae) helps <i>Chai Hu</i> to relieve Liver qi stagnation and clear heat.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

Xiāo Yáo Sǎn (Rambling Powder)

- With insomnia due to stress and anxiety, add *Suan Zao Ren* (Semen Ziziphi Spinosae) and *Zhen Zhu Mu* (Concha Margaritiferae).
- With dizziness or vertigo, add *Gou Teng* (Ramulus Uncariae cum Uncis) and *Ju Hua* (Flos Chrysanthemi).

CAUTIONS / CONTRAINDICATIONS

- *Xiao Yao San* should be used with caution during pregnancy.
- This formula should be used with caution in cases of qi stagnation with underlying Liver and Kidney yin deficiencies, characterized by symptoms such as hypochondriac pain, chest and abdominal fullness and distention, a dry mouth and throat, a red tongue with little tongue coating, and a deep pulse.¹

PHARMACOLOGICAL EFFECTS

1. **Central nervous system:** Administration of *Xiao Yao San* in mice and rats was associated with a mild inhibitory effect on the central nervous system to relieve pain and decrease the risk of seizures and epilepsy.²
2. **Hepatoprotective:** Administration of this formula was associated with marked hepatoprotective effect against carbon tetrachloride-induced liver damages. The formula reduced damage to liver cells, lowered liver enzymes, and promoted the generation of new liver cells.³
3. **Endocrine:** Administration of the formula was associated with an increase in weight of the uterus in laboratory animals. The effect was voided in animals whose ovaries had been surgically removed. The study suggested that the formula has an endocrine effect as it stimulated the ovary and increased the weight of the uterus.⁴
4. **Gastrointestinal:** Administration of the formula was associated with increased gastric acid production in mice and relaxation of the smooth muscles of the intestines in rabbits.⁵

CLINICAL STUDIES AND RESEARCH

1. **Schizophrenia:** Fourteen cases of schizophrenia characterized by Liver qi stagnation were treated with modified *Xiao Yao San* with satisfactory results.⁶
2. **Affective psychosis:** Twenty-six cases of affective psychosis were treated with modified *Xiao Yao San* with significant improvement in 16 cases, moderate improvement in 7 cases, and no benefit in 3 cases.⁷
3. **Depression:** One study reported 93.3% effectiveness using modified *Xiao Yao San* to treat depression in 60 patients. In addition to this formula, modifications included addition of *Qu Mai* (Herba Dianthi) and *Bian Xu* (Herba Polygoni Avicularis) for damp-heat in the lower jiao; *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis) for Kidney yin

deficiency; *Shou Wu Teng* (Caulis Polygoni Multiflori) and *He Huan Pi* (Cortex Albiziae) for Heart yin deficiency; and *Xian Mao* (Rhizoma Curculiginis) and *Yin Yang Huo* (Herba Epimedii) for Kidney yang deficiency. The patients also received counseling. Of 60 patients, the study reported complete recovery in 32 patients, significant improvement in 16 patients, moderate improvement in 8 patients, and no improvement in 4 patients.⁸

4. **Neurosis:** One study reported 96% effectiveness using modified *Xiao Yao San* to treat 47 patients with neurosis. The herbal treatment contained *Xiao Yao San* plus *Yuan Zhi* (Radix Polygalae), *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and others as the base formula. Modifications included addition of *Suan Zao Ren* (Semen Ziziphi Spinosae), *Bai Zi Ren* (Semen Platycladi) and *Shou Wu Teng* (Caulis Polygoni Multiflori) for palpitations and insomnia; *Zhe Shi* (Haematitum), *Jue Ming Zi* (Semen Cassiae) and *Di Long* (Pheretima) for Liver yang rising; *Sha Ren* (Fructus Amomi), *Shen Qu* (Massa Fermentata) and charred *Shan Zha* (Fructus Crataegi) for decreased food intake; *Gua Lou* (Fructus Trichosanthis), *Xie Bai* (Bulbus Allii Macrostemonis) and *Fo Shou* (Fructus Citri Sarcodactylis) for feeling of chest oppression; *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci) and *Gou Qi Zi* (Fructus Lycii) for Kidney deficiency with low back soreness; *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis) and *Shu Di Huang* (Radix Rehmanniae Praeparata) for qi and blood deficiencies; *Dan Nan Xing* (Arisaema cum Bile), *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae) for more phlegm; and *Di Long* (Pheretima) and *Gui Zhi* (Ramulus Cinnamomi) for numbness of the fingers. Of 47 patients, the study reported complete recovery in 31 patients, improvement in 14 patients, and no improvement in 2 patients.⁹
5. **Premenstrual syndrome (PMS):** *Xiao Yao San* has been confirmed in many studies to successfully treat PMS. Use of the formula in 32 women was associated with 96.88% effectiveness.¹⁰ In another study, use of *Xiao Yao San* plus *Xiang Fu* (Rhizoma Cyperi) and *Yu Jin* (Radix Curcumae) was associated with 98% effectiveness in treating 62 women with PMS characterized by edema, breast distention, headache, and emotional disturbance.¹¹ Another study reported 93.3% effectiveness in treating PMS characterized by Liver stagnation turning into heat. The herbal treatment contained *Xiao Yao San* plus *Gou Teng* (Ramulus Uncariae cum Uncis), *Mu Dan Pi* (Cortex Moutan), *Qing Pi* (Pericarpium Citri Reticulatae Viride) and others.¹²
6. **Menstrual pain:** Forty-eight patients with menstrual pain were treated with modified *Xiao Yao San* with significant improvement in 30 patients, moderate improvement in 12 patients, and no effect in 6 patients. The overall effective rate reported was 87.5%. The ages of the patients

Xiāo Yáo Sǎn (Rambling Powder)

ranged from 15 to 45 years. The formula contained *Chai Hu* (Radix Bupleuri) 10g, *Yè Ju Hua* (Flos Chrysanthemi Indici) 10g, *Bo He* (Herba Menthae) 15g, *Dang Gui* (Radix Angelicae Sinensis) 15g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 15g, *Yan Hu Suo* (Rhizoma Corydalis) 15g, *Ba Ji Tian* (Radix Morindae Officinalis) 15g, *Fu Ling* (Poria) 20g, *Yi Mu Cao* (Herba Leonuri) 20g, *Liu Ji Nu* (Herba Artemisiae Anomalaе) 20g, *Di Huang* (Radix Rehmanniae) 25g, *Bai Shao* (Radix Paeoniae Alba) 25g, *Mian Ma Guan Zhong* (Rhizoma Dryopteridis Crassirhizomatis) 60g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 5g.¹³

7. **Irregular menstruation:** One study reported 91.4% effectiveness using modified *Xiao Yao San* to treat various types of irregular menstruation. In addition to the base formula, *Mu Dan Pi* (Cortex Moutan) and *Zhi Zi* (Fructus Gardeniae) were added for early menstruation; *Xiang Fu* (Rhizoma Cyperi), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *San Qi* (Radix et Rhizoma Notoginseng) were added for late menstruation; *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Yi Mu Cao* (Herba Leonuri) were added for unpredictable (early or late) menstruation; charred *Pu Huang* (Pollen Typhae) and *Ze Lan* (Herba Lycopi) for hypermenorrhea; *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) for hypomenorrhea; and charred *Qian Cao* (Radix et Rhizoma Rubiae) and *Hai Piao Xiao* (Endoconcha Sepiae) for prolonged menstruation. Of 58 women, the study reported significant improvement in 45 patients, moderate improvement in 8 patients, and no improvement in 5 patients.¹⁴
8. **Menopause:** One hundred and fifty-eight patients with menopausal symptoms were treated with modified *Xiao Yao San* with significant improvement in 103 patients, moderate improvement in 51 patients, and no effect in 4 patients. The overall effectiveness was 97.5%. The formula contained *Xian Mao* (Rhizoma Curculiginis) 15g, *Yin Yang Huo* (Herba Epimedii) 10g, *Dang Gui* (Radix Angelicae Sinensis) 10g, *Ba Ji Tian* (Radix Morindae Officinalis) 10g, *Chai Hu* (Radix Bupleuri) 10g, *Fu Ling* (Poria) 10g, *Bai Shao* (Radix Paeoniae Alba) 10g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 10g, *Gui Zhi* (Ramulus Cinnamomi) 10g, *Zhi Mu* (Rhizoma Anemarrhenae) 3g, *Huang Bo* (Cortex Phellodendri Chinensis) 3g, *Bo He* (Herba Menthae) 3g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 3g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, and *Da Zao* (Fructus Jujubae) 2 pieces.¹⁵
9. **Hyperplasia of mammary glands:** One hundred and thirty-two patients with hyperplasia of mammary glands were treated with modified *Xiao Yao San* with significant improvement in 103 patients, moderate improvement in 20 patients, mild improvement in 6 patients, and no effect in 3 patients. The overall effectiveness was 97.7%.

The treatment protocol was to administer 9g of herbs in pills twice daily for 20 days per course of treatment, for a total of 2 courses. The formula was modified depending on the condition of the patient. *Wang Bu Liu Xing* (Semen Vaccariae), *Ji Xue Teng* (Caulis Spatholobi), *Xiang Fu* (Rhizoma Cyperi), *Gua Lou* (Fructus Trichosanthis), and *Chi Shao* (Radix Paeoniae Rubra) were added for swelling and pain of the breast before menstruation. *Xia Ku Cao* (Spica Prunellae), *Tian Dong* (Radix Asparagi), *Ju He* (Semen Citri Reticulatae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Ru Xiang* (Gummi Olibanum), and *Mo Yao* (Myrrha) were added for swelling and pain of the breast after menstruation.¹⁶

10. **Breast proliferation disease:** One study reported 96.1% effectiveness in the treatment of breast proliferation disease in 51 patients using modified *Xiao Yao San* and *Er Chen Tang* (Two-Cured Decoction) for 3 months. This study demonstrated marked changes to the hormones as follows: very significant decline of saliva estradiol (P less than 0.001), significant decline of saliva progesterone (P less than 0.05), very significant decline of plasma prolactin (P less than 0.005), and insignificant changes of saliva testosterone. The researchers stated that these herbs could regulate the endocrine system to restore normal follicle function.¹⁷
11. **Mastadenoma:** One study reported marked success in the treatment of benign tumor of the breast in 174 women. The herbal prescription contained *Xiao Yao San* plus *San Leng* (Rhizoma Sparganii), *Gua Lou* (Fructus Trichosanthis), *Mu Li* (Concha Ostreae) and others. *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) and *Xia Ku Cao* (Spica Prunellae) were added for accumulation of heat and phlegm; *Zhi Zi* (Fructus Gardeniae) and *Zhi Mu* (Rhizoma Anemarrhenae) for restlessness and anger; *Yan Hu Suo* (Rhizoma Corydalis) and *Chuan Lian Zi* (Fructus Toosendan) for breast distention; *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for qi deficiency; and *Shu Di Huang* (Radix Rehmanniae Praeparata) and *He Shou Wu* (Radix Polygoni Multiflori) for yin and blood deficiencies. Of 174 patients, the study reported recovery in 130 patients, marked improvement in 29 patients, moderate improvement in 10 patients, and no effect in 5 patients. The rate of effectiveness was 97.13%.¹⁸
12. **Lactation difficulties:** One study reported 93.3% effectiveness in promoting lactation among 30 postpartum women using *Xiao Yao San* plus *Tian Hua Fen* (Radix Trichosanthis), *Si Gua Luo* (Retinervus Luffae Fructus) and *Lou Lu* (Radix Rhapontici). The duration of treatment was 7 days per course of treatment.¹⁹
13. **Oophoritic cyst:** Use of modified *Xiao Yao San* was associated with marked effect to treat women with oophoritic cyst with pain, irregular menstruation and

Xiāo Yáo Sǎn (Rambling Powder)

abnormal bleeding. The herbal treatment contained *Xiao Yao San* plus *Zao Jiao Ci* (Spina Gleditsiae), *Chuan Xiong* (Rhizoma Chuanxiong) and *Wa Leng Zi* (Concha Arcae) as the base formula, with addition of *Zhi Zi* (Fructus Gardeniae) and *Di Huang* (Radix Rehmanniae) for heat; *Rou Gui* (Cortex Cinnamomi) and *Pao Jiang* (Rhizoma Zingiberis Praeparatum) for cold; *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for qi deficiency; charred *Di Huang* (Radix Rehmanniae) and charred *Huang Qin* (Radix Scutellariae) for yin deficiency; *Yu Jin* (Radix Curcumae) and *Zhi Qiao* (Fructus Aurantii) for qi and blood stagnation; and *Shu Di Huang* (Radix Rehmanniae Praeparata) and *Xu Duan* (Radix Dipsaci) for Kidney deficiency. Of 186 patients, the study reported complete recovery in 124 patients and improvement in 48 patients. The overall rate of effectiveness was 92%.²⁰

14.Orchitis: One case of chronic orchitis was successfully treated with significant reduction of swelling and pain. The initial treatment was for 6 doses of a formula that contained *Xiao Yao San* plus *Sheng Ma* (Rhizoma Cimicifugae) 6g, *Huang Qi* (Radix Astragali) 15g, *Chen Pi* (Pericarpium Citri Reticulatae) 9g, *Ju He* (Semen Citri Reticulatae) 9g, and *Li Zhi He* (Semen Litchi) 9g. The follow-up treatment was for another 6 doses of the same formula, with addition of *Xia Ku Cao* (Spica Prunellae) 12g.²¹

15.Prostatitis: Eighteen patients of chronic prostatitis were treated with modified *Xiao Yao San* with complete recovery in 16 patients and moderate improvement in 2 patients.²²

16.Gynecomastia: Administration of modified *Xiao Yao San* in 62 men with development of breasts was associated with complete recovery in 52 patients, significant improvement in 7 patients, and no effect in 3 patients. The duration of treatment was 30 days per course of treatment, for 1 to 5 courses total.²³ According to another study, use of *Xiao Yao San* was associated with 89% effectiveness in treating 35 men (between 17 and 73 years of age) who have had gynecomastia for 3 months to 5 years.²⁴

17.Infertility: One study reported marked effectiveness using modified *Xiao Yao San* to treat infertility in 30 females (between 24-38 years of age). The herbal treatment contained *Xiao Yao San* plus *Yu Jin* (Radix Curcumae), *Xiang Fu* (Rhizoma Cyperi) and others as the base formula. Modifications included addition of *Fu Pen Zi* (Fructus Rubi) and *Tu Si Zi* (Semen Cuscutae) for Kidney deficiency; *Tao Ren* (Semen Persicae), *Chuan Niu Xi* (Radix Cyathulae) and *Yi Mu Cao* (Herba Leonuri) for blood stagnation; and *Chen Pi* (Pericarpium Citri Reticulatae) and *Ban Xia* (Rhizoma Pinelliae) for presence of dampness and phlegm. The herbs were given in decoction one time daily. The treatment protocol was to begin the herbal

therapy for 7 days, starting on the fourth day after the end of the period, for 3 months per course of therapy, and 1-3 courses total. Of 30 patients at the end of the study, 20 were pregnant and 10 had varying degrees of improvement with menstruation.²⁵

18.Sexual dysfunction: One study reported 96.6% effectiveness in treating 87 men with inability to ejaculate using modified *Xiao Yao San* and counseling. The herbal treatment contained *Xiao Yao San* plus *Long Gu* (Os Draconis), *Mu Li* (Concha Ostreae) and *Chuan Shan Jia* (Squama Manis) as the base formula. Modifications included addition of *Ban Xia* (Rhizoma Pinelliae), *Chen Pi* (Pericarpium Citri Reticulatae) and *Bai Jie Zi* (Semen Sinapis) for accumulation of dampness and phlegm; *Long Dan* (Radix et Rhizoma Gentianae), *Huang Qin* (Radix Scutellariae), *Mu Dan Pi* (Cortex Moutan) and *Zhi Zi* (Fructus Gardeniae) for damp-heat; *Xian Mao* (Rhizoma Curculiginis), *Yin Yang Huo* (Herba Epimedii) and *Jiu Cai Zi* (Semen Allii Tuberosi) for yang deficiency; and *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) for yin deficiency with Liver excess. Of 87 patients, the study reported complete recovery in 76 patients, improvement in 8 patients, and no benefit in 3 patients.²⁶

19.Impotence: Modified *Xiao Yao San* was reported in one study to be effective in treating impotence. Of 43 men, the study reported complete recovery in 31 patients, improvement in 9 patients and no improvement in 3 patients. The herbal treatment contained *Xiao Yao San* plus *Tu Si Zi* (Semen Cuscutae), *She Chuang Zi* (Fructus Cnidii), *Wu Wei Zi* (Fructus Schisandrae Chinensis) and *Wu Gong* (Scolopendra) as the base formula. Modifications included addition of *Ba Ji Tian* (Radix Morindae Officinalis), *Yin Yang Huo* (Herba Epimedii) and *Rou Cong Rong* (Herba Cistanches) for deficiency of *ming men* (life gate) fire; *Shou Wu Teng* (Caulis Polygoni Multiflori) and dry-fried *Suan Zao Ren* (Semen Ziziphi Spinosae) for deficiency and damage of Heart and Spleen; *Sheng Ma* (Rhizoma Cimicifugae) and dry-fried *Suan Zao Ren* (Semen Ziziphi Spinosae) for fear and fright damaging the Kidney; and *Che Qian Zi* (Semen Plantaginis) and *Ze Xie* (Rhizoma Alismatis) for damp-heat affecting the lower *jiao*. The patients were given the herbs for 15 days per course of treatment.²⁷

20.Hepatitis: Thirty patients with hepatitis B were treated with this formula with moderate improvement in 29 patients. The formula was modified slightly depending on the condition of the patient.²⁸

21.Liver cirrhosis: Seventeen patients with liver cirrhosis were treated with modified *Xiao Yao San* with significant improvement in 6 patients, moderate improvement in 9 patients, and no improvement in 2 patients.²⁹

Xiāo Yáo Sǎn (Rambling Powder)

22. Cholecystitis: Administration of modified *Xiao Yao San* was associated with good results in treating 168 patients with cholecystitis (32 with acute and 136 with chronic cholecystitis). Of 168 patients, the study reported significant improvement in 79 patients and moderate improvement in 89 patients. Modifications to this formula included addition of *Yu Jin* (Radix Curcumae), *Chuan Lian Zi* (Fructus Toosendan), *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Zhi Qiao* (Fructus Aurantii) for hypochondriac pain radiating to the shoulder and back; *Hong Hua* (Flos Carthami) and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) for fixed, stabbing pain in the hypochondrium with dark-colored tongue; *Sha Shen* (Radix Glehniae seu Adenophorae), *Shi Hu* (Caulis Dendrobii) and *Gou Qi Zi* (Fructus Lycii) for dry mouth with red tongue; *Da Huang* (Radix et Rhizoma Rhei), *Mang Xiao* (Natrii Sulfas), *Zhi Shi* (Fructus Aurantii Immaturus), and *Zhi Zi* (Fructus Gardeniae) for fever, nausea, vomiting and constipation; and *Jin Qian Cao* (Herba Lysimachiae) and *Hai Jin Sha* (Spora Lygodii) for presence of gallstones.³⁰

23. Anorexia: Use of modified *Xiao Yao San* was associated with 100% effectiveness in improving appetite in 50 children with anorexia. The herbal treatment contained this formula plus dry-fried *Mai Ya* (Fructus Hordei Germinatus), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), and others as needed. The average duration of treatment was 20.5 days. Of 50 children, 30 had complete recovery and 20 had improved appetite.³¹

24. Irritable bowel syndrome (IBS): Administration of modified *Xiao Yao San* for 1-2 months in 52 patients with IBS was associated with complete recovery in 34 patients and improvement in 18 patients. The herbal treatment was based on *Xiao Yao San*, with addition of *Zhi Qiao* (Fructus Aurantii), *Mu Xiang* (Radix Aucklandiae) and *Yan Hu Suo* (Rhizoma Corydalis) for severe distention and pain; *Pao Jiang* (Rhizoma Zingiberis Praeparatum) and *Rou Gui* (Cortex Cinnamomi) for feeling of coldness in the abdomen; *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis) for burning sensations and pain in the epigastric and abdominal regions; and addition of *Sha Ren* (Fructus Amomi) and *Bai Bian Dou* (Semen Lablab Album) and elimination of *Dang Gui* (Radix Angelicae Sinensis) for diarrhea.³²

25. Chloasma: Use of *Xiao Yao San* for 15 packs of herbs per course of treatment was associated with effectiveness in treating excessive brown patches of irregular shape and size on the face or other parts of the body. Of 160 patients, the study reported complete recovery in 129 patients, significant recovery in 21 patients, improvement in 7 patients, and no effect in 3 patients.³³

26. Hyperlipidemia: The effectiveness of using *Xiao Yao San* in treating hyperlipidemia was evaluated by dividing 126 patients into two groups. Group one received *Xiao Yao San* and group two received liquid extract of *Shan Zha* (Fructus Crataegi). There were 84 patients in group one, with an average age of 53 years (ranging from 35-73). There were 42 patients in group two, with an average age of 52 years (ranging from 37-72). Both groups were treated for 15 days per course of treatment, for a total of 3 courses. At the end, the study reported that both treatments were effective in reducing total cholesterol and triglyceride levels, with *Xiao Yao San* having 90.5% and 86.9% effectiveness, and the liquid extract of *Shan Zha* (Fructus Crataegi) having 78.5% and 76.2% effectiveness, respectively. The effectiveness rate was defined as greater than 10% reduction of total cholesterol and triglyceride levels.³⁴

27. Optic nerve atrophy: Seventy patients (136 affected eyes) with atrophy of the optic nerve were treated with modified *Xiao Yao San* with satisfactory results.³⁵

TOXICOLOGY

No fatality was observed following oral ingestion of the formula up to 200 g/kg (dried herb dose) in laboratory mice.³⁶

RELATED FORMULA

Hēi Xiāo Yáo Sǎn (Black Rambling Powder)

黑逍遙散

黑逍遙散

Pinyin Name: *Hei Xiao Yao San*

Literal Name: Black Rambling Powder

Original Source: *Yi Lue Liu Shu* (Six Texts on the Essentials of Medicine)

<i>Chai Hu</i> (Radix Bupleuri)	1.5g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	1.5g
<i>Bai Shao</i> (Radix Paeoniae Alba)	4.5g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	4.5g
<i>Fu Ling</i> (Poria)	4.5g
<i>Dang Gui</i> (Radix Angelicae Sinensis), <i>chao</i> (dry-fried)	9g [6g]
<i>Di Huang</i> (Radix Rehmanniae) or <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	15g

The source text states to grind the ingredients coarsely and then cook 6g of the powdered herbs with one slice of *Sheng Jiang* (Rhizoma Zingiberis Recens) and a small amount of *Bo He* (Herba Menthae). Take the strained decoction while warm. Today, this formula may be prepared as a decoction using the doses suggested in brackets.

Xiāo Yáo Sǎn (Rambling Powder)

Hei Xiao Yao San (Black Rambling Powder) is formulated by adding *Di Huang* (Radix Rehmanniae) or *Shu Di Huang* (Radix Rehmanniae Praeparata) to *Xiao Yao San*. As the base, *Xiao Yao San* treats Liver qi stagnation. Add *Di Huang* (Radix Rehmanniae) if there are more heat symptoms, and add *Shu Di Huang* (Radix Rehmanniae Praeparata) if there is deficiency.

This formula regulates Liver qi, strengthens the Spleen, nourishes the blood, and regulates menstruation. Clinical manifestations include irregular menstruation with abdominal pain and a wiry, deficient pulse.

AUTHORS' COMMENTS

Xiao Yao San is often used as a base formula in treating many gynecological disorders or chronic hepatic disorders. Today, this formula commonly treats Liver qi stagnation caused by stress and a busy lifestyle. It is an excellent formula for treating emotional instability and other psycho-somatic disorders. It is a relatively mild formula that can be taken whenever necessary to help patients cope with their stressful life.

Chai Hu Shu Gan San (Bupleurum Powder to Spread the Liver) and *Xiao Yao San* are two of the most commonly used formulas to treat Liver qi stagnation.

- *Chai Hu Shu Gan San* focuses only on Liver qi stagnation, and is suitable for individuals with severe Liver qi stagnation.
- *Xiao Yao San* treats Liver qi stagnation with blood and Spleen deficiencies. It has a weaker qi-dispersing effect, but a stronger nourishing action. Thus, it is more suitable for deficient-type patients and/or for long-term use.

Xiao Yao San and *Si Ni San* (Frigid Extremities Powder) both harmonize the Liver (wood element) and Spleen (earth element) to treat such symptoms as hypochondriac or abdominal pain. Both formulas contain *Chai Hu* (Radix Bupleuri), *Bai Shao* (Radix Paeoniae Alba), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). The differences between these two formulas are as follows:

- *Xiao Yao San* regulates Liver qi, strengthens the Spleen, and nourishes the blood. It is more suitable for combined conditions of excess (Liver qi stagnation) and deficiency (blood and Spleen qi deficiencies). Chief manifestations of *Xiao Yao San* include hypochondriac pain, dizziness, headache, dry mouth and throat, listlessness, decreased dietary intake, irregular menstruation, and breast distention with a wiry, deficient pulse. It is also commonly used to treat emotional disturbances. *Xiao Yao San* contains *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *Dang Gui* (Radix Angelicae Sinensis), *Sheng Jiang* (Rhizoma

Zingiberis Recens), *Bo He* (Herba Menthae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) to strengthen the Spleen and nourish the blood.

- *Si Ni San* mainly treats an excess condition involving cold extremities caused by heat trapped in the body and blocking the qi from reaching the extremities. It uses *Chai Hu* (Radix Bupleuri) as the chief herb, and *Zhi Shi* (Fructus Aurantii Immaturus) to break up qi stagnation to allow qi to circulate to the extremities.

Xiao Yao San and *Yi Guan Jian* (Linking Decoction) both treat hypochondriac distention and pain, but the etiology of this condition and the focus of the formulas are quite different.

- *Xiao Yao San* addresses Liver qi stagnation accompanied by blood and Spleen deficiencies. It regulates Liver qi, spreads stagnation, strengthens the Spleen, and nourishes the blood. It is considered a harmonizing formula.
- *Yi Guan Jian* treats Liver and yin deficiencies with Liver qi stagnation. It is a tonic formula used to treat dry mouth and throat, acid regurgitation, mass accumulation, and hernia. It nourishes yin and regulates Liver qi.³⁷

加味逍遥散
加味逍遥散

Pinyin Name: *Jia Wei Xiao Yao San*
Literal Name: Augmented Rambling Powder
Alternate Names: *Dan Zhi Xiao Yao San* (Moutan and Gardenia Rambling Powder), *Ba Wei Xiao Yao San* (Eight-Ingredient Rambling Powder), *Chia Wei Hsiao Yao San*, Modified Merry Life Powder, Bupleurum and Peony Formula
Original Source: *Nei Ke Zhai Yao* (Summary of Internal Medicine) by Wen Sheng in the mid-19th century

COMPOSITION

<i>Chai Hu</i> (Radix Bupleuri)	30g [9g]
<i>Dang Gui</i> (Radix Angelicae Sinensis), <i>chao</i> (dry-fried) slightly	30g [9g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	30g [9g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	30g [9g]
<i>Fu Ling</i> (Poria)	30g [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	15g [4.5g]
<i>Mu Dan Pi</i> (Cortex Moutan)	30g [9g]
<i>Zhi Zi</i> (Fructus Gardeniae), <i>chao</i> (dry-fried)	30g [9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into powder, and cook 9g of the powdered herbs to make a decoction. Today, this formula is usually prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

- 1. Soothes the Liver and relieves qi stagnation
- 2. Strengthens the Spleen
- 3. Nourishes the blood
- 4. Sedates heat and fire

CLINICAL MANIFESTATIONS

Liver qi stagnation accompanied by interior heat and underlying blood and Spleen deficiencies: irritability,

restlessness, a short temper, hypochondriac pain, alternating spells of fever and chills, spontaneous perspiration, night sweats, headache, insomnia, vertigo, a dry mouth and throat, dry eyes, red cheeks, lassitude, lack of appetite, premenstrual or menstrual syndrome, and dysuria.

CLINICAL APPLICATIONS

Premenstrual syndrome, menstrual disturbance, menstrual pain and cramps, menopause, female infertility, emotional distress, emotional instability, anxiety, stress, neurasthenia, panic disorder, affective disorders, hepatitis, early stage of liver cirrhosis, hepatomegaly, stomatitis, inflammation and bleeding of the gums, cystitis, urinary tract infection, pelvic inflammatory disease, and fibrocystic breasts.

Jiā Wèi Xiāo Yáo Sǎn (Augmented Rambling Powder)

EXPLANATION

Jia Wei Xiao Yao San (Augmented Rambling Powder) treats Liver qi stagnation accompanied by interior heat and underlying blood and Spleen deficiencies. As a result of deficiency in the interior (Spleen and blood), Liver qi stagnation is unrestrained and turns into heat and fire, leading to symptoms such as irritability, a short temper, spontaneous perspiration, night sweats, insomnia, headache, dry eyes, red cheeks, a dry mouth, irregular menstruation, lower abdominal pain, and dysuria.

Jia Wei Xiao Yao San is modified from *Xiao Yao San* (Rambling Powder), which resolves Liver qi stagnation, nourishes the blood, and strengthens the Spleen. The addition of *Mu Dan Pi* (Cortex Moutan) and *Zhi Zi* (Fructus Gardeniae) sedates interior heat arising from Spleen and blood deficiencies, and from Liver qi stagnation.

MODIFICATIONS

- For blood deficiency, fatigue, and low-grade fever, add *Chuan Xiong* (Rhizoma Chuanxiong) and *Shu Di Huang* (Radix Rehmanniae Praeparata).
- If the condition is marked by qi deficiency and fatigue, add *Huang Qi* (Radix Astragali) and *Ren Shen* (Radix et Rhizoma Ginseng).
- If accompanied by fidgeting, irritability, and thirst, add *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- If there is painful urination, add *Che Qian Zi* (Semen Plantaginis).
- With alternating spells of chills and fever, combine with *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).
- With cough and tidal fever, combine with *Wen Dan Tang* (Warm the Gallbladder Decoction).
- With fever and steaming bones sensations, combine with *Qing Hao Bie Jia Tang* (Artemisia Annua and Soft-Shelled Turtle Shell Decoction).

- For dermatological disorders in women, add *Chuan Xiong* (Rhizoma Chuanxiong) and *Di Huang* (Radix Rehmanniae).

CAUTIONS / CONTRAINDICATIONS

- *Jia Wei Xiao Yao San* should be used with caution during pregnancy.
- This formula is contraindicated in individuals with underlying deficiency and cold.¹

PHARMACOLOGICAL EFFECTS

Anxiolytic: Use of *Jia Wei Xiao Yao San* showed anxiolytic effects through the neurosteroid synthesis followed by gamma-amino-butyric acidA/benzodiazepine (GABA(A)/BZP) receptor stimulations in male mice.²

CLINICAL STUDIES AND RESEARCH

1. **Menopause:** A randomized, controlled pilot study was performed to evaluate and compare the clinical effects of a 16-week treatment with *Jia Wei Xiao Yao San* and hormone replacement therapy (Premelle) in non-hysterectomized postmenopausal women. This study evaluated quality of life, and measured physiological parameters, such as follicle-stimulating hormone and estradiol levels. Both the herbs and drug effectively alleviated most of the menopausal symptoms with no significant differences. The formula demonstrated good compliance and safety, and was associated with a lower discontinuation rate due to lack of adverse side effects. The researchers concluded that *Jia Wei Xiao Yao San* is a safe and efficacious therapy and might be an alternative choice for relief of climacteric symptoms in postmenopausal women.³
2. **Affective disorders:** Administration of *Jia Wei Xiao Yao San* effectively treated affective disorders characterized by depressed Liver resulting in fire, mild yang deficiency and mild yin deficiency. Of 50 patients, the study reported marked improvement in 26 patients, improvement in 17 patients, and no improvement in 7 patients.⁴

Jia Wei Xiao Yao San (Augmented Rambling Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver qi stagnation accompanied by interior heat and underlying blood and Spleen deficiencies	<ul style="list-style-type: none"> • Bilateral hypochondriac pain, headache, vertigo, alternating spells of fever and chills: Liver qi stagnation • Irritability, a short temper, red cheeks, and dysuria: interior heat • Dry mouth and a dry throat: yin and blood deficiencies • Lassitude and lack of appetite: Spleen deficiency 	<ul style="list-style-type: none"> • Soothes the Liver and relieves qi stagnation • Strengthens the Spleen • Nourishes the blood • Sedates heat and fire 	<ul style="list-style-type: none"> • <i>Xiao Yao San</i> (Rambling Powder) treats Liver qi stagnation, nourishes the blood, and strengthens the Spleen. • <i>Mu Dan Pi</i> (Cortex Moutan) and <i>Zhi Zi</i> (Fructus Gardeniae) sedate interior heat and fire.

Jiā Wèi Xiǎo Yáo Sǎn (Augmented Rambling Powder)

3. **Panic disorder:** Four patients diagnosed with panic disorder with agoraphobia, in accordance with the Diagnostic and Statistical Manual of Mental Disorders (DSM) criteria, were successfully treated with herbal medicine. Two patients were treated with *Jia Wei Xiao Yao San*, and 2 with *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction). Both formulas successfully relieved panic attacks, anticipatory anxiety and agoraphobia. The study concluded that these formulas may be useful as additional or alternative treatments for panic disorder.⁵

HERB-DRUG INTERACTION

- **Antipsychotic-induced Parkinsonism:** Use of *Jia Wei Xiao Yao San* was associated with statistically significant reduction ($P < 0.01$) in tremors caused by antipsychotic-induced Parkinsonism in 8 patients. The tremors did not worsen in any of the patients, and there were no reports of side effects.⁶
- **Drug-induced menopause:** One study evaluated the therapeutic effects of certain herbal medicines on menopausal symptoms induced by gonadotropin-releasing hormone agonist therapy in Japanese women with endometriosis, adenomyosis, or leiomyoma. Menopausal symptoms induced by gonadotropin-releasing hormone agonist therapy in 13 patients were successfully treated with *Jia Wei Xiao Yao San*, *Dang Gui Shao Yao San* (Tangkuei and Peony Powder), *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction), *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill), *Tao He Cheng Qi Tang* (Peach Pit Decoction to Order the Qi) or *Gui Zhi Tang* (Cinnamon Twig Decoction). Most importantly, there were no significant changes in serum estradiol levels after treatment with these herbal medicines. The researchers concluded that these herbal medicines can be recommended for menopausal symptoms induced by gonadotropin-releasing hormone agonists without a negative effect on serum estradiol levels.⁷

TOXICOLOGY

Use of *Jia Wei Xiao Yao San* was associated with one case of adult respiratory distress syndrome. After taking *Jia Wei Xiao Yao San* for treatment of seborrheic dermatitis, a 59-year-old female presented with a respiratory illness having clinical, radiologic and functional characteristics of adult respiratory distress syndrome, with increased number of lymphocytes, neutrophils, and eosinophils in the bronchoalveolar lavage fluid. The lymphocyte stimulation test with *Jia Wei Xiao Yao San* was positive.⁸

The source text instructs to grind the ingredients into powder, and cook 9g of the powdered herbs to make a decoction. Today, this formula is usually prepared as a decoction with the doses suggested in brackets.

Shi Wei Xiao Yao San (Ten-Ingredient Rambling Powder) treats Liver qi stagnation accompanied by interior heat and underlying blood and Spleen deficiencies. It is formulated by combining the ingredients from both *Xiao Yao San* (Rambling Powder) and *Jia Wei Xiao Yao San* (Augmented Rambling Powder).

- In comparison with *Xiao Yao San* (Rambling Powder), this formula has stronger effect to clear heat as it contains *Mu Dan Pi* (Cortex Moutan) and *Zhi Zi* (Fructus Gardeniae).
- In contrast with *Jia Wei Xiao Yao San* (Augmented Rambling Powder), it has better effect to regulate Liver qi circulation and harmonize the Stomach since it has *Bo He* (Herba Menthae) and roasted *Sheng Jiang* (Rhizoma Zingiberis Recens).

AUTHORS' COMMENTS

Jia Wei Xiao Yao San literally means “Augmented Rambling Powder.” The augmentation refers to the addition of two herbs: *Mu Dan Pi* (Cortex Moutan) and *Zhi Zi* (Fructus Gardeniae). Thus, this formula is also known as *Dan Zhi Xiao Yao San* (Moutan and Gardenia Rambling Powder).

Jia Wei Xiao Yao San is one of the most commonly used formulas today, since stress is a major factor in the daily

Jiā Wèi Xiāo Yáo Sǎn (Augmented Rambling Powder)

lives of many patients. As psychosomatic disorders increase, simply treating the symptoms and the physical discomforts may not be sufficient. This formula addresses the emotional aspects and treats the root of the condition in many cases. Although this formula contains strong heat-clearing and qi-regulating herbs that make it unsuitable for long-term use, many patients find it is impossible to change their lifestyle, or to reduce the stress factor that is the cause of their disorders. In those cases, a formula such as *Yi Guan Jian* (Linking Decoction) can be added to reduce the possibility of having these strong herbs create imbalances in the body.

<i>Fang Feng</i> (Radix Saposhnikoviae)	60g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states that this formula may be prepared as a decoction, pills or powder. Today, this formula is usually prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies the Spleen and sedates the Liver
2. Dispels dampness and stops diarrhea

CLINICAL MANIFESTATIONS

Abdominal pain and diarrhea caused by Spleen deficiency and Liver excess: borborygmus, diarrhea, abdominal pain which persists after defecation, a thin, white tongue coating, and a wiry, moderate pulse at the *guan* position on both hands.

CLINICAL APPLICATIONS

Diarrhea, acute enteritis, chronic enteritis, chronic colitis, ulcerative colitis, irritable bowel syndrome, chronic cholecystitis, and various types of gastrointestinal disorders.

Tong Xie Yao Fang (Important Formula for Painful Diarrhea)

EXPLANATION

Tong Xie Yao Fang (Important Formula for Painful Diarrhea) treats abdominal pain and diarrhea caused by the Liver overacting on the Spleen. The peculiarity of this syndrome is that the abdominal pain may persist after defecation; this is because the pain is not due to retention of food or other substances, and therefore cannot be alleviated by bowel evacuation. Rather, the pain is due to the Liver (excess) overacting on the Spleen (deficiency). Diarrhea is the direct reflection of digestive weakness secondary to an overactive Liver.

This formula contains *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) as the chief herb to tonify the Spleen and dry dampness. *Bai Shao* (Radix Paeoniae Alba), the deputy herb, nourishes the blood and relieves pain by sedating the Liver and softening Liver qi. *Chen Pi* (Pericarpium Citri Reticulatae) regulates qi, dries dampness, awakens the Spleen, and harmonizes the middle *jiao*. *Fang Feng* (Radix Saposhnikoviae) disperses Liver qi to help stop the Liver from overacting on the Spleen, and directs the effects of the formula to the Spleen and Liver.

MODIFICATIONS

- For chronic diarrhea, add dry-fried *Sheng Ma* (Rhizoma Cimicifugae).
- If the diarrhea is caused by indigestion, chronic colitis or irritable bowel, add *Ge Gen* (Radix Puerariae Lobatae), and *Shan Zha* (Fructus Crataegi) and increase the dose of *Fang Feng* (Radix Saposhnikoviae).
- If the diarrhea is caused by acute gastroenteritis, tuberculosis of the colon, acute malaria or dysentery due to amoeba, add *Ge Gen* *Huang Qin* *Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction) and *Shan Zha* (Fructus Crataegi).
- If the diarrhea is caused by hyperthyroidism, add *Ge Gen* (Radix Puerariae Lobatae), *Mu Li* (Concha Ostreae), and *Xia Ku Cao* (Spica Prunellae), and increase the dose of

Bai Shao (Radix Paeoniae Alba) and *Fang Feng* (Radix Saposhnikoviae).

- For diarrhea in chronic hepatic diseases, add *Ge Gen* (Radix Puerariae Lobatae), *Shan Zha* (Fructus Crataegi), *Fu Ling* (Poria), and *Yi Yi Ren* (Semen Coicis).
- With chronic enteritis, add *Ge Gen* (Radix Puerariae Lobatae) and *Shan Zha* (Fructus Crataegi).
- When there is yang deficiency and cold, add *Gan Jiang* (Rhizoma Zingiberis) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With a greasy, yellow tongue coating, add *Huang Lian* (Rhizoma Coptidis).

CAUTIONS / CONTRAINDICATIONS

- *Fang Feng* (Radix Saposhnikoviae) is an important herb in this formula that serves two purposes: to disperse Liver qi stagnation and to guide the formula to the Spleen channel. However, its dose must not be arbitrarily increased or its function will shift to an exterior-releasing emphasis.
- Avoid cold, raw, oily or greasy foods while taking *Tong Xie Yao Fang*.¹

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** This formula had a marked effect on the production of gastric acid in laboratory rats. At 25g/kg and 75g/kg (dose of dried herbs), it reduced gastric acid production by 59.1% and 64.1%, respectively.² The use of this formula was also associated with a marked inhibitory effect on intestinal peristalsis in rabbits.³
2. **Antibiotic:** This formula was associated with an inhibitory effect against *Bacillus dysenteriae*, *E. coli*, and *Staphylococcus aureus*.

CLINICAL STUDIES AND RESEARCH

1. **Diarrhea:** Use of *Tong Xie Yao Fang* was associated with recovery in 43 of 45 children with diarrhea.⁴ Another study reported 93.8% effectiveness using modified *Tong Xie Yao Fang* to treat 32 patients with diarrhea.⁵

Tong Xie Yao Fang (Important Formula for Painful Diarrhea)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Abdominal pain and diarrhea caused by Spleen deficiency and Liver excess	<ul style="list-style-type: none">• Borborygmus, diarrhea, and abdominal pain that persists after diarrhea: Liver excess overacting on Spleen deficiency• Thin, white tongue coating and a wiry, moderate pulse: presence of deficient and excess conditions	<ul style="list-style-type: none">• Tonifies the Spleen and sedates the Liver• Disperses dampness and stops diarrhea	<ul style="list-style-type: none">• <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) tonifies the Spleen and dries dampness.• <i>Bai Shao</i> (Radix Paeoniae Alba) nourishes the blood and relieves pain by sedating the Liver and softening Liver qi.• <i>Chen Pi</i> (Pericarpium Citri Reticulatae) regulates qi, dries dampness, and harmonizes the Stomach.• <i>Fang Feng</i> (Radix Saposhnikoviae) disperses Liver qi to help stop the Liver from overacting on the Spleen.

Tong Xie Yao Fang (Important Formula for Painful Diarrhea)

2. **Acute enteritis:** Sixty patients with acute enteritis characterized by severe pain and diarrhea were treated with *Tong Xie Yao Fang* with a 90% overall rate of effectiveness. The patients received 1-2 packs of herbs for treatment. The study reported no side effects in most patients.⁶
3. **Chronic enteritis:** Thirty-five patients with chronic enteritis were treated with modified *Tong Xie Yao Fang* with complete recovery in 28 patients, moderate improvement in 5 patients, and no effect in 2 patients. The herbal treatment contained dry-fried *Bai Shao* (Radix Paeoniae Alba) 20-30g, dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 15g, *Chen Pi* (Pericarpium Citri Reticulatae) 6g, and *Fang Feng* (Radix Saposhnikoviae) 10g. Modification included the addition of *Sheng Ma* (Rhizoma Cimicifugae) 6g for chronic diarrhea; increased dose of *Bai Shao* (Radix Paeoniae Alba), with the addition of *Mu Gua* (Fructus Chaenomelis) 6g, and *Mu Xiang* (Radix Aucklandiae) 6g for severe abdominal pain; and *Dang Shen* (Radix Codonopsis) 10g for fatigue.⁷
4. **Chronic colitis:** Twenty patients with chronic colitis were treated with modified *Tong Xie Yao Fang* for one and a half months with marked improvement in 14 patients, moderate improvement in 4 patients, and no effect in 2 patients. The treatment included *Fang Feng* (Radix Saposhnikoviae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Chen Pi* (Pericarpium Citri Reticulatae), *Bai Shao* (Radix Paeoniae Alba), *Wu Mei* (Fructus Mume), *Mu Gua* (Fructus Chaenomelis), *Dang Shen* (Radix Codonopsis), *Shan Yao* (Rhizoma Dioscoreae), and *Shan Zha* (Fructus Crataegi).⁸ Another study reported 93.55% effectiveness using modified *Tong Xie Yao Fang* to treat 124 patients with chronic colitis (25 with complete recovery, 68 with significant improvement, and 23 with moderate improvement). The herbal formula contained *Yi Yi Ren* (Semen Coicis) 20g, *Che Qian Zi* (Semen Plantaginis) 20g, *Huang Qi* (Radix Astragali) 15g, *Bai Jiang Cao* (Herba cum Radice Patriniae) 15g, *Bai Zhi* (Radix Angelicae Dahuricae) 15g, dry-fried *Bai Shao* (Radix Paeoniae Alba) 12g, *Hou Po* (Cortex Magnoliae Officinalis) 12g, *Fang Feng* (Radix Saposhnikoviae) 3g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 10g, *Ku Shen* (Radix Sophorae Flavescentis) 10g, dry-fried *Cang Zhu* (Rhizoma Atractylodis) 10g, *Mu Xiang* (Radix Aucklandiae) 5g, *Chen Pi* (Pericarpium Citri Reticulatae) 6g, and *Chai Hu* (Radix Bupleuri) 6g. The patients were given the herbs in decoction for 2 weeks per course of treatment, with duration of 1-6 courses total.⁹
5. **Ulcerative colitis:** Thirty-five patients with ulcerative colitis were treated with modified *Tong Xie Yao Fang* for 20 days with marked improvement in 30 patients and moderate improvement in 5 patients. The formula included *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Bai Shao* (Radix Paeoniae Alba), *Chen Pi* (Pericarpium Citri Reticulatae), *Fang Feng* (Radix Saposhnikoviae), *Sheng Ma* (Rhizoma Cimicifugae), *Qin Pi* (Cortex Fraxini), and *Chi Shi Zhi* (Holloysitum Rubrum).¹⁰ Another study reported 93.5% effectiveness for treatment of chronic colitis using *Tong Xie Yao Fang* plus *Shan Yao* (Rhizoma Dioscoreae), *Gu Ya* (Fructus Setariae Germinatus), *Mai Ya* (Fructus Hordei Germinatus), and other herbs as deemed necessary. Modifications included the addition of *Yan Hu Suo* (Rhizoma Corydalis) and a larger dose of *Bai Shao* (Radix Paeoniae Alba) for severe abdominal pain; *Mu Xiang* (Radix Aucklandiae), *Zhi Qiao* (Fructus Aurantii), and *Hou Po* (Cortex Magnoliae Officinalis) for Liver qi stagnation; *Chuan Lian Zi* (Fructus Toosendan) for qi stagnation turning into fire; *Da Huang* (Radix et Rhizoma Rhei), *Bing Lang* (Semen Arecae) and *Huang Lian* (Rhizoma Coptidis) for dampness in the Intestines; *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali) and *Yi Yi Ren* (Semen Coicis) for Spleen and qi deficiency; and *Si Shen Wan* (Four-Miracle Pill) for Spleen and Kidney deficiencies. Of 32 patients, the study reported complete recovery in 21 patients, improvement in 9 patients, and no benefit in 2 patients.¹¹
6. **Irritable bowel syndrome (IBS):** *Tong Xie Yao Fang* has been shown in many studies to effectively treat IBS. Fifty patients with IBS were treated with modified *Tong Xie Yao Fang* with complete recovery in 35 patients. The average length of treatment was 28.4 days, with a range of 23 to 120 days. Fifteen patients discontinued the treatment due to various reasons, with most showing some indications of improvement.¹² Another study reported 89.9% effectiveness using *Tong Xie Yao Fang* plus *Si Shen Wan* (Four-Miracle Pill) to treat 187 patients with IBS.¹³ Lastly, one study reported 93.3% effectiveness using modified *Tong Xie Yao Fang* to treat 30 patients with IBS. The herbal treatment used *Tong Xie Yao Fang* as the base, with the addition of *Sheng Ma* (Rhizoma Cimicifugae) and *Chi Shi Zhi* (Holloysitum Rubrum) for chronic diarrhea; *Bu Gu Zhi* (Fructus Psoraleae) and *Rou Gui* (Cortex Cinnamomi) for Spleen and Kidney yang deficiencies; and *Chai Hu* (Radix Bupleuri) and *Dang Gui* (Radix Angelicae Sinensis) for Liver qi stagnation with blood deficiency. Each course of treatment lasted 1 month. Of 30 patients, the study reported significant improvement in 9 patients, improvement in 19 patients, and no improvement in 2 patients.¹⁴

AUTHORS' COMMENTS

Tong Xie Yao Fang was originally called *Bai Zhu Shao Yao San* (Atractylodes Macrocephala and Peony Powder), with the understanding that this was an "important formula for painful diarrhea," and that abdominal

Tong Xie Yao Fang (Important Formula for Painful Diarrhea)

pain may persist after defecation. *Tong Xie Yao Fang* eventually became the “official” name of this formula, however, since this name meaningfully incorporates its primary function. Today, *Tong Xie Yao Fang* is commonly used as a foundational formula for treating various types of diarrhea.

Tong Xie Yao Fang treats abdominal pain and diarrhea caused by Spleen deficiency and Liver excess. Its formulation has a distinct rationale:

- *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Chen Pi* (Pericarpium Citri Reticulatae) strengthen the Spleen, dry dampness, and promote qi circulation. This formula does not use standard qi tonics, such as *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali), because such herbs tonify qi and raise yang qi, but do not dry dampness and restore the normal transformation and transportation functions of the Spleen.
 - *Fang Feng* (Radix Saposhnikovia) is acrid, spreads Liver qi stagnation, awakens the Spleen, and dries dampness. It enters both the Liver and Spleen channels, raises yang, and stops diarrhea. When paired with *Bai Shao* (Radix Paeoniae Alba), it regulates Liver qi and relieves pain. When combined with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), it strengthens the Spleen and dispels dampness. *Chai Hu* (Radix Bupleuri), a standard Liver qi-regulating herb, is not used here because it does not strengthen the Spleen. In addition, *Chai Hu* (Radix Bupleuri) is slightly drying in nature, and may injure yin and contribute to more deficiency.¹⁵
- Si Shen Wan* (Four-Miracle Pill), *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), and *Tong Xie Yao Fang* all treat diarrhea.
- *Si Shen Wan* warms and tonifies Spleen and Kidney yang to stop chronic diarrhea. It treats severe diarrhea that occurs in the early morning, and watery diarrhea that contains undigested food.

- *Shen Ling Bai Zhu San* treats diarrhea characterized by Spleen qi deficiency with damp accumulation, manifesting in fatigue, weakness of the limbs, and poor appetite.
- *Tong Xie Yao Fang* tonifies the Spleen and spreads Liver qi. This formula stops the type of diarrhea that accompanies stress-related abdominal pain. Patients will often complain of gas, bloating, or abdominal pain that is not relieved with diarrhea.¹⁶

Section 3

调和肠胃剂

— Intestines and Stomach Harmonizing Formulas

Bàn Xià Xiè Xīn Tāng (Pinellia Decoction to Drain the Epigastrium)

半夏瀉心湯

半夏泻心汤

Pinyin Name: *Ban Xia Xie Xin Tang***Literal Name:** Pinellia Decoction to Drain the Epigastrium**Alternate Names:** *Pan Hsia Hsieh Hsin Tang, Ban Xia Xieh Xin Tang, Pinellia Heart-Draining Decoction, Pinellia Combination***Original Source:** *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty**COMPOSITION**

<i>Ban Xia</i> (Rhizoma Pinelliae), <i>xi</i> (washed)	0.5 cup [9g]
<i>Gan Jiang</i> (Rhizoma Zingiberis)	9g
<i>Huang Qin</i> (Radix Scutellariae)	9g
<i>Huang Lian</i> (Rhizoma Coptidis)	3g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	9g
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	12 pieces [4 pieces]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	9g [6g]

Note: “*Xie xin*” literally means to “drain the Heart.” However, the term is really used to indicate draining the area beneath the Heart, namely the epigastrium. Therefore, the literal name of the formula has been modified to reflect its actual applications.

CLINICAL MANIFESTATIONS

Stomach qi disharmony: epigastric fullness and distention without pain, dry heaves, vomiting with or without vomitus, borborygmus, diarrhea, a thin, yellow and greasy tongue coating, and a wiry, rapid pulse.

DOSAGE / PREPARATION / ADMINISTRATION

The source text advises to cook the ingredients in 10 cups [2,000 mL] of water until 6 cups [1,200 mL] of liquid remain. Discard the residue, and cook the strained decoction again until it is reduced to 3 cups [600 mL]. Take 1 cup [200 mL] of the warm decoction three times daily. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Harmonizes the Stomach and corrects the reversed flow of qi
2. Disperses the interlocking of heat and cold and relieves epigastric distention

CLINICAL APPLICATIONS

Superficial gastritis, chronic gastritis, atrophic gastritis, gastritis, gastrectasis, peptic ulcer disease, hypersecretion of gastric acid, reflux esophagitis, stomatitis, upper gastrointestinal bleeding, gastroparesis, gastroenteritis, stomach pain, abdominal pain, irritable bowel syndrome, ulcerative colitis, diarrhea, nausea and vomiting due to motion sickness or pregnancy, infantile indigestion, cholecystitis and cholelithiasis, chronic hepatitis, liver cirrhosis, renal failure, stress, and depression.

EXPLANATION

Ban Xia Xie Xin Tang (Pinellia Decoction to Drain the Epigastrium), first cited in *Shang Han Lun* (Discussion of Cold-Induced Disorders), is designed to correct the improper treatment of *shaoyang* syndrome with downward

Bàn Xià Xiè Xīn Tāng (Pinellia Decoction to Drain the Epigastrium)

Ban Xia Xie Xin Tang (Pinellia Decoction to Drain the Epigastrium)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Stomach qi disharmony	<ul style="list-style-type: none"> • Epigastric fullness and distention, borborygmus, diarrhea and vomiting: disharmony of the Stomach and Intestines with interlocking of heat and cold • Thin, yellow tongue coating: heat condition • Greasy tongue coating: damp accumulation • Wiry pulse: qi stagnation • Rapid pulse: interior heat 	<ul style="list-style-type: none"> • Harmonizes the Stomach and corrects the reversed flow of qi • Disperses the interlocking of heat and cold and relieves epigastric distention 	<ul style="list-style-type: none"> • <i>Ban Xia</i> (Rhizoma Pinelliae) disperses stagnation, relieves distention, directs reversed Stomach qi downward. • <i>Gan Jiang</i> (Rhizoma Zingiberis) warms the middle <i>jiao</i> and disperses cold accumulation. • <i>Huang Qin</i> (Radix Scutellariae) and <i>Huang Lian</i> (Rhizoma Coptidis) sedate heat and relieve distention. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Da Zao</i> (Fructus Jujubae) and <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify the middle <i>jiao</i> and strengthen the Spleen.

draining herbs, which results in injury to the yang qi of the middle *jiao* and the drawing of exterior pathogens into the interior. By this stage of the improper treatment, heat usually forms in the interior, resulting in the interlocking of heat and cold factors. The interlocking of heat and cold affects the normal ascending functioning of the Spleen and the descending functioning of the Stomach, causing borborygmus, diarrhea, and vomiting. It also creates a feeling of epigastric distention that is not painful and is soft on palpation.

The thin, yellow tongue coating suggests heat formation inside the body, and the greasy nature of the coating is the result of qi stagnation and damp accumulation. A wiry pulse is the result of epigastric distention and qi stagnation, and a rapid pulse indicates interior heat. This condition involves simultaneous excess and deficiency, heat and cold.

The chief herb, *Ban Xia* (Rhizoma Pinelliae), disperses stagnation, relieves distention, and directs reversed Stomach qi downward to relieve nausea and vomiting. The assistant herb, *Gan Jiang* (Rhizoma Zingiberis), warms the middle *jiao* and disperses cold accumulation. *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis) sedate heat and relieve distention. *Ren Shen* (Radix et Rhizoma Ginseng), *Da Zao* (Fructus Jujubae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify the middle *jiao* and strengthen the Spleen. *Zhi Gan Cao* also harmonizes the warm and cold properties of the other herbs in this formula. This formula simultaneously disperses and directs downward, tonifies and sedates, clears heat, and warms the interior to restore the proper functioning of the Spleen and Stomach.

MODIFICATIONS

- If there is a feeling of fullness and oppression in the chest and hypochondriac region, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Jie Geng* (Radix Platycodonis).
- For diarrhea and abdominal pain, add *Mu Xiang* (Radix Aucklandiae) and *Bai Shao* (Radix Paeoniae Alba).
- With vomiting and belching, add *Chen Pi* (Pericarpium Citri Reticulatae) and *Fu Ling* (Poria).
- With vomiting and epigastric pain, combine with *San Huang Xie Xin Tang* (Three-Yellow Decoction to Sedate the Epigastrium).
- With vomiting and phlegm accumulation, combine with *Er Chen Tang* (Two-Cured Decoction).
- With vomiting of food particles, combine with *Ping Wei San* (Calm the Stomach Powder).
- When there is food stagnation, add charred *Shan Zha* (Fructus Crataegi) and *Shen Qu* (Massa Fermentata).
- If the tongue coating is thick, add *Hou Po* (Cortex Magnoliae Officinalis) and *Cang Zhu* (Rhizoma Atractylodis).
- If there is more deficiency, increase the dose of *Ren Shen* (Radix et Rhizoma Ginseng).

CAUTIONS / CONTRAINDICATIONS

- *Ban Xia Xie Xin Tang* is not suitable for epigastric distention and fullness or pain caused by accumulation of phlegm and heat, food stagnation, or qi stagnation.
- This formula should not be used in patients of nausea and vomiting caused by yin deficiency.¹

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** *Ban Xia Xie Xin Tang* has been used to treat various types of gastrointestinal disorders. It has effects to normalize the upper and lower gastrointestinal system by raising the plasma levels of some hormones (somatostatin, motilin, and gastrin).²

Bàn Xià Xiè Xīn Tāng (Pinellia Decoction to Drain the Epigastrium)

2. **Antilulcer:** Administration of the formula was associated with protective effects in rats with gastric or duodenal ulcer, especially against ethanol-induced gastric injury. The mechanism of the protective effect was attributed to the strengthening and regeneration of the gastric membrane and the increase in gastric mucin content.^{3,4,5} In addition, the alcohol extract of the formula inhibits intestinal peristalsis in mice.⁶
3. **Analgesic:** Administration of an alcohol extract of this formula at 10 g/kg was associated with analgesic effects in mice.⁷

CLINICAL STUDIES AND RESEARCH

1. **Gastritis:** Modified *Ban Xia Xie Xin Tang* demonstrated 92.3% effectiveness in treating gastritis caused by bile acid regurgitation. The herbal treatment used *Ban Xia Xie Xin Tang* as the base formula, with elimination of *Da Zao* (Fructus Jujubae), substitution of *Tai Zi Shen* (Radix Pseudostellariae) for *Ren Shen* (Radix et Rhizoma Ginseng), and the addition of *Bai Shao* (Radix Paeoniae Alba) and *Zhi Qiao* (Fructus Aurantii). Furthermore, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria) were added for poor appetite; *Shen Qu* (Massa Fermentata) and *Zhe Shi* (Haematitum) for frequent belching; *Qing Pi* (Pericarpium Citri Reticulatae Viride) for pain with needling sensations; substitution of *Pao Jiang* (Rhizoma Zingiberis Praeparatum) for *Gan Jiang* (Rhizoma Zingiberis) for loose stools; *Bai He* (Bulbus Lilii) for fatigue and shortness of breath; and addition of *Fu Zi* (Radix Aconiti Lateralis Praeparata) and removal of *Ban Xia* (Rhizoma Pinelliae), *Tai Zi Shen* (Radix Pseudostellariae), and *Gan Jiang* (Rhizoma Zingiberis) for pain, perspiration and chills. Of 52 patients, the study reported complete recovery in 16 patients, marked improvement in 18 patients, moderate improvement in 14 patients, and no improvement in 4 patients.⁸
2. **Superficial gastritis:** Thirty patients with superficial gastritis were treated with modified *Ban Xia Xie Xin Tang* with 90% effectiveness. The formula included *Ban Xia* (Rhizoma Pinelliae) 9g, *Huang Lian* (Rhizoma Coptidis) 9g, *Huang Qin* (Radix Scutellariae) 9g, *Wu Ling Zhi* (Faeces Troglodyter) 4.5g, *Pu Huang* (Pollen Typhae) 4.5g, *Gan Jiang* (Rhizoma Zingiberis) 6g, *Hou Po* (Cortex Magnoliae Officinalis) 6g, *Shi Chang Pu* (Rhizoma Acori Tatarinowii) 6g, *Dang Shen* (Radix Codonopsis) 15g, *Long Kui* (Herba Solanum Nigrum) 15g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 15g, *Da Zao* (Fructus Jujubae) 5 pieces, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g.⁹ Another study reported 95% effectiveness in treating superficial gastritis in 60 patients using *Ban Xia Xie Xin Tang* plus *Yan Hu Suo* (Rhizoma Corydalis), *Mu Xiang* (Radix Aucklandiae), *Chai Hu* (Radix Bupleuri), *Wu Zhu Yu* (Fructus Evodiae), *Pei Lan* (Herba Eupatorii), charred *Shan Zha* (Fructus Crataegi), charred *Shen Qu* (Massa Fermentata), and charred *Mai Ya* (Fructus Hordei Germinatus).¹⁰
3. **Chronic gastritis:** Use of modified *Ban Xia Xie Xin Tang* was associated with 92.31% effectiveness in treating 52 patients with chronic gastritis. In addition to the formula, modifications included the addition of *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis) for gastric fullness and distention; *Zhu Ru* (Caulis Bambusae in Taenia) and *Chen Pi* (Pericarpium Citri Reticulatae) for nausea and vomiting; *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria) for loose stools; *Di Huang* (Radix Rehmanniae) and *Hei Zhi Ma* (Semen Sesami Nigrum) for dry stools; *Yan Hu Suo* (Rhizoma Corydalis) for epigastric pain; *Hai Piao Xiao* (Endoconcha Sepiae) and calcined *Wa Leng Zi* (Concha Arcae) for acid reflux; *Long Dan* (Radix et Rhizoma Gentianae) for bitter taste in the mouth; *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and *Shen Qu* (Massa Fermentata) for poor appetite; and *Huang Qi* (Radix Astragali) for fatigue. Of 52 patients, 18 had complete recovery, 30 had marked improvement, and 4 had no improvement.¹¹
4. **Atrophic gastritis:** Forty-nine patients with atrophic gastritis were diagnosed with Spleen and Stomach deficiencies and dampness with cold or heat. The patients were treated with modified *Ban Xia Xie Xin Tang* with marked improvement in 32 patients, moderate improvement in 16 patients and no benefit in one patient. The herbal treatment included the original formula with the addition of *Pu Gong Ying* (Herba Taraxaci), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Bai Shao* (Radix Paeoniae Alba).¹²
5. **Peptic ulcer disease:** One study reported marked success using modified *Ban Xia Xie Xin Tang* to treat peptic ulcer disease in 32 patients (18 with gastric and 14 with duodenal ulcers). In addition to the base formula, modifications included the addition of *Pao Jiang* (Rhizoma Zingiberis Praeparatum) to replace *Gan Jiang* (Rhizoma Zingiberis) in patients with bleeding; *Pao Jiang* (Rhizoma Zingiberis Praeparatum) and *Xiao Ji* (Herba Cirsii) for hematemesis; *Pao Jiang* (Rhizoma Zingiberis Praeparatum), *Xiao Ji* (Herba Cirsii), and *E Jiao* (Colla Corii Asini) for hematochezia; *Pao Jiang* (Rhizoma Zingiberis Praeparatum), *Xiao Ji* (Herba Cirsii), *E Jiao* (Colla Corii Asini) and *Bai Ji* (Rhizoma Bletillae) for hematochezia and hematemesis; and *Yan Hu Suo* (Rhizoma Corydalis) for abdominal pain. Of 32 patients, bleeding stopped in 21 patients after 4 packs of herbs, in 7 patients after 6 packs of herbs, and in 4 patients after 10 packs of herbs.¹³

Bàn Xià Xié Xīn Tāng (Pinellia Decoction to Drain the Epigastrium)

6. **Reflux esophagitis:** An herbal formula that contained *Ban Xia Xie Xin Tang* plus *Zhu Ru* (Caulis Bambusae in Taenia), *Chen Xiang* (Lignum Aquilariae Resinatum) and *Zi Su Geng* (Caulis Perillae) was found to have good effect in treating 46 patients with reflux esophagitis. In addition to the base formula above, minor modifications were made by adding *Bai Shao* (Radix Paeoniae Alba) and *Wei Ling Xian* (Radix et Rhizoma Clematidis) for severe pain with difficulty swallowing; *Hai Piao Xiao* (Endoconcha Sepiae) and calcined *Wa Leng Zi* (Concha Arcae) for hyperacidity or duodenal ulcer; *Pu Gong Ying* (Herba Taraxaci) and *Zhi Zi* (Fructus Gardeniae) for burning in the stomach; *Chai Hu* (Radix Bupleuri) and *Jin Qian Cao* (Herba Lysimachiae) for cholecystitis or hypochondriac pain; and *Da Huang* (Radix et Rhizoma Rhei) and *Zhi Shi* (Fructus Aurantii Immaturus) for constipation. Of 46 patients, 8 had complete recovery, 34 had marked improvement, and 4 had no effect. The overall effectiveness was 91.3%.¹⁴
7. **Upper gastrointestinal bleeding:** According to one study, 39 patients with upper gastrointestinal bleeding were successfully treated with modified *Ban Xia Xie Xin Tang*. The average time needed to completely stop bleeding was 4.3 days, with a range of 3–6 days. The herbal treatment included the original formula with the addition of *Hua Rui Shi* (Ophicalciturum) 12g, *Ou Jie* (Nodus Nelumbinis Rhizomatis) 15g, and *Bai Ji* (Rhizoma Bletillae) 15g. Furthermore, *Mu Dan Pi* (Cortex Moutan), *Huang Qi* (Radix Astragali), *Dang Gui* (Radix Angelicae Sinensis), *Sha Shen* (Radix Glehniae seu Adenophorae), *Yu Zhu* (Rhizoma Polygonati Odorati), and others were added as needed.¹⁵
8. **Morning sickness:** In one report, 25 pregnant women with nausea and vomiting were treated with *Ban Xia Xie Xin Tang* for 6 doses with complete relief in 19 patients, and significant improvement in 6 patients.¹⁶ In another report, 13 pregnant women with nausea and vomiting were treated with *Ban Xia Xie Xin Tang* plus *Zhu Ru* (Caulis Bambusae in Taenia) 15g. The study reported complete relief in 6 patients after 4 doses, and 7 patients after 6 doses.¹⁷
9. **Infantile indigestion:** Fifty-two infants with indigestion due to various reasons were treated with modified *Ban Xia Xie Xin Tang* with complete recovery in 1 to 4 doses. The base formula included *Ban Xia* (Rhizoma Pinelliae) 2g, *Huang Qin* (Radix Scutellariae) 2g, *Gan Jiang* (Rhizoma Zingiberis) 2g, *Dang Shen* (Radix Codonopsis) 2g, *Ge Gen* (Radix Puerariae Lobatae) 2g, *Fu Ling* (Poria) 2g, *Che Qian Zi* (Semen Plantaginis) 2g, *Huang Lian* (Rhizoma Coptidis) 1g, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 1g, and *Da Zao* (Fructus Jujubae) 6 pieces. Moreover, the following modifications were made: *Xuan Fu Hua* (Flos Inulae) 2g for severe nausea and vomiting; *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 3g, *Shan Yao* (Rhizoma Dioscoreae) 3g and *Qin Pi* (Cortex Fraxini) 2g for severe diarrhea; and charred *Shan Zha* (Fructus Crataegi) 2g, charred *Shen Qu* (Massa Fermentata) 2g and charred *Mai Ya* (Fructus Hordei Germinatus) 2g for food stagnation.¹⁸
10. **Gastroptosis:** One study reported 84.1% effectiveness using *Ban Xia Xie Xin Tang* plus *San Qi* (Radix et Rhizoma Notoginseng), *Huang Qi* (Radix Astragali), and *Sheng Ma* (Rhizoma Cnicifugae) to treat 38 patients with stomach prolapse characterized by Spleen deficiency and qi collapse (30 patients) and Stomach yin deficiency (8 patients). In addition to the base formula above, modifications were made by adding *Mai Ya* (Fructus Hordei Germinatus) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) for poor appetite; and *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Dong* (Radix Ophiopogonis), *Yu Zhu* (Rhizoma Polygonati Odorati), and *Di Huang* (Radix Rehmanniae) for Stomach yin deficiency. Of 38 patients, the study reported a marked effect in 20 patients, moderate effect in 12 patients, and no benefit in 6 patients.¹⁹
11. **Gastroenteritis:** One study reported good results using modified *Ban Xia Xie Xin Tang* to treat acute gastroenteritis. In addition to the base formula, modifications were made as follows: double the dose of *Huang Lian* (Rhizoma Coptidis) if there are more than five bowel movements (diarrhea) per day; *Ge Gen* (Radix Puerariae Lobatae) for presence of excessive heat; *Sheng Jiang* (Rhizoma Zingiberis Recens) for nausea, vomiting, or feeling of coldness in the abdomen; and *Mu Xiang* (Radix Aucklandiae) for abdominal fullness. Of 100 patients, 78 had complete recovery, 14 had improvement, and 8 had no effect. The overall rate of effectiveness was 92%.²⁰
12. **Stomach pain:** One study reported 94% effectiveness using this formula to treat 100 geriatric patients (ages 60 and over) with stomach pain caused by gastritis, stomach ulcer and duodenal ulcer.²¹ In another study, 294 of 300 patients with stomach pain (caused by gastritis, or gastric or duodenal ulcers) had complete recovery using modified *Ban Xia Xie Xin Tang*.²²
13. **Abdominal pain:** Use of *Ban Xia Xie Xin Tang* plus *Yan Hu Suo* (Rhizoma Corydalis), *Zhi Qiao* (Fructus Aurantii), and others to treat 36 children with abdominal pain was associated with complete recovery in 34 patients and improvement in 2 patients. The overall rate of effectiveness was 94.4%.²³
14. **Irritable bowel syndrome (IBS):** Administration of *Ban Xia Xie Xin Tang* plus *Chai Hu* (Radix Bupleuri), *Mu Xiang* (Radix Aucklandiae), *Bai Shao* (Radix Paeoniae Alba), and *Yan Hu Suo* (Rhizoma Corydalis) daily for 4 weeks in 37 patients with IBS was associated with

Bàn Xià Xiè Xīn Tāng (Pinellia Decoction to Drain the Epigastrium)

complete recovery in 25 patients, improvement in 8 patients, and no effect in 4 patients. The overall effectiveness was 89.19%.²⁴ According to another study, 56 patients with IBS were treated with complete recovery in 35 patients (62.5%), improvement in 17 patients (30.36%), and no effect in 4 patients (7.14%). The herbal formula contained *Ban Xia Xie Xin Tang* plus *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Mu Xiang* (Radix Aucklandiae) and *Bai Shao* (Radix Paeoniae Alba) as the base formula. Additional modifications included *Che Qian Zi* (Semen Plantaginis), *Bian Dou Yi* (Pericarpium Lablab Album), *Zhu Ling* (Polyporus) and *Ze Xie* (Rhizoma Alismatis) for loose stools; *Bai Tou Weng* (Radix Pulsatillae) and *Huang Bo* (Cortex Phellodendri Chinensis) for sticky stools with mucus; *Da Huang* (Radix et Rhizoma Rhei) for constipation; *Yi Yi Ren* (Semen Coicis) and *Huo Xiang* (Herba Agastaches) for dampness; *Bu Gu Zhi* (Fructus Psoraleae) for yang deficiency; *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Zhu Ru* (Caulis Bambusae in Taenia) for nausea and vomiting; and the addition of *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus), and elimination of *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Da Zao* (Fructus Jujubae) for abdominal distention, borborygmus, and pain that intensifies with pressure.²⁵

15. Ulcerative colitis: Use of modified *Ban Xia Xie Xin Tang* was associated with 96.9% effectiveness in treating 33 patients with chronic ulcerative colitis. The base herbal formula contained this formula without *Da Zao* (Fructus Jujubae), and with the addition of *Da Huang* (Radix et Rhizoma Rhei). Furthermore, modifications based on individual conditions were made by adding *Mu Xiang* (Radix Aucklandiae), *Bai Shao* (Radix Paeoniae Alba), and *Dang Gui* (Radix Angelicae Sinensis) for abdominal pain; charred *Mu Dan Pi* (Cortex Moutan), charred *Di Huang* (Radix Rehmanniae), and charred *Huai Hua* (Flos Sophorae) for hematochezia; *Yi Yi Ren* (Semen Coicis) and *Ma Chi Xian* (Herba Portulacae) for severe diarrhea; *Sheng Ma* (Rhizoma Cimicifugae) for rectal tenesmus; *Chai Hu* (Radix Bupleuri) and *Zhi Qiao* (Fructus Aurantii) for hypochondriac fullness and pain; and the removal of *Huang Lian* (Rhizoma Coptidis) and the addition of *Bu Gu Zhi* (Fructus Psoraleae) and *Rou Gui* (Cortex Cinnamomi) for chronic diarrhea with soreness and coldness of the lower back and knees. Of 33 patients, 17 had complete recovery, 8 had marked improvement, 7 had moderate improvement, and 1 had no improvement.²⁶

16. Diarrhea: Administration of 1 pack of *Ban Xia Xie Xin Tang* was effective in treating 20 of 25 patients with acute onset of diarrhea characterized by the presence of

severe diarrhea, feeling of distention and oppression, and vomiting.²⁷

17. Cholecystitis and cholelithiasis: Administration of modified *Ban Xia Xie Xin Tang* in 42 patients with chronic cholecystitis and cholelithiasis was associated with significant improvement in 25 patients, moderate improvement in 13 patients, and no improvement in 4 patients. The base formula included *Ban Xia Xie Xin Tang*, with the addition of *Hai Jin Sha* (Spora Lygodii), *Jin Qian Cao* (Herba Lysimachiae), and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), and elimination of *Da Zao* (Fructus Jujubae). Furthermore, *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Fu Ling* (Poria) were added for qi deficiency; *Da Huang* (Radix et Rhizoma Rhei) for constipation; and the addition of *Chuan Lian Zi* (Fructus Toosendan), *Pu Gong Ying* (Herba Taraxaci), *Hu Zhang* (Rhizoma et Radix Polygoni Cuspidati), and *Yin Chen* (Herba Artemisiae Scopariae) and elimination of *Dang Shen* (Radix Codonopsis) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) for a yellow, greasy tongue coating with a bitter taste in the mouth.²⁸

18. Hepatitis: Administration of an herbal formula in 81 patients with chronic active hepatitis was associated with complete recovery in 46 patients (resolution of all symptoms and normalization of liver enzymes), improvement in 19 patients (improvement of symptoms and reduction of liver enzyme levels by 30% or more), and no effect in 16 patients. The herbal treatment contained *Ban Xia Xie Xin Tang* plus *Cang Zhu* (Rhizoma Atractylodis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Yin Chen* (Herba Artemisiae Scopariae) as the base formula. Furthermore, *Zhi Zi* (Fructus Gardeniae) and *Che Qian Cao* (Herba Plantaginis) were added for dry mouth, yellow, greasy tongue coating, and yellow urine; *Hou Po* (Cortex Magnoliae Officinalis) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) for abdominal fullness and distention; *Di Huang* (Radix Rehmanniae), *Gou Qi Zi* (Fructus Lycii), and *Mai Dong* (Radix Ophiopogonis) for soreness and weakness of the lower back and knees; and *Yan Hu Suo* (Rhizoma Corydalis) and *Xiang Fu* (Rhizoma Cyperi) for hypochondriac fullness and pain.²⁹

19. Renal failure: Fifty patients with chronic renal failure due to various causes showed improvement when treated with *Ban Xia Xie Xin Tang* plus *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Rou Gui* (Cortex Cinnamomi), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Ze Xie* (Rhizoma Alismatis) as the base formula.³⁰

20. Stress and depression: One study evaluated the clinical usefulness of herbal formulas in treating stress and depression by examining the modulatory effects of the

Bàn Xià Xié Xīn Tāng (Pinellia Decoction to Drain the Epigastrium)

herbs on the hypothalamo-pituitary-adrenal axis and autonomic nervous function. Of several formulas tested, three were found to be effective on plasma ACTH and cortisol levels under stress. The study stated that the modulatory effects of these formulas might be beneficial in treating stress-related disease. Three formulas that were found to be effective were *Liu Jun Zi Tang* (Six-Gentlemen Decoction), *Ban Xia Xie Xin Tang*, and *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction).³¹

HERB-DRUG INTERACTION

- **Cisplatin- and irinotecan-induced diarrhea:** Diarrhea induced by cisplatin (Platinol) and irinotecan (Camptosar) was effectively controlled with *Ban Xia Xie Xin Tang* (7.5 g/day) in patients with advanced non-small-cell lung cancer. In comparison with the control group, patients who received *Ban Xia Xie Xin Tang* showed a significant improvement in diarrhea grades ($P=0.044$), as well as a reduced frequency of diarrhea grades 3 and 4 (one patient versus ten patients; $P=0.018$).³² The mechanisms of this action was attributed to accelerated healing of the intestinal tract, improved colonic water absorption, and decreased levels of colonic prostaglandin E2 (PGE2).³³ In another study, use of *Ban Xia Xie Xin Tang* was also found to be effective in preventing and controlling diarrhea induced by cisplatin and irinotecan (CPT-11) in patients with non-small-cell lung cancer. In comparison with the 23 patients in the control group that did not receive any herbs, 18 patients in the herb group showed a significant improvement in diarrhea grades and reduced frequency of diarrhea grades. The therapeutic benefit of preventing and controlling diarrhea was attributed in part to baicalin, a beta-glucuronidase inhibitor.³⁴
- **Irinotecan-induced diarrhea:** Numerous studies have shown that diarrhea induced by irinotecan (Camptosar) can be effectively controlled and treated with administration of *Ban Xia Xie Xin Tang*.^{35,36,37}

TOXICOLOGY

Administration of *Ban Xia Xie Xin Tang* was associated with one case of pneumonitis in a 72-year-old woman. Upon admission to the hospital and discontinuation of the formula, the symptoms were relieved, and the X-ray findings improved markedly. This is believed to be the first case of pulmonary hypersensitivity induced by *Ban Xia Xie Xin Tang* in Japan.³⁸

AUTHORS' COMMENTS

The original use of *Ban Xia Xie Xin Tang* aimed at treating Stomach qi disharmony caused by maltreatment of *shaoyang* syndrome with downward draining herbs. Today, the contemporary applications of this formula have been vastly

expanded to include various gastrointestinal disorders characterized by the presence of hot and cold, exterior and interior, and disharmony of the Stomach and Intestines.

Ban Xia Xie Xin Tang is based on *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) without *Chai Hu* (Radix Bupleuri) and *Sheng Jiang* (Rhizoma Zingiberis Recens), and with the addition of *Huang Lian* (Rhizoma Coptidis) and *Gan Jiang* (Rhizoma Zingiberis). This is the best formula to treat epigastric pain caused by various kinds of digestive dysfunctions.

A question is often raised as to why *Ban Xia Xie Xin Tang*, a formula that treats epigastric distention and fullness, would contain *Ren Shen* (Radix et Rhizoma Ginseng), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Da Zao* (Fructus Jujubae), three tonic herbs that could create more stagnation. The answer is that in *Ban Xia Xie Xin Tang*, epigastric distention and fullness are not caused by damp accumulation or stagnation, conditions that could be worsened with the use of tonic herbs. Instead, epigastric distention and fullness occur as a result of the misuse of herbs that injure the middle *jiao*, thus creating disruption of Stomach functioning in addition to heat and cold stagnation in the middle *jiao*. In this case, *Ren Shen* (Radix et Rhizoma Ginseng), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Da Zao* (Fructus Jujubae) serve to protect the Spleen, restore normal digestive functioning, and restore *zheng* (upright) *qi* which was damaged by the use of downward draining herbs.

There are three “*Xie Xin Tang* (Drain the Epigastrium)” formulas listed that treat epigastric fullness and distention. Even though the main symptoms are the same, the causes are different. Different causes in turn require different treatments. With minute changes in the composition and dosage of the formulas, their properties change as well.

- *Ban Xia Xie Xin Tang* treats epigastric distention caused by interlocking of heat and cold.
- *Sheng Jiang Xie Xin Tang* (Fresh Ginger Decoction to Drain the Epigastrium) treats epigastric distention caused by interlocking of heat and water.
- *Gan Cao Xie Xin Tang* (Licorice Decoction to Drain the Epigastrium) treats epigastric fullness caused by Stomach deficiency.

According to Dr. Chang Wei-Yen, *Huo Xiang Zheng Qi San* (Agastache Powder to Rectify the Qi) can be combined with *Ban Xia Xie Xin Tang* to treat vomiting, diarrhea, and epigastric pain caused by improper food intake or food poisoning. This combination is also effective in improving appetite in children.

(Fresh Ginger Decoction to Drain the Epigastrium)

生薑瀉心湯

生姜泻心汤

Pinyin Name: *Sheng Jiang Xie Xin Tang*

Literal Name: Fresh Ginger Decoction to Drain the Epigastrium

Alternate Name: Pinellia and Ginger Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Ban Xia</i> (Rhizoma Pinelliae), <i>xi</i> (washed)	0.5 cup [9g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>qie</i> (sliced)	12g [12g]
<i>Gan Jiang</i> (Rhizoma Zingiberis)	3g [3g]
<i>Huang Qin</i> (Radix Scutellariae)	9g [6g]
<i>Huang Lian</i> (Rhizoma Coptidis)	3g [3g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	9g [6g]
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	12 pieces [4 pieces]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	9g [6g]

Note: “Xie xin” literally means to “drain the Heart.” However, the term is really used to indicate draining the area beneath the Heart, namely the epigastrium. Therefore, the literal name of the formula has been modified to reflect its actual applications.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 10 cups [2,000 mL] of water until 6 cups [1,200 mL] of liquid remain. Discard the residue and cook the strained decoction again until it is reduced to 3 cups [600 mL]. Take 1 cup [200 mL] of the warm decoction three times daily. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Harmonizes the Stomach and corrects the reversed flow of qi
2. Disperses the interlocking of heat and water and relieves epigastric distention

CLINICAL MANIFESTATIONS

Spleen and Stomach deficiencies with interlocking of heat and water in the interior: epigastric distention and hardness, belching, foul breath, borborygmus, and diarrhea.

CLINICAL APPLICATIONS

Acute gastroenteritis, peptic ulcer, epigastric distention, diarrhea, and dysentery.

EXPLANATION

Sheng Jiang Xie Xin Tang (Fresh Ginger Decoction to

Drain the Epigastrium) was originally formulated for the following condition: individuals with exterior cold condition, who after inappropriate treatment with diaphoretic methods to release exterior cold, now suffers from damage to the middle *jiao*, deficiencies of the Spleen and Stomach, and interlocking of heat and water.

Sheng Jiang Xie Xin Tang aims at treating patients with Spleen and Stomach deficiencies, with the interlocking of heat and water in the interior. This formula is a modification of *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium), with the addition of *Sheng Jiang* (Rhizoma Zingiberis Recens) and a reduction in the dose of *Gan Jiang* (Rhizoma Zingiberis). Because water and heat are interlocked, *Sheng Jiang* (Rhizoma Zingiberis Recens) warms the Stomach, stops nausea, and disperses water accumulation. *Gan Jiang* (Rhizoma Zingiberis) warms the Stomach, but the dose is reduced to avoid creating too much heat. Clinically, patients may show epigastric distention and hardness, belching, foul breath, borborygmus, and diarrhea.

MODIFICATIONS

- With nausea and vomiting of clear fluids, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis).
- If accompanied by thirst and a desire to drink, add *Fu Ling* (Poria) and *Ze Xie* (Rhizoma Alismatis).
- With diarrhea and abdominal pain, add *Bai Shao* (Radix Paeoniae Alba) and *Chen Pi* (Pericarpium Citri Reticulatae).
- If there is indigestion, add *Ping Wei San* (Calm the Stomach Powder).

Shēng Jiāng Xiè Xīn Tāng

(Fresh Ginger Decoction to Drain the Epigastrium)

Sheng Jiang Xie Xin Tang (Fresh Ginger Decoction to Drain the Epigastrium)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Spleen and Stomach deficiencies with the interlocking of heat and water in the interior	Epigastric distention and hardness, belching, foul breath, borborygmus and diarrhea	<ul style="list-style-type: none">• Harmonizes the Stomach and corrects the reversed flow of qi• Disperses the interlocking of heat and water and relieves epigastric distention	<ul style="list-style-type: none">• <i>Ban Xia</i> (Rhizoma Pinelliae) disperses stagnation, relieves distention, and directs reversed Stomach qi downward.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) warms the Stomach, stops nausea, and disperses water accumulation.• <i>Gan Jiang</i> (Rhizoma Zingiberis) warms the Stomach.• <i>Huang Qin</i> (Radix Scutellariae) and <i>Huang Lian</i> (Rhizoma Coptidis) sedate heat and relieve distention.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Da Zao</i> (Fructus Jujubae) and <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify the middle <i>jiao</i> and strengthen the Spleen.

- With belching and water retention in the middle *jiao*, add *Wu Ling San* (Five-Ingredient Powder with Poria).

CLINICAL STUDIES AND RESEARCH

Epigastric distention: Use of modified *Sheng Jiang Xie Xin Tang* was effective in treating epigastric distention. Modifications included the elimination of *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Ban Xia* (Rhizoma Pinelliae) for excess heat; and the elimination of *Huang*

Qin (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis) for excess cold. Of 245 cases, the study reported complete recovery in 187 cases, improvement in 45 cases, and no effect in 13 cases.¹

Gān Cǎo Xiè Xīn Tāng (Licorice Decoction to Drain the Epigastrium)

Note: According to *Shang Han Lun* (Discussion of Cold-Induced Disorders), this formula does not contain *Ren Shen* (Radix et Rhizoma Ginseng). However, *Ren Shen* (Radix et Rhizoma Ginseng) is listed as an ingredient in many subsequent texts, such as *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty, *Qian Jin Yao Fang* (Thousand Ducat Prescriptions) by Sun Si-Miao in 581-685 A.D., and *Wai Tai Mi Yao* (Arcane Essentials from the Imperial Library) by Wang Tao in 752 A.D. Based on historical data and formulary analysis, most texts now include *Ren Shen* (Radix et Rhizoma Ginseng) as an ingredient.

“*Xiè xīn*” literally means to “drain the Heart.” However, the term is really used to indicate draining the area beneath the Heart, namely the epigastrium. Therefore, the literal name of the formula has been modified to reflect its actual applications.

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook the ingredients in 10 cups [2,000 mL] of water until 6 cups [1,200 mL] of liquid remain. Discard the residue and cook the strained decoction again until it is reduced to 3 cups [600 mL]. Take 1 cup [200 mL] of the warm decoction three times daily. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

- 1. Benefits qi and harmonizes the Stomach
- 2. Relieves epigastric distention and stops diarrhea

CLINICAL MANIFESTATIONS

Epigastric distention caused by Stomach deficiency and interlocking of heat and cold in the interior: epigastric fullness, distention and hardness, dry heaves, vomiting, irritability, borborygmus, and diarrhea with undigested food in the stools.

CLINICAL APPLICATIONS

Gastroenteritis, chronic gastritis, gastric or duodenal ulcers, hypersecretion of gastric acid, gastroparesis, chronic hepatitis, liver cirrhosis, motion sickness with nausea and vomiting, and stomatitis.

EXPLANATION

Gan Cao Xie Xin Tang (Licorice Decoction to Drain the Epigastrium) was originally formulated for the following condition: individuals with exterior cold condition, who after inappropriate treatment with downward draining herbs, now suffers from damage to the middle *jiao* and severe deficiencies of the Spleen and Stomach.

Gan Cao Xie Xin Tang is composed of *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium), plus an extra 3g of *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), which is used in this formula to tonify the Stomach and treat diarrhea with undigested food in the stools. Please refer to *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium) for the explanation of the etiology of this syndrome and the functions of the herbs in this formula.

Gan Cao Xie Xin Tang (Licorice Decoction to Drain the Epigastrium)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Epigastric distention caused by Stomach deficiency	Epigastric fullness, distention and hardness, dry heaves, vomiting, irritability, borborygmus, and diarrhea with undigested food in the stools	<ul style="list-style-type: none">• Benefits qi and harmonizes the Stomach• Relieves epigastric distention and stops diarrhea	<ul style="list-style-type: none">• <i>Ban Xia</i> (Rhizoma Pinelliae) disperses stagnation, relieves distention, and directs reversed Stomach qi downward to relieve nausea and vomiting.• <i>Gan Jiang</i> (Rhizoma Zingiberis) warms the middle <i>jiao</i> and disperses cold accumulation.• <i>Huang Qin</i> (Radix Scutellariae) and <i>Huang Lian</i> (Rhizoma Coptidis) sedate heat and relieve distention.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Da Zao</i> (Fructus Jujubae) tonify the middle <i>jiao</i> and strengthen the Spleen.• A larger dose of <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) greatly tonifies the Stomach and treats diarrhea with undigested food in the stools.

Gān Cǎo Xiè Xīn Tāng (Licorice Decoction to Drain the Epigastrium)

MODIFICATIONS

- When there is a feeling of fullness and oppression in the chest and hypochondriac region, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Jie Geng* (Radix Platycodonis).
- For diarrhea with abdominal pain, add *Mu Xiang* (Radix Aucklandiae) and *Bai Shao* (Radix Paeoniae Alba).
- With vomiting and belching, add *Chen Pi* (Pericarpium Citri Reticulatae) and *Fu Ling* (Poria).
- With vomiting and epigastric pain, combine with *San Huang Xie Xin Tang* (Three-Yellow Decoction to Sedate the Epigastrium).
- With vomiting with phlegm accumulation, combine with *Er Chen Tang* (Two-Cured Decoction).
- With vomiting of food particles, combine with *Ping Wei San* (Calm the Stomach Powder).

Huáng Lián Tāng (Coptis Decoction)

黃連湯
黄连汤

Pinyin Name: *Huang Lian Tang*

Literal Name: Coptis Decoction

Alternate Names: *Huang Lien Tang*, Coptis Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-jing in the Eastern Han Dynasty

COMPOSITION

<i>Huang Lian</i> (Rhizoma Coptidis)	9g [6g]
<i>Gan Jiang</i> (Rhizoma Zingiberis)	9g [6g]
<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g [6g]
<i>Ban Xia</i> (Rhizoma Pinelliae), <i>xi</i> (washed)	0.5 cup [9g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	6g [3g]
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	12 pieces [4 pieces]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	9g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to cook the ingredients in 10 cups [2,000 mL] of water until 6 cups [1,200 mL] of liquid remain. Take 1 cup [200 mL] of the warm, strained decoction three times during the day, and two times at night. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Regulates heat and cold imbalances
2. Harmonizes the Stomach and corrects the reversed flow of qi

CLINICAL MANIFESTATIONS

Heat in the chest and cold in the Stomach: irritability, a stifling sensation in the chest, nausea, abdominal pain, borborygmus, diarrhea, a white, slippery tongue coating, and a wiry pulse.

CLINICAL APPLICATIONS

Gastric ulcer, duodenal ulcer, atrophic gastritis, gastroenteritis, acid regurgitation, epigastric pain, stomatitis, acute food poisoning, and hangover.

EXPLANATION

Huang Lian Tang (Coptis Decoction) treats a condition complicated by both interlocking of heat and cold. The condition is commonly described as heat in the upper *jiao* (chest) and cold in the middle *jiao* (Stomach). Heat in the upper *jiao* directly affects the chest, leading to a stifling sensation, a feeling of oppression beneath the heart, and irritability. Cold in the middle *jiao* affects the flow of Stomach qi, causing nausea, vomiting, abdominal pain, borborygmus, and diarrhea.

Huang Lian (Rhizoma Coptidis) clears heat in the Stomach and upper *jiao*. *Gan Jiang* (Rhizoma Zingiberis) warms the middle and lower *jiaos*. *Gui Zhi* (Ramulus

Diagnosis	Signs and Symptoms	Treatment	Herbs
Heat in the chest and cold in the Stomach	<ul style="list-style-type: none">• Irritability with a stifling sensation in the chest: heat in the upper <i>jiao</i>• Nausea, vomiting, abdominal pain, borborygmus, and diarrhea: cold in the middle <i>jiao</i>	<ul style="list-style-type: none">• Regulates heat and cold imbalances• Harmonizes the Stomach and corrects the reversed flow of qi	<ul style="list-style-type: none">• <i>Huang Lian</i> (Rhizoma Coptidis) clears heat in the Stomach and the upper <i>jiao</i>.• <i>Gan Jiang</i> (Rhizoma Zingiberis) warms the middle and lower <i>jiaos</i>.• <i>Gui Zhi</i> (Ramulus Cinnamomi) disperses cold and warms the channels and collaterals.• <i>Ban Xia</i> (Rhizoma Pinelliae) harmonizes the Stomach and relieves nausea.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Da Zao</i> (Fructus Jujubae) and <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify and harmonize the middle <i>jiao</i>.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

Cinnamomi), acrid and warm, helps *Gan Jiang* (Rhizoma Zingiberis) disperse cold and also warms and opens the channels and collaterals. *Ban Xia* (Rhizoma Pinelliae) harmonizes the Stomach and relieves nausea. *Ren Shen* (Radix et Rhizoma Ginseng), *Da Zao* (Fructus Jujubae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify and harmonize the middle *jiao*. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) also harmonizes the herbs.

MODIFICATIONS

- With constipation, add *Da Huang* (Radix et Rhizoma Rhei).
- With watery diarrhea and dysentery, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- With nausea, vomiting, and diarrhea, add *Mu Xiang* (Radix Aucklandiae) and *Bai Shao* (Radix Paeoniae Alba).
- With nausea and a feeling of heat in the chest, add more *Huang Lian* (Rhizoma Coptidis) and *Zhu Ru* (Caulis Bambusae in Taenia).

CAUTIONS / CONTRAINDICATIONS

Huang Lian Tang should not be used in patients of nausea, vomiting, and stomach pain caused by yin deficiency.¹

PHARMACOLOGICAL EFFECTS

Antitumor: One study reported that *Huang Lian Tang* had an antitumor effect on esophageal cancer cells (ECCs) *in vitro*, and may be useful as an alternative therapy. Berberine, a compound in *Huang Lian* (Rhizoma Coptidis), is believed to be one of the main active constituents in this formula.²

CLINICAL STUDIES AND RESEARCH

1. **Atrophic gastritis:** Ninety-eight patients with chronic atrophic gastritis were treated with 98.97% effectiveness using *Huang Lian Tang* plus *Chai Hu* (Radix Bupleuri) and *San Leng* (Rhizoma Sparganii) as the base formula. Modifications were made based on the condition of each person, and included *Ren Shen* (Radix et Rhizoma Ginseng) at a larger dose for gastric pain due to deficiency; *Huang Lian* (Rhizoma Coptidis) for gastric pain due to excess; *Zhi Shi* (Fructus Aurantii Immaturus) for a feeling of oppression in the epigastrium; *Huang Qi* (Radix Astragali) for fatigue; *Fu Zi* (Radix Aconiti Lateralis Praeparata) for chills; *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for qi deficiency and poor appetite; *Shen Qu* (Massa Fermentata) for food stagnation; *Fu Ling* (Poria) for loose stools; *Da Huang* (Radix et Rhizoma Rhei) for dry stools; *Huang Qin* (Radix Scutellariae) for bitter taste in the mouth; *Gui Zhi* (Ramulus Cinnamomi) at a larger dose for white, greasy tongue coat; and *Sheng Jiang* (Rhizoma Zingiberis Recens) to replace *Gan Jiang* (Rhizoma Zingiberis) for nausea and vomiting. Of the 98 patients, the study reported recovery in 16 patients, significant improvement in 64 patients, moderate improvement in 17 patients, and no effect in 1 patient.³
2. **Epigastric pain:** Use of modified *Huang Lian Tang* was associated with 95% effectiveness in treating epigastric pain in 40 patients (between 25-55 years of age, with 3 days to 5 years history of illness). The herbal treatment contained *Huang Lian* (Rhizoma Coptidis) 10g, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 10g, *Gan Jiang* (Rhizoma Zingiberis) 10g, *Ban Xia* (Rhizoma Pinelliae) 10g, *Ren Shen* (Radix et Rhizoma Ginseng) 6g, and *Da Zao* (Fructus Jujubae) 7 pieces. Modifications

Huáng Lián Tāng (Coptis Decoction)

include *Dou Kou* (Fructus Amomi Rotundus) 6g, *Zhi Qiao* (Fructus Aurantii) 10g, and *Shen Qu* (Massa Fermentata) 10g for poor appetite and qi stagnation; *Dang Shen* (Radix Codonopsis) 15g and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 10g for qi deficiency; *Chuan Lian Zi* (Fructus Toosendan) 10g and *Huang Qin* (Radix Scutellariae) 10g for Liver and Stomach heat; *Wu Zhu Yu* (Fructus Evodiae) 10g and calcined *Wa Leng Zi* (Concha Arcae) 15g for acid reflux and belching; and *Gui Zhi* (Ramulus Cinnamomi) and *Gan Jiang* (Rhizoma Zingiberis) for cold extremities. The treatment protocol was to cook the herbs in water and administer the decoction in three equally-divided doses daily. The average duration of treatment was 6 days. Of the 40 patients, the study reported complete relief in 22 patients, improvement in 16 patients, and no benefit in 2 patients.⁴

TOXICOLOGY

Huang Lian Tang has very little toxicity. According to one study, oral administration of this formula in powder form at 27g/kg for 7 days (equivalent to 400 times the normal therapeutic dose) did not cause any fatality in mice. All subjects showed no abnormalities with eating, drinking, or regular activities.⁵

AUTHORS' COMMENTS

Ban Xia Xie Xin Tang (Pinellia Decoction to Drain the Epigastrium) and *Huang Lian Tang* have similar composition. However, *Ban Xia Xie Xin Tang* contains a lower dose of *Huang Lian* (Rhizoma Coptidis), and has the

addition of *Huang Qin* (Radix Scutellariae); while *Huang Lian Tang* contains a higher dose of *Huang Lian* (Rhizoma Coptidis), and has the addition of *Gui Zhi* (Ramulus Cinnamomi).

- *Ban Xia Xie Xin Tang* treats heat and cold accumulation in the chest and epigastric areas with predominant distention and nausea or vomiting. *Huang Qin* (Radix Scutellariae), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Ban Xia* (Rhizoma Pinelliae) open and direct stagnation downward.
- *Huang Lian Tang* treats epigastric distention with heat in the upper *jiao*, and cold in the middle *jiao*. The higher dose of *Huang Lian* is used to enhance the overall effect of the formula to clear heat from the upper *jiao*, while the addition of *Gui Zhi* (Ramulus Cinnamomi) helps *Gan Jiang* (Rhizoma Zingiberis) warm the Spleen, and opens and warms the channels and collaterals.

Chapter 3 — Summary

— Harmonizing Formulas

SECTION 1: SHAOYANG HARMONIZING FORMULAS

Name	Similarities	Differences
<i>Xiao Chai Hu Tang</i> (Minor Bupleurum Decoction)		Standard formula to treat <i>shaoyang</i> syndrome: tonifies qi and strengthens the body
<i>Chai Hu Gui Zhi Tang</i> (Bupleurum and Cinnamon Twig Decoction)		Treats <i>taiyang</i> and <i>shaoyang</i> syndromes: dispels pathogenic factors from both stages
<i>Chai Ling Tang</i> (Bupleurum and Poria Decoction)	Harmonize the exterior and interior to treat <i>shaoyang</i> syndrome	Treats <i>shaoyang</i> syndrome with water accumulation: dispels water stagnation, eliminates phlegm accumulation
<i>Chai Xian Tang</i> (Bupleurum Decoction to Raise the Sunken)		Treats <i>shaoyang</i> syndrome with phlegm stagnation: eliminates phlegm, regulates qi circulation in the chest
<i>Hao Qin Qing Dan Tang</i> (Artemisia Annua and Scutellaria Decoction to Clear the Gallbladder)		Treats damp-heat in the Gallbladder: dispels dampness, dissolves phlegm
<i>Chai Hu Da Yuan Yin</i> (Bupleurum Decoction to Reach the Membrane Source)		Treats damp and phlegm obstruction at the <i>mo yuan</i> (membrane source)

Xiao Chai Hu Tang (Minor Bupleurum Decoction) is the standard formula to harmonize *shaoyang* syndrome, a condition characterized by the presence of pathogenic factors located between the exterior and interior. In addition, this formula also tonifies qi and strengthens the body. Listed below are three variations of *Xiao Chai Hu Tang* that treat *shaoyang* syndrome with complications.

- *Chai Hu Gui Zhi Tang* (Bupleurum and Cinnamon Twig Decoction) treats both *taiyang* and *shaoyang* syndromes. It is formulated by combining two formulas together: *Xiao Chai Hu Tang* to treat *shaoyang* syndrome, and *Gui Zhi Tang* (Cinnamon Twig Decoction) to treat *taiyang* syndrome.
- *Chai Ling Tang* (Bupleurum and Poria Decoction) treats *shaoyang* syndrome with accumulation of water, dampness, and phlegm. It is formulated by combining two formulas together: *Xiao Chai Hu Tang* to treat the *shaoyang* syndrome, and *Wu Ling San* (Five-Ingredient Powder with Poria) to treat water accumulation.
- *Chai Xian Tang* (Bupleurum Decoction to Raise the Sunken) treats *shaoyang* syndrome with phlegm obstruction and qi stagnation in the chest. It is formulated by combining two formulas together: *Xiao Chai Hu Tang* to treat the *shaoyang* syndrome, and *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction) to treat phlegm obstruction and qi stagnation in the chest.

Hao Qin Qing Dan Tang (Artemisia Annua and Scutellaria Decoction to Clear the Gallbladder) and *Chai Hu Da Yuan Yin* (Bupleurum Decoction to Reach the Membrane Source) are two formulas that have similar functions to harmonize the exterior and interior to treat *shaoyang* syndrome.

- *Hao Qin Qing Dan Tang* cleanses the Gallbladder, harmonizes the Stomach, eliminates dampness, and dissolves phlegm. It is used to treat summer-heat invading the *shaoyang* with stagnation of dampness and phlegm. Hence, this formula is especially effective in treating *shaoyang* syndrome with severe interior heat accompanied by some dampness and phlegm.
- *Chai Hu Da Yuan Yin* eliminates obstruction of dampness and phlegm at the *mo yuan* (membrane source) and harmonizes the exterior and interior of the body.

Chapter 3 — Summary

SECTION 2: LIVER AND SPLEEN HARMONIZING FORMULAS

Name	Similarities	Differences
Si Ni San (Frigid Extremities Powder)		Circulates yang qi to relieve <i>shaoyin</i> syndrome with frigid extremities
Chai Hu Shu Gan San (Bupleurum Powder to Spread the Liver)		Strongly activates qi circulation
Shu Gan Tang (Spread the Liver Decoction)	Regulate Liver qi circulation, relieve Liver qi stagnation	Strongly invigorates blood circulation
Chai Hu Qing Gan Tang (Bupleurum Decoction to Clear the Liver)		Clears heat from the Liver, Gallbladder, and <i>San Jiao</i> channels
Yi Gan San (Restrain the Liver Powder)		Clears Liver heat, nourishes Liver blood
Xiao Yao San (Rambling Powder)	Soothe the Liver and relieve qi stagnation, strengthen the Spleen, nourish blood	Treats Liver qi stagnation
Jia Wei Xiao Yao San (Augmented Rambling Powder)		Treats Liver qi stagnation with heat and fire
Tong Xie Yao Fang (Important Formula for Painful Diarrhea)	Sedates the Liver, tonifies the Spleen	Dispels dampness and stops diarrhea

Si Ni San (Frigid Extremities Powder) ventilates the pathogens outward, relieves constraint, spreads Liver qi, and harmonizes the Liver and Spleen. It treats *shaoyin* syndrome characterized by frigid extremities, or disharmony of the Liver and Spleen. Clinical manifestations include cold extremities, epigastric and abdominal pain, and diarrhea.

Chai Hu Shu Gan San (Bupleurum Powder to Spread the Liver) and **Shu Gan Tang** (Spread the Liver Decoction) both treat Liver qi stagnation with blood stasis characterized by hypochondriac fullness and pain with alternating fever and chills.

- **Chai Hu Shu Gan San** has stronger effect to activate qi circulation.
- **Shu Gan Tang** is more effective to invigorate blood circulation and eliminate blood stasis.

Chai Hu Qing Gan Tang (Bupleurum Decoction to Clear the Liver) is a potent formula that clears heat in the Liver, Gallbladder, and *San Jiao* channels. Clinical manifestations include fever, chills, epistaxis, loss of hearing, and swelling of the lymph nodes.

Yi Gan San (Restrain the Liver Powder) treats a complex condition of both excess (Liver heat) and deficiency (Liver blood). Clinical signs and symptoms include fever, easily frightened and scared, muscle spasms and contraction, clenching of the teeth, nervousness, irritability, restlessness, insomnia, epilepsy, and alternating spells of fever and chills.

Xiao Yao San (Rambling Powder) nourishes the blood, smoothes the Liver, and strengthens the Spleen. It treats Liver qi stagnation (often due to blood deficiency) and deficiency of the Spleen. Clinical manifestations include hypochondriac pain, alternating spells of fever and chills, headache, vertigo, a dry mouth and dry throat, low appetite, lassitude, irregular menstruation, and breast distention.

Jia Wei Xiao Yao San (Augmented Rambling Powder) is formulated by adding *Mu Dan Pi* (Cortex Moutan) and *Zhi Zi* (Fructus Gardeniae) to **Xiao Yao San** (Rambling Powder). In comparison to the base formula, **Jia Wei Xiao Yao San** (Augmented Rambling Powder) has an enhanced effect to clear heat and sedate fire, and is more suitable for cases in which Liver qi stagnation is turning into Liver heat and fire.

Chapter 3 — Summary

Tong Xie Yao Fang (Important Formula for Painful Diarrhea) mainly treats abdominal pain and diarrhea caused by Liver overacting on the Spleen. The abdominal pain in this case usually persists after defecation.

SECTION 3: INTESTINE AND STOMACH HARMONIZING FORMULAS

Name	Similarities	Differences
<i>Ban Xia Xie Xin Tang</i> (Pinellia Decoction to Drain the Epigastrium)	“Drain the epigastrium” to relieve feeling of epigastric distention	Eliminates the interlocking of heat and cold
<i>Sheng Jiang Xie Xin Tang</i> (Fresh Ginger Decoction to Drain the Epigastrium)		Eliminates the interlocking of water and heat
<i>Gan Cao Xie Xin Tang</i> (Licorice Decoction to Drain the Epigastrium)		Tonifies Stomach deficiency
<i>Huang Lian Tang</i> (Coptis Decoction)	Regulates heat and cold imbalances	Treats heat in the upper <i>jiao</i> (chest) and cold in the middle <i>jiao</i> (Stomach)

Ban Xia Xie Xin Tang (Pinellia Decoction to Drain the Epigastrium), *Sheng Jiang Xie Xin Tang* (Fresh Ginger Decoction to Drain the Epigastrium), and *Gan Cao Xie Xin Tang* (Licorice Decoction to Drain the Epigastrium) are three formulas with similar names and functions: “*xie xin*” means “to drain the epigastrium.”

- *Ban Xia Xie Xin Tang* treats epigastric distention caused by the interlocking of heat and cold. It activates qi stagnation, lowers the reversed flow of qi, and relieves epigastric distention and fullness.
- *Sheng Jiang Xie Xin Tang* treats epigastric distention caused by the interlocking of water and heat. It eliminates water accumulation, disperses nodules, harmonizes the Stomach, and relieves epigastric distention and hardness.
- *Gan Cao Xie Xin Tang* treats epigastric distention caused by Stomach deficiency. It tonifies qi, stops diarrhea, harmonizes the Stomach, and relieves epigastric distention, fullness and hardness.

Huang Lian Tang (Coptis Decoction) treats irritability and stifling sensations in the chest by resolving heat in the upper *jiao* and cold in the middle *jiao*. It regulates heat and cold imbalances, harmonizes the Stomach, and corrects the reversed flow of qi.

刘完素 Lǐu Yuǎn-Sù

刘完素 Lǐu Yuǎn-Sù, 1120 – 1200.

刘完素 Lǐu Yuǎn-Sù

黄帝素问宣明论方 *Huang Di Su Wen Xuan Ming Lun Fang* (Formulas from the Discussion Illuminating the Yellow Emperor's Basic Questions) in 1172.

One of the most famous physicians of the Song and Jin dynasties, Liu Yuan-Su was born in the dry environment of northern China. People in the region primarily ate meat and cheese, foods that are warm and create dampness. Liu practiced medicine largely in times of war, thus his clinical practice was mainly concerned with injuries, subsequent infections, and death. Because of those geographic and historical influences, Liu developed 火热论 *huo re lun* (discussion of fire and heat), and proposed the use of cool and cold substances to treat heat and fire disorders. Liu believed that among *liu yin* (the six exogenous factors of wind, cold, summer-heat, dampness, dryness, and fire), heat (including summer-heat) and fire are the dominant factors in causing disorders. Liu's works are important because they introduced a concept significantly different from the classic theories of *shang han* (cold damage) by Zhang Zhong-Jing, which had been the main school of thought up to that time.

Liu Yuan-Su wrote many books in his lifetime, among the most famous are:

- 黄帝素问宣明论方 *Huang Di Su Wen Xuan Ming Lun Fang* (Formulas from the Discussion Illuminating the Yellow Emperor's Basic Questions)
- 宣明论方 *Xuan Ming Lun Fang* (Discussion of Dispersing and Brightening Formulas)
- 伤寒直格方论 *Shang Han Zhi Ge Fang Lun* (Direct Investigations of Formulas for Cold-Induced Disorders)

Some sample herbal formulas found in the wealth of clinical information in these texts are:

- *Fang Feng Tong Sheng San* (Saposhnikovia Powder that Sagely Unblocks)
- *Liu Yi San* (Six-to-One Powder)
- *Gui Ling Gan Lu Yin* (Cinnamon and Poria Sweet Dew Decoction)
- *Di Huang Yin Zi* (Rehmannia Decoction)

Chapter 4 — Overview

— Exterior- and Interior-Releasing Formulas

Definition: Exterior- and interior-releasing formulas simultaneously treat exterior and interior syndromes. They incorporate strategies such as *han fa* (sweating), *xia fa* (draining downward), *qing fa* (clearing), and *wen fa* (warming). These methods first appeared as parts of *ba fa* (eight treatment methods), as described in the *Huang Di Nei Jing* (Yellow Emperor's Inner Classic) in the first or second century, A.D.

Exterior- and interior-releasing formulas treat the concurrent presence of exterior and interior conditions. Exterior conditions, usually characterized by wind-cold or wind-heat, are treated with exterior-releasing herbs. Interior conditions, generally characterized by excess or deficiency, and heat or cold, are treated with downward draining, heat-clearing or interior-warming herbs. In this complex condition, treating only the exterior syndrome will not relieve the interior syndrome, and treating only the interior syndrome will not release the exterior syndrome. Therefore, it is necessary to address and treat both at the same time.

Note: The condition of an (excess) exterior syndrome accompanied by interior deficiency is also addressed in Chapter 1: Exterior-Releasing Formulas.

Exterior- and interior-releasing formulas treat concurrent exterior and interior conditions.

SUBCATEGORIES OF ACTION

Exterior- and interior-releasing formulas are organized in three subcategories to reflect the nature of the disorders and characteristics of the formulas.

1. Exterior-Releasing and Interior-Attacking Formulas

These formulas are applicable when there are pathogenic factors present at both the exterior and the interior. Exterior conditions are usually characterized by wind-heat or wind-cold, while interior conditions are usually characterized by excess and accumulation of heat or cold. Clinical manifestations include aversion to cold, fever, abdominal fullness, constipation, and a red tongue with a yellow tongue coating.

Two types of herbs commonly address this condition: exterior-releasing herbs such as *Ma Huang* (Herba Ephedrae), *Gui Zhi* (Ramulus Cinnamomi), *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), *Chai Hu* (Radix Bupleuri), and *Bo He* (Herba Menthae); and downward draining herbs such as *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas). Exemplar formulas include *Da Chai Hu Tang* (Major Bupleurum Decoction) and *Fang Feng Tong Sheng San* (Saposhnikovia Powder that Sagely Unblocks).

2. Exterior-Releasing and Interior-Clearing Formulas

These formulas treat wind-heat or wind-cold at the exterior co-existing with heat formation in the interior. Common signs and symptoms are aversion to cold, fever, irritability, restlessness, thirst, diarrhea, and dyspnea.

Two types of herbs commonly used to address this condition are: exterior-releasing herbs such as *Ma Huang* (Herba Ephedrae), *Dan Dou Chi* (Semen Sojae Praeparatum), and *Ge Gen* (Radix Puerariae Lobatae); and heat-clearing herbs such as *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), *Huang Bo* (Cortex Phellodendri Chinensis), and *Shi Gao* (Gypsum Fibrosum). Representative formulas include *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction) and *Shi Gao Tang* (Gypsum Decoction).

Chapter 4 — Overview

3. Exterior-Releasing and Interior-Warming Formulas

When there is cold both at the exterior and in the interior, clinical manifestations include aversion to cold, fever, coldness and pain in the epigastrium and abdomen, a white tongue coating, and a slow pulse.

Two types of herbs are commonly used to address this condition: exterior-releasing herbs such as *Ma Huang* (Herba Ephedrae) and *Bai Zhi* (Radix Angelicae Dahuricae); and interior-warming herbs such as *Gan Jiang* (Rhizoma Zingiberis) and *Rou Gui* (Cortex Cinnamomi). An exemplar formula is *Wu Ji San* (Five-Accumulation Powder).

CAUTIONS / CONTRAINDICATIONS

Exterior- and interior-releasing formulas should be used only when both exterior and interior syndromes are present.

- Formulas that release both exterior and interior pathogens should be used only when both exterior and interior syndromes are present.
- Carefully differentiate exterior and interior syndromes on the basis of heat or cold, as well as excess or deficiency, and location of the differentiated pathogens, before applying any of these formulas.
- Carefully adjust the dosages of herbs in a formula according to the level of severity and balance of exterior and interior symptoms.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Similar to harmonizing formulas that treat *shaoyang* syndrome, exterior- and interior-releasing formulas treat both exterior and interior syndromes simultaneously. From allopathic perspectives, these formulas treat liver disorders (hepatitis and fatty liver),^{1,2} gallbladder disorders (cholecystitis and cholelithiasis),³ pancreatitis,⁴ and gastrointestinal disorders (peptic ulcer, gastritis, gastric prolapse, diarrhea, dysentery, enteritis).^{5,6,7,8,9,10} Exemplar formulas include *Da Chai Hu Tang* (Major Bupleurum Decoction) and *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction).

Section 1

解表攻里剂

— Exterior-Releasing and Interior-Attacking Formulas

Dà Chái Hú Tāng (Major Bupleurum Decoction)

大柴胡湯

大柴胡汤

Pinyin Name: *Da Chai Hu Tang***Literal Name:** Major Bupleurum Decoction**Alternate Names:** *Ta Tsai Hu Tang*, Major Bupleurum Combination**Original Source:** *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty**COMPOSITION**

<i>Chai Hu</i> (Radix Bupleuri)	24g [15g]
<i>Huang Qin</i> (Radix Scutellariae)	9g
<i>Da Huang</i> (Radix et Rhizoma Rhei)	6g
<i>Zhi Shi</i> (Fructus Aurantii Immaturus), <i>zhi</i> (fried with liquid)	4 pieces [9g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	9g
<i>Ban Xia</i> (Rhizoma Pinelliae), <i>xi</i> (washed)	0.5 cup [9g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	15g
<i>Da Zao</i> (Fructus Jujubae)	12 pieces [4 pieces]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 12 cups [2,400 mL] of water until 6 cups [1,200 mL] of the liquid remain. Discard the residue and cook the strained decoction again to reduce it further. Take 1 cup [200 mL] of the warm decoction three times daily. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Harmonizes *shaoyang* syndrome
2. Purges interior heat in *yangming* syndrome

CLINICAL MANIFESTATIONS

Shaoyang and *yangming* syndromes: alternate spells of chills and fever, fullness of chest and hypochondrium, continuous vomiting, a feeling of depression with slight fidgeting, fullness, distention and pain in the epigastrium, constipation or discharge of fluids rectally, a thick yellow tongue coating, and a wiry, forceful pulse.

CLINICAL APPLICATIONS

Gallbladder disorders, cholelithiasis, cholecystitis, biliary

ascariasis, acute pancreatitis, hepatitis, fatty liver, hyperlipidemia, gastritis, gastric ulcer, duodenal ulcer, perforating ulcer, gastroenteritis, gastric prolapse, constipation, dysentery, acute tonsillitis, and obesity.

EXPLANATION

Da Chai Hu Tang (Major Bupleurum Decoction) treats *shaoyang* and *yangming* syndromes simultaneously by harmonizing the *shaoyang* stage and purging heat accumulation in the *yangming* stage. The clinical manifestations of alternating spells of chills and fever, fullness of the chest and hypochondrium, and continuous vomiting are all typical signs of a *shaoyang* pattern. A feeling of depression with slight fidgeting indicates a more severe form of *shaoyang* syndrome. Clinical manifestations indicating a *yangming* condition of excess heat include fullness and pain in the epigastrium and constipation. In severe cases, the stool may become so dry, hard and immobile, leading to discharge of fluids rectally. The yellow tongue coating indicates *yangming* heat in the body, and the wiry, forceful pulse indicates stagnation and the excess nature of this syndrome.

Dà Chái Hú Tāng (Major Bupleurum Decoction)

Da Chai Hu Tang (Major Bupleurum Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Shaoyang and yangming syndromes	<ul style="list-style-type: none"> Alternate spells of chills and fever, fullness of the chest and hypochondrium and continuous vomiting: <i>shaoyang</i> pattern Fullness and pain in the epigastrium and constipation: <i>yangming</i> syndrome Yellow tongue coating: heat in the body Wiry, forceful pulse: stagnation and excess conditions 	<ul style="list-style-type: none"> Harmonizes <i>shaoyang</i> syndrome Purges interior heat in <i>yangming</i> syndrome 	<ul style="list-style-type: none"> <i>Chai Hu</i> (Radix Bupleuri) and <i>Huang Qin</i> (Radix Scutellariae) harmonize <i>shaoyang</i> by releasing the exterior and clearing the interior. <i>Da Huang</i> (Radix et Rhizoma Rhei) and <i>Zhi Shi</i> (Fructus Aurantii Immaturus) purge <i>yangming</i> Stomach heat and activate qi circulation. <i>Bai Shao</i> (Radix Paeoniae Alba) harmonizes qi and blood. <i>Ban Xia</i> (Rhizoma Pinelliae) and <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) direct the Stomach qi downward to relieve vomiting. <i>Da Zao</i> (Fructus Jujubae) and <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) harmonize the herbs.

Normally, downward draining methods are prohibited in *shaoyang* syndrome, but unlike its typical manifestations, this is a combination of *shaoyang* and *yangming* syndromes. To effectively treat this set of symptoms, both harmonizing and downward draining methods must be used in order to treat the exterior and interior simultaneously.

Da Chai Hu Tang is designed following the principles of two formulas: *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) to harmonize *shaoyang*, and *Da Cheng Qi Tang* (Major Order the Qi Decoction) to drain heat from *yangming*. *Chai Hu* (Radix Bupleuri), the chief herb, combines with *Huang Qin* (Radix Scutellariae) to harmonize the *shaoyang* and clear Gallbladder heat. *Da Huang* (Radix et Rhizoma Rhei) and *Zhi Shi* (Fructus Aurantii Immaturus) purge *yangming* Stomach heat and activate qi circulation to relieve fullness and dispel hardened stools. *Bai Shao* (Radix Paeoniae Alba) combines with *Da Huang* (Radix et Rhizoma Rhei) to relieve the abdominal pain from constipation; also, *Bai Shao* (Radix Paeoniae Alba) softens the Liver to relieve depression and fidgeting, and harmonizes qi and blood to help *Zhi Shi* (Fructus Aurantii Immaturus) relieve epigastric fullness and pain. *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) direct Stomach qi downward to relieve vomiting. Finally, *Da Zao* (Fructus Jujubae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) harmonize the *ying* (nutritive) and *wei* (defensive) levels, and all of the herbs.

For further explanation of the clinical manifestations of *shaoyang* and *yangming* patterns, please refer to *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) and *Da Cheng Qi Tang* (Major Order the Qi Decoction).

MODIFICATIONS

- With excess dryness and heat in the *yangming* stage, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).
- With heat in the chest in the *shaoyang* stage, add *Huang Lian* (Rhizoma Coptidis).
- With excess heat and toxicity, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), and *Pu Gong Ying* (Herba Taraxaci).
- With abdominal fullness and distention, add *Hou Po* (Cortex Magnoliae Officinalis), *Mu Xiang* (Radix Aucklandiae), and *Qing Pi* (Pericarpium Citri Reticulatae Viride).
- When there is severe pain, add *Yan Hu Suo* (Rhizoma Corydalis) and *Chuan Lian Zi* (Fructus Toosendan).
- For otitis media, add *Long Dan* (Radix et Rhizoma Gentianae).
- For parotitis, add *Bo He* (Herba Menthae) and *Ban Lan Gen* (Radix Isatidis).
- For gastroenteritis and fever, add *Zhu Ru* (Caulis Bambusae in Taenia), *Sha Ren* (Fructus Amomi), and *Chen Pi* (Pericarpium Citri Reticulatae).
- For jaundice, add *Yin Chen* (Herba Artemisiae Scopariae), *Zhi Zi* (Fructus Gardeniae), and *Jin Qian Cao* (Herba Lysimachiae); or *Yin Chen Hao Tang* (Artemisia Scoparia Decoction).
- For gallstones, add *Jin Qian Cao* (Herba Lysimachiae), *Hai Jin Sha* (Spora Lygodii), *Yu Jin* (Radix Curcumae), and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).

CAUTIONS / CONTRAINDICATIONS

- *Da Chai Hu Tang* is contraindicated in patients with Spleen and Stomach deficiencies.

Dà Chái Hú Tāng (Major Bupleurum Decoction)

- *Da Huang* (Radix et Rhizoma Rhei) should be prescribed in moderation in this formula. Use of *Da Huang* (Radix et Rhizoma Rhei) in excessive amounts, or for a prolonged period of time may cause unnecessary depletion of body fluids, and can lead the disease deeper into the interior.
- Potential side effects associated with this formula include poor appetite, abdominal distention, diarrhea, and edema.
- Avoid cold or raw, pungent or spicy, and oily or greasy foods while taking this formula.¹

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** Administration of *Da Chai Hu Tang* had marked antispasmodic and antiulcer effects on the gastrointestinal tract. According to laboratory experiments, the formula inhibited spasms and cramps of the smooth muscles of the intestines.² In addition, the herbs inhibited the production of gastric acid.³ Lastly, administration of this formula in extract form at 250 mg/kg in rats was associated with a protective effect against damage to the stomach membrane induced by aspirin.⁴
2. **Hepatoprotective:** One study reported that *Da Chai Hu Tang* lowered elevated liver enzymes (SGPT and SGOT) and protected the liver from drug-induced damages.⁵ Another study reported that *Da Chai Hu Tang* prevented the progression of acute liver injury induced by carbon tetrachloride by inhibiting enhanced lipid peroxidation and by improving disrupted active oxygen metabolism in the injured liver.⁶
3. **Cardiovascular:** The use of *Da Chai Hu Tang* has little or no impact on the cardiovascular system. There were minimal changes in blood pressure (both systolic and diastolic) and heart rate and rhythm.⁷ There was, however, a slight drop of cholesterol and triglyceride levels.⁸
4. **Immunologic:** Administration of *Da Chai Hu Tang* enhanced the immune system. In mice with artificially suppressed immune systems, administration of the formula was associated with increased number of T-cells. There were, however, no significant changes with IgM and IgG.⁹
5. **Antibiotic:** *Da Chai Hu Tang* had a strong inhibitory effect *in vitro* against *Staphylococcus aureus* and *E. coli*.¹⁰
6. **Anti-inflammatory:** In mice with artificially-induced swelling and inflammation of the joints, the administration of *Da Chai Hu Tang* was determined to have an anti-inflammatory effect similar to aspirin.¹¹
7. **Antihyperglycemic:** Administration of *Da Chai Hu Tang* was associated with a decreased blood glucose level at 30, 60, and 120 minutes after glucose loading in a tolerance test, and an increased serum insulin level at 120 minutes after glucose loading.
8. **Effect on lipid biosynthesis:** Administration of *Da Chai Hu Tang* was associated with decreased hepatic triglyceride biosynthesis and subsequent reduction in plasma VLDL

levels.¹² According to another study, administering *Da Chai Hu Tang* to subjects with diets high in cholesterol was associated with significantly lower plasma and hepatic cholesterol levels.¹³ Another study showed *Da Chai Hu Tang* to beneficially affect lipid metabolism by significantly increasing high-density lipoprotein-cholesterol (HDL) with little antihypertensive effect.¹⁴ Lastly, *Da Chai Hu Tang* significantly reduced plasma triglyceride levels.¹⁵

9. **Effect on atherosclerosis:** Administration of *Da Chai Hu Tang* prevented the formation of atherosclerotic lesions in rabbits. However, it did not improve hypercholesterolemia in these subjects. The mechanism of this preventative effect on the development of atheromatous plaque formation was attributed to the antioxidative activities of the formula.¹⁶
10. **Antihyperlipidemic:** Administration of *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) and *Da Chai Hu Tang* was associated with beneficial effects in treating rats with cholesterol-induced hypercholesterolemia and aging-induced hyperlipidemia. Both formulas reduced total liver cholesterol and inhibited increases of serum and liver triglyceride.¹⁷

CLINICAL STUDIES AND RESEARCH

1. **Gallbladder disorders:** There have been numerous reports on the effect of *Da Chai Hu Tang* to treat gallbladder disorders, such as cholecystitis and cholelithiasis. In one report, 84 patients with gallbladder disorders (18 with cholecystitis and 73 with cholelithiasis) treated with modified *Da Chai Hu Tang* had complete recovery in 44 patients and improvement in 31 patients. The overall effectiveness was 89.28%.¹⁸ In another report, 120 patients with cholelithiasis were treated with excellent results. The effectiveness was 88.2% for patients with stones in the bile duct, 78.5% for stones in the gallbladder, and 76.2% for stones in both the duct and the gallbladder.¹⁹
2. **Cholelithiasis:** *Da Chai Hu Tang* was used with good success to treat patients with gallstones after surgical removal of the gallbladder. The stones were successfully passed in 18 of 26 patients (69.2%). The duration of treatment ranged from 87-250 days.²⁰
3. **Biliary ascariasis:** *Da Chai Hu Tang* has been shown in one study to effectively treat biliary ascariasis. Administration of modified *Da Chai Hu Tang* in decoction for an average of 15 days was associated with a 90.63% effectiveness in 32 patients. The researchers noted the formula to have marked anti-inflammatory, analgesic, cholagogic and antiparasitic effects. The herbal formula contained *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae), *Zhi Qiao* (Fructus Aurantii), *Ban Xia* (Rhizoma Pinelliae), *Bai Shao* (Radix Paeoniae Alba), *Sheng Jiang* (Rhizoma Zingiberis Recens), *Da Zao* (Fructus Jujubae),

Dà Chái Hú Tāng (Major Bupleurum Decoction)

and *Da Huang* (Radix et Rhizoma Rhei). Strategies for modifications are as follows: for gallstones, add *Jin Qian Cao* (Herba Lysimachiae); and for jaundice, add *Yin Chen* (Herba Artemisiae Scopariae), *Zhi Zi* (Fructus Gardeniae), and *Da Huang* (Radix et Rhizoma Rhei) (post-decocted), and remove *Bai Shao* (Radix Paeoniae Alba), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Da Zao* (Fructus Jujubae).²¹

4. **Acute pancreatitis:** One study reported a pronounced effect using modified *Da Chai Hu Tang* to treat acute pancreatitis. The herbal treatment contained *Da Chai Hu Tang* plus *Xuan Ming Fen* (Natrii Sulfas Exsiccatus) 10g and *Zi Su Geng* (Caulis Perillae) 9g as the base formula. Modifications included addition of *Chuan Lian Zi* (Fructus Toosendan) 6g and *Da Fu Pi* (Pericarpium Arecae) 9g for qi stagnation; *Huang Lian* (Rhizoma Coptidis) 6g and *Da Fu Pi* (Pericarpium Arecae) 9g for damp-heat in the Liver and Gallbladder; addition of *Chuan Lian Zi* (Fructus Toosendan) 6g, *Huang Lian* (Rhizoma Coptidis) 6g, *Zhu Ru* (Caulis Bambusae in Taenia) 9g, and removal of *Zhi Shi* (Fructus Aurantii Immaturus) for excess heat in the Liver and Stomach; and addition of *Chi Shao* (Radix Paeoniae Rubra) 9g, *Tao Ren* (Semen Persicae) 9g, *Hong Hua* (Flos Carthami) 9g, and *Wu Ling Zhi* (Faeces Troglodyteri) 9g, and removal of *Xuan Ming Fen* (Natrii Sulfas Exsiccatus) and *Ban Xia* (Rhizoma Pinelliae) in the case of qi and blood stagnation. The study showed 98.5% effectiveness among 216 patients.²² In another report, 84 patients with acute pancreatitis were treated with modified *Da Chai Hu Tang* with good results. Most symptoms, such as abdominal pain, nausea, fever, and constipation, were resolved within 2-5 days. Laboratory results also confirmed the effectiveness of the treatment with blood amylase, urine amylase, and white blood cells returning to normal range in 2.9, 3.5, and 2 to 5 days, respectively.²³
5. **Hepatitis:** In one study, 196 patients with acute icteric hepatitis treated with modified *Da Chai Hu Tang* recovered in 179 patients (asymptomatic with normal liver functions) and improved in 15 patients. The average duration of treatment was 25 days.²⁴
6. **Fatty liver:** Use of modified *Da Chai Hu Tang* in 18 patients with fatty liver (6 months to 3 years history of illness) was associated with complete recovery in 5 patients, marked effect in 8 patients, slight improvement in 4 patients, and no effect in 1 case (94.4% effectiveness). The treatment protocol was to cook the herbs and drink the decoction in two equally-divided doses daily, for 30 days per course of treatment, with 7-10 days of rest in between courses, for a total of 2 courses. The base formula included *Chai Hu* (Radix Bupleuri) 12g, *Huang Qin* (Radix Scutellariae) 6-9g, *Ban Xia* (Rhizoma Pinelliae) 9g, *Bai Shao* (Radix Paeoniae Alba) 15g, *Zhi Shi* (Fructus Aurantii Immaturus) 6-9g, *Da Huang* (Radix et Rhizoma Rhei) 6-12g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 15g, *Jue Ming Zi* (Semen Cassiae) 20g, and *Shan Zha* (Fructus Crataegi) 15g. Modifications included the addition of *Yu Jin* (Radix Curcumae) 10g and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 15g for chest and hypochondriac fullness and distention; *Fu Ling* (Poria) 15g and *Chen Pi* (Pericarpium Citri Reticulatae) 6g for nausea and vomiting; *Huang Jing* (Rhizoma Polygonati) 15g and *Shan Yao* (Rhizoma Dioscoreae) 20g for decreased intake of food and fatigue; *Da Huang* (Radix et Rhizoma Rhei) 12g and *Di Huang* (Radix Rehmanniae) 15g for constipation with dry mouth and bitter taste; *Chuan Lian Zi* (Fructus Toosendan) 10g and *Yan Hu Suo* (Rhizoma Corydalis) 10g for hypochondriac pain; and *Pu Huang* (Pollen Typhae) 9g and *Yin Chen* (Herba Artemisiae Scopariae) 15g for abnormal liver functions.²⁵
7. **Hyperlipidemia:** Sixty-five patients with hyperlipidemia (49 had concurrent hypertension, 41 had concurrent diabetes) were treated with *Da Chai Hu Tang* with good results. The treatment protocol was to administer the herbs in granular extracts at 2.5g per dose, three times per day, for 16 weeks. At the conclusion of the study, the researchers stated that 71% of the patients had a moderate to significant reduction of serum cholesterol levels. Side effects reported in about 5% of the patients included poor appetite, abdominal distention, diarrhea, and edema.²⁶
8. **Duodenal ulcer:** Thirty-four patients with duodenal ulcer were treated with *Da Chai Hu Tang* for 30 days with complete recovery in 23 patients, improvement in 9 patients, and no effect in 2 patients. The study reported an overall effectiveness rate of 94.1%.²⁷
9. **Perforating ulcer:** In one study, 192 of 202 patients with acute perforating ulcer showed good response after treatment with *Da Chai Hu Tang*. Of 202 patients, only 20 still required surgery. The researchers were able to contact 75 of the patients for follow-up interviews 1-2 years later, and stated that there were no recurrences in 31 patients, significant improvement in 28 patients, and recurrence in 16 patients.²⁸
10. **Gastric prolapse:** One study reported 97.4% effectiveness using modified *Da Chai Hu Tang* to treat gastric prolapse. Out of 228 patients with up to 21 years of prolapse, the study reported complete recovery in 120 patients, significant improvement in 84 patients, slight improvement in 18 patients, and no benefit in 6 patients. The treatment protocol was to cook the herbs and administer the decoction in multiple doses daily, for 15 days per course of treatment, followed by 3 days of rest, for a total of 3 courses. The herbal treatment contained *Chai Hu* (Radix Bupleuri) 10g, *Zhi Qiao* (Fructus Aurantii) 10g, *Huang Qin* (Radix

Dà Chái Hú Tāng (Major Bupleurum Decoction)

Scutellariae) 10g, *Ban Xia* (Rhizoma Pinelliae) 10g, *Cang Zhu* (Rhizoma Atractylodis) 10g, *Hou Po* (Cortex Magnoliae Officinalis) 10g, *Chen Pi* (Pericarpium Citri Reticulatae) 10g, *Bai Shao* (Radix Paeoniae Alba) 15g, *Da Huang* (Radix et Rhizoma Rhei) 6g, *Lu Gen* (Rhizoma Phragmitis) 30g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 5g. *Huang Lian* (Rhizoma Coptidis) was added for burning and heat sensation in the stomach; *Chuan Lian Zi* (Fructus Toosendan) for back swelling and hypochondriac pain; and *Sha Ren* (Fructus Amomi) for feelings of distention and prolapse in the lower abdomen.²⁹

11. **Acute tonsillitis:** Modified *Da Chai Hu Tang* successfully treated 36 patients with acute tonsillitis. The base treatment included *Da Chai Hu Tang* plus *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae). Modifications included addition of *Bai Zhi* (Radix Angelicae Dahuricae) for headache; *Ban Lan Gen* (Radix Isatidis) and *She Gan* (Rhizoma Belamcandae) for sore throat; and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) for coughing. The treatment protocol was to give the herbs in decoction one time per day.³⁰

HERB-DRUG INTERACTION

Aspirin- and ethanol-induced gastric lesions: Administration of *Da Chai Hu Tang* was associated with a notable effect to treat aspirin- and ethanol-induced gastric hemorrhagic lesions in rats. The gastroprotective effect of *Da Chai Hu Tang* was comparable to sucralate (Carafate), cimetidine (Tagamet), and 16,16-dimethyl-prostaglandin E2 (DMPGE2).³¹

TOXICOLOGY

According to one case report in Japan, administration of *Dai-saiko-to* [*Da Chai Hu Tang*] was associated with one incidence of autoimmune hepatitis in one patient.³² Note: Additional information on the medical history of this patient was unavailable at the time of publication.

RELATED FORMULA

Chái Hú Tāng (Bupleurum Decoction)

柴胡湯

柴胡汤

Pinyin Name: *Chai Hu Tang*

Literal Name: Bupleurum Decoction

Original Source: *Tian Jin Zhong Yi Xue Yuan* (Tianjin University of Chinese Medicine) in 1989

Chai Hu (Radix Bupleuri)

Huang Qin (Radix Scutellariae)

Bai Shao (Radix Paeoniae Alba)

Zao Jiao (Fructus Gleditsiae)

Da Huang (Radix et Rhizoma Rhei)

Sheng Jiang (Rhizoma Zingiberis Recens)

Da Zao (Fructus Jujubae)

Qing Pi (Pericarpium Citri Reticulatae Viride)

Huang Qi (Radix Astragali)

Ci Wu Jia (Radix et Rhizoma seu

Caulis Acanthopanax Senticosi)

Zhi Shi (Fructus Aurantii Immaturus)

Cha Ye (Folium Camelliae)

Ban Xia (Rhizoma Pinelliae)

Chai Hu Tang (Bupleurum Decoction) treats *shaoyang* disorder with accumulation of damp and phlegm. It clears heat in the interior, resolves dampness, eliminates phlegm, and tonifies qi. Clinically, this formula treats obese individuals who exhibit low energy, slow metabolism, and poor dietary habits.

AUTHORS' COMMENTS

A question is often raised as to how *Da Chai Hu Tang* can be used to treat both constipation and diarrhea. From a traditional Chinese medical perspective, the cause of constipation and diarrhea in this case is the same: excess heat in the Intestines that dries the stool and turns it into a hard, immobile mass. Accordingly, *Da Huang* (Radix et Rhizoma Rhei) and *Zhi Shi* (Fructus Aurantii Immaturus) are used to regulate qi and purge heat in the bowels. Because these two herbs dispel stagnation and heat in the Intestines, they can treat either constipation or diarrhea. Clearing or purging heat will resolve the root cause of the diarrhea. This is the same principle underlying *Da Cheng Qi Tang* (Major Order the Qi Decoction), in which a downward draining formula is used to purge watery diarrhea because fecal matter is still stagnant in the Intestines and has to be directed out. Note: Diarrhea in this case refers only to the passage of fluids rectally, and not the stool. This occurs because the stool is dry, hard and immobile, so the water in the intestines has nowhere to go but to be excreted rectally as watery fluids.³³

Although *Da Cheng Qi Tang* (Major Order the Qi Decoction) and *Da Chai Hu Tang* share the same principle of using *Da Huang* to purge damp-heat in excess *yangming fu* (hollow organs) syndrome, there are contrasting differences:

- *Da Cheng Qi Tang* is used for severe *yangming fu* excess condition with constipation and the four symptoms of *pi* (distention), *man* (fullness), *zao* (dryness), and *shi* (hardness) with a dry, red tongue body with a yellow coating as well as abdominal pain that is worse with pressure.
- *Da Chai Hu Tang* treats *yangming fu* and *shaoyang* syndrome. One chief manifestation is focal distention and pain that does not increase when pressure is applied

Dà Chái Hú Tāng (Major Bupleurum Decoction)

to the abdomen. Therefore, the condition in *Da Chai Hu Tang* is not as severe as that seen in *Da Cheng Qi Tang*. Consequently, a smaller dose of *Da Huang* is used in *Da Chai Hu Tang* to purge excess heat and treat constipation. If *Da Cheng Qi Tang* is used, there is a hidden danger that *zheng* (upright) *qi* may be damaged, and the disease will progress from being in between *shaoyang* and *yangming* stages to moving deeper in the body.³⁴

Xiao Chai Hu Tang (Minor Bupleurum Decoction) and *Da Chai Hu Tang* are both formulated to treat *shaoyang* stage disorder with alternating spells of chills and fever, a bitter taste in the mouth, and chest and hypochondriac distention. Both formulas contain *Chai Hu* (*Radix Bupleuri*), *Huang Qin* (*Radix Scutellariae*), *Ban Xia* (*Rhizoma Pinelliae*), *Sheng Jiang* (*Rhizoma Zingiberis Recens*), and *Da Zao* (*Fructus Jujubae*). Despite similarities, they have contrasting differences:

- *Xiao Chai Hu Tang* contains *Chai Hu* (*Radix Bupleuri*) and *Huang Qin* (*Radix Scutellariae*) as chief herbs to harmonize the *shaoyang* stage. *Ren Shen* (*Radix et Rhizoma Ginseng*) is used to support the underlying constitutional deficiency and to prevent the pathogenic factor from moving further inward. This formula can be used in a variety of patients, including women who catch colds during their periods, and individuals with malaria and/or jaundice.
- *Da Chai Hu Tang* is mainly used for *yangming fu* syndrome with excess heat accumulation in the body. *Da Huang* (*Radix et Rhizoma Rhei*) and *Zhi Shi* (*Fructus Aurantii Immaturus*) serve to sedate the heat in the *yangming* channel. The key differential diagnosis is constipation with abdominal pain.³⁵

Hòu Pò Qī Wù Tāng (Seven-Substance Decoction with Magnolia Bark)

厚朴七物湯
厚朴七物汤

Pinyin Name: *Hou Po Qi Wu Tang*

Literal Name: Seven-Substance Decoction with Magnolia Bark

Alternate Name: Magnolia Seven Combination

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Hou Po</i> (Cortex Magnoliae Officinalis)	24g [15g]
<i>Zhi Shi</i> (Fructus Aurantii Immaturus)	5 pieces [9g]
<i>Da Huang</i> (Radix et Rhizoma Rhei)	9g
<i>Gui Zhi</i> (Ramulus Cinnamomi)	6g
<i>Da Zao</i> (Fructus Jujubae)	10 pieces [4 pieces]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	15g [12g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	9g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 10 cups [2,000 mL] of water until 4 cups [800 mL] of the liquid remain. Take 0.8 cup [160 mL] of the warm, strained decoction three times daily. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Expels the pathogenic factor from the exterior and muscle layer
2. Regulates qi
3. Promotes bowel movement

CLINICAL MANIFESTATIONS

Taiyang and *yangming* syndromes with interior excess: abdominal fullness, fever, constipation, and a superficial, rapid pulse.

CLINICAL APPLICATIONS

Acute febrile disorders, gastroenteritis, habitual constipation, and peritonitis.

EXPLANATION

Hou Po Qi Wu Tang (Seven-Substance Decoction with Magnolia Bark) treats *taiyang* and *yangming* syndromes complicated by interior excess. This condition develops as the result of improper treatment or lack of treatment, where, prior to resolution of the exterior condition, an interior excess develops. Fever with a superficial pulse indicates an exterior condition; while abdominal fullness with a rapid pulse indicates an interior condition. With such complications, the treatment must focus on expelling the pathogenic factors from both the exterior and interior.

This formula uses herbs that treat both interior and exterior conditions. *Hou Po* (Cortex Magnoliae Officinalis), *Zhi Shi* (Fructus Aurantii Immaturus), and *Da Huang* (Radix et Rhizoma Rhei) regulate qi and purge interior excess. *Gui Zhi* (Ramulus Cinnamomi), *Da Zao* (Fructus Jujubae), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) release exterior pathogenic factors and harmonize *ying* (nutritive) and *wei* (defensive) levels.

Hou Po Qi Wu Tang (Seven-Substance Decoction with Magnolia Bark)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Taiyang</i> and <i>yangming</i> syndromes with interior excess	<ul style="list-style-type: none">• Fever with superficial pulse: exterior (<i>taiyang</i>) condition• Abdominal fullness and constipation with rapid pulse: interior (<i>yangming</i>) condition	<ul style="list-style-type: none">• Expels the pathogenic factor from the exterior and the muscle layer• Regulates qi• Promotes bowel movement	<ul style="list-style-type: none">• <i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>Zhi Shi</i> (Fructus Aurantii Immaturus) and <i>Da Huang</i> (Radix et Rhizoma Rhei) regulate qi and purge interior excess.• <i>Gui Zhi</i> (Ramulus Cinnamomi), <i>Da Zao</i> (Fructus Jujubae), <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) dispel exterior pathogenic factors and harmonize <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels.

Hòu Pò Qī Wù Tāng (Seven-Substance Decoction with Magnolia Bark)

Hou Po Qi Wu Tang, similarly to *Da Chai Hu Tang* (Major Bupleurum Decoction), treats both interior and exterior syndromes at the same time. *Da Chai Hu Tang* treats the combination of *shaoyang* and *yangming* syndromes, while *Hou Po Qi Wu Tang* treats *taiyang* and *yangming* syndromes with interior excess.

MODIFICATION

With nausea, add *Ban Xia* (Rhizoma Pinelliae).

AUTHORS' COMMENTS

Hou Po Qi Wu Tang and *Da Chai Hu Tang* (Major Bupleurum Decoction) both treat *yangming* excess with abdominal pain and constipation. Both formulas have harmonizing and sedating functions, and contain *Da Huang* (Radix et Rhizoma Rhei), *Zhi Shi* (Fructus Aurantii Immaturus), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Da Zao* (Fructus Jujubae). The differences between these two formulas are as follows:

- *Da Chai Hu Tang* treats *shaoyang* and *yangming* disorders with alternating spells of chills and fever, a bitter taste in the mouth, chest and hypochondriac distention, abdominal fullness, constipation, a red tongue with a yellow coating, and a wiry, forceful pulse. *Chai Hu* (Radix Bupleuri) and

Huang Qin (Radix Scutellariae) are used to harmonize the *shaoyang*, while *Da Huang* (Radix et Rhizoma Rhei), *Zhi Shi* (Fructus Aurantii Immaturus), and *Bai Shao* (Radix Paeoniae Alba) purge *yangming* heat and relieve pain. *Sheng Jiang* (Rhizoma Zingiberis Recens), *Ban Xia* (Rhizoma Pinelliae), and *Da Zao* (Fructus Jujubae) harmonize the Stomach to relieve nausea and vomiting.

- *Hou Po Qi Wu Tang* treats *taiyang* and *yangming* disorders with exterior and interior conditions. Most of the signs and symptoms exhibited are of interior *yangming* origin, such as fever, abdominal fullness, and constipation. *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus) regulate qi and dispel fullness. When combined with *Da Huang* (Radix et Rhizoma Rhei), these herbs purge heat and clear the bowels. To relieve *taiyang* symptoms, *Gui Zhi* (Ramulus Cinnamomi), *Sheng Jiang* (Rhizoma Zingiberis Recens), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Da Zao* (Fructus Jujubae) are used. Because there is no abdominal pain, *Bai Shao* (Radix Paeoniae Alba) is not used.¹

Fáng Fēng Tōng Shèng Sǎn

(Saposhnikovia Powder that Sagely Unblocks)

防風通聖散

防风通圣散

Pinyin Name: *Fang Feng Tong Sheng San*

Literal Name: Saposhnikovia Powder that Sagely Unblocks

Alternate Names: *Fang Feng Tung Sheng San*, Siler Sage-Inspired Formula, Siler and Platycodon Formula

Original Source: *Huang Di Su Wen Xuan Ming Lun Fang* (Formulas from the Discussion Illuminating the Yellow Emperor's Basic Questions) by Liu Yuan-Su in 1172

COMPOSITION

<i>Fang Feng</i> (Radix Saposhnikoviae)	15g [6g]
<i>Jing Jie</i> (Herba Schizonepetae)	7.5-15g [3-6g]
<i>Ma Huang</i> (Herba Ephedrae)	15g [6g]
<i>Bo He</i> (Herba Menthae)	15g [6g]
<i>Da Huang</i> (Radix et Rhizoma Rhei), <i>zheng</i> (steamed) with liquor	15g [6g]
<i>Mang Xiao</i> (Natrii Sulfas), post-decocted	15g [6g]
<i>Shi Gao</i> (Gypsum Fibrosum)	30g [12g]
<i>Huang Qin</i> (Radix Scutellariae)	30g [12g]
<i>Lian Qiao</i> (Fructus Forsythiae)	15g [6g]
<i>Jie Geng</i> (Radix Platycodonis)	30g [12g]
<i>Zhi Zi</i> (Fructus Gardeniae), <i>tan</i> (charred to ash)	7.5-15g [3-6g]
<i>Hua Shi</i> (Talcum)	90g [20g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	15g [6g]
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	15g [6g]
<i>Bai Shao</i> (Radix Paeoniae Alba), <i>chao</i> (dry-fried)	15g [6g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	7.5-15g [3-6g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	60g [10g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into powder, and cook 6g of the powder with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 1 large bowl of water until the liquid is reduced to 60%. Take the strained decoction while warm. Today, this formula may also be prepared as pills. For pills, grind all the ingredients, except *Hua Shi* (Talcum), into a fine powder, and sift evenly. Mix the powder with water to form into pills. Coat the pills with finely-powdered *Hua Shi* (Talcum), and polish and dry the pills. Take 6g of pills twice daily. Alternatively, this formula may be prepared as a decoction using the doses suggested in brackets above. *Cong Bai* (Bulbus Allii Fistulosi) may be added to enhance the exterior-releasing effect of the formula.

Note: The exact doses of *Jing Jie* (Herba Schizonepetae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Zhi Zi* (Fructus Gardeniae) are unclear. One reference specifies 2.5 *qian* (7.5g), while another instructs 5 *qian* (15g). We list both for reference purposes.

CHINESE THERAPEUTIC ACTIONS

1. Expels wind and releases the exterior
2. Clears interior heat and promotes defecation

CLINICAL MANIFESTATIONS

Exterior wind-heat syndrome with accumulation of interior heat: severe aversion to cold and high fever, dizziness, vertigo, red and painful eyes, a bitter and dry mouth, throat discomfort or a sore throat, a feeling of distention and stifling sensation in the chest and diaphragm, coughing, dyspnea, thick and sticky nasal discharge and saliva, constipation, dark yellow-colored urine or dysuria. It also treats abscesses, sores, carbuncle, *chang feng* (intestinal wind), hemorrhoids, erysipelas, dermatitis, acne, and other conditions characterized by heat and toxins.

CLINICAL APPLICATIONS

Headache, migraine, acute mastitis, obesity, food poisoning, habitual constipation, hyperlipidemia, hypertension, arteriosclerosis, itching, acne, dermatitis, carbuncles, urticaria, acute conjunctivitis, influenza, and common cold.

Fáng Fēng Tōng Shèng Sǎn

(Saposhnikovia Powder that Sagely Unblocks)

EXPLANATION

Fang Feng Tong Sheng San (Saposhnikovia Powder that Sagely Unblocks) has three main functions: it releases exterior wind-heat, clears interior heat, and drains downward. It is indicated for excess conditions at both the exterior (wind-heat) and interior (heat accumulation). Wind-heat at the exterior may cause exterior symptoms such as aversion to cold and fever. Because both wind and heat tend to ascend and attack the upper body, they may cause symptoms such as red and painful eyes, a dry mouth with a bitter taste, and a sore throat. And since the Lung is the organ that is most vulnerable to exterior pathogenic factors and heat, the wind-heat factor may also damage the Lung and cause symptoms such as a feeling of distention and a stifling sensation in the chest and diaphragm, coughing, and dyspnea. Thick, sticky nasal discharge and saliva indicate wind-heat damaging the exterior and the body fluids. Constipation and dysuria indicate excess heat in the interior damaging body fluids.

This formula uses *Fang Feng* (Radix Saposhnikoviae), *Jing Jie* (Herba Schizonepetae), *Ma Huang* (Herba Ephedrae), and *Bo He* (Herba Menthae) to clear the exterior wind-heat. *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) purge interior heat and promote defecation. *Shi Gao* (Gypsum Fibrosum), *Huang Qin* (Radix Scutellariae), *Lian Qiao* (Fructus Forsythiae), *Jie Geng* (Radix

Platycodonis), and *Zhi Zi* (Fructus Gardeniae) clear heat in the Lung and Stomach. *Hua Shi* (Talcum) dispels heat through urination and relieves dysuria. *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Bai Shao* (Radix Paeoniae Alba) nourish the blood and activate blood circulation. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) strengthen Spleen qi. These tonic herbs also prevent the heat-clearing and purgative herbs in this formula from injuring the body.

MODIFICATIONS

- For common cold or influenza caused by wind-cold, add *Qiang Huo* (Rhizoma et Radix Notopterygii).
- For common cold or influenza caused by wind-heat, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Tian Hua Fen* (Radix Trichosanthis).
- When there is excess heat, add *Huang Lian* (Rhizoma Coptidis) and *Huang Bo* (Cortex Phellodendri Chinensis).
- With cough with excess phlegm, add *Ban Xia* (Rhizoma Pinelliae).
- For dermatological disorders without abscess and ulceration, combine with *Sheng Ma Ge Gen Tang* (Cimicifuga and Kudzu Decoction).
- For dermatological disorders with abscess and ulceration, combine with *Pai Nong San* (Drain the Pus Powder).

Fang Feng Tong Sheng San (Saposhnikovia Powder that Sagely Unblocks)

Diagnosis	Signs and Symptoms	Treatment	Herbs

Fáng Fēng Tōng Shèng Sǎn

(Saposhnikovia Powder that Specially Unblocks)

- For erysipelas with faint skin lesions, add *Sheng Ma Ge Gen Tang* (Cimicifuga and Kudzu Decoction).
- For eczema, add *Xiao Feng San* (Eliminate Wind Powder).
- If there is no constipation, remove *Mang Xiao* (Natrii Sulfas) and *Da Huang* (Radix et Rhizoma Rhei).
- For hemorrhoids, add *Yi Zi Tang* (Yi Word Decoction).
- For high cholesterol, add *Jiao Gu Lan* (Rhizoma seu Herba Gynostemmatis) and *Jue Ming Zi* (Semen Cassiae).
- For obesity, add *He Ye* (Folium Nelumbinis) and *Yi Yi Ren* (Semen Coicis).
- If accompanied by qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng).
- With summer-dampness with thirst, add *Yin Chen* (Herba Artemisiae Scopariae) and *Huang Lian* (Rhizoma Coptidis).
- For hangovers with fever and headache, add *Huang Lian* (Rhizoma Coptidis) and *Ge Hua* (Flos Puerariae).

CAUTIONS / CONTRAINDICATIONS

- *Fang Feng Tong Sheng San* is contraindicated in patients of deficiency or pregnancy.
- This formula should be used with caution in a patient having a sensitive gastrointestinal system because it contains strong downward draining herbs.

PHARMACOLOGICAL EFFECTS

1. **Cardiovascular:** According to laboratory experiments, administration of *Fang Feng Tong Sheng San* was associated with an inhibitory effect on the heart, reducing the heart rate, its contractile force, and blood pressure. It also has an anti-arrhythmic effect, as demonstrated in mice with aconitine-induced arrhythmia.¹
2. **Metabolic:** Administration of *Fang Feng Tong Sheng San* in obese rats at 0.45 g/day for 11 weeks was effective in reducing cholesterol and triglycerides.²
3. **Thermogenic and anti-obesity:** Administration of *Fang Feng Tong Sheng San* suppressed body weight gain and prevented the elevation of serum triglyceride levels and body fat accumulation in female rats on a high fructose diet. The proposed mechanisms of actions included inhibition of triglyceride synthesis in the liver, enhancement of lipolysis in adipocytes and of thermogenesis in brown adipose tissue, and inhibition on the phosphodiesterase activity.^{3,4}

CLINICAL STUDIES AND RESEARCH

1. **Headache:** In one study, *Fang Feng Tong Sheng San* was used to treat patients with stubborn headache arising from various causes, such as tension, migraine, hypertension, and sinus infection. Out of 27 patients, the study reported complete recovery in 19 patients (asymptomatic with no

recurrence in 6 months), significant improvement in 5 patients (occasional recurrence with milder intensity), and no benefit in 3 patients.⁵

2. **Migraine:** One study reported 80% effectiveness using *Fang Feng Tong Sheng San* in pills, at dosages of 6 grams twice daily. The study reported that while many patients had recurrences, the frequency and severity were both reduced.⁶
3. **Acute mastitis:** In one report, modified *Fang Feng Tong Sheng San* was effective in treating 97 out of 113 patients with acute mastitis.⁷
4. **Obesity:** In one study, 147 patients who were overweight were treated with both ear acupuncture and *Fang Feng Tong Sheng San* for 2 months. The study reported significant results in 27 patients (6.57 kg average in weight reduction), improvement in 93 patients (3.03 kg average in weight reduction), and no improvement in 27 patients (1.06 kg average in weight reduction). The maximum weight reduction was 11.5 kg in one patient.⁸
5. **Hyperlipidemia:** One study reported 80.1% effectiveness using modified *Fang Feng Tong Sheng San* to treat hyperlipidemia in 121 patients (average age of 53.41, with range of 35-72 years old). Modifications to the original formula were made as follows: addition of *Ban Xia* (Rhizoma Pinelliae) for drooling of saliva; addition of *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and elimination of *Mang Xiao* (Natrii Sulfas) for deafness; and elimination of *Ma Huang* (Herba Ephedrae) for spontaneous perspiration. Each course of treatment was 30 days. Of 121 patients, the study reported complete recovery in 69 patients, improvement in 28 patients, and no effect in 24 patients.⁹ In another study, use of this formula was associated with 30% effectiveness in weight reduction in 68 patients. The study noted that the formula was most effective in female patients between 20 and 30 years of age.¹⁰
6. **Itching:** Use of modified *Fang Feng Tong Sheng San* in 40 geriatric patients with itching due to wind-heat was associated with great results. Of 40 patients, the study reported complete relief in 35 patients and no benefit in 5 patients. The duration of treatment was 2 weeks per course of treatment, for 2 courses total.¹¹
7. **Acute conjunctivitis:** One study reported complete recovery of acute conjunctivitis in all 200 patients (74 unilateral, 126 bilateral) when treated with modified *Fang Feng Tong Sheng San*. Most patients showed improvements within 2-3 days, with duration of treatment ranging from 1 to 5 days. The herbal treatment contained this formula as the base, with the addition of *Hong Hua* (Flos Carthami) for red eyes; *Ji Li* (Fructus Tribuli), *Chan Tui* (Periostracum Cicadae), and *Man Jing Zi* (Fructus Viticis) for severe itching; *Bai Zhi* (Radix Angelicae

Fáng Fēng Tōng Shèng Sǎn

(Saposhnikovia Powder that Sagely Unblocks)

Dahuricae), *Qiang Huo*, (Rhizoma et Radix Notopterygii), and *Mo Yao* (Myrrha) for severe pain; *Che Qian Zi* (Semen Plantaginis) and *Ze Xie* (Rhizoma Alismatis) for profuse eye secretions; *Pu Gong Ying* (Herba Taraxaci), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *Yu Xing Cao* (Herba Houttuyniae) for redness and swelling of the eyes; elimination of *Mang Xiao* (Natrii Sulfas) if there was no constipation; and elimination of *Ma Huang* (Herba Ephedrae) for spontaneous or night perspiration.¹²

TOXICOLOGY

Use of *Fang Feng Tong Sheng San* was associated with one incidence of pneumonitis in a 65-year-old man who complained of cough, fever, and dyspnea about one month after treatment with this formula. Upon discontinuation of this product, the patient recovered.¹³

The preparation and administration of this formula is the same as *Fang Feng Tong Sheng San*.

Shuang Jie Tong Sheng San (Double Relieve Powder that Sagely Unblocks) is essentially the same as *Fang Feng Tong Sheng San*. The main difference is the removal of two ingredients: *Mang Xiao* (Natrii Sulfas) and *Da Huang* (Radix et Rhizoma Rhei). This formula can be used for individuals having the same condition as described above, but without constipation.

AUTHORS' COMMENTS

Fang Feng Tong Sheng San is literally translated as "Saposhnikovia Powder that Sagely Unblocks" because this formula is known to induce perspiration without damaging the exterior and sedate heat without injuring the interior.

According to Dr. Chang Wei-Yen, dermatitis and skin rash can be treated effectively with *Fang Feng Tong Sheng San* and *Jing Fang Bai Du San* (Schizonepeta and Saposhnikovia Powder to Overcome Pathogenic Influences).

Gě Gēn Huáng Qín Huáng Lián Tāng

(Kudzu, Coptis, and Scutellaria Decoction)

葛根黄芩黄连汤

葛根黄芩黄连汤

Pinyin Name: *Ge Gen Huang Qin Huang Lian Tang***Literal Name:** Kudzu, Coptis, and Scutellaria Decoction**Alternate Names:** *Ge Gen Qin Lian Tang*, *Ke Ken Huang Chin Huang Lien Tang*, Pueraria, Scute, and Coptis Decoction; Pueraria, Scutellaria and Coptis Decoction; Pueraria Coptis and Scute Combination**Original Source:** *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty**COMPOSITION**

<i>Ge Gen</i> (Radix Puerariae Lobatae)	24g [15g]
<i>Huang Qin</i> (Radix Scutellariae)	9g
<i>Huang Lian</i> (Rhizoma Coptidis)	9g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook *Ge Gen* (Radix Puerariae Lobatae) first in 8 cups [1,600 mL] of water until the liquid is reduced to 6 cups [1,200 mL]. Add the other ingredients and cook until the liquid is reduced to 2 cups [400 mL]. Take the warm, strained decoction in two equally-divided doses daily. Today, the decoction can be prepared using the dose of *Ge Gen* (Radix Puerariae Lobatae) suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Releases the exterior
2. Clears interior heat

CLINICAL MANIFESTATIONS

Wind-cold at the exterior with heat invading the interior: feverish sensation in the body, foul-smelling diarrhea, burning sensations of the anus after defecation, irritable and feverish sensation in the chest and epigastrium, a dry mouth, thirst, dyspnea with perspiration, a yellow tongue coating, and a rapid pulse.

CLINICAL APPLICATIONS

Diarrhea, dysentery, salmonella infection, amoebic dysentery, bacterial dysentery, gastritis, acute gastroenteritis, acute enteritis, ulcerative colitis, fever, influenza, common cold, measles, poliomyelitis, erysipelas, stomatitis, toothache, trachoma, conjunctivitis, inflammation of the lacrimal gland, and hangovers.

EXPLANATION

Ge Gen Huang Qin Huang Lian Tang (Kudzu, Coptis, and Scutellaria Decoction) was originally presented in *Shang Han Lun* (Discussion of Cold-Induced Disorders) for treating unresolved exterior wind-cold with heat invading the interior. This condition occurs when the exterior condition is incorrectly treated with downward draining herbs, leading to continued presence of exterior heat (minor condition) and its transformation into interior heat (major condition). Feverish sensations in the body indicate the presence of exterior heat. The interior heat may affect the Intestines and cause foul-smelling heat diarrhea. Interior heat may rise to attack the upper body and cause irritable and feverish sensations in the chest, a dry mouth, and thirst. The heat may damage the Lung to

Gě Gēn Huáng Qín Huáng Lián Tāng

(Kudzu, Coptis, and Scutellaria Decoction)

Ge Gen Huang Qin Huang Lian Tang (Kudzu, Coptis, and Scutellaria Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Unresolved exterior wind-cold with heat invading the interior	<ul style="list-style-type: none">• Feverish sensations in the body: presence of unresolved exterior wind-cold• Dyspnea: heat damaging the Lung• Irritability, a dry mouth, and thirst: interior heat consuming body fluids• Foul-smelling diarrhea with burning sensations: damp-heat in the Intestines• Yellow tongue coating and a rapid pulse: heat condition	<ul style="list-style-type: none">• Releases the exterior• Clears interior heat	<ul style="list-style-type: none">• <i>Ge Gen</i> (Radix Puerariae Lobatae) dispels the exterior factors and lifts Spleen qi to relieve diarrhea.• <i>Huang Qin</i> (Radix Scutellariae) and <i>Huang Lian</i> (Rhizoma Coptidis) clear heat and dry dampness to relieve diarrhea.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs and calms the middle <i>jiao</i>.

cause dyspnea, and force body fluids out to the exterior, resulting in perspiration. A yellow tongue coating and a rapid pulse indicate a heat condition.

To properly treat this condition, exterior-releasing herbs must be used to treat the unresolved exterior condition, while interior heat-clearing herbs are used to sedate the interior. This formula contains *Ge Gen* (Radix Puerariae Lobatae) as the chief herb to dispel exterior factors, promote the production of body fluids to relieve the dry mouth and thirst, and direct Spleen qi upward to relieve diarrhea. *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis) clear heat and dry dampness to relieve diarrhea. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs and calms the middle *jiao* to help relieve acute discomforts, such as burning sensations of the anus.

MODIFICATIONS

- When there is excess heat, add *Jin Yin Hua* (Flos Lonicerae Japonicae).
- With food stagnation, add *Mai Ya* (Fructus Hordei Germinatus), *Lai Fu Zi* (Semen Raphani), and *Shan Zha* (Fructus Crataegi).
- With vomiting, add *Ban Xia* (Rhizoma Pinelliae) and *Zhu Ru* (Caulis Bambusae in Taenia).
- With abdominal pain and cramps, add *Mu Xiang* (Radix Aucklandiae) and *Bai Shao* (Radix Paeoniae Alba).
- With abdominal pain and diarrhea, add *Bai Shao* (Radix Paeoniae Alba) and *Zhi Shi* (Fructus Aurantii Immaturus).
- For acute bacterial dysentery, add *Bai Tou Weng* (Radix Pulsatillae), *Mu Xiang* (Radix Aucklandiae), and *Qing Pi* (Pericarpium Citri Reticulatae Viride).
- If there is severe rectal tenesmus, add *Mu Xiang* (Radix Aucklandiae) and *Bing Lang* (Semen Arecae).

CAUTIONS / CONTRAINDICATIONS

Ge Gen Huang Qin Huang Lian Tang is contraindicated in diarrhea caused by cold and deficiency with deep, slow or weak pulse.

PHARMACOLOGICAL EFFECTS

1. **Antibacterial:** It has been demonstrated that decoction of *Ge Gen Huang Qin Huang Lian Tang* has an inhibitory effect *in vitro* against various microorganisms, especially *Staphylococcus aureus*, *Diplococcus pneumoniae*, and *Bacillus dysenteriae*.¹
2. **Antipyretic:** In rabbits with artificially-induced fever, administration of *Ge Gen Huang Qin Huang Lian Tang* was associated with a marked effect to reduce fever, especially between 2-4 hours after ingestion. The treatment protocol was to administer 5 g/kg of the herbal decoction. In addition, the study noted that the effect of the herbs was comparable to 0.28 g/kg of aspirin.²
3. **Antiarrhythmic:** Intravenous injection of a *Ge Gen Huang Qin Huang Lian Tang* preparation was found to be effective in treating mice, rats, and rabbits with artificially-induced arrhythmia by injection of adrenaline and aconitine.³
4. **Gastrointestinal:** Administration of *Ge Gen Huang Qin Huang Lian Tang* in laboratory experiments has been associated with relieving diarrhea, slowing the peristalsis of the Intestines, and relieving spasms of the intestinal smooth muscles.⁴

CLINICAL STUDIES AND RESEARCH

1. **Diarrhea:** *Ge Gen Huang Qin Huang Lian Tang* has been shown via many studies to effectively treat diarrhea arising from various causes, such as acute or chronic enteritis, postpartum diarrhea, food poisoning, and infectious diarrhea.⁵ In one study, 202 infants with acute diarrhea

Gě Gēn Huáng Qín Huáng Lián Tāng

(Kudzu, Coptis, and Scutellaria Decoction)

were treated with intravenous fluids and oral ingestion of *Ge Gen Huang Qin Huang Lian Tang* with an overall effectiveness of 88.6%. The average time needed to stop diarrhea was 3.5 days.⁶ Another study reported satisfactory results using this formula to treat 513 infants and children with diarrhea in the summer.⁷

2. **Diarrhea during pregnancy:** Use of modified *Ge Gen Huang Qin Huang Lian Tang* in 30 pregnant women with diarrhea was associated with complete recovery in 25 patients, significant improvement in 4 patients, and no effect in 1 case. The herbal treatment contained this formula plus *Tu Si Zi* (Semen Cuscutae), *Sang Ji Sheng* (Herba Taxilli), and *Ai Ye* (Folium Artemisiae Argyi). Additional modifications included use of *Bai Shao* (Radix Paeoniae Alba) for restless fetus and *Shen Qu* (Massa Fermentata) for poor appetite. The herbs were given in decoction, in three equally-divided doses daily.⁸
3. **Salmonella infection:** Nineteen patients with acute salmonella infection were treated with complete recovery in 16 patients within 4 days, and 3 patients within 5 days.⁹
4. **Bacterial dysentery:** Forty patients with acute bacterial dysentery were treated with *Ge Gen Huang Qin Huang Lian Tang* with great success. The average recovery time was 1.15 days for reduction of fever, 4.51 days for relief of abdominal pain, 3.47 days for recovery of tenesmus, and 2.8 days for resolution of pus and blood in the stool. Overall, most patients reported stabilization of their condition within an average of 3.4 days.¹⁰ Another study reported 96% effectiveness for treatment of acute bacterial dysentery in children using modified *Ge Gen Huang Qin Huang Lian Tang* via rectal enema. The treatment protocol was to cook the herbs in water to obtain 200 mL of herbal solution. Normal saline (300-500 mL) was used first to cleanse the intestines, prior to instilling 100 mL of the herbal solution. This procedure was repeated two times daily, for 3 days. Of 50 patients, the study reported significant improvement in 38 patients, improvement in 10 patients, and no benefit in 2 patients.¹¹
5. **Amoebic dysentery:** One study reported 98.28% effectiveness using herbal therapy to treat 116 patients with amoebic dysentery. The herbal treatment contained *Ge Gen Huang Qin Huang Lian Tang* and *Bai Tou Weng Tang* (Pulsatilla Decoction), with addition of *Hou Po* (Cortex Magnoliae Officinalis) and *Huo Xiang* (Herba Agastaches), and removal of *Qin Pi* (Cortex Fraxini), as the base formula. Additional modifications included *Jin Yin Hua* (Flos Lonicerae Japonicae) for high fever; *Di Yu* (Radix Sanguisorbae) for the presence of blood in the stools; *Ban Xia* (Rhizoma Pinelliae) for nausea and vomiting; and *Bai Shao* (Radix Paeoniae Alba) for abdominal pain. The herbs were given in decoction daily in two equally-divided doses. The study reported complete recovery in 114 of 116 patients.¹²
6. **Enteritis:** Use of this formula plus *Bai Tou Weng* (Radix Pulsatillae), *Chi Shao* (Radix Paeoniae Rubra) and *Lian Qiao* (Fructus Forsythiae) was effective in treating all 22 infants with enteritis. The herbs were given via rectal instillation, 40-50 mL rectally two times daily for 3-7 days.¹³
7. **Ulcerative colitis:** Thirty patients with chronic ulcerative colitis were treated with *Ge Gen Huang Qin Huang Lian Tang* with recovery in 10 patients, significant improvement in 12 patients, and slight improvement in 3 patients. The treatment protocol was to flood the colon with 250 mL of the decoction one time daily for 15 days per course of treatment, for a total of 1-3 courses of treatment.¹⁴ Another study reported 87.5% effectiveness using modified *Ge Gen Huang Qin Huang Lian Tang* to treat 32 patients with chronic ulcerative colitis characterized by Large Intestine damp-heat and Spleen and Stomach weakness and deficiency.¹⁵
8. **Gastritis:** Sixty patients with chronic superficial gastritis were treated with good results using *Ge Gen Huang Qin Huang Lian Tang* plus *Xiang Fu* (Rhizoma Cyperi), *Bai Shao* (Radix Paeoniae Alba), and *Huo Xiang* (Herba Agastaches). Additional modifications included use of *Bai Hua She She Cao* (Herba Hedyotis) for constipation; *Mu Xiang* (Radix Aucklandiae) for loose stools; calcined *Wa Leng Zi* (Concha Arcae) for acid reflux; and *Zhu Ru* (Caulis Bambusae in Taenia) and *Ban Xia* (Rhizoma Pinelliae) for nausea and vomiting. Additionally, for abdominal distention, *Da Fu Pi* (Pericarpium Arecae) was added and *Bai Shao* (Radix Paeoniae Alba) was removed; and for food stagnation, dry-fried *Lai Fu Zi* (Semen Raphani), *Shan Zha* (Fructus Crataegi), and *Shen Qu* (Massa Fermentata) were added, and *Bai Shao* (Radix Paeoniae Alba) was removed. The study reported relief of gastric pain in all patients within 1-2 weeks of herbal treatment. Of 60 patients, 32 had significant improvement and 28 had moderate improvement.¹⁶
9. **Fever:** One study reported 97% effectiveness using modified *Ge Gen Huang Qin Huang Lian Tang* to treat 200 children with fever. Modifications to this formula included *Qing Hao* (Herba Artemisiae Annuae) for fever in spring, *Shi Gao* (Gypsum Fibrosum) in summer, *Jie Geng* (Radix Platycodonis) in fall, and *Ma Huang* (Herba Ephedrae) in winter. The study reported improvement in 197 of 200 patients.¹⁷

Gě Gēn Huáng Qín Huáng Lián Tāng

(Kudzu, Coptis, and Scutellaria Decoction)

TOXICOLOGY

The LD₅₀ for alcohol extract of the formula via intravenous injection was 13.5 g/kg in mice. The cause of fatality was attributed to cardiovascular effects, with a decrease in heart rate and contractile force of the heart.¹⁸

Ge Gen Huo Xiang Shao Yao Tang (Kudzu, Pogostemon, and Peony Decoction) treats diarrhea characterized by the presence of damp-heat and toxins in the Intestines, accompanied by disharmony of the middle *jiao*. It is formulated following the principles of three classic formulas: *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction) to clear heat in the interior; *Huo Xiang Zheng Qi San* (Agastache Powder to Rectify the Qi) to regulate qi and harmonize the middle *jiao*; and *Shao Yao Tang* (Peony Decoction) to clear heat

and eliminate toxins. Clinical applications of this formula include diarrhea, gastroenteritis, enteritis, dysentery, and food poisoning.

AUTHORS' COMMENTS

Clinically, *Ge Gen Huang Qin Huang Lian Tang* is safe for use in any condition involving heat in the Intestines, regardless of whether exterior symptoms are present or not. It is most important, however, **not** to use it in patients with deficiency and cold of the Spleen and Stomach.

Ge Gen Huang Qin Huang Lian Tang, *Shao Yao Tang* (Peony Decoction), and *Bai Tou Weng Tang* (Pulsatilla Decoction) are three commonly used formulas for diarrhea, each with a very different etiology and emphasis.

- *Ge Gen Huang Qin Huang Lian Tang* treats heat invading the interior as a result of the misuse of herbs while the pathogenic factor was still at the superficial level. Chief manifestations include foul-smelling diarrhea with burning sensations in the anus.
- *Shao Yao Tang* treats accumulation of damp-heat and toxins in the Large Intestine, leading to dysfunction and qi stagnation causing severe abdominal pain with blood and mucus in the stool and burning sensations in the anus. The key sign for the use of this formula is rectal tenesmus.
- *Bai Tou Weng Tang* treats accumulation of damp-heat and toxins in the Intestines at the *xue* (blood) level. The heat is more prominent than the dampness and is deep in the *xue* level, so more blood will be present in the stool. Other symptoms include abdominal pain, rectal tenesmus, mucus in the stool, and burning sensations in the anus.¹⁹

Shí Gāo Tāng (Gypsum Decoction)

石膏湯
石膏汤

Pinyin Name: *Shi Gao Tang*

Literal Name: Gypsum Decoction

Original Source: *Wai Tai Mi Yao* (Arcane Essentials from the Imperial Library) by Wang Tao in 752 A.D.

COMPOSITION

<i>Shi Gao</i> (Gypsum Fibrosum)	6g
<i>Ma Huang</i> (Herba Ephedrae)	9g
<i>Dan Dou Chi</i> (Semen Sojae Praeparatum)	1 cup [9g]
<i>Huang Qin</i> (Radix Scutellariae)	6g
<i>Huang Lian</i> (Rhizoma Coptidis)	6g
<i>Huang Bo</i> (Cortex Phellodendri Chinensis)	6g
<i>Zhi Zi</i> (Fructus Gardeniae), <i>bo</i> (opened)	10 pieces [9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cut the ingredients, cook them in 10 cups of water, and reduce the liquid to 3 cups. Take 1 cup of the warm, strained decoction three times daily. The source text advises to avoid consuming pork and coming into contact with cold water while taking this formula.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and eliminates toxins
2. Releases the exterior and induces perspiration

CLINICAL MANIFESTATIONS

Unresolved exterior syndrome with interior heat in all three *jiaos*: high fever, no perspiration, stiffness and a feeling of heaviness of the body and the extremities, dry nose, thirst, fidgeting, irritability, insomnia, delirium, incoherent speech, maculated skin, and a slippery, rapid pulse.

CLINICAL APPLICATIONS

Fever, irritability, and delirium.

EXPLANATION

Shi Gao Tang (Gypsum Decoction) treats unresolved exterior syndrome with interior excess heat in all three *jiaos*. This syndrome often originates from *taiyang* syndrome. If the excess exterior symptoms in a *taiyang* syndrome are not relieved over a period of time, heat and toxins are created in the three *jiaos*, or all over the body. High fever, no perspiration, stiffness of the body and the extremities, dry nose, thirst, fidgeting, irritability, insomnia, incoherent speech, and delirium all indicate excess at the exterior and heat in the interior. The heat and toxins may also cause maculated skin by forcing the blood out of the blood vessels.

To effectively treat this syndrome, both exterior-releasing and interior-clearing methods need to be used. This

Shí Gāo Tāng (Gypsum Decoction)

Shi Gao Tang (Gypsum Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Unresolved exterior syndrome with interior heat in all three <i>jiaos</i>	<ul style="list-style-type: none">• High fever, no perspiration, stiffness and a feeling of heaviness of the body and the extremities: unreleased exterior condition• Dry nose and thirst: interior heat consuming body fluids• Fidgeting, irritability, insomnia incoherent speech, and delirium: interior heat disturbing <i>shen</i> (spirit)• Maculated skin: heat forcing blood outwards• Slippery, rapid pulse: interior heat	<ul style="list-style-type: none">• Clears heat and eliminates toxins• Releases the exterior and induces perspiration	<ul style="list-style-type: none">• <i>Shi Gao</i> (Gypsum Fibrosum) clears excessive heat and relieves irritability.• <i>Ma Huang</i> (Herba Ephedrae) and <i>Dan Dou Chi</i> (Semen Sojae Praeparatum) relieve exterior symptoms via diaphoresis.• <i>Huang Qin</i> (Radix Scutellariae), <i>Huang Lian</i> (Rhizoma Coptidis), <i>Huang Bo</i> (Cortex Phellodendri Chinensis) and <i>Zhi Zi</i> (Fructus Gardeniae) sedate the heat and dispel toxins from all three <i>jiaos</i>.

formula contains *Shi Gao* (Gypsum Fibrosum) as the chief herb to clear excess heat and relieve the irritability. *Ma Huang* (Herba Ephedrae) and *Dan Dou Chi* (Semen Sojae Praeparatum) relieve exterior symptoms by inducing sweating. *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Huang Bo* (Cortex Phellodendri Chinensis), and *Zhi Zi* (Fructus Gardeniae), four herbs in *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), sedate heat and dispel toxins from all three *jiaos*. These four herbs also counter the warm nature of *Ma Huang* (Herba Ephedrae) and prevent it from creating heat in the body.

AUTHORS' COMMENTS

- Shi Gao Tang* and *San Huang Shi Gao Tang* (Three-Yellow and Gypsum Decoction) both contain *Shi Gao* (Gypsum Fibrosum), *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Huang Bo* (Cortex Phellodendri Chinensis) and *Zhi Zi* (Fructus Gardeniae) to sedate heat and dispel toxins from all three *jiaos*.
- *Shi Gao Tang* is an exterior- and interior-releasing formula; it treats exterior condition with interior heat.
 - *San Huang Shi Gao Tang* is a heat-clearing formula; it only addresses the presence of heat and toxins in the interior.

<i>Zhi Qiao</i> (Fructus Citri Aurantii)	180g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	90g

DOSAGE / PREPARATION / ADMINISTRATION

Source text instructions: grind the ingredients, except *Rou Gui* (Cortex Cinnamomi) and *Zhi Qiao* (Fructus Aurantii), into a coarse powder, dry-fry using low intensity fire until the color changes, and then remove from heat. Spread the powder and let it cool. Add the ground powder of *Rou Gui* (Cortex Cinnamomi) and *Zhi Qiao* (Fructus Aurantii), and mix them thoroughly. Cook 9g of this mixed powder with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 1.5 bowls of water until 0.5 bowl of liquid remains. Take the strained decoction while warm.

CHINESE THERAPEUTIC ACTIONS

1. Releases the exterior
2. Warms the interior
3. Smoothes qi circulation and dissolves phlegm
4. Activates blood circulation and resolves accumulation

CLINICAL MANIFESTATIONS

Wind-cold at the exterior with five accumulations in the interior: fever, chills, no perspiration, headache, soreness of the body, neck stiffness, chest fullness, lack of appetite, nausea, vomiting, and abdominal pain. This formula is also used for women who have abdominal and chest pain caused by qi and blood disharmony, and menstrual irregularities that are cold in nature.

Wǔ Jī Sǎn (Five-Accumulation Powder)

CLINICAL APPLICATIONS

Gastroenteritis, peptic ulcer, acid reflux, acute or chronic enteritis, hernia, sciatica, neuralgia, arthralgia, arthritis, headache, gout, trigeminal neuralgia, and irregular menstruation.

EXPLANATION

Wu Ji San (Five-Accumulation Powder) treats five types of accumulations: cold, dampness, qi, blood, and phlegm. This syndrome of multiple stagnations can be attributed to the presence of excess cold at both the exterior and interior. Excess cold constricting the exterior can cause fever, chills, no perspiration, and other exterior symptoms. Because cold is stagnant in nature, it may obstruct qi and blood flow to cause headache, soreness of the body, and neck stiffness. Excess cold in the interior is often the result of improper dietary intake of raw or cold food or beverages, which can obstruct qi and blood flow to cause accumulation of damp and phlegm. The phlegm may obstruct the Lung qi causing chest fullness. The presence of dampness and phlegm in the middle *jiao* damages the yang qi of the Spleen and Stomach; hence, appetite is affected. Various stagnations in the Stomach can cause the Stomach qi to rise abnormally, leading to nausea and vomiting. The abdominal and chest pains are caused by stagnation of both qi and blood.

To effectively treat this syndrome, the exterior cold has to be expelled with exterior-releasing herbs, and the interior cold removed with interior-warming herbs. In addition, aromatic and drying herbs should be used to dispel dampness and phlegm, and blood-activating herbs should be used to regulate the blood circulation.

Strong acrid and warm exterior-releasing herbs such as *Ma Huang* (Herba Ephedrae) and *Bai Zhi* (Radix Angelicae Dahuricae) release the exterior and induce perspiration. *Ma Huang* (Herba Ephedrae) also ventilates the Lung to relieve chest fullness. *Gan Jiang* (Rhizoma Zingiberis) and *Rou Gui* (Cortex Cinnamomi) warm the interior and relieve pain. Together, these four herbs can effectively treat exterior and interior cold. *Cang Zhu* (Rhizoma Atractylodis) and *Hou Po* (Cortex Magnoliae Officinalis), both aromatic in nature, dry dampness and strengthen the Spleen. *Chen Pi* (Pericarpium Citri Reticulatae), *Ban Xia* (Rhizoma Pinelliae), and *Fu Ling* (Poria) dissolve phlegm and regulate qi flow. *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Bai Shao* (Radix Paeoniae Alba) regulate blood circulation and help relieve pain. *Jie Geng* (Radix Platycodonis) and *Zhi Qiao* (Fructus Aurantii) regulate qi flow to help dissolve phlegm. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)

Wu Ji San (Five-Accumulation Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Wind-cold at the exterior with five accumulations in the interior	<ul style="list-style-type: none">• Fever, chills, no perspiration, headache, soreness of the body, and neck stiffness: qi and blood stagnation due to exterior-excess wind-cold• Chest fullness and lack of appetite: damp and phlegm stagnation• Nausea, and vomiting: reversed flow of Stomach qi due to stagnations• Abdominal and chest pain: qi and blood stagnation	<ul style="list-style-type: none">• Releases the exterior• Warms the interior• Smooths qi circulation and dissolves phlegm• Activates blood circulation and resolves accumulation	<ul style="list-style-type: none">• <i>Ma Huang</i> (Herba Ephedrae) and <i>Bai Zhi</i> (Radix Angelicae Dahuricae) release the exterior and induce perspiration.• <i>Gan Jiang</i> (Rhizoma Zingiberis) and <i>Rou Gui</i> (Cortex Cinnamomi) warm the interior and relieve pain.• <i>Cang Zhu</i> (Rhizoma Atractylodis) and <i>Hou Po</i> (Cortex Magnoliae Officinalis) dry dampness and strengthen the Spleen.• <i>Chen Pi</i> (Pericarpium Citri Reticulatae), <i>Ban Xia</i> (Rhizoma Pinelliae) and <i>Fu Ling</i> (Poria) dissolve phlegm and regulate qi circulation.• <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Chuan Xiong</i> (Rhizoma Chuanxiong) and <i>Bai Shao</i> (Radix Paeoniae Alba) regulate blood circulation and relieve pain.• <i>Jie Geng</i> (Radix Platycodonis) and <i>Zhi Qiao</i> (Fructus Aurantii) regulate qi flow to dissolve phlegm.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the middle <i>jiao</i>, strengthens the Spleen, and harmonizes the herbs.

Wǔ Jī Sǎn (Five-Accumulation Powder)

harmonizes the middle *jiao*, strengthens the Spleen, and harmonizes the formula.

Because this formula activates qi and blood flow, warms the interior, and relieves pain, it is also effective in treating women with menstrual disorders and abdominal pain caused by cold stagnation.

MODIFICATIONS

- With abdominal pain due to food stagnation after meals, add *Shan Zha* (Fructus Crataegi) and *Mai Ya* (Fructus Hordei Germinatus).
- If accompanied by numbness and pain, add *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis), and *Fang Feng* (Radix Saposhnikoviae).
- With headache due to wind-cold, add *Sheng Ma* (Rhizoma Cimicifugae) and *Ge Gen* (Radix Puerariae Lobatae).
- When there is pain in the entire body, add *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), and *Xi Xin* (Radix et Rhizoma Asari).
- With cough, add *Sang Bai Pi* (Cortex Mori) and *Ku Xing Ren* (Semen Armeniacae Amarum).
- With low back pain, add *Niu Xi* (Radix Achyranthis Bidentatae), *Du Zhong* (Cortex Eucommiae), and *Xiao Hui Xiang* (Fructus Foeniculi).
- With edema of the legs, add *Wu Jia Pi* (Cortex Acanthopanax) and *Da Fu Pi* (Pericarpium Arecae).
- With spasms of the hands and feet, add *Mu Gua* (Fructus Chaenomelis) and *Niu Xi* (Radix Achyranthis Bidentatae).
- If there is more interior cold, add *Wu Zhu Yu* (Fructus Evodiae).
- With painful menstruation, add *Xiang Fu* (Rhizoma Cyperi), *Yan Hu Suo* (Rhizoma Corydalis), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae).
- With dry heaves from Stomach qi reversal, add *Wu Zhu Yu* (Fructus Evodiae), *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Xiang Fu* (Rhizoma Cyperi), and *Sha Ren* (Fructus Amomi).
- For *lin zheng* (dysuria syndrome) in women, add *Mu Tong* (Caulis Akebiae) and *Che Qian Zi* (Semen Plantaginis).

These two formulas are essentially the same. Though they are derived from two different original sources, they have identical names, same composition, but they differ in the doses and preparation of the ingredients. Clinically, the functions of these two formulas are very similar and can be used interchangeably. According to the source texts, their differences are as follow:

- *Wu Ji San* from *Xian Shou Li Shang Xu Duan Mi Fang* (Secret Recipes for Treating Wounds and Bone-Setting Taught by Celestials) treats individuals with damages caused by five debilitation and seven damages (五勞七傷 *Wu Lao Qi Shang*).
- *Wu Ji San* from *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) addresses external wind-cold due to exposure, and internal cold due to damages (外感風寒 內傷生冷 *Wai Gan Feng Han, Nei Shang Sheng Leng*).

AUTHORS' COMMENTS

Wu Ji San is literally named "five-accumulation powder" because it treats five types of accumulations: cold, dampness, qi, blood, and phlegm.

Chái Hú Guì Zhī Gān Jiāng Tāng

(Bupleurum, Cinnamon Twig, and Ginger Decoction)

柴胡桂枝乾薑湯

柴胡桂枝干姜汤

Pinyin Name: *Chai Hu Gui Zhi Gan Jiang Tang*

Literal Name: Bupleurum, Cinnamon Twig, and Ginger Decoction

Alternate Name: Bupleurum Cinnamon and Ginger Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Chai Hu</i> (Radix Bupleuri)	24g [15g]
<i>Huang Qin</i> (Radix Scutellariae)	9g
<i>Tian Hua Fen</i> (Radix Trichosanthis)	12g
<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g [12g]
<i>Gan Jiang</i> (Rhizoma Zingiberis)	6g
<i>Mu Li</i> (Concha Ostreae), <i>ao</i> (simmered)	6g [20g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 12 cups [2,400 mL] of water until the liquid is reduced to 6 cups [1,200 mL]. Discard the residue, and cook the strained decoction again until it is reduced to 3 cups [600 mL]. Take 1 cup [200 mL] of the warm decoction three times daily. Patients may feel slightly irritated after taking the first dose, but sweating is usually induced after taking the second dose, a sign that the condition is resolved. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Harmonizes *shaoyang*
2. Warms interior and dispels water accumulation

CLINICAL MANIFESTATIONS

Shaoyang disorder with water accumulation in the interior: a feeling of fullness and clumping in the chest and hypochondrium, dysuria, thirst, absence of vomiting, perspiration of the head, alternating spells of chills and fever, and irritability.

CLINICAL APPLICATIONS

Common cold, influenza, pneumonia, bronchitis, hepatitis, cholecystitis, and malaria.

EXPLANATION

According to the source text, *Chai Hu Gui Zhi Gan Jiang Tang* (Bupleurum, Cinnamon Twig, and Ginger Decoction) treats patients who have had exterior condition for five to

six days, and who have been treated unsuccessfully with exterior-releasing and downward draining methods. At this moment, the exterior condition is still unresolved, and the disease has moved interior. This condition is referred to as *shaoyang* disorder with water accumulation in the interior. *Shaoyang* disorders are typically described as “half-exterior and half-interior,” with characteristic symptoms such as alternating spells of fever and chills, a feeling of fullness and clumping in the chest and hypochondrium, and irritability. In addition to *shaoyang* syndrome, water has accumulated in the interior. As normal water distribution becomes impaired, symptoms such as perspiration of the head, thirst, and dysuria occur.

Chai Hu (Radix Bupleuri) addresses the *shaoyang* stage of the disorder, harmonizing the “half-exterior and half-interior” condition and relieving alternating spells of fever and chills, and a feeling of fullness and clumping. *Huang Qin* (Radix Scutellariae) clears damp-heat and relieves feeling of fullness and clumping. *Tian Hua Fen* (Radix Trichosanthis) promotes generation of body fluids and relieves thirst, dry mouth, and dysuria. *Gui Zhi* (Ramulus Cinnamomi) eliminates the pathogenic factors that linger at the exterior, while *Gan Jiang* (Rhizoma Zingiberis) warms the interior to dispel cold. These two herbs also warm yang to dispel cold and eliminate water accumulation. *Mu Li* (Concha Ostreae) resolves phlegm and disperses the clumps. Lastly, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the formula.

MODIFICATIONS

- If there is difficulty with urination, add *Fu Ling* (Poria) and *Che Qian Zi* (Semen Plantaginis).
- With neck stiffness, add *Ge Gen* (Radix Puerariae Lobatae) and *Bai Shao* (Radix Paeoniae Alba).
- For anuria, add *Wu Zhu Yu* (Fructus Evodiae) and *Fu Ling* (Poria).
- For headache and perspiration of the head, add *Chuan Xiong* (Rhizoma Chuanxiong) and *Bai Zhi* (Radix Angelicae Dahuricae).
- For peritoneal tuberculosis, add *Bie Jia* (Carapax Trionycis) and *Bai Shao* (Radix Paeoniae Alba).
- For fever associated with tuberculosis, add *Huang Qi* (Radix Astragali) and *Bie Jia* (Carapax Trionycis).

TOXICOLOGY

One case of interstitial pneumonia was reported in a 57-year-old man who had taken Saikokeishikankyō-tou (*Chai Hu Gui Zhi Gan Jiang Tang*) for one month and *Lycium halimifolium* Mil (LHM) for two weeks. The diagnosis was confirmed when a lymphocyte stimulation test, skin test, and challenge test were all positive to these herbs. This was the first report on pneumonitis caused by this formula to be diagnosed by lymphocyte stimulation test, skin test, and challenge test.¹

Chapter 4 — Summary

— Exterior- and Interior-Releasing Formulas

SECTION 1: EXTERIOR-RELEASING AND INTERIOR-ATTACKING FORMULAS

Name	Similarities	Differences
<i>Da Chai Hu Tang</i> (Major Bupleurum Decoction)		Treats <i>shaoyang</i> and <i>yangming</i> syndromes
<i>Hou Po Qi Wu Tang</i> (Seven-Substance Decoction with Magnolia Bark)	Release the exterior and interior	Treats <i>taiyang</i> and <i>yangming</i> syndromes with interior excess
<i>Fang Feng Tong Sheng San</i> (Saposhnikovia Powder that Sagely Unblocks)		Treats exterior wind-heat syndrome with interior heat accumulation

Da Chai Hu Tang (Major Bupleurum Decoction) is the main formula to harmonize *shaoyang* and *yangming* syndromes. Key clinical manifestations include alternating spells of chills and fever, fullness and pain of the epigastrium, hot sensation in the hypochondriac region, constipation or diarrhea, a yellow tongue coating, and a wiry, forceful pulse.

Hou Po Qi Wu Tang (Seven-Substance Decoction with Magnolia Bark) treats *taiyang* and *yangming* syndromes with interior excess. Main signs and symptoms include abdominal fullness, fever, constipation, and a superficial, rapid pulse.

Fang Feng Tong Sheng San (Saposhnikovia Powder that Sagely Unblocks) treats concurrent exterior and interior excess heat syndrome. Clinical manifestations include chills, fever, constipation, red and painful eyes, dizziness, thick and sticky nasal discharge, sore throat, chest fullness, coughing, dyspnea, a bitter taste in the mouth, and a dry mouth.

SECTION 2: EXTERIOR-RELEASING AND INTERIOR-CLEARING FORMULAS

Name	Similarities	Differences
<i>Ge Gen Huang Qin Huang Lian Tang</i> (Kudzu, Coptis, and Scutellaria Decoction)	Release the exterior and clear the interior	Releases wind-cold from the exterior, clears heat from the interior
<i>Shi Gao Tang</i> (Gypsum Decoction)		Clears heat from the upper, middle, and lower <i>jiaos</i>

Ge Gen Huang Qin Huang Lian Tang (Kudzu, Coptis, and Scutellaria Decoction) releases wind-cold from the exterior and clears heat from in the interior. This formula mainly treats foul-smelling diarrhea or dysentery characterized by the presence of interior heat with an unresolved exterior condition. There is usually a burning sensation in the anus after defecation. The tongue coating is yellow and the pulse is rapid.

Shi Gao Tang (Gypsum Decoction) clears heat in all three *jiaos*, eliminates heat and toxins, and dispels exterior factors through perspiration. Clinical manifestations include high fever, chills with no perspiration, heaviness and stiffness of the body and the extremities, dry nose, thirst, fidgeting, and irritability.

Chapter 4 — Summary

SECTION 3: EXTERIOR-RELEASING AND INTERIOR-WARMING FORMULAS

Name	Similarities	Differences
Wu Ji San (Five-Accumulation Powder)	Release the exterior and warm the interior	Releases wind-cold from the exterior and dispels accumulation of cold, dampness, qi, blood, and phlegm in the interior
Chai Hu Gui Zhi Gan Jiang Tang (Bupleurum, Cinnamon Twig, and Ginger Decoction)		Harmonizes <i>shaoyang</i> , dispels water accumulation

Wu Ji San (Five-Accumulation Powder) treats concurrent exterior and interior cold syndrome. Clinical manifestations include fever and chills without perspiration, soreness of the body, neck stiffness, chest fullness, nausea, vomiting, and abdominal pain. This formula can also be used for irregular menstruation caused by cold.

Chai Hu Gui Zhi Gan Jiang Tang (Bupleurum, Cinnamon Twig, and Ginger Decoction) treats *shaoyang* disorder with a feeling of fullness and clumping in the chest and hypochondrium. Key signs and symptoms include alternating spells of fever and chills, a feeling of fullness and clumping in the chest and hypochondrium, irritability, dysuria, thirst, cold hands and feet, and loose stools or diarrhea.

Chapter 5

— Heat-Clearing Formulas

叶桂 Yè Guì

叶桂 Yè Guì, also known as 叶天士 Yè Tiān-Shì, 1666 – 1745.

叶桂 Yè Gui

Ye Gui, also known as Ye Tian-Shi, was born into a long family lineage of physicians. His father and grandfather were famous pediatricians. Ye began to learn medicine from his father at the age of twelve. When his father passed away two years later, Ye apprenticed with other teachers. Being very intelligent and extremely diligent, Ye absorbed and integrated knowledge from his family and seventeen other masters over the next ten years, and became one of the best physicians in the country.

Ye lived in southern China and practiced medicine during a time when epidemics plagued the country. At the time, most doctors still followed the principles of 伤寒 *shang han* (cold damage), and had little success in treating epidemic illnesses. Observing this, Ye proposed the theories of 温病 *wen bing* (warm disease), and developed additional theories of *Wei Qi Ying Xue Bian Zheng* (Defensive, Qi, Nutritive, Blood Differentiation) and their corresponding treatment strategies.²

Ye dedicated his entire life to clinical practice, and did not have time to write about his work. His extraordinary knowledge was organized and published by his apprentices. The most famous works attributed to Ye Gui include 温热论 *Wen Re Lun* (Discussion of Warm and Hot Disorders) and 临证指南医案 *Lin Zheng Zhi Nan Yi An* (Case Histories from the Compass of Clinical Patterns). The first text focused on theories and treatment principles, and the second text detailed case studies. Credited as one of the most influential physicians in establishing the framework of *wen bing* (warm disease), Ye Gui significantly influenced the practice of traditional Chinese medicine today.

- 1. Compiled and published between 1745 to 1766 by the apprentices of Ye Gui.
- 2. The diagnostic principles of *shang han* (cold damage) follow *Liu Jing Bian Zheng* (Six Stages Differentiation), from *taiyang*, through *yangming*, *shaoyang*, *taiyin*, and *shaoyin*, to *jueyin*. The diagnostic principles of *wen bing* (warm disease) follow *Wei Qi Ying Xue Bian Zheng* (Defensive, Qi, Nutritive, Blood Differentiation), from *wei* (defensive), *qi* (energy), and *ying* (nutritive) to *xue* (blood) levels. This latter set of diagnostic theories presented an alternative systematic perspective from which to evaluate the pathology of disease, and significantly expanded the practice of traditional Chinese medicine.

Chapter 5 — Overview

— Heat-Clearing Formulas

Definition: Heat-clearing formulas clear heat, purge fire, cool the blood, eliminate toxins, nourish yin, and clear deficiency heat. This method of treatment is known as *qing fa* (clearing), one of the *ba fa* (eight treatment methods) described in the *Huang Di Nei Jing* (Yellow Emperor's Inner Classic) in the first or second century, A.D.

Heat-clearing formulas treat disorders characterized by warmth, heat, and fire. These three factors are actually the same pathogen, manifesting at different degrees of severity. For example, heat is actually a manifestation of extreme cases of warmth, and severe, intense heat is nothing other than fire. All three factors contribute to interior heat syndromes, which are treated by using cold herbs to clear heat.

~
**Warmth, heat, and fire
 are the same pathogen
 manifesting at different
 degrees of severity.**
 ~

Heat may be contracted externally or internally generated. External sources primarily refer to the *liu yin* (six exogenous factors). Internal sources may include emotional disturbances or imbalance of the *zang fu* organs. Once generated, heat may reside in differing levels of the body, affecting various *zang fu* organs. The different levels include *qi* (energy), *ying* (nutritive), and *xue* (blood). The *zang fu* organs most frequently affected by heat include the Heart, Liver, Gallbladder, Lung, Stomach, and Intestines.

SUBCATEGORIES OF ACTION

Due to the complex nature of heat, six sub-categories of heat-clearing formulas have been created to delineate the specificity of the heat, as it may be located in the *qi* (energy), *ying* (nutritive), and/or *xue* (blood) levels. It may affect different *zang* (solid) and *fu* (hollow) organs. Lastly, heat can have various intensities (warmth, heat, and fire) and characteristics (excess heat, deficiency heat, and heat toxins).

1. *Qi* (Energy) Level-Clearing Formulas

These formulas clear heat, reduce irritability, promote production of body fluids, and relieve thirst. They may be used to treat excess conditions (heat in the *qi* level), or complications of excess and deficiency conditions (heat in the *qi* level damaging *qi*, *ying*, and body fluids).

Heat attacking the *qi* level may produce signs and symptoms of high fever, sensations of warmth in the body, irritability, thirst, profuse sweating, aversion to heat, and a surging, big pulse. Herbs and formulas that commonly clear heat from the *qi* level include *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Rhizoma Anemarrhenae), and *Bai Hu Tang* (White Tiger Decoction).

Heat in the *qi* level may damage *qi*, *ying*, and body fluids, causing signs and symptoms such as fever, profuse sweating, irritability and a stifling sensation in the chest, a dry mouth, and a red tongue body. Herbs and formulas that commonly clear heat, tonify *qi*, and/or nourish *ying* include *Shi Gao* (Gypsum Fibrosum), *Ren Shen* (Radix et Rhizoma Ginseng), *Mai Dong* (Radix Ophiopogonis), and *Zhu Ye Shi Gao Tang* (Bamboo Leaves and Gypsum Decoction).

2. *Ying* (Nutritive) Level-Clearing and Blood-Cooling Formulas

These formulas clear heat in the *ying* (nutritive) level, cool heat in the *xue* (blood) level, disperse blood stasis, and eliminate toxins.

Common clinical manifestations of heat in the *ying* level include: fever that increases in the evening, irritability, insomnia, absence of thirst, or thirst without a desire to drink, and occasionally,

Chapter 5 — Overview

delirium or maculae. *Shui Niu Jiao* (Cornu Bubali) and *Di Huang* (Radix Rehmanniae) clear heat in the *ying* level. Moreover, because heat often attacks the *qi* (energy) level before it attacks the *ying* level, it is important to drive it outward, using herbs that clear heat from the *qi* level, such as *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), and *Zhu Ye* (Herba Phyllostachys). An exemplar formula is *Qing Ying Tang* (Clear the Nutritive Level Decoction), which focuses on clearing heat from the *ying* level by ventilating heat from the *qi* level.

Common clinical manifestations of heat in the *xue* (blood) level include: various types of bleeding, maculae, delirium, mania, and a deep red tongue body with a prickly coating. *Shui Niu Jiao* (Cornu Bubali) and *Di Huang* (Radix Rehmanniae) are frequently used to clear heat and cool the blood. Additionally, because heat in the *xue* level is often complicated by bleeding and blood stasis, it is important to cool the blood, stop bleeding, and disperse blood stasis using herbs such as *Mu Dan Pi* (Cortex Moutan) and *Chi Shao* (Radix Paeoniae Rubra). An exemplar formula is *Xi Jiao Di Huang Tang* (Rhinoceros Horn and Rehmannia Decoction).

3. Qi (Energy) and Xue (Blood) Levels-Clearing Formula

These formulas clear heat in the *qi* (energy) level, cool heat in the *xue* (blood) level and purge fire and eliminate toxins. These formulas are suitable for treating excess heat and toxins, or epidemic toxins throughout the body affecting both *qi* and *xue* levels. Common clinical manifestations include high fever, irritability, strong thirst, epistaxis, hematemesis, maculae, and delirium. In these cases, use herbs and formulas to clear heat from the *qi* and *xue* levels simultaneously.

Herbs that clear heat from the *qi* (energy) level include *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae). Herbs that clear heat from the *xue* (blood) level include *Shui Niu Jiao* (Cornu Bubali) and *Di Huang* (Radix Rehmanniae). An exemplar formula is *Qing Wen Bai Du Yin* (Clear Epidemics and Overcome Pathogenic Influences Decoction).

4. Heat-Clearing and Toxin-Eliminating Formulas

These formulas clear heat, purge fire, eliminate toxins, and generally treat three main conditions: excess heat, fire, and toxins in all three *jiaos*; heat stagnation in the chest and diaphragm; and wind-heat and epidemic toxins invading the head and facial regions.

The presence of excess heat, fire, and toxins in all three *jiaos* is characterized by fever, irritability, delirium, epistaxis, maculae, boils, and sores. *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Zhi Zi* (Fructus Gardeniae), and *Lian Qiao* (Fructus Forsythiae) commonly clear heat, purge fire, and eliminate toxins. An excellent formula that clears excess heat in all three *jiaos* is *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity).

Stagnation of heat in the chest and diaphragm is characterized by fever, a red face, irritability and warm sensations in the chest and diaphragm, ulcerations of the mouth and tongue, constipation, and scanty, red urine. *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Zhi Zi* (Fructus Gardeniae), and *Lian Qiao* (Fructus Forsythiae) clear heat, purge fire, and eliminate toxins. *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) may be used to clear heat accumulated in the chest and diaphragm causing constipation and dysuria. An exemplar formula that guides and drains heat downward is *Liang Ge San* (Cool the Diaphragm Powder).

Wind-heat and epidemic toxins invading the head and facial regions are characterized by redness and painful swellings on the face, as well as by sore throat. *Niu Bang Zi* (Fructus Arctii), *Bo He* (Herba Menthae), and *Chan Tui* (Periostracum Cicadae) clear wind-heat and toxins affecting the upper parts of the body. *Pu Ji Xiao Du Yin* (Universal Benefit Decoction to Eliminate Toxin) is an excellent formula to dispel heat and toxins outward.

5. Zang Fu-Clearing Formulas

These formulas clear heat from the various *zang fu* organs and their associated channels and collaterals. Clinical manifestations vary, depending on the severity of the heat and the area affected.

Heat-clearing and toxin-eliminating formulas clear excess heat, fire, and toxins in all three *jiaos*.

Chapter 5 — Overview

- Heat affecting the Heart is characterized by symptoms such as fidgeting, irritability and *shen* (spirit) disturbance. Herbs that clear heat from the Heart channel include *Huang Lian* (Rhizoma Coptidis), *Zhi Zi* (Fructus Gardeniae), *Lian Zi Xin* (Plumula Nelumbinis), and *Mu Tong* (Caulis Akebiae). The formula *Dao Chi San* (Guide Out the Red Powder) clears heat from the Heart.
- Liver and Gallbladder heat often presents with such symptoms as red eyes, hypochondriac pain, and a bitter taste in the mouth. Herbs that clear fire from the Liver and Gallbladder include *Long Dan* (Radix et Rhizoma Gentianae), *Xia Ku Cao* (Spica Prunellae), and *Qing Dai* (Indigo Naturalis). *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver) is the primary formula that clears heat from Liver and Gallbladder.
- Lung heat is characterized by symptoms such as coughing, hurried respiration and dyspnea. Herbs that clear heat from the Lung include *Huang Qin* (Radix Scutellariae), *Sang Bai Pi* (Cortex Mori), *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Rhizoma Anemarrhenae), and the formula *Xie Bai San* (Drain the White Powder).
- Stomach heat involves clinical manifestations of toothache, swelling and ulcerations of the gum, and foul breath. Herbs that clear heat from Spleen and Stomach include *Shi Gao* (Gypsum Fibrosum), and *Huang Lian* (Rhizoma Coptidis). *Xie Huang San* (Drain the Yellow Powder) and *Qing Wei San* (Clear the Stomach Powder) are key formulas that clear heat from the Stomach.
- Heat in the Intestines may cause symptoms such as abdominal pain, rectal tenesmus, and burning sensations of the anus. Herbs that clear heat from the Intestines include *Bai Tou Weng* (Radix Pulsatillae), *Huang Lian* (Rhizoma Coptidis), and *Huang Bo* (Cortex Phellodendri Chinensis). Two formulas that clear heat from the Intestines are *Bai Tou Weng Tang* (Pulsatilla Decoction) and *Shao Yao Tang* (Peony Decoction).

6. Deficiency-Heat Clearing Formulas

These formulas nourish yin, ventilate heat, and relieve steaming bones sensations. They mostly treat late stages of heat syndromes that involve damage to yin and body fluids. Common clinical manifestations include evening fever, morning chills, and a red tongue body with a scanty tongue coating. Sometimes chronic deficiency heat patients may experience chronic persistent fever, tidal fever, *wu xin re* (five-center heat), and steaming bones sensations.

Herbs that clear yin-deficient heat include *Bie Jia* (Carapax Trionycis), *Zhi Mu* (Rhizoma Anemarrhenae), *Di Huang* (Radix Rehmanniae), *Qing Hao* (Herba Artemisiae Annuae), and *Di Gu Pi* (Cortex Lycii). Exemplar formulas include *Qing Hao Bie Jia Tang* (Artemisia Annuua and Soft-Shell Turtle Shell Decoction), *Qin Jiao Bie Jia San* (Gentiana Macrophylla and Soft-Shell Turtle Shell Powder), and *Qing Gu San* (Cool the Bones Powder).

CAUTIONS / CONTRAINDICATIONS

Generally speaking, heat-clearing formulas should only be used when there are no exterior symptoms or when exterior symptoms have been resolved, and heat is present at the interior. If there is heat at the exterior, then use exterior-releasing methods. If heat is located at both the exterior and interior, then use both exterior-releasing and heat-clearing methods. Heat-clearing formulas should not be used on their own if stagnation or hardness has formed in the interior. In these cases, use downward draining methods to eliminate stagnation. Timing and correct differentiation of syndromes are very important factors in using heat-clearing formulas.

The following notes and precautions apply when prescribing heat-clearing formulas:

- Examine carefully whether the heat syndrome is of deficiency or excess type.
- Examine carefully which *zang fu* organ is most involved in the heat syndrome.
- Examine carefully whether the symptoms indicate true heat or false heat.
- Heat-clearing herbs may damage the Stomach and consume yang, so it may be necessary to use Stomach-harmonizing herbs to prevent side effects.

Chapter 5 — Overview

- Warm herbs are used as render milder the strong, bitter and cold formulas that clear heat. A small dose of these warm herbs will prevent the patient's body from rejecting the cold herbs, and improve the overall effectiveness of the formula.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Heat-clearing formulas, as stated earlier, are divided into six subcategories based on their traditional therapeutic actions. These six subcategories also have contrasting pharmacological effects and clinical applications.

Many heat-clearing formulas have antipyretic, anti-inflammatory and antibiotic effects.

1. **Qi (energy) level-clearing formulas** primarily treat fever with or without infection.
 - **Fever:** These formulas have marked antipyretic effects to treat fever with or without infection.¹ *Bai Hu Tang* (White Tiger Decoction) is the representative formula, and it has been used to lower temperature associated with viral infection,² encephalitis B,³ and epidemic hemorrhagic fever.⁴
 - **Diabetes mellitus:** *Bai Hu Tang* (White Tiger Decoction) and *Bai Hu Jia Ren Shen Tang* (White Tiger plus Ginseng Decoction) both have marked hypoglycemic effects,^{5,6} and have been used successfully to treat diabetes mellitus.^{7,8}
2. **Ying (nutritive) level-clearing and blood-cooling formulas** are generally used to reduce fever and stop bleeding.
 - **Fever:** *Qing Ying Tang* (Clear the Nutritive Level Decoction) and *Xi Jiao Di Huang Tang* (Rhinceros Horn and Rehmannia Decoction) have shown marked antipyretic effects to lower body temperature in subjects with artificially-induced fever.^{9,10} Clinically, they have been used as adjunct treatment to lower body temperature.
 - **Bleeding:** *Xi Jiao Di Huang Tang* (Rhinceros Horn and Rehmannia Decoction) stops bleeding and has been used successfully to treat thrombocytopenic purpura,^{11,12} gastrointestinal bleeding,¹³ epistaxis,¹⁴ and other bleeding disorders.
3. **Formulas designed to clear heat from the qi (energy) and xue (blood) levels** treat fever and infection. For example, *Qing Wen Bai Du Yin* (Clear Epidemics and Overcome Pathogenic Influences Decoction) may be used to treat epidemic hemorrhagic fever,¹⁵ pyogenic infection,¹⁶ and leptospirosis.¹⁷
4. **Heat-clearing and toxin-eliminating formulas** have remarkable antibiotic effects, and are commonly used to treat a wide variety of diseases associated with infection and inflammation.
 - **Infection:** Many of these formulas have been used to treat various types of bacterial, viral, fungal, and other infections. These formulas have a wide range of clinical applications, including treatment of common cold and influenza,¹⁸ otitis media,¹⁹ pneumonia,²⁰ bronchiectasis,²¹ respiratory tract infection,²² infectious parotitis,²³ tonsillitis,^{24,25,26} pharyngitis,²⁷ encephalitis B,²⁸ cerebrospinal meningitis,²⁹ and epidemic hemorrhagic fever.³⁰ Representative formulas include *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), *Liang Ge San* (Cool the Diaphragm Powder), *Pu Ji Xiao Du Yin* (Universal Benefit Decoction to Eliminate Toxin), and *San Huang Xie Xin Tang* (Three-Yellow Decoction to Sedate the Epigastrium).
 - **Bleeding:** Some heat-clearing and toxin-eliminating formulas have hemostatic effects, and have been used successfully to stop bleeding. Clinical applications include upper and lower gastrointestinal bleeding,³¹ and epistaxis.^{32,33} Exemplar formulas include *San Huang Xie Xin Tang* (Three-Yellow Decoction to Sedate the Epigastrium) and *Liang Ge San* (Cool the Diaphragm Powder).
5. **Zang fu-clearing formulas** have excellent antibiotic and anti-inflammatory effects, and have been used to treat a wide range of localized disease characterized by infection and inflammation.
 - **Lung disorders:** The antibiotic effects of these formulas have been used successfully to treat lung disorders such as cough,³⁴ whooping cough,³⁵ and pneumonia.^{36,37} Exemplar formulas include *Xie Bai San* (Drain the White Powder) and *Bai Tou Weng Tang* (Pulsatilla Decoction).

Chapter 5 — Overview

- **Stomach disorders:** Formulas that clear heat from *zang fu* organs treat various types of stomach disorders, including but not limited to gastritis,^{38,39} upper gastrointestinal bleeding,^{40,41} erosive gastritis,⁴² epigastric pain,⁴³ and gastroenteritis.⁴⁴ Exemplar formulas include *Zuo Jin Wan* (Left Metal Pill), *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), and *Yu Nu Jian* (Jade Woman Decoction).
- **Liver disorders** (hepatitis) and **gallbladder disorders** (cholecystitis) may be treated with *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver).^{45,46}
- **Intestinal disorders:** These formulas have been shown to treat various types of intestinal disorders characterized by infection and inflammation. Clinical applications include enteritis,⁴⁷ colitis,^{48,49} ulcerative colitis,⁵⁰ dysentery,⁵¹ bacterial dysentery,^{52,53} and amoebic dysentery.⁵⁴ Representative formulas are *Shao Yao Tang* (Peony Decoction) and *Bai Tou Weng Tang* (Pulsatilla Decoction).
- **Kidney disorders:** *Qing Xin Lian Zi Yin* (Lotus Seed Decoction to Clear the Heart) successfully treats kidney disorders, such as glomerulonephritis,⁵⁵ pyelonephritis,⁵⁶ and nephrotic syndrome.⁵⁷
- **Eye disorders** such as conjunctivitis may be treated with *Bai Tou Weng Tang* (Pulsatilla Decoction).⁵⁸
- **Ear disorders** such as otitis media may be treated with *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver).⁵⁹
- **Nose disorders** such as epistaxis may be treated with *Xie Bai San* (Drain the White Powder) and *Yu Nu Jian* (Jade Woman Decoction).^{60,61}
- **Mouth and throat disorders**, such as stomatitis,^{62,63} gingivitis,⁶⁴ periodontitis,⁶⁵ periodontal disease,⁶⁶ halitosis,⁶⁷ infectious parotitis,⁶⁸ pharyngitis,⁶⁹ and other oral cavity disorders,⁷⁰ may be treated with *Dao Chi San* (Guide Out the Red Powder), *Qing Wei San* (Clear the Stomach Powder), *Xie Huang San* (Drain the Yellow Powder), and *Yu Nu Jian* (Jade Woman Decoction).
- **Male disorders** such as orchitis and prostatitis may be treated with *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver).^{71,72}
- **Female disorders** including mastitis, cervicitis, polycystic ovary syndrome, and pelvic inflammatory disease may be treated with *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver) and *Bai Tou Weng Tang* (Pulsatilla Decoction).^{73,74,75}
- **Urinary tract infection:** These formulas have a marked antibiotic activity, and have been used effectively to treat urinary tract infection. Three of these formulas are *Dao Chi San* (Guide Out the Red Powder),⁷⁶ *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver),⁷⁷ and *Bai Tou Weng Tang* (Pulsatilla Decoction).⁷⁸
- **Herpes:** *Dao Chi San* (Guide Out the Red Powder) and *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver) have marked antiviral effects, used successfully to treat herpes infections (oral herpes, genital herpes, and herpes zoster).^{79,80,81}

6. Deficiency-heat clearing formulas mainly treat fever, infection, and menopausal symptomology.

- **Fever:** Fever from various causes respond to these formulas; such as fever associated with cancer,^{82,83} post-surgical fever,⁸⁴ and fever following bone fractures.⁸⁵ Representative formulas include *Qing Hao Bie Jia Tang* (Artemisia Annua and Soft-Shelled Turtle Shell Decoction) and *Dang Gui Liu Huang Tang* (Tangkuei and Six-Yellow Decoction).
- **Infection:** Some formulas with antibiotic activity have been used to treat viral infections of the respiratory tract^{86,87} and pulmonary tuberculosis.^{88,89} Two exemplar formulas are *Qing Hao Bie Jia Tang* (Artemisia Annua and Soft-Shelled Turtle Shell Decoction) and *Qin Jiao Bie Jia San* (Gentiana Macrophylla and Soft-Shelled Turtle Shell Powder).
- **Menopause:** Deficiency-heat clearing formulas are effective for symptoms of menopause, such as *Dang Gui Liu Huang Tang* (Tangkuei and Six-Yellow Decoction).⁹⁰

Section 1

清气分热剂

— Qí (Energy) Level-Clearing Formulas

Bái Hǔ Tāng (White Tiger Decoction)

白虎湯

白虎汤

Pinyin Name: *Bai Hu Tang*

Literal Name: White Tiger Decoction

Alternate Names: *Pai Hu Tang*, Gypsum Decoction, Gypsum Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Shi Gao</i> (Gypsum Fibrosum), <i>fen sui</i> (pulverized)	48g [30g]
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	18g [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g [3g]
<i>Geng Mi</i> (Semen Oryzae)	0.6 cup [9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends to cook the ingredients in 10 cups [2,000 mL] of water until *Geng Mi* (Semen Oryzae) is fully cooked. Take 1 cup [200 mL] of the warm, strained decoction three times daily. Today, the decoction may be prepared using the doses suggested in brackets above.

CHINESE THERAPEUTIC ACTIONS

Clears heat and generates body fluids

CLINICAL MANIFESTATIONS

Yangming jing (channel) syndrome; excess heat in the *yangming qi* (energy) level: high fever, flushed face, irritability, thirst with a strong desire to drink, profuse sweating, and aversion to heat. The pulse is either surging, big and forceful; or the pulse is slippery and rapid.

CLINICAL APPLICATIONS

High fever, bacterial or viral infections, common cold, influenza, encephalitis, meningitis, pneumonia, lobar pneumonia, epidemic hemorrhagic fever, heat stroke, periodontitis, gingivitis, rheumatism, and diabetes mellitus.

EXPLANATION

Bai Hu Tang (White Tiger Decoction) treats generalized excess interior heat with damage to body fluids. Excess

heat may form as a result of the migration of an exterior pathogen into the interior. A typical case is wind-cold traveling to the interior and transforming into heat. Because the disease location is in the interior and the factor is heat, there will be high fever without chills. Irritability is the result of heat attacking the *shen* (spirit). Heat in the interior may consume body fluids, causing thirst with a strong desire to drink. The interior heat may also force out body fluids, causing profuse sweating.

It is not appropriate to induce sweating to dispel the pathogenic factors because the heat is in the interior instead of the exterior. Neither is it suitable to approach this condition with purgative herbs because the heat has not yet attacked the *zang fu* and giving rise to constipation. Heat-clearing herbs that are acrid and drying in nature should not be used because they may damage yin even further. The most appropriate treatment strategy is to clear heat and generate fluids with the use of sweet and cold herbs.

Shi Gao (Gypsum Fibrosum) is the chief herb because it is the most effective herb for clearing heat in *yangming jing* (channel) syndrome or *qi* (energy) level, which manifests as Lung and Stomach fire. *Shi Gao* (Gypsum Fibrosum) reduces fever and relieves irritability, while *Zhi Mu*

Bái Hǔ Tāng (White Tiger Decoction)

Bai Hu Tang (White Tiger Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Excess heat affecting yangming jing (channel) or qi (energy) level	<ul style="list-style-type: none">• High fever with aversion to heat: excess heat in the interior• Thirst with a strong desire to drink: heat consuming body fluids• Profuse sweating: heat forcing body fluids outward• Surging, big and forceful pulse: excess heat in the interior	<ul style="list-style-type: none">• Clears heat• Generates body fluids	<ul style="list-style-type: none">• <i>Shi Gao</i> (Gypsum Fibrosum) clears heat in yangming jing (channel) and qi (energy) level.• <i>Zhi Mu</i> (Rhizoma Anemarrhenae) clears interior excess heat, nourishes yin and moistens dryness.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and <i>Geng Mi</i> (Semen Oryzae) tonify and protect the Stomach, and prevent the extreme coldness of <i>Shi Gao</i> (Gypsum Fibrosum) from injuring the middle jiao.

(Rhizoma Anemarrhenae) helps to clear interior excess heat, as well as nourish yin and moisten dryness. Together, they relieve thirst and replenish fluids that are lost through perspiration. *Shi Gao* (Gypsum Fibrosum) is stronger in clearing heat, while *Zhi Mu* (Rhizoma Anemarrhenae) is more effective in moistening dryness. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and *Geng Mi* (Semen Oryzae) tonify and protect the Stomach, and prevent the extreme coldness of *Shi Gao* (Gypsum Fibrosum) from injuring the middle jiao.

MODIFICATIONS

- When there is excess heat in the body consuming yin and body fluids, add *Mai Dong* (Radix Ophiopogonis).
- For summer-heat invasion with thirst, add *San Wu Xiang Ru Yin* (Mosla Three Decoction).
- For gingivitis and toothache, add *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae) and *Bai Zhi* (Radix Angelicae Dahuricae).
- With constipation, thirst, and perspiration, add *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas).
- With belching and a feeling of oppression in the epigastric region, add *Ban Xia* (Rhizoma Pinelliae) and *Zhu Ru* (Caulis Bambusae in Taenia).
- When accompanied by alternating chills and fever, add *Chai Hu* (Radix Bupleuri) or *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).
- For qi (energy) level *wen bing* (warm disease) with wind-heat invasion, add *Yin Qiao San* (Honeysuckle and Forsythia Powder).
- With high fever, thirst, irritability, delirium, and muscle twitching, add *Shui Niu Jiao* (Cornu Bubali) and *Gou Teng* (Ramulus Uncariae cum Uncis).
- With thirst due to *xiao ke* (wasting and thirsting) syndrome with Stomach heat, add *Tian Hua Fen* (Radix Trichosanthis), *Lu Gen* (Rhizoma Phragmitis), and *Mai Dong* (Radix Ophiopogonis).

- With swollen and painful gums with thirst and dry stools, add *Xuan Shen* (Radix Scrophulariae) and *Niu Xi* (Radix Achyranthis Bidentatae).
- If there is headache, add *Bai Zhi* (Radix Angelicae Dahuricae) and *Gao Ben* (Rhizoma et Radix Ligustici).
- For measles or toxic lesions on the skin, add *Sheng Ma Ge Gen Tang* (Cimicifuga and Kudzu Decoction).

CAUTIONS / CONTRAINDICATIONS

- *Bai Hu Tang* treats heat affecting yangming jing (channel), not yangming fu (hollow organs). Yangming fu (hollow organs) is treated with *Da Cheng Qi Tang* (Major Order the Qi Decoction).
- This formula is contraindicated in the following four situations: 1) fever and absence of sweating from an unresolved exterior condition; 2) a pulse that is fine or deep; 3) fever from blood deficiency evident by a surging pulse that feels empty upon pressure; and 4) a “true-cold, false-heat” condition in which the interior yin rejects and repels yang to the exterior.

PHARMACOLOGICAL EFFECTS

1. **Antipyretic:** According to *in vitro* studies, *Bai Hu Tang* and its ingredients all have varying degrees of antipyretic effects in rabbits. Administration of the herbal treatment was associated with reduction of body temperature by 1.3°C with *Bai Hu Tang*, 1.2°C with both *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae), 0.7°C with *Zhi Mu* (Rhizoma Anemarrhenae), and 0.3°C with *Shi Gao* (Gypsum Fibrosum). It was also noted that while *Shi Gao* (Gypsum Fibrosum) had a faster onset, *Zhi Mu* (Rhizoma Anemarrhenae) had a longer overall duration.¹
2. **Immunostimulant:** Injection of *Bai Hu Tang* in mice was associated with an increased phagocytic effect for up to 6 hours.²

Bái Hǔ Tāng (White Tiger Decoction)

CLINICAL STUDIES AND RESEARCH

1. **High fever:** *Bai Hu Tang* is commonly used as the first choice for treatment of febrile conditions. In one report, 50 patients with high fever who were treated with decoction of the formula experienced a reduction of temperature to normal within two days.³ In another study, 69 patients with fever caused by viral infection were treated with 87% effectiveness using modified *Bai Hu Tang*, with the removal of *Geng Mi* (Semen Oryzae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and the addition of *Ge Gen* (Radix Puerariae Lobatae) and *Chai Hu* (Radix Bupleuri).⁴
2. **Epidemic hemorrhagic fever:** Administration of modified *Bai Hu Tang* for 6-15 days was effective in reducing the duration of illness in all 40 patients with epidemic hemorrhagic fever.⁵
3. **Pneumonia:** Twenty patients with lobar pneumonia were treated with an injection of *Bai Hu Tang*; 13 patients had complete recovery, 4 patients had moderate improvement, and 3 patients experienced no change.⁶
4. **Encephalitis B:** One study of 78 patients with encephalitis B reported satisfactory results using *Bai Hu Tang* plus *Ban Lan Gen* (Radix Isatidis), *Lian Qiao* (Fructus Forsythiae), and *Ge Gen* (Radix Puerariae Lobatae). The patients were treated for 5 days per course of treatment. Of 78 patients, the study reported complete recovery in 69 patients, improvement in 4 patients, and fatality in 5 patients.⁷ In another report, 31 patients with encephalitis B who were treated with a modification of the formula experienced a reduction of body temperature within the first day, resolution of most symptoms in the second day, and recovery in the third day.⁸
5. **Rheumatism:** Thirty-four patients with rheumatoid arthritis were treated with modified *Bai Hu Tang*. The rheumatism was characterized by redness, swelling, and pain, with duration of illness ranging from 2-36 days. Out of 34 patients, 8 had rheumatism in the upper extremities and 26 in the lower extremities. The treatment protocol was administration of the formula in decoction form one time daily. The study reported complete recovery in 23 patients, significant improvement in 7 patients, slight improvement in 2 patients, and no change in 2 patients.⁹ Another study reported that administration of *Bai Hu Tang* plus *Zhi Chuan Wu* (Radix Aconiti Praeparata), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha) was associated with complete relief in 22 of 28 patients with acute rheumatoid arthritis characterized by wind, dampness, and heat.¹⁰
6. **Diabetes mellitus:** Use of modified *Bai Hu Tang* in 268 patients was associated with recovery in 81 patients, significant effect in 58 patients, effectiveness in 110 patients, and no effect in 19 patients.¹¹ According to

another study, 21 patients with diabetes mellitus were treated daily with an 800-1,000 mL decoction of *Bai Hu Tang* daily for approximately 6 months with 95% effectiveness. The dose of *Shi Gao* (Gypsum Fibrosum) may be increased to 120g if there is severe thirst.¹²

Bái Hǔ Jiā Guì Zhī Tāng

(White Tiger plus Cinnamon Twig Decoction)

白虎加桂枝湯

白虎加桂枝汤

Pinyin Name: *Bai Hu Jia Gui Zhi Tang*

Literal Name: White Tiger plus Cinnamon Twig Decoction

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	18g [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g [3g]
<i>Shi Gao</i> (Gypsum Fibrosum)	48g [30g]
<i>Geng Mi</i> (Semen Oryzae)	0.2 cup [6g]
<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g [5-9g]

The source text states to grind the ingredients into a coarse powder, and cook 15g of the powder in 1.5 large bowls of water until 80% of the liquid remains. Take the strained decoction while warm. Once sweating is induced, the condition will be resolved. Today, this formula may be prepared as a decoction using the doses suggested in brackets.

Bai Hu Jia Gui Zhi Tang (White Tiger plus Cinnamon Twig Decoction) is composed of *Bai Hu Tang* plus *Gui Zhi* (Ramulus Cinnamomi). With the addition of *Gui Zhi* (Ramulus Cinnamomi), this formula has the added functions to warm the channels and collaterals, and harmonize *ying* (nutritive) and *wei* (defensive) levels. It is often given to patients with *bi zheng* (painful obstruction syndrome) caused by wind, dampness, and heat. Chief complaints are joint swelling, burning pain, and/or muscle pain. Secondary symptoms include fever, loud breathing, irritability, thirst, and a wiry, rapid pulse. This formula can also be used for warm malarial disorders caused by heat manifesting in fever, no chills, joint pain, nausea, and vomiting.

Bái Hǔ Jiā Cāng Zhú Tāng

(White Tiger plus Atractylodes Decoction)

白虎加蒼朮湯

白虎加苍朮汤

Bái Hǔ Tāng (White Tiger Decoction)

Pinyin Name: *Bai Hu Jia Cang Zhu Tang*

Literal Name: White Tiger plus Atractylodes Decoction

Original Source: *Lei Zheng Huo Ren Shu* (Book to Safeguard Life Arranged According to Pattern) by Zhu Gong in 1108

<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	18g [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g [3g]
<i>Shi Gao</i> (Gypsum Fibrosum)	48g [30g]
<i>Geng Mi</i> (Semen Oryzae)	9g [9g]
<i>Cang Zhu</i> (Rhizoma Atractylodis)	9g [9g]

The source text recommends to grind the ingredients into a coarse powder, and cook 15g of the powder in 1.5 large bowls of water until 80-90% of the liquid remains. Discard the herb residue, and take 60% of the warm, strained decoction per dose. Today, this formula may be prepared as a decoction using the doses suggested in brackets.

Bai Hu Jia Cang Zhu Tang (White Tiger plus Atractylodes Decoction) is composed of *Bai Hu Tang* plus *Cang Zhu* (Rhizoma Atractylodis). With the addition of *Cang Zhu* (Rhizoma Atractylodis), this formula can treat *yangming jing* (channel) syndrome accompanied by interior dampness. In addition to all the symptoms and signs found in *yangming jing* (channel) syndrome, other chief complaints include chest distention, profuse perspiration, warm sensations in the body, dyspnea, irritability, and a red tongue with a white, greasy tongue coating. It is used for *bi zheng* (painful obstruction syndrome) caused by wind, dampness, and heat.

AUTHORS' COMMENTS

Bai Hu Tang treats heat in *yangming jing* (channel) syndrome according to *Shang Han Lun* (Discussion of Cold-Induced Disorders), and treats heat in *yangming qi* (energy) level according to *wen bing* (warm disease)

theories. Although the names of the syndromes are different, they refer to the same condition: excess interior heat with damage to body fluids.

Bai Hu Tang is the representative formula for treating excess heat in *yangming jing* (channel) syndrome and *yangming qi* (energy) level, two conditions characterized by the “four bigs”: “big fever” (high fever), “big sweating” (profuse sweating), “big thirst” (extreme thirst), and “big pulse” (surging, big, and forceful pulse). Clinically, this formula can be applied if the patient shows a surging, big, and forceful pulse, high fever, profuse perspiration, extreme thirst, and irritability.

According to Dr. Chang Wei-Yen, *Bai Hu Tang*, *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), and *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill) can be combined together to treat heat in the entire body, as these three formulas clear heat from the upper, middle, and lower *jiaos*, respectively.

Bái Hǔ Jiā Rén Shēn Tāng (White Tiger plus Ginseng Decoction)

白虎加人參湯 白虎加人參湯

Pinyin Name: *Bai Hu Jia Ren Shen Tang*
Literal Name: White Tiger plus Ginseng Decoction
Alternate Names: *Pai Hu Chia Jen Shen Tang*, Ginseng plus White Tiger Decoction, Ginseng and Gypsum Combination
Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Shi Gao</i> (Gypsum Fibrosum), <i>fen sui</i> (pulverized)	48g [30g]
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	18g [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g [3g]
<i>Geng Mi</i> (Semen Oryzae)	0.6 cup [9g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	9g [10g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 10 cups [2,000 mL] of water until *Geng Mi* (Semen Oryzae) is fully cooked. Take 1 cup [200 mL] of the warm, strained decoction three times daily. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat
2. Tonifies qi and generates body fluids

CLINICAL MANIFESTATIONS

Yangming jing (channel) syndrome or excess heat in the *yangming qi* (energy) level with qi and body fluid deficiencies: high fever, flushed face, irritability, a dry mouth, thirst with a strong desire to drink, profuse sweating, aversion to cold in the upper back, and a big, forceless pulse.

CLINICAL APPLICATIONS

Bacterial or viral infections, influenza, encephalitis, meningitis, lobar pneumonia, febrile disorders, heat stroke, periodontitis, gingivitis, diabetes mellitus, and dry mouth and throat.

EXPLANATION

Bai Hu Jia Ren Shen Tang (White Tiger plus Ginseng Decoction) is composed of *Bai Hu Tang* (White Tiger Decoction) plus *Ren Shen* (Radix et Rhizoma Ginseng). It treats excess interior heat in *yangming jing* (channel) syndrome and *qi* (energy) level. Because heat may consume *qi* and dry up body fluids, corresponding symptoms such as thirst and profuse sweating will be present. Thus, in addition to using *Bai Hu Tang* (White Tiger Decoction) to clear heat and generate fluids, *Ren Shen* (Radix et Rhizoma Ginseng) is added to provide a stronger action to tonify *qi* and replenish body fluids.

MODIFICATIONS

- With fidgeting, irritability, and thirst, add *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- For thirst during the summer, add *Xiang Fu* (Rhizoma Cyperi) and *Sha Shen* (Radix Glehniae seu Adenophorae).

PHARMACOLOGICAL EFFECTS

1. **Antidiabetic:** One study in mice confirmed that administration of *Bai Hu Jia Ren Shen Tang* was effective in treating polydipsia accompanied by diabetes mellitus. The herbs were given as food mixture for a total of 4 weeks.¹
2. **Hypoglycemic:** Administration of *Bai Hu Jia Ren Shen Tang* was associated with marked effectiveness in reducing

Bai Hu Jia Ren Shen Tang (White Tiger plus Ginseng Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Yangming</i> heat with <i>qi</i> and fluids deficiencies	<ul style="list-style-type: none"> • High fever, profuse sweating, and extreme thirst: <i>yangming</i> syndrome • Thirst and a forceless pulse: excess heat consuming <i>qi</i> and body fluids 	<ul style="list-style-type: none"> • Clears heat • Tonifies <i>qi</i> and generates body fluids 	<ul style="list-style-type: none"> • <i>Bai Hu Tang</i> (White Tiger Decoction) clears excess heat to treat <i>yangming</i> syndrome. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng) tonifies <i>qi</i> and replenishes body fluids.

Bái Hǔ Jiā Rén Shēn Tāng (White Tiger plus Ginseng Decoction)

plasma glucose levels in both rabbits and mice.² Another study confirmed that both the individual ingredients and the formula had marked hypoglycemic effects in genetically obese diabetic mice.³

3. **Antipruritic:** Oral administration of *Bai Hu Jia Ren Shen Tang* (200 mg/kg) was associated with a marked effect to treat atopic dermatitis in mice. Therapeutic improvements included significantly reduced scratching frequency, and a decrease in skin temperature by 1.97°C. The study stated that this formula had an inhibitory effect on itching, and may be a useful antipruritic drug for atopic dermatitis.⁴

CLINICAL STUDIES AND RESEARCH

1. **Diabetes mellitus:** Use of *Bai Hu Jia Ren Shen Tang* lowered glucose levels in the blood and urine in patients with diabetes mellitus characterized by Stomach heat. This formula was effective in 56 of 64 patients (87.5% effectiveness).⁵
2. **Dry mouth and throat:** Administration of *Bai Hu Jia Ren Shen Tang* was effective in 12 of 15 patients in relieving dry mouth and throat.⁶ Another study reported 80% effectiveness using *Bai Hu Jia Ren Shen Tang* to treat 30 patients with thirst caused by the use of antidepressant

drugs.⁷ *Bai Hu Jia Ren Shen Tang* facilitated salivary secretion to relieve dry mouth and throat by stimulating efferent activity of the autonomic nerve fibers innervating the sublingual glands in a dose-dependent manner.⁸

Zhú Yè Shí Gāo Tāng (Bamboo Leaves and Gypsum Decoction)

竹葉石膏湯

竹叶石膏汤

Pinyin Name: Zhu Ye Shi Gao Tang

Literal Name: Bamboo Leaves and Gypsum Decoction

Alternate Names: *Chu Yeh Shih Kao Tang*, Bamboo Leaves and Gypsum Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Zhu Ye</i> (Herba Phyllostachys)	2 handfuls [15g]
<i>Shi Gao</i> (Gypsum Fibrosum)	48g [30g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	6g [5g]
<i>Mai Dong</i> (Radix Ophiopogonis)	1 cup [15g]
<i>Ban Xia</i> (Rhizoma Pinelliae), xi (washed)	0.5 cup [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g [3g]
<i>Geng Mi</i> (Semen Oryzae)	0.5 cup [15g]

Note: *Zhu Ye* (Herba Phyllostachys) and *Dan Zhu Ye* (Herba Lophatheri) have similar pinyin names and functions,

and are sometimes used interchangeably. According to the source text, *Zhu Ye* (Herba Phyllostachys) is used in

Zhú Yè Shí Gāo Tāng (Bamboo Leaves and Gypsum Decoction)

Zhu Ye Shi Gao Tang to clear heat and relieve irritability. Today, because *Zhu Ye* (Herba Phyllostachys) is not readily available, it is generally replaced with *Dan Zhu Ye* (Herba Lophatheri). In comparison, *Zhu Ye* (Herba Phyllostachys) is more effective in clearing Heart and Stomach heat, while *Dan Zhu Ye* (Herba Lophatheri) is better at clearing heat and promoting normal urination.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook all of the ingredients except *Geng Mi* (Semen Oryzae), in 10 cups [2,000 mL] of water until 6 cups [1,200 mL] of liquid remain. Discard the residue, add *Geng Mi* (Semen Oryzae) to the strained decoction and cook again until *Geng Mi* (Semen Oryzae) is fully cooked. Take 1 cup [200 mL] of the warm, strained decoction three times daily. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and generates body fluids
2. Tonifies qi and harmonizes the Stomach

CLINICAL MANIFESTATIONS

Lingering or residual heat resulting from *shang han* (cold damage), *wen bing* (warm disease) or summer-heat with both qi and yin damage: fever, profuse perspiration, a stifling sensation and distention in the chest or epigastrium, nausea, a dry mouth, thirst with a desire to drink, irritability, insomnia, a red tongue body with scanty coating, and a deficient, rapid pulse.

CLINICAL APPLICATIONS

Fever, common cold, influenza, pneumonia, measles, toothache, stomatitis, diabetes mellitus, gingivitis, summer-heat stroke, bronchitis, and bronchial asthma.

EXPLANATION

Zhu Ye Shi Gao Tang (Bamboo Leaves and Gypsum Decoction) is indicated in the late stage of *shang han* (cold damage), *wen bing* (warm disease), or febrile diseases in which the heat has diminished substantially, but the yin, body fluids, and qi are damaged. Irritability, a stifling sensation and distention in the chest or epigastrium, and fever that cannot be reduced with perspiration are indications that the heat has not been completely eliminated. Thirst, a dry mouth and lips, and a scanty tongue coating reflect consumption of yin and body fluids by heat.

This condition of lingering heat with underlying deficiencies must be treated carefully. Bitter and cold herbs that clear heat will not help generate body fluids and may further damage qi and yin. However, simply tonifying qi and yin will trap the residual heat inside. Therefore, the optimal treatment strategy is to sedate and tonify at the same time.

Zhu Ye (Herba Phyllostachys) and *Shi Gao* (Gypsum Fibrosum) clear interior heat to relieve fever and irritability. *Ren Shen* (Radix et Rhizoma Ginseng) and *Mai Dong* (Radix Ophiopogonis) tonify both qi and yin to promote generation of body fluids. *Ban Xia* (Rhizoma Pinelliae) corrects the reversed flow of Stomach qi to relieve nausea and vomiting. It also balances the tonic and cloying effects of *Ren Shen* (Radix et Rhizoma Ginseng) and *Mai Dong* (Radix Ophiopogonis). *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and *Geng Mi* (Semen Oryzae) nourish the Stomach and harmonize the middle *jiao*.

Zhu Ye Shi Gao Tang (Bamboo Leaves and Gypsum Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Lingering heat with qi and yin damage	<ul style="list-style-type: none"> • Irritability and insomnia: heat disturbing <i>shen</i> (spirit) • Fever, profuse perspiration: lingering heat not yet cleared • Dry mouth and thirst with a desire to drink: heat consuming body fluids • Chest or epigastric stuffiness and distention: heat injuring Lung and Stomach qi • Red tongue body with a scanty coating: heat damaging qi and body fluids • Deficient, rapid pulse: deficiency and excess conditions combined 	<ul style="list-style-type: none"> • Clears heat and generates body fluids • Tonifies qi and harmonizes the Stomach 	<ul style="list-style-type: none"> • <i>Zhu Ye</i> (Herba Phyllostachys) and <i>Shi Gao</i> (Gypsum Fibrosum) clear interior heat. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Mai Dong</i> (Radix Ophiopogonis) tonify qi and yin. • <i>Ban Xia</i> (Rhizoma Pinelliae) corrects the reversed flow of Stomach qi. • <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and <i>Geng Mi</i> (Semen Oryzae) nourish the Stomach and harmonize the middle <i>jiao</i>.

Zhú Yè Shí Gāo Tāng (Bamboo Leaves and Gypsum Decoction)

MODIFICATIONS

- With cough and dyspnea, add *Ku Xing Ren* (Semen Armeniacae Amarum).
- With cough and wheezing in pneumonia or bronchitis, add *Ma Huang* (Herba Ephedrae), *Ku Xing Ren* (Semen Armeniacae Amarum), *Huang Qin* (Radix Scutellariae), and *Yu Xing Cao* (Herba Houttuyniae).
- For deficiency condition with thirst, add *Huang Qi* (Radix Astragali) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- For thirst during recovery stage of chronic illness, add *Bai Shao* (Radix Paeoniae Alba) and *Chai Hu* (Radix Bupleuri).
- With profuse sputum, add *Bei Mu* (Bulbus Fritillariae) and *Ju Hong* (Exocarpium Citri Reticulatae).
- With lingering heat after an exterior condition, add *Sheng Ma Ge Gen Tang* (Cimicifuga and Kudzu Decoction).
- With lingering heat in women, add *Si Wu Tang* (Four-Substance Decoction).
- When there is Stomach yin deficiency and flaring of Stomach fire manifesting in ulcerations in the mouth and a red tongue body, add *Shi Hu* (Caulis Dendrobii) and *Tian Hua Fen* (Radix Trichosanthis); or *Yu Nu Jian* (Jade Woman Decoction).
- With excess hunger caused by Stomach fire, add *Tian Hua Fen* (Radix Trichosanthis) and *Zhi Mu* (Rhizoma Anemarrhenae).

CAUTIONS / CONTRAINDICATIONS

Zhu Ye Shi Gao Tang is contraindicated in acute conditions of excess heat without underlying deficiencies. It is also contraindicated in individuals with fever, a stifling sensation in the chest, dry heaves, and a yellow, greasy tongue coating caused by damp accumulation.

PHARMACOLOGICAL EFFECTS

Hypoglycemic: Administration of a water extract of *Zhu Ye Shi Gao Tang* at 500 mg/kg via intraperitoneal injection was associated with reduction of blood glucose level in mice. However, the hypoglycemic effect was significant only during the fasting state, and not during the normal state.¹

CLINICAL STUDIES AND RESEARCH

1. **Fever:** Forty-seven cases of fever (37.5-39.5°C / 99.5-103.1°F) with duration of illness from one week to three months and resistant to antibiotic therapy were treated with *Zhu Ye Shi Gao Tang*. The treatment protocol was daily administration of the formula as a decoction in three to five equally-divided doses for 1-5 days. Out of 47 cases, the study reported temperature of less than 37°C / 98.6°F in 40 cases.²

2. **Toothache:** In one report, 96 patients with toothache were divided into two groups and treated with modified *Zhu Ye Shi Gao Tang*. Group A of 60 patients received treatment within 3 days from the onset of illness, while Group B of 36 patients received treatment 4-6 days after the onset. The herbs were cooked twice to yield 2 batches of decoction, which were subsequently mixed together and taken before each meal. The study reported complete recovery in all 60 patients in group A, and only 30 out of 36 patients in group B. Complete recovery was defined as resolution of the symptoms, complete reduction of redness, swelling and pain, and normal chewing and eating without pain.³

AUTHORS' COMMENTS

Zhu Ye Shi Gao Tang is derived from *Bai Hu Tang* (White Tiger Decoction), with the addition of *Ren Shen* (Radix et Rhizoma Ginseng) to tonify qi, *Mai Dong* (Radix Ophiopogonis) to nourish yin, *Ban Xia* (Rhizoma Pinelliae) to harmonize the Stomach, and the replacement of *Zhi Mu* (Rhizoma Anemarrhenae) with *Zhu Ye* (Herba Phyllostachys) to clear heat and relieve irritability.

Bai Hu Tang (White Tiger Decoction) and *Zhu Ye Shi Gao Tang* both clear heat and generate body fluids to treat heat in the qi (energy) level. Both formulas contain *Shi Gao* (Gypsum Fibrosum), *Geng Mi* (Semen Oryzae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). The differences are as follows:

- *Bai Hu Tang* is stronger for clearing heat as it has *Zhi Mu* (Rhizoma Anemarrhenae) as the deputy herb to enhance the heat-clearing effect of *Shi Gao* (Gypsum Fibrosum). It is best for excess heat in the qi (energy) level manifesting in symptoms of high fever, irritability, thirst, profuse perspiration, and a surging, big and forceful pulse. It treats excess heat and generate body fluids at the same time.
- *Zhu Ye Shi Gao Tang* also contains *Ren Shen* (Radix et Rhizoma Ginseng), *Mai Dong* (Radix Ophiopogonis), *Zhu Ye* (Herba Phyllostachys), and *Ban Xia* (Rhizoma Pinelliae), which make the formula weaker in clearing heat but stronger in tonifying qi and nourishing yin. It is best for the post-febrile stage of lingering heat with qi and yin damage. Symptoms include heat sensation, perspiration, thirst with a desire to drink, shortness of breath, red, dry tongue, and a deficient, rapid pulse.

Bai Hu Jia Ren Shen Tang (White Tiger plus Ginseng Decoction) and *Zhu Ye Shi Gao Tang* both treat individuals with heat and deficiency. The differences are as follows:

- *Bai Hu Jia Ren Shen Tang* is for excess heat in the *yangming jing* (channel) syndrome or *yangming qi* (energy) level with qi and fluid deficiencies.

Zhú Yè Shí Gāo Tāng (Bamboo Leaves and Gypsum Decoction)

- *Zhu Ye Shi Gao Tang* is for lingering heat from *shang han* (cold damage), *wen bing* (warm disease) or summer-heat, with injuries to both qi and yin.⁴

According to Dr. Richard Tan, *Zhu Ye Shi Gao Tang* can be used with *Zi Yin Jiang Huo Tang* (Nourish Yin and Descend the Fire Decoction) and *Bai Shao* (Radix Paeoniae Alba) to effectively treat hot flashes and other related heat symptoms associated with menopause.

<i>Huang Lian</i> (Rhizoma Coptidis)	4.5g
<i>Zhu Ye</i> (Herba Phyllostachys)	3g [5g]
<i>Dan Shen</i> (Radix et Rhizoma Salviae Miltiorrhizae)	6g [9g]

Note: *Xi Jiao* (Cornu Rhinoceri) is derived from an endangered animal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions.

Zhu Ye (Herba Phyllostachys) and *Dan Zhu Ye* (Herba Lophatheri) have similar pinyin names and functions, and are sometimes used interchangeably. According to the source text, *Zhu Ye* (Herba Phyllostachys) is used in *Qing Ying Tang* to clear Heart heat. Today, because *Zhu Ye* (Herba Phyllostachys) is not readily available, it is generally replaced with *Dan Zhu Ye* (Herba Lophatheri). In comparison, *Zhu Ye* (Herba Phyllostachys) is more effective in clearing Heart and Stomach heat, while *Dan Zhu Ye* (Herba Lophatheri) is better in clearing heat and promoting normal urination.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients, except *Xi Jiao* (Cornu Rhinoceri), in 8 cups of water and reduce it down to 3 cups. Take 1 cup of the decoction three times daily with powdered *Xi Jiao* (Cornu Rhinoceri). Today, 2g of *Xi Jiao* (Cornu Rhinoceri) is generally replaced with 30g of *Shui Niu Jiao* (Cornu Bubali).

CHINESE THERAPEUTIC ACTIONS

1. Clears heat from the *ying* (nutritive) level
2. Nourishes yin and invigorates blood circulation

CLINICAL MANIFESTATIONS

Heat in the *ying* (nutritive) level: fever that worsens at night, irritability, occasional delirious speech, with or without thirst, insomnia, eyes that are open or closed for a prolonged period of time, subcutaneous maculopapular eruption, a dark, red and dry tongue, and a rapid pulse.

Qīng Yīng Tāng (Clear the Nutritive Level Decoction)

Qing Ying Tang (Clear the Nutritive Level Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Heat in the <i>ying</i> (nutritive) level	<ul style="list-style-type: none"> • Fever that worsens at night: interior heat damaging yin and <i>ying</i> (nutrition) • Irritability, delirious speech and insomnia: heat attacking the <i>ying</i> level and disturbing <i>shen</i> (spirit) • Thirst: heat consuming body fluids • Subcutaneous maculopapular eruption: heat in the <i>ying</i> level • A dark, red and dry tongue: interior heat damaging yin • Rapid pulse: heat condition 	<ul style="list-style-type: none"> • Clears heat from the <i>ying</i> level • Nourishes yin 	<ul style="list-style-type: none"> • <i>Xi Jiao</i> (Cornu Rhinoceri) clears heat in the <i>ying</i> level. • <i>Di Huang</i> (Radix Rehmanniae), <i>Mai Dong</i> (Radix Ophiopogonis) and <i>Xuan Shen</i> (Radix Scrophulariae) clear deficiency heat and nourish yin. • <i>Jin Yin Hua</i> (Flos Lonicerae Japonicae), <i>Lian Qiao</i> (Fructus Forsythiae), and <i>Huang Lian</i> (Rhizoma Coptidis) clear heat and eliminate toxins. • <i>Zhu Ye</i> (Herba Phyllostachys) clears the Heart and calms the <i>shen</i> to relieve irritability. • <i>Dan Shen</i> (Radix et Rhizoma Salviae Miltiorrhizae) invigorates blood circulation.

CLINICAL APPLICATIONS

Septicemia, Harada's syndrome, uveitis, optic neuritis, psoriasis, dermatitis, and purpura.

EXPLANATION

Qing Ying Tang (Clear the Nutritive Level Decoction) is the representative formula for treating heat in the *ying* (nutritive) level, the third stage of the *Wei Qi Ying Xue Bian Zheng* (Defensive, Qi, Nutritive, Blood Differentiation). In the *ying* level, heat damages yin and causes *shen* (spirit) disturbance. Hence, irritability and delirium are two key clinical manifestations of this syndrome. When yin is damaged, it gives rise to fever that worsens at night because yin cannot contain yang. Patients may have thirst or no thirst, depending on whether the heat has consumed body fluids or not. Signs of emerging subcutaneous maculopapular eruption suggest that the heat is in the *ying* level but has not yet progressed to the *xue* (blood) level. If the heat were to progress to the *xue* level, it will congeal the blood and create blood stagnation, giving rise to large patches of clearly visible purplish-red maculae. A dark, red and dry tongue and a rapid pulse suggest heat in the *ying* level damaging yin.

To treat this syndrome, first clear heat from the *ying* (nutritive) level. Second, nourish the damaged yin. Finally, activate blood circulation to dispel heat stagnation and prevent the heat from progressing further into the *xue* (blood) level.

Xi Jiao (Cornu Rhinoceri), the chief herb, clears heat in the *ying* (nutritive) level and cools blood in the *xue* (blood) level. *Di Huang* (Radix Rehmanniae), *Mai Dong* (Radix Ophiopogonis) and *Xuan Shen* (Radix Scrophulariae) clear deficiency heat and nourish yin and body fluids. *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), and *Huang Lian* (Rhizoma Coptidis) clear heat and eliminate toxins. They assist the formula to bring heat and toxins from deeper aspects of the body (*ying* and *xue* levels) to the more superficial aspects (*qi* (energy) level) so that these toxins may be effectively cleared and eliminated. *Zhu Ye* (Herba Phyllostachys) clears the Heart and calms the *shen* (spirit) to relieve irritability. *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) invigorates blood circulation to remove blood stasis, and also assists the rest of the herbs in clearing heat.

MODIFICATIONS

- When there is a big, forceful pulse in the *chi* position and a dry tongue, remove *Huang Lian* (Rhizoma Coptidis).
- If accompanied by severe incoherence and delirious speech, add *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone).
- With heat in both the *qi* (energy) and *ying* (nutritive) levels, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).

CAUTIONS / CONTRAINDICATIONS

Qing Ying Tang is contraindicated in cases of damp accumulation marked by a white, greasy tongue coating. Damp conditions cannot be treated with moistening and nourishing herbs.

Qīng Yīng Tāng (Clear the Nutritive Level Decoction)

PHARMACOLOGICAL EFFECTS

1. **Antipyretic:** In rabbits with artificially-induced fever, intraperitoneal injection of *Qing Ying Tang* at 5 mL/kg was associated with marked reduction of body temperature.¹
2. **Antibiotic:** This formula exhibited an *in vitro* inhibitory effect against *Staphylococcus aureus*, *Staphylococcus albus*, *alpha-hemolytic streptococcus*, *beta-hemolytic streptococcus*, *Salmonella typhi*, *Bacillus paratyphosus*, and *Bacillus proteus*.²

CLINICAL STUDIES AND RESEARCH

1. **Septicemia:** Ten patients with septicemia were treated with modified *Qing Ying Tang* with good results. The study reported complete reduction of temperature in all cases after an average of 12.6 days. All patients were followed up one year after the completion of the treatment with no recurrence.³
2. **Harada's syndrome:** Seven patients with Harada's syndrome of uveitis were treated with concurrent Western and herbal treatment. Herbal treatment included modification of *Qing Ying Tang*. Following 3 months of treatment, the study reported improvement in 6 out of 7 patients.⁴
3. **Psoriasis:** Eighty-seven patients with psoriasis were treated with both oral and topical application of herbs with marked improvement reported in 90.8% of the patients. The herbal formula used orally was modified *Qing Ying Tang*, and the topical herbal preparation contained *Bi Ma Zi* (Semen Ricini) 50g, *Ku Xing Ren* (Semen Armeniacae Amarum) 50g, *Qing Fen* (Calomelas) 50g, *Duan Shi Gao* (Gypsum Fibrosum Praeparatum) 50g, *Bai Fan* (Alumen) 50g, and *Bing Pian* (Borneolum Syntheticum) 20g. The herbs were ground into a fine powder and mixed with petroleum jelly to make a paste. Clinical improvements after oral and topical treatments

included relief of itching, flaking, and restoration of normal skin color.⁵ Another study of 5 psoriasis patients reported good results using the following formula in decoction form and administered daily: *Di Huang* (Radix Rehmanniae) 30g, *Huang Lian* (Rhizoma Coptidis) 20g, *Jin Yin Hua* (Flos Lonicerae Japonicae) 20g, *Lian Qiao* (Fructus Forsythiae) 20g, *Da Huang* (Radix et Rhizoma Rhei) 5g, *Zhu Ye* (Herba Phyllostachys) 15g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 15g, *Xuan Shen* (Radix Scrophulariae) 15g, *Mu Tong* (Caulis Akebiae) 15g, *Shui Niu Jiao* (Cornu Bubali) 15g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 15g.⁶

4. **Optic neuritis:** One study reported good results using integrated treatments for 5 patients with acute optic neuritis. The herbal formula contained *Shui Niu Jiao* (Cornu Bubali), *Mu Dan Pi* (Cortex Moutan), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Xuan Shen* (Radix Scrophulariae), *Huang Lian* (Rhizoma Coptidis), *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), *Zhi Mu* (Rhizoma Anemarrhenae), *Bai Shao* (Radix Paeoniae Alba), *Jue Ming Zi* (Semen Cassiae), *Mai Dong* (Radix Ophiopogonis), *Dan Zhu Ye* (Herba Lophatheri), and others as needed. Dexamethasone 5mg was also given.⁷

Xi Jiǎo Dì Huáng Tāng (Rhinoceros Horn and Rehmannia Decoction)

犀角地黄湯 犀角地黄湯

Pinyin Name: *Xi Jiao Di Huang Tang*

Literal Name: Rhinoceros Horn and Rehmannia Decoction

Original Source: *Bei Ji Qian Jin Yao Fang* (Thousands of Golden Prescriptions for Emergencies)

COMPOSITION

<i>Xi Jiao</i> (Cornu Rhinoceri)	3g [1.5-3g]
<i>Di Huang</i> (Radix Rehmanniae)	24g [30g]
<i>Chi Shao</i> (Radix Paeoniae Rubra)	9g [12g]
<i>Mu Dan Pi</i> (Cortex Moutan)	6g [9g]

Note: *Xi Jiao* (Cornu Rhinoceri) is derived from an endangered animal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions.

The source text lists *Shao Yao* (Radix Paeoniae) as one of the ingredients, without specifying whether it is *Bai Shao* (Radix Paeoniae Alba) or *Chi Shao* (Radix Paeoniae Rubra). Today, most practitioners prefer to use *Chi Shao* (Radix Paeoniae Rubra) for its functions to clear heat and cool the blood.

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients coarsely. Cook the powdered herbs with 9 cups [1,800 mL] of water and reduce it to 3 cups [600 mL]. Take 1 cup [200 mL] of the decoction three times daily. Today, it is normally prepared as a decoction with the doses suggested in brackets. Moreover, the 1.5-3g of *Xi Jiao* (Cornu Rhinoceri) is generally replaced by 30g of *Shui Niu Jiao* (Cornu Bubali).

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and eliminates toxins
2. Cools the blood and disperses blood stasis

CLINICAL MANIFESTATIONS

1. Heat in the *xue* (blood) level forcing blood out of the vessels: hematemesis, epistaxis, hematuria, hematochezia, etc.
2. Blood stasis: desire to rinse the mouth with water without swallowing it, forgetfulness, mania, irritability, chest pain, a feeling of abdominal fullness, and black, tarry stools.
3. Heat disturbing the Heart and *ying* (nutritive) level: mania, delirium, purplish-red or black maculae on the skin, and a red, prickly tongue.

CLINICAL APPLICATIONS

Hemorrhagic fever, encephalitis, meningitis, purulent meningitis, thrombocytopenic purpura, allergic purpura, leukocytic leukemia, septicemia, hepatitis, esophageal hemorrhage, upper gastrointestinal bleeding, and epistaxis.

EXPLANATION

Xi Jiao Di Huang Tang (Rhinoceros Horn and Rehmannia Decoction) clears interior heat, cools the blood, and disperses blood stasis to treat heat in the *xue* (blood) level. Heat in the blood may force the blood to move recklessly, often out of the vessels. When the yang channels are injured, bleeding occurs outside of the vessels and manifests upward and outward as hematemesis or epistaxis. When the yin channels are injured, blood moves downward, manifesting as hematuria and hematochezia. When the superficial channels are injured, there will be purpura or maculae on the skin.

The patient may desire to rinse their mouth with water because of heat, but will prefer not to swallow the water because heat has not damaged body fluids. If blood stasis invades the Heart, then chest pain, irritability, mania, or delirium may result. In addition, abdominal fullness and excretion of black, tarry stools may occur if blood stasis accumulates in the abdomen or the Intestines. If the tissues are severely attacked by heat, dark purplish maculae may appear on the skin.

Xi Jiao (Cornu Rhinoceri) enters directly into the *xue* (blood) level and clears heat in the Heart, cools the blood, and eliminates toxins. Combined, *Xi Jiao* (Cornu Rhinoceri) and *Di Huang* (Radix Rehmanniae) cool the blood and stop bleeding, as well as nourish yin and clear heat. *Chi Shao* (Radix Paeoniae Rubra) and *Mu Dan Pi* (Cortex Moutan) clear heat, cool the blood, and disperse blood stasis. This formula, therefore, cools the blood without causing blood stagnation.

Xi Jiǎo Dì Huáng Tāng (Rhinoceros Horn and Rehmannia Decoction)

Xi Jiao Di Huang Tang (Rhinoceros Horn and Rehmannia Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Heat in the xue (blood) level	<ul style="list-style-type: none">• Bleeding: heat in the xue level forcing blood outward• Mania, delirium and irritability: heat disturbing the Heart and shen (spirit)• Chest pain and a feeling of abdominal fullness: blood stasis• Red, prickly tongue: heat damaging yin and blood	<ul style="list-style-type: none">• Clears heat and eliminates toxins• Cools the blood and disperses blood stasis	<ul style="list-style-type: none">• Xi Jiao (Cornu Rhinoceri) clears heat, cools the blood, and eliminates toxins from the ying (nutritive) and xue (blood) levels.• Di Huang (Radix Rehmanniae) cools the blood, stops bleeding, nourishes yin, and clears heat.• Chi Shao (Radix Paeoniae Rubra) and Mu Dan Pi (Cortex Moutan) cool the blood and disperse blood stasis.

MODIFICATIONS

- With more epistaxis or vomiting of blood, add Bai Mao Gen (Rhizoma Imperatae) and Ce Bai Ye (Cacumen Platycladi).
- With more hematochezia, add Huai Hua (Flos Sophorae) and Di Yu (Radix Sanguisorbae).
- With more hematuria, add Bai Mao Gen (Rhizoma Imperatae) and Xiao Ji (Herba Cirsii).
- When there is pent-up emotion or rage, add Chai Hu (Radix Bupleuri), Huang Qin (Radix Scutellariae), and Zhi Zi (Fructus Gardeniae).
- With delirium and mania with heat and blood stasis, add Da Huang (Radix et Rhizoma Rhei) and Huang Qin (Radix Scutellariae); or Dang Gui Long Hui Wan (Tangkuei, Gentiana, and Aloe Pill).

CAUTIONS / CONTRAINDICATIONS

Xi Jiao Di Huang Tang should be used to treat only bleeding caused by heat in the xue (blood) level leading to reckless movement of blood and bleeding from various parts of the body. It should not be used to treat bleeding caused by other reasons, such as constitutional deficiencies or external injuries.

PHARMACOLOGICAL EFFECTS

Antipyretic: In rabbits with artificially-induced fever, oral ingestion of Xi Jiao Di Huang Tang was effective in reducing the body temperature. The antipyretic effect has a slow onset of action (after 4 hours) but prolonged duration (up to 6 hours). The researchers characterized the antipyretic effect of Xi Jiao Di Huang Tang to be comparable to 0.2 mg/kg of aspirin.¹

CLINICAL STUDIES AND RESEARCH

1. **Upper gastrointestinal bleeding:** In one report, 39 patients with upper gastrointestinal bleeding diagnosed with Stomach heat were treated with either Xie Xin Tang

(Drain the Epigastrium Decoction) or modified Xi Jiao Di Huang Tang with 100% effectiveness. The report stated that most patients stopped bleeding within 24 hours after taking the herbs.²

2. **Epistaxis:** Sixty-one patients with chronic epistaxis were treated with Xi Jiao Di Huang Tang with good results. The bleeding stopped in 28 patients after treatment, with no recurrence within 6 months of follow-up. The bleeding was reduced significantly in 25 patients, with much less recurrence and severity. Slight improvement was reported in 7 other cases, and no benefit in 1 case. The overall rate of effectiveness was 98.49%.³
3. **Thrombocytopenic purpura:** In one clinical study, 11 patients with primary thrombocytopenic purpura were treated with Xi Jiao Di Huang Tang with complete recovery in 6 patients, marked effect in 4 patients, and no effect (and eventual fatality) in 1 patient. The study reported that after administration of the herbal treatment, there was a significant reduction of bleeding time and gradual increase in platelets. The effect of the herbal formula was attributed to an initial change in permeability of the blood vessels, followed by stimulation and increased production of platelets.⁴ Other studies also confirmed that Xi Jiao Di Huang Tang in the original or slightly modified form had marked effect for treatment of thrombocytopenic purpura.^{5,6}
4. **Hepatitis:** In one report, 13 patients with hepatitis (characterized by Gallbladder stagnation) were treated with modified Xi Jiao Di Huang Tang for one month with improvement reported in 12 patients. Most patients showed a decrease in skin itching and reduction of jaundice.⁷

HERB-DRUG INTERACTION

Drug-induced allergic dermatitis: Administration of modified Xi Jiao Di Huang Tang was associated with good results in treating 38 patients with drug-induced allergic

Xi Jiǎo Dì Huáng Tāng (Rhinoceros Horn and Rehmannia Decoction)

dermatitis. The treatment protocol was to administer the herbs in decoction form in two equally-divided doses daily in the morning and at night. The herbal formula used *Shui Niu Jiao* (Cornu Bubali) in place of *Xi Jiao* (Cornu Rhinoceri). Modifications were made by adding *Da Huang* (Radix et Rhizoma Rhei) for excess heat in the interior; and *Pu Gong Ying* (Herba Taraxaci), *Jin Yin Hua* (Flos Lonicerae Japonicae) and a larger dose of *Shui Niu Jiao* (Cornu Bubali) for toxins affecting the *ying* (nutritive) and *xue* (blood) levels. Of 38 cases, the study reported complete recovery in 33 cases and improvement in 5 cases.⁸

Note: *Xi Jiao* (Cornu Rhinoceri) is derived from an endangered animal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions.

The source text instructs to mix the liquids from *Xi Jiao* (Cornu Rhinoceri) and *Di Huang* (Radix Rehmanniae) with *Jin Zhi* (Excrementum Hominis). Then, add the powder from the rest of the ingredients to this mixture and form into pills. Take 1 pill (3g each) twice daily with boiled water that has been cooled to room temperature. Reduce the dose for children accordingly. Today, *Xi Jiao* (Cornu Rhinoceri) is generally replaced with *Shui Niu Jiao* (Cornu Bubali) [1,800g], and *Jin Zhi* (Excrementum Hominis) is removed from the formula.

Shen Xi Dan (Magical Rhinoceros Special Pill) clears heat, opens the sensory orifices, cools the blood, and eliminates toxins. It treats febrile disorders or epidemic summer-heat, in which the pathogens (heat and toxins) invade the *ying* (nutritive) and *xue* (blood) levels and cause depletion of yin and body fluids. Clinical presentations include high fever, delirium, eruptions of maculae on the skin, sores in the mouth and throat, red eyes, irritability, restlessness, and a scarlet tongue body.

Qing Re Liang Xue Tang (Clear Heat and Cool the Blood Decoction) is a contemporary formula developed specifically to treat systemic lupus erythematosus (SLE). The therapeutic effects of this formula are to clear heat, eliminate toxins, cool the blood and dispel blood stasis.

Because the clinical manifestations of lupus often vary from patient to patient, adjust the doses accordingly. Make modifications as needed, depending on the signs and symptoms as follows: add *Sang Zhi* (Ramulus Mori) and *Gua Lou Pi* (Pericarpium Trichosanthis) for coughing with phlegm; add *Sang Zhi* (Ramulus Mori) and *Qin Jiao* (Radix Gentianae Macrophyllae) for joint pain; add *Da Huang* (Radix et Rhizoma Rhei) for constipation; add *Bai Mao Gen* (Rhizoma Imperatae) for dysuria; add *Huang Bo* (Cortex Phellodendri Chinensis) and *Bai Zhi* (Radix

Xi Jiao Di Huang Tang (Rhinoceros Horn and Rehmannia Decoction)

Angelicae Dahuricae) for leukorrhea; and add *Shi Gao* (Gypsum Fibrosum) for high fever.

Fu Zheng Yi Yan Tang (Support the Upright and Suppress Cancer Decoction) treats excess conditions in individuals with underlying deficiencies. The excess, in the form of cancer, is often diagnosed as accumulation of phlegm, heat and toxins. The deficiencies represent the overall weakness, especially of *zheng* (upright) *qi*. Today, this formula is generally used to treat patients with cancer who are too weak to tolerate treatments such as chemotherapy and radiation.

AUTHORS' COMMENTS

Qing Ying Tang (Clear the Nutritive Level Decoction) and *Xi Jiao Di Huang Tang* both clear heat in the *ying* (nutritive) and *xue* (blood) levels and stop bleeding

characterized by reckless movement of blood. Both formulas stop bleeding and contain blood-moving herbs to prevent the cold herbs from congealing the blood and creating further stagnation while clearing heat.

- *Qing Ying Tang* clears heat in the *ying* (nutritive) level and includes *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) to move blood and prevent the cold herbs from creating stagnation. It also helps to reduce maculopapular eruption that may be present on the skin, marked by bleeding that is just beginning. The condition in this case is not as severe as that seen in *Xi Jiao Di Huang Tang*.
- *Xi Jiao Di Huang Tang* clears heat in the *xue* (blood) level. It contains *Chi Shao* (Radix Paeoniae Rubra) and *Mu Dan Pi* (Cortex Moutan) to move blood and to prevent the cold herbs from creating stagnation. They also assist the other heat-clearing herbs to cool the blood. Bleeding is more prominent and severe in this condition.

Qing Ying Tang (Clear the Nutritive Level Decoction) and *Xi Jiao Di Huang Tang* both contain *Xi Jiao* (Cornu Rhinoceri) and *Di Huang* (Radix Rehmanniae) as chief herbs. The differences between these two formulas are as follows:

- *Qing Ying Tang* focuses on bringing the heat out from the *ying* (nutritive) level and clearing it through the *qi* (energy) level. It is suitable for initial stages of heat attacking the *ying* level, with symptoms of heat sensations at night, incoherent speech, and irritability.
- *Xi Jiao Di Huang Tang* treats more severe conditions of heat attacking the *ying* and *xue* levels and forcing blood out of the vessels, manifesting in various types of bleeding.

in the original source. Today, *Xi Jiao* (Cornu Rhinoceri) is generally replaced with *Shui Niu Jiao* (Cornu Bubali) with the following doses: 60-120g; 90-150g; and 180-240g.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and eliminates toxins
2. Purges fire and cools the blood

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to first cook *Shi Gao* (Gypsum Fibrosum), bring it to a boil multiple times (more than ten), and then add the remaining ingredients. The three sets of doses correspond to small, medium and large doses for the four herbs listed, to treat mild, moderate and severe conditions. Doses for the other ten herbs are not available

CLINICAL MANIFESTATIONS

Wen yi (warm epidemics) characterized by excess heat and toxins in the *qi* (energy) and *xue* (blood) levels: high fever, extreme thirst, splitting headaches, dry heaves, mania, delirium, blurred vision, maculae, hematemesis, epistaxis, extreme coldness or convulsions of the four extremities, scorched lips, a dark red tongue body with

Qīng Wēn BÀI DÚ Yǐn

(Clear Epidemics and Overcome Pathogenic Influences Decoction)

dry or prickly tongue coating. The pulse may be any of the following: deep and rapid; deep, fine and rapid; or superficial, big and rapid.

CLINICAL APPLICATIONS

Epidemic hemorrhagic fever, encephalitis B, meningitis, pyogenic infection, leptospirosis, coxarthrititis, viral pneumonia, acute icteric jaundice, nephritis, Behcet's syndrome, and dermatological disorders.

EXPLANATION

Wen yi (warm epidemics) are infectious or contagious diseases characterized by heat. In this case, excess heat and toxins affect the *qi* (energy) level and consume body fluids to cause high fever and extreme thirst. The heat and toxins may travel to the head and cause splitting headaches and blurred vision. If they travel to the Heart, mania and delirium occur. Eruptions of maculae on the skin, hematemesis, and epistaxis are all signs of heat in the *xue* (blood) level forcing the blood out of the vessels. In extreme cases when too much blood is lost, extreme coldness or convulsions of the four extremities may occur. Scorched lips, a dark red tongue body with dry or prickly coating are due to the presence of excess heat and toxins inside the body damaging body fluids. The pulse may be superficial, big and rapid, or deep and rapid, depending on whether the *qi* or *xue* level is more adversely affected.

Qing Wen Bai Du Yin (Clear Epidemics and Overcome Pathogenic Influences Decoction) contains *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae) to clear excess heat in the *qi* (energy) level and protect against further loss of body fluids. *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), and *Zhi Zi* (Fructus Gardeniae) clear heat and eliminate toxins in all three *jiaos*. *Xi Jiao* (Cornu Rhinoceri), *Di Huang* (Radix Rehmanniae), *Chi Shao* (Radix Paeoniae Rubra), and *Mu Dan Pi* (Cortex Moutan) clear heat from the *xue* (blood) level and disperse blood stagnation, which may form after the blood is forced out of the vessels. *Lian Qiao* (Fructus Forsythiae) and *Xuan Shen* (Radix Scrophulariae) clear heat and eliminate toxins. *Zhu Ye* (Herba Phyllostachys) clears the Heart and calms the *shen* (spirit). *Jie Geng* (Radix Platycodonis) directs the formula to the upper *jiao* and disperses heat from the body. Finally, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) clears heat and harmonizes the formula.

MODIFICATIONS

- If there is Stomach *qi* reversal, add *Zhe Shi* (Haematitum) and *Zhu Ru* (Caulis Bambusae in Taenia).
- With constipation, add *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas).
- With dark or purplish maculae, add *Da Qing Ye* (Folium Isatidis) and *Zi Cao* (Radix Arnebiae).

Qīng Wēn BAI DU YIN (Clear Epidemics and Overcome Pathogenic Influences Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Wen yi</i> (warm epidemics) characterized by excess heat and toxins in the <i>qi</i> (energy) and <i>xue</i> (blood) levels	<ul style="list-style-type: none">• High fever and extreme thirst: heat and toxins in the <i>qi</i> level consuming body fluids• Headache and blurred vision: heat and toxins traveling to the head• Mania and delirium: heat and toxins traveling to the Heart• Bleeding and eruptions of maculae on the skin: heat forcing the blood out of the vessels• Scorched lips, and a dark red tongue body with a dry or prickly tongue coating: excess heat and toxins in the interior	<ul style="list-style-type: none">• Clears heat and eliminates toxins• Purges fire and cools the blood	<ul style="list-style-type: none">• <i>Shi Gao</i> (Gypsum Fibrosum) and <i>Zhi Mu</i> (Rhizoma Anemarrhenae) clear excess heat from the <i>qi</i> level.• <i>Huang Lian</i> (Rhizoma Coptidis), <i>Huang Qin</i> (Radix Scutellariae), and <i>Zhi Zi</i> (Fructus Gardeniae) clear heat and eliminate toxins in all three <i>jiaos</i>.• <i>Xi Jiao</i> (Cornu Rhinoceri), <i>Di Huang</i> (Radix Rehmanniae), <i>Chi Shao</i> (Radix Paeoniae Rubra), and <i>Mu Dan Pi</i> (Cortex Moutan) clear heat from the <i>xue</i> level and disperse blood stagnation.• <i>Lian Qiao</i> (Fructus Forsythiae) and <i>Xuan Shen</i> (Radix Scrophulariae) clear heat and eliminate toxins.• <i>Zhu Ye</i> (Herba Phyllostachys) clears the Heart and calms the <i>shen</i> (spirit).• <i>Jie Geng</i> (Radix Platycodonis) directs the formula to the upper <i>jiao</i> and disperses heat out of the body.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) clears heat and harmonizes the herbs.

Qīng Wēn Bǎi Dú Yīn

(Clear Epidemics and Overcome Pathogenic Influences Decoction)

- If accompanied by epistaxis, remove *Jie Geng* (Radix Platycodonis), and add *Bai Mao Gen* (Rhizoma Imperatae) and *Ce Bai Ye* (Cacumen Platycladi).
- When there are spasms, cramps and convulsions, add *Gou Teng* (Ramulus Uncariae cum Uncis) and *Di Long* (Pheretima).
- With swelling and pain of the throat, add *Shan Dou Gen* (Radix et Rhizoma Sophorae Tonkinensis) and *Niu Bang Zi* (Fructus Arctii).

CAUTIONS / CONTRAINDICATIONS

- *Qing Wen Bai Du Yin* contains many bitter and cold herbs, and should not be used if the condition is not characterized by the presence of heat, fire and toxins.
- This formula should be used with caution in cases of yang deficiency, or in individuals with deficiency and cold of the Spleen and Stomach.

CLINICAL STUDIES AND RESEARCH

1. **Epidemic hemorrhagic fever:** *Qing Wen Bai Du Yin* successfully treated 150 patients with epidemic hemorrhagic fever. The average time required to reduce fever to normal body temperature was 1.58 days. The mortality rate was less than 1%.¹
2. **Pyogenic infection:** In one study, 113 patients with drug-resistant systemic pyogenic infection were treated with satisfactory results using modified *Qing Wen Bai Du Yin*. The study reported fatality in 20 of 113 patients.²
3. **Leptospirosis:** Use of modified *Qing Wen Bai Du Yin* was associated with 96% effectiveness in treating leptospirosis. The herbal formula contained *Shui Niu Jiao* (Cornu Bubali) 30g, *Shi Gao* (Gypsum Fibrosum) 30g, *Di Huang* (Radix Rehmanniae) 30g, *Tu Fu Ling* (Rhizoma Smilacis Glabrae) 30g, *Yi Yi Ren* (Semen Coicis) 30g, *Huang Lian* (Rhizoma Coptidis) 6g, *Zhi Mu* (Rhizoma Anemarrhenae) 10g, *Huang Qin* (Radix Scutellariae) 10g, *Zhi Zi* (Fructus Gardeniae) 10g, *Mu Dan Pi* (Cortex Moutan) 10g, and *Chi Shao* (Radix Paeoniae Rubra) 10g. One pack of herbs decocted in water was administered in two equally-divided doses. In severe cases, patients were given up to 2-3 packs of herbs per day. The study reported recovery in 65 of 68 patients using herbs, while the other three required additional drug treatment.³
4. **Coxsarthitis:** One study reported effectiveness using modified *Qing Wen Bai Du Yin* to treat 13 patients with pyogenic coxarthitis. The patients were treated with up to 10 packs of herbs.⁴
5. **Behcet's syndrome:** Administration of modified *Qing Wen Bai Du Yin* was found to be effective in treating 11 patients with Behcet's syndrome. The study reported

recovery in 6 cases after 15-20 packs of herbs, 3 cases after 25 packs, and 2 cases after 30-50 packs.⁵

RELATED FORMULA

Huà Bān Tāng (Transform Blotches Decoction)

化斑湯

化斑汤

Pinyin Name: *Hua Ban Tang*

Literal Name: Transform Blotches Decoction

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

<i>Shi Gao</i> (Gypsum Fibrosum)	30g
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	12g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	9g
<i>Xuan Shen</i> (Radix Scrophulariae)	9g
<i>Xi Jiao</i> (Cornu Rhinoceri), <i>chong fu</i> (taken drenched)	6g [2-6g]
<i>Geng Mi</i> (Semen Oryzae)	1 scoop [9g]

Note: *Xi Jiao* (Cornu Rhinoceri) is derived from an endangered animal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions.

The source text states to cook the ingredients in 8 cups of water and reduce it to 3 cups. Take the decoction [1 cup] three times daily. The herb residues are to be cooked again with one large bowl of water, and the resultant decoction should be taken at night. Today, *Xi Jiao* (Cornu Rhinoceri) is generally replaced with *Shui Niu Jiao* (Cornu Bubali) [60g]. Also, the decoction may be prepared using the doses suggested in brackets.

Hua Ban Tang (Transform Blotches Decoction) clears heat and cools the blood to treat conditions characterized by heat attacking the *qi* (energy) and *xue* (blood) levels. Clinical presentations include fever; warm body sensations, especially at night; presence of red blotches or maculae on the skin; and a rapid pulse.

Qing Wen Bai Du Yin and *Hua Ban Tang* (Transform Blotches Decoction) both clear heat and cool the blood. Their differences are as follows:

- *Qing Wen Bai Du Yin* contains large doses of herbs to treat severe cases of heat and toxins attacking the *qi* (energy) and *xue* (blood) levels.

Qīng Wēn Bǎi Dú Yīn

(Clear Epidemics and Overcome Pathogenic Influences Decoction)

- *Hua Ban Tang* uses moderate doses of herbs to treat mild to moderate cases of heat attacking the *qi* and *xue* levels.

AUTHORS' COMMENTS

Qing Wen Bai Du Yin has been used historically to treat *wen yi* (warm epidemics), conditions that correlate closely to biomedical disorders such as encephalitis B, meningitis, epidemic hemorrhagic fever, pyogenic infection, and other contagious diseases. Because these diseases vary drastically in severity, the ingredients of this formula differ in dose (up to 10 folds) dramatically.

The formulation of *Qing Wen Bai Du Yin* follows the principles of three formulas:

- *Bai Hu Tang* (White Tiger Decoction) to clear heat from the *qi* (energy) level.
- *Xi Jiao Di Huang Tang* (Rhinoceros Horn and Rehmannia Decoction) to clear heat from the *xue* (blood) level.
- *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity) to clear heat and eliminate toxins.

DOSAGE / PREPARATION / ADMINISTRATION

Coarsely cut the ingredients and cook the herbs in 6 cups [1,200 mL] of water until the liquid is reduced to 2 cups [400 mL]. Take the strained decoction in two equally-divided doses daily.

prophylactic treatment against post-surgical infection, sores, acne, impetigo herpetiformis, herpes, eczema of anus, cataract post-surgery, various bleeding disorders (hemoptysis, epistaxis, hematuria, rectal bleeding, etc.), and disorders with infection and inflammation.

CHINESE THERAPEUTIC ACTIONS

Clears heat, purges fire and eliminates toxins

CLINICAL MANIFESTATIONS

Excess heat, fire and toxins in all three *jiaos*: high fever, fidgeting, irritability, a dry mouth and throat, delirium, insomnia; febrile diseases causing hematemesis, epistaxis, maculated skin; diarrhea, damp-heat jaundice; external abscesses, sores, cellulitis and boils with heat and toxins; yellow urine, a red tongue body with yellow tongue coating, and a rapid, forceful pulse.

CLINICAL APPLICATIONS

Encephalitis B, epidemic encephalitis, cerebrospinal meningitis, cerebrovascular accident, stroke, hypertension, post-ischemic brain injury, septicemia, pneumonia, otitis media, acute icteric jaundice, pelvic inflammatory disease, vaginitis, urinary tract infection, nephritis, acute enteritis, acute bacterial dysentery, bacterial dysentery,

EXPLANATION

Huang Lian Jie Du Tang (Coptis Decoction to Relieve Toxicity) commonly treats excess heat, fire, and toxins in all three *jiaos*. Fidgeting, irritability, and delirium are due to excess fire and toxins disturbing the *shen* (spirit). Hematemesis and epistaxis are due to heat forcing the blood to travel upward and out of the body. Maculated skin is due to heat injuring the channels and collaterals forcing the blood to travel outwards to the skin. Jaundice results when the stagnant damp-heat inside the body vaporizes out to the skin. External abscesses and sores are due to the stagnant heat in the muscles.

Although many clinical manifestations are indicated for this formula, the root cause for all of them is excess heat and fire in all three *jiaos*. This formula uses *Huang Lian* (Rhizoma Coptidis) to sedate fire in the Heart and middle *jiao*. *Huang Qin* (Radix Scutellariae) clears Lung heat and sedates fire in the upper *jiao*. *Huang Bo* (Cortex

Huáng Lián Jiě Dú Tāng (Coptis Decoction to Relieve Toxicity)

Excess heat, fire and toxins in all three <i>jiao</i> s	<ul style="list-style-type: none"> • High fever: excess heat and fire • Fidgeting, irritability and delirium: excess fire and toxins disturbing the <i>shen</i> (spirit) • Dry mouth and throat: heat consuming body fluids • Hematemesis and epistaxis: heat forcing blood outward and upward • Maculated skin: heat injuring the channels and collaterals • Jaundice: stagnant damp-heat inside the body • External abscesses and sores: stagnant heat in the muscles • Yellow urine: heat attacking the lower <i>jiao</i> • Red tongue with a yellow tongue coating: heat and fire • Rapid, forceful pulse: excess condition of heat, fire and toxins 	Clears heat, purges fire, and eliminates toxins	<ul style="list-style-type: none"> • <i>Huang Qin</i> (Radix Scutellariae) clears Lung heat and sedates fire in the upper <i>jiao</i>. • <i>Huang Lian</i> (Rhizoma Coptidis) sedates Heart fire and heat in the middle <i>jiao</i>. • <i>Huang Bo</i> (Cortex Phellodendri Chinensis) drains fire in the lower <i>jiao</i>. • <i>Zhi Zi</i> (Fructus Gardeniae) sedates fire in all three <i>jiao</i>s and guides heat downward.

Phellodendri Chinensis) sedates fire in the lower *jiao*. *Zhi Zi* (Fructus Gardeniae) sedates fire in all three *jiao*s and guides the heat downward.

MODIFICATIONS

- If there is constipation, add *Da Huang* (Radix et Rhizoma Rhei).
- With a dry mouth and throat, add *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- With thirst and fever, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).
- With jaundice and fever, add *Da Huang* (Radix et Rhizoma Rhei) and *Yin Chen* (Herba Artemisiae Scopariae).
- With tenesmus and hematochezia, add *Mu Xiang* (Radix Aucklandiae) and *Bing Lang* (Semen Arecae).
- With frequent urination or oliguria, add *Che Qian Zi* (Semen Plantaginis) and *Mu Tong* (Caulis Akebiae).
- With cough accompanied by pus and blood, add *Jie Geng* (Radix Platycodonis) or *Jie Geng Tang* (Platycodon Decoction).
- For epistaxis, hematemesis, or purpura due to heat in the blood, add *Xuan Shen* (Radix Scrophulariae), *Di Huang* (Radix Rehmanniae), and *Mu Dan Pi* (Cortex Moutan).
- When there are abscesses and sores from accumulation of heat and toxins, add *Pu Gong Ying* (Herba Taraxaci) and *Zi Hua Di Ding* (Herba Violae); or *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins).
- With ulceration of the skin accompanied by swelling and pain, combine with *Pai Nong San* (Drain the Pus Powder).

CAUTIONS / CONTRAINDICATIONS

- Prolonged use of this formula may injure the Spleen and Stomach. It is not suitable for someone with a weak constitution. Furthermore, this formula should be stopped immediately if the patient starts to show signs of yin deficiency.
- *Huang Lian Jie Du Tang* is contraindicated in patients with yin deficiency manifesting in a cracked tongue or mirror tongue, and in patients in which excess fire is not present.

PHARMACOLOGICAL EFFECTS

1. **Antipyretic:** Administration of *Huang Lian Jie Du Tang* was associated with a reduction in body temperature in numerous *in vitro* and *in vivo* experiments. In one study in rabbits with artificially-induced fever, use of the formula was found to have a slow onset but prolonged duration of antipyretic effect. The effect started at approximately 2 hours after the administration, peaked after 4 hours, and continued for 6 hours.¹ In another report, the antipyretic effect of the formula was described as similar to aspirin, following a laboratory study that compared the antipyretic effect of the formula with aspirin and normal saline.²
2. **Gastrointestinal:** Administration of water extract of *Huang Lian Jie Du Tang* at room temperature was associated with a marked inhibitory effect on the peristalsis of the intestines in mice. Similarly, it was found to be effective in treating spasms and cramps of the intestines.³ Lastly, one study reported *Huang Lian Jie Du Tang* as a beneficial therapy for inflammatory bowel disease such as colitis, as the use of this formula was associated with quicker

Huáng Lián Jiě Dú Tāng (Coptis Decoction to Relieve Toxicity)

healing of lesions, and a reduction of inflammatory cell infiltration in rats.⁴

3. **Antilucer:** One study reported that administration of *Huang Lian Jie Du Tang* was associated with a dose-dependent effect to prevent the development of stress-induced and ethanol-induced gastric lesions.^{5,6,7} The report proposed two mechanisms for this gastroprotective effect: increased ability of the gastric mucosa to synthesize prostaglandin,⁸ and decreased secretion of gastric acid.^{9,10}
4. **Antidiarrheal:** Administration of water extract of *Huang Lian Jie Du Tang* at room temperature was associated with marked effect in treating diarrhea in mice.¹¹
5. **Hepatoprotective:** Use of *Huang Lian Jie Du Tang* was associated with a protective effect on the liver.¹² In rats intoxicated with carbon tetrachloride, administration of *Huang Lian Jie Du Tang* prevented the progression of the liver injury in a dose-dependent manner by inhibiting the serum and hepatic triglyceride accumulation, and scavenging free radicals formed in the liver.^{13,14}
6. **Antioxidant:** *Huang Lian Jie Du Tang* had an antioxidant effect to protect red blood cell membranes from free radicals. This antioxidant effect was dose-dependent at concentrations of 5 to 500 mcg/mL. Clinical use of this formula (7.5 g/day via oral ingestion) was associated with a significant decrease in susceptibility of red blood cells to hemolysis in humans.¹⁵
7. **Analgesic and anti-inflammatory:** Administration of a water extract of *Huang Lian Jie Du Tang* reduced pain and inflammation in mice.¹⁶ The anti-inflammatory effects were exerted mainly in the early stages of inflammation, where increased capillary permeability and migration of leucocytes occurred.¹⁷
8. **Antihypertensive:** Administration of *Huang Lian Jie Du Tang* was associated with effectiveness in lowering blood pressure, as documented in numerous reports.¹⁸ Water extract of the formula administered via intravenous injection in rats was associated with reduction of blood pressure and increase of heart rate in a dose-dependant fashion.¹⁹ In another study, *Huang Lian Jie Du Tang* ameliorated hypertension caused by sympathetic system dominance in anesthetized rats.²⁰
9. **Effect on arteriosclerosis:** *Huang Lian Jie Du Tang* prevented arteriosclerosis by inhibiting the proliferation of vascular smooth muscle cells.²¹
10. **Antihyperlipidemic:** Administration of *Huang Lian Jie Du Tang* was associated with decreased serum total cholesterol and low-density lipoprotein cholesterol levels. The mechanism of this antihyperlipidemic activity was attributed to the inhibition of HMG-CoA reductase. Of all the herbs in *Huang Lian Jie Du Tang*, *Huang Lian* (*Rhizoma Coptidis*) was believed to be the most potent inhibitor.²²

11. **Metabolic:** Daily administration of *Huang Lian Jie Du Tang* in mice was associated with effectiveness in reducing blood glucose and cholesterol levels.²³

12. **Ocular:** One study reported that administration of *Xi Gan Ming Mu San* (Wash the Liver and Brighten the Eyes Powder) and *Huang Lian Jie Du Tang* was associated with significantly suppressing ($P < 0.001$) the elevation of aqueous flares induced by lipopolysaccharides in rabbits.²⁴

CLINICAL STUDIES AND RESEARCH

1. **Encephalitis B:** In one report, 56 patients with encephalitis B were treated with complete recovery in 51 patients and fatality in 4 patients. The average time for reduction of temperature was 4.9 days.²⁵
2. **Cerebrospinal meningitis:** Twelve patients with infectious cerebrospinal meningitis were treated with complete recovery in 4 patients within 3 packs of herbs, in 2 patients after 4 packs, in 5 patients after 5 packs, and 1 patient after 6 packs. No long-term complications or sequelae were noted among all 12 patients.²⁶
3. **Cerebrovascular accident:** One study stated that *Huang Lian Jie Du Tang* was useful in the treatment of cerebrovascular accident; this formula was found to improve microcirculation through lipid and protein metabolisms. Administration of the formula was associated with a significant decrease in plasma total cholesterol and triglyceride levels, and an increase in lipoprotein lipase mass. A considerable decline was also reported on plasma fibrinogen, an independent risk factor for cerebrovascular disease.²⁷
4. **Stroke:** In one study, 120 patients with ischemic stroke confirmed with Western diagnosis were treated with modified *Huang Lian Jie Du Tang*. The treatment protocol was to administer the herbal decoction twice daily for 2-4 weeks in most patients, with some receiving treatment for up to 7 weeks. The study reported complete recovery in 48 patients, significant improvement in 38 patients, slight improvement in 29 patients, no change in 3 patients, and deterioration in 2 patients. The rate of effectiveness was 95.1%.²⁸
5. **Post-ischemic brain injury:** Administration of 3 herbal formulas minimized post-ischemic brain injury by inhibiting production of free radicals and lipid peroxidation. Three formulas that were found to be effective, both *in vitro* and *in vivo*, were *Huang Lian Jie Du Tang*, *Chai Hu Jia Long Gu Mu Li Tang* (Bupleurum plus Dragon Bone and Oyster Shell Decoction), and *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill).²⁹
6. **Transient cerebral ischemia:** Use of *Huang Lian Jie Du Tang* protected against the impairment of learning and memory induced by transient cerebral ischemia, because

Huáng Lián Jiě Dú Tāng (Coptis Decoction to Relieve Toxicity)

Huang Lian Jie Du Tang prevented the decrease in the acetylcholine content of the brain.³⁰

7. **Pneumonia:** In one report, 35 pediatric patients with viral pneumonia were effectively treated with modified *Huang Lian Jie Du Tang*. Most patients had significant reduction of body temperature, cough, and other symptoms within 10-18 days.³¹
8. **Otitis media:** In one clinical study, 50 patients with otitis media were treated topically with a modified *Huang Lian Jie Du Tang* preparation, 4-5 drops in the affected ear(s) three to four times daily. Out of 50 patients, the study reported complete recovery in 32 patients, improvement in 9 patients, no change in 7 patients, and discontinuation of treatment in 2 patients.³²
9. **Pelvic inflammatory disease:** In one study, 128 patients with pelvic inflammatory disease were treated with *Huang Lian Jie Du Tang* with 96.1% effectiveness. The treatment protocol was to cook the herbs in water to obtain 100 mL of herbal solution, which was administered at approximately 38°C / 100.4°F as a rectal enema one time daily for 10 days per course of treatment. Of 128 patients, the study reported complete recovery in 95 patients, significant improvement in 19 patients, moderate improvement in 9 patients, and no effect in 5 patients.³³
10. **Vaginitis:** Topical application of a modified *Huang Lian Jie Du Tang* preparation one time daily for 5-7 days was successful in treating fungal or trichomonal vaginitis.³⁴
11. **Bacterial dysentery:** In one report, 152 patients with bacterial dysentery characterized by the presence of mucus and blood in the stool were treated with rectal enema of a modified *Huang Lian Jie Du Tang* preparation which did not contain *Zhi Zi* (Fructus Gardeniae). Most patients exhibited marked reduction of temperature and other symptoms after just two procedures.³⁵
12. **Prophylactic treatment against post-surgical infection:** *Huang Lian Jie Du Tang* has been used both before and after surgery with good success to prevent infection. Rectal instillation of the herbal solution prior to surgery on the colon effectively prevented infection and facilitated post-surgical recovery. The herbal formula contained *Huang Lian* (Rhizoma Coptidis) 30g, *Huang Qin* (Radix Scutellariae) 20g, *Huang Bo* (Cortex Phellodendri Chinensis) 20g, and *Zhi Zi* (Fructus Gardeniae) 30g. The treatment protocol was to cook the herbs in water twice, and the 2 resultant solutions mixed together (approximately 1,000 mL total), and instilled rectally while warm (35-40°C / 95-104°F).³⁶ In another study, administration of *Huang Lian Jie Du Tang* was associated with effectiveness in preventing infection in post-surgical patients. Of 50 patients who had various types of surgeries (primarily upper and lower extremities), use of herbs was successful in preventing infection in 48 patients, with use of antibiotic drugs needed in 2 patients.³⁷
13. **Abscesses and sores:** One study reported good results using herbs topically to treat abscesses and sores in the lower extremities. The herbal treatment contained *Huang Lian* (Rhizoma Coptidis) 10g, *Huang Bo* (Cortex Phellodendri Chinensis) 10g, *Huang Qin* (Radix Scutellariae) 10g, *Bai Zhi* (Radix Angelicae Dahuricae) 15g, and *Tu Fu Ling* (Rhizoma Smilacis Glabrae) 20g. The herbs were cooked in water, and the solution was used as an herbal wash topically on the affected area for 20 minutes, three times daily.³⁸
14. **Acne:** According to a retrospective evaluation, *Huang Lian Jie Du Tang* was reported to be better than minocycline or erythromycin in the treatment against *Propionibacterium acnes*. Use of *Huang Lian Jie Du Tang* remained effective without significant increases in minimum inhibitory concentrations based on evaluations from 1990 to 1995. The efficacy of *Huang Lian Jie Du Tang* was attributed to *Huang Lian* (Rhizoma Coptidis) and *Huang Bo* (Cortex Phellodendri Chinensis), two herbs with strong antibacterial activity against *Propionibacterium acnes*.³⁹
15. **Impetigo herpetiformis:** Use of modified *Huang Lian Jie Du Tang* was successful in treating 31 out of 31 patients with impetigo herpetiformis. The treatment protocol was to cook the herbs, and drink the decoction in two equally-divided doses daily. The herb residue was cooked again, and the resultant solution was used as an herbal wash on the affected area two to three times daily. The study reported complete recovery in all 31 patients, mostly within 10 days.⁴⁰
16. **Eczema of anus:** One study reported marked success using modified *Huang Lian Jie Du Tang* to treat chronic eczema of anus. The herbal formula contained *Huang Lian* (Rhizoma Coptidis) 10g, *Huang Qin* (Radix Scutellariae) 8g, *Tu Fu Ling* (Rhizoma Smilacis Glabrae) 15g, and *Di Fu Zi* (Fructus Kochiae) 20g. The treatment protocol was to cook the herbs in water, then have the patient soak the affected area in the herbal solution 30 minutes, four times daily, for two weeks. No recurrences were reported in follow-up exams.⁴¹
17. **Lin zheng (dysuria syndrome):** One study reported 96.9% effectiveness using modified *Huang Lian Jie Du Tang* to treat 32 patients with various types of *lin zheng* (dysuria syndrome). The herbal treatment contained *Huang Lian* (Rhizoma Coptidis) 12g, *Huang Qin* (Radix Scutellariae) 10g, *Huang Bo* (Cortex Phellodendri Chinensis) 10g, *Che Qian Zi* (Semen Plantaginis) 10g, *Da Huang* (Radix et Rhizoma Rhei) 10g, *Zhi Zi* (Fructus Gardeniae) 9g, *Bai Jiang Cao* (Herba cum Radice Patriniae) 15g, and *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) 12g. The treatment protocol was to cook the herbs in water, and administer

Huáng Lián Jiě Dú Tāng (Coptis Decoction to Relieve Toxicity)

the decoction in two equally-divided doses daily, for 7 days per course of treatment, for 1-2 courses total. During the herbal treatment, all patients were instructed to avoid foods that are pungent, hot, or sour. Of 32 patients, the study reported complete recovery in 22 patients, improvement in 9 patients, and no change in 1 patient.⁴²

18. Cataract surgery: Use of *Huang Lian Jie Du Tang* and *Ge Gen Tang* (Kudzu Decoction) helped to reduce aqueous flare elevation after complicated cataract surgery. The treatment protocol was to administer *Huang Lian Jie Du Tang* (7.5 g/day) and *Ge Gen Tang* (Kudzu Decoction) (7.5 g/day) for 3 days before surgery, the day of surgery, and for 7 days after surgery. In comparison with the control group that did not receive herbs, oral administration of *Huang Lian Jie Du Tang* and *Ge Gen Tang* (Kudzu Decoction) decreases aqueous flare elevation after small-incision cataract surgery.⁴³

HERB-DRUG INTERACTION

- **Drug-induced mucositis:** In 40 patients with acute leukemia treated with cytotoxic drugs, use of *Huang Lian Jie Du Tang* was associated with a marked effect to prevent iatrogenic mucositis, such as stomatitis and gastrointestinal mucosal injury. In the control group that did not receive herbs, the incidence was 71.6% for stomatitis, and 31.7% for diarrhea. In the herb group, the incidence was 27.9% for stomatitis, and 9.3% for diarrhea. The study concluded that *Huang Lian Jie Du Tang* had a significant preventive effect on mucositis caused by anticancer agents.⁴⁴
- **Aspirin- and ethanol-induced gastric lesions:** Administration of *Huang Lian Jie Du Tang* was associated with success in treating aspirin- and ethanol-induced gastric hemorrhagic lesions in rats. The gastroprotective effect of *Huang Lian Jie Du Tang* was comparable to sucralfate (Carafate), cimetidine (Tagamet), and 16,16-dimethyl-prostaglandin E2 (DMPGE2).⁴⁵

Literal Name: Coptis Pill to Clear the Upper

Alternate Names: *Huang Lien Shang Qing Wan*, Coptis Up-Clearing Pill, Coptis Phellodendron and Mint Formula

Original Source: *Si He Ting Ji Fang* (Collection of Formulas of Si He-Ting)

COMPOSITION

<i>Huang Lian</i> (Rhizoma Coptidis)	240g
<i>Huang Qin</i> (Radix Scutellariae)	240g
<i>Huang Bo</i> (Cortex Phellodendri Chinensis)	240g
<i>Zhi Zi</i> (Fructus Gardeniae)	240g
<i>Da Huang</i> (Radix et Rhizoma Rhei)	360g
<i>Ju Hua</i> (Flos Chrysanthemi)	120g
<i>Jie Geng</i> (Radix Platycodonis)	60g
<i>Bo He</i> (Herba Menthae)	120g
<i>Jiang Huang</i> (Rhizoma Curcumae Longae)	180g
<i>Lian Qiao</i> (Fructus Forsythiae)	180g
<i>Xuan Shen</i> (Radix Scrophulariae)	120g
<i>Tian Hua Fen</i> (Radix Trichosanthis)	60g
<i>Ge Gen</i> (Radix Puerariae Lobatae)	60g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	120g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	60g

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder and mix with honey to form pills. Take 9g of pills with tea at bedtime.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and eliminates toxins
2. Purges fire and treats constipation

CLINICAL MANIFESTATIONS

Heat accumulation in all three *jiaos* with fire attacking the head: irritability, red eyes, a sore throat, pimples, ulcerations of the mouth and tongue, and pain and burning sensation during urination.

CLINICAL APPLICATIONS

Pneumonia, urinary tract infection, conjunctivitis, and febrile disorders.

EXPLANATION

Huang Lian Shang Qing Wan (Coptis Pill to Clear the Upper) has a wide range of clinical applications, but is most effective in treating heat and fire in the upper *jiao* attacking the head. Heat and fire in the three *jiaos* are characterized by fidgeting, irritability, and jaundice. As heat and fire move upward, they attack the head and the upper parts of the body, producing red eyes, a sore throat,

and ulcerations of the mouth and tongue. As heat and fire travel downward, they affect both bowel movement and urination, leading to constipation and pain, as well as burning sensations during urination.

Huang Lian (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Huang Bo* (Cortex Phellodendri Chinensis), *Zhi Zi* (Fructus Gardeniae), and *Da Huang* (Radix et Rhizoma Rhei) are bitter and cold herbs that eliminate excess heat and fire in the upper, middle, and lower *jiaos*. *Huang Qin* (Radix Scutellariae) clears Lung heat and sedates fire in the upper *jiao*; *Huang Lian* (Rhizoma Coptidis) sedates fire in the Heart and middle *jiao*; *Huang Bo* (Cortex Phellodendri Chinensis) clears heat in the lower *jiao*; *Zhi Zi* (Fructus Gardeniae) sedates fire in all three *jiaos*; and *Da Huang* (Radix et Rhizoma Rhei) sedates fire and purges heat downward through defecation. *Ju Hua* (Flos Chrysanthemi), *Jie Geng* (Radix Platycodonis), *Bo He* (Herba Menthae), *Jiang Huang* (Rhizoma Curcumae Longae) and *Lian Qiao* (Fructus Forsythiae) dispel wind-heat and eliminate toxins from the exterior to relieve sore throat, red eyes, and ulcerations of the mouth and tongue. *Xuan Shen* (Radix Scrophulariae) and *Tian Hua Fen* (Radix Trichosanthis) clear heat and eliminate toxins. *Tian Hua Fen* (Radix Trichosanthis) and *Ge Gen* (Radix Puerariae Lobatae) promote generation of body fluids

<i>Zhi Qiao</i> (Fructus Citri Aurantii)	1.5g
<i>Bai Zhi</i> (Radix Angelicae Dahuricae)	2.4g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	2.1g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	0.9g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the herbs with a small amount of *Zhu Li* (Succus Bambusae) and take the warm, strained decoction after meals.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat from the upper *jiao*
2. Clears heat and eliminates toxins

CLINICAL MANIFESTATIONS

Wind, heat, and toxins in the upper body: boils, acne, eczema, flushed face, and red eyes.

CLINICAL APPLICATIONS

Pimples, boils, eczema, conjunctivitis, otitis media, and gingivitis.

EXPLANATION

Qing Shang Fang Feng Tang (Clear the Upper and Guard the Wind Decoction) eliminates wind, heat and toxins from the upper parts of the body. The presentation of this condition is usually on the skin, evident as boils, acne, and eczema. Patients may also have red face and eyes. This is an effective formula for treating various upper body skin disorders characterized by heat and toxins.

Huang Lian (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), and *Zhi Zi* (Fructus Gardeniae) synergistically clear heat from the upper parts of the body. In addition, these herbs also eliminate toxins. *Fang Feng* (Radix Saposhnikoviae), *Bo He* (Herba Menthae), *Jie Geng* (Radix Platycodonis), and *Jing Jie* (Herba Schizonepetae) enter the superficial layer of the body to eliminate wind, dispel phlegm, and eliminate toxins. *Lian Qiao* (Fructus Forsythiae) and *Zhi Qiao* (Fructus Aurantii) reduce swelling and drain pus. *Bai Zhi* (Radix Angelicae Dahuricae) and *Chuan Xiong* (Rhizoma Chuanxiong) travel upwards to guide the effects of the herbs to the upper body. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

MODIFICATIONS

- With constipation, add *Da Huang* (Radix et Rhizoma Rhei).
- If there are sores that are itchy, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Tu Fu Ling* (Rhizoma Smilacis Glabrae).
- With sores and swelling, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Shi Gao* (Gypsum Fibrosum).
- When the acne is characterized by excessive pus, add a large dose of *Yi Yi Ren* (Semen Coicis).

Liáng Gé Sǎn (Cool the Diaphragm Powder)

涼膈散 凉膈散

Pinyin Name: *Liang Ge San*

Literal Name: Cool the Diaphragm Powder

Alternate Names: *Lian Ke San*, Forsythia and Rhubarb Formula

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Lian Qiao</i> (Fructus Forsythiae)	1,200g [18g]
<i>Huang Qin</i> (Radix Scutellariae)	300g [5g]
<i>Zhi Zi</i> (Fructus Gardeniae)	300g [5g]
<i>Bo He</i> (Herba Menthae)	300g [5g]
<i>Po Xiao</i> (Sal Glauberis)	600g [9g]
<i>Da Huang</i> (Radix et Rhizoma Rhei)	600g [9g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	600g [9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a coarse powder. Cook 6g of the powder with 7 leaves of *Zhu Ye* (Herba Phyllostachys) and a small amount of *Feng Mi* (Mel) in one large bowl of water until it is reduced to 70%. Take the warm, strained decoction after meals. For young children, cook 1.5g of the powder per dose, or adjust it accordingly based on age. Once bowel movement has been induced, the formula should be discontinued. Today, this formula may be prepared as a decoction with the doses suggested in brackets and 3g of *Zhu Ye* (Herba Phyllostachys) and a small amount of *Feng Mi* (Mel).

CHINESE THERAPEUTIC ACTIONS

1. Purges fire and promotes defecation
2. Clears and purges heat from the upper and middle *jiaos*

CLINICAL MANIFESTATIONS

Accumulation of heat and fire in the upper and middle *jiaos*: irritability and a warm sensation in the chest and diaphragm, fever, thirst, red eyes, a warm face, extremely dry lips, ulcers on the mouth and tongue, a sore throat, epistaxis, hematemesis, constipation, dysuria with dark scanty urine, a red tongue body with a yellow tongue coating, and a slippery, rapid pulse.

CLINICAL APPLICATIONS

Infection, upper respiratory tract infection, pediatric pneumonia, lobar pneumonia, bronchiectasis, whooping cough, common cold and influenza, infectious parotitis, sore throat, bronchiectasis with hemoptysis, stomatitis, laryngitis, herpetic pharyngitis, tonsillitis, candidiasis, herpes labiales, gingivitis, epistaxis, cholecystitis,

cholelithiasis, acute conjunctivitis, encephalitis, meningitis, diarrhea, and acute nephritis.

EXPLANATION

Liang Ge San (Cool the Diaphragm Powder) treats stagnation of heat and fire in the chest and diaphragm of the upper and middle *jiaos*. Heat accumulation in the upper and middle *jiaos* causes irritability, a warm sensation in the chest and diaphragm, fever, and thirst. If the heat travels upward to the head, then red eyes, a warm face, extremely dry lips, ulcers on the mouth and the tongue, and a sore throat manifest. Epistaxis and hematemesis occur in severe cases when heat travels upward and forces blood out of the blood vessels. If heat travels downward, constipation and dysuria occur. The yellow tongue coating and rapid pulse both suggest excess heat accumulation inside the body.

This formula uses heat-clearing herbs to clear heat in the upper *jiao*, and purgative herbs to sedate fire in the lower *jiao* through defecation. *Lian Qiao* (Fructus Forsythiae), used in a large amount in this formula, clears heat and eliminates toxins from the upper *jiao*. *Huang Qin* (Radix Scutellariae) and *Zhu Ye* (Herba Phyllostachys) clear heat from the Heart and upper *jiao* and relieve symptoms associated with the chest and diaphragm. *Zhi Zi* (Fructus Gardeniae) clears heat in all three *jiaos* and leads heat downward. *Bo He* (Herba Menthae) clears the head and benefits the throat. *Po Xiao* (Sal Glauberis) and *Da Huang* (Radix et Rhizoma Rhei), both purgative herbs, purge heat in the chest and diaphragm and eliminate it through defecation. *Feng Mi* (Mel) lubricates the bowels to facilitate the purgative effects of *Da Huang* (Radix et Rhizoma

Liang Ge San (Cool the Diaphragm Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Accumulation of heat and fire in the upper and middle <i>jiaos</i>	<ul style="list-style-type: none"> • Irritability, a warm sensation in the chest and diaphragm, fever, and thirst: heat accumulated in the upper and middle <i>jiaos</i> • Red eyes, a warm face, extremely dry lips, ulcers on the mouth and tongue, and a sore throat: heat traveling upward to the head region • Constipation and dysuria: heat traveling downward • Epistaxis and hematemesis: heat travels upward forcing blood out of the vessels • Red tongue body with yellow tongue coating: excess heat • Rapid pulse: excess heat 	<ul style="list-style-type: none"> • Purges fire and promotes defecation • Clears and purges heat from the upper and middle <i>jiaos</i> 	<ul style="list-style-type: none"> • <i>Lian Qiao</i> (Fructus Forsythiae) clears heat and eliminates toxins in the upper <i>jiao</i>. • <i>Huang Qin</i> (Radix Scutellariae) and <i>Zhu Ye</i> (Herba Phyllostachys) clear heat from the Heart and upper <i>jiao</i>. • <i>Zhi Zi</i> (Fructus Gardeniae) clears heat in all three <i>jiaos</i> and leads heat downward. • <i>Bo He</i> (Herba Menthae) clears the head and benefits the throat. • <i>Po Xiao</i> (Sal Glauberis) and <i>Da Huang</i> (Radix et Rhizoma Rhei) purge heat in the chest and diaphragm and eliminate it through defecation. • <i>Feng Mi</i> (Mel) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) moisten, protect, and nourish Stomach yin.

Rhei) and *Po Xiao* (Sal Glauberis). *Gan Cao* (Radix et Rhizoma Glycyrrhizae) moderates the drastic effects of the purgative herbs. *Feng Mi* (Mel) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) also moisten, protect, and nourish Stomach yin.

cold herbs, and has heat-clearing and downward draining effects. Patients with a sensitive gastrointestinal tract may experience stomach pain and diarrhea, both of which are self-limiting with discontinuation of the formula. If such patients require this formula, remove *Da Huang* (Radix et Rhizoma Rhei) and administer the formula after meals.

MODIFICATIONS

- With cough, nausea, and vomiting, add *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- With dysuria, add *Hua Shi* (Talcum) and *Fu Ling* (Poria).
- With dizziness and vertigo due to heat, add *Fang Feng* (Radix Saposhnikoviae), *Chuan Xiong* (Rhizoma Chuanxiong) and *Shi Gao* (Gypsum Fibrosum).
- With irritability and thirst, add *Tian Hua Fen* (Radix Trichosanthis).
- With a sore throat, add *Shan Dou Gen* (Radix et Rhizoma Sophorae Tonkinensis) and *Ban Lan Gen* (Radix Isatidis).
- When there is ulceration of the mouth and tongue, add *Huang Lian* (Rhizoma Coptidis) and *Di Gu Pi* (Cortex Lycii).
- If accompanied by chest pain, add *Chai Hu* (Radix Bupleuri), *Chuan Lian Zi* (Fructus Toosendan), and *Yan Hu Suo* (Rhizoma Corydalis).

CAUTIONS / CONTRAINDICATIONS

- Use this formula with caution during pregnancy. *Po Xiao* (Sal Glauberis) and *Da Huang* (Radix et Rhizoma Rhei) should be reduced in dose, or removed completely, during pregnancy.
- *Liang Ge San* is a strong formula that contains bitter and

CLINICAL STUDIES AND RESEARCH

1. **Common cold and influenza:** In a clinical trial, 257 patients with viral infections were divided into two groups, with 157 patients receiving herbal and 100 patients receiving drug treatment. The protocol for the herbal treatment was to administer modified *Liang Ge San* in decoction twice daily. The study reported complete recovery in 131 patients with 1-3 packs of herbs, and 26 patients with 4-6 packs. By comparison, patients who received antibiotic drug therapy all required at least 5 days to recover, with 63 needing more than 10 days. The researchers concluded that use of this formula may shorten the duration of illness for common cold and influenza.¹
2. **Tonsillitis:** Modified *Liang Ge San* was used to treat 32 patients between the ages of 16 months and 12 years with acute tonsillitis with swelling, pain, and constipation. The treatment protocol was to administer the herbal decoction one time daily. The study reported complete recovery in 30 of 32 patients within a range of 4-8 days. Treatment was discontinued in two patients because of nausea and vomiting.²
3. **Pneumonia:** Modified *Liang Ge San* was used to treat 13 patients with lobar pneumonia with symptoms such as

Liáng Gé Sǎn (Cool the Diaphragm Powder)

aversion to cold, fever, cough, and chest pain. The treatment protocol was to administer the herbs in decoction one time daily for regular patients, and twice daily for severe cases. Of 13 patients with lobar pneumonia, the study reported complete recovery in 10 patients and improvement in 3 patients.³

4. **Bronchiectasis with hemoptysis:** Concurrent administration of antibiotic drugs and modified *Liang Ge San* was reported to be effective in the treatment of hemoptysis caused by bronchiectasis in 30 patients with a history of illness between 3 months to 15 years. The rationale of the treatment was to use antibiotic drugs to treat the infection, and herbs to stop bleeding. The herbal treatment contained *Da Huang* (Radix et Rhizoma Rhei) 6g, *Mang Xiao* (Natrii Sulfas) 6g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, *Bo He* (Herba Menthae) 6g, *Dan Zhu Ye* (Herba Lophatheri) 6g, *Lian Qiao* (Fructus Forsythiae) 9g, *Zhi Zi* (Fructus Gardeniae) 9g, *Huang Qin* (Radix Scutellariae) 9g, and *Feng Mi* (Mel) 18g. The herbs were cooked, and the decoction administered in two equally-divided doses. The duration of treatment was 10-15 packs of herbs per course of treatment, for up to two courses total. The average length of treatment was 7 days. Of 30 patients, the study reported significant effect in 22 patients, improvement in 6 patients, and no effect in 2 patients. The overall rate of effectiveness was 93.3%.⁴
5. **Herpetic pharyngitis:** One study reported marked success using modified *Liang Ge San* to treat herpetic pharyngitis in 28 children (17 males and 11 females). The herbal treatment contained *Chan Tui* (Periostracum Cicadae) 5g, *Bo He* (Herba Menthae) 5g (post-decocted), fresh *Lu Gen* (Rhizoma Phragmitis) 30g, *Niu Bang Zi* (Fructus Arctii) 6g, *Lian Qiao* (Fructus Forsythiae) 6g, *Xuan Shen* (Radix Scrophulariae) 6g, *Zhi Zi* (Fructus Gardeniae) 6g, *Da Huang* (Radix et Rhizoma Rhei) 5g (post-decocted), *Ban Lan Gen* (Radix Isatidis) 10g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 10g, and *She Gan* (Rhizoma Belamcandae) 5g. Modifications were made as needed by adding *Jing Jie* (Herba Schizonepetae) for mild perspiration; *Shi Gao* (Gypsum Fibrosum) 30g (pre-decocted) for high fever; *Gou Teng* (Ramulus Uncariae cum Uncis) 6g or *Jiang Can* (Bombyx Batryticatus) 6g for high fever with seizure; and adding dry-fried *Zhi Qiao* (Fructus Aurantii) 5g and *Jue Ming Zi* (Semen Cassiae) 12g and removing *Da Huang* (Radix et Rhizoma Rhei) for dry stools in a constitutionally-deficient

person. The treatment protocol was to cook 1 pack of herbs and administer the decoction daily, for 3 days per course of treatment. The study reported 96.4% effectiveness after 2 courses of treatment, with improvements such as relief of irritability, sore throat, herpetic lesions, and constipation.⁵

6. **Epistaxis:** Twenty-four patients with epistaxis refractory to drug therapy were treated with 95.83% effectiveness using modified *Liang Ge San*. Modifications to the base formula included the addition of *San Qi* (Radix et Rhizoma Notoginseng) in powder for profuse bleeding; *E Jiao* (Colla Corii Asini) and *Bai Shao* (Radix Paeoniae Alba) for yin and blood deficiencies; *Huang Qi* (Radix Astragali) and *Tai Zi Shen* (Radix Pseudostellariae) for qi deficiency; *Long Dan* (Radix et Rhizoma Gentianae) for Liver fire rising; *Shi Gao* (Gypsum Fibrosum) and *Huang Lian* (Rhizoma Coptidis) for Stomach fire rising; and *Jing Jie* (Herba Schizonepetae) and *Ge Gen* (Radix Puerariae Lobatae) for presence of an exterior condition. Of 24 patients, the study reported complete recovery in 21 patients, improvement in 2 patients, and no change in 1 patient.⁶

AUTHORS' COMMENTS

Liang Ge San contains both heat-clearing and purgative herbs to eliminate accumulation of heat and fire in the upper and middle *jiaos*. Heat-clearing herbs are effective for clearing generalized non-stagnant heat in the body. However, in this syndrome in which heat stagnation is a factor, heat-clearing herbs alone may not be able to completely break up and eliminate the heat pathogen. Therefore, purgative herbs are also used to eliminate heat stagnation more effectively, even in cases in which the patient does not have constipation.

Qīng Liáng Yīn (Clearing and Cooling Decoction)

清涼飲
清凉饮

Pinyin Name: *Qing Liang Yin*
Literal Name: Clearing and Cooling Decoction
Alternate Name: Scute and Mentha Combination
Original Source: *Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments) by Wang Ken-Tang in 1602

COMPOSITION

- Huang Qin* (Radix Scutellariae)
- Huang Lian* (Rhizoma Coptidis)
- Bo He* (Herba Menthae)
- Xuan Shen* (Radix Scrophulariae)
- Dang Gui* (Radix Angelicae Sinensis)
- Bai Shao* (Radix Paeoniae Alba)
- Gan Cao* (Radix et Rhizoma Glycyrrhizae)

DOSAGE / PREPARATION / ADMINISTRATION

The doses of herbs and the instructions for preparation are unavailable from the original source. Today, this formula can be prepared and taken as a warm decoction any time during the day.

CHINESE THERAPEUTIC ACTIONS

Clears heat from the upper and middle *jiaos*

CLINICAL MANIFESTATIONS

Heat in the upper and middle *jiaos*: thirst, restlessness, foul breath, and a dry tongue and throat.

CLINICAL APPLICATIONS

Stomatitis, canker sores, and oral herpes.

EXPLANATION

Qing Liang Yin (Clearing and Cooling Decoction) treats heat attacking the upper and middle *jiaos*, leading to symptoms of both excess heat and deficiency of fluids. Excess heat is characterized by foul breath and restlessness, and deficiency of fluids is characterized by thirst, a dry tongue, and a dry throat.

This formula contains herbs that clear heat and moisten fluids. *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis), two bitter and cold herbs, clear heat from the upper and middle *jiaos*. They address the excess component of this syndrome. *Bo He* (Herba Menthae) also clears heat. Although these three herbs clear heat exceedingly well, they carry the risk of drying up fluids and yin. Thus, *Xuan Shen* (Radix Scrophulariae) is added

Qing Liang Yin (Clearing and Cooling Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Heat in the upper and middle <i>jiaos</i>	<ul style="list-style-type: none">Foul breath and restlessness: excess heat in the upper and middle <i>jiaos</i>Thirst, and a dry tongue and throat: excess heat consuming body fluids	Clears heat from the upper and middle <i>jiaos</i>	<ul style="list-style-type: none"><i>Huang Qin</i> (Radix Scutellariae) and <i>Huang Lian</i> (Rhizoma Coptidis) clear heat from the upper and middle <i>jiaos</i>.<i>Bo He</i> (Herba Menthae) clears heat.<i>Xuan Shen</i> (Radix Scrophulariae) clears heat and replenishes yin and fluids.<i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Bai Shao</i> (Radix Paeoniae Alba) nourish the blood and prevent the bitter and cold herbs from damaging the body.<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

Qīng Liáng Yīn (Clearing and Cooling Decoction)

because it both clears heat and replenishes yin and fluids. *Dang Gui* (Radix Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba) nourish the blood and prevent the bitter and cold herbs from damaging the body. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs. The formula achieves its function of clearing heat from

the upper and middle *jiaos* while protecting yin and body fluids.

MODIFICATIONS

With constipation caused by excess heat, add *Da Huang* (Radix et Rhizoma Rhei).

Pǔ Jì Xiāo Dú Yīn (Universal Benefit Decoction to Eliminate Toxin)

普濟消毒飲 普济消毒饮

Pinyin Name: *Pu Ji Xiao Du Yin*

Literal Name: Universal Benefit Decoction to Eliminate Toxin

Alternate Names: *Pu Chi Hsiao Tu Yin*, Universal Salvation Detoxifying Drink, Everyone's Detoxifying Decoction, Scute and Cimicifuga Combination

Original Source: *Dong Heng Shi Xiao Fang* (Tested and Effective Formulas by Dong Heng) by Li Gao (also known as Li Dong-Heng) in 1266

COMPOSITION

<i>Huang Qin</i> (Radix Scutellariae), <i>chao</i> (dry-fried) with liquor	15g
<i>Huang Lian</i> (Rhizoma Coptidis), <i>chao</i> (dry-fried) with liquor	15g
<i>Niu Bang Zi</i> (Fructus Arctii)	3g
<i>Lian Qiao</i> (Fructus Forsythiae)	3g
<i>Bo He</i> (Herba Menthae)	3g
<i>Jiang Can</i> (Bombyx Batryticatus)	2.1g
<i>Xuan Shen</i> (Radix Scrophulariae)	6g
<i>Ma Bo</i> (Lasiosphaera seu Calvatia)	3g
<i>Ban Lan Gen</i> (Radix Isatidis)	3g
<i>Jie Geng</i> (Radix Platycodonis)	6g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	6g
<i>Sheng Ma</i> (Rhizoma Cimicifugae)	2.1g
<i>Chai Hu</i> (Radix Bupleuri)	6g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	9g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder, cook it in water, and take the warm decoction frequently in small amounts. It may also be formed into pills with honey, and dissolved under the tongue before swallowing. For patients with constipation, add *Da Huang* (Radix et Rhizoma Rhei). Today, this formula may be prepared as a decoction with the dose of *Ren Shen* (Radix et Rhizoma Ginseng) suggested in brackets. Note: One variation of this formula contains 6g of *Bo He* (Herba Menthae) and omits *Ren Shen* (Radix et Rhizoma Ginseng).

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and eliminates toxin
2. Dispels wind and disperses pathogenic factors

CLINICAL MANIFESTATIONS

Da tou wen (swollen head epidemic) with the presence of wind, heat, and toxin in the upper *jiao* and head: redness, swelling and pain of the face and head; red and swollen eyes, difficulty in opening the eyes; fever, aversion to cold, a sore throat, thirst, a dry, red tongue with a yellow tongue coating, and a rapid, forceful pulse.

Pǔ Jì Xiāo Dú Yīn (Universal Benefit Decoction to Eliminate Toxin)

CLINICAL APPLICATIONS

Epidemic hemorrhagic fever, respiratory tract infection, common cold, influenza, severe sore throat, infectious parotitis, acute tonsillitis, lymphadenitis, purulent inflammation and abscess of the face and head, erysipelas, herpes, carbuncles, boils, testitis, myocarditis, and conjunctivitis.

EXPLANATION

Pu Ji Xiao Du Yin (Universal Benefit Decoction to Eliminate Toxin) treats *da tou wen* (swollen head epidemic), an epidemic disease characterized by redness, swelling and pain of the face and head caused by wind, heat and toxin attacking the face and head. If the wind, heat, and toxin invade the head region, redness, swelling and pain of the face and head, difficulty in opening the eyes, sore throat, and thirst may result. Fever and aversion to cold suggest that the disease (wind-heat) is located at the exterior. The yellow tongue coating and rapid, forceful pulse suggest excess interior heat.

Huang Qin (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis), the chief herbs of this formula, clear heat and eliminate toxin from the head. *Niu Bang Zi* (Fructus Arctii), *Lian Qiao* (Fructus Forsythiae), *Bo He* (Herba Menthae) and *Jiang Can* (Bombyx Batryticatus) disperse wind-heat accumulation in the head. *Xuan Shen*

(Radix Scrophulariae), *Ma Bo* (Lasiosphaera seu Calvatia), and *Ban Lan Gen* (Radix Isatidis) clear heat and eliminate toxin. *Xuan Shen* (Radix Scrophulariae) also prevents the heat-clearing, damp-drying herbs from injuring yin. *Jie Geng* (Radix Platycodonis) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) synergistically relieve sore throat, thus helping the heat-clearing herbs. *Chen Pi* (Pericarpium Citri Reticulatae) regulates qi circulation to reduce swelling and inflammation. *Sheng Ma* (Rhizoma Cimicifugae) and *Chai Hu* (Radix Bupleuri), in addition to dispersing wind-heat, guide the other herbs upward to the head region where the condition is most critical. Finally, *Ren Shen* (Radix et Rhizoma Ginseng) tonifies qi, and prevents the bitter and cold heat-clearing herbs from damaging the body. Note: *Ren Shen* (Radix et Rhizoma Ginseng) may be removed from the formula when prescribed for individuals without underlying deficiencies.

MODIFICATIONS

- With constipation, add *Da Huang* (Radix et Rhizoma Rhei).
- If the heat and toxin are severe, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Pu Gong Ying* (Herba Taraxaci).
- With headache, add *Qiang Huo* (Rhizoma et Radix Notopterygii).
- If there are more exterior symptoms, remove *Huang Qin* (Radix Scutellariae) and add *Jing Jie* (Herba Schizonepetae),

Pu Ji Xiao Du Yin (Universal Benefit Decoction to Eliminate Toxin)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Da tou wen</i> (swollen head epidemic)	<ul style="list-style-type: none">• Fever and aversion to cold: exterior wind-heat• Redness, swelling and pain of the face and head, red and swollen eyes, difficulty in opening the eyes, and a sore throat: wind, heat and toxin invade the head region• Thirst: heat consuming body fluids• Dry, red tongue and yellow tongue coating: presence of heat and toxin• Rapid, forceful pulse: excess condition	<ul style="list-style-type: none">• Clears heat and eliminates toxin• Disperses wind and disperses pathogenic factors	<ul style="list-style-type: none">• <i>Huang Qin</i> (Radix Scutellariae) and <i>Huang Lian</i> (Rhizoma Coptidis) clear heat and eliminate toxin from the head.• <i>Niu Bang Zi</i> (Fructus Arctii), <i>Lian Qiao</i> (Fructus Forsythiae), <i>Bo He</i> (Herba Menthae), and <i>Jiang Can</i> (Bombyx Batryticatus) disperse wind-heat accumulation from the head.• <i>Xuan Shen</i> (Radix Scrophulariae), <i>Ma Bo</i> (Lasiosphaera seu Calvatia), and <i>Ban Lan Gen</i> (Radix Isatidis) clear heat and eliminate toxin.• <i>Jie Geng</i> (Radix Platycodonis) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) synergistically relieve sore throat.• <i>Chen Pi</i> (Pericarpium Citri Reticulatae) regulates qi circulation to reduce swelling and inflammation.• <i>Sheng Ma</i> (Rhizoma Cimicifugae) and <i>Chai Hu</i> (Radix Bupleuri) guide the other herbs upward to the head region.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) tonifies qi, and prevents the bitter and cold heat-clearing herbs from damaging the body.

Pǔ Jì Xiāo Dú Yīn (Universal Benefit Decoction to Eliminate Toxin)

Fang Feng (Radix Saposhnikoviae), *Chan Tui* (Periostracum Cicadae) and *Sang Ye* (Folium Mori).

- If the interior heat is severe, remove *Chai Hu* (Radix Bupleuri) and *Bo He* (Herba Menthae), and add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Qing Dai* (Indigo Naturalis), or *Shi Gao* (Gypsum Fibrosum) and *Huang Bo* (Cortex Phellodendri Chinensis).
- For nodules that are hard and difficult to reduce in size, add *Mu Dan Pi* (Cortex Moutan), *Bei Mu* (Bulbus Fritillariae), *Chi Shao* (Radix Paeoniae Rubra), *Si Gua Luo* (Retinervus Luffae Fructus) and *Xia Ku Cao* (Spica Prunellae).
- For patients who are unresponsive to antibiotic drugs or have a stubborn infection, add *Feng Wei Cao* (Herba Pteris), *Zi Hua Di Ding* (Herba Violae), *Hu Yao Huang* (Herba Leucas Mollissimae), and *Da Ding Huang* (Caulis Euonymi).

CAUTIONS / CONTRAINDICATIONS

- *Pu Ji Xiao Du Yin* should be used with caution in patients with deficiencies of yin or body fluids, because this formula is bitter, cold, acrid and dispersing in nature.
- Avoid foods that are pungent, spicy, oily or greasy while taking this formula.¹

PHARMACOLOGICAL EFFECTS

Antibiotic: Numerous herbs in *Pu Ji Xiao Du Yin* have shown marked *in vitro* and *in vivo* antibacterial and antiviral effects.²

CLINICAL STUDIES AND RESEARCH

1. **Epidemic hemorrhagic fever:** Administration of *Pu Ji Xiao Du Yin* was associated with improving the condition of 435 patients with epidemic hemorrhagic fever. The formula was described to be effective in reducing fever, preventing shock, relieving dysuria and anuria, and improving the overall treatment outcome.³
2. **Infectious parotitis:** Modified *Pu Ji Xiao Du Yin* was used successfully in treating 90 children with infectious parotitis (21 cases were diagnosed as wind-heat and 69 as accumulation of heat and toxin). According to the study, the average time was 2.8 days for the reduction of fever (ranging from 1-8 days) and 3.7 days for swelling of the parotid glands (ranging from 2-9 days).⁴ Another study reported good results using modified *Pu Ji Xiao Du Yin* to treat all 100 patients (64 males and 36 females) with infectious parotitis. The study reported that more than 77% of patients had complete recovery within 4 days. The herbal treatment reduced the average duration of illness by 3-5 days.⁵
3. **Respiratory tract infection:** Modified *Pu Ji Xiao Du Yin* was used as an herbal decoction one time daily to treat 35

children with respiratory tract infections and high fever (>39°C / 102.2°F). Within 96 hours, 30 out of 35 patients experienced reduction of fever and other symptoms. The rate of effectiveness was 85.7%. The herbal formula contained *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), *Ban Lan Gen* (Radix Isatidis), *Lian Qiao* (Fructus Forsythiae), *Sheng Ma* (Rhizoma Cimicifugae), *Ma Bo* (Lasiosphaera seu Calvatia), *Jie Geng* (Radix Platycodonis), *Xuan Shen* (Radix Scrophulariae), *Bo He* (Herba Menthae), *Niu Bang Zi* (Fructus Arctii), *Jiang Can* (Bombyx Batryticatus), *Chai Hu* (Radix Bupleuri), *Chen Pi* (Pericarpium Citri Reticulatae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).⁶

4. **Myocarditis:** Modified *Pu Ji Xiao Du Yin* was used to treat 48 patients with acute viral myocarditis characterized by chest pain, tachypnea, feeling of oppression in the chest, palpitations, fever, headache, cough, sore throat, abdominal pain and diarrhea. The herbal decoction was administered one time daily for 15 days per course of treatment. The study reported that out of 48 patients, 16 had complete recovery, 28 showed marked improvement, and 4 showed no change.⁷
5. **Tonsillitis:** Use of modified *Pu Ji Xiao Du Yin* in decoction successfully treated acute suppurative tonsillitis. The herbal formula contained the following ingredients: *Jin Yin Hua* (Flos Lonicerae Japonicae) 15g, *Lian Qiao* (Fructus Forsythiae) 9g, *Ge Gen* (Radix Puerariae Lobatae) 9g, *Ban Lan Gen* (Radix Isatidis) 12g, *Shan Dou Gen* (Radix et Rhizoma Sophorae Tonkinensis) 9g, *Ma Bo* (Lasiosphaera seu Calvatia) 9g, *Jie Geng* (Radix Platycodonis) 9g, *Xuan Shen* (Radix Scrophulariae) 12g, *Shi Gao* (Gypsum Fibrosum) 30g, *Zhu Ye* (Herba Phyllostachys) 9g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g. The dosage was one pack of herbs daily for children 6 years of age or younger, and 3 packs of herbs in two days for children 7 years or older. The herbs were cooked in water to obtain 150 mL of decoction, and taken in two to three equally-divided doses. Of 57 patients with acute suppurative tonsillitis, 88% had normal body temperature within 3 days along with resolution of other signs and symptoms.⁸
6. **Conjunctivitis:** One study reported good results using *Pu Ji Xiao Du Yin* to treat acute conjunctivitis in 164 patients (306 affected eyes). The herbal formula contained *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), *Chen Pi* (Pericarpium Citri Reticulatae), *Xuan Shen* (Radix Scrophulariae), *Chai Hu* (Radix Bupleuri), *Lian Qiao* (Fructus Forsythiae), *Ban Lan Gen* (Radix Isatidis), *Ma Bo* (Lasiosphaera seu Calvatia), *Niu Bang Zi* (Fructus Arctii), *Bo He* (Herba Menthae), *Jiang Can* (Bombyx Batryticatus), and *Sheng Ma* (Rhizoma Cimicifugae). *Chi Shao* (Radix Paeoniae Rubra) and *Chuan Xiong* (Rhizoma Chuanxiong) were added for early-stage conjunctivitis,

Pǔ Jì Xiāo Dú Yīn (Universal Benefit Decoction to Eliminate Toxin)

and *Di Huang* (Radix Rehmanniae) and *Mu Dan Pi* (Cortex Moutan) were added for ocular bleeding. The herbs were given in decoction form daily. The study reported 98.7% effectiveness among 164 patients, with an average of 2.5 days to recovery.⁹

7. **Erysipelas:** One study reported 94.2% effectiveness in treating 52 patients with erysipelas with 2 weeks to 3 years of history of illness. The herbs were decocted, and their residue was applied topically to the affected area. Of 52 cases, the study reported complete recovery in 41 cases, improvement in 8 cases, and no effect in 3 cases.¹⁰

Da Qing Tang (Isatis Decoction) uses equal amounts of the ingredients to clear any type of heat and fire in the upper, middle, and lower *jiaos*. This contemporary formula may be used to treat many different types of infectious and inflammatory disorders throughout the body.

AUTHORS' COMMENTS

Pu Ji Xiao Du Yin is one of the best herbal antibiotic formulas to treat infectious and contagious diseases. The name *Pu Ji Xiao Du Yin* literally means "Universal Benefit Decoction to Eliminate Toxin," which implies that this formula treats everyone (universal benefit) with infectious diseases (heat and toxin).

Pu Ji Xiao Du Yin and *Xian Fang Huo Ming Yin* (Sublime Formula for Sustaining Life) both clear heat and eliminate toxin.

- *Pu Ji Xiao Du Yin* treats toxic heat affecting the upper *jiao* manifesting in symptoms such as redness, swelling, and pain of the face, difficulty in opening the eyes, a sore throat, thirst, and fever. It disperses wind-heat as well as toxin lodged in the head.
- *Xian Fang Huo Ming Yin* clears heat and eliminates toxin. It also moves qi and blood to eradicate nodules, swellings, carbuncles, and sores.

(Three-Yellow Decoction to Sedate the Epigastrium)

三黃瀉心湯

三黄泻心汤

Pinyin Name: *San Huang Xie Xin Tang*

Literal Name: Three-Yellow Decoction to Sedate the Epigastrium

Alternate Names: *Xie Xin Tang* (Drain the Epigastrium Decoction), *San Huang Hsieh Hsin Tang*, Three-Huang Heart-Draining Decoction, Coptis and Rhubarb Combination

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Huang Qin</i> (Radix Scutellariae)	3g [9g]
<i>Huang Lian</i> (Rhizoma Coptidis)	3g
<i>Da Huang</i> (Radix et Rhizoma Rhei)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 3 cups [600 mL] of water and reduce it to 1 cup [200 mL]. Take the warm, strained decoction immediately. Today, use the dose of *Huang Qin* (Radix Scutellariae) suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Purges fire and dries dampness

CLINICAL MANIFESTATIONS

Damp-heat in all three *jiaos*: hemoptysis, epistaxis, jaundice, chest oppression, irritability and restlessness, red eyes, swelling and pain of eyes, tongue and mouth ulcerations, external abscesses and sores, and constipation.

CLINICAL APPLICATIONS

1. Bleeding disorders (hemoptysis, epistaxis, hemorrhoidal bleeding, intestinal bleeding, gastrointestinal bleeding, hematuria, uterine bleeding, subcutaneous bleeding).
2. Gastrointestinal disorders (gastroenteritis, stomatitis, habitual constipation, dysentery, hemorrhoids).
3. Dermatological diseases (furuncles, carbuncles, urticaria).
4. Liver and gallbladder disorders (hepatitis, jaundice).
5. Others (sleep apnea, neurasthenia, neurosis, schizophrenia, conjunctivitis, trigeminal neuralgia, arteriosclerosis, cerebrovascular accident).

EXPLANATION

San Huang Xie Xin Tang (Three-Yellow Decoction to Sedate the Epigastrium) is one of the strongest formulas for treating damp-heat accumulation throughout the body, including in the upper, middle, and/or lower *jiaos*. Heat in the blood will cause reckless movement of the blood, leading to bleeding from various parts of the body, as in hemoptysis and epistaxis. Damp-heat accumulation in

the upper *jiao* causes irritability, restlessness, and a feeling of oppression in the chest. Damp-heat accumulation in the Liver causes jaundice, as well as redness, swelling, and pain of the eyes. Damp-heat accumulation in the Stomach causes a sore throat and tongue and mouth ulcerations. Damp-heat accumulation in the lower *jiao* causes constipation. Damp-heat accumulation may also affect the skin, causing abscesses and sores. Clinically, damp-heat may affect many other parts of the body, manifesting in other signs and symptoms as well.

While damp-heat causes a wide variety of complications and disorders, the treatment strategy is rather simple. Only three herbs are required to manage and treat these conditions. *Huang Qin* (Radix Scutellariae), bitter and cold, enters the upper *jiao* to clear heat, purge fire, and dry dampness. *Huang Lian* (Rhizoma Coptidis), bitter and cold, enters the middle *jiao* to clear heat, purge fire, and dry dampness. *Da Huang* (Radix et Rhizoma Rhei), bitter and cold, enters the lower *jiao* to clear heat, purge fire, and eliminate toxins. All three herbs have a similar function of clearing damp-heat, yet they each focus on different parts of the body. The combination of these three herbs has a synergistic effect in relieving pain, stopping bleeding, reducing inflammation, and treating infection.

MODIFICATIONS

- With thirst due to dryness and heat, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).
- With delirium, add *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and *Yu Jin* (Radix Curcumae).
- For icteric jaundice, add *Yin Chen* (Herba Artemisiae Scopariae), *Zhi Zi* (Fructus Gardeniae), and *Che Qian Cao* (Herba Plantaginis).
- With bleeding gums, add *Mang Xiao* (Natrii Sulfas).

Sān Huáng Xiè Xīn Tāng

(Three-Yellow Decoction to Sedate the Epigastrium)

San Huang Xie Xin Tang (Three-Yellow Decoction to Sedate the Epigastrium)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Damp-heat in the three <i>jiaos</i>	<ul style="list-style-type: none"> Irritability, restlessness, and a feeling of chest oppression: damp-heat in the upper <i>jiao</i> Jaundice with redness, swelling and pain of the eyes: damp-heat in the Liver (middle <i>jiao</i>) Sore throat and ulcerations of the tongue and mouth: damp-heat in the Stomach (middle <i>jiao</i>) Constipation: damp-heat in the lower <i>jiao</i> 	Purges fire and dries dampness	<ul style="list-style-type: none"> <i>Huang Qin</i> (Radix Scutellariae) enters the upper <i>jiao</i> to clear heat, purge fire, and dry dampness. <i>Huang Lian</i> (Rhizoma Coptidis) enters the middle <i>jiao</i> to clear heat, purge fire, and dry dampness. <i>Da Huang</i> (Radix et Rhizoma Rhei) enters the lower <i>jiao</i> to clear heat, purge fire, and eliminate toxins.

- For severe constipation, add *Mang Xiao* (Natrii Sulfas), *Zhi Shi* (Fructus Aurantii Immaturus), and *Hou Po* (Cortex Magnoliae Officinalis).
- With bleeding due to heat in the *xue* (blood) level, add *Mu Dan Pi* (Cortex Moutan) and *Di Huang* (Radix Rehmanniae).
- For severe abscesses and sores, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), and *Zi Hua Di Ding* (Herba Viola).

CAUTIONS / CONTRAINDICATIONS

- San Huang Xie Xin Tang* contains bitter and cold herbs that may damage the Spleen and Stomach. Thus, it should be discontinued when the desired effects are achieved. It should not be taken at large doses nor for a prolonged period of time.
- This formula is contraindicated during pregnancy and nursing, and in individuals with deficiency and cold of the Spleen and Stomach.¹

PHARMACOLOGICAL EFFECTS

Gastroprotective: Use of *San Huang Xie Xin Tang* was found to have a protective effect on the gastrointestinal tract by inhibiting the gastric acid secretion via inhibition of H,K-ATPase activity. *San Huang Xie Xin Tang*, given 30 minutes earlier, has a protective effect on the gastric mucosa against drugs such as aspirin, HCL-aspirin, and ethanol. However, it was found to be ineffective against gastric lesions induced by indomethacin.^{2,3}

CLINICAL STUDIES AND RESEARCH

- Gastrointestinal bleeding:** *San Huang Xie Xin Tang* was shown in many studies to effectively treat various types of gastrointestinal bleeding. In one study, administration of *San Huang Xie Xin Tang* in 60 patients (50 males and 10 females; between 14 and 70 years of age) was associated with
- Upper gastrointestinal bleeding:** Daily use of modified *San Huang Xie Xin Tang* in decoction was associated with complete recovery in 31 of 34 patients with acute and profuse bleeding from the upper gastrointestinal tract. The herbal formula contained *Da Huang* (Radix et Rhizoma Rhei) 10g, *Huang Lian* (Rhizoma Coptidis) 10g, *Huang Qin* (Radix Scutellariae) 12g, *Xian He Cao* (Herba Agrimoniae) 10g, *Ce Bai Ye* (Cacumen Platycladi) 15g, *Mu Dan Pi* (Cortex Moutan) 15g and *Xiao Ji* (Herba Cirsii) 15g. Individuals with severe loss of blood also received blood transfusions.⁴
- Lower gastrointestinal bleeding:** One study reported satisfactory results using modified *San Huang Xie Xin Tang* to treat 50 patients with hematochezia. The herbal formula contained *Da Huang* (Radix et Rhizoma Rhei) 15g, *Qian Cao* (Radix et Rhizoma Rubiae) 15g, *Zhi Zi* (Fructus Gardeniae) 10g, *Ou Jie* (Nodus Nelumbinis Rhizomatis) 10g, *Ce Bai Ye* (Cacumen Platycladi) 10g, *Huang Lian* (Rhizoma Coptidis) 10g, *Huang Qin* (Radix Scutellariae) 12g, and *Di Yu* (Radix Sanguisorbae) 12g. Furthermore, *Di Huang* (Radix Rehmanniae) and *Shi Hu* (Caulis Dendrobii) were added for individuals with a desire to drink water. Of 50 cases, the study reported complete recovery in 45 cases, improvement in 4 cases, and no change in 1 case.⁶
- Sleep apnea:** A 76-year-old male with obstructive sleep apnea syndrome was successfully treated with *San Huang Xie Xin Tang*. Polysomnography, performed before and after herbal treatment, showed a significant reduction in both the apnea index and the apnea plus hypopnea index.

Sān Huáng Xiè Xīn Tāng

(Three-Yellow Decoction to Sedate the Epigastrium)

The mechanism for successful treatment of sleep apnea was attributed to alleviating upper airway resistance during sleep.⁷

AUTHORS' COMMENTS

Huang Lian Jie Du Tang (Coptis Decoction to Relieve Toxicity) and *San Huang Xie Xin Tang* both clear heat and eliminate toxins.

- *Huang Lian Jie Du Tang* clears heat and eliminates toxins from all three *jiaos*.
- *Xie Xin Tang*, with the addition of *Da Huang* (Radix et Rhizoma Rhei), has a purgative action in addition to its heat-clearing and detoxifying effects; therefore, it is more suitable for patients who have constipation caused by accumulation of heat and toxins.

Diagnosis	Signs and Symptoms	Treatment	Herbs
Presence of heat and toxins in the interior	<ul style="list-style-type: none">• Irritability, delirium and incoherent speech: heat and toxins affecting the Heart and disturbing the <i>shen</i> (spirit)• Thirst, constipation and dysuria: heat and toxins consuming body fluids	Clears heat and eliminates toxins	<ul style="list-style-type: none">• <i>Huang Qin</i> (Radix Scutellariae), <i>Huang Lian</i> (Rhizoma Coptidis), <i>Huang Bo</i> (Cortex Phellodendri Chinensis) and <i>Zhi Zi</i> (Fructus Gardeniae) clear heat and eliminate toxins in all three <i>jiaos</i>.• <i>Shi Gao</i> (Gypsum Fibrosum) and <i>Zhi Mu</i> (Rhizoma Anemarrhenae) clear heat and promote the generation of fluids.• <i>Xuan Shen</i> (Radix Scrophulariae) clears deficiency heat from the <i>ying</i> (nutritive) and <i>xue</i> (blood) levels.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

to delirium and incoherent speech. Finally, heat and toxins may consume body fluids, leading to thirst, constipation, and dysuria.

Huang Qin (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), and *Huang Bo* (Cortex Phellodendri Chinensis) clear heat and eliminate toxins from the upper, middle, and lower *jiaos* respectively. *Zhi Zi* (Fructus Gardeniae) is added to ensure that heat and toxins are eliminated from all three *jiaos*. *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae) clear heat and promote the generation of fluids, while *Xuan Shen* (Radix Scrophulariae) clears deficiency heat from the *ying* (nutritive) and *xue* (blood) levels. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

MODIFICATIONS

- When the heat and toxins are more pronounced, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae).
- With restlessness, irritability, and thirst, increase the doses of *Zhi Mu* (Rhizoma Anemarrhenae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- With irritability and thirst as a result of summer-heat, add *Gan Lu Yin* (Sweet Dew Decoction).
- For acute hepatitis, add *Yin Chen* (Herba Artemisiae Scopariae) and *Long Dan* (Radix et Rhizoma Gentianae).

RELATED FORMULA

Sān Huáng Shí Gāo Tāng
(Three-Yellow and Gypsum Decoction)

三黃石膏湯
三黃石膏湯

Pinyin Name: San Huang Shi Gao Tang
Literal Name: Three-Yellow and Gypsum Decoction
Original Source: Shang Han Liu Shu (Six Texts on Cold-Induced Disorders) by Tao Hua in 1445

<i>Huang Lian</i> (Rhizoma Coptidis)	[3-6g]
<i>Huang Qin</i> (Radix Scutellariae)	[3-6g]
<i>Huang Bo</i> (Cortex Phellodendri Chinensis)	[3-6g]
<i>Zhi Zi</i> (Fructus Gardeniae)	[3-6g]
<i>Ma Huang</i> (Herba Ephedrae)	[3-6g]
<i>Shi Gao</i> (Gypsum Fibrosum)	[6-12g]
<i>Dan Dou Chi</i> (Semen Sojae Praeparatum)	[3-6g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	[3-6g]
<i>Da Zao</i> (Fructus Jujubae)	[2-5g]
<i>Cha Ye</i> (Folium Camelliae)	[2-5g]

This formula treats heat and toxins in the interior, with residual exterior conditions. Therefore, in addition to the heat-clearing herbs, this formula contains exterior-releasing herbs to dispel the exterior pathogenic factors, such as *Ma Huang* (Herba Ephedrae), *Dan Dou Chi* (Semen Sojae Praeparatum), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Cha Ye* (Folium Camelliae)

These two formulas have the exact same name, but are derived from different source texts and have slightly different herbs and functions.

- *San Huang Shi Gao Tang* from *Wai Ke Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments in External Medicine) treats heat and toxins located deep in the interior, without any exterior conditions.
- *San Huang Shi Gao Tang* from *Shang Han Liu Shu* (Six Texts on Cold-Induced Disorders) treats heat and toxins in the interior with residual exterior conditions.

AUTHORS’ COMMENTS

According to Dr. Chang Wei-Yen, *San Huang Shi Gao Tang* can be combined with *Wen Qing Yin* (Warming and Clearing Decoction) to treat various dermatological disorders ranging from rashes or itching, to dermatitis and eczema caused by dryness.

Liu Shen Wan (Six-Miracle Pill)

六神丸 六神丸

Pinyin Name: *Liu Shen Wan*

Literal Name: Six-Miracle Pill

Original Source: *Gu Jin Ming Fang* (Famous Classic and Contemporary Formulas) by Luo Mei in 1675

COMPOSITION

<i>Chan Su</i> (Venenum Bufonis)	3g
<i>Niu Huang</i> (Calculus Bovis)	4.5g
<i>Xiong Huang</i> (Realgar)	3g
<i>She Xiang</i> (Moschus)	4.5g
<i>Bing Pian</i> (Borneolum Syntheticum)	3g
<i>Zhen Zhu</i> (Margarita)	4.5g

Note: *Xiong Huang* (Realgar) is a potentially toxic heavy metal, and *She Xiang* (Moschus) is derived from an endangered animal. Both are rarely used as medicinal substances today. The discussion here is included primarily for academic purposes, to reflect the historical use of these substances in their original formulations. Most herbal products today have removed them completely, or replaced them with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind all substances into a fine powder. Dissolve *Chan Su* (Venenum Bufonis) in a grain-based liquor, and then add in the remaining powdered herbs to form pills. The pills should resemble *Bai Jie Zi* (Semen Sinapis) in size, and should be coated with *Bai Cao Shuang* (Pulvis Fumi Carbonisatus). Take 5-10 pills per day, two to three times daily. This formula may also be used topically.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and eliminates toxins
2. Reduces inflammation and relieves pain

CLINICAL MANIFESTATIONS

Presence of heat and toxins: unilateral or bilateral pustular tonsillitis, a sore and swollen throat and difficulty in swallowing, diphtheria, stomatitis, high fever with convulsions in infants, and throat cancer. It is also used for sores, abscesses, cellulitis, and various skin disorders.

CLINICAL APPLICATIONS

Herpes zoster, tonsillitis, pharyngitis, sore and swollen throat, throat cancer, diphtheria, stomatitis, chronic

hepatitis, septicemia, angina, nephritis, leukemia, vaginitis, lymphangitis, mastitis, appendicitis, otitis media, periodontitis, and pulpitis.

EXPLANATION

Liu Shen Wan (Six-Miracle Pill) treats patterns of heat and toxins characterized by inflammation and pain. Internally, it is used for conditions such as tonsillitis, a sore and swollen throat, diphtheria, stomatitis, and throat cancer. Externally, it may be used to treat various types of dermatological disorders, such as sores, abscesses, cellulitis, and various skin disorders.

Chan Su (Venenum Bufonis), *Niu Huang* (Calculus Bovis), and *Xiong Huang* (Realgar) clear heat and eliminate toxins. *She Xiang* (Moschus) invigorates blood circulation and opens the channels and collaterals to assist the other herbs in clearing heat and eliminating toxins. *Bing Pian* (Borneolum Syntheticum) clears heat and relieves itching and pain. *She Xiang* (Moschus), *Chan Su* (Venenum Bufonis), and *Bing Pian* (Borneolum Syntheticum) also enhance the effects of the other herbs to clear heat and eliminate toxins. *Zhen Zhu* (Margarita) promotes healing and relieves itching.

CAUTIONS / CONTRAINDICATIONS

- *Liu Shen Wan* contains many potentially toxic herbs, such as *Chan Su* (Venenum Bufonis) and *Xiong Huang* (Realgar). Therefore, it is contraindicated during pregnancy and must be used with caution in individuals with underlying weakness and deficiency.
- While taking this herbal formula, refrain from smoking and drinking alcohol, and do not consume foods that are pungent or spicy.¹

CLINICAL STUDIES AND RESEARCH

1. **Herpes zoster:** Fifty-four patients with herpes zoster were successfully treated using topical application of *Liu Shen Wan*. The treatment protocol was to blend *Liu Shen Wan* with rice vinegar into an herbal paste, which was applied topically to the affected area three times daily. Of 54 patients, 31 had complete recovery within 1 day, 18 within 2 days, 4 within 3 days, and 1 after 4 days. None of the patients experienced post-herpetic neuralgia. No side effects were reported.² According to another study, *Liu Shen Wan* was used both internally and externally to treat 32 patients with herpes zoster. The treatment protocol was to ingest 10 pills twice daily for 6-8 days. The topical preparation was made by crushing the pills into a powder and then mixing it with essential oils to make an herbal paste. The herbal paste was applied to the affected area two to three times daily for 3-5 days. Lastly, vitamins B₁ and B₁₂ were also given via intramuscular injection. Of 32 cases, the study reported complete recovery in 18 cases within 3 days, 10 cases within 4 days, 3 cases within 5 days, and 1 case after 6 days.³
2. **Tonsillitis:** Topical application of a modified *Liu Shen Wan* was associated with 95.1% effectiveness in treating tonsillitis in 32 patients. The herbs were prepared by crushing 10 pills of *Liu Shen Wan* and one *Quan Xie* (Scorpio) into a powder, and then mixing it with rice vinegar to make a paste. The herbal paste was applied topically to the affected area for 12 hours per course of

treatment. Of 32 patients, 23 had significant improvement within 24 hours, and 7 after 48 hours.⁴

3. **Others:** This formula has also been used to treat chronic hepatitis, septicemia, angina, nephritis, leukemia, cancer, vaginitis, pharyngitis, lymphangitis, mastitis, appendicitis, otitis media, diphtheria, periodontitis, and pulpitis.

TOXICOLOGY

Use of *Liu Shen Wan* has been associated with itching, restlessness, irritability, pallor, nausea, vomiting, cold extremities, palpitations, sedation, dyspnea and chest congestion. Overdose may cause nausea, vomiting, diarrhea, abdominal pain, gastrointestinal irritation, dyspnea, respiratory depression, sedation, weak pulse, bradycardia, an irregular heartbeat, yellow discoloration of the skin, and general symptoms of dryness.⁵ Note: These reactions are usually attributed to *Chan Su* (Venenum Bufonis) and *Xiong Huang* (Realgar), two substances that are considered potentially toxic.

[6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends to grind equal amounts of the ingredients into powder. Cook 9g of the powder with *Zhu Ye* (Herba Phyllostachys) in one large bowl of water until half of the liquid remains. Take the warm decoction after meals. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Clears the Heart and nourishes yin
2. Promotes urination and relieves *lin zheng* (dysuria syndrome)

CLINICAL MANIFESTATIONS

Excess fire in the Heart channel: fidgeting, irritability, warm sensations in the chest, thirst, a red face, a desire to drink cold water, and mouth and tongue ulcerations. If the heat migrates from the Heart to the Small Intestine channel, dark-colored urine, hematuria or dysuria will occur.

CLINICAL APPLICATIONS

Urinary tract infection, dysuria, urethritis, cystitis, glomerulonephritis, herpes zoster, oral herpes, stomatitis, oral cavity infection, infectious parotitis, and infertility.

EXPLANATION

Dao Chi San (Guide Out the Red Powder) is a representative formula for treating excess fire in the Heart and Small Intestine channels. The Heart is the organ that houses the mind. If the Heart is attacked by heat, fidgeting, irritability and warm sensations in the chest may occur. A red face and a desire to drink cold water result from an exuberance of heat traveling upwards. The tongue is the sensory organ of the Heart, therefore excess fire in the Heart channel may cause mouth and tongue ulcerations. The Small Intestine has a yin/yang, exterior/interior relationship with the Heart; consequently, heat in the Heart may migrate to and affect the Small Intestine. As a result, urination disorders such as dysuria, dark-colored urine, or hematuria occur.

To effectively treat this heat syndrome, the Heart fire must be cleared and urination promoted to guide the heat downward and out of the body. The chief herb in this formula, *Mu Tong* (Caulis Akebiae) sedates Heart fire, promotes urination to lead heat out of the body, and relieves dysuria. *Di Huang* (Radix Rehmanniae) clears heat and nourishes yin. Together, they clear heat without damaging yin, and nourish yin without retaining heat. *Zhu Ye* (Herba Phyllostachys) clears Heart fire and relieves

Dǎo Chì Sǎn (Guide Out the Red Powder)

Dao Chi San (Guide Out the Red Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Excess fire in the Heart and/or Small Intestine channels	<ul style="list-style-type: none">• Fidgeting and irritability: heat attacking Heart and disturbing <i>shen</i> (spirit)• Thirst with a desire to drink cold water: heat consuming body fluids• Red face and mouth and tongue ulcerations: excess fire rising upward• Dysuria with dark-colored urine: excess fire affecting the Heart and Small Intestine	<ul style="list-style-type: none">• Clears the Heart and nourishes yin• Promotes urination and relieves <i>lin zheng</i> (dysuria syndrome)	<ul style="list-style-type: none">• <i>Mu Tong</i> (Caulis Akebiae) sedates fire from the Heart and Small Intestine.• <i>Di Huang</i> (Radix Rehmanniae) clears heat and nourishes yin.• <i>Zhu Ye</i> (Herba Phyllostachys) clears Heart fire and relieves fidgeting and irritability.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) clears heat and eliminates toxins

fidgeting and irritability. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) clears heat, eliminates toxins, and prevents the cold tendency of *Di Huang* (Radix Rehmanniae) and *Mu Tong* (Caulis Akebiae) from injuring the Stomach.

MODIFICATIONS

- With irritability and heat in the chest, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- For *xue lin* (bloody dysuria), add *Mo Han Lian* (Herba Ecliptae), *Xiao Ji* (Herba Cirsii), *Hou Po* (Cortex Magnoliae Officinalis), and *Qu Mai* (Herba Dianthi).
- For *re lin* (heat dysuria) characterized by frequent and painful urination, add *Feng Wei Cao* (Herba Pteris), *Bai Mao Gen* (Rhizoma Imperatae), *Shi Wei* (Folium Pyrrosiae), *Che Qian Zi* (Semen Plantaginis), and *Chi Fu Ling* (Poria Rubra).
- With fever and thirst, add *Hua Shi* (Talcum) and *Shi Gao* (Gypsum Fibrosum).
- With stomatitis and ulcerations in the mouth, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), and *Huang Lian* (Rhizoma Coptidis).
- When there is cystitis, add *Huang Qin* (Radix Scutellariae), *Deng Xin Cao* (Medulla Junci), and *Zhi Zi* (Fructus Gardeniae).
- For infants who cry and cannot sleep at night, add *Zhen Zhu Mu* (Concha Margaritiferae) and *Gou Teng* (Ramulus Uncariae cum Uncis).
- With severe edema, combine with *Wu Ling San* (Five-Ingredient Powder with Poria).
- For exanthema maculosum, add *Sheng Ma* (Rhizoma Cimicifugae), *Huang Lian* (Rhizoma Coptidis), and *Mu Dan Pi* (Cortex Moutan).

CAUTIONS / CONTRAINDICATIONS

- *Dao Chi San* should be used with caution in patients with Stomach and Spleen deficiencies because most herbs

in this formula are cold and may damage the digestive tract.

- This formula may not be appropriate for individuals with repetitive stomatitis.
- Avoid foods that are pungent, spicy, oily or greasy while taking this herbal formula.¹

CLINICAL STUDIES AND RESEARCH

1. **Urinary tract infection:** In one clinical trial, 95 out of 100 patients with urinary tract infection were treated successfully with *Dao Chi San*. Five women who did not respond were later determined to have mycotic infection.²
2. **Lin zheng (dysuria syndrome):** Administration of modified *Dao Chi San* to 14 patients with *lin zheng* (dysuria syndrome) was associated with complete recovery in 10 cases, improvement in 2 cases, and no effect in 2 cases. The herbal treatment contained *Dao Chi San* plus *Jin Yin Hua* (Flos Lonicerae Japonicae), *Tu Fu Ling* (Rhizoma Smilacis Glabrae), *Dan Zhu Ye* (Herba Lophatheri), and *Zhi Zi* (Fructus Gardeniae) as the base formula, with the addition of *Qing Hao* (Herba Artemisiae Annuae) and *Chai Hu* (Radix Bupleuri) for fever; *Huo Xiang* (Herba Agastaches) and *Ban Xia* (Rhizoma Pinelliae) for nausea and vomiting; *Bai Mao Gen* (Rhizoma Imperatae) and a larger dose of *Zhi Zi* (Fructus Gardeniae) for hematuria; and *Che Qian Zi* (Semen Plantaginis) for edema.³
3. **Oral herpes:** Thirty patients with stomatitis due to oral herpes were treated with modified *Dao Chi San* with marked success. The herbal treatment used *Dao Chi San* as the base formula, with the addition of *Huang Lian* (Rhizoma Coptidis) and *Mai Dong* (Radix Ophiopogonis) for irritability, thirst and red tongue tip; and *Da Huang* (Radix et Rhizoma Rhei) and *Huang Qin* (Radix Scutellariae) for constipation. Out of 30 cases, the study reported marked improvement in 20 cases (within 2 days), moderate improvement in 8 cases (within 3 days), and no improvement in 2 cases.⁴

Dǎo Chì Sǎn (Guide Out the Red Powder)

4. **Herpes zoster:** Use of modified *Dao Chi San* was associated with 100% effectiveness in treating all 12 patients with herpes zoster affecting various parts of the body (rib cage, hypochondrium, lower back, abdominal area, and legs). The herbal formula contained *Dao Chi San* plus *Xi Xin* (Radix et Rhizoma Asari), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *Lian Qiao* (Fructus Forsythiae). Furthermore, *Chai Hu* (Radix Bupleuri) was added for herpes zoster affecting the upper body, and *Niu Xi* (Radix Achyranthis Bidentatae) for lower body. Of 12 patients, 5 patients recovered within 3-4 packs of herbs, and 7 after 6-8 packs of herbs.⁵
5. **Infectious parotitis:** Twenty-four patients with infectious parotitis (mumps) were treated with an herbal decoction with complete recovery in all cases. The herbal formula incorporated *Dao Chi San* with *Lian Qiao* (Fructus Forsythiae), *Huang Bo* (Cortex Phellodendri Chinensis), *Zhi Mu* (Rhizoma Anemarrhenae), *Hua Shi* (Talcum), *Ban Lan Gen* (Radix Isatidis), *Da Qing Ye* (Folium Isatidis), *Jin Yin Hua* (Flos Lonicerae Japonicae), *Dan Zhu Ye* (Herba Lophatheri), and *Zhi Zi* (Fructus Gardeniae). The duration of treatment ranged from 1 to 4 packs of herbs.⁶
6. **Infertility:** One study reported 93.35% effectiveness using modified *Dao Chi San* to treat 43 cases of male infertility caused by chronic prostatitis or seminal vesiculitis. The herbal formula contained *Di Huang* (Radix Rehmanniae) 30g, *Chi Shao* (Radix Paeoniae Rubra) 50g, *Fu Ling* (Poria) 15g, *Mu Tong* (Caulis Akebiae) 10g, *Ze Xie* (Rhizoma Alismatis) 10g, *Huang Bo* (Cortex Phellodendri Chinensis) 6g, *Dan Zhu Ye* (Herba Lophatheri) 10g, *Mu Dan Pi* (Cortex Moutan) 10g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 15g, *Hong Hua* (Flos Carthami) 6g, *Jin Yin Hua* (Flos Lonicerae Japonicae) 30g, and *Yu Xing Cao* (Herba Houltuyniae) 30g. Modifications included addition of *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) for cloudy urine; *Xu Duan* (Radix Dipsaci) for low back pain; *Bai Shao* (Radix Paeoniae Alba) for swelling of the genital area; *Nu Zhen Zi* (Fructus Ligustri Lucidi) and *Mo Han Lian* (Herba Ecliptae) for presence of a large number of white blood cells in the seminal fluids; *Pu Gong Ying* (Herba Taraxaci) and *Hua Shi* (Talcum) for presence of pus; and *He Shou Wu* (Radix Polygoni Multiflori) and *Gou Qi Zi* (Fructus Lycii) for decreased lecithin. The treatment protocol was to administer the herbs in decoction daily for 30 days per course of treatment. All patients were instructed to avoid

smoking and alcohol during the treatment period. Of 43 cases, the study reported improved physical condition in 41 cases, and successful pregnancy in 19 cases.⁷

AUTHORS' COMMENTS

The key symptoms that indicate the use of *Dao Chi San* include burning urination that is dark colored and ulcerations or sores in the mouth, especially on the tongue. These two symptoms indicate that the heat in the Heart has transferred to the Small Intestine, thereby causing urinary dysfunction.

A question is sometimes raised that if *Dao Chi San* treats excess heat and fire in the Heart, why does the formula contain *Di Huang* (Radix Rehmanniae) but not *Huang Lian* (Rhizoma Coptidis)? According to Chinese medical history, *Dao Chi San* was originally designed in the Song Dynasty to treat children with Heart fire leading to bruxism. Because this formula was intended for children, whose patterns can easily alternate between heat and cold and excess and deficiency, *Di Huang* (Radix Rehmanniae) is used as a safe, yet effective herb to clear heat and nourish yin at the same time. *Huang Lian* (Rhizoma Coptidis), on the other hand, is not as suitable for children or for conditions with underlying constitutional deficiency, because this strong heat-clearing herb may further damage yin. *Huang Lian* (Rhizoma Coptidis) would be a good alternative to clear Heart fire only if it is used in relatively healthy adults or in conditions characterized by excess Heart fire. This is why in the original formulation for the treatment of excess Heart heat and fire in children, *Di Huang* (Radix Rehmanniae) was selected for its efficacy and safety.⁸

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Lian Zi</i> (Semen Nelumbinis)	22.5g [15g]
<i>Mai Dong</i> (Radix Ophiopogonis)	15g [10g]
<i>Huang Qin</i> (Radix Scutellariae)	15g [10g]
<i>Di Gu Pi</i> (Cortex Lycii)	15g [10g]
<i>Fu Ling</i> (Poria)	22.5g [15g]
<i>Che Qian Zi</i> (Semen Plantaginis)	15g [10g]
<i>Huang Qi</i> (Radix Astragali), <i>mi zhi</i> (fried with honey)	22.5g [15g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	22.5g [15g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	15g [10g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder. Cook 9g of the powder in 1.5 large bowl of water until 80% of the liquid remains. Cool the strained decoction and take it before meals on an empty stomach. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

overexertion; seminal emissions, turbid urine, abnormal uterine bleeding, and leukorrhea.

CLINICAL APPLICATIONS

Nephrotic syndrome, glomerulonephritis, pyelonephritis, pyelitis, nephritis, cystitis, inflammation of the urinary tract, urinary tract infection, prostatic hypertrophy, urolithiasis, nephrolithiasis, and diabetes mellitus.

CHINESE THERAPEUTIC ACTIONS

- 1. Clears Heart fire
- 2. Tonifies qi and yin
- 3. Treats *lin zheng* (dysuria syndrome) with turbidity

EXPLANATION

Qing Xin Lian Zi Yin (Lotus Seed Decoction to Clear the Heart) treats Heart fire with qi and yin deficiencies and damp-heat in the lower *jiao*. This complicated condition is often due to excessive worry and thinking, or excessive indulgence in alcohol and sex. As a result of either mental or physical overexertion, there is excess heat and fire disturbing the Heart, leading to symptoms such as

CLINICAL MANIFESTATIONS

Heart fire with qi and yin deficiencies and damp-heat in the lower *jiao*: irritability, restlessness, a dry mouth and tongue, fever; depression, physical and mental

irritability, restlessness, and depression. Overindulgence in sex or alcohol depletes Kidney yin, causing abnormal genitourinary functions.

Lian Zi (Semen Nelumbinis) and *Mai Dong* (Radix Ophiopogonis) clear heat and fire from the Heart. *Huang Qin* (Radix Scutellariae) and *Di Gu Pi* (Cortex Lycii) clear heat and relieve thirst. *Fu Ling* (Poria) and *Che Qian Zi* (Semen Plantaginis) dispel damp-heat and promote normal urination. *Huang Qi* (Radix Astragali), *Ren Shen* (Radix et Rhizoma Ginseng), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify qi and facilitate recovery.

MODIFICATIONS

- With prominent fire and severe deficiency, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis).
- With fever, add *Chai Hu* (Radix Bupleuri) and *Bo He* (Herba Menthae).

CAUTIONS / CONTRAINDICATIONS

Qing Xin Lian Zi Yin is contraindicated in *lin zheng* (dysuria syndrome) or leukorrhea caused by damp-heat in the Liver and Gallbladder.

PHARMACOLOGICAL EFFECTS

Hypoglycemic: According to a clinical study, administration of *Qing Xin Lian Zi Yin* was associated with a reduction of blood glucose level in patients with non-insulin dependent diabetes mellitus (NIDDM). Out of 20 patients who participated in the study, 84.2% showed a positive effect.¹

CLINICAL STUDIES AND RESEARCH

1. **Diabetes mellitus:** Administration of *Qing Xin Lian Zi Yin* was shown to be effective in the treatment of type II diabetes mellitus. The treatment protocol was to administer 10g of this formula in pills three times daily before meals, for 30 days per course of treatment. Of 50 cases, the study reported significant results in 21 cases, moderate results in 18 cases, and no effect in 11 cases.²
2. **Nephrotic syndrome:** One study reported good results using modified *Qing Xin Lian Zi Yin* to treat patients with nephrotic syndrome characterized by Kidney yin deficiency, Lung and Spleen qi deficiencies, and deficiency fire. The herbal formula contained *Di Gu Pi* (Cortex Lycii) 25g, *Huang Qin* (Radix Scutellariae) 15g, *Di Huang* (Radix Rehmanniae) 15g, *Tai Zi Shen* (Radix Pseudostellariae) 15g, *Huang Qi* (Radix Astragali) 15g, *Che Qian Zi* (Semen Plantaginis) 15g, *Mai Dong* (Radix Ophiopogonis) 12g, *Fu Ling* (Poria) 12g, *Chai Hu* (Radix Bupleuri) 10g, *Shan Zhu Yu* (Fructus Corni) 10g, *Bai Mao Gen* (Rhizoma Imperatae)

30g, *Shi Wei* (Folium Pyrrosiae) 30g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g. Additional modifications were made as needed based on the condition of the patients. The herbs were given for approximately six months to stabilize the condition.³

3. **Glomerulonephritis:** Administration of modified *Qing Xin Lian Zi Yin* was found to be effective in treating acute glomerulonephritis, characterized by Kidney qi and yin deficiencies accompanied by yin-deficient fire. The herbal formula contained *Di Gu Pi* (Cortex Lycii) 15g, *Huang Qin* (Radix Scutellariae) 10g, *Mai Dong* (Radix Ophiopogonis) 10g, *Lian Zi Xin* (Plumula Nelumbinis) 6g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, *Bai Mao Gen* (Rhizoma Imperatae) 30g, *Huang Qi* (Radix Astragali) 12g, *Che Qian Zi* (Semen Plantaginis) 12g, *Shi Wei* (Folium Pyrrosiae) 20g, *Da Ji* (Herba Cirsii Japonici) 20g, and *Xiao Ji* (Herba Cirsii) 20g. The herbs were administered in decoction daily for approximately 5 months. Improvements were noted in most patients after about 15 packs of herbs. Clinical improvement included relief of night perspiration, improved appetite, improved sleeping pattern, and reduced number of cells in the urine. After the condition stabilized, the patients were then given *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) for further consolidation.⁴
4. **Pyelonephritis:** One study reported success using modified *Qing Xin Lian Zi Yin* to treat pyelonephritis characterized by Heart and Kidney yin deficiencies with damp-heat affecting the Urinary Bladder. The herbal formula contained *Di Gu Pi* (Cortex Lycii) 15g, *Che Qian Zi* (Semen Plantaginis) 15g, *Bai He* (Bulbus Lilii) 15g, *Huang Qin* (Radix Scutellariae) 15g, *Mai Dong* (Radix Ophiopogonis) 12g, *Lian Zi* (Semen Nelumbinis) 12g, *Fu Ling* (Poria) 12g, *Bai Wei* (Radix et Rhizoma Cynanchi Atrati) 12g, *Pu Gong Ying* (Herba Taraxaci) 30g, *Huang Qi* (Radix Astragali) 20g, and *Yi Yuan San* (Benefit the Basal Powder) 18g. The above herbs were cooked in water and the decoction was taken daily, for 50 packs of herbs. The study reported normalization of all signs and symptoms, with no recurrence in follow-up exams.⁵

AUTHORS' COMMENTS

Qing Xin Lian Zi Yin can also be used for postpartum irritability, thirst, and heat caused by the sudden depletion of blood leading to yin-deficient heat.

Zhi Zi Chi Tang (Gardenia and Soja Decoction)

梔子豉湯 梔子豉汤

Pinyin Name: *Zhi Zi Chi Tang*
Literal Name: Gardenia and Soja Decoction
Alternate Names: *Chih Tzu Ku Tang, Zhi Zi Gu Tang*, Gardenia and Fermented Soybean Decoction, Cape Jasmine and Prepared Soybean Decoction, Gardenia and Soja Combination
Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Zhi Zi</i> (Fructus Gardeniae)	14 pieces [9g]
<i>Dan Dou Chi</i> (Semen Sojae Praeparatum)	0.4 cup [9g]

DOSAGE / PREPARATION / ADMINISTRATION

First cook *Zhi Zi* (Fructus Gardeniae) in 4 cups [800 mL] of water, and reduce it to 2.5 cups [500 mL]. Add in *Dan Dou Chi* (Semen Sojae Praeparatum), and cook it until the liquid is reduced to 1.5 cups [300 mL]. Take the warm, strained decoction in two equally-divided doses.

CHINESE THERAPEUTIC ACTIONS

- 1. Clears heat and relieves irritability
- 2. Resolves congestion in the chest and epigastrium

CLINICAL MANIFESTATIONS

A general feeling of weakness and deficiency, irritability, insomnia, fullness and congestion in the chest and epigastrium, lack of appetite, and a yellow tongue coating.

CLINICAL APPLICATIONS

Insomnia, neurasthenia, acute cholecystitis, acute icteric jaundice, acute gastritis, and esophagitis.

EXPLANATION

Zhi Zi Chi Tang (Gardenia and Soja Decoction) is for patients who complain of weakness and irritability following inappropriate treatment of an exterior syndrome with *han fa* (sweating), *tu fa* (vomiting) or *xia fa* (draining downwards). These improper treatments result in a loss of body fluids and the patient will feel weak

and deficient. Moreover, the exterior factor moves inwards and transforms into heat in the chest and diaphragm and disturbs the Heart *shen* (spirit). As a result, patients have irritability, insomnia, and a sensation of fullness and congestion in the chest and diaphragm areas.

This simple formula contains only two herbs: *Zhi Zi* (Fructus Gardeniae) clears heat from the Heart and relieves irritability; and *Dan Dou Chi* (Semen Sojae Praeparatum) purges residual heat from the chest and diaphragm areas. These two herbs work synergistically to clear heat in the chest and epigastrium in a deficient patient.

MODIFICATIONS

- When accompanied by a dry mouth, a bitter taste, and a yellow tongue coating, add *Lian Qiao* (Fructus Forsythiae), *Huang Qin* (Radix Scutellariae), and *Lu Gen* (Rhizoma Phragmitis).
- With nausea and vomiting, add *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Zhu Ru* (Caulis Bambusae in Taenia).

CAUTIONS / CONTRAINDICATIONS

Zhi Zi Chi Tang should be used with caution in cases of diarrhea caused by deficiency and cold of the Spleen and Stomach.

<i>Chai Hu</i> (Radix Bupleuri)	[6g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	[6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction. Note: Doses of herbs are unavailable from the source text. Suggested doses, however, are listed above in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Sedates excess fire in the Liver and Gallbladder
2. Clears damp-heat in the lower *jiao*

CLINICAL MANIFESTATIONS

1. Flaring of excess fire in the Liver and Gallbladder: headache, red eyes, hypochondriac pain, a bitter taste in the mouth, deafness, and swollen or painful inner ears.
2. Damp-heat in the lower *jiao*: swelling and itching of the external genitalia, sweating in the groin, dysuria, turbid urine, and yellow, foul-smelling leukorrhea in women.

CLINICAL APPLICATIONS

Hypertension, hepatitis, hepatic cirrhosis, acute icteric hepatitis, acute cholecystitis, gastritis, upper gastrointestinal bleeding, erythematosis, urinary tract infection, urethritis, cystitis, nephritis, shingles, herpes zoster, chancre, gonorrhea, syphilis, leukemia, orchitis, prostatitis, male sexual dysfunction, Bartholin's disease, eczema of the scrotum, erysipelas, pelvic inflammatory disease, polycystic ovary syndrome, endometriosis, fallopian tube infection, oophoritis, prolapsed uterus, mastitis, cervicitis, abnormal vaginal discharge, Behcet's disease, acute conjunctivitis, acute otitis media, allergic rhinitis, oral lichen planus, hyperthyroidism, migraine, diabetes mellitus, and sciatica.

EXPLANATION

Long Dan Xie Gan Tang (Gentiana Decoction to Drain the Liver) treats excess fire in the Liver and Gallbladder. When excess fire in the Liver channel travels upward, it produces headache, painful eyes and ears, or deafness. When excess fire follows the channel to the hypochondriac region, hypochondriac pain and a bitter taste in the mouth occur. If it is the case of damp-heat, then the damp-heat follows the Liver channel downward to the lower *jiao* to cause swelling and itching of the external genitalia, sweating of the groin, dysuria with turbid urine, and, in the case of women, foul-smelling leukorrhea.

Long Dan (Radix et Rhizoma Gentianae), an extremely bitter and cold herb, sedates fire in the Liver and Gallbladder and clears damp-heat in the lower *jiao*. *Huang Qin* (Radix Scutellariae) and *Zhi Zi* (Fructus Gardeniae) help *Long Dan* (Radix et Rhizoma Gentianae) sedate fire and damp-heat in all three *jiaos*. To minimize the bitter and cold herbs in this formula from damaging the stomach, *Huang Qin* (Radix Scutellariae) is dry-fried, and *Long Dan* (Radix et Rhizoma Gentianae) and *Zhi Zi* (Fructus Gardeniae) are dry-fried with liquor. *Ze Xie* (Rhizoma Alismatis), *Mu Tong* (Caulis Akebiae), and *Che Qian Zi* (Semen Plantaginis) dispel damp-heat through the urine. In this syndrome, blood and yin may be consumed as a result of both the excess fire and the bitter cold herbs in this formula, so *Di Huang* (Radix Rehmanniae) and *Dang Gui* (Radix Angelicae Sinensis) are added to nourish and protect yin and blood. *Chai Hu* (Radix Bupleuri) regulates Liver qi and guides all of the herbs to the Liver. *Gan*

Lóng Dǎn Xiè Gān Tāng (Gentiana Decoction to Drain the Liver)

Long Dan Xie Gan Tang (Gentiana Decoction to Drain the Liver)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Excess fire in the Liver and Gallbladder	<ul style="list-style-type: none"> Headache, a bitter taste in the mouth, painful eyes and ears, or deafness: excess fire traveling upward along the Liver channel Hypochondriac pain: excess fire traveling along the Liver channel Swelling and itching of the external genitalia, sweating of the groin, dysuria, and leukorrhea in women: damp-heat traveling downward to the lower <i>jiao</i> 	<ul style="list-style-type: none"> Sedates excess fire in the Liver and Gallbladder Clears damp-heat in the lower <i>jiao</i> 	<ul style="list-style-type: none"> <i>Long Dan</i> (Radix et Rhizoma Gentianae) sedates fire in the Liver and Gallbladder and clears damp-heat in the lower <i>jiao</i>. <i>Huang Qin</i> (Radix Scutellariae) and <i>Zhi Zi</i> (Fructus Gardeniae) sedate fire and damp-heat in all three <i>jiaos</i>. <i>Ze Xie</i> (Rhizoma Alismatis), <i>Mu Tong</i> (Caulis Akebiae) and <i>Che Qian Zi</i> (Semen Plantaginis) dispel damp-heat through the urine. <i>Di Huang</i> (Radix Rehmanniae) and <i>Dang Gui</i> (Radix Angelicae Sinensis) nourish and protect yin and blood. <i>Chai Hu</i> (Radix Bupleuri) regulates Liver qi and guides the herbs to the Liver. <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

Cao (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

- For itchy nipples, add *Ju Ye* (Folium Citri Reticulatae) and *Fo Shou* (Fructus Citri Sarcodactylis).

MODIFICATIONS

- With constipation, add *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas).
- With dysuria, add *Yin Chen* (Herba Artemisiae Scopariae) and *Fu Ling* (Poria).
- If there is acute glaucoma, add *Xuan Shen* (Radix Scrophulariae) and *Qiang Huo* (Rhizoma et Radix Notopterygii).
- With redness, swelling, and pain of the eyes, add *Chuan Xiong* (Rhizoma Chuanxiong) and *Ju Hua* (Flos Chrysanthemi).
- With urinary tract infection, add *Bian Xu* (Herba Polygoni Avicularis), *Qu Mai* (Herba Dianthi), *Bai Mao Gen* (Rhizoma Imperatae), and *Lian Qiao* (Fructus Forsythiae).
- When there is more visual disturbance, add *Ju Hua* (Flos Chrysanthemi) and *Jue Ming Zi* (Semen Cassiae); or *Xi Gan Ming Mu San* (Wash the Liver and Brighten the Eyes Powder).
- When there is more dampness, remove *Huang Qin* (Radix Scutellariae) and *Di Huang* (Radix Rehmanniae), and add *Hua Shi* (Talcum) and *Yi Yi Ren* (Semen Coicis); or *Ba Zheng San* (Eight-Herb Powder for Rectification).
- With redness and swelling of the scrotum or sores on the penis, remove *Chai Hu* (Radix Bupleuri) and add *Lian Qiao* (Fructus Forsythiae), *Huang Lian* (Rhizoma Coptidis), and *Da Huang* (Radix et Rhizoma Rhei).
- With itching in the genital regions, use *She Chuang Zi* (Fructus Cnidii) and *Ku Shen* (Radix Sophorae Flavescens) topically as a wash on the affected area.

CAUTIONS / CONTRAINDICATIONS

- Long Dan Xie Gan Tang* should be used with caution in patients with deficiency and cold in the Spleen and Stomach, since this formula is cold and may injure the Spleen and Stomach to cause vomiting or diarrhea.
- This formula is contraindicated in patients with yang, yin, and/or blood deficiencies.
- This formula is contraindicated for prolonged use and should be discontinued once the desired effect is achieved.

PHARMACOLOGICAL EFFECTS

- Antibiotic:** Decoction of *Long Dan Xie Gan Tang* was associated with marked antibacterial effects, especially against beta-hemolytic streptococcus.¹
- Anti-inflammatory:** Oral administration of *Long Dan Xie Gan Tang* in decoction was associated with marked anti-inflammatory effects in mice, with maximum effect observed 4 to 6 hours after ingestion. The mechanism of action is attributed to an inhibitive effect on blood vessel permeability.²
- Immunostimulant:** Oral administration of *Long Dan Xie Gan Tang* decoction at 50 g/kg was associated with increased phagocytic activity in mice within 3-6 hours.³
- Antiallergic:** Oral administration of *Long Dan Xie Gan Tang* decoction at 10 g/kg for 2 days was effective in minimizing shock and death caused by severe allergic reaction.⁴

Lóng Dǎn Xiè Gān Tāng (Gentiana Decoction to Drain the Liver)

5. **Cardiovascular:** *Long Dan Xie Gan Tang* was associated with marked hypotensive effects in anesthetized cats. The mechanisms of action were attributed to its effect of lowering heart rate, decreasing force of heart contraction, and dilation of blood vessels.⁵

CLINICAL STUDIES AND RESEARCH

1. **Hypertension:** In one study, modified *Long Dan Xie Gan Tang* was used to treat patients with hypertension with 88.89% effectiveness.⁶ In another report, it was mentioned that *Long Dan Xie Gan Tang* is most effective for hypertension with headache, irritability, insomnia, thirst, a bitter taste in the mouth, dysuria, and a wiry, rapid pulse.⁷ Lastly, 100 hypertensive patients characterized by Liver fire rising had good results when treated with a herbal formula that contained *Long Dan Xie Gan Tang* plus *Xia Ku Cao* (*Spica Prunellae*), *Jue Ming Zi* (*Semen Cassiae*), *Gou Teng* (*Ramulus Uncariae cum Uncis*), and others.⁸
2. **Hepatitis:** *Long Dan Xie Gan Tang* was shown in many studies to be effective in treating hepatitis. In one study, 32 patients with non-icteric hepatitis were treated with *Long Dan Xie Gan Tang* with complete recovery in 27 patients, some improvement in 4 patients, and no change in one patient.⁹ In another study, 30 patients with icteric hepatitis were treated with *Long Dan Xie Gan Tang* with good results. The study reported improvement in most patients within 3-9 days, with jaundice resolving after 21.5 days and liver enzymes returning to normal after 30.8 days.¹⁰ Lastly, one study of 40 patients with icteric jaundice reported 87.5% effectiveness using modified *Long Dan Xie Gan Tang* in decoction for 14 days per course of treatment.¹¹
3. **Cholecystitis:** In one report, 8 patients with acute cholecystitis were treated with complete recovery in all patients using *Long Dan Xie Gan Tang* with the addition of *Ku Lian Pi* (*Cortex Meliae*) and *Da Huang* (*Radix et Rhizoma Rhei*).¹² Another study reported similar success using *Long Dan Xie Gan Tang* with the addition of *Yin Chen* (*Herba Artemisiae Scopariae*) and *Da Huang* (*Radix et Rhizoma Rhei*).¹³ Lastly, 81 patients with acute cholecystitis were treated with 96.2% effectiveness using *Long Dan Xie Gan Tang* plus *Yin Chen* (*Herba Artemisiae Scopariae*), *Chuan Lian Zi* (*Fructus Toosendan*), and *Da Huang* (*Radix et Rhizoma Rhei*).¹⁴
4. **Gastritis:** Forty-seven patients with gastritis (characterized by damp-heat in the Spleen and Stomach, or Liver and Stomach heat) were treated with *Long Dan Xie Gan Tang* with significant improvement in 14 patients, moderate improvement in 31 patients, and no effect in 2 patients.¹⁵
5. **Upper gastrointestinal bleeding:** In one study, 200 patients with upper gastrointestinal bleeding were treated with modified *Long Dan Xie Gan Tang* with 98% effectiveness. The stools tested negative for the presence of blood within an average of 4 days.¹⁶
6. **Erythematosis:** Thirty-five patients with erythematosis were treated with good results using *Long Dan Xie Gan Tang* plus *Zhi Qiao* (*Fructus Aurantii*) and *Da Huang* (*Radix et Rhizoma Rhei*). Patients were given herbs three times daily, for 5 days (with 2 days of rest) per week, for 4 weeks per course of treatment, for 3 courses total. Of 35 patients, the study reported complete recovery in 24 patients, improvement in 8 patients and no benefit in 3 patients.¹⁷
7. **Urinary tract infection:** Eight patients with acute or chronic urinary tract infection were treated with *Long Dan Xie Gan Tang* with complete recovery in 6 patients and improvement in 2 patients.¹⁸ In another report, 52 patients with acute or chronic pyelonephritis were treated with *Long Dan Xie Gan Tang* with complete recovery in 48 patients and improvement in 4 patients. The average time for recovery was 6.9 days.¹⁹
8. **Leukemia:** The effectiveness of *Long Dan Xie Gan Tang* was evaluated for treating acute leukemia characterized by damp-heat of the Liver and Gallbladder. Out of 26 patients with leukemia, 14 had significant improvement, 10 had moderate improvement, and 2 had no effect. The rate of effectiveness was 92.3% for the treatment. The herbal treatment included *Long Dan Xie Gan Tang* plus *Xia Ku Cao* (*Spica Prunellae*), *Ban Zhi Lian* (*Herba Scutellariae Barbatae*), and *Bai Hua She She Cao* (*Herba Hedyotis*) as the base formula. Modifications included addition of *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins) and *Huang Lian Jie Du Tang* (*Coptis Decoction to Relieve Toxicity*) for excess heat; and *Xiang Sha Liu Jun Zi Tang* (*Six-Gentlemen Decoction with Aucklandia and Amomum*) for gastrointestinal disturbances.²⁰
9. **Hyperthyroidism:** Eighteen hyperthyroid patients with elevated T3 and T4 were treated with *Long Dan Xie Gan Tang* with significant improvement in 6 patients, moderate improvement in 11 patients, and no change in 1 patient.²¹
10. **Migraine:** In one study, 20 patients with migraine were treated with modified *Long Dan Xie Gan Tang* with satisfactory results. The study reported that the addition of *Ju Hua* (*Flos Chrysanthemi*) and a large dose of *Bai Shao* (*Radix Paeoniae Alba*) were effective in enhancing the analgesic effect to relieve migraine.²²
11. **Diabetes mellitus:** According to one study, 36 patients with diabetes mellitus characterized by obesity and elevated cholesterol and triglyceride levels were treated with modified *Long Dan Xie Gan Tang* with significant improvement in 28 patients, moderate improvement in 5 patients, and slight improvement in 3 patients. The treatment protocol was to administer the decoction twice

Lóng Dǎn Xiè Gān Tāng (Gentiana Decoction to Drain the Liver)

daily. The herbal treatment included *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Long Dan* (Radix et Rhizoma Gentianae), *Zhi Zi* (Fructus Gardeniae), *Ze Xie* (Rhizoma Alismatis), *Mu Tong* (Caulis Akebiae), *Che Qian Zi* (Semen Plantaginis), *Di Huang* (Radix Rehmanniae), *Chai Hu* (Radix Bupleuri), *Fang Ji* (Radix Stephaniae Tetrandrae), *Can Sha* (Faeces Bombycis), and *Lian Zi Xin* (Plumula Nelumbinis).²³

12. Shingles: *Long Dan Xie Gan Tang* was shown in many studies to be effective in treating herpes infection. In one report, 64 patients with shingles were treated with recovery in 49 patients, marked improvement in 12 patients, and moderate improvement in 3 patients. The treatment protocol was to administer *Long Dan Xie Gan Tang* plus *Sheng Ma* (Rhizoma Cimicifugae) for shingles above the waist, or instead add *Niu Xi* (Radix Achyranthis Bidentatae) for below the waist.²⁴ In another study, 318 of 336 patients had complete recovery from herpes zoster after using *Long Dan Xie Gan Tang* for 3-5 days.²⁵ In yet another study, 41 out of 45 patients with herpes zoster had complete recovery using modified *Long Dan Xie Gan Tang*. Treatment effects included healing of the lesions and pain relief.²⁶

13. Sciatica: Administration of *Long Dan Xie Gan Tang* in 61 patients with sciatica was associated with significant relief in 23 patients, improvement in 36 patients, and no effect in 2 patients. The patients were instructed to cook the herbs in water, and drink the decoction in two equally-divided doses. Sciatica was characterized as damp-heat in the Liver channel leading to pain and discomfort. The herbal formula included *Long Dan Xie Gan Tang* plus *Hu Zhang* (Rhizoma et Radix Polygoni Cuspidati), *Di Long* (Pheretima), and others as deemed necessary.²⁷

14. Orchitis: In one study using modified *Long Dan Xie Gan Tang*, 36 patients with acute orchitis were treated with significant improvement in all patients. Modifications were made based on the individual conditions. For swelling and pain of the testicles, *Yan Hu Suo* (Rhizoma Corydalis) and *Chuan Lian Zi* (Fructus Toosendan) were added. For swelling and hardening of the testicles, *Di Huang* (Radix Rehmanniae) was removed, and *Ju He* (Semen Citri Reticulatae), *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) were added. For hematuria, *Hu Zhang* (Rhizoma et Radix Polygoni Cuspidati) and *Bai Mao Gen* (Rhizoma Imperatae) were added. For frequent urination with burning sensation and pain, *Huang Bo* (Cortex Phellodendri Chinensis) and *Shi Wei* (Folium Pyrrosiae) were added. For orchitis with prostatitis, *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) and *Li Zhi He* (Semen Litchi) were added. For those with concurrent *lin zheng* (dysuria syndrome) and urethritis, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) was removed

and *Tu Fu Ling* (Rhizoma Smilacis Glabrae) and *Bi Yu San* (Jasper Powder) were added.²⁸ In another report, 12 patients with orchitis were treated with complete recovery in all patients using *Long Dan Xie Gan Tang* with *Chuan Lian Zi* (Fructus Toosendan), *Yan Hu Suo* (Rhizoma Corydalis), and *Li Zhi He* (Semen Litchi).²⁹

15. Prostatitis: Forty-four patients with prostatitis characterized by damp-heat were treated with modified *Long Dan Xie Gan Tang* with complete recovery in 16 patients, significant improvement in 12 patients, moderate improvement in 13 patients, and no effect in 3 patients. The overall rate of effectiveness was 93.2%. The herbal treatment contained *Long Dan Xie Gan Tang* as the base formula, with the addition of *Bai Jiang Cao* (Herba cum Radice Patriniae), *Pu Gong Ying* (Herba Taraxaci) and a large dose of *Long Dan* (Radix et Rhizoma Gentianae) for damp-heat with a bitter taste in the mouth; *Ze Lan* (Herba Lycopi), *Ru Xiang* (Gummi Olibanum), *Tao Ren* (Semen Persicae) and *Chi Shao* (Radix Paeoniae Rubra) for hardening of the prostate; and *Yin Yang Huo* (Herba Epimedii) and *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) for sexual dysfunction.³⁰ In another report, 30 patients with chronic prostatitis were treated with modified *Long Dan Xie Gan Tang* with complete recovery in 18 patients, significant improvement in 8 patients, moderate improvement in 2 patients, and no benefit in 2 patients. The overall rate of effectiveness was 93.3%.³¹

16. Male sexual dysfunction: According to one study on treatment of inability to ejaculate, the use of modified *Long Dan Xie Gan Tang* successfully treated all 9 men who experienced such sexual dysfunction. The base formula contained *Long Dan Xie Gan Tang* plus *Zhi Mu* (Rhizoma Anemarrhenae), *Hai Piao Xiao* (Endoconcha Sepiae), and *Qian Cao* (Radix et Rhizoma Rubiae). Modifications included addition of *Ze Xie* (Rhizoma Alismatis) and *Che Qian Zi* (Semen Plantaginis) for damp; larger doses of *Long Dan* (Radix et Rhizoma Gentianae), *Zhi Zi* (Fructus Gardeniae), and *Huang Bo* (Cortex Phellodendri Chinensis) for heat; *Er Zhi Wan* (Two-Ultimate Pill), *Bie Jia* (Carapax Trionycis), and a large dose of *Di Huang* (Radix Rehmanniae) for Liver and Kidney yin deficiencies; and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Tu Fu Ling* (Rhizoma Smilacis Glabrae) and *Chuan Lian Zi* (Fructus Toosendan) for abnormally sticky sperm in nocturnal emissions.³²

17. Bartholinitis: Concurrent use of herbs orally and topically in 35 patients with inflammation of the Bartholin's gland was associated with complete recovery in 23 patients, improvement in 10 patients, and no effect in 2 patients. The herbal treatment included *Long Dan Xie Gan Tang* plus *Pu Gong Ying* (Herba Taraxaci), *Zi Hua Di Ding* (Herba Violae), and *Ye Ju Hua* (Flos Chrysanthemi Indici)

Lóng Dǎn Xiè Gān Tāng (Gentiana Decoction to Drain the Liver)

taken orally. Topical herbal treatment included *Da Huang* (Radix et Rhizoma Rhei), *Ye Ju Hua* (Flos Chrysanthemi Indici), *Pu Gong Ying* (Herba Taraxaci), and *Zi Hua Di Ding* (Herba Viola). For topical use, the herbs were cooked in water, and the patient was instructed to soak the affected area in the herbal solution. The duration of treatment was 7 days per course of treatment.³³

18. Eczema of the scrotum: One study reports complete recovery in all 29 patients with acute eczema of the scrotum when treated with *Long Dan Xie Gan Tang* plus *Bai Xian Pi* (Cortex Dictamni), *Di Fu Zi* (Fructus Kochiae), and *Cang Zhu* (Rhizoma Atractylodis). The duration of treatment was 1 week per course of treatment, for 1-3 courses total.³⁴

19. Pelvic inflammatory disease: Seven patients with acute pelvic inflammation were treated with a 100% success rate using *Long Dan Xie Gan Tang* for 6-9 doses. A laxative was used to relieve constipation if necessary.³⁵ Another study of 72 patients with chronic pelvic inflammation were treated with good results using *Long Dan Xie Gan Tang* plus *Huang Qi* (Radix Astragali) and *Xiang Fu* (Rhizoma Cyperi). The patients were instructed to begin taking the herbs after the last day of the period, and to stop taking the herbs when the period began. The duration of treatment was two menstrual cycles per course of treatment.³⁶

20. Polycystic ovary syndrome: One study reported effectiveness using modified *Long Dan Xie Gan Tang* in treating polycystic ovary syndrome. Of 20 patients, 12 were diagnosed with Liver fire, 2 with damp and phlegm accumulation, and 6 with generalized deficiency. In addition to the base formula, *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) were added for constipation. The treatment protocol was to administer 9 grams of herbs per day (in two doses daily) for 3 months. Herbal treatment was temporarily stopped during the periods. Of 20 patients, the study reported marked improvement in 8 patients and moderate improvement in 12 patients.³⁷

21. Prolapsed uterus: In one report, 19 women with prolapsed uterus were treated with *Long Dan Xie Gan Tang* with complete recovery in 6 patients, improvement in 12 patients, and no change in 1 patient.³⁸

22. Mastitis: Use of *Long Dan Xie Gan Tang* produced complete recovery in 92 of 100 patients with mastitis characterized by redness, swelling and pain. The treatment protocol was to cook the herbs in water, and drink the decoction in three equally-divided doses (approximately 50 mL per dose) daily for 7 days.³⁹

23. Cervicitis: In one study, chronic cervicitis characterized by damp-heat in the Liver channel was treated effectively using oral and/or topical application of *Long Dan Xie Gan Tang* plus *Bai Jiang Cao* (Herba cum Radice Patriniae),

Huang Bo (Cortex Phellodendri Chinensis), and *Huang Qi* (Radix Astragali). The herbs were taken daily, for 20 days per course of treatment. The study reported 93.3% effectiveness among 356 patients.⁴⁰

24. Behcet's disease: *Long Dan Xie Gan Tang* was shown in many studies to effectively treat Behcet's disease, a condition that affects the inner lining of the mouth and genitals, and the small blood vessels throughout the body. In one study of 21 patients (9 males and 12 females), duration of use ranging from 20 to 67 days was associated with complete recovery in 18 patients, improvement in 2 patients, and no change in 1 patient. The herbal treatment contained *Long Dan Xie Gan Tang* as the base formula, with addition of *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for qi deficiency; *Mo Han Lian* (Herba Ecliptae) and *Nu Zhen Zi* (Fructus Ligustri Lucidi) for Liver and Kidney yin deficiencies; *Ku Shen* (Radix Sophorae Flavescentis) and *Bai Xian Pi* (Cortex Dictamni) for severe itching; *Da Huang* (Radix et Rhizoma Rhei) for constipation; and *Cang Zhu* (Rhizoma Atractylodis) for dampness.⁴¹

25. Otitis media: Eighty-five patients with chronic pyogenic otitis media were treated with an overall 89% success rate using *Long Dan Xie Gan Tang* with the addition of *Xin Yi Hua* (Flos Magnoliae) and *Cang Er Zi* (Fructus Xanthii).⁴² In another report, 22 patients with acute pyogenic otitis media were treated with complete recovery in 14 patients, improvement in 6 patients, and no effect in 2 patients.⁴³ Lastly, one study of 20 patients with chronic otitis media due to damp-heat in the Liver and Gallbladder channels reported complete recovery in all patients using *Long Dan Xie Gan Tang*. The herbs were administered three times daily for 10 days per course of treatment, for 1-2 courses total.⁴⁴

26. Allergic rhinitis: Thirteen patients with allergic rhinitis were treated with *Long Dan Xie Gan Tang* with complete recovery in 9 patients, improvement in 2 patients, and no effect in 2 patients. The overall rate of effectiveness was 84.62%. The duration of treatment averaged 24 days, with a range of 12-43 days.⁴⁵

27. Oral lichen planus: Fifty-nine patients with oral lichen planus were treated with modified *Long Dan Xie Gan Tang* with complete recovery in 38 patients, improvement in 18 patients, and no effect in 3 patients. The overall rate of effectiveness was 94.92%.⁴⁶

TOXICOLOGY

In acute toxicology studies, oral administration of the formula in mice at 26 g/kg showed no adverse reactions other than a short-term decrease in spontaneous physical activities (activities without a stimulus). No mortality was reported. With intravenous injection, the LD₅₀ was determined to be 72g/kg.⁴⁷

The source text states to grind equal amounts of the ingredients into powder and form with honey into large pills (approximately the size of a chicken's head). Take 0.5-1 pill with brown sugar and a decoction made from *Zhu Ye* (Herba Phyllostachys). Today, the ingredients are normally ground into powder, and formed into small pills with boiled water that has been cooled to room temperature. Take 6g of pills twice daily with warm water that has been boiled or a decoction made from *Zhu Ye* (Herba Phyllostachys). Reduce the dose for children. This formula may be prepared as a decoction using the doses suggested in brackets above.

The main actions of *Xie Qing Wan* (Drain the Green Pill) are to clear Liver heat and purge Liver fire. Clinically, the patient may show red, swollen and painful eyes, fidgeting, irritability, restlessness, anger, insomnia, dark-colored urine, constipation, and a surging, excess pulse. In some patients, this formula may also be used for acute infantile convulsions, high fever, and muscle spasms.

Long Dan Xie Gan Tang and *Xie Qing Wan* (Drain the Green Pill) both clear Liver heat. *Xie Qing Wan* (Drain the Green Pill), however, is the weaker formula of the two in clearing Liver heat. In addition, it does not clear damp-heat from the lower *jiao*.

Zhi Zi Jiang Huo Tang (Gardenia Decoction to Descend Fire) is a variation of *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver) with the addition of *Bai Hu Tang* (White Tiger Decoction) and *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill). It treats heat in the upper, middle and lower jiaos. It clears excess heat in the Stomach, Lung, Liver and deficiency heat in the Kidney. It is a strong formula reserved only for those with severe excess fire signs.

AUTHORS' COMMENTS

Long Dan Xie Gan Tang is one of the most commonly used formulas today. It treats various conditions caused by excess fire in the Liver and Gallbladder, or damp-heat in the lower jiao.

Long Dan Xie Gan Tang, which drains damp-heat, contains blood-tonifying herbs such as *Di Huang* (Radix Rehmanniae) and *Dang Gui* (Radix Angelicae Sinensis) for three main reasons:

- First, this formula treats excess fire flaring upward in the Liver and Gallbladder channels, leading to headache, redness of the eyes, painful eyes, hypochondriac pain, a bitter taste in the mouth, tinnitus, and swelling of the ears. It contains *Long Dan* (Radix et Rhizoma Gentianae), *Huang Qin* (Radix Scutellariae), and *Zhi Zi* (Fructus Gardeniae) to sedate excess fire. Damp-drying herbs such as these are likely to injure yin and cause more flaring of excess heat and Liver fire. Therefore, *Di Huang* (Radix Rehmanniae) and *Dang Gui* (Radix Angelicae Sinensis) are needed to prevent the heat-clearing, damp-drying herbs from damaging yin and blood.
- Second, this formula contains *Che Qian Zi* (Semen Plantaginis), *Mu Tong* (Caulis Akebiae), and *Ze Xie* (Rhizoma Alismatis) to drain damp-heat in the lower jiao to treat genital itching, turbid urine, and yellow leukorrhea. To prevent these herbs from excessively draining dampness and injuring yin and blood, *Di Huang* (Radix Rehmanniae) and *Dang Gui* (Radix Angelicae Sinensis) are added.
- Third, *Chai Hu* (Radix Bupleuri) is used in this formula as a channel-guiding and qi-regulating herb to spread Liver qi. To prevent any possible excessive drying caused by *Chai Hu* (Radix Bupleuri), *Di Huang* (Radix Rehmanniae) and *Dang Gui* (Radix Angelicae Sinensis) are added.⁴⁸

Long Dan Xie Gan Tang, *Xie Qing Wan* (Drain the Green Pill), and *Dang Gui Long Hui Wan* (Tangkuei, Gentiana, and Aloe Pill) all sedate excess fire in the Liver channel. The differences are as follows:

- *Long Dan Xie Gan Tang* sedates Liver fire, drains damp-heat, and protects and nourishes Liver blood. It is mostly used for Liver fire flaring with damp-heat accumulation in the lower jiao.
- *Xie Qing Wan* sedates Liver fire and disperses Liver qi stagnation with fire. It is most appropriate for Liver fire with stagnation.
- *Dang Gui Long Hui Wan* is the most bitter and cold formula of the three, and is designed to purge excess fire in the Liver through urination and defecation. It is an

Lóng Dǎn Xiè Gān Tāng (Gentiana Decoction to Drain the Liver)

extremely strong formula reserved only for patients with excess fire accompanied by *shen* (spirit) disturbance and other severe symptoms.

According to Dr. Chang Wei-Yen, *Long Dan Xie Gan Tang* can be combined with other formulas for the following disorders:

- Migraines and headaches caused by Liver yang rising: use with *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction).
- Headaches in menopausal women caused by flaring of Kidney fire: add *Bai Hu Tang* (White Tiger Decoction) and *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill).
- Various kinds of lower *jiao* infections, such as bladder infection, urinary tract infection, infection of the reproductive organs and chronic pelvic infection: add *Ba Zheng San* (Eight-Herb Powder for Rectification).
- Nephritis and glomerulonephritis: add *Ba Zheng San* (Eight-Herb Powder for Rectification), *Shui Ding Xiang* (Herba Ludwigiae Prostratae) and *Xian Feng Cao* (Herba Bidentis). For chronic nephritis, add *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia).
- Glaucoma and increased pressure in the eyes: add *Ma Bian Cao* (Herba Verbenae), *Qian Li Guang* (Herba Senecionis Scandens), *Hu Zhang* (Rhizoma et Radix Polygoni Cuspidati), *Hu Yao Huang* (Herba Leucas Mollissimae), and *Ba Zheng San* (Eight-Herb Powder for Rectification).

Dāng Guī Lóng Huì Wán (Tangkuei, Gentiana, and Aloe Pill)

當歸龍薈丸 当归龙荟丸

Pinyin Name: *Dang Gui Long Hui Wan*

Literal Name: Tangkuei, Gentiana, and Aloe Pill

Alternate Names: *Tang Kuei Lung Hui Wan*, Tang-kuei, Lung-tan, and Aloe Pill; Chinese Angelica, Gentiana and Aloe Pill; Tangkuei Gentiana and Aloe Formula

Original Source: *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) by Zhu Zhen-Heng in 1481

COMPOSITION

<i>Long Dan</i> (Radix et Rhizoma Gentianae)	15g
<i>Huang Qin</i> (Radix Scutellariae)	30g
<i>Huang Lian</i> (Rhizoma Coptidis)	30g
<i>Huang Bo</i> (Cortex Phellodendri Chinensis)	30g
<i>Zhi Zi</i> (Fructus Gardeniae)	30g
<i>Lu Hui</i> (Aloe)	15g
<i>Da Huang</i> (Radix et Rhizoma Rhei)	15g
<i>Mu Xiang</i> (Radix Aucklandiae)	4.5g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	30g
<i>She Xiang</i> (Moschus)	1.5g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder, mix with honey and form into small pills that resemble the size of small beans. Take 20 pills with a decoction made from *Sheng Jiang* (Rhizoma Zingiberis Recens). Today, the ingredients are normally ground into powder and formed into pills with water. Take 6g of pills per dose twice daily with warm, boiled water. Note: One variation of this formula contains 15g of *Qing Dai* (Indigo Naturalis) and 30g of *Long Dan* (Radix et Rhizoma Gentianae).

CHINESE THERAPEUTIC ACTIONS

Clears and purges excess fire from the Liver and Gallbladder channels

CLINICAL MANIFESTATIONS

Excess fire in the Liver and Gallbladder channels: dizziness, vertigo, tinnitus, loss of hearing, a sore throat, restlessness, constipation, dark, yellow urine, and dysuria. In severe cases, patients may have convulsions, epilepsy, semi-unconsciousness, delirium, restless *shen* (spirit), constipation, and mania.

CLINICAL APPLICATIONS

Hepatitis, cholecystitis, cholelithiasis, biliary ascariasis, gastritis, gastroenteritis, acute arthritis, pain with swelling and inflammation, pharyngitis, otitis media, cystitis, urethritis, vaginitis, chronic myelogenous leukemia, general inflammatory and febrile disorders, and acne.

EXPLANATION

The main action of *Dang Gui Long Hui Wan* (Tangkuei, Gentiana, and Aloe Pill) is to clear excess fire in the Liver and Gallbladder channels. Dizziness, vertigo, tinnitus, loss of hearing, sore throat, restlessness, constipation, dark yellow urine and dysuria are indications of excess fire in the Liver and Gallbladder channels. Epilepsy, semi-unconsciousness, delirium and mania are caused by excess fire disturbing the *shen* (spirit).

Long Dan (Radix et Rhizoma Gentianae), extremely bitter and cold, sedates excess fire in the Liver and Gallbladder and clears damp-heat in the lower *jiao*. *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), *Huang Bo* (Cortex Phellodendri Chinensis), and *Zhi Zi* (Fructus Gardeniae) disperse fire and eliminate damp-heat from the upper, middle, and lower *jiaos*. These herbs clear damp-heat and have excellent anti-inflammatory functions to treat inflammation of various organs and tissues. *Lu Hui* (Aloe) and *Da Huang* (Radix et Rhizoma Rhei) drain downward, and eliminate excess heat and fire through defecation. *Mu Xiang* (Radix Aucklandiae) regulates qi circulation and relieves pain. Since both the excess fire and the bitter cold herbs in this formula have a tendency to consume yin and blood, *Dang Gui* (Radix Angelicae Sinensis) is used to nourish and protect yin and blood. Last, *She Xiang* (Moschus), an aromatic herb, is used to awaken patients who are unconscious or semi-unconscious.

Dāng Guī Lóng Huì Wán (Tangkuei, Gentiana, and Aloe Pill)

Dang Gui Long Hui Wan (Tangkuei, Gentiana, and Aloe Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Excess fire in the Liver and Gallbladder channels	<ul style="list-style-type: none">• Dizziness, vertigo, tinnitus, loss of hearing, sore throat, restlessness, constipation, dark yellow urine and dysuria: excess fire in the Liver and Gallbladder channels• Epilepsy, semi-unconsciousness, delirium, and mania: excess fire disturbing the shen (spirit)	Clears and purges excess fire from the Liver and Gallbladder	<ul style="list-style-type: none">• <i>Long Dan</i> (Radix et Rhizoma Gentianae) sedates excess fire in the Liver and Gallbladder and clears damp-heat in the lower jiao.• <i>Huang Qin</i> (Radix Scutellariae), <i>Huang Lian</i> (Rhizoma Coptidis), <i>Huang Bo</i> (Cortex Phellodendri Chinensis) and <i>Zhi Zi</i> (Fructus Gardeniae) disperse fire and eliminate damp-heat from all three jiaos.• <i>Lu Hui</i> (Aloe) and <i>Da Huang</i> (Radix et Rhizoma Rhei) drain downward, and eliminate heat and fire through defecation.• <i>Mu Xiang</i> (Radix Aucklandiae) regulates qi circulation and relieves pain.• <i>Dang Gui</i> (Radix Angelicae Sinensis) nourishes and protects yin and blood.• <i>She Xiang</i> (Moschus) awakens individuals who are unconscious or semi-unconscious.

MODIFICATIONS

- With irritability, thirst, and fever add *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- With difficulty in urination, add *Mu Tong* (Caulis Akebiae) and *Di Huang* (Radix Rehmanniae).
- With constipation, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis).
- For chronic granulocytic leukemia, add *Qing Dai* (Indigo Naturalis).

CAUTIONS / CONTRAINDICATIONS

- *Dang Gui Long Hui Wan* is a very bitter and cold formula that may injure the Spleen and Stomach. It is contraindicated in patients with deficiency and cold in the middle jiao. Prolonged or heavy use is also contraindicated.
- *Dang Gui Long Hui Wan* should be reserved for a purely excess condition with no deficiency, since most herbs in the formula are sedating or moving in nature. This formula is contraindicated in cases of deficiency.
- This formula is contraindicated during pregnancy.¹
- According to one report, use of this formula may cause side effects such as nausea, vomiting, diarrhea, abdominal pain, stomach discomfort, dizziness and fatigue.²

CLINICAL STUDIES AND RESEARCH

1. **Constipation:** One report involving 6 patients stated that *Dang Gui Long Hui Wan* was effective in treating constipation due to various causes.³
2. **Biliary ascariasis:** *Dang Gui Long Hui Wan* was effective in treating 15 patients with biliary ascariasis who did not respond to earlier treatment with *Wu Mei Wan* (Mume

Pill). No recurrence was found in follow-up exams 3-8 months later.⁴

3. **Acne:** One study reported 85% effectiveness using modified *Dang Gui Long Hui Wan* to treat acne in 20 women (between 17-30 years of age, with 7 months to 2 years of acne). The herbal formula contained *Dang Gui* (Radix Angelicae Sinensis), *Long Dan* (Radix et Rhizoma Gentianae), *Lu Hui* (Aloe), *Huang Qin* (Radix Scutellariae), *Mu Xiang* (Radix Aucklandiae), *Xiang Fu* (Rhizoma Cyperi), *Chai Hu* (Radix Bupleuri), and *Da Huang* (Radix et Rhizoma Rhei). Moreover, *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) were added before menstruation to move blood and regulate menses; *Bai Shao* (Radix Paeoniae Alba), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Dang Gui Wei* (Extremities Radix Angelicae Sinensis) were added for individuals with scanty menstruation or amenorrhea; and *Huang Lian* (Rhizoma Coptidis) and *Zhi Zi* (Fructus Gardeniae) were added for irritability and constipation. The herbs were administered daily in decoction form for 1 month per course of treatment.⁵

Xǐ Gān Míng Mù Sǎn (Wash the Liver and Brighten the Eyes Powder)

洗肝明目散

Pinyin Name: *Xi Gan Ming Mu San*

Literal Name: Wash the Liver and Brighten the Eyes Powder

Alternate Name: Gardenia and Vitex Combination

Original Source: *Wan Bing Hui Chun* (Restoration of Health from the Myriad Diseases) by Gong Ting-Xian in 1587

COMPOSITION

Dang Gui Wei (Extremities Radix Angelicae Sinensis)

Chi Shao (Radix Paeoniae Rubra)

Chuan Xiong (Rhizoma Chuanxiong)

Di Huang (Radix Rehmanniae)

Huang Lian (Rhizoma Coptidis)

Huang Qin (Radix Scutellariae)

Zhi Zi (Fructus Gardeniae)

Shi Gao (Gypsum Fibrosum)

Qiang Huo (Rhizoma et Radix Notopterygii)

Fang Feng (Radix Saposhnikoviae)

Jie Geng (Radix Platycodonis)

Jing Jie (Herba Schizonepetae)

Bo He (Herba Menthae)

Jue Ming Zi (Semen Cassiae)

Lian Qiao (Fructus Forsythiae)

Man Jing Zi (Fructus Vitis)

Ji Li (Fructus Tribuli)

Ju Hua (Flos Chrysanthemi)

Gan Cao (Radix et Rhizoma Glycyrrhizae)

DOSAGE / PREPARATION / ADMINISTRATION

Grind equal amounts of the herbs into powder, cook in water, and take the warm, strained decoction after meals.

CHINESE THERAPEUTIC ACTIONS

1. Dispels wind-heat
2. Clears Liver heat and fire

CLINICAL MANIFESTATIONS

Wind-heat attacking the eyes: redness, swelling and pain of the eyes, dizziness, and headache.

CLINICAL APPLICATIONS

Sclerotic keratitis, keratitis, iritis, glaucoma, conjunctivitis, and eye infections

EXPLANATION

Xi Gan Ming Mu San (Wash the Liver and Brighten the Eyes Powder) treats various types of eye problems characterized by wind-heat. The presence of wind-heat encourages the rise of Liver heat and fire. Because wind and heat tend to travel upward, they cause symptoms such as redness, swelling, and pain of the eyes.

Dang Gui Wei (Extremities Radix Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubra), *Chuan Xiong* (Rhizoma Chuanxiong), and *Di Huang* (Radix Rehmanniae) tonify the blood, as well as activate and promote the circulation of blood. *Huang Lian* (Rhizoma Coptidis), *Huang Qin* (Radix Scutellariae), *Zhi Zi* (Fructus Gardeniae), and *Shi Gao* (Gypsum Fibrosum) clear heat from the body. *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Feng* (Radix Saposhnikoviae), *Jie Geng* (Radix Platycodonis), *Jing Jie* (Herba Schizonepetae) and *Bo He* (Herba Menthae) are all lifting herbs that clear wind and lead the effects of the other herbs to the head. *Jue Ming Zi* (Semen Cassiae), *Lian Qiao* (Fructus Forsythiae), *Man Jing Zi* (Fructus Vitis), *Ji Li* (Fructus Tribuli), and *Ju Hua* (Flos Chrysanthemi) clear heat from the Liver channel, and are excellent herbs for addressing various types of eye disorders. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

MODIFICATIONS

- If there is more tearing as a result of wind-heat, add *Xia Ku Cao* (Spica Prunellae) and *Xiang Fu* (Rhizoma Cyperi).

Xǐ Gān Míng Mù Sǎn (Wash the Liver and Brighten the Eyes Powder)

Xi Gan Ming Mu San (Wash the Liver and Brighten the Eyes Powder)

- With Liver fire, add *Long Dan* (Radix et Rhizoma Gentianae) and *Chai Hu* (Radix Bupleuri), and remove *Bo He* (Herba Menthae).

PHARMACOLOGICAL EFFECTS

Ocular: One study reported that administration of *Xi Gan Ming Mu San* and *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity) was associated with significantly suppressed ($P < 0.001$) elevation of aqueous flare induced by lipopolysaccharides in rabbits.¹

AUTHORS' COMMENTS

Xi Gan Ming Mu San and *Ming Mu Di Huang Wan* (Improve Vision Pill with Rehmannia) both improve and brighten vision.

- *Xi Gan Ming Mu San* is generally used for infection and inflammation of the eyes, characterized by wind-heat attacking the eyes.
- *Ming Mu Di Huang Wan* is more applicable for deterioration of the eyes due to aging, characterized by Liver and Kidney yin deficiencies.

Xiè Bái Sǎn (Drain the White Powder)

瀉白散 泻白散

Pinyin Name: *Xie Bai San*

Literal Name: Drain the White Powder

Alternate Names: *Xie Fei San* (Drain the Lung Powder), White-Draining Formula, Morus and Lycium Formula

Original Source: *Xiao Er Yao Zheng Zhi Jue* (Craft of Medicinal Treatment for Childhood Disease Patterns) by Qian Yi in 1119

COMPOSITION

<i>Sang Bai Pi</i> (Cortex Mori), <i>chao</i> (dry-fried)	30g [15g]
<i>Di Gu Pi</i> (Cortex Lycii)	30g [15g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	3g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder. Cook the herbs with one pinch of *Geng Mi* (Semen Oryzae) in two small bowls of water until the liquid is reduced to 70%. Take the decoction before meals. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and sedates the Lung
2. Stops coughing and relieves dyspnea

CLINICAL MANIFESTATIONS

Lung heat: coughing, hurried respiration leading to dyspnea; a warm steaming sensation of the skin that is most prominent in the late afternoon; a red tongue body with a yellow coating; and a fine, rapid pulse.

CLINICAL APPLICATIONS

Pneumonia, bronchitis, epistaxis, cough, whooping cough, and asthma.

EXPLANATION

Xie Bai San (Drain the White Powder) treats Lung heat with reversed flow of Lung qi. As heat and fire accumulate in the Lung, they disturb the normal flow of Lung qi and cause it to rise abnormally, leading to coughing, hurried respiration and dyspnea. Warm steaming sensations (especially in the late afternoon) without measurable fever indicate that the yin is gradually being injured and deficiency fire is forming. A red tongue body with a yellow coating suggests accumulation of heat in the body, while a fine, rapid pulse suggests that the heat has damaged yin.

Sang Bai Pi (Cortex Mori) sedates Lung fire, clears Lung heat, and corrects the reversed flow of Lung qi. *Di Gu Pi* (Cortex Lycii) helps clear Lung heat and cools the warm, steaming sensations of the skin in the late afternoons. *Geng Mi* (Semen Oryzae) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) nourish and strengthen Lung and Stomach qi.

MODIFICATIONS

- For cough caused by dry heat, add *Bei Mu* (Bulbus Fritillariae), *Gua Lou Pi* (Pericarpium Trichosanthis),

Xie Bai San (Drain the White Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Coughing caused by Lung heat	<ul style="list-style-type: none"> • Coughing, hurried respiration and dyspnea: Lung heat causing reversed flow of Lung qi • Warm, steaming sensations of the skin (especially in the late afternoon): heat damaging yin with deficiency heat affecting the skin • Red tongue body and a yellow coating: heat in the body • Fine, rapid pulse: heat damaging yin 	<ul style="list-style-type: none"> • Clears heat and sedates the Lung • Stops coughing and relieves dyspnea 	<ul style="list-style-type: none"> • <i>Sang Bai Pi</i> (Cortex Mori) sedates Lung fire, clears stagnant heat, and corrects the reversed flow of Lung qi. • <i>Di Gu Pi</i> (Cortex Lycii) clears Lung heat and cools the warm steaming sensations of the skin. • <i>Geng Mi</i> (Semen Oryzae) and <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) nourish and strengthen Lung and Stomach qi.

Xiè Bái Sǎn (Drain the White Powder)

Sha Shen (Radix Glehniae seu Adenophorae), and *Ku Xing Ren* (Semen Armeniacae Amarum).

- If there is alternation of chills and fever, add *Chai Hu* (Radix Bupleuri) and *Bai Shao* (Radix Paeoniae Alba).
- With thirst with irritability, add *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- With cough and wheezing, add *Ku Xing Ren* (Semen Armeniacae Amarum) and *Jie Geng* (Radix Platycodonis).
- With qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).
- With tidal fever due to yin deficiency, add *Qing Hao* (Herba Artemisiae Annuae), *Bie Jia* (Carapax Trionycis), and *Yin Chai Hu* (Radix Stellariae).
- When there is Lung abscess, add *Bei Mu* (Bulbus Fritillariae), *Zi Wan* (Radix et Rhizoma Asteris), *Jie Geng* (Radix Platycodonis), *Dang Gui* (Radix Angelicae Sinensis), and *Gua Lou Zi* (Semen Trichosanthis).
- With more heat in the Lung, add *Huang Qin* (Radix Scutellariae) and *Zhi Mu* (Rhizoma Anemarrhenae).

CAUTIONS / CONTRAINDICATIONS

Xie Bai San is contraindicated in cases of cough caused by wind-cold or deficiency and cold.

CLINICAL STUDIES AND RESEARCH

1. **Cough:** One study reported beneficial results using modified *Xie Bai San* to treat children with chronic cough. The herbal treatment used *Xie Bai San* as the base formula, and added *Zi Su Zi* (Fructus Perillae) and *Kuan Dong Hua* (Flos Farfarae) for individuals who have dyspnea; *Ban Xia* (Rhizoma Pinelliae) for profuse phlegm; *Shan Zha* (Fructus Crataegi) for poor appetite; and *Dong Gua Zi* (Semen Benincasae) for constipation.¹
2. **Whooping cough:** Modified *Xie Bai San* was used to treat 63 patients with whooping cough with most reporting improved symptoms within 4-8 packs of herbs.²
3. **Pneumonia:** Fifty-eight children with pneumonia and cough were treated with modified *Xie Bai San* with 96.5% effectiveness. The study reported complete recovery in 48 cases, improvement in 8 cases, and no effect in 2 cases. The herbal treatment contained *Sang Bai Pi* (Cortex Mori) 6g, *Di Gu Pi* (Cortex Lycii) 6g, *Sha Shen* (Radix Glehniae seu Adenophorae) 6g, *Mai Dong* (Radix Ophiopogonis) 6g, *Huang Qin* (Radix Scutellariae) 3g, *Ku Xing Ren* (Semen Armeniacae Amarum) 3g, *Tao Ren* (Semen Persicae) 3g, *Bai Bu* (Radix Stemonae) 3g, *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) 3g, *Bai Qian* (Rhizoma et Radix Cynanchi Stauntonii) 3g, *Ban Xia* (Rhizoma Pinelliae) 3g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 1g, and *Shan Ci Gu* (Pseudobulbus Cremastrae seu Pleiones) 1-1.5g.³

4. **Epistaxis:** One study reported good results using modified *Xie Bai San* to treat 20 patients with nosebleeds. Modifications included the addition of *Sha Shen* (Radix Glehniae seu Adenophorae), *Yu Zhu* (Rhizoma Polygonati Odorati), *Mai Dong* (Radix Ophiopogonis), and *Sang Ye* (Folium Mori) for Lung dryness with yin deficiency; *Huang Qin* (Radix Scutellariae) and *Di Huang* (Radix Rehmanniae) for Lung heat; *Da Huang* (Radix et Rhizoma Rhei) and *Huang Lian* (Rhizoma Coptidis) for Stomach fire; and *Xi Yang Shen* (Radix Panacis Quinquifolii) and *Di Huang* (Radix Rehmanniae) for qi and yin deficiencies. Of 20 patients, 13 had complete recovery and 7 showed improvement.⁴

RELATED FORMULA

Ting Li Da Zao Xie Fei Tang

(Descurainia and Jujube Decoction to Drain the Lung)

葶歷大棗瀉肺湯

葶蒬大棗泻肺汤

Pinyin Name: *Ting Li Da Zao Xie Fei Tang*

Literal Name: Descurainia and Jujube Decoction to Drain the Lung

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

Ting Li Zi (Semen Descurainiae seu Lepidii),

ao (simmered) until yellow and *dao* (pounded)

into the size of a bullet

[6-9g]

Da Zao (Fructus Jujubae)

12 pieces [4 pieces]

The source text instructs to first cook 12 pieces of *Da Zao* (Fructus Jujubae) in 3 cups [600 mL] of water and reduce it to 2 cups [400 mL]. Discard *Da Zao* (Fructus Jujubae), add *Ting Li Zi* (Semen Descurainiae seu Lepidii), and cook again until it is reduced to 1 cup [200 mL]. Take the decoction immediately. Today, the decoction may be prepared using the doses suggested in brackets.

Ting Li Da Zao Xie Fei Tang (Descurainia and Jujube Decoction to Drain the Lung) primarily sedates the Lung, regulates water, corrects the reversed flow of Lung qi, and relieves dyspnea. Clinically, it is commonly used for coughing and dyspnea with chest fullness and profuse phlegm and saliva.

Xie Bai San and *Ting Li Da Zao Xie Fei Tang* both drain the Lung.

- *Xie Bai San* drains the Lung to relieve coughing due to interior heat.
- *Ting Li Da Zao Xie Fei Tang* drains the Lung and relieves coughing due to the accumulation of phlegm and water.

Xiè Bái Sǎn (Drain the White Powder)

AUTHORS' COMMENTS

Xiè Bái Sǎn, literally “Drain the White Powder,” functions to drain heat from the Lung – the organ associated with the white color according to five elements theory.

Xiè Bái Sǎn is a representative formula for treating cough caused by Lung heat. However, a question is sometimes raised that if *Xiè Bái Sǎn* is formulated to sedate the Lung, why does the formula use *Sang Bai Pi* (Cortex Mori) and *Di Gu Pi* (Cortex Lycii), and not *Shi Gao* (Gypsum Fibrosum) and *Huang Qin* (Radix Scutellariae), to clear heat? Derived from *Xiao Er Yao Zheng Zhi Jue* (Craft of Medicinal Treatment for Childhood Disease Patterns), *Xiè Bái Sǎn* was originally designed for children with Lung heat manifesting in both cough and dyspnea. *Huang Qin* (Radix Scutellariae) was not used because it can dry and damage yin in the process of clearing heat. *Shi Gao* (Gypsum Fibrosum) was also not selected because it is too strong for children's delicate internal organs. In contrast, *Sang Bai Pi* (Cortex Mori) and *Di Gu Pi* (Cortex Lycii) are more suitable, since they gently clear Lung heat and sedate Lung fire.⁵

Xiè Bái Sǎn and *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction) both clear Lung heat to relieve cough and wheezing, but have the following differences:

- *Xiè Bái Sǎn* is designed for children who have accumulation of heat and fire in the Lung leading to qi reversal and gradual body fluid depletion. Aside from cough and wheezing, accompanying symptoms include warm, steaming sensations on the skin, especially in the late afternoon and a fine, rapid pulse. Because the *zang fu* organs in children are still tender, they are much more susceptible to damage. For that reason, the draining herbs

in this formula are milder in nature. *Sang Bai Pi* (Cortex Mori) and *Di Gu Pi* (Cortex Lycii) gently clears deficiency heat while *Geng Mi* (Semen Oryzae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) strengthen the Spleen and Stomach (earth element) to support the Lung (metal element). Together, the herbs clear heat without injuring yin and sedate the Lung without injuring *zheng* (upright) *qi*. In summary, *Xiè Bái Sǎn* cools and nourishes the Lung and is more for chronic cases of cough or wheezing with yin-deficient constitutions.

- *Ma Huang Xing Ren Gan Cao Shi Gao Tang* is designed for wind-heat or wind-cold invasion leading to Lung heat accumulation, which then causes reversed flow of Lung qi. Besides the symptoms of cough and wheezing, it also treats fever, thirst with a preference to drink, and a rapid pulse. *Ma Huang* (Herba Ephedrae) is used to disperse external pathogenic factors and is coupled with *Shi Gao* (Gypsum Fibrosum) to strongly sedate Lung and Stomach fire and also to generate body fluids. *Ku Xing Ren* (Semen Armeniacae Amarum) guides Lung qi downward, and further helps *Ma Huang* (Herba Ephedrae) regulate respiration. In summary, *Ma Huang Xing Ren Gan Cao Shi Gao Tang* sedates the Lung and ventilates qi, and is used mainly in cases of excess pathogenic factors invading the Lung.⁶

<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	2.1g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the herbs in 2 bowls of water and reduce the liquid to 1 bowl. Take the warm, strained decoction after meals.

CHINESE THERAPEUTIC ACTIONS

1. Dispels wind and clears heat
2. Regulates qi and eliminates toxins

CLINICAL MANIFESTATIONS

Excess heat attacking the Lung and throat: severe pain and swelling of the throat, discomfort in the chest and epigastrium, fidgeting, irritability, preference for cold drinks, constipation, and dysuria.

CLINICAL APPLICATIONS

Sore throat, tonsillitis, strep throat, and parotitis.

EXPLANATION

Qing Xin Li Ge Tang (Clear the Epigastrium and Benefit the Diaphragm Decoction) treats cases of severe swelling and pain of the throat due to heat attacking the Lung and throat. Clinically, the sore throat is so severe that it is difficult to eat and swallow. In addition, heat in the Lung may lead to other symptoms, such as discomfort in the chest and epigastrium, fidgeting, irritability, and preference for cold drinks. Constipation and dysuria indicate excess heat traveling downward.

Fang Feng (Radix Saposhnikoviae), *Jing Jie* (Herba Schizonepetae), and *Bo He* (Herba Menthae) dispel the exterior pathogenic factors. *Jie Geng* (Radix Platycodonis) regulates Lung qi to eliminate phlegm and relieve chest discomfort. *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis) and *Zhi Zi* (Fructus Gardeniae) clear heat, purge fire, and eliminate toxins. Together, these herbs address the underlying cause of the illness. *Xuan Shen* (Radix Scrophulariae) benefits the throat as well as clears heat and preserves yin and body fluids by preventing their consumption by the bitter and cold herbs. *Niu Bang Zi* (Fructus Arctii) and *Lian Qiao* (Fructus Forsythiae) alleviate sore throat and eliminate heat and toxins. *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) drain heat downward and relieve constipation. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) eliminates toxins and harmonizes the formula.

MODIFICATIONS

- With more soreness and swelling of the throat, add *Shan Dou Gen* (Radix et Rhizoma Sophorae Tonkinensis) and *She Gan* (Rhizoma Belamcandae).
- With drooling and thirst, add *Tian Hua Fen* (Radix Trichosanthis) and *Zhu Ru* (Caulis Bambusae in Taenia).
- With irritability and preference for cold drinks, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).

This formula dispels wind, clears heat, and eliminates toxins. It treats soreness and swelling of the throat and the surrounding glands. Other signs and symptoms may include irritability, restlessness, preference for cold drinks, constipation, and dysuria with yellow urine.

These two formulas have identical names, and very similar compositions and functions.

- *Qing Xin Li Ge Tang* from *Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments) is the classic formula designed to treat excess heat attacking the Lung and throat.
- *Qing Xin Li Ge Tang* from *Zhong Guo Yi Xue Da Ci Dian* (Grand Dictionary of Chinese Medicine) is the contemporary formula, with the addition of *Dan Zhu Ye* (Herba Lophatheri) and *Jin Yin Hua* (Flos Lonicerae Japonicae) to enhance the overall effects of clear heating and eliminating toxins.

Xiǎng Shēng Pò Dí Sǎn (Loud Sound Powder for a Broken Flute)

響聲破笛散

响声破笛散

Pinyin Name: *Xiang Sheng Po Di San*

Literal Name: Loud Sound Powder for a Broken Flute

Alternate Names: *Tie Di Wan* (Iron Flute Pill), *Hsiang Sheng Po Ti Wan*, *Xiang Sheng Po Di Wan*, Loud Sound Resembling Broken Bamboo Powder, Gasping Formula

Original Source: *Wan Bing Hui Chun* (Restoration of Health from the Myriad Diseases) by Gong Ting-Xian in 1587

COMPOSITION

<i>Lian Qiao</i> (Fructus Forsythiae)	75g
<i>Jie Geng</i> (Radix Platycodonis)	75g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	45g
<i>He Zi</i> (Fructus Chebulae), <i>wei</i> (roasted)	30g
<i>Er Cha</i> (Catechu)	60g
<i>Sha Ren</i> (Fructus Amomi)	30g

<i>Da Huang</i> (Radix et Rhizoma Rhei), <i>zheng</i> (steamed) with liquor	30g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	75g

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into a fine powder, and mix with egg white to form pills. The pills should resemble a large bullet in size. Dissolve one pill under the tongue and swallow at bedtime.

CHINESE THERAPEUTIC ACTIONS

1. Clears Lung heat and dispels phlegm
2. Moistens dryness and nourishes yin

CLINICAL MANIFESTATIONS

Lung heat injuring yin and body fluids: hoarseness or loss of voice, a dry mouth and throat, and a scratchy throat.

CLINICAL APPLICATIONS

Hoarseness of voice, loss of voice, laryngitis, and discomfort of the throat.

EXPLANATION

Xiang Sheng Po Di San (Loud Sound Powder for a Broken Flute) is designed to treat hoarseness or loss of voice caused by excessive speaking or singing. The excessive use of the vocal cords produces an underlying yin deficiency with dryness and heat.

Lian Qiao (Fructus Forsythiae), *Jie Geng* (Radix Platycodonis), and *Chuan Xiong* (Rhizoma Chuanxiong) reduce swelling and drain pus. *He Zi* (Fructus Chebulae) has a retaining and binding effect on the Lung to relieve cough, sore throat, and loss of voice. *Er Cha* (Catechu)

clears heat. *Sha Ren* (Fructus Amomi) moves qi and dispels dampness and phlegm. *Bo He* (Herba Menthae) releases the exterior and benefits the throat. *Da Huang* (Radix et Rhizoma Rhei) clears heat and reduces swelling. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

MODIFICATIONS

- With dryness of the mouth and throat, add *Mai Dong* (Radix Ophiopogonis) and *Tian Hua Fen* (Radix Trichosanthis).
- With loss of voice, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *She Gan* (Rhizoma Belamcandae).
- With difficulty in speaking, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).

AUTHORS' COMMENTS

This formula is designed specifically for individuals who have no voice or hoarseness of voice, caused by laryngitis, or excessive speaking or singing. In addition to taking this formula, they can facilitate recovery by drinking *Mu Hu Die* (Semen Oroxyli) and *Pang Da Hai* (Semen Sterculiae Lychnophorae) as tea throughout the day. Today, this formula is used most frequently by teachers, public speakers, musicians, and singers.

This formula is also known as 铁笛丸 *Tie Di Wan* (Iron Flute Pill), implying that one's vocal cord will be strong like an iron flute from the use of this formula.

Zuǒ Jīn Wán (Left Metal Pill)

左金丸

Pinyin Name: *Zuo Jin Wan*

Literal Name: Left Metal Pill

Alternate Name: *Yu Lian Wan* (Evodia and Coptis Pill)

Original Source: *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) by Zhu Zhen-Heng in 1481

COMPOSITION

Huang Lian (Rhizoma Coptidis)

180g [9g]

Wu Zhu Yu (Fructus Evodiae)

15-30g [1.5g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder and form into pills with water. Take 50 pills [6g] with warm, boiled water. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

- 1. Clears the Liver and purges fire
- 2. Corrects the reversed flow of Stomach qi and stops vomiting

CLINICAL MANIFESTATIONS

Liver fire overacting on the Stomach: hypochondriac fullness and pain, epigastric distention, a bitter taste in the

mouth, acid regurgitation, nausea, vomiting, belching, a red tongue body with a yellow tongue coating, and a wiry, rapid pulse.

CLINICAL APPLICATIONS

Acute and chronic gastritis, peptic ulcer disease, *H. pylori* infection, acid regurgitation, erosive gastritis, epigastric pain, and hepatitis.

EXPLANATION

Zuo Jin Wan (Left Metal Pill) treats Liver fire overacting on the Stomach. Liver fire results from Liver qi stagnation. Fire in the Liver channel leads to hypochondriac pain and a bitter taste in the mouth. Because wood is the

Zuǒ Jīn Wán (Left Metal Pill)

Zuo Jin Wan (Left Metal Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Liver fire overacting on the Stomach	<ul style="list-style-type: none">• Hypochondriac fullness and pain and a bitter taste in the mouth: Liver fire• Epigastric distention, acid regurgitation, nausea, vomiting and belching: Liver fire overacting on the Stomach• Red tongue body and a yellow tongue coating: excess fire condition• Wiry, rapid pulse: Liver fire rising	<ul style="list-style-type: none">• Clears the Liver and purges fire• Corrects Stomach heat and qi• Stops nausea and vomiting	<ul style="list-style-type: none">• <i>Huang Lian</i> (Rhizoma Coptidis) sedates Liver fire and clears Stomach heat.• <i>Wu Zhu Yu</i> (Fructus Evodiae) corrects the reversed flow of Stomach qi to stop vomiting.

element that acts on earth, excess Liver fire overacts on the Stomach to cause Stomach heat and reversed flow of Stomach qi upwards. As a result, patients may experience epigastric pain, acid regurgitation, and/or vomiting.

Huang Lian (Rhizoma Coptidis) purges Liver fire and clears Stomach heat to treat both the cause and the symptoms. *Wu Zhu Yu* (Fructus Evodiae) corrects the reversed flow of Stomach qi to stop vomiting. The dose ratio of *Huang Lian* (Rhizoma Coptidis) to *Wu Zhu Yu* (Fructus Evodiae) is to be kept at 6:1 for two important reasons. First, *Huang Lian* (Rhizoma Coptidis) is the chief herb and must be used at a large dose to effectively clear Liver fire and Stomach heat. However, *Huang Lian* (Rhizoma Coptidis) is bitter and cold, and may damage the body when used at large doses. Therefore, a small dose of warm *Wu Zhu Yu* (Fructus Evodiae) is used to balance the bitter and cold properties of *Huang Lian* (Rhizoma Coptidis).

The rationale for the composition of this formula can also be explained using the mother and son relationship from Five-Element Theory, which states that excess condition of the mother element can be treated by sedating the son element. Thus, when the Liver [wood (mother) element] is in excess, the Heart [fire (son) element] can be sedated. So using *Huang Lian* (Rhizoma Coptidis) to sedate Heart fire indirectly treats Liver fire.

MODIFICATIONS

- With more severe acid regurgitation, add *Hai Piao Xiao* (Endoconcha Sepiae) and *Wa Leng Zi* (Concha Arcae).
- With more hypochondriac pain, add *Xiang Fu* (Rhizoma Cyperi) and *Fo Shou* (Fructus Citri Sarcodactylis); or *Si Ni San* (Frigid Extremities Powder).
- With abdominal pain, add *Bai Shao* (Radix Paeoniae Alba).
- For dysentery with abdominal pain and spasms, add *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).

- If there are stress ulcers, add *Xiao Yao San* (Rambling Powder) or *Jia Wei Xiao Yao San* (Augmented Rambling Powder).
- For *H. pylori* infection, add *Bai Hua She She Cao* (Herba Hedyotis).

CAUTIONS / CONTRAINDICATIONS

- *Zuo Jin Wan* is contraindicated in cases of deficiency cold.
- This formula should not be used to treat hypochondriac pain caused by Liver, Gallbladder, and blood deficiencies.
- This formula is contraindicated during pregnancy.¹
- Avoid cold or raw, pungent or spicy, and oily or greasy foods while taking this formula.²

PHARMACOLOGICAL EFFECTS

Gastrointestinal: Administration of a modified *Zuo Jin Wan* preparation was associated with protecting the stomach mucus membrane against sodium hydroxide, aspirin, and ethylamine hydrochloride in rats that have fasted for 24 hours. The dose of *Zuo Jin Wan* was 1 g/kg, and the formula was modified with the addition of one qi-regulating herb.³

CLINICAL STUDIES AND RESEARCH

1. **Gastritis:** *Zuo Jin Wan* was evaluated for its effectiveness in treating gastric ulcer due to reflux of bile to the stomach. Out of 24 patients, there were 10 males and 14 females, with ages ranging from 24 to 68 years of age. The history of illness ranged from 6 months to 7 years. Clinical presentations included stomach and gastric pain, nausea, vomiting, abdominal distention, and poor appetite. The basic formula used to treat these patients included *Huang Lian* (Rhizoma Coptidis) 5g, *Wu Zhu Yu* (Fructus Evodiae) 3g, *Jiang Xiang* (Lignum Dalbergiae Odoriferae) 10g, *Zhi Qiao* (Fructus Aurantii) 10g, *Niu Xi* (Radix Achyranthis Bidentatae) 10g, and *Da Huang* (Radix et Rhizoma Rhei) 10g. Minor modifications were made if necessary by adding *Chai Hu* (Radix Bupleuri), *Fo Shou* (Fructus Citri

Zuǒ Jīn Wán (Left Metal Pill)

Sarcodactylis), *Zhi Zi* (Fructus Gardeniae), *Yu Jin* (Radix Curcumae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) for Liver fire overacting on the Stomach; *Dang Gui* (Radix Angelicae Sinensis), *Xiang Fu* (Rhizoma Cyperi), and *Qing Pi* (Pericarpium Citri Reticulatae Viride) for irregular menstruation with breast distention; *Chi Shao* (Radix Paeoniae Rubra), *Bai Shao* (Radix Paeoniae Alba), *San Qi* (Radix et Rhizoma Notoginseng), and *Shi Xiao San* (Sudden Smile Powder) for blood stagnation; and the addition of *Dang Shen* (Radix Codonopsis), dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), and *Da Zao* (Fructus Jujubae), and the elimination of *Da Huang* (Radix et Rhizoma Rhei), for Spleen and Stomach deficiencies. The duration of treatment ranged from 15 to 56 days. The study reported effectiveness in 20 patients (complete resolution of symptoms with normal endoscopy), moderate effect in 3 patients (resolution of symptoms with minimal ulceration based on endoscopy), and no benefit in 1 patient. The overall rate of effectiveness was 95.8%.⁴ Another study reported that gastritis due to regurgitation of bile acid can be treated effectively using *Zuo Jin Wan* plus *Bai Hua She She Cao* (Herba Hedyotis), *Zhi Shi* (Fructus Aurantii Immaturus), and *Cang Zhu* (Rhizoma Atractylodis). The duration of treatment was 15 days per course of treatment, for a total of 2 courses. Of 39 patients, 20 had complete recovery, 16 had significant improvement, and 3 had no change.⁵

2. **Erosive gastritis:** Use of modified *Zuo Jin Wan* to treat 44 patients with erosive gastritis was associated with 95.8% effectiveness. The herbs were decocted in water, and taken in two equally-divided doses daily. The duration of treatment was 20 days per course, for 2 courses. Modifications to the herbal treatment were made by adding herbs as follows: *Zhi Qiao* (Fructus Aurantii) and *Hou Po* (Cortex Magnoliae Officinalis) for fullness and distention in the upper abdominal area; *Tian Hua Fen* (Radix Trichosanthis) and *Shi Hu* (Caulis Dendrobii) for dry mouth and tongue with hunger but no desire to eat; *Hai Piao Xiao* (Endoconcha Sepiae) and calcined *Wa Leng Zi* (Concha Arcae) for acid reflux; *Shen Qu* (Massa Fermentata), *Mai Ya* (Fructus Hordei Germinatus), and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) for anorexia; *Huo Ma Ren* (Fructus Cannabis) and *Yu Li Ren* (Semen Pruni) for constipation; and *Dang Shen* (Radix Codonopsis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for Spleen and Stomach deficiencies. Of 44 cases, the study reported complete recovery in 31 cases, improvement in 11 cases, and no effect in 2 cases.⁶
3. **Epigastric pain:** One study reported 96.4% effectiveness using *Zuo Jin Wan* plus *Ban Xia* (Rhizoma Pinelliae) and

Chen Pi (Pericarpium Citri Reticulatae) to treat epigastric pain. Of 110 patients, 19 had complete recovery, 56 had significant improvement, 31 had moderate improvement, and 4 had no effect.⁷

4. ***H. pylori* infection:** Use of *Zuo Jin Wan* was associated with successful treatment in 86 of 133 patients (64.7%) with *H. pylori* infection. The treatment protocol was to administer one pill twice daily for 2 weeks per course of treatment, for 2 courses total.⁸

HERB-DRUG INTERACTION

Aspirin: Administration of *Zuo Jin Wan* in rats was found to have marked protective effect against aspirin-induced damages to the stomach mucus membrane.⁹

RELATED FORMULAS

Wu Ji Wan (Wu Ji Pill)

戊己丸

Qing Wei Tang (Clear the Stomach Decoction) clears Stomach heat, corrects the reversed flow of Stomach qi, stops bleeding, and relieves pain. Clinically, this formula is used to treat various digestive problems, such as gastrointestinal bleeding, stomach and duodenal ulcers, and acid reflux.

AUTHORS' COMMENTS

Zuo Jin Wan treats Liver fire overacting on the Stomach. There are two reasons why *Huang Lian* (Rhizoma Coptidis) is a more suitable herb than *Long Dan* (Radix et Rhizoma Gentianae) in this formula.

- *Huang Lian* (Rhizoma Coptidis) is better than *Long Dan* (Radix et Rhizoma Gentianae) at sedating Heart fire. Sedating the Heart will purge Liver fire according to the mother-son relationship in Five-Element Theory.
- The chief complaints are upper gastrointestinal symptoms. *Huang Lian* (Rhizoma Coptidis) is excellent at sedating Stomach fire to treat acid regurgitation, burning pain, nausea, and vomiting. *Long Dan* (Radix et Rhizoma Gentianae) is an extremely bitter and cold herb, and although it can sedate Liver fire, it may damage the Stomach and cause more vomiting or nausea.¹⁰

Qīng Wèi Sǎn (Clear the Stomach Powder)

清胃散

Pinyin Name: *Qing Wei San*

Literal Name: Clear the Stomach Powder

Alternate Names: *Ching Wei San*, Stomach-Clearing Powder, Coptis and Rehmannia Formula

Original Source: *Lan Shi Mi Cang* (Secrets from the Orchid Chamber) by Li Gao in 1336

COMPOSITION

<i>Huang Lian</i> (Rhizoma Coptidis)	0.9-1.8g [3-6g]
<i>Di Huang</i> (Radix Rehmanniae)	0.9g [6-12g]
<i>Mu Dan Pi</i> (Cortex Moutan)	1.5g [9g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	0.9g [6g]
<i>Sheng Ma</i> (Rhizoma Cimicifugae)	3g [6-9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder. Cook the herbs in 1.5 bowls of water until 70% of the liquid remains. Take the strained decoction after it has cooled. The dose of *Huang Lian* (Rhizoma Coptidis) may be increased in the summer. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Clears Stomach heat
2. Cools the blood

CLINICAL MANIFESTATIONS

Heat accumulation in the Stomach: toothache with pain radiating to the temple leading to temporal headache; toothache that improves with coldness and worsens with heat; painful and swollen cheeks and oral cavity (lips and gum); swelling and ulcerations of the gum, bleeding gums; fever, foul breath, a dry mouth and tongue, a red tongue body with a yellow tongue coating, and a slippery, big and rapid pulse.

CLINICAL APPLICATIONS

Stomatitis, toothache, gingivitis, ulcerative gingivitis, periodontitis, periodontal disease, swelling of laryngopharynx, sore throat, trigeminal neuralgia, and halitosis.

EXPLANATION

Qing Wei San (Clear the Stomach Powder) clears Stomach heat. Since the Stomach channel travels to the cheeks and gum region, Stomach heat results in toothache and painful cheeks. The *yangming* Stomach is the organ that has an abundance of qi and blood. Thus, heat in the Stomach affects the blood and causes blood to flow out of its vessels, leading to swelling, ulceration and/or bleeding of the gums. Foul breath and a dry mouth are the results of Stomach heat rising.

Qing Wei San (Clear the Stomach Powder) uses *Huang Lian* (Rhizoma Coptidis) as the chief herb to clear heat in the Stomach. *Di Huang* (Radix Rehmanniae) cools the blood and nourishes yin. *Mu Dan Pi* (Cortex Moutan) clears heat and cools the blood. *Di Huang* (Radix Rehmanniae) and *Mu Dan Pi* (Cortex Moutan) also assist *Dang Gui* (Radix Angelicae Sinensis) to nourish and harmonize the blood. *Sheng Ma* (Rhizoma Cimicifugae) has two functions in this formula: it assists *Huang Lian* (Rhizoma Coptidis) to disperse rising Stomach heat and eliminate toxins, and it guides the other herbs in this formula to the *yangming* channel.

MODIFICATIONS

- With constipation, add *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas); or *Da Cheng Qi Tang* (Major Order the Qi Decoction).
- When there is swelling and pain of the gums, add *Huang Qin* (Radix Scutellariae) and *Xuan Shen* (Radix Scrophulariae).
- With swelling, inflammation and pain, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- With stomatitis, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae).
- If there is toothache, add *Bai Hu Tang* (White Tiger Decoction).
- With toothache and headache, add *Xi Xin* (Radix et Rhizoma Asari) and *Bai Zhi* (Radix Angelicae Dahuricae).
- With thirst due to fluid deficiency, add *Xuan Shen* (Radix Scrophulariae) and *Tian Hua Fen* (Radix Trichosanthis).
- With thirst and preference for cold drinks due to more heat in the Stomach, add *Shi Gao* (Gypsum Fibrosum).
- With bleeding gums, add *Niu Xi* (Radix Achyranthis Bidentatae).
- With headache, add *Bai Zhi* (Radix Angelicae Dahuricae) and *Chuan Xiong* (Rhizoma Chuanxiong).

Qīng Wèi Sǎn (Clear the Stomach Powder)

Qīng Wei San (Clear the Stomach Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Stomach heat	<ul style="list-style-type: none">• Toothache, painful cheeks, foul breath, painful and swollen cheeks and oral cavity: heat traveling up along the Stomach channel• Ulceration and/or bleeding of gums: heat forcing the blood to flow out of its vessels• Dry mouth and tongue: Stomach heat consuming body fluids• Red tongue body and a yellow tongue coating: heat condition• Slippery, big and rapid pulse: heat condition	<ul style="list-style-type: none">• Clears Stomach heat• Cools blood	<ul style="list-style-type: none">• <i>Huang Lian</i> (Rhizoma Coptidis) sedates excess heat in the Stomach.• <i>Di Huang</i> (Radix Rehmanniae) cools the blood and nourishes yin.• <i>Mu Dan Pi</i> (Cortex Moutan) clears heat and cools the blood.• <i>Dang Gui</i> (Radix Angelicae Sinensis) nourishes the blood.• <i>Sheng Ma</i> (Rhizoma Cimicifugae) clears heat, eliminates toxins, and guides the formula to the yangming channel.

• For burning diarrhea in children, remove *Di Huang* (Radix Rehmanniae), *Mu Dan Pi* (Cortex Moutan), and *Sheng Ma* (Rhizoma Cimicifugae); and add *Chuan Lian Zi* (Fructus Toosendan), *Huang Bo* (Cortex Phellodendri Chinensis), and *Di Yu* (Radix Sanguisorbae).

CAUTIONS / CONTRAINDICATIONS

Do not use *Qing Wei San* if the oral problems (toothache, swelling and pain of the gums, and gum bleeding) are caused by wind-cold, Kidney yin deficiency, or Kidney yin-deficient fire.

PHARMACOLOGICAL EFFECTS

1. **Anti-inflammatory:** In one laboratory study, injection of *Qing Wei San* was effective in reducing inflammation in rats. The injection given was a 5% solution with a dose of 10 mL/kg. Injection was given twice daily for 3 days.¹
2. **Antibiotic:** Decoction of *Qing Wei San* was associated with mild inhibitory effects against *Staphylococcus aureus* and *Pseudomonas aeruginosa*, with a minimum inhibitory concentration (MIC) of 0.063 g/mL and 0.5 g/mL, respectively.²
3. **Immunostimulant:** In one experiment, oral ingestion of 0.5mL of a 0.5% solution of *Qing Wei San* for 3 days was associated with increased phagocytic activities by macrophages in mice.³

CLINICAL STUDIES AND RESEARCH

1. **Stomatitis:** In one clinical study, 75 patients with recurrent ulcerations were treated with *Qing Wei San* with good results in all patients. The patients were instructed to gargle and swallow the decoction three to five times daily. The patients recovered within an average of 6 days, with a range of 3-9 days.⁴

2. **Gingivitis:** In one report, patients with gingivitis were treated with satisfactory results using a combination of *Qing Wei San* and *Yu Nu Jian* (Jade Woman Decoction). Small modifications to the herbal formula were made as follows: *Da Huang* (Radix et Rhizoma Rhei) (post-decocted) for constipation; *Tian Hua Fen* (Radix Trichosanthis), *Lian Qiao* (Fructus Forsythiae), and *Zhu Ye* (Herba Phyllostachys) for severe gum swelling; and *Pu Huang* (Pollen Typhae), *Xian He Cao* (Herba Agrimoniae), *Bai Mao Gen* (Rhizoma Imperatae), and *Mo Han Lian* (Herba Ecliptae) for gum bleeding. Out of 103 cases, the study reported marked improvement in 94 cases (resolution of symptoms within 1 week) and moderate improvement in 9 cases (resolution of symptoms within 2 weeks).⁵
3. **Periodontitis:** Acute periodontitis in 56 patients was treated with marked success using *Qing Wei San* plus *Zhu Ye* (Herba Phyllostachys), *Lian Qiao* (Fructus Forsythiae), and *Tian Hua Fen* (Radix Trichosanthis). The herbs were given as decoction daily, and most patients experienced relief within 3-5 packs of herbs. Of 56 patients, the study reported complete relief in 32 cases, significant improvement in 19 cases, moderate improvement in 4 cases, and no effect in 1 case. The overall effectiveness was 98.2%.⁶ Another study reported a marked effect using modified *Qing Wei San* to treat 52 patients with periodontitis. The herbal treatment contained *Qing Wei San* plus *Bai Hua She She Cao* (Herba Hedyotis) as the base formula, with addition of *Shi Gao* (Gypsum Fibrosum) and *Huang Lian* (Rhizoma Coptidis) for Stomach heat; *Bai Mao Gen* (Rhizoma Imperatae) and *Bai Ji* (Rhizoma Bletillae) for gum bleeding; *Sang Ji Sheng* (Herba Taxilli) and *Gou Ji* (Rhizoma Cibotii) for loose teeth; and *Da Huang* (Radix et Rhizoma Rhei) for constipation. After 7 days of herbal therapy, the study reported complete recovery in 41 cases,

Qīng Wèi Sǎn (Clear the Stomach Powder)

improvement in 8 cases, and no effect in 3 cases. The overall rate of effectiveness was 94%.⁷

4. **Periodontal disease:** Administration of *Qing Wei San* was associated with marked success in treating periodontal disease characterized by Stomach fire rising. The herbal treatment used *Qing Wei San* as the base formula, with the addition of *Da Huang* (Radix et Rhizoma Rhei) for constipation and *Yi Yi Ren* (Semen Coicis) and *Che Qian Zi* (Semen Plantaginis) for damp-heat. Of 58 cases, the study reported complete recovery in 38 cases, significant improvement in 15 cases, and slight improvement in 5 cases.⁸
5. **Halitosis:** One study reported good results using modified *Qing Wei San* to treat 32 patients with foul breath. In addition to the base formula, modifications were made as needed. For ulcerations of the mouth and tongue and redness, swelling, and pain of the gums, 30g of *Di Huang* (Radix Rehmanniae) was added, and the dose of *Huang Lian* (Rhizoma Coptidis) was increased to 15g. For abdominal distention and fullness, lack of appetite, belching and acid reflux, *Huang Qin* (Radix Scutellariae) and *Da Huang* (Radix et Rhizoma Rhei) were added, and *Dang Gui* (Radix Angelicae Sinensis) and *Sheng Ma* (Rhizoma Cimicifugae) were removed. For profuse, yellow sputum with chest and hypochondriac distention and pain, *Sheng Ma* (Rhizoma Cimicifugae) was removed, *Jin Yin Hua* (Flos Lonicerae Japonicae), *Di Gu Pi* (Cortex Lycii), and *Sang Bai Pi* (Cortex Mori) were added, and the dose of *Mu Dan Pi* (Cortex Moutan) was increased to 15g. The treatment protocol was to administer the herbs in decoction, for 6 packs of herbs per course of treatment, for 1-2 courses total. Of 32 cases, the study reported complete recovery in 31 cases and improvement in 1 case.⁹

TOXICOLOGY

In one acute toxicology study, no fatality was reported in mice following oral administration of a 100% solution of *Qing Wei San* at 0.4 mL per subject, a dose equivalent or greater than 150 times the normal adult dose in humans.¹⁰

AUTHORS' COMMENTS

Qing Wei San is commonly used for toothache caused by Stomach heat. The facial pain and toothache are located around the *yangming* channel on the face.

Qing Wei San, *Xie Huang San* (Drain the Yellow Powder), and *Yu Nu Jian* (Jade Woman Decoction) all clear heat, but have different underlying causes:

- *Qing Wei San* clears Stomach heat and cools the blood to treat toothache, bleeding gums, and/or swollen cheeks.
- *Xie Huang San* drains fire in the Spleen, which manifests in oral ulcers, foul breath, and a dry hot tongue.
- *Yu Nu Jian* nourishes Stomach yin and clears Stomach heat, treating both excess and deficiency. Symptoms include thirst, toothache, loose teeth, bleeding gums, and headache.

Xiè Huáng Sǎn (Drain the Yellow Powder)

瀉黃散 泻黄散

Pinyin Name: *Xie Huang San*

Literal Name: Drain the Yellow Powder

Alternate Names: *Xie Pi San* (Drain the Spleen Powder), Siler and Licorice Formula

Original Source: *Xiao Er Yao Zheng Zhi Jue* (Craft of Medicinal Treatment for Childhood Disease Patterns) by Qian Yi in 1119

COMPOSITION

<i>Shi Gao</i> (Gypsum Fibrosum)	15g [5g]
<i>Zhi Zi</i> (Fructus Gardeniae)	3g [3g]
<i>Fang Feng</i> (Radix Saposhnikoviae), <i>qie</i> (sliced) and <i>bei</i> (stone-baked)	120g [12g]
<i>Huo Xiang</i> (Herba Agastaches)	21g [5g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	90g [9g]

Note: Please refer to the Authors' Comments for an explanation of the uncharacteristically high doses of *Fang Feng* (Radix Saposhnikoviae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients coarsely, dry-fry with honey-liquor until the aroma fills the air. Re-grind the coarse powder into a fine powder. Cook 3-6g of the powder in one large bowl of water until 50% of the liquid remains. Take the warm, strained decoction any time during the day. This formula may also be prepared as a decoction using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Purges latent fire in the Spleen and Stomach

CLINICAL MANIFESTATIONS

Latent fire in the Spleen and Stomach: mouth ulcerations, foul breath, a dry mouth and lips, irritability, thirst, frequent hunger, a red tongue body, and a rapid pulse.

CLINICAL APPLICATIONS

Stomatitis, epistaxis, halitosis, and fever.

EXPLANATION

Xie Huang San (Drain the Yellow Powder) treats latent fire of the Spleen and Stomach, a condition characterized by the presence of heat and fire hidden deep inside the body. According to traditional Chinese medicine principles, the sensory organ that belongs to the Spleen and Stomach is the mouth, and the condition of the Stomach and Spleen is manifested on the lips. Therefore, heat in the Spleen and Stomach travels upwards and results in mouth sores, foul breath, and a dry mouth and lips. Thirst and frequent hunger are the results of latent heat and fire in the Spleen

and Stomach damaging body fluids. Unlike excess Stomach fire, latent fire cannot be completely cleared if only heat-clearing herbs are used to sedate the heat. Because of the tendency of latent fire to stagnate and hide in the interior, it is necessary to use acrid herbs to disperse the heat outward.

Shi Gao (Gypsum Fibrosum) and *Zhi Zi* (Fructus Gardeniae) clear and sedate Spleen and Stomach fire. *Fang Feng* (Radix Saposhnikoviae) and *Huo Xiang* (Herba Agastaches) disperse and lift the latent fire so that the heat-clearing herbs can effectively clear the hidden heat. With its aromatic quality, *Huo Xiang* (Herba Agastaches) is also able to activate and restore the functioning of the Spleen and Stomach. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) helps clear heat and protects Spleen and Stomach qi from being injured by the cold herbs in this formula. This formula uses dispersing/lifting and clearing/sedating methods to completely eliminate latent fire of the Spleen and Stomach.

MODIFICATIONS

- When there is a feeling of warmth in the body and extremities, add *Yin Chen* (Herba Artemisiae Scopariae) and *Huang Qin* (Radix Scutellariae).
- With irritability and thirst, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Jie Geng* (Radix Platycodonis).
- With foul breath and mouth ulceration, add *Huang Lian* (Rhizoma Coptidis) and *Sheng Ma* (Rhizoma Cimicifugae).
- If the Stomach heat is severe, add *Huang Lian* (Rhizoma Coptidis).
- With irritability, add *Deng Xin Cao* (Medulla Junci) and *Chi Fu Ling* (Poria Rubra).
- With dysuria and dark urine, add *Hua Shi* (Talcum).

Xiè Huáng Sǎn (Drain the Yellow Powder)

Xie Huang San (Drain the Yellow Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Latent fire of the Spleen and Stomach	<ul style="list-style-type: none"> • Mouth ulcerations and foul breath: rising of latent fire of the Spleen and Stomach • Thirst, a dry mouth and lips and frequent hunger: fire consuming body fluids • Red tongue body: heat condition • Rapid pulse: heat condition 	Purges latent fire of the Spleen and Stomach	<ul style="list-style-type: none"> • <i>Shi Gao</i> (Gypsum Fibrosum) and <i>Zhi Zi</i> (Fructus Gardeniae) clear and sedate heat and fire from the Spleen and Stomach. • <i>Fang Feng</i> (Radix Saposhnikoviae) and <i>Huo Xiang</i> (Herba Agastaches) disperse and lift latent fire outward. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) clears heat and protects Spleen and Stomach qi.

CAUTIONS / CONTRAINDICATIONS

Do not use *Xie Huang San* in cases of Stomach yin deficiency.

CLINICAL STUDIES AND RESEARCH

1. **Stomatitis:** One study reported good results using modified *Xie Huang San* to treat stomatitis in 32 children. Modifications included the addition of *Huang Lian* (Rhizoma Coptidis) and *Zhu Ye* (Herba Phyllostachys) for stomatitis affecting a large surface area accompanied by severe pain; *Ji Su San* (Peppermint Powder) and *Che Qian Zi* (Semen Plantaginis) for foul breath and sticky tongue coating; *Da Huang* (Radix et Rhizoma Rhei) for constipation; and *Shan Zha* (Fructus Crataegi) and *Shen Qu* (Massa Fermentata) for poor appetite. The treatment protocol was to administer the herbs in decoction one time daily. According to the study, 23 children responded (72%) within 1-2 packs of herbs, 7 responded (22%) within 3-4 packs, and 2 responded after 6 packs. The average recovery time was approximately 5 days.¹ In another study, 31 adults with stomatitis were treated with herbs with complete recovery reported in 80% of patients. The herbal formula contained *Xie Huang San* plus *Fu Ling* (Poria), *Cang Zhu* (Rhizoma Atractylodis), *Ban Xia* (Rhizoma Pinelliae), *Yi Yi Ren* (Semen Coicis), *Huang Qin* (Radix Scutellariae), and *Chen Pi* (Pericarpium Citri Reticulatae). The treatment protocol was to cook the herbs in water, and drink the decoction in three equally-divided doses daily.²
2. **Fever:** One study reported good results using modified *Xie Huang San* to treat fever in 250 children. The body temperature ranged from 37.5-40°C / 99.5-104°F, and the duration of fever ranged from 1-6 days. The herbal treatment contained *Xie Huang San* plus *Qing Hao* (Herba Artemisiae Annuae), *Ku Xing Ren* (Semen Armeniacae Amarum), and others as needed. Of 250 cases, the study reported reduction of fever in 150 cases after 1 dose, and in 100 cases after 2 doses.³

AUTHORS' COMMENTS

According to the source text, *Xie Huang San* is formulated with significantly and uncharacteristically high doses of *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Fang Feng* (Radix Saposhnikoviae). Many scholars argue that such high doses are inappropriate because these two herbs do not directly treat the latent fire in the Spleen and Stomach as indicated in *Xie Huang San*. In fact, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) is a tonic herb and *Fang Feng* (Radix Saposhnikoviae) is an acrid and warm exterior-releasing herb, and use of these two herbs at high doses may exacerbate the latent fire condition.⁴ This issue has been further scrutinized in several *in vitro* studies, in which it was found that the overall efficacy of the formula does not differ significantly whether *Fang Feng* (Radix Saposhnikoviae) was used at full or reduced doses (80% less). In fact, the studies reported that larger doses of *Fang Feng* (Radix Saposhnikoviae) decrease the anti-inflammatory effects of *Xie Huang San*.⁵

Please refer to *Qing Wei San* (Clear the Stomach Powder) for an examination of the contrasting differences between *Xie Huang San* and *Yu Nu Jian* (Jade Woman Decoction).

Yù Nǚ Jiān (Jade Woman Decoction)

玉女煎

Pinyin Name: Yu Nu Jian

Literal Name: Jade Woman Decoction

Alternate Names: Yu Nu Chien, Fairy Decoction, Rehmannia and Gypsum Decoction, Rehmannia and Gypsum Combination

Original Source: Jing Yue Quan Shu (Collected Treatises of [Zhang] Jing Yue) by Zhang Jie-Bin (Zhang Jing-Yue) in 1624

COMPOSITION

Shi Gao (Gypsum Fibrosum)	9-15g [15-30g]
Zhi Mu (Rhizoma Anemarrhenae)	4.5g
Shu Di Huang (Radix Rehmanniae Praeparata)	9-30g
Mai Dong (Radix Ophiopogonis)	6g
Chuan Niu Xi (Radix Cyathulae)	4.5g

DOSAGE / PREPARATION / ADMINISTRATION

EXPLANATION

Prepare the ingredients as a decoction with 1.5 bowls of water and cook until 70% of the liquid remains. The strained decoction may be taken warm or cool. The decoction may be prepared using the dose of Shi Gao (Gypsum Fibrosum) suggested in brackets.

Yu Nu Jian (Jade Woman Decoction) treats excess in the yangming channel with deficiency in the shaoyin channel—in other words, excess Stomach heat with underlying yin deficiency. The Stomach channel travels to the head region, so Stomach heat may travel upward along the channel to cause headache and toothache. If the heat forces blood out of the blood vessels, then gum bleeding may occur. Irritability, warm sensations, a dry mouth and thirst are common clinical manifestations of excess heat injuring yin and body fluids. A red tongue body with a dry, yellow coating implies excess heat damaging yin.

CHINESE THERAPEUTIC ACTIONS

- 1. Clears Stomach heat
- 2. Nourishes yin

CLINICAL MANIFESTATIONS

- 1. Stomach heat accompanied by yin deficiency: irritability, warm sensations, thirst, a dry mouth, headache, toothache, gum bleeding, a red tongue body, and a yellow dry tongue coating.
- 2. Xiao ke (wasting and thirsting) syndrome with excess hunger and thirst.

CLINICAL APPLICATIONS

Gastrointestinal bleeding, epistaxis, recurrent ulceration of the oral cavity, oral cavity disorders, toothache, gingivitis, periodontitis, stomatitis, halitosis, periodontal disease, pharyngitis, diabetes mellitus, and trigeminal neuralgia.

Shi Gao (Gypsum Fibrosum), the chief herb, is excellent for clearing Stomach heat. Its sweet taste promotes the production of body fluids and its acrid nature disperses heat. Shu Di Huang (Radix Rehmanniae Praeparata), the deputy herb, is used to nourish yin. Combined, these two herbs clear excess heat and nourish deficient yin. Zhi Mu (Rhizoma Anemarrhenae) helps Shi Gao (Gypsum Fibrosum) clear heat and moisten dryness. Mai Dong (Radix Ophiopogonis) helps Shu Di Huang (Radix Rehmanniae Praeparata) nourish yin. Chuan Niu Xi (Radix Cyathulae) leads heat downward to relieve bleeding and rising

Yu Nu Jian (Jade Woman Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Stomach heat accompanied by yin deficiency	<ul style="list-style-type: none">• Headache and toothache: Stomach heat traveling upward along the Stomach channel• Gum bleeding: Stomach heat forcing blood out of the blood vessels• Irritability, warm sensations, a dry mouth and thirst: excess heat injuring yin and body fluids• Red tongue body with a dry yellow coating: heat damaging yin	<ul style="list-style-type: none">• Clears Stomach heat• Nourishes yin	<ul style="list-style-type: none">• Shi Gao (Gypsum Fibrosum) and Zhi Mu (Rhizoma Anemarrhenae) clear heat, generate body fluids, and moisten dryness.• Shu Di Huang (Radix Rehmanniae Praeparata) and Mai Dong (Radix Ophiopogonis) nourish Stomach yin.• Chuan Niu Xi (Radix Cyathulae) leads heat downward to relieve bleeding and rising Stomach heat.

Yù Nǚ Jiān (Jade Woman Decoction)

Stomach heat. This formula is also commonly used for excessive hunger in middle (*jiao*) *xiao ke* (wasting and thirsting) syndrome.

MODIFICATIONS

- If the toothache is severe, add *Huang Lian* (Rhizoma Coptidis) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- With restlessness, irritability and thirst, add *Tian Dong* (Radix Asparagi) and *Di Huang* (Radix Rehmanniae).
- With vomiting of blood, add *Zhi Zi* (Fructus Gardeniae) and charred *Sheng Jiang* (Rhizoma Zingiberis Recens).
- If there is severe gum swelling and pain, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Pu Gong Ying* (Herba Taraxaci); or *Gan Lu Yin* (Sweet Dew Decoction).
- When the bleeding gums are severe as a result of heat in the *xue* (blood) level, remove *Shu Di Huang* (Radix Rehmanniae Praeparata) and add *Di Huang* (Radix Rehmanniae), *Bai Mao Gen* (Rhizoma Imperatae), *Mo Han Lian* (Herba Ecliptae), and *Xuan Shen* (Radix Scrophulariae).
- With a sore throat, add *Ban Lan Gen* (Radix Isatidis) and *Da Qing Ye* (Folium Isatidis).
- With constipation, add *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas).
- With prominent yin deficiency, add *Bei Sha Shen* (Radix Glehniae) and *Shi Hu* (Caulis Dendrobii).
- When accompanied by insomnia, add *Suan Zao Ren* (Semen Ziziphi Spinosae) and *Shou Wu Teng* (Caulis Polygoni Multiflori).
- With stomatitis, add *Qing Wei San* (Clear the Stomach Powder).

CAUTIONS / CONTRAINDICATIONS

Yu Nu Jian is contraindicated in cases of loose stools due to deficiency and cold of the Spleen and Stomach.

PHARMACOLOGICAL EFFECTS

Hypoglycemic: In one experiment, oral administration of *Yu Nu Jian* at 5 mL/kg was associated with a gradual but sustained hypoglycemic effect in rabbits. The hypoglycemic effect was observed in these subjects between 3 to 9 hours after administration of the formula.¹

CLINICAL STUDIES AND RESEARCH

1. Gastrointestinal bleeding: One study reported complete recovery in all 12 patients with upper gastrointestinal bleeding characterized by yin deficiency, with flushed face, dizziness, palpitations, poor sleeping patterns, warm sensations at the center of the palms and soles, hematemesis with profuse amount of bright red blood, a dry mouth with thirst, dark tarry stools, a red tongue body with little tongue coating, and a fine pulse. The herbal treatment

contained *Yu Nu Jian* plus *Qian Cao* (Radix et Rhizoma Rubiae) as the base formula, with modifications as needed. For qi deficiency, *Dang Shen* (Radix Codonopsis) and *Tai Zi Shen* (Radix Pseudostellariae), or *Sheng Mai San* (Generate the Pulse Powder) were added. For severe bleeding, charred *Ce Bai Ye* (Cacumen Platycladi), *Mo Han Lian* (Herba Ecliptae), and *Zi Zhu* (Folium Callicarpae) were added.²

- 2. Epistaxis:** Nosebleeds were successfully treated with an herbal formula containing *Yu Nu Jian* plus *Xian He Cao* (Herba Agrimoniae), *Ou Jie* (Nodus Nelumbinis Rhizomatis), *Di Huang* (Radix Rehmanniae), *Bai Mao Gen* (Rhizoma Imperatae) and *Qian Cao* (Radix et Rhizoma Rubiae). Of 55 patients with nosebleeds, 32 were diagnosed with Liver fire rising, 13 with Stomach fire, and 10 with yin-deficient heat. The herbs were given in decoction daily, for a total of 3-7 packs. The study reported complete recovery in 38 cases, marked effect in 14 cases, and no benefit in 3 cases.³ In another study, 55 patients with nosebleeds were treated with complete recovery in 38 cases, improvement in 14 patients, and no effect in the rest. Most patients responded within 3-5 doses.⁴
- 3. Recurrent ulceration of the oral cavity:** In one report, 32 patients with recurrent oral ulcerations were treated with modified *Yu Nu Jian* with satisfactory results. In addition to *Yu Nu Jian* as the base formula, modifications were made by adding: *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Pu Gong Ying* (Herba Taraxaci) for gum swelling and pain; *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) for constipation; *Zhi Zi* (Fructus Gardeniae) and *Huang Lian* (Rhizoma Coptidis) for Stomach fire; *Bei Sha Shen* (Radix Glehniae) and *Shi Hu* (Caulis Dendrobii) for yin deficiency; and *Suan Zao Ren* (Semen Ziziphi Spinosae) and *Shou Wu Teng* (Caulis Polygoni Multiflori) for poor sleeping patterns. Out of 32 patients, 15 showed complete recovery, 10 showed moderate improvement, and 7 showed no effect.⁵
- 4. Oral cavity disorders:** Administration of *Yu Nu Jian* has been shown to effectively treat various types of oral cavity disorders. One report found *Yu Nu Jian* had a marked effect to treat swelling and pain of gums.⁶ Modified *Yu Nu Jian* also showed marked success in treating 32 patients with recurrent stomatitis.⁷ Lastly, use of this formula in 102 patients with toothache due to various causes was associated with complete relief in 68 cases and improvement in 34 cases.⁸
- 5. Periodontal disease:** One study reported marked success using modified *Yu Nu Jian* to treat periodontal disease. Of 48 patients, the study reported complete recovery in 23 cases, marked effect in 20 cases, and slight improvement in 5 cases. The herbal treatment used *Yu Nu Jian* plus *Ku Shen* (Radix Sophorae Flavescens) as the base formula,

Yù Nǚ Jiān (Jade Woman Decoction)

with addition of *Da Huang* (Radix et Rhizoma Rhei) for constipation and *Yi Yi Ren* (Semen Coicis) for damp-heat. The herbs were cooked in water, and the decoction was taken in two equally-divided doses.⁹

6. **Pharyngitis:** One study reported 93.44% effectiveness using modified *Yu Nu Jian* to treat 61 patients with chronic pharyngitis. In addition to using *Yu Nu Jian* as the base formula, modifications were made by adding *Huang Lian* (Rhizoma Coptidis) and *Zhi Zi* (Fructus Gardeniae) for irritability; *Bei Mu* (Bulbus Fritillariae) and *Tian Zhu Huang* (Concretio Silicea Bambusae) for cough with profuse phlegm; *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae) for dry itchy throat with burning sensations; *Da Huang* (Radix et Rhizoma Rhei) for constipation; and *Chi Shao* (Radix Paeoniae Rubra) and *Mu Dan Pi* (Cortex Moutan) for swelling of the throat. The treatment protocol was to administer the herbs for 10 days per course of treatment, for 2-3 courses total. Of 61 cases, the study reported complete recovery in 9 cases, significant improvement in 23 cases, moderate improvement in 25 cases, and no effect in 4 cases.¹⁰
7. **Diabetes mellitus:** Use of modified *Yu Nu Jian* was associated with 86.5% effectiveness in treating 52 patients with adult-onset diabetes mellitus characterized by Stomach yin deficiency with dry heat. In addition to *Yu Nu Jian* as the base formula, *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill) was added for Kidney yin deficiency; *Sheng Mai San* (Generate the Pulse Powder) was added for qi and yin deficiencies; *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet) was added for yin and yang deficiencies; *Ji Sheng Shen Qi Wan* (Kidney Qi Pill from Formulas that Aid the Living) was added for edema; and *Xiao Ke Fang* (Wasting and Thirsting Formula) for yin deficiency with dry heat.¹¹ Note: *Xiao Ke Fang* (Wasting and Thirsting Formula), as the name implies, is a formula that treats *xiao ke* (wasting and thirsting) syndrome. The exact composition of this formula was not available at the time of publication.
8. **Trigeminal neuralgia:** One study reported complete recovery in all 6 patients using herbs both orally and

topically. The oral herbal formula contained *Yu Nu Jian* plus *Yan Hu Suo* (Rhizoma Corydalis), *Bai Zhi* (Radix Angelicae Dahuricae), *Fang Feng* (Radix Saposhnikoviae), and *Xi Xin* (Radix et Rhizoma Asari). The treatment protocol for topical application of herbs was to mix *Xiang Fu* (Rhizoma Cyperi) powder with egg white, and apply the paste to the center of the sole of the right foot at night. The duration of treatment ranged from 3-7 packs of herbs.¹²

AUTHORS' COMMENTS

Qing Wei San (Clear the Stomach Powder) and *Yu Nu Jian* both treat Stomach fire flaring upward causing toothache, gum bleeding, headache, thirst, a red tongue body and a yellow coating.

- *Qing Wei San* cools the blood and clears excess fire.
- *Yu Nu Jian* is indicated for Stomach fire with underlying Stomach and Kidney yin deficiencies. Consequently, the patient will feel more thirsty and dry, and the pulse will feel empty upon heavy pressure.

Gān Lù Yīn (Sweet Dew Decoction)

甘露飲 甘露饮

Pinyin Name: *Gan Lu Yin*

Literal Name: Sweet Dew Decoction

Alternate Names: *Kan Lu Yin*, Sweet Combination Drink, Sweet Combination

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

Di Huang (Radix Rehmanniae)
Shu Di Huang (Radix Rehmanniae Praeparata)
Mai Dong (Radix Ophiopogonis)
Tian Dong (Radix Asparagi)
Pi Pa Ye (Folium Eriobotryae)
Shi Hu (Caulis Dendrobii)
Zhi Qiao (Fructus Aurantii), *chao* (dry-fried)
Yin Chen (Herba Artemisiae Scopariae)
Huang Qin (Radix Scutellariae)
Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)

DOSAGE / PREPARATION / ADMINISTRATION

Grind equal amounts of the ingredients coarsely, and cook 6g of the powder in 1 bowl of water and reduce it to 80%. Take the warm, strained decoction after meals. For treatment of loose teeth or swollen gums, swish and swallow the decoction.

CHINESE THERAPEUTIC ACTIONS

1. Clears damp-heat
2. Nourishes yin

CLINICAL MANIFESTATIONS

Damp-heat in the Spleen and Stomach: swelling, inflammation and suppuration in the gums, tongue and throat, sore throat with inflammation and pain, stomatitis, ulcerations of the tongue, and toothache. Jaundice with edema, fever, constipation, and dysuria.

CLINICAL APPLICATIONS

Stomatitis, ulcerative stomatitis, gingivitis, toothache, sore throat, conjunctivitis, and jaundice.

EXPLANATION

Gan Lu Yin (Sweet Dew Decoction) treats damp-heat in the Spleen and Stomach. When damp-heat travels up the gastrointestinal tract, patients exhibit signs and symptoms in the oral cavity, such as swelling and suppuration of the gums, tongue and throat, sore throat with inflammation and pain, stomatitis, and tongue ulcerations. If the damp-heat remains in the middle *jiao*, it may affect the adjacent organs, namely the Gallbladder, leading to jaundice, fever,

and mild edema of the extremities. If the damp-heat travels downward, it affects urination and bowel movement, leading to dysuria and constipation.

Di Huang (Radix Rehmanniae), *Shu Di Huang* (Radix Rehmanniae Praeparata), *Mai Dong* (Radix Ophiopogonis) and *Tian Dong* (Radix Asparagi) nourish yin and clear heat simultaneously. The heat-clearing function of these herbs addresses the underlying cause of the disease, while the yin-nourishing function prevents the cold herbs from damaging the body. *Pi Pa Ye* (Folium Eriobotryae) harmonizes the Stomach and clears Stomach heat. *Zhi Qiao* (Fructus Aurantii) breaks up stagnant qi, and promotes normal bowel movement and urination. *Shi Hu* (Caulis Dendrobii) clears deficiency heat from the Stomach. The combination of *Zhi Qiao* (Fructus Aurantii) and *Shi Hu* (Caulis Dendrobii) regulates the Stomach and Intestines to promote normal function of the gastrointestinal tract and relieve constipation. *Yin Chen* (Herba Artemisiae Scopariae) clears damp-heat, and is one of the most effective herbs for treating jaundice. *Huang Qin* (Radix Scutellariae) clears excess fire and damp-heat to reduce inflammation and relieve ulceration. Lastly, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

MODIFICATIONS

- With swelling and pain of the gums and teeth, add *Ge Gen* (Radix Puerariae Lobatae) and *Sheng Ma* (Rhizoma Cimicifugae).

Gān Lù Yīn (Sweet Dew Decoction)

Gan Lu Yin (Sweet Dew Decoction)

<i>Rou Gui</i> (Cortex Cinnamomi)	7.5g [2-5g]

Sháo Yào Tāng (Peony Decoction)

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients coarsely and cook 15g of the powder in two large bowls of water until one bowl of the liquid remains. Take the warm, strained decoction after meals. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Harmonizes qi and blood
2. Clears heat and eliminates toxins

CLINICAL MANIFESTATIONS

Damp-heat dysentery: abdominal pain, rectal tenesmus, burning sensation of the anus, presence of white (mucus) and red (blood) stools, dark, scanty urine, and a greasy, yellow tongue coating.

CLINICAL APPLICATIONS

Bacterial dysentery, amoebic dysentery, acute enteritis, allergic colitis, acute colitis, and ulcerative colitis.

EXPLANATION

Shao Yao Tang (Peony Decoction) is the main formula used to treat dysentery characterized by damp-heat in the Intestines. In this syndrome, damp and heat stagnate in the Intestines, causing qi and blood stagnation. Qi and blood stagnation results in abdominal pain. Damp-heat injures the Intestines and causes the formation of mucus and blood in the stools, which, when defecated, appear white and red in color. Burning sensations of the anus, rectal tenesmus and dark, scanty urine are due to damp-heat traveling downward.

The treatment plan for this syndrome is first to harmonize qi and blood, and then to dispel damp-heat and eliminate toxins. A heavy dose of *Bai Shao* (Radix Paeoniae Alba) along with *Dang Gui* (Radix Angelicae Sinensis) is used to harmonize the *ying* (nutritive) and *xue* (blood) levels. *Bai Shao* (Radix Paeoniae Alba) also works with *Gan Cao* (Radix et Rhizoma Glycyrrhizae), as seen in the formula *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction), to relieve pain and other urgent symptoms.

Huang Lian (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae), both bitter and cold, clear heat and dry dampness. *Mu Xiang* (Radix Aucklandiae) and *Bing Lang* (Semen Arecae) move qi to relieve stagnation. *Da Huang* (Radix et Rhizoma Rhei), as a supplement to *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae), purges and drains heat downward. *Da Huang* (Radix et Rhizoma Rhei) also quickly removes harmful retention or stagnation in the body via defecation, thereby supplementing the qi-moving effect of *Mu Xiang* (Radix Aucklandiae) and *Bing Lang* (Semen Arecae). Although it is a purgative herb, *Da Huang* (Radix et Rhizoma Rhei) is necessary in this formula to drain stagnation to treat diarrhea and dysentery. *Rou Gui* (Cortex Cinnamomi) restrains the bitter and cold herbs from injuring yin and prevents them from constricting damp-heat inside the body. This formula focuses on treating the cause of the diarrhea and dysentery rather than just relieving the symptoms.

MODIFICATIONS

- With more blood than pus in the stool, change *Dang Gui* (Radix Angelicae Sinensis) to *Dang Gui Wei* (Extremities

Shao Yao Tang (Peony Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Damp-heat dysentery	<ul style="list-style-type: none">• Dysentery, burning sensations of the anus, rectal tenesmus and dark scanty urine: damp-heat traveling downward• Abdominal pain: qi and blood stagnation• Stools with mucus and blood: damp-heat damaging the blood vessels• Greasy, yellow tongue coating: accumulation of damp-heat	<ul style="list-style-type: none">• Harmonizes qi and blood• Clears heat and eliminates toxins	<ul style="list-style-type: none">• <i>Huang Lian</i> (Rhizoma Coptidis) and <i>Huang Qin</i> (Radix Scutellariae) clear heat, eliminate toxins, and dry dampness.• <i>Da Huang</i> (Radix et Rhizoma Rhei) purges heat and drains heat downward.• <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Bai Shao</i> (Radix Paeoniae Alba) regulate and harmonize <i>ying</i> (nutritive) and <i>xue</i> (blood) levels.• <i>Bai Shao</i> (Radix Paeoniae Alba) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) relieve spasms, cramps and pain.• <i>Mu Xiang</i> (Radix Aucklandiae) and <i>Bing Lang</i> (Semen Arecae) regulate and harmonize qi.• <i>Rou Gui</i> (Cortex Cinnamomi) restrains the bitter and cold herbs from injuring yin.

Sháo Yào Tāng (Peony Decoction)

Radix Angelicae Sinensis) and add *Mu Dan Pi* (Cortex Moutan).

- With a dry, yellow tongue coating and heat injuring the body fluids, remove *Rou Gui* (Cortex Cinnamomi).
- With food stagnation, remove *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and add *Shan Zha* (Fructus Crataegi) and *Mai Ya* (Fructus Hordei Germinatus).
- With abdominal fullness and distention, remove *Rou Gui* (Cortex Cinnamomi) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and add *Zhi Shi* (Fructus Aurantii Immaturus).
- With bloody diarrhea, increase the dose of *Da Huang* (Radix et Rhizoma Rhei).
- With cloudy and dark blood in the stool due to toxins in the *zang* (solid organ), add *Huang Bo* (Cortex Phellodendri Chinensis).

CAUTIONS / CONTRAINDICATIONS

- Do not use this formula if the dysentery is accompanied by exterior symptoms.
- This formula is not suitable for chronic dysentery or dysentery caused by deficiency and cold.

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** Administration of *Shao Yao Tang* was associated with stimulating the gastrointestinal tract and promoting expulsion of intestinal content. This effect was immediate and potent, with short duration. The potency of this action is directly proportional to the dose of the formula. It was noted that *Shao Yao Tang* did not have such an effect when *Bing Lang* (Semen Arecae) was removed from the formula.^{1,2}
2. **Antibiotic:** Use of *Shao Yao Tang* *in vitro* was associated with an inhibiting effect on *Bacillus dysenteriae*, *E. coli*, *Pseudomonas aeruginosa*, *Bacillus proteus*, and *Staphylococcus aureus*. Interestingly, the formula has much less antibiotic effect without *Bing Lang* (Semen Arecae) even though when given individually, *Bing Lang* (Semen Arecae) does not have any antibiotic effect.³
3. **Anti-inflammatory:** Intraperitoneal injection of *Shao Yao Tang* in mice was associated with reducing swelling and inflammation.⁴

CLINICAL STUDIES AND RESEARCH

1. **Dysentery:** There have been many reports on the efficacy of *Shao Yao Tang* for the treatment of dysentery. In one report, modified *Shao Yao Tang* was effective in treating all 25 infants with dysentery characterized by damp-heat. Most patients had complete recovery within 2-4 packs, with some needing up to 6 packs of herbs. The herbal treatment contained *Shao Yao Tang*, with the addition of *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Tai*

Zi Shen (Radix Pseudostellariae) for chronic illness with qi deficiency; *Huo Xiang* (Herba Agastaches) and *Zhu Ru* (Caulis Bambusae in Taenia) for nausea and vomiting; and *Bai Tou Weng* (Radix Pulsatillae), *Pu Gong Ying* (Herba Taraxaci) and charred *Di Yu* (Radix Sanguisorbae) for severe bloody dysentery.⁵

2. **Bacterial dysentery:** *Shao Yao Tang* has been shown to be effective in treating bacterial dysentery in several studies. Modified *Shao Yao Tang* was effective in all 70 patients with bacterial dysentery.⁶ According to another study, use of modified *Shao Yao Tang* was associated with 94% effectiveness in treating 50 patients with bacterial dysentery with high fever and bowel movements between 8-20 times per day.⁷ Lastly, one study reported 98.9% effectiveness using modified *Shao Yao Tang* to treat 93 patients with bacterial dysentery. The herbal treatment contained *Shao Yao Tang* plus *Jin Yin Hua* (Flos Lonicerae Japonicae), *Di Yu* (Radix Sanguisorbae), *Bai Tou Weng* (Radix Pulsatillae), and *Yi Yi Ren* (Semen Coicis).⁸
3. **Colitis:** One study reported marked success using modified *Shao Yao Tang* to treat 48 patients with acute or chronic colitis. In addition to the base formula, the herbal treatment was modified by adding *Shan Zha* (Fructus Crataegi), *Gu Ya* (Fructus Setariae Germinatus), and *Mai Ya* (Fructus Hordei Germinatus) for undigested food in the stools; *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), *Shan Yao* (Rhizoma Dioscoreae), and *Bu Gu Zhi* (Fructus Psoraleae) for yang deficiency of the Spleen and Stomach; *Yi Yi Ren* (Semen Coicis) and *Bai Bian Dou* (Semen Lablab Album) for dampness; and eliminating *Rou Gui* (Cortex Cinnamomi) and adding *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis) for constipation with abdominal fullness. The duration of treatment was 5-10 packs of herbs for acute colitis, and 3-12 months for chronic colitis.⁹
4. **Ulcerative colitis:** Daily administration of modified *Shao Yao Tang* as rectal enema for one month was associated with resolution of all signs and symptoms in all 36 patients with ulcerative colitis. In addition to using *Shao Yao Tang* as the base formula, modifications included the addition of *Bai Tou Weng* (Radix Pulsatillae) and *Ma Chi Xian* (Herba Portulacae) for presence of pus and blood in the stools; *Huang Qi* (Radix Astragali), *Dang Shen* (Radix Codonopsis), and *E Jiao* (Colla Corii Asini) for qi and blood deficiencies; *Wu Mei* (Fructus Mume) and *Shi Liu Pi* (Pericarpium Granati) for chronic diarrhea; *Di Yu* (Radix Sanguisorbae) and *Bai Ji* (Rhizoma Bletillae) powder for severe hematochezia; a larger dose of *Bai Shao* (Radix Paeoniae Alba) for severe abdominal pain; and removal of *Mu Xiang* (Radix Aucklandiae) and *Bing Lang* (Semen Arecae) for absence of abdominal pain.¹⁰

Sháo Yào Tāng (Peony Decoction)

TOXICOLOGY

In one experiment on the acute toxicology of *Shao Yao Tang*, oral administration of 100 g/kg of the formula caused fatality in 11 out of 12 mice within 72 hours. However, when *Bing Lang* (Semen Arecae) was removed from the formula, no fatality was reported at the same dose. The researchers concluded that the toxicity of the formula is due in part to *Bing Lang* (Semen Arecae).¹¹

Shao Yao Hou Po Tang (Peony and Magnolia Bark Decoction) treats intestinal disorders characterized by damp-heat, Liver qi stagnation, and Spleen deficiency. This formula contains herbs that drain damp-heat, regulate qi circulation, strengthen the Spleen and stop diarrhea. It is mostly used to treat inflammatory bowel disorder with alternating diarrhea and constipation, abdominal bloating, pain or mucus, flatulence and a feeling of incomplete evacuation.

AUTHORS' COMMENTS

The source text states to use *Shao Yao* (Radix Paeoniae) without specifying whether it should be *Bai Shao* (Radix Paeoniae Alba) or *Chi Shao* (Radix Paeoniae Rubra). *Bai Shao* (Radix Paeoniae Alba) is better at relieving pain and harmonizing the *ying* (nutritive) and *xue* (blood) levels, while *Chi Shao* (Radix Paeoniae Rubra) is more effective for clearing heat and cooling the blood. Thus, most scholars and clinicians agree that *Bai Shao* (Radix Paeoniae Alba) is a more suitable herb in *Shao Yao Tang*.

Shao Yao Tang and *Bai Tou Weng Tang* (Pulsatilla Decoction) are both representative formulas for dysentery. Both formulas treat similar signs and symptoms, but have distinctive differences:

- *Shao Yao Tang* treats diarrhea with pus and blood (of equal amounts) in the stools caused by qi and blood stagnation with damp-heat accumulation. It harmonizes qi and blood while draining damp-heat accumulation.

Sháo Yào Tāng (Peony Decoction)

• *Bai Tou Weng Tang* treats heat toxins invading the *xue* (blood) level leading to dysentery or diarrhea with burning sensation and the presence of pus and blood (with more blood than pus) in the stools. It has dual effects to bind the Intestines as well as to dispel toxins.¹²

Please refer to *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction) for a discussion of the differences between *Shao Yao Tang* and *Bai Tou Weng Tang* (Pulsatilla Decoction) for treating diarrhea.

According to Dr. Chang Wei-Yen, *Shao Yao Tang* is often combined with *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction) to treat acute burning diarrhea or enteritis caused by damp-heat accumulation with a feeling of rectal prolapse due to continuous diarrhea.

Huáng Qín Tāng (Scutellaria Decoction)

黃芩湯
黃芩湯

Pinyin Name: *Huang Qin Tang*
Literal Name: Scutellaria Decoction
Alternate Name: Scute and Licorice Combination
Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Huang Qin</i> (Radix Scutellariae)	9g [9g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	6g [9g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g [3g]
<i>Da Zao</i> (Fructus Jujubae)	12 pieces [4 pieces]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 10 cups [2,000 mL] of water until 3 cups [600 mL] of the liquid remains. Take 1 cup [200 mL] of the warm, strained decoction twice during the day, and once at night. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and stops diarrhea
2. Harmonizes the middle *jiao* and relieves pain

CLINICAL MANIFESTATIONS

Damp-heat dysentery: mild fever, a bitter taste in the mouth, abdominal pain, diarrhea, dysentery, a red tongue with a yellow tongue coating, and a rapid pulse.

CLINICAL APPLICATIONS

Acute enteritis, colitis, tenesmus, dysentery, and traveler's diarrhea.

EXPLANATION

Huang Qin Tang (Scutellaria Decoction) treats damp-heat dysentery characterized by damp-heat in the Intestines.

Huáng Qín Tāng (Scutellaria Decoction)

Huang Qin Tang (Scutellaria Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Damp-heat dysentery	<ul style="list-style-type: none"> Dysentery, mild fever, and abdominal pain: damp-heat in the Intestines Red tongue with a yellow tongue coating and a rapid pulse: excess heat in the body 	<ul style="list-style-type: none"> Clears heat and stops diarrhea Harmonizes the middle <i>jiao</i> and relieves pain 	<ul style="list-style-type: none"> <i>Huang Qin</i> (Radix Scutellariae) clears heat and dries dampness to relieve the dysentery. <i>Bai Shao</i> (Radix Paeoniae Alba) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) relieve spasms and cramps. <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) and <i>Da Zao</i> (Fructus Jujubae) nourish the Spleen and harmonize the middle <i>jiao</i>.

Damp-heat in the Intestines causes dysentery, mild fever, and abdominal pain. A yellow tongue coating and a rapid pulse suggest excess heat in the body.

This formula contains *Huang Qin* (Radix Scutellariae) to clear heat and dry dampness to relieve the dysentery. *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) relieve spasms and cramps. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Da Zao* (Fructus Jujubae) nourish the Spleen and harmonize the middle *jiao*.

MODIFICATIONS

- With diarrhea and dysentery, combine with *Shao Yao Tang* (Peony Decoction).
- With tenesmus, epigastric distention, fever, and abdominal pain, add *Da Huang* (Radix et Rhizoma Rhei).
- With mucus and blood in the stool, add charred *Shan Zha* (Fructus Crataegi) and charred *Di Yu* (Radix Sanguisorbae).
- With dysentery and abdominal pain, add *Huang Lian* (Rhizoma Coptidis) and *Gan Jiang* (Rhizoma Zingiberis).
- With exterior pathogenic factors, add *Ge Gen* (Radix Puerariae Lobatae), *Jing Jie* (Herba Schizonepetae), *Lian Qiao* (Fructus Forsythiae), and *Jin Yin Hua* (Flos Lonicerae Japonicae).
- With thirst, dryness, and irritability, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Chai Hu* (Radix Bupleuri).
- With nausea, vomiting, and abdominal pain, combine with *Huang Lian Tang* (Coptis Decoction).
- With nausea and vomiting caused by reversed flow of Stomach qi, add *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

CAUTIONS / CONTRAINDICATIONS

- *Huang Qin Tang* is contraindicated in dysentery or diarrhea caused by cold and dampness, and in patients with a dry mouth without thirst or a deep, slow pulse.
- Avoid foods that are pungent, spicy, oily or greasy while taking this herbal formula.¹

CLINICAL STUDIES AND RESEARCH

Diarrhea: One study reported effectiveness using modified *Huang Qin Tang* to treat 120 children with diarrhea in autumn. The herbal treatment contained *Huang Qin* (Radix Scutellariae), *Bai Shao* (Radix Paeoniae Alba), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Ge Gen* (Radix Puerariae Lobatae), *Fang Feng* (Radix Saposhnikoviae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Mai Ya* (Fructus Hordei Germinatus), *Wu Mei* (Fructus Mume), *Chen Pi* (Pericarpium Citri Reticulatae), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Da Zao* (Fructus Jujubae). The treatment protocol was to cook the herbs in water, and administer the decoction daily. Of 120 cases, the study reported complete recovery in 93 cases and improvement in 27 cases within 3 days.²

AUTHORS' COMMENTS

The source text states to use *Shao Yao* (Radix Paeoniae) without specifying whether it should be *Bai Shao* (Radix Paeoniae Alba) or *Chi Shao* (Radix Paeoniae Rubra). *Bai Shao* (Radix Paeoniae Alba) has a better effect to relieve pain and harmonize the *ying* (nutritive) and *xue* (blood) levels, while *Chi Shao* (Radix Paeoniae Rubra) is more effective at clearing heat and cooling the blood. Thus, most scholars and clinicians agree that *Bai Shao* (Radix Paeoniae Alba) is a more suitable herb in *Huang Qin Tang*.

Bái Tóu Wēng Tāng (Pulsatilla Decoction)

白頭翁湯 白头翁汤

Pinyin Name: *Bai Tou Weng Tang*

Literal Name: Pulsatilla Decoction

Alternate Name: Anemone Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Bai Tou Weng</i> (Radix Pulsatillae)	6g [15g]
<i>Huang Lian</i> (Rhizoma Coptidis)	9g [6g]
<i>Huang Bo</i> (Cortex Phellodendri Chinensis)	9g [12g]
<i>Qin Pi</i> (Cortex Fraxini)	9g [12g]

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients in 7 cups [1,400 mL] of water until 2 cups [400 mL] of the liquid remains. Take 1 cup [200 mL] of the warm, strained decoction. If the condition is not improved after the first dose, take another dose (1 cup or 200 mL). Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

- 1. Clears heat and eliminates toxins
- 2. Cools the blood and stops dysentery

CLINICAL MANIFESTATIONS

Toxic heat dysentery: abdominal pain, rectal tenesmus, burning sensations of the anus, diarrhea that is more red (blood) than white (pus), thirst with a strong desire to drink, a red tongue body with a yellow tongue coating, and a wiry, rapid pulse.

CLINICAL APPLICATIONS

Bacterial dysentery, amoebic dysentery, acute or chronic enteritis, postpartum enteritis, colitis, ulcerative colitis,

gastroenteritis, pneumonia, urinary tract infection, acute conjunctivitis, pelvic inflammatory disease, and leukorrhea.

EXPLANATION

Bai Tou Weng Tang (Pulsatilla Decoction) treats toxic heat dysentery, with toxic heat affecting the *jueyin* channel. If the toxic heat injures the qi and blood of the Stomach and Intestines, there will be abdominal pain, the presence of blood and pus in the stools, along with rectal tenesmus and burning sensations of the anus. Thirst with a strong desire to drink is caused by heat consuming body fluids as well as by body fluid depletion from the diarrhea.

Bai Tou Weng (Radix Pulsatillae) clears heat and eliminates toxins in the *xue* (blood) level. *Huang Lian* (Rhizoma Coptidis) helps *Bai Tou Weng* (Radix Pulsatillae) clear heat and eliminate toxins. *Huang Bo* (Cortex Phellodendri Chinensis) sedates damp-heat in the lower *jiao*. Together, they clear damp-heat, eliminate toxins, and stop diarrhea and dysentery. *Qin Pi* (Cortex Fraxini), a cold, astringent herb, clears heat, dries dampness, and relieves diarrhea and dysentery.

***Bai Tou Weng Tang* (Pulsatilla Decoction)**

Bái Tóu Wēng Tāng (Pulsatilla Decoction)

MODIFICATIONS

- With urinary urgency and pain, add *Mu Tong* (Caulis Akebiae), *Bai Mao Gen* (Rhizoma Imperatae), and *Jin Qian Cao* (Herba Lysimachiae).
- With chills and fever, add *Ge Gen* (Radix Puerariae Lobatae), *Jing Jie* (Herba Schizonepetae), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *Lian Qiao* (Fructus Forsythiae).
- With severe abdominal pain and rectal tenesmus, add *Mu Xiang* (Radix Aucklandiae), *Bing Lang* (Semen Arecae), *Bai Shao* (Radix Paeoniae Alba), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Zhi Qiao* (Fructus Aurantii).
- For amoebic dysentery, add *Shi Liu Pi* (Pericarpium Granati).
- For bacterial dysentery, add *Di Yu* (Radix Sanguisorbae), *Xian He Cao* (Herba Agrimoniae), and *Mu Xiang* (Radix Aucklandiae).

CAUTIONS / CONTRAINDICATIONS

- *Bai Tou Weng Tang* treats heat-type dysentery, with toxic heat in the Intestines characterized by dark purplish blood. This formula is contraindicated in cases of chronic dysentery or diarrhea due to deficiency.
- This formula contains bitter and cold herbs which may injure the Spleen and Stomach. Therefore, it should not be taken at large doses or for a prolonged period of time.

PHARMACOLOGICAL EFFECTS

Antibiotic: Administration of *Bai Tou Weng Tang* in various doses was associated with an inhibitory effect *in vitro* against many different types of bacillus, staphylococcus, and other microorganisms.¹

CLINICAL STUDIES AND RESEARCH

1. **Bacterial dysentery:** In one clinical study, 249 patients with bacterial dysentery were effectively treated, with an average of 1-5 days for reduction of body temperature and normal bowel movement within 3 days.² In another report, modified *Bai Tou Weng Tang* was used to treat 100 patients with bacterial dysentery with a 97% effectiveness rate and no reports of significant side effects.³ Lastly, one study reported success using modified *Bai Tou Weng Tang* as a rectal enema to treat 87 patients with chronic bacterial dysentery. The treatment protocol was to cook the herbs in 1,000 mL of water to yield 200 mL of an herbal solution. The herbal solution was instilled into the rectum at bedtime for 5 days, followed by 2 days of rest. This cycle was repeated 1-4 times as needed. The study reported complete recovery in 65 of 87 patients.⁴
2. **Amoebic dysentery:** In one report, 22 out of 25 patients with amoebic dysentery were treated with complete recovery using modified *Bai Tou Weng Tang*. Out of 22

patients who had complete recovery, 5 responded within 11 doses, and 12 responded within 6-10 doses. The modifications included the addition of *Di Yu* (Radix Sanguisorbae) and *Ku Shen* (Radix Sophorae Flavescentis), and the removal of *Huang Lian* (Rhizoma Coptidis).⁵ Another study reported complete recovery in 114 of 116 patients with amoebic dysentery using both *Bai Tou Weng Tang* and *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction) with modifications. *Jin Yin Hua* (Flos Lonicerae Japonicae) was added for high fever with an aversion to cold. *Di Yu* (Radix Sanguisorbae) was added for blood in the stools. *Ban Xia* (Rhizoma Pinelliae) was added for nausea and vomiting. *Bai Shao* (Radix Paeoniae Alba) was added for abdominal pain.⁶

3. **Enteritis:** In one report, 144 patients with enteritis were treated with 95.8% effectiveness within 48 hours using *Bai Tou Weng Tang*.⁷
4. **Colitis:** One study reported 91.43% effectiveness using modified *Bai Tou Weng Tang* to treat 35 patients with colitis. In addition to using *Bai Tou Weng Tang* as the base formula, *Mu Dan Pi* (Cortex Moutan), *Dang Gui* (Radix Angelicae Sinensis) and charred *Jin Yin Hua* (Flos Lonicerae Japonicae) were added during acute episodes; and *Yan Hu Suo* (Rhizoma Corydalis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Tao Ren* (Semen Persicae) were added during remission. The treatment protocol was to administer the herbs twice daily, for 10 days per course of treatment, for 2 courses total. Of 35 cases, the study reported complete recovery in 14 cases, improvement in 18 cases, and no change in 3 cases.⁸
5. **Gastroenteritis:** One study reported complete recovery in 28 of 30 patients with gastroenteritis when treated with *Bai Tou Weng Tang*. The treatment protocol was to administer the herbs in capsule form three times daily, and relief was achieved in an average of 3 days.⁹
6. **Pneumonia:** In one report, 56 out of 67 patients with pneumonia were treated with complete recovery using modified *Bai Tou Weng Tang*. The 11 patients who did not respond, however, continued to deteriorate. In addition to *Bai Tou Weng Tang*, *Ku Xing Ren* (Semen Armeniacae Amarum), *Ma Huang* (Herba Ephedrae), *Yu Xing Cao* (Herba Houttuyniae), and *Da Qing Ye* (Folium Isatidis) were added for wind-heat attacking the Lung; *Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Di Gu Pi* (Cortex Lycii) and *Tian Hua Fen* (Radix Trichosanthis) for heat damaging the yin and body fluids; and *Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), *Sha Shen* (Radix Glehniae seu Adenophorae), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Bai Hua She She Cao* (Herba Hedyotis) for heat in the *qi* (energy) and *xue* (blood) levels.¹⁰

Bái Tóu Wēng Tāng (Pulsatilla Decoction)

7. **Urinary tract infection:** Modified *Bai Tou Weng Tang* was used to treat 63 patients with various types of urinary tract infections. Of all patients, 19 had acute infection, 44 had chronic infection; 12 had urethra infections, 33 had bladder infections, and 18 had kidney infections. The study reported marked improvement in 29 cases, moderate improvement in 24 cases, and no effect in 10 cases.¹¹
8. **Pelvic inflammatory disease:** One study reported effectiveness using modified *Bai Tou Weng Tang* to treat acute pelvic inflammatory disease. In addition to the base formula, modifications were made by adding charred *Mian Ma Guan Zhong* (Rhizoma Dryopteridis Crassirhizomatis) and *Yi Mu Cao* (Herba Leonuri) for postpartum bleeding caused by presence of placental remnants; *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) for qi deficiency with spontaneous perspiration; *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Pu Gong Ying* (Herba Taraxaci) for Stomach heat; *Xiang Fu* (Rhizoma Cyperi) and *Ju He* (Semen Citri Reticulatae) for lower abdominal pain; *Yi Yi Ren* (Semen Coicis) and *Qu Mai* (Herba Dianthi) for accumulation of fluid in the pelvic region; *Chen Pi* (Pericarpium Citri Reticulatae), *Fu Ling* (Poria), and *Sha Ren* (Fructus Amomi) for poor appetite; and *Da Huang* (Radix et Rhizoma Rhei) for dry stools. Of 107 cases, the study reported complete recovery in 67 cases after one course of treatment (10 days), and 40 cases after 2 courses (20 days).¹²
9. **Acute conjunctivitis:** Eighty-seven patients with acute conjunctivitis were treated with complete recovery within 1-3 doses. Out of 87 cases, 26 had complete recovery within 1 dose, 41 cases within 2 doses, and 20 cases within 3 doses. The herbal formula was modified by adding *Mu Zei* (Herba Equiseti Hiemalis).¹³

(Pulsatilla Decoction plus Licorice and Ass-Hide Gelatin)

白頭翁加甘草阿膠湯

白头翁加甘草阿胶汤

Pinyin Name: *Bai Tou Weng Jia Gan Cao E Jiao Tang*

Literal Name: Pulsatilla Decoction plus Licorice and Ass-Hide Gelatin

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

<i>Bai Tou Weng</i> (Radix Pulsatillae)	6g [15g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g [3g]
<i>E Jiao</i> (Colla Corii Asini)	6g [9g]
<i>Qin Pi</i> (Cortex Fraxini)	9g [12g]
<i>Huang Lian</i> (Rhizoma Coptidis)	9g [6g]
<i>Huang Bo</i> (Cortex Phellodendri Chinensis)	9g [12g]

The source text states to cook the ingredients in 7 cups [1,400 mL] of water until 2.5 cups [500 mL] of the liquid remain. Add *E Jiao* (Colla Corii Asini) to the strained decoction and stir until it is dissolved completely. Take the warm decoction in three equally-divided doses. Today, the decoction may be prepared using the doses suggested in brackets.

Bai Tou Weng Jia Gan Cao E Jiao Tang (Pulsatilla Decoction plus Licorice and Ass-Hide Gelatin) is composed of *Bai Tou Weng Tang* plus *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *E Jiao* (Colla Corii Asini). The main actions of this formula are to clear heat, eliminate toxins, tonify blood and nourish yin. The two additional herbs nourish blood and yin. This formula was originally designed for postpartum women with toxic heat dysentery accompanied by blood and yin deficiencies after delivery. Today, this formula is suitable for patients suffering from toxic heat dysentery who cannot tolerate solely sedating and draining herbs because of blood and yin deficiencies.

AUTHORS' COMMENTS

Shao Yao Tang (Peony Decoction) and *Bai Tou Weng Tang* both treat bacterial and amoebic dysentery.

- *Shao Yao Tang* treats damp-heat dysentery resulting from qi and blood stagnation. It contains moving and purging herbs and does not contain any astringent, binding herbs to stop diarrhea. Its treatment strategy is to harmonize the qi and blood as well as to clear damp-heat.
- *Bai Tou Weng Tang* is more suitable for treating heat dysentery in which the toxic heat has extensively injured the blood. The treatment plan for heat dysentery is to clear heat, eliminate heat toxins, and cool the blood to relieve the dysentery. The formula includes herbs that bind the Intestines and stop diarrhea.

Please refer to *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction) for a comparative analysis with *Shao Yao Tang* (Peony Decoction) and *Bai Tou Weng Tang* in treating diarrhea.

清虚热剂

— Deficiency-Heat Clearing Formulas

Qīng Hāo Biē Jiǎ Tāng

(Artemisia Annua and Soft-Shelled Turtle Shell Decoction)

青蒿鳖甲汤

青蒿鳖甲汤

Pinyin Name: *Qing Hao Bie Jia Tang***Literal Name:** Artemisia Annua and Soft-Shelled Turtle Shell Decoction**Alternate Name:** Artemisia Annua Decoction**Original Source:** *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798**COMPOSITION**

<i>Bie Jia</i> (Carapax Trionycis)	15g
<i>Qing Hao</i> (Herba Artemisiae Annuae)	6g
<i>Di Huang</i> (Radix Rehmanniae)	12g
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	6g
<i>Mu Dan Pi</i> (Cortex Moutan)	9g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients in 5 cups of water until it is reduced to 2 cups. Take 1 cup daily. Note: Cooking *Qing Hao* (Herba Artemisiae Annuae) at a high temperature for a prolonged period of time will destroy its active ingredients. Therefore, it should not be cooked with the rest of the herbs. Rather, for maximum effect, it should be steeped in hot water and served along with the decoction.

CHINESE THERAPEUTIC ACTIONS

Nourishes yin and vents interior deficiency heat

CLINICAL MANIFESTATIONS

Late-stage febrile diseases with extensive yin and body fluid deficiencies: a feeling of warmth at night and coolness in the morning, resolution of fever without perspiration, a red tongue body with a scanty tongue coating, and a fine, rapid pulse.

CLINICAL APPLICATIONS

Fever (from cancer, after surgery, and in children), common cold, vertigo, phthisis, chronic pyelonephritis, kidney tuberculosis, and menopausal symptoms.

EXPLANATION

Qing Hao Bie Jia Tang (Artemisia Annua and Soft-Shelled Turtle Shell Decoction) treats late-stage febrile diseases with extensive yin and body fluid deficiencies. Usually in late-stage febrile diseases, there is still some heat which has not been completely cleared, and now resides deep in the body. Moreover, yin and body fluids have been extensively injured and consumed by the heat pathogen, and produces a situation in which the insufficient yin fails to contain yang, resulting in the symptom of a feeling of warmth at night and coolness in the morning. Since the body fluids are already depleted, there is an absence of perspiration. A red tongue body with a scanty tongue coating, and a fine, rapid pulse suggest deficiency heat in the interior.

Because this is not a condition of excess heat in the *qi* (energy) level, strong heat-clearing herbs are not suitable. Neither are pure yin tonics called for, because pure tonification will trap the remaining heat inside the body. The best treatment plan is to clear and vent the heat while nourishing yin. *Bie Jia* (Carapax Trionycis) nourishes yin to clear heat; it has the unique function of entering deeply

Qing Hao Bie Jia Tang (Artemisia Annua and Soft-Shelled Turtle Shell Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Late-stage febrile diseases with extensive yin and body fluid deficiencies	<ul style="list-style-type: none">• A feeling of warm sensations at night and cool sensations in the morning: late stage of febrile diseases in which heat resides deep in the body• Resolution of fever without perspiration and night fever that subsides in the daytime: extreme yin and body fluid deficiencies• Red tongue body, a scanty tongue coating, and a fine, rapid pulse: deficiency heat in the interior	Nourishes yin and vents interior deficiency heat	<ul style="list-style-type: none">• <i>Bie Jia</i> (Carapax Trionycis) nourishes yin and clears heat deep in the body.• <i>Qing Hao</i> (Herba Artemisiae Annuae) vents deficiency heat and leads it out of the body.• <i>Di Huang</i> (Radix Rehmanniae), <i>Zhi Mu</i> (Rhizoma Anemarrhenae) and <i>Mu Dan Pi</i> (Cortex Moutan) nourish yin and clears deficiency heat.

into the *ying* (nutritive) and *xue* (blood) levels to search for and clear the remaining heat pathogen. *Qing Hao* (Herba Artemisiae Annuae), on the other hand, cannot enter into such a deep level. However, due to its aromatic property, it can vent the deficiency heat that *Bie Jia* (Carapax Trionycis) has cleared and guide it out of the body. *Di Huang* (Radix Rehmanniae) nourishes yin and clears heat. *Zhi Mu* (Rhizoma Anemarrhenae) moistens dryness and helps *Qing Hao* (Herba Artemisiae Annuae) and *Bie Jia* (Carapax Trionycis) clear deficiency heat. *Mu Dan Pi* (Cortex Moutan) is acrid and cold, and helps disperse and clear deficiency heat.

MODIFICATIONS

- With unremitting low-grade fever associated with tuberculosis of the kidney or chronic pyelonephritis, add *Bai Mao Gen* (Rhizoma Imperatae).
- With unremitting low-grade fever with unknown cause, add *Bai Wei* (Radix et Rhizoma Cynanchi Atrati), *Shi Hu* (Caulis Dendrobii) and *Di Gu Pi* (Cortex Lycii).
- With afternoon fever and cold sensations in the morning with thirst, remove *Di Huang* (Radix Rehmanniae) and add *Tian Hua Fen* (Radix Trichosanthis).
- For children with yin-deficient heat during the summer, add *Bai Wei* (Radix et Rhizoma Cynanchi Atrati) and *He Geng* (Caulis Nelumbinis).
- For steaming bones sensations caused by pulmonary tuberculosis, add *Bei Sha Shen* (Radix Glehniae) and *Mo Han Lian* (Herba Ecliptae).
- For pneumonia with measles and toxic heat lingering in the interior, add *Yin Chai Hu* (Radix Stellariae) and *Bai Wei* (Radix et Rhizoma Cynanchi Atrati).

CAUTIONS / CONTRAINDICATIONS

Qing Hao Bie Jia Tang is contraindicated in patients with yin deficiency and Liver wind rising.

CLINICAL STUDIES AND RESEARCH

1. **Fever in cancer:** Administration of modified *Qing Hao Bie Jia Tang* has been shown in many studies to effectively reduce body temperature in cancer patients with fever. In one study, use of the modified formula in 25 cancer patients with fever (15-60 days with fever) was associated with significant effect in 10 patients, moderate effect in 10 patients, and no effect in 5 patients. The herbs were given in decoction daily for 10 packs of herbs per course of treatment. The herbal formula contained *Qing Hao* (Herba Artemisiae Annuae) 15g, *Bie Jia* (Carapax Trionycis) 20g, *Di Huang* (Radix Rehmanniae) 10g, *Zhi Mu* (Rhizoma Anemarrhenae) 10g, *Mu Dan Pi* (Cortex Moutan) 15g, *Chai Hu* (Radix Bupleuri) 10g, *Bai Shao* (Radix Paeoniae Alba) 10g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g, and *Bai Hua She She Cao* (Herba Hedyotis) 30g. Modifications were made by adding *Tai Zi Shen* (Radix Pseudostellariae) 10g, *Di Gu Pi* (Cortex Lycii) 10g, and *Tian Hua Fen* (Radix Trichosanthis) 15g for *wu xin re* (five-center heat); *Fo Shou* (Fructus Citri Sarcodactylis) 10g, *Yu Zhi Zi* (Fructus Akebiae) 10g, *Chen Pi* (Pericarpium Citri Reticulatae) 6g, *Gu Ya* (Fructus Setariae Germinatus) 10g, *Mai Ya* (Fructus Hordei Germinatus) 10g, and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) 6g for poor appetite; *Fu Xiao Mai* (Fructus Triticis Levis) 30g and *Mu Li* (Concha Ostreae) 30g for night perspiration; *Yan Hu Suo* (Rhizoma Corydalis) 10g, *Wu Yao* (Radix Linderae) 10g, and *Xu Chang Qing* (Radix et Rhizoma Cynanchi Paniculati) 10g for severe pain; *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) 10g, *Kuan Dong Hua* (Flos Farfarae) 10g, *Yu Zhu* (Rhizoma Polygonati Odorati) 10g, *Mai Dong*

Qīng Hǎo Biē Jiǎ Tāng

(Artemisia Annuua and Soft-Shell Turtle Shell Decoction)

(Radix Ophiopogonis) 10g, *Jie Geng* (Radix Platycodonis) 5g, and *Pi Pa Ye* (Folium Eriobotryae) 10g for cough with scanty sputum that is hard to expectorate; and *Gua Lou* (Fructus Trichosanthis) 30g, *Huo Ma Ren* (Fructus Cannabis) 10g, and processed *Da Huang* (Radix et Rhizoma Rhei) 10g for constipation.¹

2. **Fever in lung cancer:** Twenty patients with fever associated with lung cancer were treated with modified *Qing Hao Bie Jia Tang* with 90% effectiveness in reducing body temperature. The duration of fever prior to treatment ranged from 10-50 days, with temperature ranging from 38-39°C / 100.4-102.2°F or above. In addition to fever, other clinical presentations included cough, sputum with blood, a dry mouth and throat, *wu xin re* (five-center heat), tidal fever, a red tongue body with a scanty tongue coating, and a fine, rapid pulse. The herbal treatment contained *Qing Hao* (Herba Artemisiae Annuuae) 15g, *Bie Jia* (Carapax Trionycis) 20g (pre-decocted), *Di Huang* (Radix Rehmanniae) 20g, *Zhi Mu* (Rhizoma Anemarrhenae) 10g, *Mu Dan Pi* (Cortex Moutan) 10g, *Tian Hua Fen* (Radix Trichosanthis) 15g, *Bai He* (Bulbus Lilii) 15g, *Zao Xiu* (Rhizoma Paridis) 30g, and *Bai Hua She She Cao* (Herba Hedyotis) 30g. Modifications were made by adding *Bai Mao Gen* (Rhizoma Imperatae) 30g and *Xian He Cao* (Herba Agrimoniae) 30g for coughing of blood; *Gua Lou* (Fructus Trichosanthis) 15g and *Yu Jin* (Radix Curcumae) 15g for feeling of oppression and pain in the chest; *Fu Xiao Mai* (Fructus Triticis Levis) 30g and *Mu Li* (Concha Ostreae) 15g (pre-decocted) for night sweats; *Huo Ma Ren* (Fructus Cannabis) 30g for constipation; dry-fried *Shan Zha* (Fructus Crataegi) 10g and dry-fried *Mai Ya* (Fructus Hordei Germinatus) 15g for poor appetite; and *Shi Gao* (Gypsum Fibrosum) 30g and *Di Gu Pi* (Cortex Lycii) 15g for high fever. The herbs were given in decoction for 10 days per course of treatment. Of 20 patients, the study reported significant improvement in 12 patients, moderate improvement in 6 patients, and no change in 2 patients.²

3. **Fever after surgery:** In one study, 100 women with persistent post-surgical low-grade fever (37.3-38°C / 99.1-100.4°F) refractory to antibiotic therapy were treated with modified *Qing Hao Bie Jia Tang* with good results. The herbal formula contained *Di Huang* (Radix Rehmanniae) 15g, processed *Bie Jia* (Carapax Trionycis) 12g, *Qing Hao* (Herba Artemisiae Annuuae) 10g, *Zhi Mu* (Rhizoma Anemarrhenae) 10g, *Mu Dan Pi* (Cortex Moutan) 10g, *Bai Wei* (Radix et Rhizoma Cynanchi Atrati) 10g, *Yin Chai Hu* (Radix Stellariae) 10g, *Bai Shao* (Radix Paeoniae Alba) 10g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 5g. The herbs were given in decoction one time daily,

starting 5-10 days after surgery in 81 patients, and 11-15 days in 19 patients. Of 100 patients, 82 received only herbal therapy, and 18 received both herbal and antibiotic therapies. The study reported significant improvement in 70 patients, moderate improvement in 23 patients, and no effect in 7 patients.³ In another study, 32 patients with post-surgical fever characterized by yin-deficient heat were treated with modified *Qing Hao Bie Jia Tang* with good results. Of 32 patients, the study reported normal body temperature in 8 patients after 1 day, 19 patients after 2 days, and 5 patients after 3 days.⁴

4. **Common cold:** Modified *Qing Hao Bie Jia Tang* was used with good results to treat common cold characterized by yin deficiency in 75 patients (48 males and 27 females, between 1 and 50 years of age, with 1-15 days of illness). The herbal formula contained *Qing Hao* (Herba Artemisiae Annuuae) 10-15g, *Bie Jia* (Carapax Trionycis) 15-30g, *Sang Ye* (Folium Mori) 10-12g, *Tian Hua Fen* (Radix Trichosanthis) 10-12g, *Zhi Mu* (Rhizoma Anemarrhenae) 10-12g, and *Mu Dan Pi* (Cortex Moutan) 10-12g. Modifications were made as follows: *Tai Zi Shen* (Radix Pseudostellariae) for qi deficiency; *Bei Mu* (Bulbus Fritillariae) and *Bo He* (Herba Menthae) for cough, *Bai Wei* (Radix et Rhizoma Cynanchi Atrati) and *Mai Dong* (Radix Ophiopogonis) for severe yin deficiency; and *Ou Jie* (Nodus Nelumbinis Rhizomatis) and charred *Di Huang* (Radix Rehmanniae) for blood in the sputum. Out of 75 patients, 55 had complete recovery, 15 had significant improvement, and 5 had no benefit. The overall rate of effectiveness was 93.3%.⁵
5. **Vertigo:** Seventy-three patients with vertigo were treated with modified *Qing Hao Bie Jia Tang* with an overall effective rate of 93.2%. The herbal formula contained *Qing Hao* (Herba Artemisiae Annuuae) 9g, *Bie Jia* (Carapax Trionycis) 12g (pre-decocted), *Zhi Mu* (Rhizoma Anemarrhenae) 9g, *Di Huang* (Radix Rehmanniae) 30g, *Mu Dan Pi* (Cortex Moutan) 9g, *Tian Ma* (Rhizoma Gastrodiae) 12g, *Ge Gen* (Radix Puerariae Lobatae) 30g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 12g, and others as needed. Most patients had partial to complete resolution of vertigo within 7-14 days.⁶

Literal Name: Nourish Yin and Clear Heat Decoction

Original Source: *Tian Jin Zhong Yi Xue Yuan* (Tianjin University of Chinese Medicine) in 1989

Qīng Hāo Biē Jiǎ Tāng

(*Artemisia Annua* and Soft-Shelled Turtle Shell Decoction)

Qing Hao (Herba *Artemisiae Annuae*)
Bai Wei (Radix et Rhizoma *Cynanchi Atrati*)
Di Huang (Radix *Rehmanniae*)
Zhi Mu (Rhizoma *Anemarrhenae*)
Mu Dan Pi (Cortex *Moutan*)
Gan Cao (Radix et Rhizoma *Glycyrrhizae*)
Suan Zao Ren (Semen *Ziziphi Spinosa*)
Da Zao (Fructus *Jujubae*)
Shou Wu Teng (Caulis *Polygoni Multiflori*)
Fu Xiao Mai (Fructus *Tritici Levis*)
Chai Hu (Radix *Bupleuri*)
Bai Shao (Radix *Paeoniae Alba*)
Di Gu Pi (Cortex *Lycii*)
Huang Bo (Cortex *Phellodendri Chinensis*)

Zi Yin Qing Re Tang (Nourish Yin and Clear Heat Decoction) follows the principles of two classic formulas: *Qing Hao Bie Jia Tang* (*Artemisia Annua* and Soft-Shelled Turtle Shell Decoction) to nourish yin and clear deficiency heat; and *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction) to nourish the Heart and calm the *shen* (spirit). Clinical applications of this formula include menopause, hot flashes, night sweats, mood swings, irritability, and emotional instability.

AUTHORS' COMMENTS

Qing Hao Bie Jia Tang, *Qin Jiao Bie Jia San* (*Gentiana Macrophylla* and Soft-Shelled Turtle Shell Powder) and *Qing Gu San* (Cool the Bones Powder) all treat yin-deficient heat, but have the following differences:

- *Qing Hao Bie Jia Tang* nourishes yin through the use of *Bie Jia* (*Carapax Trionycis*) and vents heat through the aromatic property of *Qing Hao* (Herba *Artemisiae Annuae*). The formula emphasizes nourishing interior yin and dispersing deficiency heat to clear the deep, hidden heat. It is most suitable for late stages of febrile disorders with night fever and morning coolness.
- *Qin Jiao Bie Jia San* nourishes yin while dispersing residual lingering wind in the body due to improper

treatment of an exterior wind condition. It nourishes yin and blood and clears deficiency fire.

- *Qing Gu San* is the best formula for relieving steaming bones sensations and night fever because it contains the most herbs to clear deficiency heat. It emphasizes relieving steaming bones sensations by penetrating the heat and nourishing yin.⁷

Qing Hao Bie Jia Tang and *Zhu Ye Shi Gao Tang* (Bamboo Leaves and Gypsum Decoction) both treat symptoms related to late-stage febrile disorders. Their differences are as follows:

- *Qing Hao Bie Jia Tang* more strongly nourishes yin and clears deficiency heat in the deeper parts of the body, and is more suitable for night fever, morning coolness, and absence of perspiration. It nourishes yin and vents heat.
- *Zhu Ye Shi Gao Tang* nourishes yin, benefits qi and harmonizes the Stomach. It is mainly used for late-stage febrile disorders with lingering fever, and qi and yin deficiencies, with symptoms such as perspiration, irritability, shortness of breath, thirst, and dry heaves or nausea. *Zhu Ye Shi Gao Tang* nourishes both yin and qi and harmonizes the Stomach.⁸

Qín Jiǎo Biē Jiǎ Sǎn

(Gentiana Macrophylla and Soft-Shelled Turtle Shell Powder)

秦艽鳖甲散

秦艽鳖甲散

Pinyin Name: *Qin Jiao Bie Jia San***Literal Name:** Gentiana Macrophylla and Soft-Shelled Turtle Shell Powder**Alternate Names:** *Chin Chiu Pieh Chia San*, *Chin Jiao Bie Jia San*, Chin-Chiu and Turtle Shell Formula, Large-Leaf Gentian and Turtle Shell Powder, Chin-chiu Formula**Original Source:** *Wei Sheng Bao Jian* (Precious Mirror of Health) by Luo Tian-Yi in the Yuan Dynasty**COMPOSITION**

<i>Qin Jiao</i> (Radix Gentianae Macrophyllae)	15g [5g]
<i>Chai Hu</i> (Radix Bupleuri)	30g [9g]
<i>Bie Jia</i> (Carapax Trionycis), <i>zhi</i> (fried with liquid) until crisp	30g [9g]
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	15g [5g]
<i>Di Gu Pi</i> (Cortex Lycii)	30g [9g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	15g [5g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients coarsely. Cook 15g of the powder with 5 pieces of *Qing Hao* (Herba Artemisiae Annuae) and 1 piece of *Wu Mei* (Fructus Mume) in one large bowl of water until 70% of the liquid remains. Take the warm, strained decoction on an empty stomach and again at bedtime. This formula may be prepared as a decoction using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin and blood
2. Clears deficiency heat and reduces steaming bones sensations

CLINICAL MANIFESTATIONS

Feng lao bing (wind consumption disease): steaming bones sensations, night sweats, tidal fever with warm sensations in the afternoon, red lips and cheeks, cough, lethargy, a dry mouth and throat, muscle emaciation, and a faint, rapid pulse.

CLINICAL APPLICATIONS

Recovery from chronic respiratory tract infection, such as pulmonary tuberculosis, chronic bronchitis, and pneumonia.

EXPLANATION

Qin Jiao Bie Jia San (Gentiana Macrophylla and Soft-Shelled Turtle Shell Powder) treats *feng lao bing* (wind consumption disease), a yin-deficient heat syndrome characterized by tidal fever and steaming bones sensations. This condition is caused by incorrect treatment of

an exterior syndrome in which the exterior pathogenic factor travels to the interior and transforms into heat. The interior heat then consumes yin and blood to cause yin and blood deficiencies.

Two key clinical manifestations are tidal fever and steaming bones sensations, both of which are caused by yin-deficient heat in the interior. Other symptoms, such as night sweats and red lips and cheeks, are also typical of yin-deficient heat flaring upward. As a yin organ, the Lung is easily affected by heat. If the heat interferes with the qi flow of the Lung, coughing occurs. A dry mouth and throat are the direct results of lack of nourishment. Lethargy and emaciation of the muscles are due to heat extensively consuming the blood and due to lack of nourishment.

Qin Jiao (Radix Gentianae Macrophyllae) and *Chai Hu* (Radix Bupleuri) dispel wind and release the exterior. *Bie Jia* (Carapax Trionycis) and *Zhi Mu* (Rhizoma Anemarrhenae) nourish yin and clear heat. *Di Gu Pi* (Cortex Lycii) and *Qing Hao* (Herba Artemisiae Annuae) clear deficiency heat and relieve steaming bones sensations. *Dang Gui* (Radix Angelicae Sinensis) tonifies and harmonizes the blood. *Wu Mei* (Fructus Mume), an astringent herb, retains yin and body fluids and stops perspiration.

MODIFICATIONS

- With perspiration and aversion to wind, add *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

Qín Jiǎo Biē Jiǎ Sǎn

(Gentiana Macrophylla and Soft-Shelled Turtle Shell Powder)

Qin Jiao Bie Jia San (Gentiana Macrophylla and Soft-Shelled Turtle Shell Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Feng lao bing</i> (wind consumption disease)	<ul style="list-style-type: none"> • Tidal fever, steaming bones sensations, night sweats, and red lips and cheeks: deficiency heat rising upward • Dry mouth and throat: heat consuming body fluids in the Lung • Coughing: heat affecting Lung qi circulation • Lethargy and emaciation of the muscles: heat consuming the blood and hindering nourishment • Faint, rapid pulse: deficiency and heat condition 	<ul style="list-style-type: none"> • Nourishes yin and blood • Clears deficiency heat and reduces steaming bones sensations 	<ul style="list-style-type: none"> • <i>Qin Jiao</i> (Radix Gentianae Macrophyllae) and <i>Chai Hu</i> (Radix Bupleuri) dispel wind and release the exterior. • <i>Bie Jia</i> (Carapax Trionycis) and <i>Zhi Mu</i> (Rhizoma Anemarrhenae) nourish yin and clear heat. • <i>Di Gu Pi</i> (Cortex Lycii) and <i>Qing Hao</i> (Herba Artemisiae Annuae) clear deficiency heat and relieve steaming bones sensations. • <i>Dang Gui</i> (Radix Angelicae Sinensis) tonifies and harmonizes the blood. • <i>Wu Mei</i> (Fructus Mume) retains yin and body fluids and stops perspiration.

- If there is neck stiffness, add *Ge Gen* (Radix Puerariae Lobatae).
- With high fever and muscle spasms, add *Tian Ma* (Rhizoma Gastrodiae), *Gou Teng* (Ramulus Uncariae cum Uncis), and *Quan Xie* (Scorpio).
- When there is cough but no perspiration, add *Ma Huang* (Herba Ephedrae) and *Ku Xing Ren* (Semen Armeniacae Amarum).
- With cough and wheezing, add *Sang Bai Pi* (Cortex Mori) and *Zi Wan* (Radix et Rhizoma Asteris).
- With hot flashes, add *Bai Wei* (Radix et Rhizoma Cynanchi Atrati) and *Sha Shen* (Radix Glehniae seu Adenophorae).

CLINICAL STUDIES AND RESEARCH

1. **Pulmonary tuberculosis:** In one report, patients with pulmonary tuberculosis with tidal fever were treated with good results. Out of 24 patients, 21 had significant improvement and 3 had moderate improvement.¹
2. **Viral infection:** In one report, 36 patients with viral infection of the respiratory tract were treated with modified *Qin Jiao Bie Jia San* with good results. Out of 36 patients, 9 had significant improvement, 24 had moderate improvement, and 3 had slight improvement. The modifications were as follows: *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) were added for perspiration with aversion to wind; *Ge Gen* (Radix Puerariae Lobatae) was added for neck stiffness; *Tian Ma* (Rhizoma Gastrodiae), *Gou Teng* (Ramulus Uncariae cum Uncis), and *Quan Xie* (Scorpio) were added for high fever with convulsions; and *Ma*

Huang (Herba Ephedrae) and *Ku Xing Ren* (Semen Armeniacae Amarum) were added for cough and wheezing without perspiration.²

3. **Respiratory tract infection:** Recurrent respiratory tract infections in children were successfully treated with modified *Qin Jiao Bie Jia San*. The herbal treatment contained *Qin Jiao* (Radix Gentianae Macrophyllae) 5g, *Bie Jia* (Carapax Trionycis) 5g, *Tai Zi Shen* (Radix Pseudostellariae) 5g, *Bai Bu* (Radix Stemonae) 10g, *Di Gu Pi* (Cortex Lycii) 10g, *Zhi Mu* (Rhizoma Anemarrhenae) 6g, *Qing Hao* (Herba Artemisiae Annuae) 6g, *Chai Hu* (Radix Bupleuri) 6g, and *Wu Mei* (Fructus Mume) 6g. *Huang Qi* (Radix Astragali) 15g was added for qi deficiency; *Di Huang* (Radix Rehmanniae) 15g for yin deficiency; *Huang Qin* (Radix Scutellariae) 10g for phlegm and heat; and *Wu Wei Zi* (Fructus Schisandrae Chinensis) 5g for profuse perspiration. The treatment protocol was to administer the herbs in decoction form daily, for 7 days per course of treatment. Of 30 cases, the study reported complete recovery in 18 cases (complete resolution of all symptoms without recurrence for one year), significant improvement in 9 cases (resolution of symptoms), and no change in 3 cases. The overall rate of effectiveness was 90%.³

AUTHORS' COMMENTS

Qin Jiao Bie Jia San is commonly used for tidal fever or fluid-damage conditions in post febrile disorders and tuberculosis. It is also effective for chronic recurrent low-grade fever with no detectible medical cause.

Qín Jiǎo Biē Jiǎ Sǎn

<i>Qing Hao</i> (Herba Artemisiae Annuae)	3g
<i>Bie Jia</i> (Carapax Trionycis), <i>zhi</i> (fried) with vinegar	3g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	1.5g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients in 2 large bowls of water until 80% of the liquid remain. Take the decoction between meals.

CHINESE THERAPEUTIC ACTIONS

1. Clears deficiency heat
2. Reduces tidal fever and steaming bones sensations

CLINICAL MANIFESTATIONS

Tidal fever and steaming bones sensations due to yin-deficient heat: tidal fever in late afternoon or at night, unremitting low-grade fever, night sweats, steaming bones sensations, irritability, emaciation, a dry throat, red cheeks, thirst, a red tongue body with a scanty tongue coating, and a fine, rapid pulse.

CLINICAL APPLICATIONS

Fever, pulmonary tuberculosis, and leukemia.

EXPLANATION

Qing Gu San (Cool the Bones Powder) treats chronic heat disorder leading to yin deficiency and deficiency heat. Deficiency heat in the interior consumes yin and body fluids, leading to tidal fever or unremitting low-grade fever

because yin is deficient relative to the yang of the body. Night sweats occur because yin, being deficient, is unable to contain yang when yang qi returns to the deeper levels of the body while one sleeps. Steaming bones sensations is an indication of yin deficiency with deficiency heat affecting the bone marrow. Emaciation and dry throat are the results of lack of yin nourishment. Irritability is the direct result of *shen* (spirit) disturbance, secondary to yin not being able to nourish the Heart, and also heat disturbing the *shen*. Red cheeks, a red tongue body with a scanty tongue coating, and a fine, rapid pulse are all clinical manifestations of yin deficiency with heat in the interior.

Yin Chai Hu (Radix Stellariae) clears deficiency heat in the deeper level and cools the blood without sedating the body. It is an essential herb for clearing heat deep in the bone marrow manifesting in steaming bones sensations. *Zhi Mu* (Rhizoma Anemarrhenae) nourishes yin and sedates deficiency fire. *Hu Huang Lian* (Rhizoma Picrorhizae) enters and clears heat in the *xue* (blood) level. *Di Gu Pi* (Cortex Lycii) clears deficiency heat in the Lung, Liver, and Kidney. *Qing Hao* (Herba Artemisiae Annuae) and *Qin Jiao* (Radix Gentianae Macrophyllae) penetrate

Qīng Gǔ Sǎn (Cool the Bones Powder)

Qing Gu San (Cool the Bones Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Tidal fever and steaming bones sensations	<ul style="list-style-type: none"> • Tidal fever, unrelenting low-grade fever, and steaming bones sensations: deficiency heat consuming yin and body fluids • Night sweats: yang qi pushing yin outwards • Emaciation, thirst and a dry throat: lack of yin nourishment • Irritability: deficiency heat disturbing the <i>shen</i> (spirit) • Red cheeks, a red tongue body, scanty tongue coating, and a fine, rapid pulse: yin-deficient heat in the interior 	<ul style="list-style-type: none"> • Clears deficiency heat • Reduces tidal fever and steaming bones sensations 	<ul style="list-style-type: none"> • <i>Yin Chai Hu</i> (Radix Stellariae) clears deficiency heat and cools the blood without sedating the body. • <i>Zhi Mu</i> (Rhizoma Anemarrhenae) nourishes yin and sedates fire. • <i>Hu Huang Lian</i> (Rhizoma Picrorhizae) enters and clears heat in the <i>xue</i> (blood) level. • <i>Di Gu Pi</i> (Cortex Lycii) clears deficiency heat in the Lung, Liver and Kidney. • <i>Qing Hao</i> (Herba Artemisiae Annuae) and <i>Qin Jiao</i> (Radix Gentianae Macrophyllae) penetrate to the interior to clear heat in the deeper level by dispelling it outwards. • <i>Bie Jia</i> (Carapax Trionycis) nourishes yin and guides the other herbs deep into the interior to clear deficiency heat. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs and protects the Stomach from the harsh properties of the heat-clearing herbs.

to the interior to clear heat in the deeper level by dispelling it outwards. *Bie Jia* (Carapax Trionycis) nourishes yin and guides the other herbs deep into the interior to clear deficiency heat. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula and protects the Stomach from the harsh properties of the heat-clearing herbs.

MODIFICATIONS

- If there is more qi deficiency, add *Huang Qi* (Radix Astragali).
- If there is more yin deficiency, add *Di Huang* (Radix Rehmanniae) and *Mai Dong* (Radix Ophiopogonis).
- If there is more blood deficiency, add *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba) and *Di Huang* (Radix Rehmanniae).
- With cough, add *E Jiao* (Colla Corii Asini), *Mai Dong* (Radix Ophiopogonis), and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- With Spleen qi deficiency manifesting as loose stools and poor appetite, remove *Hu Huang Lian* (Rhizoma Picrorhizae), *Qin Jiao* (Radix Gentianae Macrophyllae) and *Zhi Mu* (Rhizoma Anemarrhenae) and add *Bai Bian Dou* (Semen Lablab Album) and *Shan Yao* (Rhizoma Dioscoreae).

CAUTIONS / CONTRAINDICATIONS

Qing Gu San is inappropriate for severe cases of yin deficiency because its emphasis is to clear deficiency heat, not to nourish yin.

CLINICAL STUDIES AND RESEARCH

1. **Leukemia:** *Qing Gu San* was used to treat 59 patients (36 males and 23 females) with leukemia. The traditional Chinese medical diagnosis for these patients included toxic-fire in the Liver, heat in the blood, blood stagnation, yin-deficient fire, and deficiencies of qi, yin and blood. Modifications were made based on the exact condition of the patient. The study reported that out of 59 cases, 19 had significant improvement, 11 had moderate improvement, 20 had slight improvement, and 9 had no effect. The overall effectiveness rate reported by the study was 84.6%.¹
2. **Tuberculosis:** *Qing Gu San* was given to 10 patients for constitutional support during active tuberculosis. Out of 10 cases, 8 had gradual improvement characterized by increased energy level and improved appetite within 1-3 weeks after the herbal therapy. The other 2 patients were transferred to another hospital and follow-up information was not available.²
3. **Fever:** Twenty out of 21 patients with persistent low-grade fever due to bone fractures were treated with good results using *Qing Gu San*. The body temperature was reduced within 1-2 doses.³

AUTHORS' COMMENTS

Qing Gu San is one of the best formulas for treating steaming bones sensations and tidal fever due to yin-deficient heat. Please refer to *Qing Hao Bie Jia Tang* (Artemisia Annu and

Qīng Gǔ Sǎn (Cool the Bones Powder)

Soft-Shelled Turtle Shell Decoction), for a comparative analysis with *Qin Jiao Bie Jia San* (Gentiana Macrophylla and Soft-Shelled Turtle Shell Powder) and *Qing Gu San*.

Dāng Guī Liù Huáng Tāng (Tangkuei and Six-Yellow Decoction)

當歸六黃湯 当归六黄汤

Pinyin Name: *Dang Gui Liu Huang Tang*

Literal Name: Tangkuei and Six-Yellow Decoction

Alternate Names: *Tang Kuei Liu Huang Tang*, Tang-kuei and Six Huang Decoction, Chinese Angelica and Six Yellow Herbs Decoction, Tangkuei and Six Yellow Combination

Original Source: *Lan Shi Mi Cang* (Secrets from the Orchid Chamber) by Li Gao in 1336

COMPOSITION

<i>Dang Gui</i> (Radix Angelicae Sinensis)	1 part [6g]
<i>Di Huang</i> (Radix Rehmanniae)	1 part [6g]
<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	1 part [6g]
<i>Huang Qin</i> (Radix Scutellariae)	1 part [6g]
<i>Huang Lian</i> (Rhizoma Coptidis)	1 part [6g]
<i>Huang Bo</i> (Cortex Phellodendri Chinensis)	1 part [6g]
<i>Huang Qi</i> (Radix Astragali)	2 parts [12g]

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients coarsely. Cook 15g of the powder in 2 large bowls of water until it is reduced to 1 large bowl. Take the warm, strained decoction before meals. Reduce the dose by half for children. This formula may be prepared as a decoction using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin and sedates internal fire
2. Consolidates the exterior and stops perspiration

CLINICAL MANIFESTATIONS

Fever and night sweats due to yin-deficient heat and fire: a red face, irritability, dry mouth and lips, constipation, dark yellow urine, a red tongue body, and a rapid pulse.

CLINICAL APPLICATIONS

Pulmonary tuberculosis, silicosis, bronchitis, hepatitis, cholecystitis, nephritis, urinary tract infection, myocarditis, febrile disease, hyperthyroidism, thrombocytopenic purpura, abnormal perspiration, and menopause.

EXPLANATION

Dang Gui Liu Huang Tang (Tangkuei and Six-Yellow Decoction) treats fever and night sweats due to yin-deficient heat and fire, a condition that is characterized by a high level of yang and a low level of yin. Because of the dispersing characteristic of yang, yang easily surfaces to the exterior of the body when deficient yin can no longer retain it inside. When yang is dispersed to the exterior, body fluids may be carried out with the yang qi. Consequently, fever and night sweats occur. A red face and irritability are caused by heat and fire in the interior. Dry mouth and lips, constipation, and dark yellow urine are the results of fire consuming body fluids.

As the chief herbs, *Dang Gui* (Radix Angelicae Sinensis), *Di Huang* (Radix Rehmanniae) and *Shu Di Huang* (Radix Rehmanniae Praeparata) nourish yin and blood to control yang and fire. *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), and *Huang Bo* (Cortex Phellodendri Chinensis) clear heat and sedate fire. Finally, *Huang Qi* (Radix Astragali) strengthen *wei* (defensive)

qi to stop sweating, and works synergistically with *Dang Gui* (Radix Angelicae Sinensis) and *Shu Di Huang* (Radix Rehmanniae Praeparata) to promote the production of qi and blood.

MODIFICATIONS

- If there is more sweating, add *Fu Xiao Mai* (Fructus Triticis Levis) and *Ma Huang Gen* (Radix et Rhizoma Ephedrae).
- With a dry mouth and tidal fever due to Kidney yin-deficient fire, add *Zhi Mu* (Rhizoma Anemarrhenae) and *Gui Ban* (Plastrum Testudinis).
- For patients with yin deficiency but no internal fire, remove *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), and *Huang Bo* (Cortex Phellodendri Chinensis) to prevent damage to the yin. Add *Xuan Shen* (Radix Scrophulariae) and *Mai Dong* (Radix Ophiopogonis) to clear deficiency heat and nourish yin.

CAUTIONS / CONTRAINDICATIONS

Dang Gui Liu Huang Tang is contraindicated in patients with loose stools due to Spleen and Stomach deficiencies.

CLINICAL STUDIES AND RESEARCH

1. **Perspiration:** *Dang Gui Liu Huang Tang* has been used successfully to treat abnormal perspiration due to various causes. In one study, 50 patients (32 males and 18 females, between 13 and 61 years of age) with spontaneous or night perspiration were treated with modified *Dang Gui Liu Huang Tang* with complete recovery in 43 patients, significant improvement in 5 patients, and no benefit in 2 patients. In addition to *Dang Gui Liu Huang Tang* as the base formula, modifications were made as follows: addition of *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and a larger dose of *Huang Qi* (Radix Astragali) for qi and blood deficiencies; *Mai Dong* (Radix Ophiopogonis) and *Xi Yang Shen* (Radix Panacis Quinquefolii) for qi and yin deficiencies; and *Wu Wei Zi* (Fructus Schisandrae

Chinensis) and calcined *Long Gu* (Os Draconis) for profuse perspiration.¹

2. **Menopause:** Thirty-three patients (between 44 and 56 years of age) with menopausal complaints were treated with modified *Dang Gui Liu Huang Tang* with significant improvement in 11 patients and moderate improvement in 22 patients. In addition to *Dang Gui Liu Huang Tang* as the base formula, modifications included addition of *Mu Dan Pi* (Cortex Moutan) and *Ze Xie* (Rhizoma Alismatis) for yin-deficient fire; *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fang Feng* (Radix Saposhnikoviae) for profuse spontaneous sweating; *Er Zhi Wan* (Two-Ultimate Pill) and *Bai He* (Bulbus Lilii) for severe night sweats; and *Fu Shen* (Poria Paradicis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis) for insomnia. The duration of treatment was 7 days per course of treatment.²

AUTHORS' COMMENTS

Dang Gui Liu Huang Tang and *Mu Li San* (Oyster Shell Powder) both nourish yin, clear heat, consolidate the exterior, and stop night sweats.

- *Dang Gui Liu Huang Tang* more strongly nourishes yin and clears heat. It is mainly used for night sweats, tidal fever, irritability, dryness of the mouth, lips, and stools, and other symptoms of yin-deficient heat.
- *Mu Li San* more strongly binds and stops sweating and is weaker at nourishing yin and clearing heat. It is mostly used to treat qi and yin deficiencies with spontaneous sweating occurring both day and night. Other symptoms include palpitations, being easily frightened, and shortness of breath.³

Huang Qi (Radix Astragali) is an important herb that is used in many formulas for different purposes. Below is a comparison of its functions in three important herbal formulas:

Dāng Guī Liù Huáng Tāng (Tangkuei and Six-Yellow Decoction)

- *Dang Gui Liu Huang Tang* contains *Huang Qi* (Radix Astragali) to tonify qi, consolidate *wei* (defensive) qi, and stop sweating. It mainly treats yin deficiency with flaring fire manifesting in fever, night sweats, thirst, and a red tongue body with a yellow coating.
- *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood) contains *Huang Qi* (Radix Astragali) at five times the amount of *Dang Gui* (Radix Angelicae Sinensis) to boost qi and generate blood. It is mainly used for blood deficiency with deficiency-heat signs of heat sensation, a flushed face, spontaneous sweating, and a surging, big and deficient pulse.
- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction) contains *Huang Qi* (Radix Astragali)

to tonify qi and raise yang. It treats Spleen and Stomach qi deficiencies with prolapsed organs. Patients will also exhibit fatigue, poor appetite, decreased dietary intake, feverish sensations, chronic diarrhea, and spontaneous sweating.⁴

<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	1.5g
<i>Di Huang</i> (Radix Rehmanniae)	2.4g
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	1.5g
<i>Huang Bo</i> (Cortex Phellodendri Chinensis), <i>chao</i> (dry-fried) with water and honey	1.5g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae) in water to make a decoction. Add a small amount of *Zhu Li* (Succus Bambusae), *Tong Bian* (Infantis Urina) and the juice of *Sheng Jiang* (Rhizoma Zingiberis Recens) to the decoction prior to ingestion.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin
2. Descends fire
3. Tonifies qi and blood

CLINICAL MANIFESTATIONS

Yin-deficient fire: fever, cough, sputum, dyspnea, night sweats, and a dry mouth.

Zi Yin Jiàng Huǒ Tāng (Nourish Yin and Descend the Fire Decoction)

Zi Yin Jiang Huo Tang (Nourish Yin and Descend the Fire Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Yin-deficient fire	<ul style="list-style-type: none"> • Fever, cough with sputum and dyspnea: heat and fire rising upwards • Night sweats: yin-deficient fire • Dry mouth and constipation: heat consuming body fluids • Fine, rapid pulse: deficiency and heat conditions 	<ul style="list-style-type: none"> • Nourishes yin • Descends fire • Tonifies qi and blood 	<ul style="list-style-type: none"> • <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Bai Shao</i> (Radix Paeoniae Alba) and <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata) tonify the blood. • <i>Tian Dong</i> (Radix Asparagi) and <i>Mai Dong</i> (Radix Ophiopogonis) tonify yin. • <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>Chen Pi</i> (Pericarpium Citri Reticulatae), <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and <i>Da Zao</i> (Fructus Jujubae) tonify qi and activate qi circulation. • <i>Di Huang</i> (Radix Rehmanniae), <i>Zhi Mu</i> (Rhizoma Anemarrhenae) and <i>Huang Bo</i> (Cortex Phellodendri Chinensis) clear deficiency fire.

CLINICAL APPLICATIONS

Pulmonary tuberculosis, renal tuberculosis, chronic bronchitis, pneumonia, chronic nephritis, diabetes mellitus, nocturnal emissions, and spontaneous emissions.

EXPLANATION

Zi Yin Jiang Huo Tang (Nourish Yin and Descend the Fire Decoction) treats Kidney yin deficiency with Liver fire. Because of the underlying yin deficiency, the Kidney and Liver cannot be properly nourished and fire begins to rise upward. The fire usually disturbs the Stomach and Lung, leading to fever, cough, sputum, dyspnea, and a dry mouth. Night sweats are an indication of yin-deficient fire. Most patients with this condition will also have a dark complexion, constipation, and a fine, rapid pulse.

This formula aims to nourish the underlying deficiency and control the excess. *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Shu Di Huang* (Radix Rehmanniae Praeparata) tonify the blood. *Tian Dong* (Radix Asparagi) and *Mai Dong* (Radix Ophiopogonis) tonify yin. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Chen Pi* (Pericarpium Citri Reticulatae),

Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), and *Da Zao* (Fructus Jujubae) tonify qi and activate qi circulation. *Di Huang* (Radix Rehmanniae), *Zhi Mu* (Rhizoma Anemarrhenae) and *Huang Bo* (Cortex Phellodendri Chinensis) are excellent herbs for descending fire in cases involving underlying deficiency.

MODIFICATIONS

- If the night sweats are severe, add *Huang Qi* (Radix Astragali) and *Suan Zao Ren* (Semen Ziziphi Spinosae).
- When there is steaming bones sensation, add *Di Gu Pi* (Cortex Lycii) and *Yin Chai Hu* (Radix Stellariae).
- With wheezing and dyspnea with phlegm, add *Sang Bai Pi* (Cortex Mori), *Zi Wan* (Radix et Rhizoma Asteris), *Huang Qin* (Radix Scutellariae), and *Zhu Li* (Succus Bambusae).
- With cough and profuse sputum, add *Bei Mu* (Bulbus Fritillariae), *Kuan Dong Hua* (Flos Farfarae), and *Sang Bai Pi* (Cortex Mori).
- With lower abdominal pain, add *Xiao Hui Xiang* (Fructus Foeniculi) and *Mu Xiang* (Radix Aucklandiae).
- With low-grade fever, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).

Chapter 5 — Summary

— Heat-Clearing Formulas

SECTION 1: *QI* (ENERGY) LEVEL-CLEARING FORMULAS

Name	Similarities	Differences
<i>Bai Hu Tang</i> (White Tiger Decoction)		Generates body fluids
<i>Bai Hu Jia Ren Shen Tang</i> (White Tiger plus Ginseng Decoction)	Clear heat from the <i>qi</i> (energy) level	Generates body fluids, tonifies qi
<i>Zhu Ye Shi Gao Tang</i> (Bamboo Leaves and Gypsum Decoction)		Generates body fluids, tonifies qi, harmonizes the Stomach

Bai Hu Tang (White Tiger Decoction) clears heat and promotes production of body fluids. It treats *yangming* (*qi* (energy) level) excessive heat with high fever, profuse perspiration, thirst, irritability, and a surging, big and forceful pulse.

Bai Hu Jia Ren Shen Tang (White Tiger plus Ginseng Decoction) is formulated by adding *Ren Shen* (Radix et Rhizoma Ginseng) to *Bai Hu Tang* (White Tiger Decoction), which enables the formula to tonify qi.

Zhu Ye Shi Gao Tang (Bamboo Leaves and Gypsum Decoction) clears heat and nourishes yin and qi to harmonize the Stomach. In comparison to *Bai Hu Tang* (White Tiger Decoction), this formula has a weaker heat-clearing effect, and therefore is used mostly to treat late-stage heat syndromes with damage to both qi and yin.

SECTION 2: *YING* (NUTRITIVE) LEVEL-CLEARING AND BLOOD-COOLING FORMULAS

Name	Similarities	Differences
<i>Qing Ying Tang</i> (Clear the Nutritive Level Decoction)	Clears heat from the <i>ying</i> (nutritive) level	Nourishes yin, invigorates blood circulation
<i>Xi Jiao Di Huang Tang</i> (Rhinoceros Horn and Rehmannia Decoction)	Clears heat and cools the blood in the <i>xue</i> (blood) level	Stops bleeding, disperses blood stasis

Qing Ying Tang (Clear the Nutritive Level Decoction) clears heat from the *ying* (nutritive) level, eliminates toxin, releases the heat, and nourishes yin. This formula is more appropriate for the initial stages of heat attacking the *ying* level, in which the patient manifests symptoms of heat sensations that worsen at night, incoherent speech and irritability.

Xi Jiao Di Huang Tang (Rhinoceros Horn and Rehmannia Decoction) clears heat, eliminates toxins, cools the blood, and disperses blood stagnation. This formula is suitable to treat more severe conditions of heat attacking the *xue* (blood) level forcing blood out of the vessels and manifesting in various types of bleeding.

Chapter 5 — Summary

SECTION 3: *QI* (ENERGY) AND *XUE* (BLOOD) LEVELS-CLEARING FORMULA

Name	Actions
<i>Qing Wen Bai Du Yin</i> (Clear Epidemics and Overcome Pathogenic Influences Decoction)	Treats <i>wen yi</i> (warm epidemics) with heat and toxins in the <i>qi</i> (energy) and <i>xue</i> (blood) levels

Qing Wen Bai Du Yin (Clear Epidemics and Overcome Pathogenic Influences Decoction) clears heat, sedates fire, and eliminates toxins. It is a unique formula used to treat proliferation of heat toxins in both the *qi* and *xue* levels.

SECTION 4: HEAT-CLEARING AND TOXIN-ELIMINATING FORMULAS

Name	Similarities	Differences
<i>Huang Lian Jie Du Tang</i> (Coptis Decoction to Relieve Toxicity)		Treats upper, middle, and lower <i>jiaos</i>
<i>Huang Lian Shang Qing Wan</i> (Coptis Pill to Clear the Upper)		Treats upper, middle, and lower <i>jiaos</i> , and the head
<i>Qing Shang Fang Feng Tang</i> (Clear the Upper and Guard the Wind Decoction)		Treats upper <i>jiao</i> and upper parts of the body (face)
<i>Liang Ge San</i> (Cool the Diaphragm Powder)	Clear heat, sedate fire, and eliminate toxins	Treats upper and middle <i>jiaos</i>
<i>Pu Ji Xiao Du Yin</i> (Universal Benefit Decoction to Eliminate Toxin)		Treats upper <i>jiao</i> and the head
<i>San Huang Xie Xin Tang</i> (Three-Yellow Decoction to Sedate the Epigastrium)		Clears heat and fire, drains damp-heat from upper, middle, or lower <i>jiaos</i>
<i>San Huang Shi Gao Tang</i> (Three-Yellow and Gypsum Decoction)		Treats presence of heat and toxins deep inside the interior
<i>Liu Shen Wan</i> (Six-Miracle Pill)		Treats internal and external disorders due to heat and toxins

Huang Lian Jie Du Tang (Coptis Decoction to Relieve Toxicity) sedates fire and eliminates toxins. It is one of the most commonly used formulas to treat excess heat, fire, and toxins affecting all three *jiaos*.

Huang Lian Shang Qing Wan (Coptis Pill to Clear the Upper) and ***Qing Shang Fang Feng Tang*** (Clear the Upper and Guard the Wind Decoction) both clear heat, sedate fire, and eliminate toxins from the upper parts of the body.

- ***Huang Lian Shang Qing Wan*** is most effective for heat and fire attacking the upper body and head, but it may also be used to treat heat affecting the upper, middle, and lower *jiaos*, and the head.
- ***Qing Shang Fang Feng Tang*** is better for heat and toxins affecting the upper *jiao* and the upper parts of body (mostly the face), and it also dispels wind-heat.

Liang Ge San (Cool the Diaphragm Powder) sedates fire and induces bowel movements. It treats the presence of heat, fire, and toxins in the upper (chest) and middle (diaphragm) *jiaos* by clearing and venting the excess outward and draining it downward.

Pu Ji Xiao Du Yin (Universal Benefit Decoction to Eliminate Toxin) sedates fire and eliminates toxins in the upper *jiao* and head. It treats epidemic toxins in the head with a wind-heat diagnosis.

Chapter 5 — Summary

San Huang Xie Xin Tang (Three-Yellow Decoction to Sedate the Epigastrium) and **San Huang Shi Gao Tang** (Three-Yellow and Gypsum Decoction) have similar names and functions. Both contain three “yellow” herbs to clear heat, purge fire, and eliminate toxins.

- **San Huang Xie Xin Tang** clears heat and fire, and drains damp-heat from the upper, middle or lower *jiaos*. The three “yellow” herbs are *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), and *Da Huang* (Radix et Rhizoma Rhei).
- **San Huang Shi Gao Tang** treats heat and toxins deep inside the interior, such as heat and toxins affecting the Heart causing *shen* (spirit) disturbance, delirium, and incoherent speech. The three “yellow” herbs are *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), and *Huang Bo* (Cortex Phellodendri Chinensis).

Liu Shen Wan (Six-Miracle Pill) is a potent formula that clears heat, eliminates toxins, reduces inflammation, and relieves pain. It may be taken internally or applied topically.

SECTION 5: ZANG FU-CLEARING FORMULAS

Name	Similarities	Differences
Dao Chi San (Guide Out the Red Powder)	Clear heat in the Heart and Small Intestine	Nourishes yin
Qing Xin Lian Zi Yin (Lotus Seed Decoction to Clear the Heart)		Tonifies qi and yin
Zhi Zi Chi Tang (Gardenia and Soja Decoction)	Clears heat in the Heart	Clears heat in the chest and diaphragm
Long Dan Xie Gan Tang (Gentiana Decoction to Drain the Liver)	Sedate excess fire in the Liver and Gallbladder	Clears damp-heat in the lower <i>jiao</i>
Dang Gui Long Hui Wan (Tangkuei, Gentiana, and Aloe Pill)		Use only in severe cases
Xi Gan Ming Mu San (Wash the Liver and Brighten the Eyes Powder)	Clears Liver heat, dispels wind-heat	Treats eye disorders due to wind-heat and Liver heat
Xie Bai San (Drain the White Powder)	Clear Lung heat	Relieves coughing and dyspnea
Qing Xin Li Ge Tang (Clear the Epigastrium and Benefit the Diaphragm Decoction)		Relieves sore throat
Xiang Sheng Po Di San (Loud Sound Powder for a Broken Flute)		Nourishes yin and restores voice functioning
Zuo Jin Wan (Left Metal Pill)	Clears Liver fire	Corrects the reversed flow of Stomach qi
Qing Wei San (Clear the Stomach Powder)	Clear Stomach heat and fire	Cools the blood
Xie Huang San (Drain the Yellow Powder)		Purges latent fire in the Spleen and Stomach
Yu Nu Jian (Jade Woman Decoction)		Nourishes yin
Gan Lu Yin (Sweet Dew Decoction)		Clears damp-heat in the Spleen and Stomach
Shao Yao Tang (Peony Decoction)	Clear damp-heat in the Intestines and stop dysentery	Harmonizes qi and blood
Huang Qin Tang (Scutellaria Decoction)		Harmonizes the middle <i>jiao</i> and relieves pain
Bai Tou Weng Tang (Pulsatilla Decoction)		Cools the blood

Dao Chi San (Guide Out the Red Powder) and **Qing Xin Lian Zi Yin** (Lotus Seed Decoction to Clear the Heart) both clear heat from the Heart organ and channel. Heat in the Heart organ is characterized

Chapter 5 — Summary

by symptoms such as fidgeting, irritability, and restlessness. Heat in the Heart channel (and/or Small Intestines) is characterized by *lin zheng* (dysuria syndrome) with painful urination, cloudy urine, or blood-streaked urine.

- **Dao Chi San** calms Heart *shen* (spirit), cools the blood, promotes urination, and relieves dysuria. It treats heat in both the Heart and Small Intestine channels. It may be used for *lin zheng* (dysuria syndrome) with painful urination or blood-streaked urine.
- **Qing Xin Lian Zi Yin** clears heat in Heart (an excess condition in the upper *jiao*) and tonifies qi and Kidney yin (a deficient condition in the lower *jiao*). It may be used for *lin zheng* (dysuria syndrome) with turbid or cloudy urine.

Zhi Zi Chi Tang (Gardenia and Soja Decoction) clears heat in the Heart, chest and diaphragm to relieve irritability, insomnia, and a feeling of fullness and congestion in the chest.

Long Dan Xie Gan Tang (Gentiana Decoction to Drain the Liver) and **Dang Gui Long Hui Wan** (Tangkuei, Gentiana, and Aloe Pill) are two potent formulas that sedate excess fire in the Liver and Gallbladder channels.

- **Long Dan Xie Gan Tang** sedates Liver fire, drains damp-heat, and protects and nourishes Liver blood. It is mostly used for Liver fire flaring upward with damp-heat accumulation in the lower *jiao*.
- **Dang Gui Long Hui Wan** is an extremely bitter and cold formula designed to purge excess fire from the Liver through urination and defecation. It does not have any effect to protect or nourish Liver blood, and must be reserved only for cases of excess fire with severe symptoms.

Xi Gan Ming Mu San (Wash the Liver and Brighten the Eyes Powder) clears Liver heat and dispels wind-heat to treat various eye disorders.

Xie Bai San (Drain the White Powder), **Qing Xin Li Ge Tang** (Clear the Epigastrium and Benefit the Diaphragm Decoction) and **Xiang Sheng Po Di San** (Loud Sound Powder for a Broken Flute) clear Lung heat.

- **Xie Bai San** sedates Lung heat to relieve coughing, dyspnea, and coarse breathing.
- **Qing Xin Li Ge Tang** clears heat from the Lung and throat area to treat sore throat, tonsillitis, and parotitis.
- **Xiang Sheng Po Di San** clears heat, moistens dryness, and dispels phlegm. It is commonly used to treat hoarseness or loss of voice, dry mouth and throat, and ticklish or scratchy throat caused by Lung heat and Lung yin deficiency.

Zuo Jin Wan (Left Metal Pill), **Qing Wei San** (Clear the Stomach Powder), **Xie Huang San** (Drain the Yellow powder), **Yu Nu Jian** (Jade Woman Decoction), and **Gan Lu Yin** (Sweet Dew Decoction) all clear heat and treat stomach disorders.

- **Zuo Jin Wan** treats Liver fire overacting on the Stomach to address stomach disorders such as hypochondriac fullness and pain, epigastric distention, acid regurgitation, nausea, and vomiting.
- **Qing Wei San** clears Stomach heat and cools the blood. It treats rising Stomach fire manifesting in toothache, gum bleeding, and swollen cheeks.
- **Xie Huang San** drains latent fire of Spleen and Stomach invading the oral cavity. It may be used to treat oral ulcers, foul breath, and a dry, hot tongue.
- **Yu Nu Jian** nourishes Stomach yin and clears Stomach heat to manage both excess and deficiency conditions with symptoms such as thirst, toothache, loose teeth, bleeding gums, and headache.
- **Gan Lu Yin** clears damp-heat, cleanses the blood, and reduces inflammation. It treats damp-heat in the Spleen and Stomach with symptoms such as swelling, inflammation and suppuration of the gums and tongue, sore throat with inflammation and pain, stomatitis, tongue ulceration, and toothache.

Chapter 5 — Summary

Shao Yao Tang (Peony Decoction), **Huang Qin Tang** (Scutellaria Decoction) and **Bai Tou Weng Tang** (Pulsatilla Decoction) all clear damp-heat in the Intestines to relieve diarrhea and dysentery.

- **Shao Yao Tang** (Peony Decoction) emphasizes harmonizing and activating qi and blood. It is more suitable for dysentery characterized by equal dampness and heat, with main signs and symptoms such as abdominal pain, rectal tenesmus, and presence of mucus and blood in the stools.
- **Bai Tou Weng Tang** (Pulsatilla Decoction) emphasizes cooling the blood to relieve dysentery. It is more suitable for treating dysentery characterized by more heat than dampness, with key signs and symptoms of rectal tenesmus, burning sensations of the anus, and presence of more blood than pus.
- **Huang Qin Tang** focuses on harmonizing the middle *jiao* and relieving pain. It is most suitable for dysentery characterized by disharmony between the Liver and Spleen, with key signs and symptoms such as mild fever, a bitter taste in the mouth, and abdominal pain.

SECTION 6: DEFICIENCY-HEAT CLEARING FORMULAS

Name	Similarities	Differences
Qing Hao Bie Jia Tang (Artemisia Annua and Soft-Shelled Turtle Shell Decoction)	Clear deficiency heat, nourish yin	Disperses deep-hidden deficiency heat
Qin Jiao Bie Jia San (Gentiana Macrophylla and Soft-Shelled Turtle Shell Powder)		Releases exterior wind
Qing Gu San (Cool the Bones Powder)		Relieves steaming bones sensation
Dang Gui Liu Huang Tang (Tangkuei and Six-Yellow Decoction)	Clear deficiency heat, tonify underlying deficiencies	Tonifies yin and qi
Zi Yin Jiang Huo Tang (Nourish Yin and Descend the Fire Decoction)		Tonifies yin, qi and blood
Qing Liang Yin (Clearing and Cooling Decoction)		Tonifies body fluids

Qing Hao Bie Jia Tang (Artemisia Annua and Soft-shelled Turtle Shell Decoction), **Qin Jiao Bie Jia San** (Gentiana Macrophylla and Soft-shelled Turtle Shell Powder), and **Qing Gu San** (Cool the Bones Powder) all nourish yin and clear deficiency-heat. They all treat deficiency-heat and deficiency-fire syndromes.

- **Qing Hao Bie Jia Tang** places equal emphasis on nourishing yin and releasing heat. It treats late stage heat syndromes (heat hidden in the yin) with night fever and morning coolness.
- **Qin Jiao Bie Jia San** mainly treats *feng lao bing* (wind consumption disease), which is due to transmission of an exterior pathogenic factor into the interior, thereby injuring yin. This formula consists of some wind-clearing and harmonizing herbs to dispel the pathogenic factors back out to the exterior.
- **Qing Gu San** mainly treats chronic deficiency-type of steaming bones sensation. This formula emphasizes clearing deficiency fire while nourishing yin.

Dang Gui Liu Huang Tang (Tangkuei and Six-Yellow Decoction) clears heat, nourishes yin, strengthens the exterior, and stops perspiration. It is used to treat yin deficiency with rising of fire.

Zi Yin Jiang Huo Tang (Nourish Yin and Descend the Fire Decoction) nourishes yin, tonifies qi and blood, and clears deficiency fire. It treats yin deficiency with fire from the Kidney and Liver.

Qing Liang Yin (Clearing and Cooling Decoction) clears heat and promotes the generation of body fluids. It treats heat attacking the upper and middle *jiaos* leading to excess heat and consumption of body fluids.

Chapter 6

— Summer-Heat-Dispelling Formulas

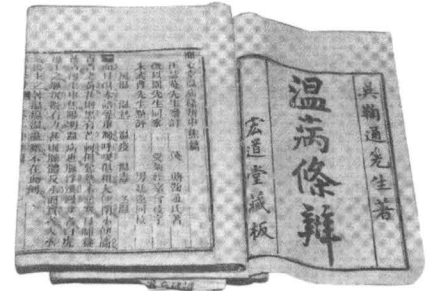

吴塘 Wú Táng

吴塘 Wú Táng, also known as 吴鞠通 Wú Jū-Tōng, 1758 – 1836.

吴塘 Wú Táng

Wu Tang was inspired to study medicine at nineteen years of age, when his father passed away from a warm disease epidemic. He was most influenced in his pursuit of medicine by Wu You-Xing's *Wen Yi Lun* (Discussion of Epidemic Warm Disease) and Ye Gui's *Wen Re Lun* (Discussion of Warm and Hot Disorders). Expanding beyond the theories of his predecessors, Wu proposed a new theory to treat *wen bing* (warm disease): *San Jiao Bian Zheng* (Triple Burner Differentiation). He stated that *wen bing* enters the body through the nose to affect the upper *jiao*, and the mouth to affect the middle *jiao*. If untreated, the disease will continue to deteriorate and affect the lower *jiao*.

温病条辨 *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) in 1798.

Wu Tang was also the first to recommend specific herbal treatments based on *Wei Qi Ying Xue Bian Zheng* (Defensive, Qi, Nutritive, Blood Differentiation). He recommended *Yin Qiao San* (Honeysuckle and Forsythia Powder) for *wen bing* (warm disease) affecting the *wei* (defensive) level, *Bai Hu Tang* (White Tiger Decoction) for *wen bing* affecting the *qi* (energy) level, *Qing Ying Tang* (Clear the Nutritive Level Decoction) for disease that has progressed to the *ying* (nutritive) level, and *Xi Jiao Di Huang Tang* (Rhinoceros Horn and Rehmannia Decoction) for treatment at the *xue* (blood) level. Furthermore, he observed that *wen bing* strongly consumes and damages yin and body fluids, and proposed using nourishing formulas to replenish the fluids and remedy the damage, such as *San Jia Fu Mai Tang* (Three-Shell Decoction to Restore the Pulse), *Da Ding Feng Zhu* (Major Arrest Wind Pearl) and *Xiao Ding Feng Zhu* (Minor Arrest Wind Pearl).

Wu Tang combined his academic and clinical experiences to publish *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) in 1798. His greatest contribution to *wen bing* (warm disease) is the integration of theories and treatment. While his predecessors (Wu You-Xing and Ye Gui) established the fundamental theories of *wen bing*, Wu Tang integrated the theories with clinically effective formulas, many of which are still in use today.

Many examples of formulas written by Wu Tang include:

- *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction)
- *Yin Qiao San* (Honeysuckle and Forsythia Powder)
- *Zeng Ye Cheng Qi Tang* (Increase the Fluids and Order the Qi Decoction)
- *Qing Ying Tang* (Clear the Nutritive Level Decoction)
- *Qing Hao Bie Jia Tang* (Artemisia Annua and Soft-Shelled Turtle Shell Decoction)
- *Qing Luo Yin* (Clear the Collaterals Decoction)
- *Xin Jia Xiang Ru Yin* (Newly-Augmented Mosla Decoction)
- *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone)
- *Xing Su San* (Apricot Kernel and Perilla Leaf Powder)
- *Sang Xing Tang* (Mulberry Leaf and Apricot Kernel Decoction)
- *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction)
- *Zeng Ye Tang* (Increase the Fluids Decoction)

Chapter 6 — Overview

— Summer-Heat-Dispelling Formulas

Definition: Summer-heat-dispelling formulas, as the name implies, relieve summer-heat syndromes. Summer-heat, one of the *liu yin* (six exogenous factors), is the dominant exterior pathogenic factor during the hot and humid summer season. Summer-heat syndromes often occur in the summer, and are characterized by the presence of heat and dampness, as well as by consumption of and damage to qi and body fluids.

Clinical manifestations of summer-heat syndromes include fever, thirst, fidgeting, irritability, profuse perspiration, fatigue, heavy sensations of the body, dysuria, and a rapid pulse. As a result of high fever and profuse perspiration, qi and body fluids may be consumed and damaged. Therefore, optimal treatment of summer-heat syndromes requires the use of herbs that dispel summer-heat, tonify qi, and replenish body fluids.

Summer-heat involves heat and dampness, consumption of qi, and damage to body fluids.

SUBCATEGORIES OF ACTION

Summer-heat-dispelling formulas are divided into four subcategories to reflect the nature of the disorder and characteristics of the formulas, as follows:

1. Summer-Heat-Dispelling and Heat-Clearing Formulas

These formulas are designed to treat summer-heat syndromes involving severe interior heat. Clinical manifestations include high fever, irritability, profuse perspiration, and thirst. Herbs commonly used to dispel summer-heat include *Xi Gua Cui Pi* (Exocarpium Citrulli), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *He Ye* (Folium Nelumbinis). An exemplar formula is *Qing Luo Yin* (Clear the Collaterals Decoction).

2. Summer-Heat-Dispelling and Exterior-Releasing Formulas

These formulas are designed to relieve summer-heat in the interior and dispel any exterior factor(s) (usually wind-cold) at the skin and muscle levels. Summer-heat and wind-cold occur together when individuals try to cool down on hot summer days by drinking cold beverages and by wearing light clothing in the evening and at night. As a result, they contract both summer-heat and exterior wind-cold, and show signs and symptoms such as fever, aversion to cold, no perspiration, headache, irritability, and thirst. Commonly used herbs include *Huo Xiang* (Herba Agastaches), *Xiang Ru* (Herba Moslae) and *He Ye* (Folium Nelumbinis). An exemplar formula is *Xin Jia Xiang Ru Yin* (Newly-Augmented Mosla Decoction).

3. Summer-Heat-Dispelling and Dampness-Draining Formulas

These formulas are designed to relieve summer-heat and dispel internal dampness simultaneously. Summer-heat and dampness often occur together in eastern China because the east coast of China is generally very hot and humid during the summer. Common clinical manifestations include fever, irritability, thirst, chest and hypochondriac fullness/rigidity, and dysuria. This condition is treated by concurrent use of herbs that dispel summer-heat and drain dampness. Because internal dampness can be dispelled effectively through urination, herbs that regulate water and drain dampness

Summer-heat and wind-cold occur together when people drink cold beverages on hot summer days and wear light clothing in the evening.

Chapter 6 — Overview

are commonly used, such as *Hua Shi* (Talcum), *Fu Ling* (Poria), and *Ze Xie* (Rhizoma Alismatis). Representative formulas include *Liu Yi San* (Six-to-One Powder) and *Gui Ling Gan Lu Yin* (Cinnamon and Poria Sweet Dew Decoction).

Herbs that clear heat and dispel dampness should be used simultaneously, and cautiously, to treat summer-heat.

4. Summer-Heat-Dispelling and Qi-Benefiting Formulas

These formulas are used when summer-heat has extensively damaged qi and body fluids. Common clinical manifestations include fever, warm sensations in the body, irritability, thirst, lassitude, weak breathing, profuse perspiration, and a deficient pulse. Herbs that benefit qi and nourish yin and body fluids are commonly used in these formulas, such as *Xi Yang Shen* (Radix Panacis Quinquifolii), *Ren Shen* (Radix et Rhizoma Ginseng), *Mai Dong* (Radix Ophiopogonis), *Shi Hu* (Caulis Dendrobii), and *Wu Wei Zi* (Fructus Schisandrae Chinensis). An exemplar formula is *Qing Shu Yi Qi Tang* (Clear Summer-Heat and Augment the Qi Decoction).

CAUTIONS / CONTRAINDICATIONS

As the name implies, summer-heat syndromes generally occur in the summer, and may be characterized by the presence of both heat and dampness. To properly treat this syndrome, herbs that clear heat and dispel dampness should be used simultaneously. However, use such herbs cautiously, because inappropriate use of heat-clearing herbs may damage yin, while inappropriate use of damp-resolving herbs may dry up needed body fluids.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Summer-heat-dispelling formulas primarily treat disorders of the respiratory and gastrointestinal tracts.

- **Respiratory disorders:** These formulas have been used effectively to treat various lung disorders, such as common cold or influenza,¹ pneumonia,² whooping cough,³ and wheezing and dyspnea.⁴ Representative formulas include *Xin Jia Xiang Ru Yin* (Newly-Augmented Mosla Decoction), *Liu Yi San* (Six-to-One Powder), and *Qing Shu Yi Qi Tang* (Clear Summer-Heat and Augment the Qi Decoction).

Summer-heat-dispelling formulas primarily treat infectious respiratory and gastrointestinal disorders.

- **Gastrointestinal disorders:** Diarrhea in infants, children and adults is frequently treated with good results using *Liu Yi San* (Six-to-One Powder) and *Gui Ling Gan Lu Yin* (Cinnamon and Poria Sweet Dew Decoction).^{5,6}
- **Fever:** These formulas have been used effectively to treat fever in children and adults.^{7,8,9} Exemplar formulas include *Xiang Ru San* (Mosla Powder) and *Xin Jia Xiang Ru Yin* (Newly-Augmented Mosla Decoction).

Qīng Luò Yīn (Clear the Collaterals Decoction)

清絡飲 清络饮

Pinyin Name: *Qing Luo Yin*
Literal Name: Clear the Collaterals Decoction
Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

COMPOSITION

<i>Jin Yin Hua</i> (Flos Lonicerae Japonicae), fresh	6g
<i>Bian Dou Hua</i> (Flos Lablab Album), fresh	6g
<i>Xi Gua Cui Pi</i> (Exocarpium Citrulli)	6g
<i>He Ye</i> (Folium Nelumbinis), fresh	6g
<i>Si Gua Pi</i> (Pericarpium Luffae)	6g
<i>Zhu Ye</i> (Herba Phyllostachys), fresh	6g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients in 2 cups of water and until 1 cup remains. Take the decoction twice daily.

CHINESE THERAPEUTIC ACTIONS

Clears heat and dispels summer-heat

CLINICAL MANIFESTATIONS

Summer-heat invading the Lung and *qi* (energy) level: fever, slight thirst, blurred vision, an unclear feeling and swelling sensation in the head, and a slight red tongue body with a thin, white tongue coating.

CLINICAL APPLICATIONS

Common cold or influenza in the summer and heat stroke.

EXPLANATION

This formula treats mild case of summer-heat affecting the Lung and *qi* (energy) level. This condition occurs when mild summer-heat directly attacks the Lung, or it can be

a residual condition of summer-heat that has not been dispelled after using exterior-releasing herbs. Summer-heat may affect the Lung and consume fluids, leading to thirst. Summer-heat may attack the *qi* (energy) level to cause mild fever. Summer-heat may travel to the head and cause an unclear feeling and swelling sensation of the head. A slight red tongue body with a thin, white tongue coating suggests that this is a mild syndrome of heat.

Since the disorder is in the Lung and *qi* (energy) level, exterior-releasing herbs are not used. *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Bian Dou Hua* (Flos Lablab Album), the chief herbs, are aromatic and can disperse and dispel summer-heat. *Xi Gua Cui Pi* (Exocarpium Citrulli) clears summer-heat. *Si Gua Pi* (Pericarpium Luffae) clears heat in the Lung and from its channel and collateral. *He Ye* (Folium Nelumbinis) disperses heat and dispels summer-heat. Because summer-heat can easily injure the Heart and disturb the *shen* (spirit), *Zhu Ye* (Herba Phyllostachys) is used to purge this heat through urination. Most of the herbs in this formula should be

Qing Luo Yin (Clear the Collaterals Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Summer-heat invading the Lung and <i>qi</i> (energy) level	<ul style="list-style-type: none">• Mild fever: summer-heat invading the <i>qi</i> (energy) level• Slight thirst: summer-heat consuming body fluids• Blurred vision, an unclear feeling and swelling sensation of the head: summer-heat blocking the sensory orifices• Slight red tongue body and a thin, white tongue coating: early stage of heat condition	Clears heat and dispels summer-heat	<ul style="list-style-type: none">• <i>Jin Yin Hua</i> (Flos Lonicerae Japonicae), <i>Bian Dou Hua</i> (Flos Lablab Album), <i>Xi Gua Cui Pi</i> (Exocarpium Citrulli) and <i>He Ye</i> (Folium Nelumbinis) clear summer-heat.• <i>Si Gua Pi</i> (Pericarpium Luffae) clears heat in the Lung and its channel and collateral.• <i>Zhu Ye</i> (Herba Phyllostachys) clears the Heart and purges heat through urination.

Qīng Luò Yīn (Clear the Collaterals Decoction)

used in the fresh and aromatic form to enhance the summer-heat dispersing action. Because this formula is intended to treat mild cases of summer-heat syndrome, it can be taken regularly as an herbal tea during the summer to prevent summer-heat invasion.

MODIFICATIONS

- With thirst, add *Tian Hua Fen* (Radix Trichosanthis), *Ge Gen* (Radix Puerariae Lobatae), and *Shi Hu* (Caulis Dendrobii).
- With fever, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).
- With summer-heat injuring the Lung manifesting in high-pitched cough with no sputum, add *Gan Cao* (Radix

et Rhizoma Glycyrrhizae), *Jie Geng* (Radix Platycodonis), *Ku Xing Ren* (Semen Armeniacae Amarum) and *Mai Dong* (Radix Ophiopogonis).

CAUTIONS / CONTRAINDICATIONS

Qing Luo Yin treats only mild to moderate cases of summer-heat. It is insufficient for severe cases of summer-heat.

AUTHORS' COMMENTS

Qing Luo Yin treats mild to moderate cases of summer-heat invading the Lung. This formula may be taken as a decoction for treatment, and it may also be taken in lower doses as a tea throughout the summer for prevention of heat strokes.

Xiāng Rú Sǎn (Mosla Powder)

香薷散

Pinyin Name: *Xiang Ru San*

Literal Name: Mosla Powder

Alternate Names: *Hsiang Ju Yin*, *Xiang Ru Yin*, Elsholtzia Drink, Elsholtzia Decoction

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Xiang Ru</i> (Herba Moslae)	480g [9g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>zhi</i> (fried with ginger juice)	240g [6g]
<i>Bai Bian Dou</i> (Semen Lablab Album), <i>chao</i> (dry-fried)	240g [6g]

Note: *Xiang Ru* (Herba Moslae) may be derived from two sources: *Mosla chinensis* and *Elsholtzia splendens*. Both herbs have similar functions, and have been used interchangeably in the history of Chinese herbal medicine. However, *Zhong Hua Ren Min Gong He Guo Yao Dian* (Pharmacopoeia of People's Republic of China) in 2005 identifies *Mosla chinensis* as the official source of *Xiang Ru*. Therefore, we have adopted mosla as the standard nomenclature for both single herbs and herbal formulas throughout this text.

in brackets, with or without the addition of grain-based liquor.

CHINESE THERAPEUTIC ACTIONS

1. Dispels summer-heat
2. Releases exterior cold
3. Resolves dampness and harmonizes the middle *jiao*

CLINICAL MANIFESTATIONS

Summer-heat syndrome with exterior cold and interior dampness: fever, aversion to cold, headache, lethargy; heavy sensations in the head and body, no perspiration, and stifling sensations in the chest; or nausea, vomiting, diarrhea, and abdominal pain with a white, greasy tongue coating and a superficial pulse.

CLINICAL APPLICATIONS

Common cold, heat stroke, gastroenteritis, bacterial dysentery, fever, and hypokalemia.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a coarse powder. Cook 9g of the powder with one large bowl of water and a small amount of grain-based liquor (approximately 10% of the total volume) until 70% of the liquid remains. Discard the residue, and cool the strained decoction before ingestion. Today, this formula may be prepared as a decoction with the doses suggested

Xiāng Rú Sǎn (Mosla Powder)

EXPLANATION

Xiang Ru San (Mosla Powder) treats summer-heat with exterior cold and interior dampness. More specifically, it treats exterior cold and interior dampness during the summer, a condition that often occurs when individuals try to cool down on hot summer days by drinking cold beverages and by wearing light clothing in the evening and at night. As a result, they contract both dampness in the interior (from drinking cold beverages) and wind-cold at the exterior (by wearing light clothing as the temperature cools down). Interior dampness blocks the qi flow to cause heaviness in the head, no perspiration, a stifling sensation in the chest, nausea, vomiting, diarrhea, lethargy, and abdominal pain. Fever, aversion to cold, and headache are common symptoms caused by exterior wind-cold. A white, greasy tongue coating indicates damp accumulation in the interior, and a superficial pulse is a sign of an exterior condition.

Xiang Ru (Herba Moslae), aromatic and warm, dispels the exterior cold factor and resolves interior dampness. Frequently used in the summer to treat exterior wind-cold, *Xiang Ru* (Herba Moslae) has been called the summer *Ma Huang* (Herba Ephedrae). *Hou Po* (Cortex Magnoliae Officinalis) activates qi flow and dries interior dampness to relieve the feeling of heaviness and the stifling sensation in the chest. *Bai Bian Dou* (Semen Lablab Album) tonifies qi, strengthens the Spleen, and dries dampness.

MODIFICATIONS

- With nasal obstruction or discharge, add *Cong Chi Tang* (Scallion and Prepared Soybean Decoction).
- With cramps and spasms, add *Mu Gua* (Fructus Chaenomeles).
- When there is more dampness, add *Fu Ling* (Poria) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- If there is Spleen deficiency with *zhong* (central) qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis

Macrocephalae), and *Ju Hong* (Exocarpium Citri Reticulatae).

- With hypokalemia, combine with *Liu Yi San* (Six-to-One Powder) and *Bo He* (Herba Menthae).
- With aversion to cold and more superficial symptoms, add *Cong Bai* (Bulbus Allii Fistulosi) and *Dan Dou Chi* (Semen Sojae Praeparatum).

CAUTIONS / CONTRAINDICATIONS

- *Xiang Ru San* is not suitable for patients who suffer from summer-heat with perspiration, summer-heat with *wei* (defensive) qi deficiency with perspiration, or summer-heat with irritability and thirst.
- *Xiang Ru San* is not suitable for individuals with exterior wind-heat conditions.¹

PHARMACOLOGICAL EFFECTS

Effect on temperature regulation: Administration of *Xiang Ru San* was associated with a temporary reduction of body temperature in rats with artificially-induced fever. The effectiveness of the formula was increased when a small amount of alcohol was added to the water during the cooking process to enhance the extraction of essential oils.²

CLINICAL STUDIES AND RESEARCH

1. **Fever:** Forty-five children with persistent fever (38-39°C / 100.4-102.2°F) longer than 10 days during the summer were treated with modified *Xiang Ru San* with success. Out of 45 cases, the study reported 14 cases with normal temperature after 1-3 days, 16 cases after 4-6 days, 12 cases after 7-9 days, and 3 cases with no effect after 10 days. *Xiang Ru San* was modified by adding *Ban Lan Gen* (Radix Isatidis), *Di Gu Pi* (Cortex Lycii), *Qing Hao* (Herba Artemisiae Annuae), and others as deemed necessary.³
2. **Hypokalemia:** Twenty-four patients with low potassium were treated with *Xiang Ru San* combined with *Liu Yi San* (Six-to-One Powder) and *Bo He* (Herba Menthae). After 2-4 doses, 19 returned to normal, 4 had some improvement, and 1 had no benefit.⁴

Xiang Ru San (Mosla Powder)

Summer-heat syndrome with exterior cold and interior dampness	<ul style="list-style-type: none"> • Heavy sensation in the head, no perspiration, a stifling sensation in the chest, nausea, vomiting, diarrhea, lethargy, and abdominal pain: interior dampness • Fever, aversion to cold, and headache: exterior wind-cold • White, greasy tongue coating: damp accumulation • Superficial pulse: exterior condition 	<ul style="list-style-type: none"> • Clears summer-heat • Releases exterior cold • Resolves dampness and harmonizes the middle <i>jiao</i> 	<ul style="list-style-type: none"> • <i>Xiang Ru</i> (Herba Moslae) releases exterior cold. • <i>Hou Po</i> (Cortex Magnoliae Officinalis) activates qi flow and dries dampness. • <i>Bai Bian Dou</i> (Semen Lablab Album) tonifies qi, strengthens the Spleen, and dries dampness.

Xiāng Rú Sǎn (Mosla Powder)

RELATED FORMULAS

Sān Wù Xiāng Rú Yīn (Mosla Three Decoction)

三物香薷飲

三物香薷飲

Pinyin Name: *San Wu Xiang Ru Yin*

Literal Name: Mosla Three Decoction

Original Source: *Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments) by Wang Ken-Tang in 1602

Xiang Ru (Herba Moslae) [16g]

Hou Po (Cortex Magnoliae Officinalis) [8g]

Bai Bian Dou (Semen Lablab Album) [12g]

San Wu Xiang Ru Yin (Mosla Three Decoction) is taken as a decoction at room temperature because ingestion of warm decoction is sometimes associated with diarrhea. Note: Doses of herbs are unavailable from the source text. Suggested doses are listed above in brackets.

This formula primarily dispels summer-heat, eliminates toxins and stops diarrhea. It treats invasion of summer-heat with symptoms such as headache, fever, aversion to cold, irritability, abdominal pain, nausea and vomiting. Today, it may be used to treat enteritis, gastroenteritis, stomach flu, diarrhea, dysentery, and food poisoning.

This formula is used to treat sudden contraction of exterior condition during the summer. Because summer is characterized predominately by dampness and heat, the condition is defined as damp-heat affecting the exterior and the digestive tract. Damp-heat at the exterior causes headache, fever, and aversion to cold. Because damp-heat may be contracted via ingestion of cold or raw food, the patient may show abdominal pain, nausea, and vomiting.

This is a rather simple formula containing only three herbs. *Xiang Ru* (Herba Moslae) is regarded as one of the best herbs to release the exterior during the summer. It releases the exterior via diaphoresis, and drains dampness via urination. In addition, *Hou Po* (Cortex Magnoliae Officinalis) strengthens the Spleen, and *Bai Bian Dou* (Semen Lablab Album) relieves diarrhea. Altogether, this formula dispels summer-heat from the exterior and interior, while strengthening the Spleen and Stomach simultaneously.

Xiang Ru San and *San Wu Xiang Ru Yin* (Mosla Three Decoction) have the same ingredients, but are derived from different source texts. *Xiang Ru San* has specific doses and preparation methods for its ingredients, while the doses and preparation methods are unavailable for

San Wu Xiang Ru Yin. Because both formulas are used clinically, they are listed separately in this text.

Shí Wèi Xiāng Rú Yīn

(Ten-Ingredient Decoction with Mosla)

十味香薷飲

十味香薷飲

Pinyin Name: *Shi Wei Xiang Ru Yin*

Literal Name: Ten-Ingredient Decoction with Mosla

Original Source: *Zhou Hou Bei Ji Fang* (Emergency Formulas to Keep Up One's Sleeve) by Ge Hong in 341 A.D.

Xiang Ru (Herba Moslae) 30g

Ren Shen (Radix et Rhizoma Ginseng) 15g

Bai Zhu (Rhizoma Atractylodis Macrocephalae) 15g

Chen Pi (Pericarpium Citri Reticulatae) 15g

Fu Ling (Poria) 15g

Huang Qi (Radix Astragali) 15g

Hou Po (Cortex Magnoliae Officinalis) 15g

Mu Gua (Fructus Chaenomelis) 15g

Bai Bian Dou (Semen Lablab Album) 15g

Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae

Praeparata cum Melle) 15g

Shi Wei Xiang Ru Yin (Ten-Ingredient Decoction with Mosla) disperses summer-heat, harmonizes the Spleen and Stomach, and benefits qi. It is used to treat summer-heat at the exterior with constitutional deficiency: exterior condition during the summer time, steaming sensations of the skin, heavy sensation of the head, heaviness and fatigue of the extremities and the body, headache, irritability, thirst, nausea, vomiting, diarrhea, and dizziness. There may also be perspiration with a deficient pulse. Today, it may be used to treat common cold, influenza, stomach flu, indigestion, and diarrhea.

This formula has herbs to clear summer-heat, harmonize the middle *jiao* and tonify qi. Aromatic and warm, *Xiang Ru* (Herba Moslae) disperses summer-heat from the exterior. *Hou Po* (Cortex Magnoliae Officinalis) resolves dampness and harmonizes the Stomach. *Bai Bian Dou* (Semen Lablab Album) resolves summer-heat and harmonizes the Spleen. *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali) tonify qi and treat the underlying deficiency. *Huang Qi* (Radix Astragali) also strengthens *wei* (defensive) *qi* and stops perspiration. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Chen Pi* (Pericarpium Citri Reticulatae) strengthen the Spleen and Stomach, and relieve nausea, vomiting and diarrhea. *Mu Gua* (Fructus Chaenomelis) resolves dampness and promotes digestion. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

Xiāng Rú Sǎn (Mosla Powder)

AUTHORS' COMMENTS

Xiang Ru San is commonly used to treat acute enteritis, gastroenteritis, and bacterial dysentery characterized by wind, cold, and dampness. The key symptoms indicating use of this formula are aversion to cold, fever, a heavy sensation in the head, body aches, absence of perspiration, a stifling sensation in the chest, a white, greasy tongue coating, and a superficial pulse.

新加香薷飲
新加香薷飲

Pinyin Name: *Xin Jia Xiang Ru Yin*

Literal Name: Newly-Augmented Mosla Decoction

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

COMPOSITION

<i>Xiang Ru</i> (Herba Moslae)	6g
<i>Bian Dou Hua</i> (Flos Lablab Album), fresh	9g
<i>Jin Yin Hua</i> (Flos Lonicerae Japonicae)	9g
<i>Lian Qiao</i> (Fructus Forsythiae)	6g [9g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis)	6g

Note: *Xiang Ru* (Herba Moslae) may be derived from two sources: *Mosla chinensis* and *Elsholtzia splendens*. Both herbs have similar functions, and have been used interchangeably in the history of Chinese herbal medicine. However, *Zhong Hua Ren Min Gong He Guo Yao Dian* (Pharmacopoeia of People's Republic of China) in 2005 identifies *Mosla chinensis* as the official source of *Xiang Ru*. Therefore, we have adopted mosla as the standard nomenclature for both single herbs and herbal formulas throughout this text.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 5 cups of water until 2 cups remain. Take 1 cup of the strained decoction. Once sweating has been induced, the formula should be discontinued. If sweating does not occur, take another cup of the decoction. If there is still no sweating, repeat the steps above and administer another round of decoction. Today, the decoction may be prepared using the dose of *Lian Qiao* (Fructus Forsythiae) suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Dispels summer-heat
2. Releases exterior cold
3. Clears heat and resolves dampness

CLINICAL MANIFESTATIONS

Summer-heat disorders complicated by exterior cold and interior dampness: fever, slight aversion to cold, headache, no perspiration, thirst, a red face, a stifling sensation and discomfort in the chest, thick, white and greasy tongue coating, and a superficial, rapid pulse.

CLINICAL APPLICATIONS

Common cold, influenza, and febrile diseases in summer.

EXPLANATION

Xin Jia Xiang Ru Yin (Newly-Augmented Mosla Decoction), derived from *Xiang Ru San* (Mosla Powder), treats the type of summer-heat disorder that is complicated by exterior cold and interior damp factors. Patients who have this syndrome are usually first attacked by summer-heat.

Xīn Jiā Xiāng Rú Yǐn (Newly-Augmented Mosla Decoction)

Xin Jia Xiang Ru Yin (Newly-Augmented Mosla Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Summer-heat disorders complicated by exterior cold and interior dampness	<ul style="list-style-type: none">• Fever, slight aversion to cold, headache and no perspiration: exterior cold• Thirst and a red face: summer-heat consuming yin and body fluids• Stifling sensation and discomfort in the chest: dampness in the interior• White, greasy tongue coating: dampness in the interior• Superficial, rapid pulse: exterior cold and interior heat	<ul style="list-style-type: none">• Disperses summer-heat• Releases the exterior• Clears heat and dampness	<ul style="list-style-type: none">• <i>Xiang Ru</i> (Herba Moslae) releases the exterior cold factors and resolves interior dampness.• <i>Bian Dou Hua</i> (Flos Lablab Album), <i>Jin Yin Hua</i> (Flos Lonicerae Japonicae) and <i>Lian Qiao</i> (Fructus Forsythiae) clear summer-heat.• <i>Hou Po</i> (Cortex Magnoliae Officinalis) activates qi circulation and dries dampness.

Before it is relieved, however, they are further invaded by exterior cold factors as a result of lack of adequate clothing or other reasons. Because summer-heat is usually accompanied by dampness, interior dampness may arise as a result. Fever, slight aversion to cold, headache, and no perspiration are clinical manifestations associated with exterior cold. Thirst and a red face are the results of summer-heat damaging yin and body fluids. A stifling sensation and discomfort in the chest, along with a white, greasy tongue coating, indicate dampness in the interior. A superficial, rapid pulse is caused by exterior cold and summer-heat in the interior.

To effectively treat this syndrome, one should release exterior cold, dispel interior summer-heat, and resolve interior dampness. *Xiang Ru* (Herba Moslae), aromatic and warm, dispels the exterior cold factor and dissolves interior dampness. Frequently used in the summer to treat exterior wind-cold, *Xiang Ru* has been called the summer *Ma Huang* (Herba Ephedrae). *Bian Dou Hua* (Flos Lablab Album), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *Lian Qiao* (Fructus Forsythiae) penetrate to the interior to clear summer-heat, especially in the upper *jiao* or the *qi* (energy) level. *Hou Po* (Cortex Magnoliae Officinalis) activates qi circulation and dries dampness to clear the thick tongue coating and relieve the chest stuffiness and discomfort.

CAUTIONS / CONTRAINDICATIONS

Xin Jia Xiang Ru Yin is generally given as a warm decoction. However, use of this formula as a warm decoction has been occasionally associated with nausea and vomiting. In such circumstances, the decoction should be given at room temperature.¹

CLINICAL STUDIES AND RESEARCH

- 1. **Common cold or influenza in summer:** Modified *Xin Jia Xiang Ru Yin* was used to treat viral infection during the summer in 96 patients. The age of the patients ranged from 8-81 years of age, with average of 2.3 days of infection prior to receiving treatment. The study reported an average time of 1.77 days for reduction of fever, and 2.1 days for resolution of all other symptoms.²
- 2. **Fever:** Concurrent use of *Xin Jia Xiang Ru Yin* and *Hao Qin Qing Dan Tang* (Artemisia Annuu and Scutellaria Decoction to Clear the Gallbladder) was reported to have 94% effectiveness in treating fever. Of 50 cases, the study reported complete recovery in 24 cases, significant improvement in 17 cases, moderate improvement in 6 cases, and no effect in 3 cases.³
- 3. **Febrile disease in summer:** Use of modified *Xin Jia Xiang Ru Yin* to treat 31 patients with febrile diseases in the summer demonstrated 93.5% effectiveness. The study reported complete recovery in 21 cases, near-recovery in 8 cases, and moderate improvement in 2 cases.⁴

AUTHORS' COMMENTS

- Xiang Ru San* (Mosla Powder) and *Xin Jia Xiang Ru Yin* both contain acrid and warm herbs such as *Xiang Ru* (Herba Moslae) and *Hou Po* (Cortex Magnoliae Officinalis) to expel exterior pathogenic factors, disperse cold and resolve dampness.
- *Xiang Ru San* is warmer in property, and is better for treating summer-heat disorders complicated by exterior cold and interior dampness.
 - *Xin Jia Xiang Ru Yin* is slightly cooler in property, as it contains *Jin Yin Hua* (Flos Lonicerae Japonicae), *Bian Dou Hua* (Flos Lablab Album), and *Lian Qiao* (Fructus Forsythiae). It is better for summer-heat conditions with more heat, with symptoms such as thirst and a red face.

Liù Yī Sǎn (Six-to-One Powder)

六一散

Pinyin Name: Liu Yi San

Literal Name: Six-to-One Powder

Original Source: Shang Han Zhi Ge Fang Lun (Direct Investigations of Formulas for Cold-Induced Disorders) by Liu Yuan-Su in the Jin Dynasty

COMPOSITION

Hua Shi (Talcum)	180g [18g]
Gan Cao (Radix et Rhizoma Glycyrrhizae)	30g [3g]

Note: Liu Yi San, literally Six-to-One Powder, is so named to emphasize the 6:1 dose proportion of its two ingredients, Hua Shi (Talcum) and Gan Cao (Radix et Rhizoma Glycyrrhizae).

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into a fine powder, and take 9g of the powder with warm water three times daily with a small amount of honey. This formula may also be taken cold with fresh well water. This formula may also be prepared as a decoction using the doses suggested in brackets above. Take the decoction two to three times daily.

CHINESE THERAPEUTIC ACTIONS

Dispels summer-heat and dampness

CLINICAL MANIFESTATIONS

Summer-heat and dampness: fever, irritability, thirst, dysuria, or diarrhea.

CLINICAL APPLICATIONS

Whooping cough, infantile diarrhea, nephrolithiasis, urolithiasis, urethritis, and allergy.

EXPLANATION

Liu Yi San (Six-to-One Powder) treats summer-heat syndrome accompanied by dampness. Fever and irritability are due to heat in the body affecting the shen (spirit). Thirst reflects the consumption of body fluids by summer-heat and dampness. The heat and dampness may obstruct the qi flow in the lower jiao, causing dysuria and diarrhea.

Hua Shi (Talcum) clears summer-heat and dampness through urination to treat irritability, thirst and dysuria. Hua Shi (Talcum) is cold in nature and bland in taste: cold clears heat from the zang (solid organs), and bland dispels dampness from the fu (hollow) organ (Urinary Bladder). However, the cold nature of Hua Shi (Talcum) may damage the Spleen and Stomach. Therefore, warm Gan Cao (Radix et Rhizoma Glycyrrhizae) is used to balance

Liu Yi San (Six-to-One Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Summer-heat with dampness	<ul style="list-style-type: none">Fever and irritability: heat disturbing the shen (spirit)Thirst: consumption of body fluids by summer-heat and dampnessDysuria: summer-heat and dampness affecting the lower jiao	Dispels summer-heat and dampness	<ul style="list-style-type: none">Hua Shi (Talcum) clears summer-heat and dampness through urination.Gan Cao (Radix et Rhizoma Glycyrrhizae) clears heat and harmonizes the middle jiao.

Liu Yi San (Six-to-One Powder)

the coldness of *Hua Shi* (Talcum). In addition, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) also clears heat and harmonizes the middle *jiao*.

Although *Liu Yi San* only has two herbs, it is well-formulated to maximize the overall effect and minimize the side effects. It clears heat without leaving dampness behind, and promotes diuresis without damaging yin.

MODIFICATIONS

- If there is urinary stone or dysuria, add *Jin Qian Cao* (Herba Lysimachiae) and *Hai Jin Sha* (Spora Lygodii).
- For diarrhea or dysentery with blood or pus, add charred *Shan Zha* (Fructus Crataegi) and *Gan Jiang* (Rhizoma Zingiberis).

CAUTIONS / CONTRAINDICATIONS

- *Liu Yi San* is not recommended in cases of summer-heat or dysuria without damp-heat accumulation, or in cases of polyuria caused by yang deficiency.
- This formula should be used with caution in patients with qi and yin deficiencies, and in individuals with Spleen and Stomach deficiencies.
- This formula is contraindicated during pregnancy.
- Direct contact between the powdered herbs and the mucous membranes should be avoided, as formation of granuloma has been reported.¹

PHARMACOLOGICAL EFFECTS

1. **Diuretic:** Administration of *Liu Yi San* in mice was associated with a marked diuretic effect, with peak effect reached within the first hour after oral ingestion.²
2. **Protective:** Due to its small particles, large surface area, and binding property, *Hua Shi* (Talcum) has been used with good results to protect the skin and minimize irritation. One report stated that use of *Hua Shi* (Talcum) orally can block the absorption of toxins in the intestines.³

CLINICAL STUDIES AND RESEARCH

1. **Whooping cough:** Eighty patients with whooping cough were treated with modified *Liu Yi San* as decoction one time daily. Modifications were as follows: *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Fu Ling* (Poria) were added for those who were overweight; and *Shu Di Huang* (Radix Rehmanniae Praeparata), *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Xiong* (Rhizoma Chuanxiong) were added for those who were underweight. After 3-6 doses, the study reported 49 cases had complete recovery, 27 had marked improvement, and 4 discontinued treatment due to nausea and vomiting. The overall rate of effectiveness was 95%.⁴

2. **Infantile diarrhea:** Modified *Liu Yi San* demonstrated 96.6% effectiveness in the treatment of diarrhea in 150 infants. Additions were as follows: *Sha Ren* (Fructus Amomi) and *Huang Lian* (Rhizoma Coptidis) for infection; and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Ren Shen* (Radix et Rhizoma Ginseng) for Spleen deficiency.⁵

3. **Nephrolithiasis and urolithiasis:** Thirty-six patients with kidney and bladder stones were treated with modified *Liu Yi San* with passage of stones in 30 patients and dissolution of stones in 6 patients. The base formula used included *Lou Gu* (Gryllotalpa) 5 pieces, *Hua Shi* (Talcum) 30g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g. The modifications were as follows: *Hai Jin Sha* (Spora Lygodii) 30g and *Jin Qian Cao* (Herba Lysimachiae) 30g for large stones; *Che Qian Zi* (Semen Plantaginis) 12g and *Shi Wei* (Folium Pyrosiae) 12g for dysuria with burning sensations during urination; *Bai Mao Gen* (Rhizoma Imperatae) 30g, *Bian Xu* (Herba Polygoni Avicularis) 12g, and *Qu Mai* (Herba Dianthi) 12g for blood in the urine; and *Hu Po* (Succinum) 5g for colic pain.⁶

4. **Urethritis:** Ten patients with urethritis were treated with *Liu Yi San* twice daily. Most patients had complete recovery within 3-4 days, while some required 6 days of treatment.⁷

5. **Pesticide poisoning:** One study reported beneficial effect using *Liu Yi San* to treat individuals with organophosphorus pesticide poisoning. The treatment protocol was to take herbs with warm water in several divided doses.⁸

TOXICOLOGY

This formula is well-tolerated. However, it has been reported that granuloma may occur with direct contact between *Hua Shi* (Talcum) and mucous membranes.⁹

RELATED FORMULAS

Liu Yi San (Six-to-One Powder)

六一散

Pinyin Name: *Liu Yi San*

Literal Name: Six-to-One Powder

Original Source: *Xuan Ming Lun Fang* (Discussion of Dispersing and Brightening Formulas) by Liu Yuan-Su in the Jin and Yuan Dynasties

<i>Hua Shi</i> (Talcum)	180g [18g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	30g [3g]

The source text states to grind the ingredients into a fine powder, and take 9g of the powder with warm water three times daily with a small amount of honey. This formula may also be taken cold with fresh well water. To promote

Liù Yī Sǎn (Six-to-One Powder)

urination and induce sweating, take it with a decoction made from cooking 5 *cun* (approximately 5 inches) of *Cong Bai* (Bulbus Allii Fistulosi) and 50 pieces of *Dan Dou Chi* (Semen Sojae Praeparatum) in one large bowl of water and reducing it until 70% of the liquid remains. This formula may also be prepared as a decoction using the doses suggested in brackets above. Take the decoction two to three times daily.

These two formulas have the same names, ingredients (although they differ in processing method), indications, and are derived from the same time period (Jin Dynasty). Therefore, it is unclear which is the true original source for this formula. Both formulas are presented here to reflect their historical similarities and minor differences.

Yì Yuán Sǎn (Benefit the Basal Powder)

益元散

Pinyin Name: Yi Yuan San

Literal Name: Benefit the Basal Powder

Original Source: *Shang Han Zhi Ge Fang Lun* (Direct Investigations of Formulas for Cold-Induced Disorders) by Liu Yuan-Su in the Jin Dynasty

<i>Hua Shi</i> (Talcum)	180g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	30g
<i>Zhu Sha</i> (Cinnabaris)	[9g]

Note: *Zhu Sha* (Cinnabaris) is a potentially toxic heavy metal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

The source text states to grind the ingredients into a fine powder. Take 6g of the powdered formula with warm water or a decoction made from *Deng Xin Cao* (Medulla Junci).

Yi Yuan San (Benefit the Basal Powder) is composed of *Liu Yi San* plus *Zhu Sha* (Cinnabaris) and *Deng Xin Cao* (Medulla Junci). These two additional herbs help tranquilize the *shen* (spirit). Clinically, it treats the syndrome of summer-heat and dampness complicated by palpitations, insomnia, and excessive dreaming, as both *Zhu Sha* (Cinnabaris) and *Deng Xin Cao* (Medulla Junci) clear Heart fire and calm the *shen*.

Bì Yù Sǎn (Jasper Powder)

碧玉散

Pinyin Name: Bi Yu San

Literal Name: Jasper Powder

Original Source: *Shang Han Zhi Ge Fang Lun* (Direct Investigations of Formulas for Cold-Induced Disorders) by Liu Yuan-Su in the Jin Dynasty

<i>Hua Shi</i> (Talcum)	180g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	30g
<i>Qing Dai</i> (Indigo Naturalis)	[9g]

Bi Yu San (Jasper Powder) treats the syndrome of summer-heat and dampness complicated by Liver and Gallbladder heat. Clinically, patients may show red eyes, a sore throat, and mouth and lips ulcerations in addition to all the symptoms listed under *Liu Yi San*.

Bi Yu San is composed of *Liu Yi San* plus *Qing Dai* (Indigo Naturalis). The original source, however, did not specify the dose of *Qing Dai* (Indigo Naturalis).

Jī Sū Sǎn (Peppermint Powder)

雞蘇散

鸡苏散

Pinyin Name: Ji Su San

Literal Name: Peppermint Powder

Original Source: *Shang Han Zhi Ge Fang Lun* (Direct Investigations of Formulas for Cold-Induced Disorders) by Liu Yuan-Su in the Jin Dynasty

<i>Hua Shi</i> (Talcum)	180g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	30g
<i>Bo He</i> (Herba Menthae)	[7.5g]

Ji Su San (Peppermint Powder) is composed of *Liu Yi San* plus *Bo He* (Herba Menthae). It is commonly used to treat the syndrome of summer-heat and dampness complicated by exterior wind. Clinically, patients may have swelling sensations of the head, headache, coughing, and other symptoms of exterior wind.

AUTHORS' COMMENTS

Liu Yi San is mostly used for mild summer-heat with damp conditions. However, it is not a strong formula. If the condition is severe or acute, other appropriate formulas should be added to achieve maximum effect. It is mostly reserved as a foundation formula to which other herbs can be added.

Liù Yī Sǎn (Six-to-One Powder)

Guì Líng Gān Lù Yīn (Cinnamon and Poria Sweet Dew Decoction)

桂苓甘露飲
桂苓甘露饮

Pinyin Name: *Gui Ling Gan Lu Yin*

Literal Name: Cinnamon and Poria Sweet Dew Decoction

Original Source: *Huang Di Su Wen Xuan Ming Lun Fang* (Formulas from the Discussion Illuminating the Yellow Emperor's Basic Questions) by Liu Yuan-Su in 1172

COMPOSITION

<i>Hua Shi</i> (Talcum)	120g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	60g
<i>Fu Ling</i> (Poria)	30g
<i>Zhu Ling</i> (Polyporus)	15g
<i>Ze Xie</i> (Rhizoma Alismatis)	30g
<i>Rou Gui</i> (Cortex Cinnamomi)	60g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>zhi</i> (fried with liquid)	15g
<i>Shi Gao</i> (Gypsum Fibrosum)	60g
<i>Han Shui Shi</i> (Mirabilite)	60g

DOSAGE / PREPARATION / ADMINISTRATION

Grind the ingredients into powder and take 9g with warm water, fresh spring water, or preferably a decoction made from *Sheng Jiang* (Rhizoma Zingiberis Recens). For children, reduce the dose to 3g.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and dispels summer-heat
2. Regulates qi and dispels dampness

CLINICAL MANIFESTATIONS

Invasion of summer-heat and dampness: fever, headache, irritability, thirst, dysuria, and sudden turmoil disorder with vomiting or diarrhea.

CLINICAL APPLICATIONS

Dysentery, diarrhea, vomiting, infantile diarrhea, kidney stone, bladder stone, urethritis, and allergy.

EXPLANATION

Gui Ling Gan Lu Yin (Cinnamon and Poria Sweet Dew Decoction) treats summer-heat syndrome accompanied by interior damp accumulation. Summer-heat rising upwards in the body causes fever and headaches. Summer-heat may also disturb the *shen* (spirit), causing irritability. If heat consumes body fluids, thirst occurs. Summer-heat may travel downwards to the lower *jiao*, causing dysuria. Vomiting and diarrhea occur if the dampness stagnates in the middle *jiao* and impairs the Spleen and Stomach's ability to separate the clear from the turbid.

Gui Ling Gan Lu Yin is formulated following the principles of *Liu Yi San* (Six-to-One Powder) and *Wu Ling San* (Five-Ingredient Powder with Poria), with the addition of *Shi Gao* (Gypsum Fibrosum) and *Han Shui Shi* (Mirabilite).

According to the strategies of *Liu Yi San* (Six-to-One Powder), *Hua Shi* (Talcum) clears summer-heat and

Guì Líng Gān Lù Yīn (Cinnamon and Poria Sweet Dew Decoction)

Gui Ling Gan Lu Yin (Cinnamon and Poria Sweet Dew Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Summer-heat and dampness	<ul style="list-style-type: none">• Fever and headaches: summer-heat rising upwards• Irritability and thirst: summer-heat consuming yin and disturbing the <i>shen</i> (spirit)• Dysuria: summer-heat travels downwards to the lower <i>jiao</i>• Vomiting and diarrhea: damp accumulation in the middle <i>jiao</i>	<ul style="list-style-type: none">• Clears heat and dispels summer-heat• Regulates qi and dispels dampness	<ul style="list-style-type: none">• <i>Hua Shi</i> (Talcum) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) dispel summer-heat and dampness.• <i>Fu Ling</i> (Poria), <i>Zhu Ling</i> (Polyporus), <i>Ze Xie</i> (Rhizoma Alismatis), <i>Rou Gui</i> (Cortex Cinnamomi) and <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) regulate water circulation, dispel damp, and disperse water accumulation.• <i>Shi Gao</i> (Gypsum Fibrosum) and <i>Han Shui Shi</i> (Mirabilite) clear heat and dispel summer-heat.

dampness through urination; and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) clears heat, harmonizes the Spleen and Stomach, and promotes the secretion of body fluids. Following the strategies of *Wu Ling San* (Five-Ingredient Powder with Poria), *Rou Gui* (Cortex Cinnamomi) warms yang qi and helps the urinary functioning of the lower *jiao*; *Fu Ling* (Poria), *Zhu Ling* (Polyporus) and *Ze Xie* (Rhizoma Alismatis) induce urination to dispel interior dampness and relieve dysuria; and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen, dries dampness, and regulates qi flow. Lastly, *Shi Gao* (Gypsum Fibrosum) and *Han Shui Shi* (Mirabilite), both extremely cold, clear heat and dispel summer-heat.

CLINICAL STUDIES AND RESEARCH

Diarrhea: Administration of modified *Gui Ling Gan Lu Yin* along with adjustment in dietary habits showed 92.5% effectiveness in treating 80 children with diarrhea characterized by damp-heat. The herbal decoction contained *Fu Ling* (Poria), *Zhu Ling* (Polyporus), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Gui Zhi* (Ramulus Cinnamomi), *Shi Gao* (Gypsum Fibrosum), *Han Shui Shi* (Mirabilite), and *Hua Shi* (Talcum) as the base formula. Modifications included the addition of *Ge Gen* (Radix Puerariae Lobatae) and *Jin Yin Hua* (Flos Lonicerae Japonicae) for the presence

of an exterior syndrome. Of 80 cases, the study reported complete recovery in 49 cases, significant improvement in 22 cases, moderate improvement in 3 cases, and no change in 6 cases. The overall success rate was 92.5%.¹

AUTHORS' COMMENTS

Liu Yi San (Six-to-One Powder) and *Gui Ling Gan Lu Yin* both dispel summer-heat and dampness, but have the following differences:

- *Liu Yi San* contains only *Hua Shi* (Talcum) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and its effect is thus weaker. It is mainly used as the base formula for summer-damp invasion with feverish sensations, thirst, irritability, and dysuria or diarrhea.
- *Gui Ling Gan Lu Yin* combines *Liu Yi San* (Six-to-One Powder) with *Wu Ling San* (Five-Ingredient Powder with Poria), *Shi Gao* (Gypsum Fibrosum), and *Han Shui Shi* (Mirabilite). Thus, it more strongly clears heat and dispels dampness. It is mainly used for summer-heat with dampness in patients who have interior water retention manifesting in fever, headache, thirst with a desire to drink, irritability, dysuria, vomiting, and/or diarrhea.²

Qīng Shǔ Yì Qì Tāng

(Clear Summer-Heat and Augment the Qì Decoction)

清暑益氣湯

清暑益气汤

Pinyin Name: *Qing Shu Yi Qi Tang*

Literal Name: Clear Summer-Heat and Augment the Qì Decoction

Alternate Names: *Ching Shu I Chi Tang*, *Ching Shu Yi Chi Tang*, Summer-heat-clearing and Chi-tonifying Decoction, Astragalus and Atractylodes Combination

Original Source: *Wen Re Jing Wei* (Warp and Woof of Warm-Febrile Diseases) by Wang Meng-Ying in 1852

COMPOSITION

<i>Xi Yang Shen</i> (Radix Panacis Quinquefolii)	[5g]
<i>Xi Gua Cui Pi</i> (Exocarpium Citrulli)	[30g]
<i>He Geng</i> (Caulis Nelumbinis)	[15g]
<i>Shi Hu</i> (Caulis Dendrobii)	[15g]
<i>Mai Dong</i> (Radix Ophiopogonis)	[9g]
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	[6g]
<i>Zhu Ye</i> (Herba Phyllostachys)	[6g]
<i>Huang Lian</i> (Rhizoma Coptidis)	[3g]
<i>Geng Mi</i> (Semen Oryzae)	[15g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	[3g]

DOSAGE / PREPARATION / ADMINISTRATION

The herb doses are unavailable from the source text. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Dispels summer-heat
2. Tonifies qi, nourishes yin, and generates body fluids

CLINICAL MANIFESTATIONS

Summer-heat damaging both qi and body fluids: fever, profuse perspiration, irritability, thirst, scanty, dark-colored urine, lethargy, shortness of breath, and a deficient, rapid pulse.

CLINICAL APPLICATIONS

Common cold in the summer, summer fever in children, heat stroke, febrile disorders, pneumonia, asthma, wheezing and dyspnea, chronic fatigue syndrome, lassitude of extremities, thirst, and loss of appetite.

EXPLANATION

Qing Shu Yi Qi Tang (Clear Summer-Heat and Augment the Qì Decoction) treats summer-heat syndromes with damage to both qi and body fluids. In this syndrome, excess heat forces body fluids out of the body, causing fever and profuse perspiration. The profuse perspiration may extensively consume and damage body fluids, leading to irritability, thirst, and dark, scanty urine. Qi travels with

body fluids and may be lost and become deficient as a result of excess perspiration. Lethargy and shortness of breath are both signs of qi deficiency. A deficient, rapid pulse suggests qi deficiency and heat in the body.

Xi Yang Shen (Radix Panacis Quinquefolii), as a chief herb, clears heat and tonifies qi, yin and body fluids. *Xi Gua Cui Pi* (Exocarpium Citrulli), as the other chief herb of this formula, clears heat and resolves summer-heat. *He Geng* (Caulis Nelumbinis) helps *Xi Gua Cui Pi* (Exocarpium Citrulli) clear summer-heat. *Shi Hu* (Caulis Dendrobii) and *Mai Dong* (Radix Ophiopogonis) help *Xi Yang Shen* (Radix Panacis Quinquefolii) clear heat and nourish yin. *Zhi Mu* (Rhizoma Anemarrhenae) and *Zhu Ye* (Herba Phyllostachys) clear heat and relieve irritability. *Geng Mi* (Semen Oryzae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonify qi and nourish the Stomach.

Although *Huang Lian* (Rhizoma Coptidis) is listed as an ingredient in this formula, use it cautiously as its bitter and cold nature may easily damage yin and body fluids. If the patient has only mild symptoms of summer-heat but severe symptoms of body fluids damage, omit *Huang Lian* (Rhizoma Coptidis) from the formula.

MODIFICATIONS

- When there is severe perspiration, add *Fu Xiao Mai* (Fructus Triticis Levis).

Qīng Shǔ Yì Qì Tāng

(Clear Summer-Heat and Augment the Qì Decoction)

Qing Shu Yi Qi Tang (Clear Summer-Heat and Augment the Qi Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Summer-heat damaging both qi and body fluids	<ul style="list-style-type: none"> • Fever and profuse perspiration: summer-heat forcing body fluids out of the body • Irritability, thirst, and dark, scanty urine: summer-heat consuming body fluids • Lethargy and shortness of breath: summer-heat damaging qi • Deficient, rapid pulse: presence of deficiency and excess 	<ul style="list-style-type: none"> • Disperses summer-heat • Tonifies qi, nourishes yin, and generates body fluids 	<ul style="list-style-type: none"> • <i>Xi Yang Shen</i> (Radix Panacis Quinquefolii) tonifies qi, yin, and body fluids. • <i>Xi Gua Cui Pi</i> (Exocarpium Citrulli) and <i>He Geng</i> (Caulis Nelumbinis) strongly clear summer-heat. • <i>Shi Hu</i> (Caulis Dendrobii) and <i>Mai Dong</i> (Radix Ophiopogonis) nourish yin and body fluids. • <i>Zhi Mu</i> (Rhizoma Anemarrhenae) and <i>Zhu Ye</i> (Herba Phyllostachys) clear heat to relieve irritability. • <i>Geng Mi</i> (Semen Oryzae) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonify qi.

- With dysuria, add *Di Huang* (Radix Rehmanniae) and *Mu Tong* (Caulis Akebiae).
- With irritability, dryness and heat, add *Yin Chen* (Herba Artemisiae Scopariae) and *Zhi Zi* (Fructus Gardeniae).
- With deficiency of body fluids, add *Ge Gen* (Radix Puerariae Lobatae) and *Sha Shen* (Radix Glehniae seu Adenophorae).
- If there is qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).

CAUTIONS / CONTRAINDICATIONS

Qing Shu Yi Qi Tang is inappropriate in cases of summer-heat accompanied by dampness because it contains yin-tonic herbs such as *Mai Dong* (Radix Ophiopogonis) and *Zhi Mu* (Rhizoma Anemarrhenae).

CLINICAL STUDIES AND RESEARCH

1. Wheezing and dyspnea: In one clinical study, 76 patients with wheezing and dyspnea during the summer were treated with modified *Qing Shu Yi Qi Tang*. The formula included *Xi Yang Shen* (Radix Panacis Quinquefolii) 20g, *Di Long* (Pheretima) 20g, *Shi Hu* (Caulis Dendrobii) 15g, *Mai Dong* (Radix Ophiopogonis) 15g, *Zhu Ye* (Herba Phyllostachys) 15g, *Zhi Mu* (Rhizoma Anemarrhenae) 15g, *Di Huang* (Radix Rehmanniae) 10g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 10g, *Xi Gua Cui Pi* (Exocarpium Citrulli) 10g, and addition of others as deemed necessary per condition of the patient. The treatment protocol was to boil the herbs in water, and ingest the decoction in two equal portions. Out of 76 cases, the study reported

stabilization in 22 cases (no wheezing or dyspnea for the entire year), significant improvement in 34 cases (no wheezing or dyspnea for the current season), moderate improvement in 15 cases (still requiring other treatment), and no effect in 5 cases. The overall rate of effectiveness was 93.4%.¹

2. Pneumonia: Fourteen patients with pneumonia were treated with modified *Qing Shu Yi Qi Tang* with complete recovery in 12 patients and no benefit in 2 patients. The formula used included fresh *He Ye* (Folium Nelumbinis) 30g, fresh *Xi Gua Cui Pi* (Exocarpium Citrulli) 60g, *Zhu Ye* (Herba Phyllostachys) 12g, *Shi Hu* (Caulis Dendrobii) 12g, *Mai Dong* (Radix Ophiopogonis) 12g, *Zhi Mu* (Rhizoma Anemarrhenae) 12g, *Jin Yin Hua* (Flos Lonicerae Japonicae) 18g, *Lian Qiao* (Fructus Forsythiae) 18g, *Huang Qin* (Radix Scutellariae) 15g, *Lu Gen* (Rhizoma Phragmitis) 15g, *Pi Pa Ye* (Folium Eriobotryae) 24g, *Ren Shen* (Radix et Rhizoma Ginseng) 9-12g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, and the addition of others as deemed necessary per condition of the patient. Complete recovery was defined as reduction of body temperature to normal within 12-72 hours with normal count of white blood cells within 24-72 hours.²

3. Chronic fatigue syndrome: Administration of modified *Qing Shu Yi Qi Tang* was effective in treating chronic fatigue syndrome characterized by Spleen qi deficiency with accumulation of dampness. The treatment protocol was to administer the herbs in decoction three times daily, for 7 days per course of treatment, for 2 courses total. The study reported 80% effectiveness.³

<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	9 pieces [1.5g]

The source text states to grind the herbs into powder, and cook it in 2 large bowls of water until it is reduced to 1 bowl. Take the warm, strained decoction on an empty stomach. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

This formula has the identical name as the previous formula, but they are derived from different sources and have slightly different compositions and applications. Therefore, it is very important that the two are not confused or used interchangeably. A comparative analysis of these two formulas is provided in the Authors' Comments section.

This formula clears summer-heat, dries dampness, benefits qi, and strengthens the Spleen. Clinically, it is often used for patients with exterior summer-heat and underlying chronic qi deficiency. Patients may show symptoms such as a warm sensation throughout the body, headache, thirst, spontaneous perspiration, lethargy, lack of appetite, chest fullness, heaviness of the body, loose stools, dysuria, a greasy tongue coating, and a deficient pulse.

This formula has been used to treat chronic nonspecific colitis. According to one study, use of herbs was associated with good results in treating five patients with chronic nonspecific ulcerative colitis and seven with chronic nonspecific non-ulcerative colitis. The herbal formula was modified slightly, and contained the following ingredients: *Huang Qi* (Radix Astragali) 15g, *Dang Shen* (Radix Codonopsis) 15g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 8g, *Cang Zhu* (Rhizoma Atractylodis) 8g, *Dang Gui* (Radix Angelicae Sinensis) 8g, *Huang Bo* (Cortex Phellodendri Chinensis) 8g, *Ze Xie* (Rhizoma Alismatis) 8g, *Qing Pi* (Pericarpium Citri Reticulatae Viride) 5g, *Chen Pi* (Pericarpium Citri Reticulatae) 5g, *Sheng Ma* (Rhizoma Cimicifugae) 5g, *Ge Gen* (Radix Puerariae Lobatae) 24g, *Shen Qu* (Massa Fermentata) 6g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, *Mai Dong* (Radix Ophiopogonis) 10g, and *Wu Wei Zi* (Fructus Schisandrae Chinensis) 3g. Additional modifications were made as deemed necessary. The treatment protocol was to administer the herbs in decoction daily on an empty stomach, for two weeks per course of treatment. Of 12 cases, the study reported complete recovery in 2 cases, significant improvement in 6 cases, moderate improvement in 3 cases, and no benefit in 1 case. The overall rate of effectiveness was 91.67%.⁴

AUTHORS' COMMENTS

The primary and the related formulas have identical names: the former is also known as Wang's *Qing Shu Yi Qi Tang*, and the latter is referred to as Li's *Qing Shu Yi Qi Tang*.

Both formulas have the same name, and have similar compositions and functions to clear summer-heat and augment the qi. Their differences are as follows:

- *Qing Shu Yi Qi Tang* from *Wen Re Jing Wei* (Warp and Woof of Warm-Febrile Diseases) by Wang Meng-Ying, treats summer-heat damaging both qi and body fluids.
- *Qing Shu Yi Qi Tang* from *Pi Wei Lun* (Discussion of the Spleen and Stomach) by Li Gao, treats chronic qi deficiency complicated by exterior summer-heat.

Chapter 6 — Summary

— Summer-Heat-Dispelling Formulas

Name	Similarities	Differences
Qing Luo Yin (Clear the Collaterals Decoction)	Dispels summer-heat, clears interior heat	Treats mild summer-heat syndromes
Xiang Ru San (Mosla Powder)	Dispel summer-heat, release the exterior	Treats summer-heat syndromes with cold and dampness
Xin Jia Xiang Ru Yin (Newly-Augmented Mosla Decoction)		Treats summer-heat syndromes with cold, dampness, and heat
Liu Yi San (Six-to-One Powder)	Dispel summer-heat, drain dampness	Mild in potency
Gui Ling Gan Lu Yin (Cinnamon and Poria Sweet Dew Decoction)		Moderate to strong in potency
Qing Shu Yi Qi Tang (Clear Summer-Heat and Augment the Qi Decoction)	Dispels summer-heat, tonifies qi, yin and body fluids	Treats summer-heat syndromes involving both excess and deficiency

Qing Luo Yin (Clear the Collaterals Decoction) relieves summer-heat and clears interior heat. The herbs in this formula are of light quality and are able to penetrate and clear interior heat. It is most suitable for treating mild summer-heat syndromes in which only the Lung is affected.

Xiang Ru San (Mosla Powder) and **Xin Jia Xiang Ru Yin** (Newly-Augmented Mosla Decoction) both relieve summer-heat and dispel exterior factors.

- **Xiang Ru San** is a warmer formula and is better for initial summer-heat syndromes with wind-cold and dampness.
- **Xin Jia Xiang Ru Yin** is a colder formula, and has a stronger effect to treat initial summer-heat syndromes with cold and dampness, but with indications of more heat.

Liu Yi San (Six-to-One Powder) and **Gui Ling Gan Lu Yin** (Cinnamon and Poria Sweet Dew Decoction) both relieve summer-heat and dispel dampness. Both treat summer-heat syndromes accompanied by dampness.

- **Liu Yi San** has mild potency and is considered a base formula for many other summer-heat-dispelling formulas.
- **Gui Ling Gan Lu Yin** is stronger and is more suitable for treating more serious cases.

Qing Shu Yi Qi Tang (Clear Summer-Heat and Augment the Qi Decoction) treats summer-heat syndromes with extensive damage to qi and body fluids.

Chapter 7

— Interior-Warming Formulas

王叔和 Wāng Shū-Hē

王叔和 Wāng Shū-Hē, third century.¹

王叔和 Wāng Shū-Hē

Wang Shu-He is best known for preserving 伤寒杂病论 *Shang Han Za Bing Lun* (Discussion of Cold-Induced Disorders and Miscellaneous Diseases) by Zhang Zhong-Jing. Shortly after this text was published, it was lost during war time in the Eastern Han dynasty and the time of the Three Kingdoms. Realizing the tremendous importance of this text, Wang gathered bits and pieces of it wherever he could, re-organized it, and published it in two volumes:

- 伤寒论 *Shang Han Lun* (Discussion of Cold-Induced Disorders) emphasizes external disorders, classifying them according to *Liu Jing Bian Zheng* (Six Stages Differentiation).
- 金匱要略 *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) focuses on internal and miscellaneous disease, classifying them according to *Ba Gang Bian Zheng* (Eight Principle Differentiation).

Without Wang's effort, Zhang Zhong-Jing's work would have been lost altogether, or, at best, incomplete.

Wang also wrote one of the most significant texts on pulse diagnosis, 脉经 *Mai Jing* (Pulse Classics). Though there were many references to pulse and their indications in historical texts before his time, most references were scattered and disorganized. After studying the *Nei Jing* (Inner Classic), the *Nan Jing* (Classic of Difficult Issues), *Shang Han Za Bing Lun* (Discussion of Cold-Induced Disorders and Miscellaneous Diseases) and references from Hua Tuo, Wang published *Mai Jing* (Pulse Classics), the first comprehensive text that systemically stated the proper definitions of pulse-related terminology and techniques for pulse diagnosis. It established the proper positions for pulse assessment and their relationship to the *zang fu* organs. It also clearly defined 24 different pulse qualities and their meanings. Lastly, it emphasized the importance of correlating the pulse to the age, sex, height, weight, and disease pattern of the patient.

Wang Shu-He taking a patient's pulse.

Pulse positions and definitions from 脉经 *Mai Jing* (Pulse Classics), third century.²

Interior-Warming Formulas (Summary)	504

Chapter 7 — Overview

— Interior-Warming Formulas

Definition: Interior-warming formulas warm the interior, raise the yang, disperse cold, and dredge the channels and collaterals. This method of treatment is known as *wen fa* (warming), one of the *ba fa* (eight treatment methods) described in the *Huang Di Nei Jing* (Yellow Emperor's Inner Classic) in the first or second century, A.D.

Interior-warming formulas mainly treat interior cold syndromes affecting *zang fu* organs or various channels and collaterals. General signs and symptoms of interior cold include aversion to cold, preference for warmth, a bland taste in the mouth, the absence of thirst, and clear urine. There are many causes of interior cold syndromes, all of which can be summarized as either internally generated, externally contracted, or both. When an individual has constitutional yang deficiency, cold may be generated internally. If an individual is exposed to a cold factor, it may enter the interior and directly attack the *zang fu* organs. Additionally, cold syndromes may occur secondarily to inappropriate treatment. For example, excessive or prolonged use of cold formulas may lead to yang qi damage and the formation of interior cold. Incorrect (or lack of) treatment of exterior cold causes it to migrate to the interior, and results in accumulation of interior cold. Regardless of the etiological origin, interior cold must be treated with hot herbs that warm the interior.

Note: Cold, one of the *liu yin* (six exogenous factors), can attack either the exterior or interior of the body. The presence of cold at the exterior (such as wind-cold) is treated with exterior-releasing herbs, which is discussed in Chapter 1: Exterior-Releasing Formulas. The presence of cold in the interior (interior cold) is treated with interior-warming formulas, as discussed in this chapter.

SUBCATEGORIES OF ACTION

Because interior cold syndromes manifest with different severities and in different locations, interior warming formulas are differentiated into three sub-categories:

1. Middle-Warming and Cold-Dispelling Formulas

These formulas are designed to treat deficiency cold syndromes affecting the middle *jiao*. The Spleen and Stomach reside in the middle *jiao* and belong to the Earth element. Together, they are responsible for the transformation and transportation of food, sending clear *gu* (food) *qi* to the upper *jiao* and turbid food particles to the lower *jiao*. If the yang qi of the middle *jiao* is weakened as a result of cold, the functioning of the Spleen and Stomach will be impaired. Main clinical manifestations include epigastric and abdominal fullness and pain, relief of pain with pressure and warmth, lethargy, fatigue, vomiting of saliva, coldness of the extremities, acid regurgitation, nausea, vomiting, diarrhea, loss of appetite, no thirst, and a bland taste in the mouth. The tongue coating is usually white and slippery. The pulse is either deep and fine or deep and slow.

Commonly used herbs in the middle-warming and cold-dispelling formulas are *Gan Jiang* (Rhizoma Zingiberis), *Wu Zhu Yu* (Fructus Evodiae), and *Hua Jiao* (Pericarpium Zanthoxyli). In addition, herbs that tonify qi and strengthen the Spleen are usually added to increase the effectiveness of the formulas, such as *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Yi Tang* (Maltosum). Exemplar formulas include *Li Zhong Wan* (Regulate the

from the exterior,
or both.

Chapter 7 — Overview

Middle Pill), *Wu Zhu Yu Tang* (Evodia Decoction), *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction), and *Da Jian Zhong Tang* (Major Construct the Middle Decoction).

2. Yang-Resuscitating Formulas

Interior-warming formulas restore normal organ functioning in gastrointestinal and cardiovascular disorders.

These formulas recuperate depleted Heart and Kidney yang and rescue patients from collapse. They are used to treat exhausted yang qi with cold affecting both the interior and the exterior. Because the preponderance of yin consumes yang, the following symptoms appear: extremely cold limbs, aversion to cold, desire to curl up the body when lying down, vomiting, abdominal pain, diarrhea with undigested foods, extreme fatigue, and, in severe cases, profuse perspiration of cold sweats. The pulse will be either deep and fine, or deep and faint.

In order to rescue yang from depletion, large doses of hot and acrid herbs must be used. Frequently used herbs in this category include *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Gan Jiang* (Rhizoma Zingiberis), and *Rou Gui* (Cortex Cinnamomi). Representative formulas that resuscitate yang include *Si Ni Tang* (Frigid Extremities Decoction) and *Hui Yang Jiu Ji Tang* (Restore and Revive the Yang Decoction).

In extreme cases, the depletion of yang and abundance of cold in the interior will block the circulation of yang qi to the interior and redirect it to the exterior, giving rise to the condition of “true cold” (in the interior) and “false heat” (at the exterior). In addition to the signs and symptoms listed above, clinical manifestations of “false heat” may include warm body sensations, dry heaves, irritability, restlessness, and pale, red cheeks. These patients may reject the warm decoction or interior-warming herbs by vomiting. In such cases, administer the decoction at room temperature, or add a small amount of cold herbs to the interior-warming formulas; these modifications usually help the patient to better tolerate the decoction. One representative formula that treats “true cold” and “false heat” is *Bai Tong Tang* (White Penetrating Decoction), with the addition of bile from *Zhu Dan* (Fel Porcus).

3. Channel-Warming and Cold-Dispersing Formulas

These formulas treat exterior cold that is blocking and damaging the channels and collaterals in individuals with underlying deficiencies of yang qi, yin and blood. Common signs and symptoms include extremely cold hands and feet, numbness and pain of the extremities, reduced mobility of the joints, and formation of yin (deep-rooted) sores.

Using only acrid and hot herbs will not effectively treat such conditions. Instead, it is more appropriate to combine them with herbs that dispel cold, tonify the blood, and warm and unblock the channels and collaterals. Herbs commonly used include *Gui Zhi* (Ramulus Cinnamomi), *Xi Xin* (Radix et Rhizoma Asari), *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Huang Qi* (Radix Astragali), and *Shu Di Huang* (Radix Rehmanniae Praeparata). Exemplar formulas include *Dang Gui Si Ni Tang* (Tangkuei Decoction for Frigid Extremities), *Huang Qi Gui Zhi Wu Wu Tang* (Astragalus and Cinnamon Twig Five-Substance Decoction), and *Yang He Tang* (Yang-Heartening Decoction).

Interior cold syndromes manifest with differing severities and locations.

CAUTIONS / CONTRAINDICATIONS

- Interior-warming formulas are designed to disperse cold in the interior. If the cold is located at the exterior level, then exterior-releasing formulas should be used.
- It is extremely important to correctly diagnose the presence of cold in the body. Severe consequences can result if interior-warming formulas are used to treat excess heat syndromes.
- Because interior warming formulas consist of acrid and warm herbs, they must be used carefully if the patient has yin deficiency or bleeding syndromes. Inappropriate use of interior warming herbs may easily create heat in the interior, further damaging yin and blood.
- Because a cold factor can easily damage yang and qi, it may be necessary to include yang- and qi-tonifying herbs in interior-warming formulas.

Chapter 7 — Overview

- External factors should also be considered when prescribing interior-warming formulas. These formulas must be used with more caution during the summer, or in hot climates, and they must be discontinued immediately when the desired effects are achieved. On the other hand, they can be used at slightly larger dosages or for longer periods of time during the winter, or in cold climates.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Interior-warming formulas are divided into three subcategories based on their traditional therapeutic actions. These subcategories also have contrasting pharmacological effects and clinical applications.

Severe consequences can result if interior-warming formulas are used to treat excess heat syndromes.

1. **Middle-warming and cold-dispelling formulas** treat deficiency and cold of the middle *jiao* (Spleen and Stomach). From the perspective of allopathic medicine, these formulas are most effective in treating disorders of the gastrointestinal tract.
 - **Gastrointestinal disorders:** These formulas treat a wide variety of gastrointestinal disorders, including but not limited to nausea,¹ vomiting,² anorexia,³ diarrhea,⁴ dysentery,⁵ constipation,⁶ peptic ulcer,^{7,8,9} gastritis (atrophic gastritis, superficial gastritis, gastritis with ulcer),¹⁰ enteritis,¹¹ ulcerative colitis,^{12,13} irritable bowel syndrome,¹⁴ obstructive bowel disease,¹⁵ intestinal obstruction,¹⁶ and post-operative ileus.¹⁷ The mechanisms of action have been attributed in part to the antiulcer effects of these formulas to inhibit the production of gastric acid,¹⁸ their analgesic effects to relieve pain,¹⁹ and their antiemetic effects to relieve nausea and vomiting.²⁰ Specific pharmacological effects vary depending on the formula and the disease. Representative formulas include *Li Zhong Wan* (Regulate the Middle Pill), *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle), *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction), and *Da Jian Zhong Tang* (Major Construct the Middle Decoction).
 - **Others:** These formulas have also been used to treat other conditions that are associated with gastrointestinal disorders, such as stomatitis,²¹ profuse salivation,²² epigastric pain,²³ abdominal pain,^{24,25} and a feeling of coldness in the abdomen.²⁶
2. **Yang-resuscitating formulas** are used primarily to restore normal cardiovascular functions in patients who suffer acute heart attack.
 - **Acute cardiac infarction:** *Si Ni Tang* (Frigid Extremities Decoction) has a marked effect on the cardiovascular system to increase the contractile force of the heart, increase blood pressure, and restore normal heart rhythm.²⁷ Clinically, it has been used to treat patients with acute cardiac infarction, with good success.²⁸
3. **Channel-warming and cold-dispersing formulas** treat exterior cold that is blocking and damaging the channels and collaterals. From the perspective of allopathic medicine, these formulas are most effective in treating pain.
 - **Pain:** These formulas are commonly used to treat many types and presentations of pain, such as headaches,²⁹ cancer pain,³⁰ sciatica,³¹ frostbite,^{32,33} peripheral neuritis,^{34,35} diabetic neuropathy,³⁶ peri arthritis of shoulder,^{37,38} frozen shoulder,³⁹ neck and shoulder stiffness and pain,⁴⁰ and general aches and pains.⁴¹ Exemplar formulas include *Dang Gui Si Ni Tang* (Tangkuei Decoction for Frigid Extremities) and *Huang Qi Gui Zhi Wu Wu Tang* (Astragalus and Cinnamon Twig Five-Substance Decoction).

Section 1

温中祛寒剂

— Middle-Warming and Cold-Dispelling Formulas

Lǐ Zhōng Wán (Regulate the Middle Pill)

理中丸

Pinyin Name: *Li Zhong Wan*

Literal Name: Regulate the Middle Pill

Alternate Name: Ginseng and Ginger Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Gan Jiang</i> (Rhizoma Zingiberis)	9g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	9g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	9g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	9g

DOSAGE / PREPARATION / ADMINISTRATION

The source text recommends to grind the ingredients into powder and form into pills with honey. The pills should resemble egg yolk in size. Take 1 pill with warm water three times during the day and twice at night. If ingestion of the pills does not create a feeling of warmth in the abdomen, then this formula may also be given as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Warms the middle *jiao* and dispels cold
2. Tonifies qi and strengthens the Spleen and Stomach

CLINICAL MANIFESTATIONS

1. Deficiency and cold of the middle *jiao*: absence of thirst, vomiting, diarrhea, abdominal pain, lack of appetite, and *huo luan* (sudden turmoil disorder).
2. Bleeding due to yang deficiency: epistaxis, hematochezia, shortness of breath, lassitude, and a fine pulse or a deficient, big pulse with little force.
3. Others: chronic infantile convulsions; and recovery from illness with drooling of saliva or excessive production of foamy saliva.

CLINICAL APPLICATIONS

Acute or chronic gastritis, gastric or duodenal ulcers, epigastric pain, gastroptosis, stomatitis, irritable bowel syndrome, gastroenteritis, enteritis, bacterial dysentery,

colitis, uterine bleeding, nephropathy, male infertility, and excessive salivation.

EXPLANATION

Li Zhong Wan (Regulate the Middle Pill) treats deficiency and cold of the middle *jiao*, where the Spleen and Stomach are located. The Spleen, responsible for transportation and transformation, raises the clear yang. The Stomach, responsible for accepting and digesting food, lowers the turbid yin. If the middle *jiao* is deficient as a result of coldness, the ascending and descending functions of the Spleen and Stomach may be impaired, causing diarrhea and vomiting. Abdominal pain is due to the presence of coldness. Lack of appetite is the result of deficiency of the middle *jiao* and impaired digestive functioning.

To treat this syndrome, use herbs to warm the middle *jiao*, dispel coldness, tonify Spleen qi, and invigorate the digestive function. *Gan Jiang* (Rhizoma Zingiberis), the chief herb, warms the middle *jiao* and dispels interior cold. *Ren Shen* (Radix et Rhizoma Ginseng) nourishes *yuan* (source) qi. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen and dries dampness. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) nourishes qi and harmonizes the middle *jiao*.

Li Zhong Wan can also be used to treat blood loss due to Spleen yang deficiency; a deficient Spleen fails to keep

Diagnosis	Signs and Symptoms	Treatment	Herbs
Deficiency and cold of the middle <i>jiao</i>	<ul style="list-style-type: none">• Diarrhea and vomiting: deficiency and cold of the middle <i>jiao</i> impairing the normal ascending and descending functions of the Spleen and Stomach• Abdominal pain: cold in the middle <i>jiao</i>	<ul style="list-style-type: none">• Warms the middle <i>jiao</i> and dispels cold• Tonifies qi and strengthens the Spleen	<ul style="list-style-type: none">• <i>Gan Jiang</i> (Rhizoma Zingiberis) warms the middle <i>jiao</i> and dispels interior cold.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) nourishes <i>yuan</i> (source) <i>qi</i>.• <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen and dries dampness.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) nourishes qi and harmonizes the middle <i>jiao</i>.

blood circulating within the vessels. Clinical manifestations include epistaxis, hematochezia, shortness of breath, lassitude, a pale face, and a fine pulse or a deficient, big pulse with little force. This syndrome of bleeding due to yang deficiency can be treated with *Li Zhong Wan*, with the addition of several other herbs such as *Huang Qi* (Radix Astragali), *Dang Gui* (Radix Angelicae Sinensis), and *E Jiao* (Colla Corii Asini); and the replacement of *Gan Jiang* (Rhizoma Zingiberis) with *Pao Jiang* (Rhizoma Zingiberis Praeparatum).

Li Zhong Wan may be used to treat chronic infantile convulsions if there are symptoms of yang deficiency of the middle *jiao*. Chronic infantile convulsions can be caused by congenital defects, malnutrition, excessive intake of cold food during the time of illness, or weakness after a major illness.

Drooling of saliva or excessive production of foamy saliva following recovery from illness occurs when Spleen qi deficiency with cold fails to metabolize water. Body fluids thus flow upwards in the form of profuse saliva. *Li Zhong Wan* can be taken at a low dose for a prolonged period of time.

MODIFICATIONS

- If there is severe abdominal pain due to deficiency and cold, add *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Rou Gui* (Cortex Cinnamomi).
- With abdominal fullness and decreased intake of food, add *Shen Qu* (Massa Fermentata) and *Hou Po* (Cortex Magnoliae Officinalis).
- With abdominal pain, diarrhea, acid regurgitation, and a red tongue body with a white coating, add *Huang Lian* (Rhizoma Coptidis).
- With fullness and distention in the middle *jiao*, add *Wu Zhu Yu* (Fructus Evodiae), *Ding Xiang* (Flos Caryophylli), and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).

- With nausea and vomiting due to cold in the Stomach, add *Ding Xiang* (Flos Caryophylli) and *Shi Di* (Calyx Kaki).
- With vomiting due to phlegm accumulation, add *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria).
- If there is severe vomiting, remove *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and add *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Wu Zhu Yu* (Fructus Evodiae).
- With qi stagnation, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Fu Ling* (Poria).
- With deficiency, cold, and qi stagnation, add *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Chen Pi* (Pericarpium Citri Reticulatae).
- With frequent diarrhea, add *Rou Dou Kou* (Semen Myristicae) and *He Zi* (Fructus Chebulae).
- With severe edema, add *Fu Ling* (Poria), *Ze Xie* (Rhizoma Alismatis), and *Dong Gua Pi* (Exocarpium Benincasae).
- If there is bleeding due to yang deficiency, add *E Jiao* (Colla Corii Asini), *San Qi* (Radix et Rhizoma Notoginseng), and charred *Ce Bai Ye* (Cacumen Platycladi).

CAUTIONS / CONTRAINDICATIONS

- *Li Zhong Wan* is contraindicated in patients of exterior wind invasion with fever.
- This formula contains many herbs that are warm and drying, and therefore is contraindicated in conditions characterized by interior heat with yin deficiency.
- This formula must be used with caution during pregnancy, as it contains many herbs that are warm and hot in nature.¹

PHARMACOLOGICAL EFFECTS

1. **Antilulcer:** *Li Zhong Wan* has been shown to be beneficial in facilitating the healing of stomach ulcers. In one experiment, rats with artificially-induced ulcer were divided into herb and placebo groups. After 10 days of treatment, the herb group had only 3.57 mm² of ulceration, while the placebo group had 11.72 mm² of ulceration.²

Lǐ Zhōng Wán (Regulate the Middle Pill)

2. **Adrenocortical:** The preliminary data showed that administration of *Li Zhong Wan* was associated with a regulating effect on the adrenal glands.³
3. **Effect on kidney function:** Administration of *Li Zhong Wan* was associated with a protective effect on kidney functions. In one study, continuous use of the formula for 1-3 months was effective in gradually reducing the amount of protein, cells, and blood urea nitrogen (BUN) in the urine.⁴

CLINICAL STUDIES AND RESEARCH

1. **Epigastric pain:** Use of modified *Li Zhong Wan* was associated with marked results in treating 30 patients with epigastric pain characterized by deficiency and cold. The herbal treatment contained this formula plus *Huang Qi* (Radix Astragali), *Fu Ling* (Poria), *Chen Pi* (Pericarpium Citri Reticulatae), and *Cao Dou Kou* (Semen Alpiniae Katsumadai). Additional modifications were made as follows: double the dose of *Huang Qi* (Radix Astragali) for qi deficiency; *Rou Gui* (Cortex Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) for presence of cold; *Cang Zhu* (Rhizoma Atractylodis) and *Bai Bian Dou* (Semen Lablab Album) for dampness; *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Yan Hu Suo* (Rhizoma Corydalis), and *Chuan Lian Zi* (Fructus Toosendan) for stagnation; and *Bei Sha Shen* (Radix Glehniae), *Bai Shao* (Radix Paeoniae Alba), and *Shan Yao* (Rhizoma Dioscoreae) for yin deficiency. Of 30 patients, the study reported complete recovery in 5 patients within one month, and complete recovery in 20 patients and improvement in 5 patients within three months.⁵
2. **Gastritis:** Thirty patients with various types of gastritis (atrophic gastritis, superficial gastritis, gastritis with ulcer) were treated with *Li Zhong Wan*. The study reported complete relief of pain in 25 patients and partial relief of pain in 5 patients. Seventeen showed improvement based on endoscopy, and 13 showed no significant changes.⁶
3. **Bacterial dysentery:** Eighteen patients with chronic bacterial dysentery were treated with modification of *Li Zhong Wan* with complete recovery in 16 and improvement in 2 patients. The average duration of treatment was 12 days. The modification included addition of *Huang Lian* (Rhizoma Coptidis) and *Fu Ling* (Poria).⁷
4. **Enteritis:** Thirty patients with acute or chronic enteritis with diarrhea were treated with *Li Zhong Wan* for 3-10 days with significant improvement in 18 patients, moderate improvement in 8 patients, and no effect in 4 patients. The study reported an overall effectiveness rate of 86.6%.⁸
5. **Renal insufficiency:** Herbs were used to treat 15 patients (6 males and 9 females) with compromised kidney function, which included 12 patients of glomerulonephritis, polycystic kidney, kidney tuberculosis, and diabetic nephropathy. The herbal treatment included in extract 1.7 grams of *Li Zhong Wan* and 2.5 grams *Da Huang Gan Cao Tang* (Rhubarb and Licorice Decoction), given three times daily 30 minutes before meals for 3 months. The study reported an effectiveness rate of 66.7% after the first month, which was subsequently dropped to 40%. No significant side effects were reported.⁹ Note: *Da Huang Gan Cao Tang* (Rhubarb and Licorice Decoction) is not a commonly used formula, and is not discussed in detail in this text. The original source of this formula is *Shang Han Lun* (Discussion of Cold-Induced Disorders), with the following composition: *Da Huang* (Radix et Rhizoma Rhei) 12g and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g.
6. **Male infertility:** In one study, *Li Zhong Wan* and *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia) were combined together to treat 10 patients with male infertility. The study reported an increased production of seminal fluid (from 2.73 mL to 3.28 mL), in sperm count (from 1170/mL to 2185/mL), and in sperm motility (from 29.0% to 35.5%).¹⁰
7. **Excessive salivation:** Forty-two children (38 males and 4 females) with excessive salivation (20 days to 3 years history of illness) due to Spleen yang deficiency were treated with satisfactory results using modified *Li Zhong Wan*. The average age was 5.8 years (ranges from 3-9 years), and the average length of treatment was 4.6 packs of herbs in decoction. The herbs included *Dang Shen* (Radix Codonopsis) 10-18g, *Yi Zhi* (Fructus Alpiniae Oxyphyllae) 5-10g, *Gan Jiang* (Rhizoma Zingiberis) 5-8g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 4-6g, and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 8-10g. Modifications were made by adding *Sha Ren* (Fructus Amomi) 4-6g and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) 5-8g for poor appetite and loose stools accompanied by long-term excessive salivation; and the addition of *Wu Mei* (Fructus Mume) 10-18g, *Shi Jun Zi* (Fructus Quisqualis) 7-10g, and *Hua Jiao* (Pericarpium Zanthoxyli) 4-6g, and removal of *Gan Cao* (Radix et Rhizoma Glycyrrhizae), for intestinal parasites with abdominal pain. After the treatment, 40 out of 42 patients showed complete recovery without any recurrence within 3 months.¹¹
8. **Stomatitis:** One study reported effectiveness using modified *Li Zhong Wan* to treat recurrent stomatitis in 106 patients (47 males and 59 females, between 1-72 years of age, with 3 months to 24 years history of illness). In addition to this formula, modifications were made as follows: replacing *Ren Shen* (Radix et Rhizoma Ginseng) with *Dang Shen* (Radix Codonopsis) for severe Spleen deficiency; addition of *Rou Gui* (Cortex Cinnamomi) for cold; and addition of *Huang Lian* (Rhizoma Coptidis) for heat. The study reported complete recovery in all 106 patients after 2-17 days of treatment.¹²

RELATED FORMULAS

Rén Shēn Tāng (Ginseng Decoction)

人參湯
人參湯

Pinyin Name: *Ren Shen Tang*

Literal Name: Ginseng Decoction

Alternate Name: *Li Zhong Tang* (Regulate the Middle Decoction)

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	9g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	9g
<i>Gan Jiang</i> (Rhizoma Zingiberis)	9g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	9g

The source text states to cook the ingredients in 8 cups [1,600 mL] of water and reduce it to 3 cups [600 mL]. Take 1 cup [200 mL] of the warm, strained decoction three times daily. The source text also recommends taking 1 cup of hot porridge and keeping the body covered with a blanket to induce a feeling of warmth.

Li Zhong Wan and *Ren Shen Tang* (Ginseng Decoction) have essentially the same ingredients at the same dosages.

- *Li Zhong Wan* is administered in pill form, which is absorbed slowly over a longer period of time to warm the middle *jiao*, dispel cold, and tonify Spleen and Stomach qi.
- *Ren Shen Tang* (Ginseng Decoction) is administered in decoction form, which is absorbed immediately to provide a faster onset of action. This formula is primarily used to treat a more urgent condition, such as *xiong bi* (painful obstruction of the chest) with symptoms such as cold extremities, fatigue, low energy, and feeble voice.

(Regulate the Middle and Transform Phlegm Pill)

理中化痰丸

Pinyin Name: *Li Zhong Hua Tan Wan*

Literal Name: Regulate the Middle and Transform Phlegm Pill

Original Source: *Ming Yi Za Zhu* (Miscellaneous Books of Ming Medicine) by Wang Lun in 1549 A.D.

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), chao (dry-fried)	
<i>Gan Jiang</i> (Rhizoma Zingiberis)	
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	

Fu Ling (Poria)

Ban Xia (Rhizoma Pinelliae), zhu (boiled) with ginger

The source text states to grind the ingredients into a fine powder and form into small pills with water. Take 40-50 pills with warm, boiled water. Note: Herb doses are unavailable from the source text.

Li Zhong Hua Tan Wan (Regulate the Middle and Transform Phlegm Pill) is composed of *Li Zhong Wan* plus *Fu Ling* (Poria) and *Ban Xia* (Rhizoma Pinelliae), which are used in this formula to enhance the action of tonifying Spleen qi and dissolving phlegm. Clinically, the patient may show deficiency and cold of the Spleen and Stomach with stagnation of phlegm. The symptoms include nausea, vomiting, lack of appetite, loose stools, poor digestion, coughing with sputum, and drooling of saliva.

In comparison to *Li Zhong Wan*, *Li Zhong Hua Tan Wan* (Regulate the Middle and Transform Phlegm Pill) has a stronger action to dry dampness, strengthen the Spleen, and relieve nausea. Therefore, it is often used for patients who have deficiency and cold of the Spleen and Stomach, complicated by coughing with sputum and drooling of saliva.

AUTHORS' COMMENTS

Li Zhong Wan is one of the main formulas for treating deficiency and cold of the Spleen and Stomach. This formula was originally designed to be given as pills, which usually have a slower onset of action. When necessary in acute or severe cases, this formula may first be given in decoction form, and then followed by pills when the condition stabilizes.

Li Zhong Wan and *Si Jun Zi Tang* (Four-Gentlemen Decoction) both treat Spleen qi deficiency with poor appetite, diarrhea, and other signs and symptoms. Both formulas contain qi-tonifying herbs such as *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle). Despite these similarities, the differences are as follows:

- *Li Zhong Wan* is for deficiency with cold of the middle *jiao* (Spleen and Stomach), characterized by abdominal pain, vomiting, diarrhea, polyuria, cold limbs, intolerance to cold, and a deep, fine pulse.
- *Si Jun Zi Tang* is for Spleen qi deficiency, characterized by a sallow complexion, poor appetite, decreased dietary intake, fatigue, a pale tongue body, and a fine, moderate pulse.¹³

Fù Zǐ Lǐ Zhōng Wán (Prepared Aconite Pill to Regulate the Middle) 附子理中丸

Pinyin Name: *Fu Zi Li Zhong Wan*

Literal Name: Prepared Aconite Pill to Regulate the Middle

Alternate Names: *Fu Tzu Li Chung Tang (Wan)*, *Fu Zi Li Zhong Tang (Wan)*, Aconite, Ginseng and Ginger Decoction (Pill); Aconite Middle-Regulating Decoction (Pill); Aconite Ginseng and Ginger Combination

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata), <i>pao</i> (blast-fried)	90g [9g]
<i>Gan Jiang</i> (Rhizoma Zingiberis), <i>pao</i> (blast-fried)	90g [9g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	90g [9g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>cuo</i> (grated)	90g [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	90g [9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder and form into pills with honey. Each pill should weigh 3 grams. Place and disintegrate 1 pill in one bowl of water, then cook it until 70% of the liquid remains. Take the warm decoction before meals on an empty stomach. For children, divide the decoction into two to three separate doses. This formula may also be prepared as a decoction with the doses suggested in brackets.

abdominal fullness and pain, nausea, vomiting, diarrhea, and sudden turmoil disorder with muscle spasms.

CHINESE THERAPEUTIC ACTIONS

1. Warms yang and dispels cold
2. Tonifies qi and strengthens the Spleen

CLINICAL MANIFESTATIONS

Deficiency and cold of the Spleen and Stomach: extreme coldness of the body and the extremities, mild perspiration, indigestion, borborygmus, severe epigastric and

CLINICAL APPLICATIONS

Gastroenteritis, gastritis, peptic ulcer disease, gastroatonia, prolapse of the stomach, ulcerative colitis, and infantile diarrhea.

EXPLANATION

Fu Zi Li Zhong Wan (Prepared Aconite Pill to Regulate the Middle) combines *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Li Zhong Wan* (Regulate the Middle Pill). It warms yang, dispels cold, benefits qi, and strengthens the Spleen. It is used for deficiency and cold secondary to yang deficiency of the Spleen and Stomach. Clinically, patients may show vomiting, diarrhea, muscle spasms, muscle stiffness in the extremities, and a white tongue coating.

Fù Zǐ Lǐ Zhōng Wán (Prepared Aconite Pill to Regulate the Middle)

Fu Zi Li Zhong Wan (Prepared Aconite Pill to Regulate the Middle)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Deficiency and cold of the Spleen and Stomach	<ul style="list-style-type: none">• Diarrhea and vomiting; deficiency and cold of the Spleen and Stomach affecting the normal ascending and descending functions• Abdominal pain and cold body and extremities: cold in the middle <i>jiao</i> affecting the body and extremities	<ul style="list-style-type: none">• Warms yang and dispels cold• Tonifies qi and strengthens the Spleen	<ul style="list-style-type: none">• <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) dispels cold, tonifies yang and warms the entire body.• <i>Li Zhong Wan</i> (Regulate the Middle Pill) warms the middle <i>jiao</i>, tonifies qi and strengthens the Spleen and Stomach.

In comparison to *Li Zhong Wan* (Regulate the Middle Pill), *Fu Zi Li Zhong Wan* more strongly warms yang and dispels cold. In this formula, *Fu Zi* (Radix Aconiti Lateralis Praeparata) dispels cold, tonifies yang, and warms the entire body. *Gan Jiang* (Rhizoma Zingiberis) warms the middle *jiao* and dispels interior cold. *Ren Shen* (Radix et Rhizoma Ginseng) nourishes *yuan* (source) *qi*. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen and dries dampness. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) nourishes *qi* and harmonizes the middle *jiao*.

MODIFICATIONS

- With severe deficiency and cold, add *Rou Gui* (Cortex Cinnamomi) and *Cang Zhu* (Rhizoma Atractylodis).
- With nausea and vomiting of phlegm and saliva, add *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria).
- With tetanus-like vomiting and diarrhea, add *Huang Lian* (Rhizoma Coptidis) and *Zhi Shi* (Fructus Aurantii Immaturus).
- With stagnation of phlegm and food, add *Wei Ling Tang* (Calm the Stomach and Poria Decoction).

CAUTIONS / CONTRAINDICATIONS

- *Fu Zi Li Zhong Wan* should be used with extreme caution in patients who have yin deficiency because the hot and dry herbs can further damage yin.
- This formula is contraindicated during pregnancy.¹

PHARMACOLOGICAL EFFECTS

Analgesic: In one study, injection of *Fu Zi Li Zhong Wan* was associated with analgesic effects in mice.²

CLINICAL STUDIES AND RESEARCH

1. **Peptic ulcer disease:** One study reported 91.5% effectiveness in the treatment of peptic ulcer characterized by deficiency and cold using *Fu Zi Li Zhong Wan*, *Huang Qi Jian Zhong Tang* (Astragalus Decoction to Construct the Middle), and others herbs as needed. Other herbs added included *Chai Hu* (Radix Bupleuri) and *Xiang Fu* (Rhizoma Cyperi) for a feeling of fullness and oppression

in the chest and hypochondrium; *Yan Hu Suo* (Rhizoma Corydalis) and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) for pain at a fixed location and purple tongue; *Chen Pi* (Pericarpium Citri Reticulatae) and *Fu Ling* (Poria) for fullness and distention of the epigastrium and a thick, greasy tongue coating; *Zhe Shi* (Haematitum) and *Xuan Fu Hua* (Flos Inulae) for nausea and vomiting; *Shen Qu* (Massa Fermentata), *Shan Zha* (Fructus Crataegi), *Gu Ya* (Fructus Setariae Germinatus) and *Mai Ya* (Fructus Hordei Germinatus) for poor appetite and indigestion. Of 59 patients, the study reported complete recovery in 37 patients, improvement in 17 patients, and no effect in 5 patients.³

2. **Ulcerative colitis:** Administration of modified *Fu Zi Li Zhong Wan* was effective in treating 78 patients with ulcerative colitis with a history of illness of 1-10 years. The herbal formula contained 12g each of *Fu Zi* (Radix Aconiti Lateralis Praeparata) (pre-decocted), *Gan Jiang* (Rhizoma Zingiberis), *Ren Shen* (Radix et Rhizoma Ginseng), *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and 8g each of *Chai Hu* (Radix Bupleuri) and *Sheng Ma* (Rhizoma Cimicifugae), and 20g of *He Zi* (Fructus Chebulae). For individuals with fever, abdominal pain, a yellow, greasy tongue coating and a slippery, rapid pulse, 30g of *Bai Tou Weng* (Radix Pulsatillae) and 10g of *Huang Bo* (Cortex Phellodendri Chinensis) were added, and *Gan Jiang* (Rhizoma Zingiberis) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) were removed; for patients with poor appetite and abdominal distention, 20g each of charred *Shan Zha* (Fructus Crataegi), charred *Shen Qu* (Massa Fermentata), and charred *Mai Ya* (Fructus Hordei Germinatus) were added; and for severe early morning diarrhea, *Si Shen Wan* (Four-Miracle Pill) was added. The treatment protocol was to cook the herbs in decoction, and take the decoction in two equally-divided doses daily. The duration of treatment was between 7-40 packs of herbs. Of 78 patients, the study reported complete recovery in 34 patients, marked improvement in 35 patients, slight improvement in 7 patients, and no change in 2 patients.⁴

Fù Zǐ Lǐ Zhōng Wán (Prepared Aconite Pill to Regulate the Middle)

3. **Infantile diarrhea:** Thirty-six infants with ages ranging between under six months to three years with diarrhea refractory to drug treatment were treated with modified *Fu Zi Li Zhong Wan* with good results. The herbal formula included *Fu Zi* (Radix Aconiti Lateralis Praeparata) 3g, *Gan Jiang* (Rhizoma Zingiberis) 6g, *Dang Shen* (Radix Codonopsis) 10g, dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 15g, *Fu Ling* (Poria) 15g, *Gui Zhi* (Ramulus Cinnamomi) 10g, *Zhu Ling* (Polyporus) 10g, *Ze Xie* (Rhizoma Alismatis) 6g, *Ying Su Ke* (Pericarpium Papaveris) 3g, *Cang Zhu* (Rhizoma Atractylodis) 6g, and *Chen Pi* (Pericarpium Citri Reticulatae) 6g. Modifications were made by adding 6g each of charred *Shan Zha* (Fructus Crataegi), charred *Shen Qu* (Massa Fermentata), and charred *Mai Ya* (Fructus Hordei Germinatus) for presence of undigested food in the stools; *Ge Gen* (Radix Puerariae Lobatae) 10g for fever; *Zhu Ru* (Caulis Bambusae in Taenia) 6g for nausea and vomiting; and *Mai Dong* (Radix Ophiopogonis) 6g and *Wu Wei Zi* (Fructus Schisandrae Chinensis) 6g for thirst. The treatment protocol was to cook the same herbs in water twice, mix the two batches of decoction together, and administer the decoction in four equally-divided doses. Of 36 patients, 25 had normal bowel movement within two packs of herbs, 9 within three packs, and 1 within four packs. However, one person required hospitalization because of continuous diarrhea and subsequent dehydration.⁵

AUTHORS' COMMENTS

Fu Zi Li Zhong Wan is formulated by combining *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Li Zhong Wan* (Regulate the Middle Pill). The addition of *Fu Zi* (Radix Aconiti Lateralis Praeparata) makes it a stronger formula to tonify both Spleen and Kidney yang. Therefore, *Fu Zi Li Zhong Wan* is reserved for more severe coldness.

Li Zhong Wan (Regulate the Middle Pill) and *Fu Zi Li Zhong Wan* have many similarities and differences:

- *Li Zhong Wan* is an interior-warming formula consisting of *Ren Shen* (Radix et Rhizoma Ginseng), *Gan Jiang* (Rhizoma Zingiberis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle). It warms the middle *jiao*, dispels cold, tonifies qi, and strengthens the Spleen. It is mainly used for digestive dysfunctions caused by deficiency and cold of the middle *jiao*, leading to symptoms of diarrhea, vomiting, abdominal pain, poor appetite, and no desire to drink. Also, it is used for yang deficiency with loss of blood, chronic infantile convulsions, and preference for sleep. It can also treat excessive salivation or *xiong bi* (painful obstruction of the chest) in convalescing patients with middle *jiao* deficiency and coldness.
- *Fu Zi Li Zhong Wan* is much more acrid and hot, as it contains *Fu Zi* (Radix Aconiti Lateralis Praeparata), one of the hottest herbs in the entire pharmacopeia. This formula warms and strengthens Spleen and Kidney yang. It is best for coldness and pain in the chest and abdomen, extreme coldness of the limbs and extremities, and muscle spasms and cramps. *Fu Zi Li Zhong Wan*, in comparison with *Li Zhong Wan*, is for more severe conditions of cold accumulation in the body.⁶

Guì Zhī Rén Shēn Tāng (Cinnamon Twig and Ginseng Decoction)

桂枝人參湯

桂枝人參湯

Pinyin Name: *Gui Zhi Ren Shen Tang*

Literal Name: Cinnamon Twig and Ginseng Decoction

Alternate Name: Cinnamon and Ginseng Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Gui Zhi</i> (Ramulus Cinnamomi)	12g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	9g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	9g
<i>Gan Jiang</i> (Rhizoma Zingiberis)	9g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	12g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook the ingredients, except *Gui Zhi* (Ramulus Cinnamomi), in 9 cups [1,800 mL] of water until 5 cups [1,000 mL] of liquid remain. Add *Gui Zhi* (Ramulus Cinnamomi) and cook until the liquid is reduced to 3 cups [600 mL]. Take 1 cup [200 mL] of the warm, strained decoction two times during the day and one time at night.

CHINESE THERAPEUTIC ACTIONS

1. Warms the interior and releases the exterior
2. Tonifies qi and relieves distention

CLINICAL MANIFESTATIONS

Exterior wind-cold and interior deficiency and cold: fever, aversion to cold, perspiration, constant diarrhea, distention and pain beneath the heart, and cold body and extremities.

CLINICAL APPLICATIONS

Influenza, common cold, gastric and duodenal ulcers, acute and chronic gastroenteritis, and prolapse of the stomach.

EXPLANATION

Gui Zhi Ren Shen Tang (Cinnamon Twig and Ginseng Decoction) originally appeared in *Shang Han Lun* (Discussion of Cold-Induced Disorders) as a treatment for patients with *taiyang* syndrome who have been treated improperly with downward draining methods. As a result of downward draining treatments, patients develop deficiency and cold in the interior. The overall condition then is complicated by exterior wind-cold and interior deficiency and cold. Clinically, fever, aversion to cold, and perspiration are representative of exterior wind-cold; and constant diarrhea, distention and pain beneath the heart,

and cold body and extremities are indicative of interior deficiency and cold. Effective treatment for this condition must focus on dispelling the exterior pathogenic factors as well as warming the interior cold.

Gui Zhi (Ramulus Cinnamomi) dispels wind and cold at the exterior and relieves body aches and pains. *Ren Shen* (Radix et Rhizoma Ginseng) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) tonify qi, strengthen the Spleen, and stop diarrhea. *Gan Jiang* (Rhizoma Zingiberis) warms the interior and dispels cold. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) relieves pain and harmonizes the formula.

MODIFICATIONS

- With epigastric fullness and oppression, add *Zhi Shi* (Fructus Aurantii Immaturus) and *Jie Geng* (Radix Platycodonis).
- With a feeling of distention and pain in the chest, add *Huang Lian* (Rhizoma Coptidis) and *Ban Xia* (Rhizoma Pinelliae).
- If there is constant diarrhea, add *Shan Yao* (Rhizoma Dioscoreae) and *Ge Gen* (Radix Puerariae Lobatae).

AUTHORS' COMMENTS

Gui Zhi Ren Shen Tang combines *Gui Zhi* (Ramulus Cinnamomi) and *Li Zhong Wan* (Regulate the Middle Pill). It is used mainly for patients who have deficiency and cold of the middle *jiao*, complicated by exterior symptoms. This condition results from improperly using downward draining methods to treat patients with exterior syndrome; the result is damage to the middle *jiao* in addition to unresolved exterior symptoms. Clinically, patients may show severe diarrhea, epigastric fullness and rigidity, and other exterior symptoms and signs. In this formula, it is important to note that *Gui Zhi* (Ramulus Cinnamomi) is purposely post-decocted to preserve its acrid and aromatic properties to release the exterior condition.

Wú Zhū Yú Tāng (Evodia Decoction)

吳茱萸湯
吴茱萸汤

Pinyin Name: *Wu Zhu Yu Tang*

Literal Name: Evodia Decoction

Alternate Names: *Wu Chu Yu Tang*, Evodia Fruit Decoction, Evodia Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Wu Zhu Yu</i> (Fructus Evodiae), <i>xi</i> (washed) in liquid 7 times	1 cup [3-9g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>qie</i> (sliced)	18g [18g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	9g [6g]
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	12 pieces [4 pieces]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 7 cups [1,400 mL] of water until 2 cups [400 mL] of liquid remain. Take 0.7 cup [140 mL] of the warm, strained decoction three times daily. Today, the decoction may be prepared using the doses suggested in brackets. Note: Some patients may experience exacerbation of the symptoms immediately after ingesting the herbs, which is a normal reaction and should abate in half an hour.

CHINESE THERAPEUTIC ACTIONS

1. Warms and tonifies the middle *jiao*
2. Corrects the reversed flow of qi and stops vomiting

CLINICAL MANIFESTATIONS

1. Vomiting due to deficiency and cold of the Stomach: vomiting sensations after eating, a feeling of fullness and distention in the chest and diaphragm, epigastric pain, belching, and acid regurgitation.
2. *Jueyin* headache with dry heaves (vomiting of saliva only).
3. *Shaoyin* vomiting and diarrhea with extremely cold hands and feet and severe fidgeting and irritability.

CLINICAL APPLICATIONS

Acute and chronic gastritis, gastroptosis, ulcerative colitis, vomiting, nausea, hiccup, food poisoning, acid reflux, morning sickness, headache, neurotic headache, migraine headache, habitual headache, Meniere's disease, trigeminal

Wú Zhū Yú Tāng (Evodia Decoction)

neuralgia, hypertension, and withdrawal reactions from drug addiction.

EXPLANATION

Wu Zhu Yu Tang (Evodia Decoction) treats vomiting due to deficiency and cold in the Stomach with rising of yin and cold upwards. This condition may be present in *yangming*, *shaoyin*, and *jueyin* disorders. In *yangming* disorder, deficiency and cold affect the Stomach and cause reversed flow of qi, leading to symptoms such as vomiting, belching, and acid regurgitation. In *jueyin* disorder, yin and cold rise upwards to cause vertex headache, dry heaves and vomiting of saliva. In *shaoyin* disorder, yin and cold rise upwards to cause vomiting, while yang is deficient and cannot reach upwards or outwards, resulting in diarrhea with extremely cold hands and feet.

Wu Zhu Yu (Fructus Evodiae), acrid, bitter, and very warm, is the chief herb in this formula. It warms the Stomach, dispels cold, harmonizes the middle *jiao*, and corrects the reversed flow of qi. *Sheng Jiang* (Rhizoma Zingiberis Recens) warms the Stomach and relieves nausea and vomiting. *Ren Shen* (Radix et Rhizoma Ginseng) tonifies *yuan* (source) *qi* and strengthens the Stomach. *Da Zao* (Fructus Jujubae) tonifies qi and harmonizes the middle *jiao*. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) also harmonize and regulate the *ying* (nutritive) and *wei* (defensive) levels.

MODIFICATIONS

- If there is severe nausea and vomiting, add *Ban Xia* (Rhizoma Pinelliae), *Sha Ren* (Fructus Amomi), and *Fu Ling* (Poria).
- For vomiting without cold extremities and severe fidgeting and irritability, use *Dang Shen* (Radix Codonopsis) instead of *Ren Shen* (Radix et Rhizoma Ginseng).
- With abdominal pain, add *Bai Shao* (Radix Paeoniae Alba).
- With abdominal pain and extreme coldness, add *Si Ni Tang* (Frigid Extremities Decoction).

- With fullness and distention in the abdominal region, add *Sha Ren* (Fructus Amomi) and *Hou Po* (Cortex Magnoliae Officinalis).
- With involuntary salivation, nausea or dry heaves, add *Gan Jiang* (Rhizoma Zingiberis) and *Rou Gui* (Cortex Cinnamomi).
- If there is frequent acid regurgitation, add *Hai Piao Xiao* (Endoconcha Sepiae) and *Wa Leng Zi* (Concha Arcae).
- With headache, add *Man Jing Zi* (Fructus Viticis), *Chuan Xiong* (Rhizoma Chuanxiong), *Dang Gui* (Radix Angelicae Sinensis), and *Ji Li* (Fructus Tribuli).
- With irritability and extreme coldness, add *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Xi Xin* (Radix et Rhizoma Asari).

CAUTIONS / CONTRAINDICATIONS

- *Wu Zhu Yu Tang* is contraindicated in individuals with vomiting and acid regurgitation caused by heat, and in patients with headaches caused by Liver yang rising.
- This formula may be served at room temperature, especially for individuals who cannot keep the warm decoction down because of vomiting.
- According to one reference, use of this formula in decoction is occasionally associated with chest discomfort, headache and dizziness. These side effects, however, are self-limiting and generally resolve within 30 minutes without intervention.¹

PHARMACOLOGICAL EFFECTS

1. **Antiemetic:** In one experiment, the administration of *Wu Zhu Yu Tang* was found to be effective in suppressing vomiting in pigeons with artificially-induced vomiting. The researchers noted that while *Wu Zhu Yu* (Fructus Evodiae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) each have antiemetic effects, the potency is not as strong as *Wu Zhu Yu Tang*.²
2. **Gastrointestinal:** Administration of *Wu Zhu Yu Tang* was associated with a general inhibitory effect on the gastrointestinal system. In one experiment of two groups

Wu Zhu Yu Tang (Evodia Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Deficiency and cold of the Stomach	<ul style="list-style-type: none"> • Vomiting, belching, and acid regurgitation: reversed flow of qi due to deficiency and cold of the Stomach • Feeling of fullness and distention of the chest and diaphragm, and epigastric pain: presence of cold in the middle <i>jiao</i> 	<ul style="list-style-type: none"> • Warms and tonifies the middle <i>jiao</i> • Corrects the reversed flow of qi and stops vomiting 	<ul style="list-style-type: none"> • <i>Wu Zhu Yu</i> (Fructus Evodiae) warms the Stomach, dispels cold, harmonizes the middle <i>jiao</i>, corrects the reversed flow of qi. • <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) warms the Stomach and relieves nausea and vomiting. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng) tonifies <i>yuan</i> (source) <i>qi</i> and strengthens the Stomach. • <i>Da Zao</i> (Fructus Jujubae) tonifies qi and harmonizes the middle <i>jiao</i>.

Wú Zhū Yú Tāng (Evodia Decoction)

of mice who were given the same amount of food, the group that received herbs had significantly more food remaining in the stomach than the group that received placebo.³ In another experiment, administration of *Wu Zhu Yu Tang* inhibited the production of gastric acid, and increased the pH in the stomach.⁴

CLINICAL STUDIES AND RESEARCH

- Vomiting:** Use of *Wu Zhu Yu Tang* in 168 patients was associated with 91.7% effectiveness in relieving nausea and vomiting associated with cancer of the upper gastrointestinal tract. The treatment protocol was to administer the herbs in decoction daily, for 6 packs of herbs per course of treatment.⁵ In another study, use of modified *Wu Zhu Yu Tang* was associated with 100% effectiveness in treating neurogenic vomiting in 68 patients who have 3 months to 3 years history of illness. Modifications to this formula included the addition of *Huo Xiang* (Herba Agastaches) and *Pei Lan* (Herba Eupatorii) for dampness with a white, greasy tongue coating; *Chen Xiang* (Lignum Aquilariae Resinatum) and *Qing Pi* (Pericarpium Citri Reticulatae Viride) for chest and hypochondriac fullness and pain; *Huang Lian* (Rhizoma Coptidis) and *Zhu Ru* (Caulis Bambusae in Taenia) for a red tongue body with irritability; and *Sha Ren* (Fructus Amomi) and *Mai Dong* (Radix Ophiopogonis) for chronic vomiting with Stomach yin deficiency. Of 68 patients, the study reported significant improvement in 53 patients and moderate improvement in 15 patients.⁶
- Nausea:** One study reported complete recovery in all 5 patients with nausea when treated with *Wu Zhu Yu Tang* plus *Shi Di* (Calyx Kaki), *Zhi Qiao* (Fructus Aurantii), and *Pi Pa Ye* (Folium Eriobotryae). The cause of nausea was determined to be weakness and deficiency of the Spleen and Stomach with accumulation of cold qi.⁷
- Headache:** Twenty-five patients (12 males and 13 females) with headaches were treated with 7.5g of extract of *Wu Zhu Yu Tang* daily. The study reported significant improvement in 9 patients, moderate improvement in 6 patients, slight improvement in 5 patients, and no change in 5 patients. The overall rate of effectiveness was 60%.⁸
- Meniere's syndrome:** Use of modified *Wu Zhu Yu Tang* was effective in treating Meniere's syndrome in 22 patients. The herbal treatment contained *Wu Zhu Yu Tang* plus *Gui Zhi* (Ramulus Cinnamomi) as the base formula, with addition of *Fu Zi* (Radix Aconiti Lateralis Praeparata) for chills and cold extremities; *Ban Xia* (Rhizoma Pinelliae) for nausea and vomiting; and *Huang Qi* (Radix Astragali) for qi deficiency. The herbal formula was given in decoction, with most patients reporting improvement within 3 packs of herbs. Of 22 patients, the study reported complete recovery in 20 patients and improvement in 2 patients.⁹
- Ulcerative colitis:** Use of modified *Wu Zhu Yu Tang* was effective in treating chronic ulcerative colitis in 68 patients (between 20 and 58 years of age, with 1-12 years history of illness). In addition to the base formula, modifications were made as follows: *Chai Hu* (Radix Bupleuri) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) for Liver overacting on the Spleen; *Chuan Xiong* (Rhizoma Chuanxiong) and *Yan Hu Suo* (Rhizoma Corydalis) for a purple tongue with petechia spots and abdominal pain that worsens with pressure; *Bai Tou Weng* (Radix Pulsatillae) and *Qin Pi* (Cortex Fraxini) for damp-heat; *Xiao Hui Xiang* (Fructus Foeniculi) and *Fu Ling* (Poria) for damp-cold; *Shan Yao* (Rhizoma Dioscoreae) and dry-fried *Bai Bian Dou* (Semen Lablab Album) for Spleen and Stomach deficiencies; *Shen Qu* (Massa Fermentata) and dry-fried *Shan Zha* (Fructus Crataegi) for food stagnation; *Ba Ji Tian* (Radix Morindae Officinalis) and *Bu Gu Zhi* (Fructus Psoraleae) for Spleen and Kidney yang deficiencies; *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Rou Dou Kou* (Semen Myristicae), charred *Qian Cao* (Radix et Rhizoma Rubiae), and charred *Pu Huang* (Pollen Typhae) for blood stagnation due to chronic illness. The treatment protocol was to administer the herbs in decoction twice daily, for 30 days per course of treatment, for 1-2 courses total. Of 68 patients, the study reported complete recovery in 42 patients, improvement in 23 patients, and no effect in 3 patients.¹⁰
- Hypertension:** Forty-four patients (11 males and 33 females) ages between 40-67 with hypertension were treated with modified *Wu Zhu Yu Tang* with good success. Clinical presentation of these patients included hypertension with dizziness and vertigo, headache, and a feeling of swelling sensations and pain in the head. The treatment protocol was to administer the herbs in decoction twice daily. The formula included *Wu Zhu Yu* (Fructus Evodiae) 4g, *Ban Xia* (Rhizoma Pinelliae) 8g, *Dang Shen* (Radix Codonopsis) 10g, *Fu Ling* (Poria) 10g, *Fu Shen* (Poria Paradicis) 10g, *Bai Zhi* (Radix Angelicae Dahuricae) 10g, *Di Long* (Pheretima) 10g, *Jiang Can* (Bombyx Batryticatus) 10g, *Chai Hu* (Radix Bupleuri) 6g, *Qing Pi* (Pericarpium Citri Reticulatae Viride) 6g, *Chen Pi* (Pericarpium Citri Reticulatae) 6g, *Gou Teng* (Ramulus Uncariae cum Uncis) 30g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 5-8 slices, *Da Zao* (Fructus Jujubae) 5-8 pieces, and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 4g. Other slight modifications were made as follows: addition of *Chuan Xiong* (Rhizoma Chuanxiong) 6g for a purple tongue; *Chan Tui* (Periostracum Cicadae) 5g for tinnitus; and removal of *Da Zao* (Fructus Jujubae) and addition of *Sha Ren* (Fructus Amomi) 3g and *Dou Kou*

Wú Zhū Yú Tāng (Evodia Decoction)

(Fructus Amomi Rotundus) 3g for a greasy tongue coating. Improvement was noted in most patients within 5 packs of herbs. Out of 44 patients, the study reported significant improvement in 34 patients, moderate improvement in 8 patients, and no effect in 2 patients. The overall rate of effectiveness was 95.45%.¹¹

7. **Drug addiction:** Modified *Wu Zhu Yu Tang* was evaluated for its efficacy in treating 6 males with 4 months to 2 years history of drug addiction (both inhalation and injection of drugs). The exact herbal treatments varied depending on the clinical presentations. For individuals with withdrawal reactions characterized by severe headaches, extreme coldness of the extremities, salivation, a purple tongue with a moist tongue coating, and a wiry pulse, the corresponding herbal formula contained ingredients such as *Wu Zhu Yu* (Fructus Evodiae) 10g, *Ren Shen* (Radix et Rhizoma Ginseng) 15g, and *Sheng Jiang* (Rhizoma Zingiberis Recens) 15g. For individuals with withdrawal reactions characterized by irritability, palpitations, nausea, vomiting, foaming of the mouth, a pale face, extremely cold extremities, bone and joint pain, a blue and purple tongue with a white tongue coating, and a deep and fine pulse, the corresponding herbal formula contained *Wu Zhu Yu Tang* and *Li Zhong Tang* (Regulate the Middle Decoction), with *Fu Zi* (Radix Aconiti Lateralis Praeparata) 30g and *Fu Ling* (Poria) 30g. The study reported that after 2-4 weeks of continuous treatment, most of the withdrawal reactions are under good control, though some patients still experienced fatigue, poor appetite, and vomiting of clear fluids.¹²

AUTHORS' COMMENTS

Wu Zhu Yu Tang has a wide range of therapeutic actions, and may be used to treat *yangming*, *shaoyin*, and *jueyin* disorders. This formula is also extremely effective for women suffering from migraine headaches with nausea or vomiting, especially before the menstrual cycle.

Li Zhong Wan (Regulate the Middle Pill) and *Wu Zhu Yu Tang* both warm the middle *jiao* and dispel cold to treat abdominal pain, nausea, and diarrhea due to cold and deficiency of the middle *jiao*. Both formulas use *Ren Shen* (Radix et Rhizoma Ginseng) to tonify the Spleen and Stomach. Their differences are as follows:

- *Li Zhong Wan* warms the Stomach to dispel cold to treat vomiting, diarrhea, and excessive salivation. *Gan Jiang* (Rhizoma Zingiberis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) warm the Spleen and Stomach, and treat deficiency and cold of the middle *jiao*.
- *Wu Zhu Yu Tang* is specifically for deficiency and cold in the Liver and Stomach, with turbid yin rising causing headache, nausea, and vomiting of white foam. It uses *Wu Zhu Yu* (Fructus Evodiae) to warm the Liver channel and redirect rebellious Stomach qi. It uses a heavy dose of *Sheng Jiang* (Rhizoma Zingiberis Recens) to complement the effects of *Wu Zhu Yu* (Fructus Evodiae).¹³

Xiǎo Jiàn Zhōng Tāng (Minor Construct the Middle Decoction)

小建中湯

小建中汤

Pinyin Name: *Xiao Jian Zhong Tang*

Literal Name: Minor Construct the Middle Decoction

Alternate Names: *Hsiao Chien Chung Tang, Xiao Jian Zhong Tang, Minor Centre-Fortifying Decoction, Minor Middle-Strengthening Decoction, Minor Cinnamon and Peony Combination*

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Yi Tang</i> (Maltosum)	1 cup [30g]
<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g
<i>Bai Shao</i> (Radix Paeoniae Alba), <i>chao</i> (dry-fried) with liquor	18g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>qie</i> (sliced)	9g
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	12 pieces [4 pieces]

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients, except *Yi Tang* (Maltosum), in 7 cups [1,400 mL] of water until 3 cups [600 mL] of liquid remain. Filter and discard the herb residue, add *Yi Tang* (Maltosum) to the strained liquid, and allow it to dissolve using low heat. Take 1 cup [200 mL] of the warm, strained decoction three times daily. Today, the decoction is prepared by using the doses suggested in brackets, and by cooking the herbs twice. Filter and discard the herb residue, and dissolve *Yi Tang* (Maltosum) in the strained decoction. Take the warm decoction in two equally-divided doses.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies and warms the middle *jiao*
2. Harmonizes the interior and relieves pain

CLINICAL MANIFESTATIONS

Deficiency and cold of the middle *jiao*: abdominal pain that decreases with warmth and pressure, a pale tongue with a white tongue coating, and a fine, wiry and moderate pulse; palpitations, fidgeting, irritability, a sallow and dull complexion; sore limbs, warm extremities, and a dry mouth and throat.

CLINICAL APPLICATIONS

Debility and chronic illness in children, such as enuresis, frequent urination, constant crying, malnutrition, and low-grade fever; gastritis, peptic ulcer disease, epigastric pain, abdominal pain, habitual constipation, hepatitis B, chronic hepatitis, neurasthenia, anemia, and depression.

EXPLANATION

Xiao Jian Zhong Tang (Minor Construct the Middle Decoction) treats deficiency and cold of the middle *jiao*

with three clinical manifestations. Deficiency of the middle *jiao* may give rise to interior cold, which then produces abdominal pain. The pain usually improves with warmth and pressure. Deficiency and cold of the middle *jiao* also compromises the generation of qi and blood, which results in palpitations, fidgeting, irritability, and a sallow and dull complexion. Lastly, deficiency and cold of the middle *jiao* results in the inability of the Spleen to produce qi and blood. An insufficiency of qi and blood disrupts the harmony between the *ying* (nutritive) and *wei* (defensive) levels. Sore limbs occur as *ying* (nutritive) cannot properly nourish the muscles and warm extremities; and a dry mouth and throat occur when *wei* (defensive) *qi* leaks outwards. A pale tongue with a white coating is a sign of deficiency, and a fine, wiry and moderate pulse suggests true deficiency and cold in the interior and pain.

Yi Tang (Maltosum), the chief herb, warms the middle *jiao*, tonifies Spleen qi, and nourishes Spleen yin. Furthermore, it softens the Liver to alleviate pain and moistens the Lung to relieve dryness. *Gui Zhi* (Ramulus Cinnamomi) warms yang and dispels cold. *Bai Shao* (Radix Paeoniae Alba) nourishes yin and blood and relieves pain. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonifies qi and helps *Yi Tang* (Maltosum) and *Gui Zhi* (Ramulus Cinnamomi) warm the middle and benefit qi. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) also helps *Bai Shao* (Radix Paeoniae Alba) nourish the Liver and alleviate pain. *Sheng Jiang* (Rhizoma Zingiberis Recens) warms the Stomach and *Da Zao* (Fructus Jujubae) tonifies the Spleen. These two herbs also harmonize the *ying* (nutritive) and *wei* (defensive) levels. In summary, this

Xiǎo Jiàn Zhōng Tāng (Minor Construct the Middle Decoction)

Xiao Jian Zhong Tang (Minor Construct the Middle Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Deficiency and cold of the middle <i>jiao</i>	<ul style="list-style-type: none"> Abdominal pain that decreases with warmth and pressure: cold and deficiency of the middle <i>jiao</i> Palpitations and a dull and sallow complexion: qi and blood deficiencies Sore limbs, warm extremities, and a dry mouth and throat: disharmony of <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels Pale tongue with a white coating: deficiency Fine, wiry and moderate pulse: deficiency and cold in the interior 	<ul style="list-style-type: none"> Tonifies and warms the middle <i>jiao</i> Harmo-nizes the interior and relieves pain 	<ul style="list-style-type: none"> <i>Yi Tang</i> (Maltosum) warms the middle <i>jiao</i>, tonifies Spleen qi, and nourishes Spleen yin. <i>Gui Zhi</i> (Ramulus Cinnamomi) warms yang and dispels cold. <i>Bai Shao</i> (Radix Paeoniae Alba) nourishes yin and blood. <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonifies qi, warms the middle <i>jiao</i>, and alleviates pain. <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Da Zao</i> (Fructus Jujubae) warm the Stomach and tonify the Spleen.

formula warms and tonifies the middle *jiao*, which in turn alleviates the associated symptoms characterized by deficiency and cold.

MODIFICATIONS

- With fatigue due to qi deficiency, add *Huang Qi* (Radix Astragali) and *Ren Shen* (Radix et Rhizoma Ginseng).
- With fatigue due to blood deficiency, add *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong).
- With a sallow complexion, fatigue and tiredness, remove *Yi Tang* (Maltosum) and add *Ren Shen* (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali) and *Dang Gui* (Radix Angelicae Sinensis).
- With irritability due to Lung deficiency, add *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- If there is chronic weakness and deficiency in women, add *Si Wu Tang* (Four-Substance Decoction).
- If there is chronic weakness and deficiency in men, add *Si Jun Zi Tang* (Four-Gentlemen Decoction).

CAUTIONS / CONTRAINDICATIONS

- *Xiao Jian Zhong Tang* is contraindicated in cases of yin-deficient fire, and conditions characterized by middle *jiao* stagnation.
- This formula is not recommended for treating vomiting because the sweet herbs in this formula will create more stagnation and promote Stomach qi reversal.
- This formula is contraindicated in patients with intestinal parasites.

PHARMACOLOGICAL EFFECTS

1. **Antilulcer:** Administration of *Xiao Jian Zhong Tang* was associated with a protective effect on the stomach in rats. The beneficial effects are attributed to *Gui Zhi* (Ramulus Cinnamomi) for its effect to treat ulceration, *Bai Shao* (Radix Paeoniae Alba) for its effect to inhibit the production of gastric acid, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) for their effect to protect the mucous lining of the stomach.¹
2. **Gastrointestinal:** Administration of *Xiao Jian Zhong Tang* was associated with a general inhibitory effect on the gastrointestinal system. According to a laboratory experiment, animals who received ingredients of *Xiao Jian Zhong Tang* responded with a decreased production of gastric acid and lowered rate of peristalsis.²

CLINICAL STUDIES AND RESEARCH

1. **Gastrointestinal disorders:** In one report, 21 patients with various types of gastrointestinal disorders (11 with peptic ulcers, 8 with superficial gastritis, and 2 with atrophic gastritis) were treated with modified *Xiao Jian Zhong Tang* for 15 consecutive doses. The formula included *Bai Shao* (Radix Paeoniae Alba) 15g, *Gui Zhi* (Ramulus Cinnamomi) 10g, *Gan Jiang* (Rhizoma Zingiberis) 5g, *Da Zao* (Fructus Jujubae) 5 pieces, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 5g, *Dang Shen* (Radix Codonopsis) 10g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 10g, *Fo Shou* (Fructus Citri Sarcodactylis) 10g, and *Yi Tang* (Maltosum) 30g. The study reported significant improvement in pain reduction in 20 out of 21 patients.³

Xiǎo Jiàn Zhōng Tāng (Minor Construct the Middle Decoction)

2. **Gastritis:** *Xiao Jian Zhong Tang* was reported in one study to have good effect to treat gastritis. Of 58 patients with chronic gastritis, 39 were diagnosed with atrophic gastritis and 19 with superficial gastritis. In addition to *Xiao Jian Zhong Tang*, modifications were made based on the individual conditions of the patients. For acid reflux, *Yi Tang* (Maltosum) was removed and *Wu Zhu Yu* (Fructus Evodiae), *Hai Piao Xiao* (Endoconcha Sepiae) and *Mu Li* (Concha Ostreae) were added. For pain at night, a purplish tongue with dark spots, *Yan Hu Suo* (Rhizoma Corydalis), *Chi Shao* (Radix Paeoniae Rubra), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) were added. For the presence of *H. pylori*, *Da Huang* (Radix et Rhizoma Rhei) and *Pu Huang* (Pollen Typhae) were added. For qi deficiency and generalized weakness, *Huang Qi* (Radix Astragali), *Fu Ling* (Poria), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) were added. Out of 58 cases, the study reported complete recovery in 32 cases (55.5%), improvement in 18 cases (31.0%), and no benefit in 8 cases (13.8%). The overall rate of effectiveness was 86.2%.⁴
3. **Peptic ulcer disease:** Modified *Xiao Jian Zhong Tang* was used with good results in treating 31 of 35 patients with peptic ulcer and abdominal pain. No recurrence was noted amongst 31 patients in their one-year follow-up examination. The herbal treatment used *Xiao Jian Zhong Tang* plus *Gua Lou* (Fructus Trichosanthis), *Wu Zhu Yu* (Fructus Evodiae), and *Xie Bai* (Bulbus Allii Macrostemonis) as the base formula. For severe acid reflux, *Da Zao* (Fructus Jujubae) and *Yi Tang* (Maltosum) were removed and *Huang Lian* (Rhizoma Coptidis) and *Mu Li* (Concha Ostreae) were added. For nausea and vomiting, *Pao Jiang* (Rhizoma Zingiberis Praeparatum) was removed and *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) were added. For frequent belching, *Xuan Fu Hua* (Flos Inulae), *Ban Xia* (Rhizoma Pinelliae), and *Zhe Shi* (Haematitum) were added. For feeling of chest and abdominal oppression and distention, *Da Zao* (Fructus Jujubae) was removed and *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Qiao* (Fructus Aurantii) were added. Lastly, *Fu Ling* (Poria) was added for palpitations and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) was added for loose stools.⁵
4. **Epigastric pain:** Numerous studies have shown that *Xiao Jian Zhong Tang* effectively treats epigastric pain due to various causes, including but not limited to chronic gastritis, gastric ulcer, duodenal ulcer, gastric prolapse, and others.^{6,7}
5. **Abdominal pain:** *Xiao Jian Zhong Tang* was shown in two reports to effectively treat abdominal pain in infants and children between 3-10 years of age. Specific causes of abdominal pain were not stated in these reports.^{8,9}
6. **Habitual constipation:** In one study, 11 patients with chronic habitual constipation were treated with modified *Xiao Jian Zhong Tang*. The formula included *Yi Tang* (Maltosum) 30g, *Bai Shao* (Radix Paeoniae Alba) 15g, *Gui Zhi* (Ramulus Cinnamomi) 6g, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 5g, and *Da Zao* (Fructus Jujubae) 5 pieces. The treatment protocol was to administer the herbs in decoction for seven days per course of treatment. The study reported success with all patients. Out of 11 patients, 4 responded within 1 course, 6 within 2 courses, and 1 after 5 courses. There were no recurrences in all patients in follow-up interviews 6 months after the termination of treatments.¹⁰
7. **Depression:** Twelve geriatric patients (over 65 years of age) with severe depression were treated daily with 7.5-15.0g of *Xiao Jian Zhong Tang* in extract form. Two weeks after the start of herbal therapy, 7 out of 12 patients reported improvement of mood. Four weeks after the start of herbal therapy, 10 out of 12 patients reported improvement of mood. The study also reported that the patients who responded the most were ones who had feelings of guilt and constant suspicion. No significant side effects were reported.¹¹
8. **Hepatitis B:** One study reported beneficial effect using modified *Xiao Jian Zhong Tang* to treat 68 patients with hepatitis B. The herbal treatment contained this formula plus *Sha Ren* (Fructus Amomi), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), charred *Shan Zha* (Fructus Crataegi), charred *Shen Qu* (Massa Fermentata), and charred *Mai Ya* (Fructus Hordei Germinatus). Furthermore, modifications included addition of *Yin Chen* (Herba Artemisiae Scopariae), *Cang Zhu* (Rhizoma Atractylodis), *Pu Gong Ying* (Herba Taraxaci), and *Chui Pen Cao* (Herba Sedi) for damp-heat; *Dang Shen* (Radix Codonopsis), *Shan Yao* (Rhizoma Dioscoreae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Huang Qi* (Radix Astragali) for qi deficiency; *Bei Sha Shen* (Radix Glehniae), *Mai Dong* (Radix Ophiopogonis), *Gou Qi Zi* (Fructus Lycii), and *Yin Yang Huo* (Herba Epimedii) for yin deficiency; and other adjustments as needed. The duration of treatment was three months per course of treatment, for 1-2 courses. Of 68 cases, the study reported significant effect in 47 cases, moderate effect in 15 cases, and no effect in 6 cases. The overall rate of effectiveness was 91%.¹²

(Tangkuei Decoction to Construct the Middle)

當歸建中湯

当归建中汤

Xiǎo Jiàn Zhōng Tāng (Minor Construct the Middle Decoction)

Pinyin Name: *Dang Gui Jian Zhong Tang*

Literal Name: Tangkuei Decoction to Construct the Middle

Original Source: *Qian Jin Yi Fang* (Supplement to the Thousand Ducat Formulas) by Sun Si-Miao in 682 A.D.

<i>Dang Gui</i> (Radix Angelicae Sinensis)	12g
<i>Gui Xin</i> (Cortex Rarus Cinnamomi)	9g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g
<i>Bai Shao</i> (Radix Paeoniae Alba), <i>chao</i> (dry-fried) with liquor	18g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>qie</i> (sliced)	9g
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	12 pieces [4 pieces]
<i>Yi Tang</i> (Maltosum)	18g

Cook the ingredients, except *Yi Tang* (Maltosum), in 10 cups [2,000 mL] of water until 3 cups [600 mL] of liquid remain. Filter and discard the herb residue, add *Yi Tang* (Maltosum) to the strained liquid, and allow it to dissolve over low intensity heat. Take 1 cup [200 mL] of the warm, strained decoction three times daily.

Dang Gui Jian Zhong Tang (Tangkuei Decoction to Construct the Middle) is composed of *Dang Gui* (Radix Angelicae Sinensis) and *Xiao Jian Zhong Tang*. It tonifies the blood, warms the middle *jiao*, and relieves pain. Clinically, patients may show abdominal pain, or lower abdominal pain that radiates to the lower back, in addition to all the symptoms listed in *Xiao Jian Zhong Tang*. This formula may also be used in postpartum women with generalized deficiency and weakness.

AUTHORS' COMMENTS

Abdominal pain may be caused by many different factors. Three potential causes and their diagnosis include pain that worsens with pressure is acute and excess in nature; pain that lessens with pressure is deficient and chronic in nature; and pain that worsens with cold and lessens with warmth is cold in nature. *Xiao Jian Zhong Tang* is designed to treat abdominal pain due to yang deficiency of the middle *jiao*, with key signs and symptoms of abdominal pain that lessens with pressure and warmth, a sallow and dull facial complexion, and a pale tongue with a white, slippery tongue coating.

There are four “*jian zhong tang* (construct the middle decoction)” formulas that have similar functions to warm and tonify the middle *jiao*.

- *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction) warms the yang of the middle *jiao*.

- *Huang Qi Jian Zhong Tang* (Astragalus Decoction to Construct the Middle) warms and tonifies qi of the middle *jiao*.

- *Dang Gui Jian Zhong Tang* (Tangkuei Decoction to Construct the Middle) harmonizes the blood and relieves pain.

- *Da Jian Zhong Tang* (Major Construct the Middle Decoction) redirects rising Stomach qi to treat nausea and vomiting.

Li Zhong Wan (Regulate the Middle Pill) and *Xiao Jian Zhong Tang* both warm the middle *jiao* and disperse cold to treat deficiency and cold of the middle *jiao* manifesting in abdominal and epigastric coldness and pain. Their differences are as follows:

- *Li Zhong Wan* treats Spleen yang deficiency with excess cold accumulation. This formula has a more qi tonic effect than *Xiao Jian Zhong Tang*. Manifestations include diarrhea, vomiting, abdominal pain, and poor appetite. It is also suitable for yang deficiency with sudden blood loss, chronic infantile convulsions, *xiong bi* (painful obstruction of the chest) syndrome, and excessive salivation in chronic diseases.
- *Xiao Jian Zhong Tang* warms the entire middle *jiao* and strengthens middle *jiao* yang qi. Patients usually also have yang deficiency of the middle *jiao* along with qi, blood, and yin deficiencies. The chief complaint is pain. Other symptoms include palpitations, irritability, a sallow complexion, warm sensations in the limbs, and a dry mouth and throat. It can also treat qi, yin, and blood deficiencies with fatigue, palpitations, and shortness of breath usually seen in postpartum women and in late stage diseases.¹³

Gui Zhi Tang (Cinnamon Twig Decoction) and *Xiao Jian Zhong Tang* are both from *Shang Han Lun* (Discussion of Cold-Induced Disorders). They have essentially the same ingredients except for one herb, yet the difference in doses significantly changes the functions and indications of these formulas.

- *Gui Zhi Tang* contains 9g each of *Bai Shao* (Radix Paeoniae Alba) and *Gui Zhi* (Ramulus Cinnamomi). At equal doses, the emphasis of these two herbs is to dispel wind-cold and harmonize the *ying* (nutritive) and *wei* (defensive) levels to treat an exterior condition lingering in the *taiyang* channel.
- *Xiao Jian Zhong Tang* was originally derived from *Gui Zhi Tang* (Cinnamon Twig Decoction) with the addition of *Yi Tang* (Maltosum). The rest of the ingredients are exactly the same. *Xiao Jian Zhong Tang* contains 30g of *Yi Tang* (Maltosum) and 18g of *Bai Shao* (Radix Paeoniae Alba);

Xiǎo Jiàn Zhōng Tāng (Minor Construct the Middle Decoction)

whereas, there are only 9g in *Gui Zhi Tang* (Cinnamon Twig Decoction). With these two as the primary herbs used at higher doses, *Xiao Jian Zhong Tang* focuses on warming the middle *jiao*, tonifying deficiency, and relieving pain.¹⁴

Huáng Qí Jiàn Zhōng Tāng (Astragalus Decoction to Construct the Middle)

黃耆建中湯
黃芪建中湯

Pinyin Name: *Huang Qi Jian Zhong Tang*

Literal Name: Astragalus Decoction to Construct the Middle

Alternate Names: *Huang Chi Chien Chung Tang*, *Huang Qi Jian Zhong Tang*, Astragalus Centre-Fortifying Decoction, Astragalus Middle-Strengthening Decoction, Astragalus Combination

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Yi Tang</i> (Maltosum)	1 cup [30g]
<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g
<i>Bai Shao</i> (Radix Paeoniae Alba), <i>chao</i> (dry-fried) with liquor	18g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>qie</i> (sliced)	9g
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	12 pieces [4 pieces]
<i>Huang Qi</i> (Radix Astragali)	4.5g [12g]

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients, except *Yi Tang* (Maltosum), in 7 cups [1,400 mL] of water until 3 cups [600 mL] of liquid remain. Filter and discard the herb residue, add *Yi Tang* (Maltosum) to the strained liquid, and allow it to dissolve using low heat. Take 1 cup [200 mL] of the warm, strained decoction three times daily. Today, the decoction is prepared by using the doses suggested in

brackets, and by cooking the herbs twice. Filter and discard the herb residue, and dissolve *Yi Tang* (Maltosum) in the strained decoction. Take the warm decoction in two equally-divided doses.

CHINESE THERAPEUTIC ACTIONS

1. Warms the middle *jiao* and tonifies qi
2. Harmonizes the interior and relieves pain

Huáng Qí Jiàn Zhōng Tāng

(Astragalus Decoction to Construct the Middle)

CLINICAL MANIFESTATIONS

Deficiency and cold of the middle *jiao* with severe qi deficiency: abdominal pain that decreases with warmth and pressure, a sallow and dull complexion, and a pale tongue with a white tongue coating. There might be palpitations, fidgeting, irritability, spontaneous perspiration, shortness of breath, lethargy, and a dry mouth and throat.

CLINICAL APPLICATIONS

Peptic ulcer disease, gastritis, antral gastritis, atrophic gastritis, gastric ulcer, duodenal ulcer, inflammatory bowel disease, irritable bowel syndrome, anorexia, constipation, allergic rhinitis, otitis media, leukopenia, lead poisoning, neurasthenia, pernicious anemia, hypoglycemia, chronic ulceration, delayed healing of wounds, and gangrene.

EXPLANATION

Huang Qi Jian Zhong Tang (Astragalus Decoction to Construct the Middle) is formulated by combining *Huang Qi* (Radix Astragali) and *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction). *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction) tonifies and warms the middle *jiao*, harmonizes the interior, and relieves pain. *Huang Qi* (Radix Astragali) tonifies qi to treat qi deficiency.

Please refer to *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction) for a complete explanation of this formula and its applications.

MODIFICATIONS

- For generalized weakness following an illness, combine with *Si Jun Zi Tang* (Four-Gentlemen Decoction).
- For generalized weakness in postpartum women, combine with *Si Wu Tang* (Four-Substance Decoction).

- For generalized weakness following a wind-cold disorder, combine with *Yu Ping Feng San* (Jade Windscreen Powder).
- With abdominal fullness, add *Hou Po* (Cortex Magnoliae Officinalis), *Sha Ren* (Fructus Amomi), and *Mu Xiang* (Radix Aucklandiae).
- With vomitus of clear fluids, add *Wu Zhu Yu* (Fructus Evodiae), *Ban Xia* (Rhizoma Pinelliae), and *Gan Jiang* (Rhizoma Zingiberis).
- With edema, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Ze Xie* (Rhizoma Alismatis).

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** Administration of *Huang Qi Jian Zhong Tang* was effective in suppressing the production of gastric acid, thereby promoting the recovery from gastric ulcers in rats.¹
2. **Immunostimulant:** One study reported an increase in IgG from 12.4-24.5 mg/mL to 12.4-30 mg/mL (an average increase of 1.59 mg/mL; p<0.05) following ingestion of *Huang Qi Jian Zhong Tang* for 20 doses while treating gastrointestinal disorders.²

CLINICAL STUDIES AND RESEARCH

1. **Peptic ulcer disease:** *Huang Qi Jian Zhong Tang* has been shown in many clinical studies to effectively treat gastric and duodenal ulcers. In one study, use of modified *Huang Qi Jian Zhong Tang* in 100 patients with peptic ulcer (gastric and duodenal ulcers) was associated with complete recovery in 85 patients, significant improvement in 13 patients, and no effect in 2 patients. The herbal treatment contained this formula plus *Hai Piao Xiao* (Endoconcha Sepiae) and *Bai Ji* (Rhizoma Bletillae). Additional modifications included *Yan Hu Suo* (Rhizoma Corydalis) for severe pain; *Zhi Qiao* (Fructus Aurantii) and *Chen Pi* (Pericarpium Citri Reticulatae) for fullness and distention in the chest and abdominal regions; *Wa Leng Zi* (Concha Arcae) and *Mai Ya* (Fructus Hordei Germinatus) for acid reflux; and *San Qi* (Radix et Rhizoma

(Astragalus Decoction to Construct the Middle)

- Notoginseng) for bleeding.³ According to another study, 12 patients (4 with gastric ulcer, 4 with duodenal ulcer, and 4 with both gastric and duodenal ulcers) were treated with modified *Huang Qi Jian Zhong Tang* with marked success. In addition to this formula, *Huang Lian* (Rhizoma Coptidis) and *Wu Zhu Yu* (Fructus Evodiae) were added for acid reflux; *Fan Xie Ye* (Folium Sennae) for constipation; and charred *Shan Zha* (Fructus Crataegi), charred *Shen Qu* (Massa Fermentata), and charred *Mai Ya* (Fructus Hordei Germinatus) for food stagnation. Of 12 patients, the study reported complete recovery in 9 patients, improvement in 2 patients, and no benefit in 1 patient.⁴
2. **Antral gastritis:** One study reported 92.6% effectiveness in the treatment of chronic antral gastritis using *Huang Qi Jian Zhong Tang* plus *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Tao Ren* (Semen Persicae), *Yan Hu Suo* (Rhizoma Corydalis), and minus *Yi Tang* (Malto-sum). Additional modifications were made as need. For Stomach yin deficiency, *Sha Shen* (Radix Glehniae seu Adenophorae) and *Mai Dong* (Radix Ophiopogonis) were added, and *Gan Jiang* (Rhizoma Zingiberis) and *Gui Zhi* (Ramulus Cinnamomi) were removed. For disharmony of the Liver and Stomach, *Chai Hu* (Radix Bupleuri) and *Xiang Fu* (Rhizoma Cyperi) were added. For accumulation of phlegm in the middle *jiao*, *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae) were added. For food stagnation, *Shen Qu* (Massa Fermentata) and *Shan Zha* (Fructus Crataegi) were added. Of 41 patients, the study reported complete recovery in 23 patients, significant improvement in 9 patients, slight improvement in 6 patients, and no change in 3 patients.⁵
 3. **Atrophic gastritis:** Use of modified *Huang Qi Jian Zhong Tang* was associated with 96% effectiveness in treating 101 patients with 1-20 years history of atrophic gastritis. In addition to this formula, modifications were made to include *Dang Shen* (Radix Codonopsis) for deficiency and cold of the Spleen and Stomach; *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Chuan Lian Zi* (Fructus Toosendan) for Liver qi stagnation; and *Bai He* (Bulbus Lilii) for Spleen and Stomach yin deficiencies. The duration of treatment was four weeks per course of treatment, for a total of three courses. Of 101 patients, the study reported complete recovery in 59 patients, significant improvement in 24 patients, moderate improvement in 14 patients, and no effect in 4 patients.⁶
 4. **Anorexia:** One study reported complete recovery in 26 of 32 children with anorexia using *Huang Qi Jian Zhong Tang* plus dry-fried *Gu Ya* (Fructus Setariae Germinatus) and *Sha Ren* (Fructus Amomi) in decoction for one week per course of treatment.⁷
 5. **Constipation:** Fifty patients with constipation characterized by deficiency were treated with good results using *Huang Qi Jian Zhong Tang* plus *Nu Zhen Zi* (Fructus Ligustri Lucidi) and *Dang Gui* (Radix Angelicae Sinensis). Additional modifications were made as follows: a larger dose of *Huang Qi* (Radix Astragali) for constipation with qi deficiency; a larger dose of *Dang Gui* (Radix Angelicae Sinensis) for constipation with blood deficiency; *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Pao Jiang* (Rhizoma Zingiberis Praeparatum) for constipation with yang deficiency; *Rou Cong Rong* (Herba Cistanches), *Gou Qi Zi* (Fructus Lycii) and *Niu Xi* (Radix Achyranthis Bidentatae) for geriatric patients with soreness and weakness of the lower back and knees; and *Wu Wei Zi* (Fructus Schisandrae Chinensis) for presence of chloasma on the face. The treatment protocol was to administer the herbs in decoction form daily, for 10 days per course of treatment, for 1-2 courses total.⁸
 6. **Irritable bowel syndrome (IBS):** One study reported 92% effectiveness using modified *Huang Qi Jian Zhong Tang* to treat 50 patients with IBS. In addition to this formula, modifications were made by adding *Sha Ren* (Fructus Amomi) and *Lai Fu Zi* (Semen Raphani) for qi stagnation; *Huo Xiang* (Herba Agastaches), *Cang Zhu* (Rhizoma Atractylodis), and *Pei Lan* (Herba Eupatorii) for loose stools due to cold and dampness; *Sha Ren* (Fructus Amomi), *Gu Ya* (Fructus Setariae Germinatus) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) for food stagnation, poor appetite, and belching; *Chai Hu* (Radix Bupleuri) and *Fo Shou* (Fructus Citri Sarcodactylis) for Liver qi stagnation with hypochondriac pain; and *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Bu Gu Zhi* (Fructus Psoraleae) for soreness and weakness of the lower back and knees. The treatment protocol was to administer the herbs in decoction one time daily, for one month per course of treatment, for 1-4 courses total. Of 50 patients, the study reported complete recovery in 21 patients, significant improvement in 15 patients, moderate improvement in 10 patients, and no change in 4 patients.⁹
 7. **Allergic rhinitis:** Sixty patients with allergic rhinitis were treated with significant improvement in 50 patients and moderate improvement in 10 patients. The herbal treatment contained *Huang Qi Jian Zhong Tang* plus *Ku Xing Ren* (Semen Armeniacae Amarum), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Ba Ji Tian* (Radix Morindae Officinalis). For individuals who showed presence of heat, *Huang Qin* (Radix Scutellariae) was added and *Ba Ji Tian* (Radix Morindae Officinalis) was removed. The herbs were given in decoction form one time daily, for between 7-20 days.¹⁰

Huáng Qí Jiàn Zhōng Tāng

(Astragalus Decoction to Construct the Middle)

8. Otitis media: One study reported good therapeutic effects using modified *Huang Qi Jian Zhong Tang* to treat chronic suppurative otitis media. In addition to this formula, modifications were made by adding *Long Dan* (Radix et Rhizoma Gentianae), *Che Qian Zi* (Semen Plantaginis), and *Jin Yin Hua* (Flos Lonicerae Japonicae) for profuse sticky ear discharge; *Huang Bo* (Cortex Phellodendri Chinensis), *Huang Lian* (Rhizoma Coptidis) and *Bai Jiang Cao* (Herba cum Radice Patriniae) for foul-smelling discharge; *Dang Gui* (Radix Angelicae Sinensis), *Yi Yi Ren* (Semen Coicis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and a large dose of *Jin Yin Hua* (Flos Lonicerae Japonicae) for profuse watery discharge; *Chuan Xiong* (Rhizoma Chuanxiong), *Man Jing Zi* (Fructus Viticis), *Bai Zhi* (Radix Angelicae Dahuricae) and *Pei Lan* (Herba Eupatorii) for severe headache; *Fang Feng* (Radix Saposhnikoviae), *Ji Li* (Fructus Tribuli), *Zhu Ru* (Caulis Bambusae in Taenia), and *Ban Xia* (Rhizoma Pinelliae) for nausea and dizziness. The treatment protocol was to cook the herbs in water and drink the decoction in two to three equally-divided doses. Of 30 patients, the study reported complete recovery in 10 patients, significant improvement in 14 patients, and no effect in 6 patients.¹¹

9. Leukopenia: Twenty-six patients with decreased white blood cells count were effectively treated using *Huang Qi Jian Zhong Tang* plus *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity). In addition, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Dang Gui* (Radix Angelicae Sinensis) were added for dizziness and fatigue; *Dang Shen* (Radix Codonopsis) and *Fu Ling* (Poria) for soreness and weakness of the extremities; *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and *Yuan Zhi* (Radix Polygalae) for insomnia and palpitations; and *Huang Qi* (Radix Astragali) and *Huang Lian* (Rhizoma Coptidis) at large doses for frequent recurrences of infection. After 10-20 days of herbal therapy, the study reported complete recovery in 17 patients, improvement in 6 patients, and no benefit in 3 patients.¹²

10. Athletic performance: According to one study of 12 athletes randomly separated into a control group (treated with placebos) and the experimental group (treated with herbs), use of *Huang Qi Jian Zhong Tang* for 8 weeks was associated with effectively increasing time before exhaustion, positively influencing anaerobic threshold, and enhancing recovery from fatigue by increasing the uptake and the systemic utilization of oxygen.¹³

11. Lead poisoning: Use of this formula had a beneficial effect in treating 42 patients with chronic lead poisoning. Clinical improvements included relief of pain and reduced duration of treatment.¹⁴

TOXICOLOGY

According to one study on acute toxicology, the LD₅₀ for subcutaneous injection of this formula in decoction form is 48 g/kg in mice.¹⁵

COMPOSITION

<i>Dang Gui</i> (Radix Angelicae Sinensis)	12g
<i>Huang Qi</i> (Radix Astragali)	4.5g [12g]
<i>Yi Tang</i> (Maltosum)	1 cup [30g]
<i>Bai Shao</i> (Radix Paeoniae Alba), <i>chao</i> (dry-fried) with liquor	18g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g
<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>qie</i> (sliced)	9g
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	12 pieces [4 pieces]

DOSAGE / PREPARATION / ADMINISTRATION

Prepare the ingredients as a decoction. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi and blood
2. Promotes generation of muscle tissues
3. Eases pain

CLINICAL MANIFESTATIONS

Abscesses and ulcerations with underlying qi and blood deficiencies: various types of abscesses and ulcerations, mild inflammation, small amounts of pus and discharge.

CLINICAL APPLICATIONS

Chronic abscess and ulceration of the skin, chronic otitis media, allergic rhinitis or sinusitis, spontaneous or night perspiration, and postpartum women with weakness, deficiency, and abdominal coldness and pain.

EXPLANATION

Gui Qi Jian Zhong Tang (Tangkuei and Astragalus Decoction to Construct the Middle) treats chronic abscesses and ulcerations with underlying qi and blood deficiencies. Chronic abscesses or ulcerations are often complicated by inflammation and formation and discharge of pus in the local area. Inflammation causes irritation to the nerve endings and results in pain and muscle spasms. Due to the chronic nature of the illness, most of these patients also have underlying qi and blood deficiencies. This formula tonifies the underlying qi and blood deficiencies, supplies

nutrients to the affected area, and promotes generation of tissue to facilitate recovery.

Dang Gui (Radix Angelicae Sinensis) and *Huang Qi* (Radix Astragali) are the chief herbs; they tonify blood and qi to treat the underlying deficiencies and facilitate recovery. Moreover, *Dang Gui* (Radix Angelicae Sinensis) improves blood circulation to enhance healing and *Huang Qi* (Radix Astragali) promotes generation of flesh and new muscle tissues. Together, these two herbs effectively treat abscesses and ulcerations. *Yi Tang* (Maltosum) tonifies deficiency and strengthens the middle *jiao*. It supplies large amounts of essential nutrients to facilitate recovery from chronic illnesses. *Bai Shao* (Radix Paeoniae Alba) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), two herbs in *Shao Yao Gan Cao Tang* (Peony and Licorice Decoction), ease pain and relieve muscle spasms and cramps. Because patients with chronic qi and blood deficiencies may develop abdominal pain due to yang deficiency, warm herbs such as *Gui Zhi* (Ramulus Cinnamomi), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Da Zao* (Fructus Jujubae) are used to warm the middle *jiao* and relieve abdominal pain.

MODIFICATIONS

- If there are prominent signs of cold, add *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Xi Xin* (Radix et Rhizoma Asari).
- When there is infection of the abscesses and ulcerations, add *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins).

(Tangkuei and Astragalus Decoction to Construct the Middle)

Gui Qi Jian Zhong Tang (Tangkuei and Astragalus Decoction to Construct the Middle)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Abscesses and ulcerations with qi and blood deficiencies	Chronic abscesses and ulcerations that do not heal: qi and blood deficiencies	<ul style="list-style-type: none"> • Tonifies qi and blood • Promotes generation of muscle tissues • Eases pain 	<ul style="list-style-type: none"> • <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Huang Qi</i> (Radix Astragali) tonify blood and qi to treat the underlying deficiencies and facilitate recovery. • <i>Yi Tang</i> (Maltosum) tonifies deficiency and strengthens the middle <i>jiao</i>. • <i>Bai Shao</i> (Radix Paeoniae Alba) and <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) ease pain and relieve muscle spasms and cramps. • <i>Gui Zhi</i> (Ramulus Cinnamomi), <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Da Zao</i> (Fructus Jujubae) warm the middle <i>jiao</i> and relieve pain.

AUTHORS' COMMENTS

Gui Qi Jian Zhong Tang is a variation of *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction), but it has additional ingredients and significantly different applications.

- *Xiao Jian Zhong Tang* also warms and tonifies the middle, but primarily treats yang deficiency of the middle *jiao* with abdominal pain.

- *Gui Qi Jian Zhong Tang*, as the name implies, contains *Dang Gui* (Radix Angelicae Sinensis) and *Huang Qi* (Radix Astragali) to “construct the middle” by tonifying the blood and qi, which, in turn, strengthen the body and enhance recovery from abscesses and ulcerations.

Dà Jiàn Zhōng Tāng (Major Construct the Middle Decoction)

大建中湯

大建中汤

Pinyin Name: *Da Jian Zhong Tang*

Literal Name: Major Construct the Middle Decoction

Alternate Names: *Ta Chien Chung Tang*, *Da Jian Zhong Tang*, Major Centre-Fortifying Decoction, Major Middle-Strengthening Decoction, Major Zanthoxylum Combination

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

Hua Jiao (Pericarpium Zanthoxyli), *chao* (dry-fried)

0.2 cup [3g]

Gan Jiang (Rhizoma Zingiberis)

12g [4.5g]

Ren Shen (Radix et Rhizoma Ginseng)

6g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients in 4 cups [800 mL] of water until 2 cups [400 mL] of the liquid remain. Filter and discard the herb residue, add 1 cup [30g] of *Yi Tang* (Maltosum)

to the strained liquid, and cook it over low heat until 1.5 cups [300 mL] of liquid remain. Take the warm, strained decoction in two equally-divided doses daily. The source text also recommends taking 2 cups [400 mL] of porridge

Dà Jiàn Zhōng Tāng (Major Construct the Middle Decoction)

between the two doses of herbs and throughout the day, and to cover the body with blankets. Today, the decoction is normally prepared by using the doses suggested in brackets and by cooking the herbs twice. Filter and discard the herb residue, and add 3g of *Yi Tang* (Maltosum) to the strained liquid. Take the warm decoction in two equally-divided doses.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies and warms the middle *jiao*
2. Corrects the reversed flow of qi and relieves pain

CLINICAL MANIFESTATIONS

Yang deficiency of the middle *jiao* with proliferation of yin and cold: severe coldness and pain in the chest and epigastrium; vomiting with inability to eat; superficial skin pulsations throughout the abdomen; severe pain in the head and feet; a white, wet tongue coating; and a thin, tight pulse. In severe cases, cold limbs, a hidden pulse, or the type of irregular peristalsis that sounds like water movement in the abdominal cavity may be present.

CLINICAL APPLICATIONS

Gastritis, gastric ulcer, duodenal ulcer, slow motility of the intestines, intestinal spasms, uncomplicated intestinal obstruction, obstructive bowel disease, post-operative ileus, abdominal pain due to intestinal parasites, ascariasis, pancreatitis, cholecystitis, cholelithiasis, and urolithiasis.

EXPLANATION

Da Jian Zhong Tang (Major Construct the Middle Decoction) treats various pains/irregularities caused by yang deficiency and interior cold. Yang deficiency leads to yin excess, which then leads to proliferation of cold. Interior cold causes constriction and reversed flow of qi, resulting in severe coldness and pain in the chest and epigastrium, vomiting with inability to eat, and in some cases, superficial skin pulsations throughout the abdomen and severe

pain in the head and feet. The type of irregular peristalsis that sounds like water movement in the abdominal cavity is due to accumulation of water and cold in the abdomen. A white, wet tongue coating suggests that the amount of water in the body is higher than normal due to deficiency of yang and cold accumulation.

Da Jian Zhong Tang uses *Hua Jiao* (Pericarpium Zanthoxyli) as the chief herb. It is acrid and hot, and has functions to dispel cold and warm the Spleen and Stomach. *Gan Jiang* (Rhizoma Zingiberis) also warms the middle *jiao* and dispels cold. Together these two herbs raise the yang of the middle *jiao*, correct the reversed flow of qi, relieve pain, and stop vomiting. *Ren Shen* (Radix et Rhizoma Ginseng) and *Yi Tang* (Maltosum) both warm and tonify the Spleen and Stomach.

MODIFICATIONS

- With nausea and vomiting, add *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- If there is severe coldness and pain in the chest and epigastric regions, add *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Xi Xin* (Radix et Rhizoma Asari).
- With coldness and pain in the abdominal region, combine with *Li Zhong Tang* (Regulate the Middle Decoction).
- With fullness and pain in the abdominal region, add *Hou Po* (Cortex Magnoliae Officinalis) and *Ku Xing Ren* (Semen Armeniacae Amarum).
- With nausea, vomiting, and severe abdominal pain, combine with *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium).
- With headache due to cold, add *Wu Zhu Yu* (Fructus Evodiae).

CAUTIONS / CONTRAINDICATIONS

- *Da Jian Zhong Tang* contains many warm herbs, and should not be used to treat abdominal pain characterized by excess heat, damp-heat, or yin-deficient heat.

Da Jian Zhong Tang (Major Construct the Middle Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Yang deficiency of the middle <i>jiao</i> with proliferation of yin and cold	<ul style="list-style-type: none"> • Severe coldness and pain in the chest, head and feet: proliferation of yin and cold causing constriction and stagnation • Vomiting with inability to eat: proliferation of yin and cold leading to reversed flow of qi upwards • White, wet tongue: water accumulation due to deficiency of yang and excess of cold • Thin, tight pulse: deficiency of yang and excess of cold 	<ul style="list-style-type: none"> • Tonifies and warms the middle <i>jiao</i> • Corrects reversed flow of qi and relieves pain 	<ul style="list-style-type: none"> • <i>Hua Jiao</i> (Pericarpium Zanthoxyli) and <i>Gan Jiang</i> (Rhizoma Zingiberis) warms the Spleen and Stomach and dispels cold. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Yi Tang</i> (Maltosum) both warm and tonify the Spleen and Stomach.

Dà Jiàn Zhōng Tāng (Major Construct the Middle Decoction)

- Due to the warm nature of this formula, overdose may lead to such side effects as non-productive cough, edema, nausea, and vomiting.

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** Administration of *Da Jian Zhong Tang* was associated with accelerated movement of the small intestine.¹ Increased intestinal motility occurred as a result of *Da Jian Zhong Tang* stimulating the cholinergic and 5-hydroxytryptamine-3 receptors.^{2,3} The stimulating effect can be blocked by atropine, spantide, tetrodotoxin or capsazepine.⁴ Another study reported that administration of *Da Jian Zhong Tang* has a dose-dependent effect to increase intestinal blood flow without affecting the mean arterial blood pressure. These studies suggested that *Da Jian Zhong Tang* may be useful in the treatment of uncomplicated post-operative adhesive intestinal obstruction and intestinal ischemia-related diseases.^{5,6}
2. **Effect on gallbladder:** According to laboratory studies in rats, administration of *Da Jian Zhong Tang* was associated with a stimulating effect on the production of bile acid, starting after 30 minutes and ending 4 hours after the administration.⁷
3. **Uterine:** Administration of *Da Jian Zhong Tang* via intraduodenal or intravenous routes in anaesthetized rabbits was associated with intestinal motility but not the uterine motility. This suggests that *Da Jian Zhong Tang* has a selective stimulatory effect on the gastrointestinal tract, but not on the uterus. However, more studies are needed to determine whether *Da Jian Zhong Tang* could be administered during pregnancy.⁸

CLINICAL STUDIES AND RESEARCH

1. **Intestinal obstruction:** In one report, 10 patients (6 males and 4 females, between 59 and 75 years of age, average age of 64.4 years) with intestinal obstruction due to adhesion were treated with herbs for prevention of recurrent attack. Out of 10 patients, 6 received *Da Jian Zhong Tang*, 4 received concurrent *Da Jian Zhong Tang* and *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction). The study reported that 9 out of 10 patients responded well with no recurrent attacks in 8, 12, and 15 months follow-up exams. The other patient continued to take the herbs, but experienced nausea and vomiting.⁹
2. **Obstructive bowel disease:** One study used *Da Jian Zhong Tang* to treat 46 pediatric patients with various obstructive bowel diseases accompanied with chronic constipation (post-operative ileus, large abdominal surgery, ano-rectal anomaly, Hirschsprung's disease, functional bowel obstructions, and SMA syndrome). The treatment protocol was to mix 0.1-0.15 g/kg of the formula with 5-10 mL of warm water, and administer

orally two to three times a day. Of 46 cases, the study reported effective treatment in 39 cases (85%) and ineffective in 7 cases. No side effects were observed.¹⁰

3. **Post-operative ileus:** In one study, administration of *Da Jian Zhong Tang* was associated with marked effect to treat post-operative ileus, generally considered as an inevitable adverse consequence of abdominal surgical procedures. The treatment protocol was to administer 15g of *Da Jian Zhong Tang* orally daily for 14 days. Clinical improvements included reducing both the need for further surgery and the recurrence of post-operative ileus.¹¹ In another study, repeated administrations of *Da Jian Zhong Tang* (100 or 300 mg/kg) significantly inhibited the formation of intestinal obstruction, and prevented post-operative ileus following laparotomy. The mechanism of this effect was attributed to the gastroprokinetic and anti-inflammatory effects of the formula.¹²
4. **Post-surgical treatment:** In one study, *Da Jian Zhong Tang* was used to treat 23 patients with various types of complaints following an abdominal surgery. The study reported that the formula was effective in treating borborygmus, abdominal pain, and gastric distention associated with abdominal surgery.¹³
5. **Feelings of coldness in the abdomen:** *Da Jian Zhong Tang* has been used to treat yang deficiency and a feeling of coldness in the abdomen in traditional Chinese medicine. The pharmacological explanation of this application is attributed to the stimulatory effect of *Da Jian Zhong Tang* to increased 5-hydroxytryptamine (serotonin; 5-HT) levels and vasoactive intestinal peptide-immunoreactive substance secretion in the abdomen.¹⁴
6. **Ascariasis:** One report stated that administration of modified *Da Jian Zhong Tang* was effective in treating biliary ascariasis in 39 of 45 patients.¹⁵ Another study reported successful treatment in all 8 patients with biliary ascariasis.¹⁶

HERB-DRUG INTERACTION

- **Antipsychotic drugs:** Eight patients with recurrent constipation and/or intestinal obstruction caused by use of antipsychotic drugs were treated with good success using *Da Jian Zhong Tang*. Of 8 cases, the study reported significant improvement in 4 cases, moderate improvement in 2 cases, and no change in 2 cases.¹⁷
- **Chlorpromazine-induced hypoperistalsis:** Chlorpromazine-induced hypoperistalsis can be treated effectively with *Da Jian Zhong Tang*, which has a dose-dependent effect to improve small intestinal peristalsis and distal colonic propulsion. *Hua Jiao* (Pericarpium Zanthoxyli) is believed to be the main ingredient that stimulates the cholinergic system, thereby enabling *Da Jian Zhong Tang* to improve chlorpromazine-induced hypoperistalsis.¹⁸

Dà Jiàn Zhōng Tāng (Major Construct the Middle Decoction)

- **Morphine-induced constipation:** Administration of *Da Jian Zhong Tang* was found to be effective in alleviating severe constipation in cancer patients taking morphine to relieve pain. Use of *Da Jian Zhong Tang* did not alter the anti-nociceptive effect of morphine.¹⁹

AUTHORS' COMMENTS

In theory, sweet herbs should not be administered to patients experiencing vomiting. *Da Jian Zhong Tang*, however, contains a large amount of *Yi Tang* (Maltosum) but does not create additional disharmony because the vomiting described in this formula is not due to damp accumulation; rather, it is the result of cold accumulation disrupting the normal qi-lowering tendency of the Stomach. For that reason, *Yi Tang* (Maltosum) is used to harmonize the middle and relieve pain. Although it is sweet, it will not create more dampness and worsen the condition.

Xiao Jian Zhong Tang (Minor Construct the Middle Decoction) and *Da Jian Zhong Tang* both tonify and warm the middle to dispel cold and relieve pain. However, these two formulas have different compositions, functions, and indications.

- *Xiao Jian Zhong Tang* contains mainly sweet herbs to tonify, along with a large amount of the sour and slightly cold *Bai Shao* (*Radix Paeoniae Alba*) to relieve middle *jiao* pain. Its chief function is to tonify yang, qi, and blood, and warm the middle *jiao*.
- *Da Jian Zhong Tang* contains mainly acrid and sweet herbs to strengthen the middle *jiao*. It is weaker in harmonizing and tonifying but stronger in dispelling coldness. It is mainly used for middle *jiao* yang deficiency with excess cold accumulation.²⁰

Ān Zhōng Sǎn (Calm the Middle Powder)

安中散

Pinyin Name: *An Zhong San*

Literal Name: Calm the Middle Powder

Alternate Names: *An Chung San*, *An Zhung San*, Interior Comforting Formula, Fennel and Galanga Formula

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae), <i>chao</i> (dry-fried)	30g
<i>Gao Liang Jiang</i> (Rhizoma Alpiniae Officinarum), <i>chao</i> (dry-fried)	15g
<i>Gan Jiang</i> (Rhizoma Zingiberis), <i>pao</i> (blast-fried)	15g
<i>Rou Gui</i> (Cortex Cinnamomi)	15g
<i>Xiao Hui Xiang</i> (Fructus Foeniculi), <i>chao</i> (dry-fried)	15g
<i>Yan Hu Suo</i> (Rhizoma Corydalis)	15g
<i>Mu Li</i> (Concha Ostreae), <i>duan</i> (calcined)	12g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder, and take 6g of powder with a warm, grain-based liquor or lightly-salted water. Women should take this formula with water and a small amount of vinegar. Today, this formula is given in powder or decoction form. For powder, take 1-2g per dose two to three times daily. For decoction, cook the ingredients in water, and take the warm, strained decoction in two equally-divided doses daily.

Note: There are two variations of this formula. The standard formula is listed above, the variation contains *Sha Ren* (Fructus Amomi) in place of *Gan Jiang* (Rhizoma Zingiberis).

CHINESE THERAPEUTIC ACTIONS

1. Warms the Spleen and Stomach to disperse cold
2. Harmonizes the middle *jiao* to stop nausea
3. Regulates qi and blood circulation to relieve pain

CLINICAL MANIFESTATIONS

Deficiency and cold of the Spleen and Stomach with qi and blood stagnation: cramps and pain in the epigastric region, fullness and distention of the chest and hypochondriac region, acid reflux, nausea, vomiting, a sallow facial appearance, and fatigue.

CLINICAL APPLICATIONS

Generalized discomfort, cramping and pain in the epigastric region, stress-related gastric and duodenal ulcer, acid reflux, gastric prolapse, chronic gastritis, pyloric stenosis, menstrual pain and cramps, and dysmenorrhea.

EXPLANATION

An Zhong San (Calm the Middle Powder) treats deficiency and cold of the Spleen and Stomach with qi stagnation. Deficiency and cold of the middle *jiao* causes symptoms such as cramps and pain in the epigastric region, fullness and distention of the chest and hypochondriac region, a

An Zhong San (Calm the Middle Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Deficiency and cold of the Spleen and Stomach accompanied by qi and blood stagnation	<ul style="list-style-type: none">• Cramps and pain, fullness and distention, a sallow facial appearance, and fatigue: deficiency and cold of the middle <i>jiao</i>• Acid reflux, nausea, and vomiting: reversed flow of qi	<ul style="list-style-type: none">• Warms the Spleen and Stomach to disperse cold• Harmonizes the middle <i>jiao</i>• Regulates qi and blood circulation	<ul style="list-style-type: none">• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonifies the Spleen and relieves pain.• <i>Gao Liang Jiang</i> (Rhizoma Alpiniae Officinarum), <i>Gan Jiang</i> (Rhizoma Zingiberis) and <i>Rou Gui</i> (Cortex Cinnamomi) warm the middle <i>jiao</i> and dispel cold.• <i>Xiao Hui Xiang</i> (Fructus Foeniculi) and <i>Yan Hu Suo</i> (Rhizoma Corydalis) regulate qi and blood circulation to relieve pain.• <i>Mu Li</i> (Concha Ostreae) relieves pain in the stomach due to excessive amount of stomach acid.

Ān Zhōng Sǎn (Calm the Middle Powder)

sallow facial appearance, and fatigue. Deficiency and cold cause reversed flow of qi, resulting in acid reflux, nausea, and vomiting. Pain reflects the presence of cold with qi and blood stagnation.

Gan Cao (Radix et Rhizoma Glycyrrhizae) is used in a large dose to tonify the Spleen and moderate pain. *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum), *Gan Jiang* (Rhizoma Zingiberis) and *Rou Gui* (Cortex Cinnamomi) warm the middle *jiao* and dispel cold. *Xiao Hui Xiang* (Fructus Foeniculi) and *Yan Hu Suo* (Rhizoma Corydalis) regulate qi and blood circulation to relieve pain. *Mu Li* (Concha Ostreae) relieves pain in the stomach due to excessive amount of stomach acid.

MODIFICATIONS

- With palpitations associated with mild physical exertion, add *Fu Ling* (Poria).
- With hyperacidity, add *Ping Wei San* (Calm the Stomach Powder) or *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium).
- With food stagnation, add *Shen Qu* (Massa Fermentata), *Zhi Shi* (Fructus Aurantii Immaturus), and *Hou Po* (Cortex Magnoliae Officinalis).

- With nausea and vomiting, add *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria).
- For chronic stomach disorders, add *Liu Jun Zi Tang* (Six-Gentlemen Decoction).

CAUTIONS / CONTRAINDICATIONS

An Zhong San is not recommended for chest or abdominal pain caused by inflammation.

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** Administration of *An Zhong San* in powder or decoction form was associated with a decrease of gastric acid production, and a resultant increase of pH in the stomach.^{1,2}
2. **Cholagogic:** Administration of alcohol extract of *An Zhong San* at 500 mg/kg in rats was associated with marked increase in the secretion of bile acid. The initial onset of action was 30 minutes, and the duration of action was approximately 4 hours.³

回阳救逆剂

— Yang-Resuscitating Formulas

Sì Nì Tāng (Frigid Extremities Decoction)

四逆湯

四逆汤

Pinyin Name: *Sì Nì Tāng***Literal Name:** Frigid Extremities Decoction**Alternate Names:** *Su Nì Tāng*, Counterflow Cold Combination, Cold Limbs Decoction, Aconite Ginger and Licorice Combination**Original Source:** *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-jing in the Eastern Han Dynasty**COMPOSITION***Sheng Fu Zi* (Radix Aconiti Lateralis)

1 piece [6-9g]

Gan Jiang (Rhizoma Zingiberis)

4.5g [6-9g]

Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)

6g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients in 3 cups [600 mL] of water until 1.2 cups [240 mL] of the liquid remain. Take the warm, strained decoction in two equally-divided doses daily. For patients with a strong constitution, a large piece (15g) of *Sheng Fu Zi* (Radix Aconiti Lateralis) and 9g of *Gan Jiang* (Rhizoma Zingiberis) may be used. Today, the decoction may be prepared using the doses suggested in brackets. *Sheng Fu Zi* (Radix Aconiti Lateralis) should be cooked first for one hour before adding and cooking the other herbs. The decoction should be taken while warm.

CHINESE THERAPEUTIC ACTIONS

1. Restores depleted yang
2. Rescues from counterflow cold

CLINICAL MANIFESTATIONS

1. *Shaoyin* syndrome: severely cold extremities, aversion to cold, preference to curl up the body when lying down, lassitude, drowsiness, vomiting, absence of thirst, abdominal pain, diarrhea, a white, slippery tongue coating, and a faint, fine pulse.
2. Depletion of yang due to excessive sweating in *taiyang* syndrome.

CLINICAL APPLICATIONS

Prostration, cardiac failure, cardiac infarction, shock, diarrhea, gastroenteritis, intoxication, and stomach prolapse.

EXPLANATION

Sì Nì Tāng (Frigid Extremities Decoction) is a standard formula used to treat *shaoyin* syndrome in which coldness has progressed to the *shaoyin* stage and Kidney yang is diminished and depleted. This extreme imbalance of yin and yang causes disharmony at the exterior (icy cold extremities, aversion to cold, preference to curl up the body when lying down, lassitude, and drowsiness) and in the interior (vomiting, absence of thirst, abdominal pain, and diarrhea with undigested food). A white, wet tongue coating and an indistinct faint and fine pulse suggest depletion of yang and proliferation of yin and coldness.

Proper treatment of this condition requires high doses of acrid and hot interior-warming herbs to restore yang and rescue from counterflow cold. *Sheng Fu Zi* (Radix Aconiti Lateralis), the chief herb, is an essential herb for warming *ming men* (life gate) fire and raising Kidney yang. It warms all twelve channels immediately and strongly dispels

Sì Nì Tāng (Frigid Extremities Decoction)

Si Ni Tang (Frigid Extremities Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Shaoyin syndrome	<ul style="list-style-type: none"> Icy cold extremities, aversion to cold, preference to curl up the body when lying down, lassitude, and drowsiness: excess cold and yang deficiency at the exterior Vomiting, absence of thirst, abdominal pain, and diarrhea with undigested food: excess cold and yang deficiency in the interior 	<ul style="list-style-type: none"> Recuperates depleted yang Rescues from counterflow cold 	<ul style="list-style-type: none"> <i>Sheng Fu Zi</i> (Radix Aconiti Lateralis) warms <i>ming men</i> (life gate) fire, raises Kidney yang, and warms all twelve channels and dispels interior coldness. <i>Gan Jiang</i> (Rhizoma Zingiberis) warms middle <i>jiao</i> yang and dispels interior cold. <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the formula.

interior cold. The fresh, unprocessed form is used here because interior cold must be dispelled at once. Due to the urgency of the situation, the fresh, unprocessed *Sheng Fu Zi* (Radix Aconiti Lateralis) is selected for its potent and drastic effect over the processed *Fu Zi* (Radix Aconiti Lateralis Praeparata). *Gan Jiang* (Rhizoma Zingiberis), the deputy herb, warms middle *jiao* yang and dispels interior cold. The warmth of *Sheng Fu Zi* (Radix Aconiti Lateralis) is further enhanced by the addition of *Gan Jiang* (Rhizoma Zingiberis). Lastly, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) reduces the toxicity of *Sheng Fu Zi* (Radix Aconiti Lateralis), and moderates the harsh and warm properties of *Gan Jiang* (Rhizoma Zingiberis) and *Sheng Fu Zi* (Radix Aconiti Lateralis).

MODIFICATIONS

- When there is extreme coldness of the extremities, add *Xi Xin* (Radix et Rhizoma Asari) and *Gui Zhi* (Ramulus Cinnamomi).
- If there is abdominal pain due to cold, add *Gui Zhi* (Ramulus Cinnamomi) and *Bai Shao* (Radix Paeoniae Alba).
- If there is abdominal pain due to blood deficiency, combine with *Si Wu Tang* (Four-Substance Decoction).
- With edema and palpitations, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Fu Ling* (Poria).
- With edema or clear or white vaginal discharge from Spleen and Kidney yang deficiencies, add *Dang Shen* (Radix Codonopsis), *Fu Ling* (Poria), and *Ze Xie* (Rhizoma Alismatis).
- With nausea, vomiting, and a sore throat, add *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Jie Geng* (Radix Platycodonis).
- With diarrhea accompanied by undigested food, combine with *Li Zhong Tang* (Regulate the Middle Decoction).
- With shortness of breath or accelerated respiration from qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng).

CAUTIONS / CONTRAINDICATIONS

- Si Ni Tang* is an extremely hot formula, and is contraindicated in cases of true-heat and false-cold conditions.
- Si Ni Tang* should be stopped immediately after the hands and feet have warmed up.

PHARMACOLOGICAL EFFECTS

- Cardiovascular:** Administration of *Si Ni Tang* was associated with a marked influence on the cardiovascular system. In laboratory studies on rabbits, it increased the contractile force of the heart, increased blood pressure, and restored normal heart rhythm.¹
- Immunostimulant:** Administration of *Si Ni Tang* was associated with an effect to enhance the immune system. In one experiment, the immune systems of rats were artificially suppressed with injection of hydrocortisone at 1.5 mg/100g/day for 7 days. The rats that also received the herbs in decoction were able to maintain their IgG count at a higher level in comparison to the rats that received only the hydrocortisone.²
- Analgesic and anti-inflammatory:** Intraperitoneal injection of *Si Ni Tang* was associated with marked analgesic and anti-inflammatory effects in rats.³
- Half-life:** According to pharmacokinetic studies using a two-compartment model, the half-life of *Si Ni Tang* is 5.8 hours.⁴

CLINICAL STUDIES AND RESEARCH

- Acute cardiac infarction:** In one report, 105 patients with acute cardiac infarction characterized by collapse of yang were treated with *Si Ni Tang* or with slight modification without a single case of fatality. Of 105 patients, 10 received concurrent herbal and drug treatments. The therapeutic benefit was attributed to the effect of the formula to increase blood pressure and the contractile force of the heart.⁵
- Diarrhea:** Seventy children with diarrhea characterized by watery stools, cold extremities, a weak pulse, and a thin, white tongue coating were treated with a decoction

Sì Nì Tāng (Frigid Extremities Decoction)

of *Si Ni Tang* with the addition of *Huang Lian* (Rhizoma Coptidis). Out of 70 cases, the study reported complete recovery in 58 cases (less than 3 bowel movements per day), slight improvement in 8 cases (less than 5 bowel movements per day), and no change in 4 cases. The average length of treatment was 4 days, and ranged from 1-7 days.⁶

- Gastric prolapse:** Seven patients with stomach prolapse were treated with modified *Si Ni Tang* with marked improvement in all of the patients. The modification included addition of *Rou Gui* (Cortex Cinnamomi), *Zhang Mu Zi* (Fructus Camphora), and *Wu Zhu Yu* (Fructus Evodiae) for abdominal pain; *Zhi Zi* (Fructus Gardeniae), *Mu Xiang* (Radix Aucklandiae), and *Hou Po* (Cortex Magnoliae Officinalis) for abdominal distention; *Sha Ren* (Fructus Amomi) and *Ban Xia* (Rhizoma Pinelliae) for nausea; and *Shan Zha* (Fructus Crataegi) and *Mai Ya* (Fructus Hordei Germinatus) for belching.⁷

TOXICOLOGY

In a toxicology study, *Si Ni Tang* was prepared using the herbs in the proportion of *Sheng Fu Zi* (Radix Aconiti Lateralis) *Gan Jiang* (Rhizoma Zingiberis) *Gan Cao* (Radix et Rhizoma Glycyrrhizae) as 4:3:3. The LD₅₀ of *Si Ni Tang* in mice is 5.821 g/kg via intraperitoneal injection and 71.78 g/kg via oral ingestion. The LD₅₀ for *Sheng Fu Zi* (Radix Aconiti Lateralis) is 17.42 g/kg via oral ingestion. The subject was able to tolerate a larger dose of *Sheng Fu Zi* (Radix Aconiti Lateralis) when given in a combination, indicating that *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Gan Jiang* (Rhizoma Zingiberis) can effectively reduce the toxicity of *Sheng Fu Zi* (Radix Aconiti Lateralis). The reduced toxicity of the formula was not associated with changes in concentration of the alkaloids.⁸

RELATED FORMULAS

Sì Nì Jiā Rén Shēn Tāng

(Frigid Extremities Decoction plus Ginseng)

四逆加人參湯

四逆加人參湯

Pinyin Name: *Si Ni Jia Ren Shen Tang*

Literal Name: Frigid Extremities Decoction plus Ginseng

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

Ren Shen (Radix et Rhizoma Ginseng) 3g

Sheng Fu Zi (Radix Aconiti Lateralis) 1 piece [6-9g]

Gan Jiang (Rhizoma Zingiberis) 4.5g [6-9g]

Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae

Praeparata cum Melle) 6g [9g]

Cook the ingredients in 3 cups [600 mL] of water until 1.2 cups [240 mL] of the liquid remain. Take the warm, strained decoction in two equally-divided doses daily. Today, the decoction may be prepared using the doses suggested in brackets

Si Ni Jia Ren Shen Tang (Frigid Extremities Decoction plus Ginseng) combines *Si Ni Tang* with *Ren Shen* (Radix et Rhizoma Ginseng). *Ren Shen* (Radix et Rhizoma Ginseng) is added in this case to tonify *yuan* (source) *qi* in patients with severe *qi* deficiency. This formula tonifies *yuan* (source) *qi*, recuperates depleted yang, and rescues the patient from collapse. Clinically, the patient may have shortness of breath and rapid breathing in addition to all the symptoms and signs listed in *Si Ni Tang*.

In comparison to *Si Ni Tang*, *Si Ni Jia Ren Shen Tang* (Frigid Extremities Decoction plus Ginseng) has a much stronger function to tonify *yuan* (source) *qi*. Therefore, it can be used on patients who have *shaoyin* cold syndrome complicated by shortness of breath and rapid breathing.

Pinyin Name: *Tong Mai Si Ni Tang*

Literal Name: Unblock the Pulse Decoction for Frigid Extremities

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorder) by Zhang Zhong-Jing in the Eastern Han Dynasty

Zhi Gan Cao (Radix et Rhizoma Glycyrrhizae

Praeparata cum Melle) 6g

Sheng Fu Zi (Radix Aconiti Lateralis) 1 large piece [15g]

Gan Jiang (Rhizoma Zingiberis) 9g [9-12g]

Cook the ingredients in 3 cups [600 mL] of water until 1.2 cups [240 mL] of the liquid remain. Take the warm, strained decoction in two equally-divided doses daily. Today, the decoction may be prepared using the doses suggested in brackets.

Tōng Mài Sì Nì Tāng (Unblock the Pulse Decoction for Frigid Extremities) treats *shaoyin* syndrome with severe yang deficiency, leading to yang on the verge of separating from yin. Clinically, the patient still has cold extremities, but now he or she will no longer have aversion to cold. Instead, there will be a red face, a cold sensation in the interior, and a warm sensation at the exterior, abdominal pain, sore throat, absence of diarrhea or diarrhea with

Sì Nì Tāng (Frigid Extremities Decoction)

undigested food, and a fainting pulse. All these symptoms and signs point to the fact that yang is separating from yin and rushing out to the exterior, exemplified by signs of heat at the exterior and cold in the interior. This is a true-cold and false-heat syndrome, with presence of true cold in the interior and symptoms of false heat at the exterior. Thus, to stop yang from separating from yin, large doses of *Sheng Fu Zi* (Radix Aconiti Lateralis) and *Gan Jiang* (Rhizoma Zingiberis) are used to tonify yang.

In comparison to *Si Ni Tang*, *Tong Mai Si Ni Tang* (Unblock the Pulse Decoction for Frigid Extremities) is a stronger formula used for more serious cases of *shaoyin* syndrome with severe yang deficiency, in which yang is on the verge of separating from yin. Both formulas contain the same ingredients, but the doses are greater in the latter formula to address the true-cold, false-heat syndrome.

Bái Tōng Tāng (White Penetrating Decoction)

白通湯
白通汤

Pinyin Name: *Bai Tong Tang*

Literal Name: White Penetrating Decoction

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

<i>Cong Bai</i> (Bulbus Allii Fistulosi)	4 pieces
<i>Gan Jiang</i> (Rhizoma Zingiberis)	3g [3-5g]
<i>Sheng Fu Zi</i> (Radix Aconiti Lateralis)	1 piece [6-9g]

Cook the ingredients in 3 cups [600 mL] of water until 1 cup [200 mL] of the liquid remains. Take the warm, strained decoction in two equally-divided doses daily. Today, the decoction may be prepared using the doses suggested in brackets

Bai Tong Tang (White Penetrating Decoction) mainly treats *shaoyin* syndrome characterized by severe diarrhea and a fainting pulse. *Cong Bai* (Bulbus Allii Fistulosi) and *Sheng Fu Zi* (Radix Aconiti Lateralis) tonify yang qi and dispel cold. The dose of *Gan Jiang* (Rhizoma Zingiberis), which is acrid and drying, has been decreased to avoid further yin damage since patients with severe diarrhea may already have yin and body fluid deficiencies.

In comparison to *Si Ni Tang*, *Bai Tong Tang* (White Penetrating Decoction) emphasizes treating *shaoyin* syndrome with excess yin and cold affecting the lower *jiao*. Clinical manifestations include severe diarrhea in addition to all the symptoms and signs listed in *Si Ni Tang*.

Shēn Fù Tāng

(Ginseng and Prepared Aconite Decoction)

參附湯
参附汤

Pinyin Name: *Shen Fu Tang*

Literal Name: Ginseng and Prepared Aconite Decoction

Original Source: *Zheng Ti Lei Yao* (Catalogued Essentials for Correcting the Body) by Bi Li-Zhai (Ji) in 1529

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	12g [9g]
<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata), pao (blast-fried)	9g [6g]

Prepare the ingredients as a decoction. Today, the decoction may be prepared using the doses suggested in brackets.

This formula treats collapse of yang qi with profuse sweating, cold hands and feet, dizziness, shortness of breath, and even semi-unconsciousness. Collapse of yang qi occurs after severe illness with extreme deficiency, profuse bleeding in postpartum or *beng lou* (flooding and spotting) conditions, severe hemorrhage, and others.

Shen Fu Tang (Ginseng and Prepared Aconite Decoction) has only two ingredients. *Ren Shen* (Radix et Rhizoma Ginseng) tonifies *yuan* (source) qi and restore yang from collapse. *Fu Zi* (Radix Aconiti Lateralis Praeparata) warms yang qi and resuscitates the patient. This formula should be used only in emergency conditions. In severe instances, the doses listed above could be doubled. However, this formula only serves to quickly restore yang and should not be used once the patient has regained consciousness; otherwise, interior fire may be created.

AUTHORS' COMMENTS

Si Ni Tang is the representative formula for restoring depleted yang and rescuing patients from collapse. The original *Si Ni Tang* contains unprocessed *Sheng Fu Zi* (Radix Aconiti Lateralis) to utilize its potent effects to dispel cold and restore yang. However, *Sheng Fu Zi* (Radix Aconiti Lateralis) is rather toxic, and is generally unavailable. Therefore, 20-30 grams of processed *Fu Zi* (Radix Aconiti Lateralis Praeparata) may be used to replace 5-10 grams of *Sheng Fu Zi* (Radix Aconiti Lateralis).

Si Ni Tang (Frigid Extremities Decoction) and *Si Ni San* (Frigid Extremities Powder) are two formulas with similar names that must not be confused. These two formulas treat different syndromes (yang deficiency vs. qi stagnation) that share the same symptoms (cold limbs/extremities).

Sì Nì Tāng (Frigid Extremities Decoction)

- *Sì Nì Tāng* (Frigid Extremities Decoction): Yang deficiency with coldness will manifest not only in icy cold limbs/extremities, but also cold sensations everywhere in the body. Comparatively speaking, this type of cold is more severe and will not warm up when exposed to heat because there is an underlying deficiency of *ming men* (life gate) fire. Accompanying symptoms include a withered *shen* (spirit), desire to sleep, intolerance to cold, preference to be in a fetal position, vomiting, abdominal pain, undigested food with diarrhea, and a deep, weak pulse. *Sì Nì Tāng* contains interior warming herbs to warm Kidney yang and boost *ming men* (life gate) fire in order to warm up the limbs/extremities.
- *Sì Nì San* (Frigid Extremities Powder): Qi stagnation blocks and prevents yang qi from properly circulating to the extremities. Patients usually experience coldness below the knees and elbows instead of the entire limbs. In general, these patients warm up faster when the extremities are exposed to heat and blood circulation is restored. Other accompanying signs include abdominal pain and discomfort, diarrhea, and a wiry pulse. In summary, the coldness is due to qi blockage instead of yang deficiency. *Sì*

Nì San is designed with qi-regulating herbs to harmonize and smooth Liver qi flow and open channel circulation to the extremities. This condition is often seen when pathogenic factors invade from the outside and get trapped in the *shaoyang* Liver/Gallbladder channels, coupled with qi stagnation. When yang qi is no longer blocked by qi stagnation, the symptom of cold limbs is relieved.⁹

Original Source: *Shang Han Liu Shu* (Six Texts on Cold-Induced Disorders) by Tao Hua in 1445

COMPOSITION

<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata)	[9g]
<i>Gan Jiang</i> (Rhizoma Zingiberis)	[6g]
<i>Rou Gui</i> (Cortex Cinnamomi)	[3g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	[6g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>chao</i> (dry-fried)	[9g]
<i>Fu Ling</i> (Poria)	[9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	[6g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	[6g]
<i>Ban Xia</i> (Rhizoma Pinelliae), <i>zhi</i> (prepared)	[9g]
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	[3g]

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 2 large bowls of water.

Add 0.1g of *She Xiang* (Moschus) to the warm, strained decoction immediately before ingestion. Once the patient's hands and feet become warm, discontinue the formula.

Huí Yáng Jiù Jí Tāng (Restore and Revive the Yang Decoction)

Note: Herb doses are unavailable from the source text. Suggested doses are listed above in brackets.

CHINESE THERAPEUTIC ACTIONS

- 1. Rescues yang from collapse in emergency situations
- 2. Strengthens qi and generates pulse

CLINICAL MANIFESTATIONS

Extreme yang deficiency with cold factor in *taiyin*, *shaoyin*, and *jueyin*: severe aversion to cold with the body curled up in a fetal position, icy cold extremities, vomiting, diarrhea, absence of thirst, abdominal pain, lack of energy with a constant desire to sleep, shivering, foaming of saliva at the mouth, purplish lips or nails, a pale tongue, a white tongue coating, and a deep and fine or impalpable pulse.

CLINICAL APPLICATIONS

Cardiac failure, cardiac infarction, shock, and prostration.

EXPLANATION

Hui Yang Jiu Ji Tang (Restore and Revive the Yang Decoction) treats severe yang deficiency with excess cold factor affecting *taiyin*, *shaoyin* and *jueyin* in the interior. The yang in this syndrome is extremely fragile and may become separated from yin at any time. Severe aversion to cold with the body curled up in a fetal position and cold extremities are all clinical manifestations of extreme cold of the body. Because the cold is stagnant in the middle *jiao*, the normal Spleen and Stomach functioning are disrupted, causing vomiting, diarrhea, and abdominal

pain. The cold factor may cause severe contraction of the body and obstructed blood circulation, resulting in shivering of the body and purplish lips or nails.

Fu Zi (Radix Aconiti Lateralis Praeparata), *Gan Jiang* (Rhizoma Zingiberis), and *Rou Gui* (Cortex Cinnamomi) warm the interior, tonify yang, and dispel internal cold. *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify qi and strengthen the middle *jiao*. Because interior cold may lead to qi stagnation and damp accumulation, *Chen Pi* (Pericarpium Citri Reticulatae) and *Ban Xia* (Rhizoma Pinelliae) are used to activate qi circulation and eliminate dampness and phlegm that may accumulate as a result of a weak Spleen that is unable to metabolize water. *Wu Wei Zi* (Fructus Schisandrae Chinensis) combines with *Ren Shen* (Radix et Rhizoma Ginseng) to tonify qi and generate pulse, as in the formula *Sheng Mai San* (Generate the Pulse Powder). *She Xiang* (Moschus) opens all twelve channels to dispel cold and enhance the overall effect of the formula. The astringent effect of *Wu Wei Zi* (Fructus Schisandrae Chinensis) prevents the loss of qi by moderating the strong penetrating and dispersing effects of *She Xiang* (Moschus).

In summary, *Hui Yang Jiu Ji Tang* is formulated using the following strategies: *Si Ni Tang* (Frigid Extremities Decoction) and *Rou Gui* (Cortex Cinnamomi) to restore depleted yang, *Liu Jun Zi Tang* (Six-Gentlemen Decoction) to strengthen qi, *She Xiang* (Moschus) to open the

Note: *Hei Xi* (Lead) is a potentially toxic heavy metal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

pills should resemble the size of *Wu Tong Zi* (*Semen Firmianae*), a small seed approximately 5 mm in diameter. Take 30-40 pills per dose on an empty stomach. The source text advises that men should take the pills with a decoction made from *Da Zao* (*Fructus Jujubae*) or salt and *Sheng Jiang* (*Rhizoma Zingiberis Recens*), and women should take the pills with a decoction made from vinegar and *Ai Ye* (*Folium Artemisiae Argyi*). Today, this formula is given in pills, 3-9g of pills per dose with warm water.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder and form into pills with a grain-based liquor. The

CHINESE THERAPEUTIC ACTIONS

1. Warms and tonifies true yang
2. Controls floating yang

Hēi Xí Dān (Lead Special Pill)

CLINICAL MANIFESTATIONS

1. Deficiency of Kidney yang with inability of the Kidney to grasp qi downward: excess condition of the upper body characterized by obstruction of phlegm in the chest with wheezing and dyspnea; and deficiency of the lower body characterized by extremely cold extremities, continuous perspiration with cold sweats, a pale tongue with a thin, white coating, and a deep, faint pulse.
2. *Ben tun* (running piglet): sensations of qi rushing upward from the lower abdomen to the chest, epigastrium and throat; distention and pain in the chest, hypochondrium, epigastrium, and abdomen.
3. Others: cold-type hernia with abdominal pain; borborygmus with loose stools; impotence and infertility in men due to yang deficiency; clear leukorrhea, irregular menstruation and infertility in women due to deficiency and cold of blood.

CLINICAL APPLICATIONS

Acute bronchial asthma, acute exacerbation of chronic bronchitis, and emphysema.

EXPLANATION

Hei Xi Dan (Lead Special Pill) treats severe cases of Kidney yang deficiency with excess in the upper body and deficiency in the lower body. Due to Kidney yang deficiency and its inability to grasp qi downward, there is excess condition in the upper body characterized

by obstruction of phlegm in the chest with wheezing and dyspnea. Because Kidney yang deficiency fails to warm the body, there is deficiency of the lower body characterized by extremely cold extremities, continuous perspiration of cold sweats, a pale tongue with a thin, white coating, and a deep, faint pulse.

Hei Xi (Lead) anchors floating yang, guides qi downward, and relieve wheezing and dyspnea. *Liu Huang* (Sulfur) warms and tonifies *ming men* (life gate) fire to dispel cold. *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Rou Gui* (Cortex Cinnamomi) warm the Kidney and tonify Kidney yang to restore its normal functions. *Yang Qi Shi* (Actinolitum), *Bu Gu Zhi* (Fructus Psoraleae), and *Hu Lu Ba* (Semen Trigonellae) also warm *ming men* (life gate) and dispel cold. *Xiao Hui Xiang* (Fructus Foeniculi), *Chen Xiang* (Lignum Aquilariae Resinatum), *Mu Xiang* (Radix Aucklandiae) and *Rou Dou Kou* (Semen Myristicae) regulate qi, dissolve phlegm, and warm the Kidney. *Chuan Lian Zi* (Fructus Toosendan), a bitter and cold herb, is added to prevent the warm and drying herbs from injuring the body.

CAUTIONS / CONTRAINDICATIONS

- *Hei Xi Dan* is contraindicated during pregnancy.
- This formula is potentially toxic, and should only be used when absolutely necessary and only for a short period of time.

Hei Xi Dan (Lead Special Pill)

Dāng Guī Sì Nì Tāng (Tangkuei Decoction for Frigid Extremities)

當歸四逆湯

当归四逆汤

Pinyin Name: *Dang Gui Si Ni Tang*

Literal Name: Tangkuei Decoction for Frigid Extremities

Alternate Names: *Tang Kuei Su Ni Tang*, *Tang Gui Si Ni Tang*, Tang-kuei and Counterflow Cold Decoction, Chinese Angelica Cold Limbs Decoction, Tangkuei and Jujube CombinationOriginal Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-jing in the Eastern Han Dynasty

COMPOSITION

<i>Dang Gui</i> (Radix Angelicae Sinensis)	9g [12g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	9g
<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g
<i>Xi Xin</i> (Radix et Rhizoma Asari)	9g [1.5-3g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	25 pieces [8 pieces]
<i>Mu Tong</i> (Caulis Akebiae)	6g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients in 8 cups [1,600 mL] of water until 3 cups [600 mL] of the liquid remain. Take 1 cup [200 mL] of the warm, strained decoction three times daily. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Warms the channels and disperses cold
2. Nourishes the blood and opens the collaterals

CLINICAL MANIFESTATIONS

1. Invasion of cold with underlying deficiencies of yang qi and blood: icy cold hands and feet, a pale tongue, a white tongue coating, and a deep, thin pulse, or a thin pulse that is barely palpable.
2. Cold factor attacking the channels and collaterals causing pain at the waist, hips, legs, and feet.

CLINICAL APPLICATIONS

Pain, rheumatoid arthritis, fibromyalgia, sciatica, lumbago,

headache, cancer pain, frostbite, peri arthritis of shoulder, frozen shoulder, peripheral neuritis, Raynaud's disease, thromboangiitis obliterans, hypertrophic myelitis, prostatic hypertrophy, endometriosis, amenorrhea, pelvic inflammatory disease, peptic ulcer disease, post-surgical intestinal adhesion, intestinal colic, psoriasis, chronic urticaria, calluses and corns, allergic rhinitis, and benzene poisoning.

EXPLANATION

Dang Gui Si Ni Tang (Tangkuei Decoction for Frigid Extremities) treats invasion of cold with underlying deficiencies of yang qi and blood. The chief complaint in this syndrome is icy cold hands and feet, which may be caused by three factors. First, the yang qi is deficient, and therefore cannot warm the hands and feet. Second, blood is deficient and unable to nourish the hands and feet. Lastly, the cold factor itself makes the hands and feet more icy and cold. Invasion of cold also obstructs the channels and collaterals, leading to pain at the waist, hips, legs, and feet. A deep, thin pulse or a thin pulse that is

Dāng Guī Sì Nì Tāng (Tāngkuei Decoction for Frigid Extremities)

Dang Gui Si Ni Tang (Tangkuei Decoction for Frigid Extremities)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Invasion of cold with underlying deficiencies of yang qi and blood	<ul style="list-style-type: none"> Icy cold hands and feet: invasion of cold with underlying deficiencies of yang qi and blood Pale tongue with a white tongue coating: presence of deficiency and cold Deep, thin pulse or a thin pulse that is barely palpable: blood deficiency and invasion of cold 	<ul style="list-style-type: none"> Warms the channels and disperses cold Nourishes the blood and opens the collaterals 	<ul style="list-style-type: none"> <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Bai Shao</i> (Radix Paeoniae Alba) tonify and harmonize the blood. <i>Gui Zhi</i> (Ramulus Cinnamomi) and <i>Xi Xin</i> (Radix et Rhizoma Asari) warm the channels, dispel exterior and interior cold, and restore yang qi. <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and <i>Da Zao</i> (Fructus Jujubae) strengthen the Spleen and tonify qi. <i>Mu Tong</i> (Caulis Akebiae) opens the channels and collaterals to facilitate the circulation of qi and blood.

barely palpable indicates invasion of cold with underlying deficiencies.

This formula contains *Dang Gui* (Radix Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba) to tonify and harmonize the blood. *Gui Zhi* (Ramulus Cinnamomi) and *Xi Xin* (Radix et Rhizoma Asari) warm the channels, dispel exterior and interior cold, and restore yang qi. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and *Da Zao* (Fructus Jujubae) strengthen the Spleen, tonify qi, and assist *Bai Shao* (Radix Paeoniae Alba) and *Dang Gui* (Radix Angelicae Sinensis) in producing blood. Finally, *Mu Tong* (Caulis Akebiae) opens the channels and collaterals to facilitate the circulation of qi and blood.

MODIFICATIONS

- With nausea and vomiting due to cold and deficiency of the Stomach, add *Wu Zhu Yu* (Fructus Evodiae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- With painful extremities due to wind and dampness, add *Sang Ji Sheng* (Herba Taxilli) and *Wei Ling Xian* (Radix et Rhizoma Clematidis).
- With soreness and pain of the lower back, add *Niu Xi* (Radix Achyranthis Bidentatae) and *Du Zhong* (Cortex Eucommiae).
- With dysmenorrhea due to coldness, add *Wu Yao* (Radix Linderae), *Xiao Hui Xiang* (Fructus Foeniculi), *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) and *Xiang Fu* (Rhizoma Cyperi).
- With severe deficiency and cold, add *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Gan Jiang* (Rhizoma Zingiberis) and *Huang Qi* (Radix Astragali).
- For extreme cold after an illness, combine with *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).

- With pain in the hips, back, legs and feet caused by blood deficiency and cold accumulation, add *Xu Duan* (Radix Dipsaci), *Niu Xi* (Radix Achyranthis Bidentatae), *Ji Xue Teng* (Caulis Spatholobi) and *Mu Gua* (Fructus Chaenomeles).
- For hernia due to cold, add *Wu Yao* (Radix Linderae), *Xiao Hui Xiang* (Fructus Foeniculi), and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).

CAUTIONS / CONTRAINDICATIONS

Dang Gui Si Ni Tang is contraindicated in patients with yin-deficiency heat.

PHARMACOLOGICAL EFFECTS

Circulatory: Administration of *Dang Gui Si Ni Tang* in rabbits was associated with increased and improved blood perfusion to peripheral parts of the body with a relatively long duration of action.¹

CLINICAL STUDIES AND RESEARCH

1. **Pain:** Use of *Dang Gui Si Ni Tang* has been shown to effectively treat pain in many parts of the body due to various causes. One study reported success in the treatment of 52 postpartum women with general aches and pains using *Dang Gui Si Ni Tang* plus *Huang Qi* (Radix Astragali) and *Sang Zhi* (Ramulus Mori) for 20 days to 3 months.² Another study also reported success using modified *Dang Gui Si Ni Tang* for 2-6 weeks to treat 33 patients with pain in the lower back and legs.³ Lastly, one study reported 93.1% effectiveness in 116 patients with *tong bi* (extremely painful obstruction) using *Dang Gui Si Ni Tang* plus *Huang Qi* (Radix Astragali), *Ji Xue Teng* (Caulis Spatholobi) and others as needed. The treatment protocol was to administer herbs in decoction form daily, for 10 days per course of treatment, for 2-8 courses total.⁴

Dāng Guī Sì Nì Tāng (Tāngkuei Decoction for Frigid Extremities)

2. **Headache:** Eighty-six patients with stubborn headache were treated with modified *Dang Gui Si Ni Tang* with satisfactory results. The herbal formula included *Dang Gui* (Radix Angelicae Sinensis) 15g, *Xi Xin* (Radix et Rhizoma Asari) 3g, *Tong Cao* (Medulla Tetrapanacis) 6g, *Wu Zhu Yu* (Fructus Evodiae) 5g, *Gui Zhi* (Ramulus Cinnamomi) 10g, *Bai Shao* (Radix Paeoniae Alba) 12g, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 10g, *Da Zao* (Fructus Jujubae) 10g, and *Sheng Jiang* (Rhizoma Zingiberis Recens) 12g. Treatment protocol was to administer the herbs in decoction one time daily for acute attack, and in pills (10 grams of the herbs total) two to three times daily for maintenance and prevention. Out of 86 patients, the study reported complete recovery in 31 patients (no recurrence within 6 months), significant improvement in 29 patients (no recurrence within 3 months), slight improvement in 21 patients, and no effect in 5 patients. The overall rate of effectiveness was 94.3%.⁵
3. **Cancer pain:** In one report, 50 patients with pain due to cancer were treated with modified *Dang Gui Si Ni Tang* with good results. The types of cancer included stomach (18 patients), esophageal (15 patients), lung (10 patients), and liver (7 patients). The formula included *Dang Gui* (Radix Angelicae Sinensis) 30-50g, *Bai Shao* (Radix Paeoniae Alba) 50-100g, *Gui Zhi* (Ramulus Cinnamomi) 10-30g, *Xi Xin* (Radix et Rhizoma Asari) 6-15g, *Mu Tong* (Caulis Akebiae) 10-15g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 10-12g, and *Da Zao* (Fructus Jujubae) 5-10 pieces. The herbs were cooked in water for 30 minutes to yield 600 mL of decoction. The treatment protocol was to ingest 150 mL of the decoction every 6 hours for 3 days. Out of 50 patients, the study reported marked improvement in 18 patients, moderate improvement in 24 patients, slight improvement in 3 patients, and no effect in 8 patients. The overall rate of effectiveness was 84%.⁶
4. **Sciatica:** In one study, 18 out of 20 patients with sciatica reported complete recovery using modified *Dang Gui Si Ni Tang* for 6-20 days. Those who had complete recovery did not have a recurrence for 1 year following the initial treatment. The formula included *Dang Gui* (Radix Angelicae Sinensis) 15g, *Niu Xi* (Radix Achyranthis Bidentatae) 15g, *Bai Shao* (Radix Paeoniae Alba) 30g, *Wei Ling Xian* (Radix et Rhizoma Clematidis) 30g, *Ji Xue Teng* (Caulis Spatholobi) 30g, *Gui Zhi* (Ramulus Cinnamomi) 10g, *Zhi Chuan Wu* (Radix Aconiti Praeparata) 10g, *Zhi Cao Wu* (Radix Aconiti Kusnezoffii Praeparata) 10g, *Ru Xiang* (Gummi Olibanum) 10g, *Mo Yao* (Myrrha) 10g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 10g, and *Xi Xin* (Radix et Rhizoma Asari) 3g. Furthermore, 6g of *San Qi* (Radix et Rhizoma Notoginseng) was added for severe pain.⁷ Another study reported 95.5% effectiveness in 31 patients with sciatica using herbs daily for 30 days per course of treatment. The herbal formula contained *Dang Gui Si Ni Tang* plus *Niu Xi* (Radix Achyranthis Bidentatae), *Mu Tong* (Caulis Akebiae), *Wu Shao She* (Zaocys), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).⁸
5. **Frostbite:** One hundred patients with I-II degree frostbite were treated with topical applications of *Dang Gui Si Ni Tang*. The herbal formula included *Dang Gui* (Radix Angelicae Sinensis) 20g, *Gui Zhi* (Ramulus Cinnamomi) 15g, *Bai Shao* (Radix Paeoniae Alba) 20g, *Xi Xin* (Radix et Rhizoma Asari) 5g, *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 5g, *Mu Tong* (Caulis Akebiae) 10g, and *Sheng Jiang* (Rhizoma Zingiberis Recens) 10g. The treatment protocol was to cook the herbs in 500 mL of water. During the cooking process, the affected area was placed in the direction of the vapor for steam therapy. In addition, following the steam therapy, the affected area was soaked in the herbal solution for 15-20 minutes. One pack of herbs may be used up to four times for such topical treatment. The treatment was repeated twice daily, for a total of 6-8 treatments. The study reported improvement in all patients, with reduction of swelling and pain.⁹
6. **Peripheral neuritis:** In one report, 12 patients with peripheral neuritis were treated with good results using modified *Dang Gui Si Ni Tang*. Out of 12 patients, 6 had bilateral neuritis of upper extremities, 4 had bilateral neuritis of lower extremities, and 2 had neuritis in all four extremities. The formula included *Dang Gui* (Radix Angelicae Sinensis) 15g, *Bai Shao* (Radix Paeoniae Alba) 15g, *Da Zao* (Fructus Jujubae) 15g, *Mu Tong* (Caulis Akebiae) 15g, *Gui Zhi* (Ramulus Cinnamomi) 10g, *Xi Xin* (Radix et Rhizoma Asari) 10g, and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 5g. Modifications were made as follow: *Ji Xue Teng* (Caulis Spatholobi) 30g, *Zhi Chuan Wu* (Radix Aconiti Praeparata) 10g, and *Zhi Cao Wu* (Radix Aconiti Kusnezoffii Praeparata) 10g were added for severe pain; and *Wu Gong* (Scolopendra) 2 pieces, *Quan Xie* (Scorpio) 6g, and *Huang Qi* (Radix Astragali) 20g were added for numbness. The preparation procedure was to cook the herbs in 300 mL of water to yield 100 mL of decoction. The treatment protocol was to administer 50 mL of the decoction twice daily. Those with chronic illness were also treated with topical application of herbs in the form of an herbal wash made by cooking the herb residue from the decoction in water. Out of 12 patients, the study reported complete recovery in 9 patients and improvement in 3 patients. The average length of treatment was 11 days, ranging from 6 to 25 days.¹⁰
7. **Periarthritis of shoulder:** Administration of modified *Dang Gui Si Ni Tang* in 20 patients with periarthritis of shoulder was associated with complete recovery in 10

Dāng Guī Sì Nì Tāng (Tangkuei Decoction for Frigid Extremities)

patients, improvement in 8 patients, and no effect in 2 patients. The treatment protocol was to cook the herbs in water, and drink the decoction in equally-divided doses twice daily for 15 days per course of treatment, for 1-2 courses total. The herbal treatment contained *Dang Gui Si Ni Tang* as the base formula, and added *Huang Qi* (Radix Astragali) for qi deficiency; *Hei Lao Hu* (Radix Kadsurae Coccinea) for blood stagnation; and *Wu Shao She* (Zaocys) for migratory pain.¹¹

8. **Frozen shoulder:** One study reported complete recovery in 30 of 32 patients with frozen shoulder when treated with *Dang Gui Si Ni Tang* plus *Ji Xue Teng* (Caulis Spatholobi). The treatment protocol was to administer the herbs in decoction daily, for 12 days per course of treatment, for 1-3 courses total.¹²
9. **Hypertrophic myelitis:** Use of modified *Dang Gui Si Ni Tang* was successful in treating 24 patients with hypertrophic myelitis affecting different areas of the spine. The duration of illness of the patients varied from 6 months to 4 years. Clinical presentations included pain, cold extremities, numbness, and weakness of the muscles. Of 24 patients, the study reported complete recovery in 12 patients, improvement in 11 patients, and no benefit in 1 patient. The overall rate of effectiveness was 95.8%.¹³
10. **Allergic rhinitis:** Sixty-five patients with allergic rhinitis were treated with *Dang Gui Si Ni Tang* plus *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) with 90% effectiveness. Modifications were made as follow: *Xian Mao* (Rhizoma Curculiginis) was added for Kidney yang deficiency; *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria) for Spleen qi deficiency; and *Mai Dong* (Radix Ophiopogonis), *Wu Mei* (Fructus Mume) and *Tai Zi Shen* (Radix Pseudostellariae) for qi and yin deficiencies. The treatment protocol was to administer the decoction daily in the morning and at night, for 30 days per course of treatment, for 1-2 courses. Patients were advised to discontinue all other medications, and avoid all spicy and pungent foods. Of 65 patients, the study reported complete recovery in 38 patients, improvement in 21 patients, and no effect in 6 patients.¹⁴
11. **Psoriasis:** In one study, 32 patients with psoriasis characterized by blood deficiency with exterior wind-cold were treated with herbs with complete recovery in 12 patients, improvement in 17 patients, and no effect in 3 patients. The effectiveness was 90.8%. The herbal treatment included *Dang Gui Si Ni Tang* plus *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Quan Xie* (Scorpio), *Wu Gong* (Scolopendra) and *Mu Dan Pi* (Cortex Moutan). The duration of treatment was 1 month per course of treatment, for 2 courses total.¹⁵
12. **Prostatic hypertrophy:** Use of modified *Dang Gui Si Ni Tang* in 42 patients with prostatic hypertrophy was associated with complete recovery in 20 patients, improvement in 19 patients, and no change in 3 patients. The rate of effectiveness was 92.86%. The herbal treatment contained *Dang Gui Si Ni Tang* plus *Zhi Mu* (Rhizoma Anemarrhenae), *Huang Bo* (Cortex Phellodendri Chinensis), *Niu Xi* (Radix Achyranthis Bidentatae), *Che Qian Zi* (Semen Plantaginis), *Wang Bu Liu Xing* (Semen Vaccariae) and *Chuan Shan Jia* (Squama Manis). Each course of treatment was 10 days.¹⁶
13. **Endometriosis:** One study reported good results using modified *Dang Gui Si Ni Tang* to treat endometriosis in 10 women (between 21-52 years of age; 1 single, and 9 married with children). The base formula contained *Dang Gui Si Ni Tang* plus *E Zhu* (Rhizoma Curcumae), *Chuan Xiong* (Rhizoma Chuanxiong), *Pu Huang* (Pollen Typhae) and *Yi Mu Cao* (Herba Leonuri). *Huang Qi* (Radix Astragali) and *Dang Shen* (Radix Codonopsis) were added for qi deficiency; and smaller doses of *Dang Gui* (Radix Angelicae Sinensis), *Pu Huang* (Pollen Typhae) and *Chuan Xiong* (Rhizoma Chuanxiong) during the period. Herbs were given in decoction daily for 15 days per course of treatment. Of 10 patients, the study reported complete recovery in 2 patients, marked improvement in 6 patients, and no change in 2 patients.¹⁷
14. **Amenorrhea:** Forty-seven of 48 patients with amenorrhea were treated with good success using modified *Dang Gui Si Ni Tang*. The herbal formula contained *Dang Gui* (Radix Angelicae Sinensis), *Gui Zhi* (Ramulus Cinnamomi), *Bai Shao* (Radix Paeoniae Alba), *Xi Xin* (Radix et Rhizoma Asari), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Tong Cao* (Medulla Tetrapanacis), *Da Zao* (Fructus Jujubae), *Yin Yang Huo* (Herba Epimedii), and processed *Huang Qi* (Radix Astragali). Modifications were made by adding *Chai Hu* (Radix Bupleuri), *Niu Xi* (Radix Achyranthis Bidentatae) and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) for qi and blood stagnation; *Cang Zhu* (Rhizoma Atractylodis) and *Xiang Fu* (Rhizoma Cyperi) for overweight individuals with dampness and phlegm accumulation; *Shan Zha* (Fructus Crataegi) for poor appetite; *Yan Hu Suo* (Rhizoma Corydalis) and *Xiang Fu* (Rhizoma Cyperi) for abdominal pain; and *Che Qian Zi* (Semen Plantaginis) for profuse leukorrhea. The treatment protocol was to cook the herbs in water, and administer the decoction in two equally-divided doses, for 10 days per course of treatment, for 2-3 courses total.¹⁸
15. **Pelvic inflammatory disease:** Use of modified *Dang Gui Si Ni Tang* was associated with 94.7% effectiveness in treating 76 patients with pelvic inflammatory disease. The treatment contained this formula plus *Fen Bi Xie*

Dāng Guī Sì Nì Tāng (Tāngkuei Decoction for Frigid Extremities)

(Rhizoma Dioscoreae Hypoglaucae), *Pu Gong Ying* (Herba Taraxaci) and *Jin Yin Hua* (Flos Lonicerae Japonicae) as the base. Additional modifications included *Yan Hu Suo* (Rhizoma Corydalis) and *Chuan Lian Zi* (Fructus Toosendan) for severe pain; *Di Yu* (Radix Sanguisorbae) and *Mian Ma Guan Zhong* (Rhizoma Dryopteridis Crassirhizomatis) for leukorrhea with blood and pus; *Li Zhi He* (Semen Litchi) and *Ju He* (Semen Citri Reticulatae) for lower abdominal swelling and pain; and *Du Zhong* (Cortex Eucommiae) and *Sang Ji Sheng* (Herba Taxilli) for soreness and weakness of the lower back and legs. The duration of treatment was 10 days per course of treatment, for 1-3 courses total. Of 76 patients, the study reported complete recovery in 52 patients, improvement in 20 patients, and no effect in 4 patients.¹⁹

16. Post-surgical intestinal adhesion: *Dang Gui Si Ni Tang* plus *Da Huang* (Radix et Rhizoma Rhei) was used to treat 108 patients with intestinal adhesion following such surgeries as removal of the appendix, gallbladder, and uterus. The herbs were cooked in 800 mL of water to yield 300 mL of decoction. The treatment protocol was to ingest 50 mL of decoction per dose, 5-6 times per day, for 5 days per course of treatment. Most patients were treated with 2-3 courses to control the pain and stabilize the condition. Out of 108 patients, the study reported complete recovery in 63 patients (asymptomatic for 3 months), significant improvement in 41 patients (mild pain only), and no change in 4 patients. The overall effectiveness rate was 96.3%.²⁰

17. Benzene poisoning: One study reported effectiveness using *Dang Gui Si Ni Tang* to treat 20 patients with more than 24 hours of benzene poisoning. Clinical presentations included dark purple discoloration of the face, lips, extremities, and the entire body; cold extremities, weak respiration, a dull facial expression, abdominal pain, spasms, and cramps. In addition to herbal treatment, 8 patients also received oxygen and acupuncture treatments. The mechanism of action of this formula in treating benzene poisoning was attributed to its effect to increase blood perfusion to the brain, heart, and extremities.²¹

(Tāngkuei Decoction for Frigid Extremities plus Evodia and Fresh Ginger)

當歸四逆加吳茱萸生薑湯
当归四逆加吴茱萸生姜汤

Pinyin Name: *Dang Gui Si Ni Jia Wu Zhu Yu Sheng Jiang Tang*

Literal Name: Tāngkuei Decoction for Frigid Extremities plus Evodia and Fresh Ginger

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

<i>Dang Gui</i> (Radix Angelicae Sinensis)	9g [12g]
<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g
<i>Bai Shao</i> (Radix Paeoniae Alba)	9g
<i>Xi Xin</i> (Radix et Rhizoma Asari)	9g [1.5-3g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	
Praeparata cum Melle)	6g
<i>Mu Tong</i> (Caulis Akebiae)	6g [3g]
<i>Da Zao</i> (Fructus Jujubae), <i>bo</i> (opened)	25 pieces [8 pieces]
<i>Wu Zhu Yu</i> (Fructus Evodiae)	2 cups [5g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	24g [15g]

The source text states to cook the ingredients in 6 cups [1,200 mL] of water and 6 cups [1,200 mL] of grain-based liquor until 5 cups [1,000 mL] of the liquid remain. Take the warm, strained decoction in five equally-divided doses. Today, the decoction may be prepared using the doses suggested in brackets.

Dang Gui Si Ni Jia Wu Zhu Yu Sheng Jiang Tang (Tāngkuei Decoction for Frigid Extremities plus Evodia and Fresh Ginger) combines *Dang Gui Si Ni Tang* with *Wu Zhu Yu* (Fructus Evodiae) and *Sheng Jiang* (Rhizoma Zingiberis Recens). These two herbs are added to this formula to dispel chronic cold in the body in addition to tonifying blood and yang qi. Grain-based liquor is used to enhance the overall effect of dispelling cold and opening collaterals. Clinically, patients may show loose stools, vomiting, abdominal pain, a fine pulse that is barely palpable, and other symptoms related to chronic coldness.

In comparing the two formulas, *Dang Gui Si Ni Jia Wu Zhu Yu Sheng Jiang Tang* (Tāngkuei Decoction for Frigid Extremities plus Evodia and Fresh Ginger) more strongly warms the channels and disperses cold than *Dang Gui Si Ni Tang*, and is therefore more suitable to treat patients with chronic coldness in addition to blood and yang qi deficiencies.

AUTHORS' COMMENTS

According to the source text, "*Tong Cao*" is stated as an ingredient in *Dang Gui Si Ni Tang*. The identity of this herb has been questioned, since "*Mu Tong*" and "*Tong Cao*" are two herbs with similar pinyin names and functions, and have been used interchangeably in the past. Both herbs have functions to promote urination and treat *lin zheng* (dysuria syndrome). However, *Mu Tong* (Caulis Akebiae) can open the channels and collaterals to treat pain, while *Tong Cao* (Medulla Tetrapanacis) can unblock

Dāng Guī Sì Nì Tāng (Tangkuei Decoction for Frigid Extremities)

and promote lactation. Therefore, based on the indications of the formula and the functions of these two herbs, most scholars and clinicians agree that *Mu Tong* (Caulis Akebiae) is a more suitable herb than *Tong Cao* (Medulla Tetrapanacis) in *Dang Gui Si Ni Tang*.

There are three “*si ni* (frigid extremities)” formulas that are commonly used. Although they share similar names, they have distinct functions.

- *Si Ni San* (Frigid Extremities Powder) is a harmonizing formula that treats cold extremities caused by the advancement of exterior pathogenic factor into the interior. Its main function is to harmonize the exterior and interior and remove stagnation.
- *Si Ni Tang* (Frigid Extremities Decoction) is an interior-warming formula that resuscitates yang. It is an extremely hot formula that treats icy cold extremities caused by depletion of yang that is on the verge of collapse. The formula dispels cold, tonifies yang, and prevents collapse.
- *Dang Gui Si Ni Tang* (Tangkuei Decoction for Frigid Extremities) is an interior-warming formula to warm the channels and dispel cold. It treats cold extremities caused by cold with underlying deficiencies of yang qi and blood. It dispels cold, warms the yang, nourishes the blood, and opens the channels and collaterals.

According to Dr. Chang Wei-Yen, *Dang Gui Si Ni Tang* can be used in a small amount to treat angina or cardiac infarction, since it has the effect to open the vessels. Furthermore, *Dang Gui Si Ni Tang* can be combined with *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction) for maximum effect.

Huáng Qí Guì Zhī Wǔ Wù Tāng

(Astragalus and Cinnamon Twig Five-Substance Decoction)

黃耆桂枝五物湯

黄芪桂枝五物汤

Pinyin Name: *Huang Qi Gui Zhi Wu Wu Tang*
Literal Name: Astragalus and Cinnamon Twig Five-Substance Decoction
Alternate Names: *Huang Chi Wu Wu Tang*, *Huang Qi Wu Wu Tang*, Astragalus Five-Component Decoction, Astragalus Five-Herbs Decoction, Astragalus Five Decoction, Astragalus and Cinnamon Five Herb Combination
Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Huang Qi</i> (Radix Astragali)	9g [12g]
<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g
<i>Bai Shao</i> (Radix Paeoniae Alba)	9g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	18g [12g]
<i>Da Zao</i> (Fructus Jujubae)	12 pieces [4 pieces]

DOSAGE / PREPARATION / ADMINISTRATION

Cook the herbs in 6 cups [1,200 mL] of water until it is reduced to 2 cups [400 mL]. Take 0.7 cup [140 mL] of the warm, strained decoction in three equally-divided doses. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi and warms the channels
2. Harmonizes the *ying* (nutritive) level and unblocks obstruction

CLINICAL MANIFESTATIONS

Xue bi (blood painful obstruction): numbness of the extremities, and a slightly rough and tight pulse.

CLINICAL APPLICATIONS

Periarthritis of the shoulders, synovitis of the knees, neck and shoulder pain, peripheral neuritis, diabetic

neuropathy, peripheral neuropathy, polyneuropathy, hemiplegia, muscle paralysis, facial paralysis, restless leg syndrome, beriberi, and frostbite.

EXPLANATION

Huang Qi Gui Zhi Wu Wu Tang (Astragalus and Cinnamon Twig Five-Substance Decoction) is designed to treat *xue bi* (blood painful obstruction). This condition begins in individuals with underlying weakness and deficiency. When the individuals are exposed to the wind, they experience obstruction of qi and blood circulation, which leads to localized numbness of the limbs and extremities. In severe cases, there may be muscle aches and pain. The slightly rough and tight pulse is representative of blood stasis.

Huang Qi (Radix Astragali) tonifies *wei* (defensive) qi and consolidates the exterior. *Gui Zhi* (Ramulus Cinnamomi) disperses wind-cold and opens the channels.

Huang Qi Gui Zhi Wu Wu Tang (Astragalus and Cinnamon Twig Five-Substance Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Xue bi</i> (blood painful obstruction)	<ul style="list-style-type: none">• Numbness of the extremities: exterior wind blocking qi and blood circulation• Slightly rough and tight pulse: blood stasis	<ul style="list-style-type: none">• Tonifies qi and warms the channels• Harmonizes the channels and unblocks obstructions	<ul style="list-style-type: none">• <i>Huang Qi</i> (Radix Astragali) tonifies <i>wei</i> (defensive) qi and consolidates the exterior.• <i>Gui Zhi</i> (Ramulus Cinnamomi) disperses wind-cold and opens the channels.• <i>Bai Shao</i> (Radix Paeoniae Alba) nourishes the blood and harmonizes the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) dispels wind-cold.• <i>Da Zao</i> (Fructus Jujubae) tonifies qi and blood.

Huáng Qí Guì Zhī Wǔ Wù Tāng

(Astragalus and Cinnamon Twig Five-Substance Decoction)

The combination of *Huang Qi* (Radix Astragali) and *Gui Zhi* (Ramulus Cinnamomi) tonifies qi, warms yang, harmonizes the blood, and opens the channels. *Bai Shao* (Radix Paeoniae Alba) nourishes the blood and harmonizes the *ying* (nutritive) level. The combination of *Gui Zhi* (Ramulus Cinnamomi) and *Bai Shao* (Radix Paeoniae Alba) also harmonizes the *ying* (nutritive) and *wei* (defensive) levels. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Gui Zhi* (Ramulus Cinnamomi) dispel wind-cold. *Da Zao* (Fructus Jujubae) tonifies qi and blood.

MODIFICATIONS

- With weak arms and hands, double the dose of *Gui Zhi* (Ramulus Cinnamomi).
- With weak knees and legs, add *Niu Xi* (Radix Achyranthis Bidentatae).
- With weak tendons, add *Mu Gua* (Fructus Chaenomelis).
- With deficiency of *yuan* (source) *qi*, add *Ren Shen* (Radix et Rhizoma Ginseng).
- With deficiency of yang, add *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With hemiparalysis affecting the left side, add *Dang Gui* (Radix Angelicae Sinensis).
- With hemiparalysis affecting the right side, double the dose of *Huang Qi* (Radix Astragali).
- With numbness of the body, add *Dang Gui* (Radix Angelicae Sinensis) and *Fang Feng* (Radix Saposhnikoviae).
- With painful extremities, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fang Ji* (Radix Stephaniae Tetrandrae).
- With numbness and pain due to blood stagnation, combine with *Si Wu Tang* (Four-Substance Decoction).
- With numbness and pain due to wind obstruction, combine with *Xu Ming Tang* (Prolong Life Decoction).
- If there is more wind, add *Fang Feng* (Radix Saposhnikoviae) and *Fang Ji* (Radix Stephaniae Tetrandrae).
- If there is more blood stasis, add *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami).
- When there is pain in postpartum women or after the menstrual cycles, add *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong) and *Ji Xue Teng* (Caulis Spatholobi).

CLINICAL STUDIES AND RESEARCH

1. **Periarthritis of the shoulders:** Integrative treatment using herbs and *tui-na* was effective in treating 63 patients with periarthritis of the shoulders. The herbal formula contained *Huang Qi* (Radix Astragali) 15g, *Gui Zhi* (Ramulus Cinnamomi) 5g, *Chi Shao* (Radix Paeoniae Rubra) 5g, *Bai Shao* (Radix Paeoniae Alba) 5g, *Da Zao* (Fructus Jujubae) 5g, *Qiang Huo* (Rhizoma et Radix Notopterygii)

5g, *Du Huo* (Radix Angelicae Pubescentis) 5g, *Fang Feng* (Radix Saposhnikoviae) 5g, *Dang Gui* (Radix Angelicae Sinensis) 5g, *Chuan Xiong* (Rhizoma Chuanxiong) 5g, *Xi Xin* (Radix et Rhizoma Asari) 5g, and *Sheng Jiang* (Rhizoma Zingiberis Recens) 5g. Modifications were made as follow: *Zhi Chuan Wu* (Radix Aconiti Praeparata) 3-6g and *Zhi Cao Wu* (Radix Aconiti Kusnezoffii Praeparata) 3-6g were added for severe pain characterized by cold; *Xu Duan* (Radix Dipsaci) 9g and *Du Zhong* (Cortex Eucommiae) 9g were added for elderly patients with Liver and Kidney deficiencies; *Sang Zhi* (Ramulus Mori) 15g and *Shen Jin Cao* (Herba Lycopodii) 12g were added for stiff joints with limited range of motion; and *Di Long* (Pheretima) 9g and *Wu Shao She* (Zaocys) 30g were added for chronic arthritis. Of 63 patients, the study reported complete recovery in 26 patients, significant improvement in 31 patients, and moderate improvement in 6 patients. The duration of treatment varied from 14-48 days, with an average of 29 days.¹

2. **Synovitis of the knees:** Thirty-eight patients with synovitis of the knees responded well to herbal treatment and physical therapy. Herbal treatment contained *Huang Qi* *Gui Zhi* *Wu Wu Tang* plus *Dang Gui* (Radix Angelicae Sinensis). The herbs were given in decoction daily, for three weeks per course of treatment. The duration of treatment varied from 14-42 days. Of 38 patients, 32 had complete recovery and 6 had moderate improvement.²
3. **Neck and shoulder pain:** One study reported marked effect using modified *Huang Qi* *Gui Zhi* *Wu Wu Tang* to treat 48 patients with neck and shoulder stiffness and pain. In addition to *Huang Qi* *Gui Zhi* *Wu Wu Tang* as the base formula, *Mu Gua* (Fructus Chaenomelis) was added for stiff muscles with limited mobility; *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong) were added for numbness; and *Ju Hua* (Flos Chrysanthemi) was added for dizziness. The herbs were given in decoction for 7 days per course of treatment. Of 48 patients, the study reported complete recovery in 20 patients, significant improvement in 18 patients and moderate improvement in 10 patients.³
4. **Bi zheng (painful obstruction syndrome):** Use of *Huang Qi* *Gui Zhi* *Wu Wu Tang* was associated with good therapeutic effect to treat *bi zheng* (painful obstruction syndrome) characterized by yang deficiency and invasion cold and its subsequent obstruction of the channels and collaterals. The herbal treatment contained *Huang Qi* *Gui Zhi* *Wu Wu Tang* plus *Gu Sui Bu* (Rhizoma Drynariae), *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci), and *Dang Gui* (Radix Angelicae Sinensis). Of 114 patients, the study reported significant improvement in 111 patients and no effect in 3 patients. The average

Huáng Qí Guì Zhī Wǔ Wù Tāng

(Astragalus and Cinnamon Twig Five-Substance Decoction)

duration of treatment was 5.4 packs of herbs, though the range was between 2 to 120 packs.⁴

5. **Peripheral neuritis:** *Huang Qi Gui Zhi Wu Wu Tang* was reported in several studies to effectively treat peripheral neuritis. According to one study, 51 patients with peripheral neuritis were effectively treated with *Huang Qi Gui Zhi Wu Wu Tang* plus *Sang Ji Sheng* (Herba Taxilli) and *Ji Xue Teng* (Caulis Spatholobi) as the base formula, with addition of *Mo Yao* (Myrrha) for severe pain; *Yi Yi Ren* (Semen Coicis) for swelling; *Tao Ren* (Semen Persicae) for dark purple skin appearance; *Jiang Huang* (Rhizoma Curcumae Longae) for neuritis in the upper limbs; and *Ren Shen Yang Ying Tang* (Ginseng Decoction to Nourish the Nutritive Qi) for neuritis in the lower limbs. Of 51 patients, the study reported complete recovery in 36 patients, improvement in 11 patients, and no effect in 4 patients.⁵ According to another study, 198 patients with neuritis were treated with complete recovery in 195 patients, improvement in 2 patients, and no effect in 1 case. In addition to *Huang Qi Gui Zhi Wu Wu Tang*, *Sang Zhi* (Ramulus Mori), *Dang Gui* (Radix Angelicae Sinensis) and *Xi Xin* (Radix et Rhizoma Asari) were added for yang deficiency and cold obstruction; *Dang Gui* (Radix Angelicae Sinensis), *Ji Xue Teng* (Caulis Spatholobi) and *Sang Zhi* (Ramulus Mori) were added for blood deficiency; and *Ren Dong Teng* (Caulis Lonicerae Japonicae), *Tong Cao* (Medulla Tetrapanacis) and *Di Long* (Pheretima) were added, and *Gui Zhi* (Ramulus Cinnamomi) was removed for the presence of damp-heat.⁶
6. **Diabetic neuropathy:** One study reported 100% effectiveness using modified *Huang Qi Gui Zhi Wu Wu Tang* to treat diabetic neuropathy. The herbal treatment contained this formula plus *Jiang Can* (Bombyx Batryticatus), *Quan Xie* (Scorpio), *Wu Gong* (Scolopendra) and *Di Long* (Pheretima). Modifications included addition of *Sang Zhi* (Ramulus Mori) for burning sensations at the affected area; and *Fu Zi* (Radix Aconiti Lateralis Praeparata) for cold sensations. The herbs were given for 15 days per course of treatment. Of 30 patients, the study reported near-complete recovery in 13 patients, significant improvement in 10 patients, and moderate improvement in 7 patients.⁷ Another study reported 85.71% effectiveness using modified *Huang Qi Gui Zhi Wu Wu Tang* to treat 42 patients with peripheral neuropathy. The herbal treatment contained *Huang Qi Gui Zhi Wu Wu Tang* plus *Dang Gui* (Radix Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubra), *Ge Gen* (Radix Puerariae Lobatae), *Shan Yao* (Rhizoma Dioscoreae), *Shan Zhu Yu* (Fructus Corni), and *Ji Xue Teng* (Caulis Spatholobi) as the base formula. Additional modifications were made as needed to address complications of diabetes mellitus. The herbs were given for 10 days per course of treatment. Of 42 patients, the study reported significant improvement in 24 patients, moderate improvement in 12 patients, and no effect in 6 patients.⁸
7. **Frostbite:** Modified *Huang Qi Gui Zhi Wu Wu Tang* was reported in one study to effectively treat 566 patients with frostbite. The herbal treatment contained *Huang Qi Gui Zhi Wu Wu Tang* plus *Ji Xue Teng* (Caulis Spatholobi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) as the base formula. Modifications were made based on the area affected, and included addition of *Bai Zhi* (Radix Angelicae Dahuricae) and *Chuan Xiong* (Rhizoma Chuanxiong) for the face; *Jiang Huang* (Rhizoma Curcumae Longae) and *Gui Zhi* (Ramulus Cinnamomi) for upper limbs; *Niu Xi* (Radix Achyranthis Bidentatae) and *Du Huo* (Radix Angelicae Pubescentis) for lower limbs; *Tao Ren* (Semen Persicae), *Chuan Shan Jia* (Squama Manis) and *Dang Gui* (Radix Angelicae Sinensis) for bruises and swelling; *Fu Ling* (Poria), *Wu Shao She* (Zaocys), *Cang Zhu* (Rhizoma Atractylodis) and *Yi Yi Ren* (Semen Coicis) for blisters; *Xi Xin* (Radix et Rhizoma Asari), *Ru Xiang* (Gummi Olibanum) and *Cong Bai* (Bulbus Allii Fistulosi) for severe pain; *Di Long* (Pheretima), *Hai Feng Teng* (Caulis Piperis Kadsurae) and *Quan Xie* (Scorpio) for numbness; and *Tu Fu Ling* (Rhizoma Smilacis Glabrae), *Da Xue Teng* (Caulis Sargentodoxae) and *Bai Jiang Cao* (Herba cum Radice Patriniae) for swelling, redness and pain. Of 566 patients, the study reported significant improvement in 453 patients and moderate improvement in 95 patients.⁹
8. **Restless leg syndrome:** Use of modified *Huang Qi Gui Zhi Wu Wu Tang* was associated with good results in treating 18 patients with restless leg syndrome. The herbal formula contained *Huang Qi* (Radix Astragali) 30g, *Gui Zhi* (Ramulus Cinnamomi) 12g, *Chuan Xiong* (Rhizoma Chuanxiong) 15g, *Dang Gui* (Radix Angelicae Sinensis) 12g, *Xi Xin* (Radix et Rhizoma Asari) 3g, *Di Long* (Pheretima) 12g, *Chuan Niu Xi* (Radix Cyathulae) 15g, *Bai Shao* (Radix Paeoniae Alba) 30g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g. Modifications were made by adding *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 30g and *Ji Xue Teng* (Caulis Spatholobi) 30g for numbness and weakness of the extremities with qi and blood deficiencies; *Tao Ren* (Semen Persicae) 9g, *Hong Hua* (Flos Carthami) 9g, and *Huang Qi* (Radix Astragali) 60g for numbness and weakness of the extremities with qi deficiency and blood stagnation; and *Fu Zi* (Radix Aconiti Lateralis Praeparata) 12g and *Ma Huang* (Herba Ephedrae) 6g for cold extremities with yang deficiency. The herbs were given in decoction daily, with duration of treatment ranging from 6-25 packs of herbs. Of 18 patients, the study reported complete recovery in 12

Huáng Qí Guì Zhī Wǔ Wù Tāng

(Astragalus and Cinnamon Twig Five-Substance Decoction)

patients, significant improvement in 3 patients, moderate improvement in 2 patients, and no change in 1 patient.¹⁰

9. **Pulmonary heart disease:** One study reported marked success using *Huang Qi Gui Zhi Wu Wu Tang* to treat 70 patients with pulmonary heart disease. Use of the formula was associated with elevated plasma levels of prealbumin, transferrin and fibronectin, and lowered levels of C-reactive protein, ceruloplasmin, haptoglobin, alpha 1-antitrypsin and alpha 1-acid glycoprotein. In comparison, in the control group, which did not receive any herbs, only the levels of ceruloplasmin and C-reactive protein decreased significantly. The study stated that *Huang Qi Gui Zhi Wu Wu Tang* may enhance the therapeutic effects for pulmonary heart disease, regulate the metabolism of plasma proteins, and improve the quality of life of such patients.¹¹

AUTHORS' COMMENTS

Dang Gui Si Ni Tang (Tangkuei Decoction for Frigid Extremities) and *Huang Qi Gui Zhi Wu Wu Tang* both warm the channels and dispel cold.

- *Dang Gui Si Ni Tang* is best at nourishing blood and opening the channels and collaterals.
- *Huang Qi Gui Zhi Wu Wu Tang* is mainly used for *bi zheng* (painful obstruction syndrome) in post-stroke patients, since it is better at tonifying qi and warming the channels and collaterals.

Huang Qi Gui Zhi Wu Wu Tang is a variation of *Gui Zhi Tang* (Cinnamon Twig Decoction), without *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and with the addition of *Huang Qi* (Radix Astragali) and a higher dose of *Sheng Jiang* (Rhizoma Zingiberis Recens). Both formulas contain *Gui Zhi* (Ramulus Cinnamomi) to warm the channels and dispel cold.

Chapter 7 — Summary

— Interior-Warming Formulas

SECTION 1: MIDDLE-WARMING AND COLD-DISPELLING FORMULAS

Name	Similarities	Differences
<i>Li Zhong Wan</i> (Regulate the Middle Pill)		Standard formula to treat deficiency and cold of the middle <i>jiao</i>
<i>Fu Zi Li Zhong Wan</i> (Prepared Aconite Pill to Regulate the Middle)	Warm the middle <i>jiao</i> , dispel cold, tonify qi	Stronger effect to tonify yang and dispel cold
<i>Gui Zhi Ren Shen Tang</i> (Cinnamon Twig and Ginseng Decoction)		Releases wind-cold from the exterior
<i>Wu Zhu Yu Tang</i> (Evodia Decoction)	Warms and tonifies the middle <i>jiao</i> , corrects the reversed flow of qi	Directs yin and cold downward
<i>Xiao Jian Zhong Tang</i> (Minor Construct the Middle Decoction)		Harmonizes the interior and relieves pain
<i>Huang Qi Jian Zhong Tang</i> (Astragalus Decoction to Construct the Middle)	Tonify and warm the middle <i>jiao</i> , dispel cold, relieve pain	Harmonizes the interior and relieves pain, tonifies qi
<i>Gui Qi Jian Zhong Tang</i> (Tangkuei and Astragalus Decoction to Construct the Middle)		Harmonizes the interior and relieves pain, tonifies qi and blood
<i>Da Jian Zhong Tang</i> (Major Construct the Middle Decoction)		Corrects the reversed flow of qi, strongly dispels cold and relieves pain
<i>An Zhong San</i> (Calm the Middle Powder)	Warms the Spleen and Stomach, dispels cold	Harmonizes the middle <i>jiao</i> , regulates qi and blood circulation

Li Zhong Wan (Regulate the Middle Pill), *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle), and *Gui Zhi Ren Shen Tang* (Cinnamon Twig and Ginseng Decoction) are three formulas that warm the middle *jiao*, dispel cold, tonify qi, and strengthen the Spleen. They all treat deficiency and cold in the middle *jiao*.

- *Li Zhong Wan* is mainly used for digestive dysfunctions caused by deficiency and cold of the middle *jiao*, leading to symptoms of diarrhea, vomiting, abdominal pain, poor appetite, and no desire to drink. Other applications include bleeding due to yang deficiency, chronic infantile convulsions with drooling, and *xiong bi* (painful obstruction of the chest) due to deficiency and cold of the middle *jiao*.
- *Fu Zi Li Zhong Wan* contains *Fu Zi* (Radix Aconiti Lateralis Praeparata), and is a hotter and more acrid formula that warms and strengthens Spleen and Kidney yang. This formula is best for cold and pain in the chest and abdomen, extreme coldness of the limbs and extremities, and muscle spasms and cramps.
- *Gui Zhi Ren Shen Tang* contains *Gui Zhi* (Ramulus Cinnamomi), and has the added function to release exterior wind-cold. This formula is usually reserved for conditions characterized by deficiency and cold in the interior complicated by wind-cold at the exterior.

Wu Zhu Yu Tang (Evodia Decoction) warms and tonifies the middle *jiao*, corrects the reversed flow of qi, and stops vomiting. It mainly treats vomiting in the *yangming*, *shaoyin*, and *jueyin* levels. The focus is on deficiency and cold of the Stomach, accompanied by rising of yin and cold upward. Other clinical manifestations include fullness of the chest and gastralgia, *jueyin* headache, acid regurgitation, diarrhea, cold limbs, and irritability.

Chapter 7 — Summary

There are four “*jian zhong* (construct the middle)” formulas that warm and tonify the middle *jiao* to dispel cold and relieve pain.

- **Xiao Jian Zhong Tang** (Minor Construct the Middle Decoction) harmonizes and warms the middle *jiao* to relieve pain. The emphasis of this formula is on tonifying middle *jiao* yang deficiency.
- **Huang Qi Jian Zhong Tang** (Astragalus Decoction to Construct the Middle) has the addition of *Huang Qi* (Radix Astragali), which tonifies qi. This formula is more suitable for yang deficiency of the middle *jiao* complicated by qi deficiency.
- **Gui Qi Jian Zhong Tang** (Tangkuei and Astragalus Decoction to Construct the Middle) has the addition of both *Dang Gui* (Radix Angelicae Sinensis) and *Huang Qi* (Radix Astragali) to tonify the blood and qi. This is a good formula for treating chronic abscesses and ulcerations with underlying qi, blood, and yang deficiencies.
- **Da Jian Zhong Tang** (Major Construct the Middle Decoction) relieves pain, corrects the reversed flow of qi, dispels cold, and warms the middle *jiao*. The emphasis of this formula is on reducing the proliferation of yin and cold and tonifying yang deficiency of the middle *jiao*.

Xiao Jian Zhong Tang (Minor Construct the Middle Decoction) and **Da Jian Zhong Tang** (Major Construct the Middle Decoction) both tonify and warm the middle *jiao* to dispel cold and relieve pain.

- **Xiao Jian Zhong Tang** emphasizes tonifying yang, qi, and blood and warming the middle *jiao*.
- **Da Jian Zhong Tang** focuses mostly on dispelling cold and relieving pain.

An Zhong San (Calm the Middle Powder) strengthens and warms the Spleen and Stomach to disperse cold, and harmonizes the middle *jiao* to stop nausea and relieve pain. It is used primarily to treat deficiency and cold of the Spleen and Stomach accompanied by qi and blood stagnation.

SECTION 2: YANG-RESUSCITATING FORMULAS

Name	Similarities	Differences
Si Ni Tang (Frigid Extremities Decoction)		Restores depleted yang
Hui Yang Jiu Ji Tang (Restore and Revive the Yang Decoction)	Rescue yang from collapse	Strengthens qi, generates pulse
Hei Xi Dan (Lead Special Pill)		Controls floating yang, grasps qi downward

Si Ni Tang (Frigid Extremities Decoction) restores depleted yang and rescue from counterflow cold. This is the main formula to rescue and restore yang in the *shaoyin* stage. This Kidney yang depletion manifests in cold extremities, chills, preference to curl up when lying down, lassitude, drowsiness, vomiting, no thirst, abdominal pain, diarrhea, and a faint, fine pulse.

Hui Yang Jiu Ji Tang (Restore and Revive the Yang Decoction) is used in emergency situations when the yang is so depleted that there is danger of it separating from the yin at any time. This formula has the actions to rescue yang from collapse and strengthen qi to restore vitality. Because of the extreme yang deficiency with cold factor in *taiyin*, *shaoyin*, and *jueyin* stages, clinical manifestations will include severe chills, preference to curl up when lying down, icy extremities, vomiting, diarrhea, abdominal pain, lack of energy with constant desire to sleep, shivering, purplish lips or nails, a pale tongue, and a deep, fine pulse.

Hei Xi Dan (Lead Special Pill) treats severe cases of excess condition in the upper body (phlegm obstruction in the Lung) and deficient condition in the lower body (Kidney yang deficiency). Clinical manifestations include wheezing, dyspnea, extremely cold extremities, continuous perspiration with cold sweats, a pale tongue with a thin, white coating, and a deep, faint pulse.

Chapter 7 — Summary

SECTION 3: CHANNEL-WARMING AND COLD-DISPERSING FORMULAS

Name	Similarities	Differences
<i>Dang Gui Si Ni Tang</i> (Tangkuei Decoction for Frigid Extremities)	Warm the channels and collaterals, disperse cold	Stronger effect to nourish the blood
<i>Huang Qi Gui Zhi Wu Wu Tang</i> (Astragalus and Cinnamon Twig Five-Substance Decoction)		Better function to tonify qi

Dang Gui Si Ni Tang warms the channels and collaterals, disperses cold, and nourishes the blood. It is used for invasion of cold with deficiencies of blood and yang qi.

Huang Qi Gui Zhi Wu Wu Tang tonifies qi and warms the channels and collaterals. It treats *xue bi* (blood painful obstruction) due to exterior wind invading and blocking qi and blood circulation.

Chapter 8

— Tonic Formulas

钱乙 Qiān Yǐ

钱乙 Qiān Yǐ, 1032 - 1113.¹

钱乙 Qian Yi

Qian Yi became an orphan at the age of three: his father left home and his mother passed away. Qian was adopted by his aunt, and studied medicine with his uncle. Qian treated his aunt and uncle as his real parents, even after he was told of his true family background.

Qian studied and specialized in pediatrics for over 40 years. At one point, he successfully treated several children of the Imperial family, and was granted the position of 太医 the Supreme Physician. When he retired from the Imperial Palace and returned home, he began to compile his clinical experience. However, because he had *bi zheng* (painful obstruction syndrome) in his hands and could not write, his works were primarily organized by his apprentices. Finally in 1119, six years after his death, *小儿药证直诀 Xiao Er Yao Zheng Zhi Jue* (Craft of Medicinal Treatment for Childhood Disease Patterns) was published. This is considered to be the first and most authoritative text dedicated to pediatrics. In this text, Qian highlighted the importance of using “gentle and moistening” approaches to treat pediatric disorders, and opposed the use of potent herbs for drastic approaches such as attacking, purging, and even tonifying. Furthermore, he strongly emphasized the need to always balance the treatment with tonifying and sedating herbs simultaneously. This principle is reflected in one of his formulas that is among the most commonly used formulas today, *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia).²

Painting of a pediatric clinic from the Song dynasty.

Qian Yi is remembered as 儿科之圣 the Sage of Pediatrics.

Excellent formulas written by Qian Yi include:

- *Sheng Ma Ge Gen Tang* (Cimicifuga and Kudzu Decoction)
- *Xie Bai San* (Drain the White Powder)
- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver)
- *Dao Chi San* (Guide Out the Red Powder)
- *Xie Huang San* (Drain the Yellow Powder)
- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia)
- *Bu Fei E Jiao Tang* (Tonify the Lung Decoction with Ass-Hide Gelatin)

1. Approximate year of birth.
2. The most famous herbal formula by Qian Yi, *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), is also the one that gave him most trouble. When he first prescribed *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), he was ridiculed by his colleagues for deviating from the gold standards established by Zhang Zhong-Jing and his original formulation – *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet). Finally when questioned, he explained that “*Jin Gui Shen Qi Wan* is for adults. Children have abundant yang qi, and if given hot herbs such as *Gui Zhi* (Ramulus Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata), may suffer from heat and nosebleeds.” This explanation silenced his critics, as it showed that not only did Qian Yi understand Zhang Zhong-Jing’s teaching, he was knowledgeable and flexible enough to improve upon it. Today, *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) is frequently used for both pediatric and geriatric patients.

Tonic Formulas (Summary) 696

Chapter 8 — Overview

— Tonic Formulas

Definition: Tonic formulas supplement qi, blood, yin, yang, *jing* (essence) and body fluids to treat various patterns of deficiency syndromes and damage to *zang fu* organs. This method of treatment is known as *bu fa* (tonifying), one of the *ba fa* (eight treatment methods) described in the *Huang Di Nei Jing* (Yellow Emperor’s Inner Classic) in the first or second century, A.D.

~
Tonic formulas
supplement qi, blood,
yin, yang, *jing* and
body fluids to treat
deficiencies of prenatal
or postnatal origin.
~

The term “deficiency syndromes” refers primarily to insufficiencies of qi, blood, yin, yang, *jing* (essence) and body fluids. Although there are many causes of deficiency, the causes can all be categorized as either of prenatal (genetic or gestational) or postnatal (inappropriate diet, overwork, emotional disturbances, or chronic illness) origin. Regardless of prenatal insufficiency or postnatal imbalance, these disorders are characterized by deficiencies of qi, blood, yin, yang, *jing* and body fluids in one or more of the five *zang* (solid organs).

In simple cases, herbs can be prescribed to directly treat the deficiency, such as qi-tonifying herbs to treat qi deficiency, and blood-tonifying herbs to treat blood deficiency. However, because qi, blood, yin and yang are mutually dependent, and the *zang* (solid) and *fu* (hollow) organs are closely connected to each other, deficiency syndromes usually do not occur independently. Rather, deficiency of one often affects the other, leading to deficiencies of multiple substances that affect more than one organ. Therefore, it is common to tonify qi and blood concurrently, or to supplement yin and yang simultaneously.

Besides directly tonifying the substance that is in deficiency, one could incorporate other supplemental strategies to enhance the overall tonifying effect. Examples are as follows:

- The Spleen and Stomach are both responsible for transformation and transportation of food and herbs. In chronic deficiency syndromes, these organs become deficient, which leads to compromised ability to digest and absorb the herbs. In such cases, it is beneficial to tonify the Spleen and Stomach to enhance the absorption of the entire formula, and maximize the overall therapeutic effect.
